Mr. President, I ask unanimous consent that after the disposition of the Tsongas amendment that no other amendments be in order and that time for further debate on the resolution be limited to the time between now and 5:40 p.m. with the time under the control of the distinguished chairman of the Finance Committee and the ranking minority member or their designees. I further ask unanimous consent, Mr. President, that if there is a motion to reconsider the vote that the motion not be debatable and that the vote occur immediately thereon, beginning at the hour of 5:40 p.m. without intervening motion or amendment or further debate.

Mr. BYRD. I believe the distinguished majority leader means that that vote would begin at 5:55 p.m.

Mr. BAKER. I am sorry. At 5:55 p.m., I amend the request.

Mr. President, to explain this, that means that if we do it, then I anticipate that the Tsongas amendment would be adopted by voice vote, that the remaining time which will not be very much will be available for debate on the debt limit, and that the vote would be a 15-minute vote. The regular order would be called for at 15 minutes and that if there is a motion to reconsider it would not be debatable and the rollcall vote would begin at 5:50 p.m. on the motion to reconsider if it is made.

That is the explanation of the request that I have put.

Mr. SYMMS. Mr. President, reserving the right to object, in other words, what the Senator is saying, the imputed interest issue is not going to be resolved today or probably not this year.

Mr. BAKER. Mr. President, I think it is very likely to be resolved this year. I hope, though, that it will not be resolved on this bill. I hope that we will put it on another bill that the distinguished chairman of the Finance Committee has agreed to present as a vehicle on, I suppose, Tuesday that imputed interest can be dealt with. But there will be another opportunity.

Mr. SYMMS. Mr. President, further reserving the right to object, is it the distinguished majority leader's intention we will be back here next week on the continuing resolution at any rate?

Mr. BAKER. Yes; it is.

Mr. SYMMS. Then I am constrained to object. I object. I certainly object.

Mr. BAKER. Very well.

Mr. President, I am prepared to vote on the Tsongas amendment. Mr. President, let me do one thing first.

FURTHER CONTINUING APPROPRIATIONS, 1985

Mr. BAKER. Mr. President, I ask unanimous consent that it may be in order at this time to temporarily lay aside the pending business and proceed instead to the consideration of House Joint Resolution 659 which is at the desk.

Mr. BYRD. Mr. President, what is that?

Mr. BAKER. The continuing resolution.

Mr. President, let me explain before the Chair puts the request that this is the short continuing resolution passed this afternoon by the House of Representatives which extend appropriations until midnight on next Tuesday.

Mr. President, I further ask unanimous consent that no debate be in order and no amendments be in order and that no debate be in order on a motion to reconsider.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution will be stated.

The bill clerk read as follows:

A House joint resolution (H.J. Res. 659) making further continuing appropriations for fiscal year 1985.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee.

There being no objection, the Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. The question is on the third reading and passage of the joint resolution.

The joint resolution (H.J. Res. 659) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr President, I have a matter that is cleared for action by unanimous consent with the minority leader.

I ask unanimous consent that I may proceed as if in morning business.

The PRESIDING OFFICER. Without objections, it is so ordered.

TARIFF TREATMENT OF CERTAIN ARTICLES

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 3398.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House insist upon its amendment to the amendment of the Senate to the text of the bill (H.R. 3398) entitled "An Act to change the tariff treatment with respect to certain articles, and for other purposes", and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That the following are appointed as conferees: Mr. ROSTENKOWSKI, Mr. GIBBONS, Mr. JONES of Oklahoma, Mr. JENKINS, Mr. DOWNEY of New York, Mr. PEASE, Mr. HANCE, Mr. CONABLE, Mr. VANDER JAGT, Mr. ARCHER, and Mr. FRENZEL.

Solely for the consideration of title XI of the House amendment, and sections 255, 302, 304(b)(2), 306(b), and 402, and title IX of the Senate amendment: Mr. DINGELL, Mr. FLORIO, Mr. BROYHILL, Mr. BONKER, Mr. MICA, and Mr. ROTH.

Mr. BAKER. Mr. President, I move that the Senate disagree to the House amendment and agree to the conference requested by the House and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer [Mr. GORTON] appointed Mr. DOLE, Mr. PACKWOOD, Mr. ROTH, Mr. DANFORTH, Mr. LONG, Mr. BENTSEN, and Mr. MATSUNAGA conferees on the part of the Senate.

PUBLIC DEBT LIMIT INCREASE

The Senate resumed consideration of the bill.

Mr. BAKER. Mr. President, it is 15 minutes before 6. The very last moment that the leadership on this side is willing to schedule a rollcall vote is 10 minutes from right now, and even then, if there is a motion to reconsider, it would have to go over until Tuesday.

So, Mr. President, it is not likely that we are going to get this worked out. But if there is still a flicker of possibility, I am willing to suggest the absence of a quorum once more.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. Mr. President, I rise in opposition to the debt ceiling increase. Until Congress resists writing the Government unconditional blank checks, our $200 billion annual deficits will do nothing but mushroom.

We have made little progress in our efforts to curb the deficit. While there has been no lack of flowery speeches on the deplorable state of our national balance sheet, such fine talk has been followed up with relatively little action.

My colleagues and I have advanced a bipartisan solution to the budget problem. We have called for an across-the-board freeze on spending. Senators KASSEBAUM, BIDEN, and BAUCUS have joined me in a sincere effort to halt Government spending in its tracks. Regrettably, this effort was not supported by a majority of Senators.

Now, we are called upon to increase the public debt. By our actions today, and our failure to address the real issue—the Federal deficit—we are shirking our true responsibility. While it is easy to continue to increase the debt ceiling and keep Government spending at its current levels, failure to confront the deficit crisis is jeopardizing the future economic strength of our Nation.

The Congressional Budget Office published a study entitled "Federal Debt and Interest Costs." According to CBO, Federal debt will reach almost $2.5 trillion by fiscal year 1994—$2.5 trillion dollars.

The projections for the future are even more bleak. By 1990, the public debt by U.S. citizens will climb to 46 percent, this is an 11-percent point increase from its current level of 35 percent. During the mid-1970's the public debt fluctuated between 25 and 29 percent of GNP, a ratio that steadily fell since World War II.

CBO notes that the increase in debt and the high nominal interest rates have propelled net interest costs to become the fastest growing item in the Federal budget. Net interest constituted only 7 percent of total budget outlays and 2 percent of GNP during the 1960's and 1970's. Last year, net interest outlays totaled 11 percent of total outlays or $90 billion. CBO projects that by the end of fiscal year 1989, interest costs are anticipated to top $214 billion, or 16 percent of all Government outlays.

As a Member of this body, I can recall how recently we enacted a $1 trillion debt ceiling. This legislation confronts us with the prospect of authorizing a $1.823 trillion debt limit. This is a very pathetic time for representative democracy. Congress as an institution has utterly failed in its attempt to make the difficult political decisions necessary to address the deficit problem. Meanwhile, in my short stay in the Senate, we have saddled the taxpayers with $800 billion of additional debt to finance. Consideration of a higher debt ceiling is a testament to our failure.

I cannot support such an action. I ask all of my colleagues to refuse to perpetuate this charade any longer and vote against this measure. Until we bring the Government to a stop, we will be unable to address the significant budget issues facing us today with the seriousness these issues demand.

Mr. COCHRAN. Mr. President, on the occasion of increasing the limit on our national debt to over $1.8 trillion, it is imperative that we examine carefully the implications of this action as well as the forces that have brought us to this point.

For decades, our Federal Government has accumulated debt as a result of deficit spending. At the same time, our tax system has burdened our people with appalling complexities and has discouraged saving. It is essential to the health of our economy that we get spending under control and simplify our tax system.

The major difficulty associated with any cost-cutting program is determining where and how deeply to cut. There are no easy answers, but we must not exempt any department of Government from the most careful scrutiny.

The recently enacted Deficit Reduction Act put us on the right track by implementing several Grace Commission recommendations for an estimated savings of $3.2 billion. We have now laid the foundation for a policy of fiscal restraint, and we should set priorities, make realistic appraisals of each expenditure, and recognize that consuming capital through deficit spending is a wasteful and unacceptable national policy.

For too long, we have chosen to try to solve problems, economic, social or otherwise, through the Tax Code. The result is a tax system which is burdened with complexities that create suspicion and distrust and cost us nearly $100 billion a year through noncompliance. It is time we made basic changes in our tax system that will result in fairness, with just rewards for those who work and save.

Much has been said over the past few months on the subject of taxes, and whether tax reform is really a smokescreen for raising taxes. I agree with John Chapoton, Assistant Secretary of the Treasury for Tax Policy, who refutes that charge. While the need for more revenue to help reduce the deficit is an important issue that must be debated, Mr. Chapoton has stated that this issue "should be independent of how the tax system should be reformed to make it more efficient."

Several approaches to achieve tax reform have been suggested: The flat-rate income tax, the FAIR tax, the consumed-income tax, and the national sales tax, to name a few. We will be reviewing each of these proposals over the coming months, and as we do, the issues of fairness, simplicity, economic efficiency, human needs, and distribution of tax burden should remain foremost in our minds. It is also important that we recognize the potential consequences of sudden tax simplification and the need for a carefully planned transitional period.

Another essential element in reforming our tax and spending policies is to understand the budget process and how it is used, and abused, to feed the Government's appetite for spending taxpayers' dollars. The object of the Congress when it passed the Budget Act of 1974 was to set budget priorities effectively and efficiently and to control runaway spending.

After struggling through this process for a decade, it is time that we refine our budget procedure in order to achieve these original goals. I sponsored legislation in both the 97th Congress and the 98th Congress to establish a streamlined 2-year budget process with planning through the annual appropriations process.

Under this plan, there would be only one budget resolution, adopted at the beginning of the odd numbered years, using the timetable now used for the first budget resolution. The resolution would have totals for each year of the 2-year fiscal period, starting in October of that odd-numbered year. This proposal would permit, but not require, a revision of that budget resolution during the 2-year fiscal period, but only after approval by a three-fifths vote of each House.

The advantages of biennial budgeting would be to reduce the legislative burden, encourage oversight, and enhance the quality of deliberation. I am convinced that this alternative budget planning cycle would provide a better framework for holding down Federal spending.

Mr. President, there are two other legislative initiatives which I believe will aid us tremendously in our effort to control the budget deficit. These are the balanced budget amendment and the line item veto.

Congress has failed in its effort to control Government spending during the past 25 years. During that period, the budget has run deficits totaling more than $1 trillion against surpluses in only 2 years—1960 and 1969—of $3.5 billion. In the past decade—fiscal years 1974 through 1984—Government outlays have risen from $268 billion to $845 billion.

There are those who urge, as did Abraham Lincoln before us, that we should be reluctant to clutter up the Constitution with all kinds of amendments. I agree. But to borrow from the words of Yale law professor Robert Bork, former Solicitor General of the United States, "any systemic malfunctioning of Government serious enough to threaten prosperity and freedom may properly be addressed in the Constitution."

A former Chairman of the Federal Reserve Board, Arthur Burns, has suggested that strong biases exist in our political system in favor of more spending than is desired by the general populace. He contends that the cause of this bias is the rising cost of political campaigns and, quoting him now, "the current proliferation of fund-raising committees that put intense pressure on legislators to vote for spending programs favored by such groups." While Burns notes that a constitutional requirement of a balanced budget would be "drastic therapy," he adds that a decisive measure such as this "may well be needed to assure the American people that our governmental bias toward spending and borrowing is being effectively offset and that they therefore can look forward again to a dollar of stable purchasing power."

Recently, the Oppenheimer Capital Corp. conducted a survey of leading institutional investors that reveals a widespread belief within the financial community that passage of a balanced budget amendment would result in lower interest rates in both the short and long term. One of the most remarkable findings of the survey of leading institutional investors, those whose portfolios include more than $250 billion, is that 83 percent of the respondents believe that the impact of enactment of a balanced budget amendment would be felt in less than 2 years. Sixty-nine percent felt that the impact would be felt in less than 1 year.

The poll asked the following question: "Would congressional approval of a balanced budget amendment influence the level of nominal interest rates?" Of those responding, no fewer than 97 percent predicted that passage would bring down long term interest rates, and 94 percent predicted a resulting downturn in short term rates as well.

One final, important point deserves to be mentioned. A balanced budget amendment is supported by our constituents. A 1983 Gallup Poll, which surveyed only those who had actually read the balanced budget amendment proposal, shows that 71 percent support enactment of the measure.

The line item veto is another weapon that should be added to the arsenal to help control excessive spending. Some sort of line item veto proposal has been offered in every Congress since the Eighty-Ninth. Altogether, over 140 such measures have been introduced since the First Congress.

The annual budget deficit is fast approaching the $200 billion mark. For the past 2 fiscal years, Congress has approved $17 billion more in appropriations than was requested by the President for that same period. If the President had the power to reject portions of these appropriations bills, we may have seen the present deficit reduced substantially. In equivalent circumstances, a private sector enterprise would have taken steps to tighten its belt long ago, eliminating all the systematic inefficiencies in its authorization, management, and operating practices.

Implementing an item veto is one such decisive action that the Federal Government can take in order to mitigate the apparent weakness in the political process and to enable the Federal Government to utilize the Nation's resources more efficiently.

As Senator MACK MATTINGLY, has said, the line item veto would be "far more effective in dealing with the budget nightmare than the current ineffective tools available to Congress."

Mr. President, we hear Senators from both sides of the aisle talk from gavel to gavel about the evils inherent in runaway Government spending. There are better laws and procedures available: tax simplification, the 2-year budget cycle, the balanced budget amendment and the line item veto. I urge the Senate to act on these measures so that we can lessen the burden on our national economic health that the huge national debt represents.

Mr. MOYNIHAN. Mr. President, we are in the final hours of the 98th Congress. And we are under great pressure to adjourn sine die. But there is unfinished business in this Congress, the budget deficit; and this, too, has taken on a sine die character. It has been the

central issue of this entire session of Congress, and may well be the central matter for politics through the rest of the century.

When the administration took office on January 21, 1981, the national debt stood at $932.4 billion, under a debt ceiling of $935.1 billion. Today, less than 4 years later, the national debt is $1.573 trillion, and we are voting on a debt ceiling of $1.8238 trillion. In less than 4 years, the national debt has increased fully 68 percent. And the debt ceiling—which takes account of next year's budget deficit as well as those incurred under the administration's three preceding budgets—has doubled in 4 years.

We have strained to our limits trying to respond to such deficits and debt. In 1982 and again this year, we raised taxes and cut spending for domestic programs. Despite this, the deficit has continued to climb. Something is happening here, something wholly new; something we have not understood.

The President has told us the deficit is falling, from $195 billion in 1983 to $174 billion this year, and that these deficits don't matter much; the situation is not a critical one. But the Congressional Budget Office, the nonpartisan analytical branch of this Congress—now directed by an economist of impeccably conservative credentials, Rudolph Penner—says the deficit is something to worry about. By 1989, CBO forecasts the deficit will be more than $260 billion. It's difficult to remain unconcerned.

On October 1, 1984, the national debt stood at $1.573 trillion. By 1989, using CBO projections of the deficit, the national debt will reach $3.263 trillion.

By that year, 1989, annual interest payments on the Federal debt will reach $214 billion. By then, almost half of the personal income tax receipts will be required just to pay this interest bill.

All this matters. The arguments are now familiar in this Chamber. We have to take money—credit—away from private investment to finance the Federal deficit, but even that is not enough. We have to borrow from abroad, too. According to the economics department of Morgan Stanley, in the latter part of this decade, more than $30 billion a year will go abroad to pay the interest on this foreign borrowing for the Federal deficit. That's more than the Federal Government will spend this year on education, training and employment programs—and certainly more than we will be able to spend for these programs in 1989.

It matters. On February 14, Paul Volcker, the Chairman of the Federal Reserve Board, told the House Banking Committee:

> The net investment position of the United States overseas, built up gradually over the entire postwar period, will in the space of only three years—1983, 1984, 1985—be reversed. The richest economy in the world is on the verge of becoming a net debtor.

It is said that the American public can't understand the deficit. I think we can, if we get the terms of the new problem straight.

In thinking about this wholly new situation, it helps to separate the deficit into two parts. First, what CBO calls the primary deficit. That's the amount of money spent on all Federal programs minus Federal revenues. Second, the amount paid in interest on the outstanding debt.

Contrary to what we hear and what most of us think, until recently primary deficits have been relatively rare. There were two in the 1950's, two in the 1960's. And relatively small—1962's was $300 million, or one-fifteenth of what the Treasury today has to borrow every week. There were six in the 1970's, but still not large ones, save for the $40 billion primary deficit in the postrecession year, 1976.

This pattern continued in 1980 and 1981, until the walloping $105 billion primary deficit in the depression year 1982. But the primary deficit has now slacked off. It was some $61 billion this past fiscal year, that ended this Monday—of a total deficit of $172 billion. And the Congressional Budget Office projects that it will average about $46 billion a year for the rest of the decade.

In the meantime, interest begins to go out of control. In the economist's term, it has become "unstable". In 1980, the Treasury paid out $52 billion in interest payments; this year, the interest bill will reach $111 billion. By 1989, $214 billion.

Here's why. What Keynes called the magic of compound interest works with debt as well as with savings. It starts slowly—seemingly so—and then explodes. It is these interest costs, not the primary deficit, that are behind the explosion of the budget deficit and the national debt. Let me say it once again: While the primary deficit is stable for the rest of the decade, the interest costs will continue to soar.

Here's how it works. If the debt today is $1 trillion—and it's more—and the interest rate paid on this debt is 10 percent and that's more too—in 5 years with no new primary deficits, the debt would soar to more than $1.6 trillion.

This means that, more and more, we will be borrowing largely to pay the interest on the debt, not to finance an imbalance between Federal revenues and spending for Federal programs. The result is the exploding deficit, but in point of fact, an exploding interest deficit, not a program deficit.

This is new. We have never experienced anything like it. If we do not get a hold on this, we will face a crisis unlike any we have ever known.

Deficits do matter, and we cannot eliminate them by simply cutting spending.

On November 17, 1983, I introduced S. 2196, legislation to create a National Commission on Deficit Reduction. The members of the Commission—from the administration, the Congress, the Federal Reserve, and the Congressional Budget Office—would examine the sources of the deficit and its effects on employment, real interest rates, capital formation, investment, and prospects for vigorous economic growth. On this basis, they would propose steps to reduce the deficit, making certain that the burden did not fall disproportionately on any group.

It is my belief that we are heading for terrible economic dislocation—here and abroad—unless we can reach a general political consensus on what to do. This must be preceded by a general agreement on what has happened.

Until such a commission can meet and make recommendations, it does seem clear that the President must submit a budget that at least approaches balance. History—and very recent recent history at that—has shown that when the President proposes a budget far out of balance, it is very difficult for Congress to legislate one in balance.

Such legislation would be far more sound and responsible than the constitutional amendment that has been proposed. It does not seek to append a particular fiscal policy to the Constitution—a document which must endure, and has, as a statement of individual rights and collective responsibilities applicable to all circumstances and all times.

It would not straitjacket the President and the Congress, by requiring a balanced budget every year. We can not abolish the business cycle, and that means there will be circumstances—recessions—when receipts fall. Arbitrarily forcing Congress to cut expenditures to meet lower levels of receipts would only deepen the recession.

Rather, the President must submit a responsible budget to Congress. If not, if the present politics of the budget continue, we all will have abrogated our responsibility to learn from history, and placed the Nation's economy in serious jeopardy.

This debt limit—which is to say nearly unlimited debt—testifies that the stock of Federal debt has become an independent economic force. It is fast absorbing capital, channeling more of our national resources to pay interest, increasingly to foreign investors. This is a cycle of economic decline.

Tryon Edwards, the 19th century New York theologian, wrote, "Hell is truth seen too late." I will say it again. Unless we see this particular truth, we

will find ourselves in a crisis unlike any we have ever seen.

RAISING THE DEBT CEILING

Mr. BINGAMAN. Mr. President, I rise today to voice my strong concern for the pending measure that would raise the national debt ceiling to a record $1.832 trillion.

I have voted to raise the ceiling three previous times since I have been in the Senate. I felt that the Government, like everyone else, should live up to its commitments and pay its bills. However, the debt ceiling bill is the only legislative vehicle now available to the Senate to voice its strenuous opposition to this administration's refusal to come to grips with the massive Federal deficit. For this reason, I must vote against raising the ceiling. While I admit that opposing the debt ceiling provision is a crude and imperfect tool for dealing with the deficit problem, it is the only one we've got.

In the past few months, several legislative attempts have been made to significantly reduce the deficit. I voted for these proposals but they were all defeated. I cosponsored the Hollings freeze proposal which would have imposed a 1-year freeze on domestic spending and 3-percent increases for the next 4 years, except for programs for the most needy—SSI, veterans benefits, food stamps, and health care—which would have grown at the rate of inflation. It would have held defense spending to 4 percent real growth in fiscal years 1985 and 1986 and 3 percent in fiscal years 1987 to 1989. I also voted for the Kassebaum freeze proposal that would have called for an across-the-board freeze in Government spending. With the defeat of these amendments, I then voted for the Chiles amendment that would have trimmed $200 billion from the deficit over 3 years. It would have held defense spending to 4-percent real growth, while allowing spending increases of $27 billion over 1984 levels for important underfunded domestic programs. It also called for $81 billion in new taxes, while protecting low and moderate income families from higher tax burdens. I also voted for measures which would have limited defense spending real growth to 5 percent and 4 percent respectively. While voting for the above constructive measures to reduce the deficit, I had no choice but to vote against the President's "Rose Garden" proposal because it was neither a serious nor an equitable attempt to reduce the deficit. I similarly find today that I have no choice but to say no to attempts to increase the amount of this Nation's debt.

A review of the severity of the deficit problem is appropriate. The source of this problem is simple and understood by most Americans—Government spends more than it takes in. When Government expenditures exceed revenues, the Government has to borrow the rest, thereby increasing the national debt. In the past, Congress always has handled this problem by raising the national debt ceiling. However, this legislative action only adds to the national debt and the interest we have to pay on it—an estimated $144 billion this fiscal year—becomes bigger and bigger.

Today there is about $500 billion available in the financial marketplace through banks and other lenders. When the Government needs to borrow almost half of that to pay its bills, there is not much left for individuals and businesses. Everybody scrambles for the remainder, demand increases and the interest paid to borrow goes up. Every American who wants to borrow money for homes, autos or businesses is adversely affected. This situation has worsened with the jump in the prime rate this week to 13 percent, the fourth increase since mid-March of this year. When interest rates are high and a business can't afford to borrow, it builds fewer factories and buys less equipment. That means fewer jobs and a less productive economy.

The deficit has grown explosively. In 1969, there was a $3.2 billion surplus: 1970 brought a $2.8 billion shortfall. Last year, it was $110 billion. Unless taxes are raised, spending is cut, or some combination of the two is found, the deficit will hit $200 billion this year and keep growing until something is done.

Years of deficits have swelled the national debt to almost $1.383 trillion. Such a large deficit and national debt are just not acceptable. I believe this problem is a serious threat to our economic and political future. We are divided on how we must accomplish our deficit reduction goals. However, we have not yet demonstrated the political courage to make this difficult decision to reduce the deficits that our constituents expect of us.

It is important to inject a sense of realism into our deliberations in the Senate. The deficits we face are growing larger, and they are not going to disappear even if the economy grows at record rates over the next 5 years—unless effective action is taken.

For these reasons, I am compelled to vote against raising the debt limit. And I want my colleagues to know that I will vote against the debt ceiling legislation in the future until this administration and this Congress agrees to take the necessary action to reduce the budget deficit.

Mr. MATHIAS. Mr. President, reluctantly I shall vote to increase the debt to finance this fiscal year's increment to the public debt. But in the future I will no longer vote to finance a budget with which I do not agree.

My vote on the debt limit will be conditioned on the progress being made toward controlling the budget and reducing the deficit.

Mr. President, today the Senate is engaged in an exercise that has become depressingly familiar to all of us. For the 10th time since January 1981, we have before us a proposal to increase the limit on the public debt. And we will, eventually, pass it, as we have passed all the others, because we must or else the Government will not be able to pay its bills. The outcome is inevitable, because we are not free in this case to exercise our independent judgment. Today we arrive at a rendezvous with a destiny we ourselves preordained in this very Chamber 5 months ago, when we adopted a budget for fiscal year 1985 out of balance by about $180 billion.

Today it is pointless for us to rage against that fate, or to beat our breasts about what we are about to do. We will vote to increase the debt limit by $180 billion, because as a practical matter we have no choice. But at the same time, I serve notice that I will no longer automatically vote to finance a deficit I did not vote to create or help to create. In the future, as I continue to search for ways to diminish the staggering deficits we face, I shall support no increase in the debt limit above what is necessary to pay for whatever budget proposal I support.

Since I first came to Congress almost 24 years ago, I have witnessed the passage of well over 40 of these bills. We have used a variety of different euphemisms for these measures: permanent increases in the public debt limit; temporary increases in the public debt limit; temporary extensions of the public debt limit; temporary extensions in the temporary debt limit. These labels cannot obscure one simple fact: each of these bills was necessary because the Government spent more money than it took in. This bill is necessary for the same reason.

As of September 10, 1984, the debt of the U.S. Government stood at 1 trillion, $572 billion, $975 million. The current legal limit on the federal debt is $1 trillion, $573 billion. The Government is now less than $25 million below that legal limit. Since the budget recommended by the President and revised by this Senate for fiscal year 1985, the fiscal year that began October 1, includes a deficit of over $180 billion, it is clear that the Congress must authorize the Government to borrow sufficient funds to cover this deficit.

Our approval of this measure simply echoes our failure of a few months ago. We failed to reduce this deficit. We failed when we approved a budget proposal that closely mirrored the grossly unbalanced budget proposed by the President. We failed when we rejected several alternative budget

proposals, each of which would have reduced this deficit to somewhat more manageable proportions. Because we failed, we have ever since been sleepwalking toward the inevitable: voting an increase in the legal limit of Government debt.

The bill before the Senate today will raise the debt limit to 1 trillion, 823 billion dollars, an increase of almost 250 billion dollars. That increase should be sufficient to allow the borrowing necessary to finance the budget deficit the Congress has approved. But that deficit is $33 billion larger than it would have been had we approved the alternative budget that several of my colleagues and I proposed on April 10, 1984. Had our proposal prevailed, we would still have had this rendezvous to keep. We would still have had to increase the debt ceiling. But that increase would have been some $33 billion less than the one that is now before us.

The Senate rejected the alternative that my colleagues and I proposed, as well as several other alternatives advanced by other Senators. These alternatives, although differing in important details, all shared the goal of getting these deficits down significantly. For that reason I voted for some of these alternative proposals. I did not agree with all of their provisions, but I did find them to be serious, fiscally sound proposals to reduce the deficit that merited support. Unfortunately, a majority of Senators did not share that view.

Instead of adopting any of the more fiscally responsible alternative proposals, the Senate adopted a budget that was only $6 billion closer to balance than the President's original proposal. Worse still, the budget we adopted envisions continuing deficits in the neighborhood of $200 billion for at least another 4 years. I do not believe the economy can tolerate such massive deficits on a continuing basis.

I do not delude myself that we can balance the budget next year. But I do believe that we can do better—much better—than $200 billion deficits every year. The President can do better in the budget he proposes, and the Congress can do better in its disposition of that budget.

Unfortunately, it is too late for this fiscal year. The budget, with its massive deficit, has already been adopted by the Senate; the die is cast; our destiny is sealed. Reluctantly I shall today vote to increase the debt limit to finance this fiscal year's increment to the public debt. But in the future, I will no longer vote to finance a budget with which I do not agree. My vote on the debt limit will be conditioned on the progress we make toward controlling the budget and reducing deficits.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr President, I am committed that no rollcall votes will occur after 6 o'clock today. It is now 13 minutes to 6, according to the clock at the front of the Chamber. I think, as a practical matter, it is not possible to go forward without great difficulty and uncertainty.

What I am going to propose in a moment is that the Senate go into the time for the transaction of routine morning business. What will happen then is when we return to this measure on Tuesday, the Tsongas amendment will be pending and undisposed of. At that time, the Senate can make a judgment on whether it will be dealt with by voice vote or by a rollcall vote.

But, since we are going to have to be back Tuesday, in any event, and since if a rollcall occurs that rollcall vote will extend past 6 o'clock, I ask unanimous consent that the Senate now have a period for the transaction of routine morning business not past the hour of 6:30 p.m. in which Senators may speak for not more than 3 minutes, with the exception of the two leaders. against whom no time limitation will apply.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, there will be no more RECORD votes today.

SENATOR HOWARD BAKER

Mr. DURENBERGER. Mr. President, among the many photos in my office, one has taken on special meaning in the last several weeks: It is the first photo taken of me as a U.S. Senator in 1978.

Two days before the photo was taken, November 7, 1978, I had won the special election to complete the last 4 years of the term to which Hubert Humphrey had been elected in 1976. On November 9, I flew to Washington, DC, to be sworn in as Minnesota's senior Senator.

To tell you the truth, I wasn't certain what to expect as I made my way to the office of the Secretary of the Senate. Fortunately, Minnesotans elected me on the basis of what I wanted to accomplish in the Senate, not how much I knew about the institution.

The photo in my office is of my first swearing-in. And standing at my side is HOWARD BAKER who at that time was completing his first Congress as the distinguished minority leader.

Mr. President, it is my good fortune that HOWARD BAKER has been standing at my side ever since that day—as my colleague, my leader and as my friend. He guided me through my first days in the Senate, he counseled me on the selection of committees, he advised me on setting up an office and, perhaps more than anyone else, he taught me through word and action about what it means to be a U.S. Senator.

I have looked often at the photo during these last several weeks and especially during the last several days—days that have been difficult for the Senate. And every time I look at that photo I am reminded how much I will miss HOWARD BAKER's leadership in the U.S. Senate.

Senator BAKER's skill as majority leader has been cited by many. The praise has been well-deserved. He has served with remarkable distinction, with compassion and understanding, with respect for all Members of this body, with a deep and abiding commitment to his State and his country and with legislative and negotiating skills matched by few. Maybe most importantly, he has served as leader with patience and humor, qualities that often are in short supply but always in great demand.

While we are losing HOWARD BAKER as majority leader, I and many others will continue to count on his friendship and his counsel. And, knowing Senator BAKER, I am certain the country can continue to count on his public service.

Whatever form that public service takes, it will be marked by the same unselfish spirit that we have seen during HOWARD BAKER's 18 years in the Senate. HOWARD BAKER is a remarkable man who has provided remarkable service. I am in a large crowd of those who hope to be party to many, many more years of that service to our country.

Mr. President, before concluding my remarks, I want to offer a few words of tribute to Senator BAKER's outstanding staff. Throughout my 6 years in the Senate it has been a constant pleasure to work with this dedicated group of people.

To those of Senator BAKER's staff who are going on to new endeavors, I wish you well. We will miss you. To those who will continue with the Senate, I look forward to working with you in your new capacities.

SENATOR JOHN TOWER

Mr. DURENBERGER. Mr. President, may I take a few minutes at this time to recognize my distinguished colleague from the great State of Texas upon his retirement from this body.

For nearly a quarter of a century, in some of the most turbulent and interesting decades in our Nation's history, JOHN TOWER has served this Nation and the State of Texas with distinction and earnest awareness of the issues facing the United States, particularly, of course, in the area of our Nation's defense.

Drawing upon a rich background of experience and courage which includes serving in the U.S. Navy in the west-

ern Pacific during World War II, he has served this country and this legislative body with distinguished service as chairman of our Armed Services Committee. While we have sometimes disagreed on the particulars, my confidence in his persistent vigilance and dedication to our Nation's armed services has never wavered.

Senator TOWER has indeed served his Nation and his party well. As chairman of the Republican Policy Committee, a member of the Masons and Shriners, the American Legion, the Texas Historical Society and a leading Republican U.S. Senator, Senator TOWER has persevered in the bright public spotlight of American politics as a distinguished elected official who stands his ground for his convictions.

Mr. President, may I express my best personal wishes to my distinguished colleague from Texas, his wife Lilla and their three daughters, and express the confidence that his retirement from our ranks will signify the beginning of another remarkable chapter in his industrious career.

Thank you, Mr. President.

SENATOR JENNINGS RANDOLPH

Mr. DURENBERGER. Mr. President, I would like to take a moment to recognize the great contributions of a colleague who has been called the Original Washington Monument: the distinguished Senator from West Virginia, JENNINGS RANDOLPH, who will soon begin a well-deserved retirement.

Senator RANDOLPH came to Congress in 1932, an eager 30-year-old freshman Congressman filled with the optimism of the New Deal. As far as anyone can tell, he never lost that eagerness or optimism during 14 years in the House and a subsequent quarter-century in the Senate. Nor did time shake his amiability, savvy, or rock-hard commitment to the people he represents. These are some of the qualities that keep a politician in public service long after many of us might have packed up—voluntarily or not.

During this Congress I have had the pleasure and privilege of serving with Senator RANDOLPH on the Committee on Environment and Public Works, of which he is the ranking member. The distinguished Senator chaired the committee for many years, starting back when it was simply the Committee on Public Works, and his guidance remains invaluable. The addition of environmental issues to the committee's agenda has provided yet another field in which our colleague shows his expertise. He has also made his mark in many other areas, notably as a champion of the rights of the disabled.

Mr. President, the Almanac of American Politics has described Senator RANDOLPH as "one of the most experienced war horses on Capitol Hill." I suppose it is an occupational hazard of octogenarians to be compared to monuments and war horses. But certainly in the case of this man it is done with affection and deep respect. Senator RANDOLPH has served not only his State and his country, but also his colleagues, who have benefited from his example, his leadership, and his counsel.

SENATOR PAUL TSONGAS

Mr. DURENBERGER. Mr. President, a remarkable class of public servants is finishing its first term in the U.S. Senate. The "Class of '78," among whose Members I proudly include myself, has served with distinction and honor. In 6 short years this class already has established its leadership, its innovation in addressing the issues facing our country and its commitment to public service.

The Class of '78 stands out for another reason. By and large, it is a group of people who do not consider themselves to be professional politicians. They are not here to be career Senators.

Typical of this Class of '78 is my distinguished colleague and the junior Senator from Massachusetts PAUL TSONGAS. I have not always agreed with Senator TSONGAS, but I always have listened to his ideas and respected his thoughts. I am sorry to see him leave this body. We will miss him.

It does not surprise me that Senator TSONGAS' final speech today is on fiscal discipline. He has understood that without a cure for the economic problems that have built up over the last 30 years in this country, we cannot address the other pressing domestic problems to which Senator TSONGAS is so committed.

Senator TSONGAS also has been among the most articulate spokesman on capital cost recovery. That is not a concern that one normally would associate with a politician who is usually described as "liberal." Yet, my colleague from Massachusetts recognizes the value of this issue to our future and to the future of our children.

Senator TSONGAS always has urged us to look to the future. Several months ago he took his own advice and looked to his own future. He made the decision that he wanted to devote that future to his family and his personal life. I admire his decision, much as I will miss his voice in the Senate.

Mr. President, I am thankful to have served in the same class as Senator TSONGAS. I thank him for his outstanding work in the last 6 years and I wish him happiness and prosperity as he leaves this body.

SENATOR HOWARD BAKER

Mr. BUMPERS. Mr. President, I would like to take a few minutes to pay tribute to the majority leader.

HOWARD BAKER is probably as universally respected as any majority leader who has ever served in this body. I have absolutely no compunction about saying that in a very nonpartisan way.

I can tell you that in the cloakroom on this side of the aisle I do not believe I have ever heard a single one of my colleagues utter a denigrating or sarcastic word about HOWARD BAKER. And the reason they do not is because he has been eminently fair to us. I have never asked him to call up a bill of mine in the executive session that he has not tried his very best to accommodate me. I have heard our own leader, Senator BYRD, who is not prone to puffery, say the most generous and complimentary things about Senator BAKER.

So I rise to say that regardless of who the leader may be in the coming session of Congress, it is going to be a considerable chore to begin to equal the fairness, the principle, the intelligence, the knowledge of Senate rules—all of those necessary qualities that HOWARD BAKER has in such great abundance.

I did not want to miss this opportunity in the waning days of this session to express by personal gratitude and thanks to him for everything he has done for this body. My guess is that when Senator BAKER writes his memoirs, or even when he begins to speak a little more openly about the Senate after he leaves this body, he will say what everybody here is now feeling; that is, that the Senate is going to have to reform itself. If it does not, it is going to almost cease to function, let alone be a deliberative body. There are going to have to be some fundamental rules changes here.

My own personal view, for example, is that a motion to proceed to take up a bill ought not be debatable. In all fairness when we talk about rules changes, both sides begin to figure out who is going to get the advantage of any proposed change.

The truth of the matter is the Senate is coming into disrepute in this country not because of the rules but because they lend themselves to manipulation and abuse. I have talked to the Senator from Mississippi, Senator STENNIS, many times about this over the last 2 years. He is senior on this side as is Senator RANDOLPH, and they both say—not with nostalgia, but very objectively—that things "ain't" like they used to be around here.

Some things ought not be the way they used to be. We have ethically, in my opinion, cleaned up the Congress dramatically in the past several years. That is to everybody's credit because I

believe that ethically we have as fine a body as we have ever had. But we have been remiss in facing up to fundamental rule changes that would prohibit the very kind of morass we find ourselves in right now.

So sometime after the first of the year one of the first acts I hope of a big number of Senators will be to sign their name to a Senate resolution to have some blue ribbon body study these rules in light of some of the things we have experienced in the last several years with a view to reform. My guess is HOWARD BAKER will be saying "amen" to that.

Finally, I close by saying I wish HOWARD and Joy Godspeed in whatever they choose to do from here out, and I want to express my personal gratitude for his untiring devotion to this body, and his unstinting efforts to be absolutely fair with everybody. I, for one will miss him very much.

Mr. President, I yield the floor, and suggest the absence of a quorum if no other Senator wishes to speak.

Mr. BYRD. Mr. President, will the Senator withhold?

Mr. President, first I wish to commend the distinguished Senator from Arkansas for his statement. It is an applaudable one. It is a timely one and a wise one. He spoke of the motion to proceed and he is precisely correct. The majority leader has the responsibility of determining the program of the Senate, but the majority leader cannot do that efficiently, without a great deal of work, and many times at great expenditure of time unless the majority leader can move to take up a matter without extended debate with the exception of a rules change.

Many times when I was majority leader I was held on a pretty short leash with always a possibility of a filibuster on moving to take up a controversial measure, a second filibuster on the measure itself, a third filibuster which is commonly referred to as the post-cloture filibuster, and possibly other filibusters before final passage of a measure.

I would like to see some rules changes, among them this one in particular, that the distinguished Senator from Arkansas has referred to. Perhaps we could agree to have 1 hour for debate on a motion to proceed—again I say with the exception of a motion to proceed to take up a proposed rules change—with 1 hour debate on the motion to proceed and then vote on that motion to proceed.

That would still leave the opponents of the measure with the opportunity to speak at some extended length of time on the matter itself. The senior Senator from Arkansas is absolutely correct. A majority leader is straitjacketed under the present rules in that he cannot now arrange a program of the Senate with certitude and be able to advise his colleagues with certainty that such and such a matter will, without question, be brought up after no more than an hour's debate if the majority of the Senate so votes.

COMMENDATION OF MR. SASSER

Mr. BYRD. Mr. President, I rise to commend our junior colleague from Tennessee [Mr. SASSER] for his very fine efforts to root out fraud, abuse, waste, and error in Federal programs.

The General Accounting Office, sometimes referred to as the "financial watchdog of Congress," has submitted a report to Senator SASSER on the accomplishments of the GAO's nationwide toll-free fraud hotline over the past 5 years.

It is particularly appropriate that the GAO should submit this report to Senator SASSER, inasmuch as it was the Senator from Tennessee who conceived of the idea of the fraud hotline and, during an appropriation hearing, urged the then-Comptroller General, Elmer Staats, to establish the fraud hotline.

The GAO has now reported that a survey of only 20 percent of the substantiated allegations indicates that the hotline has resulted in the identification of $20 million in misspent Federal funds. In addition, another $24 million in projected savings has resulted from the hotline.

Examples of waste and mismanagement uncovered as a result of the hotline include General Services Administration payments in the amount of $300,000 for vacant office space; federally supported researchers extorting $165,000 from trainees; and individuals illegally collecting Social Security and other Federal pensions.

Over the past 6 years, Senator SASSER has been in the forefront of congressional efforts to trim the Federal budget by hundreds of millions of dollars a year through efforts ranging from eliminating unnecessary travel expenditures by Federal employees to urging the Federal Government to do a better job of collecting its just debts.

Senator SASSER has uncovered other novel ways in which Federal tax dollars are wasted, such as Federal agencies hiring contractors to visit Federal offices to water the plants or the postpaid shipping of our LANCE missile manual and dozens of other military publications to the Lenin Library in Moscow.

Senator SASSER's unstinting efforts to root out fraud, abuse, waste, and error deserve, I believe, the praise of his colleagues and his constituents. His vigilance is to be highly commended.

Mr. President, I ask unanimous consent that a news report from the Sunday, September 30, 1984, issue of the New York Times entitled "U.S. Hot Line on Fraud Shows Handsome Return" be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

U.S. HOT LINE ON FRAUD SHOWS HANDSOME RETURN

WASHINGTON, Sept. 29.—A two-star Army general knew a hot investment opportunity when he saw it. Anticipating a housing shortage when his troop strength was increased, he bought an interest in a hotel near the base he commanded.

A Social Security field supervisor not only attended college on Government time, but got taxpayer-financed help with his homework. He had subordinates type his team papers on working hours.

A man who asserted that he could not walk without crutches was drawing a full disability pension from the Veterans Administration. At the same time he was, without crutches, operating a commercial fishing boat in Texas.

The general, after Army lawyers declared a conflict of interest, took an early retirement. The field supervisor was demoted a Civil Service pay grade. And the fisherman was ordered to repay $55,000 to the Veterans Administration.

Each of them, along with hundreds of other Government workers, contractors and recipients of Government benefits, was reported by people who called the General Accounting Office's toll-free "fraud hot line."

The accounting office, an investigative arm of Congress, says in a new report that 53,000 calls alleging fraud, waste and abuse were received in the first five years after the hot line was established in January 1979.

After initial screening, more than 10,000 of the mostly anonymous tips were relayed to the appropriate agencies, where about 1,100 of the complaints were substantiated, the office said.

"We estimate the hot line referrals have identified about $20 million in misspent Federal funds and have projected savings of another $24 million," the report said. The savings apply to only 20 percent of the substantiated cases because the accounting office and the agencies were unable to make similar estimates for the rest of the complaints that were proved.

The office said the total cost of operating the 24-hour service, which offers confidentially to callers, was $3.4 million over the first five years.

Penalties imposed as a result of hot line calls include jail sentences, fines, loss of Government contracts, demotions and reprimands.

"The most common substantiated cases were work-hour abuse by Federal employees, private use of Government property, fraud by recipients of such payments as welfare, disability and food stamps and lack of compliance with agency procedures," the report said.

More than half the allegations received by the accounting office were referred to four agencies: the Social Security Administration, the Defense Department, the Internal Revenue Service and the Department of Health and Human Services.

SENATOR SASSER THE ORIGINATOR

One caller, however, had the accounting office looking under its own rug. This caller reported correctly that workers in an unidentified unit of the agency were performing administrative duties for a private concern in work hours.

The accounting office refers complaints to the inspector general of the affected agency. Some agencies, including Health and Human Services and the Pentagon, also have their own waste, fraud and abuse hot lines.

At the Federal Aviation Administration, aircraft use was abused. An agency supervisor retired the day after investigators questioned him about using his position to get the agency to lease an airplane that he owned in part. A regional official was denied promotion and reprimanded after a caller said he used an agency aircraft to fly to North Carolina to inspect his beach property.

Senator Jim Sasser, Democrat of Tennessee, who conceived the idea for the hot line, said the device had proven to be a "valuable tool."

For those who want to report wrongdoing in the Government, this toll-free number at the accounting office is 1-800-424-5454. In Washington, the number is 633-6987.

TRIBUTE TO ELLSWORTH BUNKER

Mr. LEAHY. Mr. President, last Thursday my dear friend and a great public servant, Ellsworth Bunker, died in Brattleboro, VT. He was 90 years old. As a businessman, diplomat, and human being, Ellsworth Bunker embodied unselfish devotion to duty and the public interest, and during my 10 years in the Senate, Ellsworth and I became quite close. I turned to him often for counsel on many complex and delicate foreign policy matters.

Prior to devoting his life to public service, Ambassador Bunker enjoyed an extraordinarily successful career in the private sector. For 32 years he worked for his father's company, the National Sugar Refining Co., and during this time learned every facet of that thriving business.

He unselfishly left private life in 1951 to become President Truman's Ambassador to Argentina. During the next three decades, Ellsworth Bunker served as Ambassador to Italy, India, Nepal, and South Vietnam.

In 1962, U.N. Secretary U Thant asked Ambassador Bunker to mediate the dispute between Indonesia and the Netherlands over the Dutch colonial territory of West Irian. Characteristically, Ellsworth accepted this seemingly impossible assignment, as he always did, and within months the intractable dispute was resolved.

In 1964 President Johnson appointed Mr. Bunker Ambassador to the OAS, and he ended up serving as Johnson's troubleshooter throughout Central America. In 1965 he was sent to the Dominican Republic to work out a compromise between warring factions that had plunged that country into bitter civil war. Thanks to his untiring diplomacy, peace and the chance for democracy were restored to the suffering Dominican people.

In his capacity as Ambassador at Large, he served President Nixon as a leader of the U.S. delegation in the difficult and delicate negotiations that resulted in the Panama Canal Treaties.

Ellsworth accompanied President Carter to Panama in 1977 to witness the signing of the treaties, and at the age of 84, was instrumental in ensuring Senate passage of these treaties, despite the organized and sometimes venomous campaign waged by the treaties' opponents. He consulted with Senators constantly during that acrimonious debate and helped us shape the compromise that made ratification possible. It pains me to think of the additional problems we would be facing in Central America today had it not been for the efforts of Ellsworth Bunker.

Mr. President, in his patient, softspoken, deliberate manner, Ellsworth Bunker served Vermont and America as few have done during the life of our Nation. I have lost a friend, and the world has lost a statesman whose mark on the course of history will be evident for many years.

In 10 years in the Senate, I have had to remain in Washington on hundreds of occasions because of unexpected Senate business. On only two or three occasions have I felt truly frustrated by staying to fulfill my Senate duties. This week was one such time.

It was one of the greatest disappointments of my Senate career in not being able to attend Ambassador Bunker's funeral in Vermont. I wanted to express my respect and affection to him and his wife, Ambassador Carol Laise. The two of them have given so much to our country and, together, have truly been among the very most distinguished of Vermonters and Americans.

As a Vermonter and a friend, I extend my friendship, gratitude, and pride to all the Bunker family for this extraordinary couple, and my condolences and that of my family to Ambassador Bunker's wife, Ambassador Carol Laise, and to all his family.

Mr. President, I ask unanimous consent that a more lengthy statement and some of the accolades paid to Ambassador Bunker be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ELLSWORTH BUNKER

At the age of 57, Ellsworth Bunker retired from the sugar refining business and, starting at the top as an ambassador, opened a career in diplomacy which kept him on the go for nearly 30 more years. He was uncommonly good at one particular aspect of it: bringing parties together in a negotiation. In the vexing circumstances of Dutch New Guinea, the Dominican Republic, Vietnam and Panama, he helped produce agreements, in the process gaining a public eminence and—this is unusual—high respect for personal decency. He enjoyed, quietly, being hailed as the fellow who in his 60s, in his 70s, in his 80s, was still going strong.

Lean, slightly bent at the waist, impeccable in herringbone, Ambassador Bunker was courtly and wore a characteristic expression of alertness and serenity. He looked to be a man of the old school, and he was: a gentleman of means performing his obligation of public service. From Harry Truman on, successive presidents found his talents and his reputation too valuable not to employ.

If some wondered whether he had been sent to Vietnam as the American ambassador (1967-73) to put a face of New England probity on a controversial policy, no one who knew him well doubted that he had gone in response to a devotion to duty. Primarily an implementer of policy, he simply could not say no to any President who asked him to take on a new mission.

The Nation agonized over Vietnam. Not Ellsworth Bunker. A businessman, not a philosopher, he accepted the common premises of American capacity and rectitude that produced and sustained the American involvement, and he gave no public sign that he questioned them as the ship went down. At once he took on a new assignment as conegotiator of the Panama Canal treaties. He was, a colleague later wrote, "the good guy rock of Vermont who really got the show on the road."

Afterward Ambassador Bunker went back to Vermont to stay. His home looked east across the Connecticut River into the soft New Hampshire hills. As usual, he and his wife, Ambassador Carol Laise, whom he had married in what he was pleased to call his "most difficult and delicate diplomatic negotiation," rolled down Brattleboro's Main Street in an antique car last summer in the annual Fourth of July parade. He delivered his typical speech: short and patriotic. On Thursday he died at 90 years of age.

[From the Washington (DC) Post, Oct. 3, 1984]

THE DIPLOMAT WHO BEHAVED AS A DIPLOMAT SHOULD

(By Philip Geyelin)

Lyndon Johnson greatly admired what he called "can do" people. So I was only half joking when I suggested to Ellsworth Bunker over lunch in Santo Domingo in 1965 that if he managed to resolved the Dominican Republic's civil war, the President would send him next to Vietnam. Bunker chuckled enigmatically, something he did a lot in his business, which was diplomatic troubleshooting for his government.

But he did bring off a Dominican settlement that has given that once tormented country almost two decades of democratic practice and relative tranquility. And Johnson did send him to Saigon as the American ambassador for six anguishing years. That bad ending never shook the devotion to duty that led Bunker to turn away from private business and take up the practice of diplomacy at age 57.

Nothing ever did, and that's why watching him at work at some of the dozen or so diplomatic assignments he undertook over nearly 30 years was one of those extra dividends you get now and again in the course of covering the diplomatic scene. It was not just that he was extraordinarily good at what he did. That was the point rightly made in the eulogies and obituaries when he died last week at age 90.

Partly it was his proof that the practice of diplomacy rarely fits the stereotype of

striped-pants cookie pushers, nit-picking and double-talking and dissembling to no firm purpose. Well, perhaps he did fit the striped-pants bit—caricatured it almost, with his tall, trim figure, impeccable tailoring, measured words and unflappable inscrutability.

But his public service demolishes the rest of that stereotype. At a time when U.S. foreign policy in the hands of Ronald Reagan and Co. seems dead in the water almost everywhere you look, it also says a lot about what it takes to move diplomacy.

I am not talking just about those positive qualities of character that made Bunker so effective: high intelligence, unquestioned integrity, infinite patience, self-effacing modesty, level temperament. Rahter I have in mind the baggage he didn't bring with him to ambassadorial posts or bargaining tables—political partisanship, for one thing, or ideological frenzy for another.

Now you could say that's nothing special. Partisanship and ideology have their inevitable place in foreign policy. Diplomatic trouble-shooters are supposed to be executors of policy more than formulators of it, and certainly not philosophers. But when that's said, Bunker's performance over the years would still define a significant difference between the way foreign policy has been conducted in the past and the manner and atmosphere in which it is conducted by the Reagan administration.

Bunker worked for every president from Truman to Jimmy Carter—Republicans and Democrats, liberals and conservatives. It is hard to imagine anyone with that sort of curriculum vitae passing a Reagan White House loyalty test.

You could imagine Ellsworth Bunker as U.S. ambassador to the United Nations if he could have found time to squeeze it into his schedule, and he would have been good at it. But you cannot imagine him on the podium at a Republican convention flailing the Democrats while claiming to be one of them and also still holding the job of U.N. ambassador. He had a different sense of the meaning of bipartisanship and also of propriety.

Perhaps nothing better illustrates the difference defined by Bunker's record than the one occasion on which his sense of sound policy and the best interests of the United States collided head-on with Ronald Reagan's, The Panama Canal Treaty, which Bunker brought to a successful conclusion in partnership with Sol Linowitz, was systematically assailed and nearly sabotaged by a conservative opposition led by Reagan. Not being one to stand on false American pride, Bunker could see clearly the potential threat to American security if the canal were left to boil.

The rightness of that judgment ought to be better understood by Reagan than by almost anybody. Panama would not be the invaluable resource it now is for the Reagan policy in Central America had Ellsworth Bunker not seen his duty as he saw it.

Some have said that in Vietnam he was too duty-bound. Bunker simply said he thought the policy he inherited in Saigon would work and that he was wrong about that. But unlike a lot of others who were wrong, he cared enough about the consequences to attend post-mortem seminars on Vietnam; to be an early prominent supporter of the Vietnam War Memorial; to be engaged in his last years in trying to write something about what he had learned.

He called himself "an old-fashioned patriot." But he was from Vermont, and he didn't go in much for chest-thumping or flag-waving or talking a lot about it. He just did a lot about it.

[Brattleboro, (VT) Reformer, Sept. 29, 1984]

FRIENDS, WORLD REMEMBER ELLSWORTH

(By Terry Sprague)

Tributes are pouring in to honor Ambassador Ellsworth Bunker of Dummerston and the world, who died Thursday night.

From his Brattleboro hospital bed, not far from where the 90-year old Bunker lay ill since Sept. 13, former Sen. George D. Aiken spoke of his friend.

Mrs. Lola Aiken said her husband was concerned that Bunker had so much discomfort and that he was sorry to lose him as a friend.

George Aiken, 92, remains in fair condition at Brattleboro Memorial Hospital where has has been a patient since last week.

"The Aikens have lost a friend, but the country lost a real public servant," Mrs. Aiken said. "But, he was awfully lucky to have a wonderful wife in Carol Bunker and some wonderful kids and family. I saw this while they were here."

Bunker and his wife, Carol Laise, a former U.S. ambassador to Nepal, retired in 1978 to his Dummerston farm.

The couple were married in 1967 in Katmandu. She had met Bunker while a political officer in the U.S. Embassy in New Delhi where Bunker was Ambassador to India. Bunker's first wife, Harriet, who died in 1964, and Carol Laise were close friends.

In 1978—following a career that included seven years as U.S. ambassador to South Vietnam at the height of the Vietnam War—the Bunkers retired to their Dummerston home.

"What a beautiful spot, I had almost forgotten. This is where I want to return; this is where Mrs. Bunker and I will live," the Ambassador said in 1966 in a Reformer interview. Bunker had briefly returned home in preparation to leave for Vietnam.

In a tribute to Bunker Friday, Gov. Richard Snelling spoke of the diplomat.

"I am immensely saddened to learn of Ambassador Bunker's death. Vermont is very proud that he chose and loved Vermont.

He was an unusual public servant whose diplomatic successes will be remembered for a very long time.

Many of us, however, will remember him most vividly as a man who aged in years, but who never really did grow old, who had an immense youthful eagerness which he was able to communicate to others.

Born in Yonkers, N.Y., in 1894, Bunker spent 32 years in private business working for his father's company, the National Sugar Refining Co., before becoming a diplomate who served under seven presidents.

Economist, author, professor and friend of Bunker's, John Kenneth Galbraith of Townshend said from his home near Harvard University:

"He was obviously one of the great public figures of our time. He was one of the most accomplished negotiators we have ever known. If we had had Ellsworth Bunker when we negotiated the Mississippi purchase, it would have taken in all the territories to the West Coast.

"I knew him first during World War II. He had the reputation of being the one businessman who came to Washington to help the government without paying attention to his own business. We could always rely on him for absolutely honest assistance. This came up particulaly during World War II and during sugar rationing. Of course, I've known him for all 43 years ever since."

Starting in 1961, Bunker served as ambassador to Argentina, Italy and India, quickly gaining a reputation as an effective mediator.

Vermont's senior Sen. Robert Stafford spoke of Bunker's service to his country.

"Ellsworth Bunker was an outstanding American who served his county faithfully under several presidents. As one of America's most distinguished diplomats he played a prominent role in some of the most important dramas of this century and is deserving of a place in history. Unquestionably, he will be missed very much by his friends in Vermont. And that is a fine testament indeed to this extraordinary man."

His effectiveness as a mediator was recognized by many including President John Kennedy who sent Bunker to settle disputes between hostile factions in Indonesia and Yemen. Later, Kennedy named him to the Organization of American States.

"Ellsworth and his life and his work represented what we believe in and work for at the Experiment," said Charles McCormick, president of Experiment in International Living in Brattleboro, where Bunker had been on the board of trustees a number of years. "He really was convinced that the secret to good diplomacy and mediation was establishing trust in one another among people involved in the issues that he would be negotiating. I think he was so successful because he was the kind of person who inspired that kind of trust in people.

"And I think the qualities he had, that inspired, were his tremendous integrity, his patience with others, his concern for the other person's point of view and his plain thoughtfulness and graciousness.

"He was just never too preoccupied, busy or important not to pay attention to the small personal things, to let the people know he was interested in them.

"From our point of view at the Experiment, we believe building trust between people of different nations and cultures is essential and that the way people are able to do that is to listen to others, to care about their point of view and to work hard to find common ground areas in which Ellsworth was an inspiration."

In 1966, Bunker was named as ambassador to South Vietnam by President Lyndon Johnson. Bunker's outspoken support of South Vietnam's president, Nguyen Van Thieu, angered many critics of the war.

He served in Vietnam through 1973 through its most difficult war years.

Red Gander, president of Marlboro College and a former chief of correspondents for Newsweek magazine, interviewed the Bunkers at their Dummerston home for Gander's program "30 Minutes from Marlboro," which was recently seen on BCTV Channel 8.

"He was one of the greatest statesmen of the post-war era, but he never craved the limelight. He got more done quietly behind the scenes than others accomplished with all their headlines. He was old-fashioned in the best sense of the word—courteous, thoughtful, a man of complete integrity—qualities which made him the finest of American diplomats and the best of friends and neighbors here in Vermont."

After leaving his Saigon post, Bunker became an ambassador at large and was put

in charge of the stalled treaty talks for the Panama Canal. In his last official act, he accompanied President Jimmy Carter to Panama in 1978 for the signing of the treaty.

Vermont's junior Senator, Democrat Patrick Leahy, told the Reformer his feelings about Ellsworth Bunker.

"I told Carol Laise, when I called her today, that when I came to Washington, I only had a small number of people in public life who were among my heroes, Ellsworth was one of them. That is where we really got to know each other.

"It's almost impossible to find a precedent where a couple is so accomplished.

"In the past week, we kind of anticipated this, but it still hurts. I really feel a personal loss. I said on the floor of the Senate today that he brought enormous credit to the United States and to the state of Vermont."

Representative James Jeffords echoed many of the thoughts spoken about Bunker.

"He was a good friend and one of the great aspects of the friendship was our discussions on policies in Central America. He has invited me to talk with him before I go to South America this fall. So I was saddened by his illness and his death.

"He was one of a kind. He had incredible integrity and the willingness to take unpopular positions when in his own mind he thought they were right.

"I had tremendous respect for him.

"Each Fourth of July, I would go to his house for an after the parade party. He loved that day, always looked so forward to it and worried about how his speeches (made at the bandstand on the Common) were received.

"When he traveled all around the world and then he worried about his speech on the Brattleboro Common, that showed what kind of man he was."

[From the Burlington (VT) Free Press, Sept. 29, 1984]

BUNKER'S RECORD SHOULD BE JUDGED BY HIS SUCCESSES

Few people in the nation's diplomatic corps over the years have had as distinguished a career as that of Ambassador Ellsworth Bunker who died Thursday in Brattleboro at the age of 90.

He served under seven presidents and twice won the Medal of Freedom, the nation's highest civilian award, for his work in Europe, Asia and Central America. Under President Carter, he was the chief negotiator for the Panama Canal treaties which drew fire from opponents of the plan to relinquish U.S. control over the canal. Nevertheless, the treaties won Senate approval and Banker helped draft the legislation necessary to fulfill U.S. obligations under the pacts.

Perhaps his most frustrating experience was as ambassador to South Vietnam from 1967 to 1973 when American and South Vietnamese troops were fighting to prevent the North Vietnamese from taking over the country. He deplored the fact that the United States was fighting a "limited war with limited objectives" while the Viet Cong and North Vietnamese army could wage "unrestrained war." When he left Vietnam, a peace agreement had been reached in Paris and U.S. troops were being withdrawn. Responsibility for protection of South Vietnam was handed over to the South Vietnamese army which, though well-equipped with American weapons, was largely inept in the face of its enemies. After North Vietnam resumed the fighting. Bunker deplored the refusal of Congress to appropriate more funds to assist the South Vietnamese.

Yet Bunker's record of achievements must be judged on the basis of an overall record of remarkable success in dealing with other countries.

He was a skillful diplomat who made genuine contributions to stability in the nation's international affairs.

[From the New York Times, Sept. 29, 1984]

ELLSWORTH BUNKER IS DEAD AT 90; ENVOY HAD A KEY ROLE IN SAIGON

(By Albin Krebs)

Ellsworth Bunker, a high-ranking United States diplomat for three decades, died Thursday night at Brattleboro Memorial Hospital in Vermont. He was 90 years old and lived in Dummerston, Vt.

Mr. Bunker was admitted to the hospital with a general viral infection on Sept. 13 and, according to a hospital spokesman, died of complications attributable to his advanced age.

One of this country's most skilled and patient negotiators, Mr. Bunker, who was a businessman for 30 years before turning diplomat, capped a distinguished career by serving as Ambassador to South Vietnam during the six years in which the United States became most deeply embroiled in the Vietnam War.

Before his service in Vietnam, Mr. Bunker had been involved in top-level negotiations to forestall war between the Netherlands and Indonesia when those countries were quarreling over Dutch New Guinea.

SENT TO THE DOMINICAN REPUBLIC

In 1965 he was part of a three-man team sent to the Dominican Republic to keep a cease-fire between warring factions there.

His last major assignment, with the rank of Ambassador at Large, was as the chief United States negotiator in the delicate, protracted and ultimately successful effort to come to agreement with Panama on the Panama Canal treaties.

In these and other assignments, which include stints as Ambassador to Argentina and to India, Mr. Bunker, a tall, stoical, taciturn diplomat who seemed happiest when operating in secrecy, won a reputation as "the unflappable Bunker."

He was also known, in some diplomatic circles, as "The Refrigerator" because of his ability to adapt to trying circumstances without showing emotion. The sobriquet was not always used in a pejorative sense.

PRESIDENTIAL CONFIDENCE

"Bunker could stick with the most tiresomely complex situation without revealing dismay, disappointment or frustration," a former high-level aide to the diplomat said. "He could listen as well as present our viewpoints clearly. He wrote lucid, valuable reports for the President. All Presidents had confidence in him, starting with Harry Truman and going on to Eisenhower, Kennedy, Nixon and Ford."

When asked, in 1975, what had brought him into the diplomatic service after a highly successful business career, Mr. Bunker said simply, "When the President calls on you to do a job, you do it."

And why had he continued the often frustrating life of the diplomat for so many years? "Same reason."

"I'm an old-fashioned patriot," Mr. Bunker said. "I have always assumed that my country was fundamentally right in its dealings with others." In his view, he said the United States, as a great power, assumed a set of major responsibilities, and it was a matter of national honor sullied when the nation failed to live up to them.

"For example, Vietnam," he said. "During my entire stay there, I had to remember that what we did involved our reputation as a great power internationally. We had to persuade the Vietnamese to do for themselves. The object of our diplomacy there, as elsewhere, was the quite proper one of not winning arguments but achieving goals."

EDUCATED AT YALE

Mr. Bunker was born in Yonkers on May 11, 1894. His mother was the former Jean Polhemus Cobb, and his father was George R. Bunker, co-founder of the National Sugar Refining Company. He went to private schools in Dobbs Ferry, N.Y., and was a 1916 graduate of Yale.

As his family had planned for him all along, Mr. Bunker went into the sugar business, learning it from the bottom up, first as a laborer on a raw sugar unloading dock in Yonkers. He spent 13 years learning about refinery operations. Shortly after being elected a director of National Sugar in 1927, he was forced to retire for almost year because of severe arthritis. The ailment plagued him on and off for the rest of his life.

In the early 1930's Mr. Bunker was an officer of National Sugar and of several of its subsidiaries, and a director of the American-Hawaiian Steamship Company. As the first chairman of the Cane Sugar Refiners Association, founded in 1936, he supported lobbies dedicated to lifting quotas on the importation of foreign sugar.

In the 1940's Mr. Bunker invested heavily in sugar-refining companies in Cuba, Puerto Rico and Mexico. He also helped in the formation of the Sugar Research Foundation in New York and was chairman of a governmental advisory agency, the Cane Sugar Refiners War Committee. He became board chairman of National Sugar in 1948.

APPOINTED BY TRUMAN

Mr. Bunker's active business career ended in 1951, when President Truman appointed him to the sensitive post of Ambasador to Argentina. President Juan Domingo Perón was at the height of his power and Argentine-American relations were at an all-time low, notably following President Perón's expropriation of the influential independent newspaper La Prensa.

In his year in Buenos Aires, the fledging diplomat mastered Spanish and enveloped himself in Argentine culture, even attending concerts by backwoods child prodigies in the hope that the people he met on such occasions would give him insights into the Argentine way of life. He won sufficient favor with President Perón to hear the Argentine dictator refer to him as "our country's good friend."

In 1982. Mr. Bunker was appointed Ambassador to Italy, even though he had never seen that country, not even as a tourist, until he took over the embassy in Rome. That did not seem to be a particular disad-

vantage, however, and in the year he spent in Rome he was credited with being an effective negotiator in a controversy involving the Government's closing of several missions of the Protestant Church of Christ in Italy.

Having joined the State Department at the behest of his Yale classmate, Secretary of State Dean Acheson—like him a Democrat—Mr. Bunker resigned his post in Rome when the Republican Administration of Dwight D. Eisenhower took over in 1953. For the next there years he served as the first salaried president of the American Red Cross.

In 1956 Mr. Bunker was appointed Ambassador to India and Nepal by President Eisenhower. Before he left New Delhi in 1961, American aid to India had increased to more than $5 billion. Mr. Bunker supervised distribution of that aid.

MAJOR ROLE IN SETTLEMENT

In 1962 Mr. Bunker was credited with having taken a major role in the setlement of one of the knottiest problems of postwar diplomacy, the dispute between the Netherlands and Indonesia over West New Guinea. For 12 years they had been at logggerheads over the area, whose status had been left in abeyance when the rest of the Dutch East Indies became independent.

Indonesia was girding for a military showdown with the Dutch when the Kennedy Administration asked Mr. Bunker to try to mediate the dispute under United Nations auspices. The "Bunker plan" that emerged from his efforts and was finally accepted on all sides led to he relinquishing of Dutch claims on the disputed area, which is now the part of Indonesia known as West Irian.

Of the accord, the man who engineered it had a typically understated and laconic comment: "What was successfully attempted was an effort to resolve the issue before it had deteriorated into open warfare."

President Kennedy also sent Mr. Bunker to the Middle East, in 1963, to mediate a dispute between Prince Faisal of Saudi Arabia and President Gamal Abdel Nasser of Egypt over the future of the emerging Republic of Yemen. He was largely unsuccessful, and the dispute continued for years.

In 1964 President Johnson appointed Mr. Bunker, by then officially retired, his representative on the council of the Organization of American States, which elected the diplomat as its chairman.

DOMINICAN DISPUTE

Mr. Bunker honed his reputation for coolness under fire in the year he spent, beginning in 1965, as the key member of a three-man O.A.S. team sent to the Dominican Republic to end factional fighting in the wake of the fall of the Government of the dictator Rafael Trujillo, who had been assassinated.

Attired in a well-cut suit with high starched collar and Panama hat, the imperturbable Mr. Bunker seemed in startling contrast to the sweating, bearded rebels in fatigues he dealt with. He kept his aplomb throughout negotiations with all sides and was able to have a provisional civilian President installed. The Dominicans, responding to his discreet manner, nicknamed Mr. Bunker the Sly Fox.

After the Dominican political situation stabilized, President Johnson said of the diplomat: "Mr. Bunker belongs not only to the United States but to the Hemisphere. He has rendered great service to both."

Mr. Bunker would have preferred to live in retirement on his 600-acre farm in Vermont, but in 1967 President Johnson needed an able troubleshooter to serve as Ambassador to South Vietnam. He tapped Mr. Bunker to preside over what he hoped, at the time, would be the ending of American involvement in the war there and the transition from military to constitutional rule.

THE TUNNEL WAS LONGER

By Mr. Bunker was in Vietnam for six years, the longest tour served by an American Ambassador there, and in that time the American participation in the war expanded greatly.

When he left Saigon on his 79th birthday in May 1973, after a cease-fire had been brought about and direct American involvement in the war had ended, Mr. Bunker observed, "The tunnel was longer and the light was dimmer and farther away than any of us realized at the time I came here."

Although some critics thought that Mr. Bunker was "soft" in his dealings with President Nguyen Van Thieu, and that he was too optimistic about the Saigon Government's ability to function after the pullout of American forces, he was trusted by both President Johnson and President Nixon in his work in Saigon.

While he was there, Mr. Bunker ran the political-military war effort, in effect as American proconsul, and played a significant role in the elections of 1971, in which President Thieu ran unopposed—although Mr. Bunker tried unsuccessfully to persuade Gen. Duong Van Minh to run in opposition.

Mr. Bunker was also Ambassador during an ill-fated invasion of Laos, an attempt to cut the Ho Chi Minh trail near Tchepone, in whcih South Vietnamese troops suffered heavy losses.

During his tenure President Nixon began the process of the "Vietnamization" of the war. In 1972, when the North Vietnamese made the first direct attempt to come across the border with tanks and troops in main-force battle formations, Mr. Bunker saw to it that the United States came to President Thieu's aid with air support and naval bombardment.

He also helped persuade President Thieu to agree to the 1973 cease-fire with North Vietnam, which was later used by the North Vietnamese to infiltrate more troops and supplies south, enabling them to mount the attack that ended in the military defeat of the Thieu Government in 1975.

Mr. Bunker returned to Washington with the rank of Ambassador at Large. In 1974 he took on the job of chief negotiator to the highly secret talks with Panama concerning a new and revised canal treaty.

His patient negotiations in the often bitter struggle for a settlement was regarded as the greatest tour de force of his career. In 1978, when he retired permanently, the Senate, after 38 days of debate, ratified two treaties for which Mr. Bunker had served as principal negotiator.

The first treaty called for turning over the Panama Canal to Panama by the year 2000, and the second guaranteed the United States the right to defend the canal after that date.

Without the treaties, Mr. Bunker said in an interview shortly before his 90th birthday this year, Panama would have been plunged into internal turmoil and the canal would be in great jeopardy.

"Any terrorist with a hand grenade can shut the canal for a while," he said. "It's not really defensible except through a partnership where everybody works together, and that's what the treaty achieved."

Mr. Bunker stood ramrod straight, 6 feet 2 inches tall. He loved the theater and enjoyed reading, particularly the novels of Joseph Conrad.

Mr. Bunker's first wife, the former Harriet Butler, died in 1964. They had three children, Ellen, John and Samuel.

In 1967 he married a career Foreign Service officer, Carol C. Laise, who was then Ambassador to Nepal. The couple maintained a Washington apartment as well as the 600-acre Bunker dairy farm at Dummerston.

Burial will be in Vermont on Monday, a family spokesman said yesterday.

Mr. LEAHY. Mr. President, the Washington Post spoke of Ambassador Bunker being at Brattleboro, VT's Fourth of July parade. It was an honor for my wife and I to be in that parade with Ellsworth and Carol. We then joined them at their home for their traditional Fourth of July gathering.

Both of us talked afterward as we drove to our own home about how fortunate all of us were that such people as the Bunker's existed. Their partnership leaves an unequal legacy.

VETERANS' DIOXIN AND RADIATION EXPOSURE COMPENSATION STANDARDS ACT

Mr. THURMOND. Mr. President, yesterday H.R. 1961, Veterans' Dioxin and Radiation Exposure Compensation Standards Act, passed the Senate as a privileged matter in lieu of a formal conference report.

Mr. President, in recognition of the contributions to freedom and liberty made by our servicemen and women, our Nation has placed the highest priority on ensuring that those veterans disabled as a result of their military service receive proper medical care and benefits. This legislation is a sound and rational approach to addressing the complex and oftentimes emotional issues arising from the exposure of veterans to dioxin, or agent orange, while serving in the Republic of Vietnam during the Vietnam era or exposure to ionizing radiation from atmospheric nuclear tests or the American occupation of Hiroshima and Nagasaki, Japan.

By prescribing a framework for the uniform disposition of claims filed by veterans for disability compensation based on exposure either to agent orange or to ionizing radiation, the provisions of this compromise agreement have the objectives of identifying those veterans who truly suffer health impairments related to or associated with exposure and ensuring that their health care and related needs are met. Under this framework,

the Administrator of the Veterans' Administration is required to promulgate regulations establishing guidelines for the adjudication of exposure claims. Of particular importance, this legislation directs that a scientific council, composed of medical and scientific authorities with expertise in the fields of dioxin and radiation, assist the administrator in the formulation of these regulations by giving advice on the latest scientific and medical evidence concerning diseases which may be associated with exposure to agent orange or ionizing radiation.

Mr. President, pursuant to the provisions of this legislation, the Administrator would review the conclusions of the scientific council and issue regulations which take into account the findings of scientific studies on the possible adverse health effects of exposure to agent orange or ionizing radiation. Significantly, the Administrator is authorized to promulgate regulations which provide for the granting of service connection for certain diseases in which sould medical and scientific evidence of a relationship between exposure and the disease exists. Additionally, I am pleased that this measure preserves the "reasonable doubt" principle at the local adjudicatory level for these exposure claims, and thereby assures that difficult issues are resolved in favor of the individual veteran.

Mr. President, H.R. 1961, Veterans' Dioxin and Radiation Exposure Compensation Standards Act, is meritorious legislation, and I commend it to my colleagues.

REPORT OF THE SUBCOMMITTEE ON ARMS CONTROL, OCEANS, INTERNATIONAL OPERATIONS AND, ENVIRONMENT

Mr. PRESSLER. Mr. President, I ask unanimous consent that a report on the activities and accomplishments of the Subcommittee on Arms Control, Oceans, International Operations, and Environment during the 2d session of the 98th Congress be printed in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. PRESSLER. This is the third report I have prepared since becoming subcommittee chairman. As was true of previous reports, I can again say that we have had a full, active and successful year. In two areas, space weaponry and chemical warfare, the subcommittee's sustained efforts led to major Senate debates. A compromised space arms control amendment was adopted in June. In February, the Senate adopted the "yellow rain" resolution, Senate Resolution 201. At the time of passage, over one-third of the Senate had joined in cosponsoring this measure.

The actions of international organizations and efforts by other nations to restrict U.S. agricultural trade received attention in two hearings. In the course of the past year, a second hearing was held on U.S. efforts to intrude on free trade. S. 1910, a bill to assure public involvement in the formulation of a U.S. response to this challenge was a focal point of this hearing.

Mr. President, I urge my colleagues to read this report covering major activities and accomplishments in the areas of arms control, oceans, international operations and environment. A review of the status of United States-Soviet relations and negotiations is also provided. Appendices detail all activities by the subcommittee and by the full Foreign Relations Committee as they relate to the subcommittee's responsibilities. Additionally, appendices include titles of articles I have written during the past year on topics related to the subcommittee's mandate. Finally, summaries from three reports prepared at the subcommittee's request are presented.

EXHIBIT 1

ACCOMPLISHMENTS AND ACTIVITIES OF THE SUBCOMMITTEE ON ARMS CONTROL, OCEANS, INTERNATIONAL OPERATIONS, AND ENVIRONMENT, 98TH CONGRESS, 2D SESSION

(By Senator Larry Pressler)

At the end of the 97th Congress and again at the conclusion of the first session of the 98th Congress, I reported to the Senate on the activities and accomplishments of the Subcommittee on Arms Control, Oceans, International Operations and Environment of the Foreign Relations Committee. With the 98th Congress drawing to a close, I wish to report on another active and successful year.

As was true in previous years, arms control held a central position in the Subcomittee's activities. Initiatives previously begun in several areas were continued. In two areas, Subcommittee deliberations resulted in major Senate floor debate and Senate action. Additionally, the Subcommittee widened its agenda by looking at international organizations and other aspects of international operations as they affect U.S. trade and commerce.

In the area of arms control, hearings and briefings were held at both the Subcommittee and full Committee levels to consider the full range of concerns expressed by the public and Congress. A provision of the fiscal years 1984-85 Arms Control and Disarmament Agency authorization bill mandated an Administration report on arms control compliance questions. This report, delivered to the Committee in January, raised several important issues about the Soviet arms control record. Given the security classification of much of this information, several closed sessions were held to review this report.

In an area of major concern, that of nuclear arms reductions talks, 1984 was a disappointing year. Within days of the Senate's adjournment last November, the Soviet delegation to the Geneva Intermediate-range Nuclear Forces (INF) talks walked out. In taking this action, the Soviets cited the decision by the West German Bundestag to sustain its participation in NATO's deployment of cruise and Pershing II missiles. Today, Moscow insists that deployments be reversed before talks resume.

In December, 1984, shortly after breaking off the INF negotiations, the Soviets chose to heighten tensions by suspending the Strategic Arms Reduction Talks (START). The Soviets have now also tied resumption of START to a NATO retreat from its 1979 missile decision.

This is an unfortunate situation, based upon unrealistic and unacceptable Soviet preconditions. The U.S. and its NATO allies moved to deploy cruise and Pershing missiles in Europe with reluctance. The 1979 decision was propelled by Soviet deployments of highly accurate, MIRVed and mobile SS-20 missiles pointed at Europe. These deployments began in the mid-1970s. Today, there are far more SS-20s poised to strike West Europe than there are NATO missiles pointed at the Soviet Union. Even when NATO deployment is completed, the Soviet Union will retain an edge in the Euromissile balance. Given Soviet responsibility in initiating the current round of deployments, there is little to justify Moscow's demand for relief from the threat it perceives from NATO's missiles while continuing to all but deny legitimate European fears, provoked by the SS-20.

Effective security and arms can not be one-sided. By insisting that their security concerns come first, the Kremlin has created an unwarranted barrier to arms reductions. While this situation continues, hopes for significant arms reductions can not be realized. Clearly, this serves no nation's interests, including the Soviet Union. The Soviet Union must remove the road block to an accord which would serve the mutual interests of the East and the West.

Public awareness and concern about nuclear weapons and arms control has reached unprecedented levels in recent years. In Congress, this has led to repeated efforts to form a national consensus on arms control policy. Without a unified national position on arms control, there would be slim prospects for agreements that can be negotiated, signed and ratified. During the 1st session of the 98th Congress, a bipartisan consensus developed around the nuclear builddown proposal, providing effective security through mutual and verifiable reductions.

The builddown concept was born in Congress. Despite some opposition from lower levels in government, in gained President Reagan's support. Bringing about a shift in policy towards the builddown was a long and arduous task, involving months of careful negotiations. In this effort, I joined with Senators Cohen, Nunn and our distinguished Committee Chairman Charles H. Percy. By October, 1983, the builddown became the core of the U.S. START position in Geneva. But before the U.S. delegation could present the builddown in detail, START was suspended. The breakdown in negotiations is, therefore, especially unfortunate and ill-timed. With a return to talks, undertaken in a spirit of compromise, a START breakthrough could be achieved.

During the course of the past year, other arms control proposals were considered by

the Committee and the Subcommittee. In April 1984, a hearing was held on a proposal calling for the creation of a nuclear risk reduction center. Such a center would seek to reduce the risks of nuclear war through accident, miscalculation or terrorist acts. The proposal, contained in a resolution by Senators Nunn and Warner, was slightly amended to provide for the involvement of both diplomatic and military personnel and was voted out of committee.

In June, the Committee held another in a series of hearings reviewing arms control resolutions before the Senate. As in past years, the nuclear weapons freeze and other proposals offered by nuclear weapons freeze proponents were given a full hearing.

Over the past three years, the Subcommittee has established itself as a key forum for the debate and analysis of space weapons and space arms control. In May, 1981, I introduced the first Senate resolution calling for resumption of the anti-satellite (ASAT) weapons talks suspended at the time of the Soviet invasion of Afghanistan. This led to a landmark series of hearings that began in September 1982 and have continued through the 98th Congress. The Subcommittee will sustain these efforts in the next Congress.

The most recent hearing in this series occurred in April and reviewed the U.S. ASAT program, developments in space-based strategic defense and U.S. space arms control policy. This day-long hearing received testimony from Adminstration officials, including the President's science adviser and the director of the Strategic Defense Initiative Organization, outside experts on space weaponry and arms control, and the Congressional Office of Technology Assessment.

When these hearings began, few people, even those in the arms control community, gave much attention to the risks and implications of a space arms race. The Subcommittee's activities have helped to raise public awareness of space weaponry as an emerging security problem. Testimony received by and discussion held in the Subcommittee have played an important role in structuring the space weapons debate in Congress and in the wider community of concerned citizens and interested specialists.

To further expand on the information available in this new national security area, last year I enlisted the assistance of the Office of Technology Assessment and the Congressional Budget Office. These efforts resulted in the preparation of three important assessments of space weapons technology, space arms control and the costs of the Strategic Defense Initiative (SDI).

A report on space arms control policy and options, based upon a two-day meeting of experts held at my request and chaired by former National Security Advisor to the President, McGeorge Bundy, was released this spring. OTA's space arms control report is regarded as perhaps the most thorough review on this subject in print.

A second OTA study, initiated through a joint request from Senator Paul Tsongas and myself, was released at the time of our April hearing on strategic defense and ASAT weapons. The report represents only a preliminary assessment of space-based defenses. Nevertheless, it is regarded as the most important critique of space-based defenses currently available. A more exhaustive assessment is being prepared by OTA at the request of Chairman Percy, Ranking Member Claiborne Pell, Senator Tsongas and myself. Part one of this report, dealing with ASATs, is to be released early in 1985. Part two, on strategic defenses, will be released in March, 1985.

A third report prepared by CBO reviewed the budgetary implications of the five year SDI program. This report was prepared and released at my request in May. These documents have provided Congress and the public with invaluable information and useful analysis of the issues raised by a space arms competition and are frequently referred to in Senate and House debate on space arms control proposals and the defense budget request. Summaries of all three studies appear at the end of this report.

S.J. Res. 129, the space arms control resolution that I authored and which was approved by the full Committee in 1983, was debated in June in the Senate during action on the defense authorization bill. The debate was the result of repeated efforts, throughout the year, to bring this issue to the Senate floor. The day-long debate in the Senate involved a rare secret session. It is clear from the compromise that emerged that the majority of Senators agree that the U.S. has many good reasons to pursue space arms control; and, that U.S. security will be served by talking to the Soviet Union.

It has long been my view that, given seriousness and flexibility on both sides, a successful outcome can be achieved. I have also argued that the U.S. could best test Soviet sincerity by accepting Moscow's frequently repeated offers for negotiations. Senate action on this issue led to a shift in Administration policy. Only a few days after the Senate finished its action, requiring a good faith space arms control effort, President Reagan indicated his willingness to directly engage the Soviet Union in such talks.

It now seems that Moscow may have been playing a mixed motives game in proposing talks. At the end of June, they seemed surprised at the President's acceptance of their latest negotiating offer and then created preconditions for talks to begin. As in INF and START, the Soviets should agree to deal with their concerns at the negotiating table rather than through public posturing.

Chemical warfare is another area where the Subcommittee can report positive results in previously started efforts. Hearings held in 1981 and 1983 led me to offer Senate Resolution 201, expressing the sense of the Senate concerning the use and/or provision of chemical warfare agents by the Soviet Union. Chairman Percy joined me as principal cosponsor of this resolution. Introduced in August, 1983, S. Res. 201 quickly gained broad-based bipartisan support in the Senate. It was reported favorably by the Foreign Relations Committee on October 18, 1983. At the time it passed the Senate on February 9, 1984, it was cosponsored by more than a third of the Senate.

During the past year, there have been fewer reports of chemical warfare in Southeast Asia and Afghanistan. No doubt, increasing public outrage against the use of these inhumane substances contributed to this apparent decline.

But elsewhere in the world, prohibitions against using chemical warfare are deteriorating. An increasing number of nations already possess or are interested in acquiring chemical warfare capabilities, leading some to describe these weapons as "the poor man's nuclear bomb." The most recent evidence of this trend has emerged from the Iran-Iraq war, where United Nation's investigators have confirmed that chemical weapons are being employed.

For this reason, Senator PELL and I introduced Senate Resolution 368 on April 11, 1984. This resolution is an important complement to S. Res. 201. It seeks to draw attention to the growing risk of chemical weapons proliferation; condemns chemical warfare wherever it occurs; and, calls for negotiation of a worldwide ban on producing and stockpiling of chemical warfare agents.

This resolution was considered in the course of a June hearing, held in closed and open sessions, to explore the chemical proliferation problem. In addition to assessing the security and arms control dimensions of this problem, this hearing reviewed U.S. export controls on chemicals that can be used to manufacture agents for chemical warfare.

This section on arms control concludes with positive notes. As Congress adjourns, prospects for a more meaningful arms control dialogue have improved. The rhetorical battle between Washington and Moscow has subsided. And, the September Reagan-Gromyko meeting renews the high level contacts required for pressing forward in negotiations. Additionally, both sides appear more willing to increase contacts in the fields of science and commerce. Work on more technical and less contentious arms control issues continues, notably arrangements improving the Washington-Moscow "hot line" and cooperation on nuclear nonproliferation. In the area of scientific contacts, the Committee heard testimony in September on a proposal calling for the renewal of a U.S.-Soviet space cooperation accord.

Note must also be taken of the opening of a new arms control forum, the Conference on Disarmament in Europe (CDE), which deals with confidence building measures. The American delegation is chaired by an extremely able negotiator, James Goodby. Additionally, talks continue on conventional force reductions at the Vienna Mutual and Balanced Force Reduction (MBFR) negotiations. The Geneva Conference on Disarmament (CD) continues to discuss nuclear testing questions and the requirements for a total ban on chemical weapons. Ambassador Lewis Fields' decision to leave the delegation is regretable since he was an effective presenter of this nation's position at this multilateral arms control forum.

In the area of oceans, international operations and environment, the Subcommittee is alarmed by efforts by international organizations to impose restrictive foreign trade regulations. Should these activities succeed, they could have a detrimental effect on an increasingly trade dependent American economy.

In 1983, I chaired a hearing which focused on United Nations regulatory efforts. Testimony received at that time led me to introduce legislation in September, 1983, creating procedures assuring public involvement in the formulation of U.S. policy towards proposed regulations before the U.N. and its related agencies. A hearing on the International Organizations Public Procedures Act was held in April, 1984. S. 1910 was refined to reflect the views of public witnesses and Administration concerns. S. 1910, as revised, was favorably reported by the Foreign Relations Committee on June 28, 1984.

In June, I chaired a hearing on International Trade Distortions Harming U.S. Agricultural Exports which sought to identify foreign barriers to U.S. agricultural trade, how they operate and which nations are most guilty of these practices. The hearing also explored existing and proposed procedures and policies available to the U.S. in responding to this challenge. Testimony was received from the Office of the U.S. Trade Representative, the Department of Agriculture and from outside experts on agricultural trade and export policy.

The Subcommittee will continue to closely follow the development of restrictive trade practices and unhelpful U.N. administrative intrusion into world trade and commerce in future hearings.

Finally, the Congressional Research Service has undertaken a study of Antarctica at my request. This project will examine U.S. economic, scientific and security interests on the frozen continent and the implications of the competition for the region's land and ocean resources. The Antarctica study will be available early in the 99th Congress.

A list of hearings and briefings held during the year in areas relevant to the Subcommittee's jurisdiction are appended to this report. Additional appendices present the titles and summaries of reports and studies conducted at the Subcommittee's request. The titles of articles I have written on topics that are related to the Subcommittee's responsibility are also included.

HEARINGS ON ARMS CONTROL

President's Arms Control Compliance Report (Executive Session), January 13, 1984.

Arms Control Compliance Situation (Executive Session), January 25, 1984.

S. Res. 329, Nuclear risk Reduction, April 4, 1984.

Strategic Defense And Anti-Satellite Weapons, April 25, 1984.

Space Arms Control: Soviet Capability And Verification Requirements (Executive Session), May 10, 1984.

Arms Control Overview, June 13, 1984.

Chemical Warfare: Arms Control And Proliferation (Open and Executive Sessions), June 28, 1984.

HEARINGS ON OCEANS, INTERNATIONAL OPERATIONS AND ENVIRONMENT

International Court of Justice Situation (Executive Session), April 10, 1984.

S. 1910, International Organizations Public Procedures Act, April 12, 1984.

International Trade Distortions Harming U.S. Agricultural Exports, June 26, 1984.

S.J. Res. 236, East-West Cooperation In Outer Space, September 13, 1984.

HEARINGS ON NOMINATIONS

Woodward Kingman to be USIA Associate Director for Management, February 21, 1984.

Gerald Carmen to be U.S. Representative to U.N. European Office with rank of Ambassador, April 5, 1984.

Edward Ney, to be Member of Board for International Broadcasting, April 5, 1984.

Leslie Lenkowski to be Deputy USIA Director, April 5, 11, and May 9, 1984.

Edward E. Wolfe, nominee for rank of Ambassador as Deputy Assistant Secretary of State for Oceans & Fisheries, May 24, 1984.

Richard A. Derham to be Assistant AID Administator for Program & Policy Coordination, May 24, 1984.

Thomas H. Etzold to be Assistant ACDA Director for Multilateral Affairs, June 20, 1984.

Jorge L. Mas to be Member of Advisory Board for Radio Broadcasting to Cuba, July 25, 1984.

Diana Lady Dougan to be Coordinator for International Communications and Information Policy, July 25, 1984.

Maynard W. Glitman, for rank of Ambassador as MBFR Negotiator, July 25, 1984.

DIRECTED ENERGY MISSILE DEFENSE IN SPACE

PRINCIPAL JUDGMENTS AND OBSERVATIONS

1. The prospect that emerging "Star Wars" technologies, when further developed, will provide a perfect or near-perfect defense system, literally removing from the hands of the Soviet Union the ability to do socially mortal damage to the United States with nuclear weapons, is so remote that it should not serve as the basis of public expectation or national policy about ballistic missile defense (BMD). This judgment appears to be the consensus among informed members of the defense technical community.

Technical prognosis for such a perfect or near perfect defense is extremely pessimistic because of the concentration and fragility of society; because all concepts identified as candidates for a future defense of population are known to be susceptible to countermeasures that would permit the Soviet Union to retain a degree of penetration with their future missile arsenal despite costly attempts to improve the U.S. defense; because the Soviet Union would almost certainly make such a determined effort to avoid being disarmed by a U.S. defense; and because missile defense does not address other methods for delivering nuclear weapons to the United States.

Mutual assured destruction (MAD), if this term is applied to a state of technological existence rather than to a chosen national policy, is likely to persist for the foreseeable future.

2. The wisdom of deploying less-than-perfect ballistic missile defenses remains controversial. Less-than perfect defenses would still allow the Soviet Union to destroy U.S. society in a massive attack but might call into question the effectiveness of smaller, specialized nuclear strikes.

Certain theories about nuclear war maintain that such defenses could lessen the chances of nuclear war and enhance U.S. security by protecting U.S. retaliatory forces; by interdicting "limited" nuclear strikes; by further confusing Soviet predictions of the outcome of a strike; by driving Soviet missile deployments in directions favored by the United States; by lessening the consequences of nuclear attack; and/or by fulfilling still other strategic goals.

Critics dispute the validity of some of these goals; dispute that technology can fulfill the truly useful goals; and/or argue that the many harmful side effects of introducing BMD to the strategic equation and altering the Anti-Ballistic Missile (ABM) Treaty regime are not worth satisfying these goals.

To address the wisdom of less-than-perfect defense, the public and policymakers would need a precise statement of the strategic goal of the deployment, an assessment of whether technology could satisfy that goal, and an analysis balancing fulfillment of the goal against the side effects and uncertainties of introducing a new ingredient into the strategic nuclear arena.

3. The strategic goal of President Reagan's Strategic Defense Initiative calling for emphasized BMD research—perfect, near-perfect, or less-than-perfect defense against ballistic missiles—remains unclear. No explicit technical standards or criteria are therefore available against which to measure the technological prospects and progress of this initiative.

4. In all cases, directed-energy weapons and other devices with the specifications needed for boost-phase intercept of ICBMs have not yet been built in the laboratory, much less in a form suitable for incorporation in a complete defense system. These devices include chemical lasers, excimer and free electron lasers, x-ray lasers, particle beams, lightweight high-velocity kinetic energy weapons, and microwave generators, together with tracking, aiming, and pointing mechanisms, power sources, and other essential accompaniments.

It is unknown whether or when devices with the required specifications can be built.

5. Moreover, making the technological devices perform to the needed specifications in a controlled situation is not the crux of the technical challenge facing designers of an effective ballistic missile defense. A distinct challenge is to fashion from these devices a reliable defensive architecture, taking into account vulnerability of the defense components, susceptibility to future Soviet countermeasures, and cost relative to those countermeasures.

New intercept mechanisms—directed energy weapons and the like—therefore do not by themselves necessarily herald dramatically new BMD capabilities.

6. It is clear that potent directed-energy weapons will be developed for other military purposes, even if such weapons are never incorporated into effective BMDs. Such weapons might have a role in nuclear offense as well as defense, in anti-satellite (ASAT) attack, in anti-aircraft attack, and in other applications of concern to nuclear policy and arms control. Defense and arms control policy will thus need to face the advent of these new weapons, irrespective of their BMD dimension.

7. For modest defensive goals requiring less-than-perfect performance, traditional reentry phase defenses and/or more advanced mid-course defenses might suffice. Such defenses present less technical risk than systems that incorporate a boost-phase layer, and they could probably be deployed more quickly.

New ideas for improving such "old" BMD concepts have emerged in the atmosphere of technical optimism enjoyed by the boost-phase concepts.

8. Deployment of missile defenses based on new technologies is forbidden by the Anti-Ballistic Missile (ABM) Treaty reached at SALT I. The Treaty permits only restricted deployment of traditional BMDs using fixed, ground-based radars and interceptor missiles. Research into new technologies, and in selected cases development and testing of defense systems based on these technologies, are allowed within the Treaty.

9. There is a close connection, not explored in detail in this Background Paper, between advanced BMD concepts and future anti-satellite (ASAT) systems. This connection springs from four observations: (1) ASAT attack on space-based weapons and sensors is probably the most attractive countermeasure to boost-phase BMD; (2) directed-energy weapons are more likely to succeed in the easier mission of ASAT than in the more difficult mission of boost-phase BMD; (3) to a degree dependent on technical details, early stages of development of boost phase BMDs might be conducted in the guise of ASAT development, stimulating anxieties about the health of the ABM Treaty regime; (4) to a degree dependent on technical details, concluding a treaty with the Soviet Union limiting ASAT development would impede BMD research at an earlier stage than would occur under the terms of the ABM Treaty alone.

Arms Control in Space

SUMMARY

In late 1982 and early 1983, the Subcommittee on Arms Control, Oceans, International Operations, and Environment of the Senate Committee on Foreign Relations held hearings on space weapons and arms control. To explore these issues further in a discussion format not easily achieved in hearings, Sen. Larry Pressler, Chairman of the Subcommittee, asked OTA to conduct a workshop focusing on antisatellite (ASAT) weapons as one aspect of space arms control. The workshop, held in Washington, D.C., on January 30 and 31, 1984, provided an opportunity for technical, diplomatic, military, and policy-analysis experts to interact, think out loud, and build upon each other's ideas.

The workshop was organized into six sessions, although issues involving anti-satellite weapons and arms control are not easily compartmentalized into distinct subject areas. Each session was introduced by a 10- or 15-minute informal oral presentation which set the stage for further discussion. This workshop proceedings volume is organized along the same divisions as the sessions, with some rearrangement.

The first session, an overview, reviewed technical aspects of anti-satellite systems and presented a candidate set of topics for discussion in later sessions. The second session covered pros and cons of ASAT arms control. Soviet attitudes and efforts regarding ASATs were the focus of the third session; U.S. attitudes and developments in ASATs and ASAT arms control were reviewed in the fourth. The effect of ASATs on the continued viability of the 1972 Anti-Ballistic Missile (ABM) Treaty, and vice versa, were covered in the fifth session. The last session centered on verification issues.

At Senator Pressler's request, OTA is publishing the workshop proceedings. OTA's agreement with the panelists was that the workshop report would discuss the viewpoints, ideas, and findings arrived at during the conference, but that particular statements or opinions would not be attributed to specific individuals. Therefore, the transcript has been paraphrased and rearranged to form this report. The proceedings have been circulated among the panelists, who were given the opportunity to suggest corrections and clarifications. They have not been reviewed by the Technology Assessment Board.

The workshop panelists were asked to raise and clarify issues, not to resolve them. No attempt was made to reach conclusions or develop consensuses during the workshop sessions. However, OTA has noted and listed below several points where the panelists appeared to be in general agreement. These points are followed by a brief discussion of some of the fundamental bases for disagreement among the panelists. Following that is a list of some issues, raised during the course of the workshop, which were felt to merit further research and analysis.

POINTS OF GENERAL AGREEMENT

No arms control agreement can eliminate all anti-satellite capability. However, panelists differed in interpreting the significance of this residual ASAT capability which would be infeasible or impractical to ban. Some systems not designed to be ASATs (ICBMs, manned spacecraft, etc.) nevertheless have some ASAT potential, making some de facto residual ASAT capability inevitable. ASAT arms control supporters stressed that it would be minor compared to the capability of extensive ASAT or "space mine" efforts which could be undertaken in the absence of an arms control agreement, while some of the ASAT arms control opponents believed that the residual capability might nevertheless pose a significant threat to U.S. satellites.

ASAT arms control cannot eliminate the need to protect or supplement vital satellites with a variety of survivability measures. However, it can serve to lessen the measures required to protect space systems. Under any arms control accord, programs to ensure survivability of critical satellites or programs which supplement or replace their function will remain vital. The temptation to assume that survivability measures could be relaxed following an agreement must be resisted. "We could be that stupid," said one panelist, "but we don't really have to be."

The "verifiabilty" of an ASAT accord can only be assessed for a specified set of restrictions and measures, and any discussion of the verifiability of a particular provision ought to include consideration of the significance of potential violations of that provision. The panelists did not evaluate in detail, partly because of security classification restrictions, the verifiability of compliance with the various kinds of arms control agreements that were discussed. It was clear that the standards of verifiation required for effective ASAT arms control are highly controversial. Panelists agreed, however, that bans on testing would require less extensive verification measures than bans on possession, and that compliance with some ASAT arms control provisions could be verified with high confidence.

Future U.S. and U.S.S.R. activities in space hold great potential for generating uncertainty and misunderstanding regarding the countries' respective intentions. Workshop participants agreed that the Soviet Union will continue its vigorous exploitation of space, and that some Soviet activities will be perceived in the United States as provocative. Similarly, some American actions will appear provocative to the Soviets. Both countries will observe activities which they will not completely understand and which will cause considerable con-

cern. Misunderstandings concerning the intent of various space actions could be particularly dangerous during crises of low-level conflicts.

Ambiguities might be lessened or resolved with some type of "rules of the road" or "behavior in space" agreement. Some panelists thought that an agreement concerning behavior in space, or towards space objects, might serve to reduce tensions and uncertainties. Such an agreement need not be associated with other measures limiting antisatellite weapons systems; indeed, there might be value even if (thought some panelists) or especially if (thought others) there were no accompanying ASAT restrictions. Such an agreement might be modeled after the "rules of the road" on the high seas, which are embodied in several international agreements that recognize freedom to operate, lessen the risk of accidental collision, and minimize unnecessary provocation at sea. Possibly the most valuable feature of a "rules of the road in space" agreement would be the establishment of a forum like the U.S.-U.S.S.R. Standing Consultative Commission, which would help maintain an ongoing dialog between the United States and the Soviet Union and would permit discussion of activities whose significance was not clear. A "rules of the road" agreement should not be allowed to impede more serious provisions concerning space weapons if such provisions are found to be desirable. The precise form of a "space behavior" agreement was not explored in depth at the workshop, and the political and diplomatic procedures and tradeoffs required to negotiate and implement such an agreement were not addressed.

If ASAT threats are reduced by an agreement, there may be fewer reservations about placing important systems in space, creating in turn greater incentive for developing ASAT weapons. If an accord has the effect of relaxing survivability measures at the same time that reliance on space systems is increasing, then the growth of targets both valuable and vulnerable might provide strong motivation to attempt covert ASAT development. This possible paradox reinforced panelists' observations that an ASAT accord is no substitute for effective measures to reduce space system vulnerability.

Preservation of the functions now performed in space does not require the survival of all space assets. Military support activities carried out in space are very important, but they can be duplicated or distributed among many space systems. Furthermore, many alternatives to space-based systems exist or can be developed.

The idea that the United States needs an ASAT weapon in order to deter enemy ASAT attack was not strongly supported. Many participants felt that the ability to retaliate against terrestrial assets served to deter ASAT attack at least as well as the ability to respond in kind against enemy satellites. Furthermore, one of the rationales other than deterrence which has been given for the U.S. ASAT program—to carry out attacks on particularly hostile Soviet satellites—conflicts with the ASAT's deterrent role. Nobody at the workshop felt that ASAT attack scenarios were well enough understood to predict the outcome of "tit-for-tat" ASAT retaliatory attacks in general. The likelihood and nature of subsequent escalation would be highly dependent on which satellites were attacked and under what circumstances.

The U.S. air-launched ASAT weapon now undergoing testing is clearly technically superior to the present generation of Soviet ground-launched ASATs. The ability to home in from a wide range of directions, and the flexibility of being launched from highly mobile aircraft, will make the U.S. ASAT a considerably more capable weapon if deployed. The United States will be able to launch consecutive ASATs much more rapidly than the Soviets, who are restricted in how rapidly their ASAT can be fired by their limited number of launch sites and by the time required to recycle them. There are also significant asymmetries in the target sets which are at risk to the two systems. Many important space functions are carried out by the United States using satellites in geosynchronous orbit, well out of range of the Soviet ASAT. Many Soviet satellites with similar functions use highly elliptical "Molniya" orbits, which could be vulnerable to U.S. attack at their lower altitudes. However, the United States would face severe logistical and operational difficulties in attempting to exploit this vulnerability. In addition, since Soviet satellites are shorter lived than U.S. satellites and are consequently replaced more frequently, the Soviets may be better prepared to reconstitute space systems than the United States would be.

In spite of asymmetries in capability, neither the existing Soviet ASAT nor the U.S. ASAT undergoing tests poses a severe military threat to the other side. The present level of ASAT technology is significantly limited. Both U.S. and U.S.S.R. weapons are restricted to targets in low Earth orbit and cannot reach geosynchronous orbit. Both systems may have to wait several hours for a target satellite to come within range of the appropriate F-15 base (for the U.S. system) or ground launch site (for the Soviets), although the mobility of the F-15 makes this restriction considerably less severe for the U.S. ASAT. If either the U.S. or the U.S.S.R. system were mated to boosters able to reach geosynchronous orbit, the ascent would take many hours. In light of these limitations, many treaty proponents would tolerate (although not necessarily prefer) a treaty which would "grandfather" existing systems. Perceptions differed as to the relative political implications of the existing U.S.S.R. system versus the U.S. ASAT which is undergoing testing, but nobody felt that the overall military balance was affected significantly by either—especially when compared with potential future ASAT developments.

A ban on testing ASAT weapons would greatly increase the difficulty of developing a high-confidence, high-quality, dedicated ASAT system. Panelists thought it would be very difficult to develop and field a highly capable new system with no detectable tests. Some tests might go undetected—for example, there are many perfectly legitimate activities involving rendezvous in space which could be made to be partial tests of ASAT interception capability—but many tests would be required to instill confidence in an ASAT system, and some of these would be detected. Banning the tests would force the violator either to forgo tests or to test covertly; covert testing, assuming that it could in fact be carried out undetected, would certainly be more difficult and less extensive than the overt testing that would be possible in the absence of a ban. In the absence of tests, all agreed that no one could be highly confident that a new system would be effective in difficult scenarios (against many targets in a short time interval and/or effective at geosynchronous altitude). If a system were to be developed without testing, the inability to make refinements based on tests and the lack of confidence developed through tests would degrade the system's military significance.

ASAT and ballistic missile defense (BMD) systems and technologies are closely related. As effective ASAT weapons are developed and introduced, boost-phase ballistic missile defense systems will become increasingly problematical since all such systems utilize space-based early warning systems and possibly other subsystems which would be vulnerable to ASAT attack. Many, although not all, prospective midcourse BMD systems would also have vulnerable space-based assets, and even terminal BMD systems would likely utilize space-based early-warning sensors. At the same time, even a poor quality or prototype midcourse or boost-phase BMD system may have very significant ASAT capability since satellites are much easier to destroy than missile warheads. Therefore, development of boost-phase and mid-course BMD systems will severely constrain ASAT arms control possibilities. Conversely, since ASAT and BMD technologies are related, treaties limiting ASAT development or testing will limit development and deployment of boost-phase and midcourse BMD systems. Of course, the 1972 ABM Treaty and 1974 protocol thereto already severely constrain testing, development, and deployment of BMD systems.

POINTS OF DISAGREEMENT

Disagreement over the desirability of an ASAT treaty hinges on basic philosophical differences over the role of arms control. Although acknowledged at the workshop, these differences were not discussed or debated significantly during the sessions. They are outlined below in an attempt to summarize some of the considerations most relevant to different sides of the ASAT arms control debate.

One attitude, supporting ASAT arms control, is that we value the safety of our own satellites more than we value the ability to destroy Soviet satellites. We want to protect those of our own military support functions which we presently carry out via satellites, and protecting them is much easier if our satellites are not threatened by a highly developed, highly capable Soviet ASAT. Preventing the Soviets from deploying an effective ASAT would be much more helpful than developing our own.

While a ban on all Soviet ASATs would be ideal, the principal U.S. interest is to prevent the Soviets from developing a highly capable system: one which works reliably, threatens satellites in geosynchronous orbit, operates with no warning, and/or attacks many targets at once. Several approaches, including banning ASAT testing, banning the development of new ASAT systems, or banning all dedicated ASAT systems, could inhibit such a Soviet development. Banning only tests or new developments would be more easily verified than banning all dedicated ASATs; however, a total ban might nevertheless be a more effective approach to preventing development of a highly capable Soviet system. Although no agreement can eliminate all ASAT capability, support-

ers of ASAT arms control felt that an agreement could be devised which would make Soviet development of such a highly capable ASAT system very difficult, and that such an agreement could be adequately verified. The criterion for supporting an agreement would be improvement in the security of our space systems as compared to not having an agreement.

A contrasting approach considers military competition between the United States and U.S.S.R. to be inevitable, with arms control in many cases not being an effective or appropriate alternative to that competition. Accordingly, the relevant measure of national security would be relative advantage or disadvantage of the United States with respect to the U.S.S.R. Those holding this view consider it essential to deny the enemy the use of space during a conflict when such use provides a military advantage. In the case of ASAT arms control, even if U.S. satellites were to be safer with an ASAT limitation or test ban than without one (which would almost certainly be the case), a treaty might not be appropriate if it would benefit the Soviet Union more than it would the United States. Such asymmetrical advantage might arise under an ASAT accord for two reasons: First, a treaty would divert the military competition away from an arena (ASAT competition) where the United States would otherwise have been able to exploit its superior ability to develop highly sophisticated technologies. Second, the Soviets might cheat. Because of the asymmetric nature of Soviet and American societies, it is argued, the Soviet Union is much more likely than the United States to cheat on an agreement. For the same reason, Soviet attempts to cheat are more likely to be successful. Whether or not the kinds of violations which might go undetected would in themselves pose major threats to U.S. security, any covert violation would work to our military disadvantage and would have undesirable political and psychological consequences as well.

There is disagreement regarding how much significance can be attributed to residual or covert ASAT capability. The panelists agreed that a considerable testing program is required in order to have high confidence in an ASAT system. However, there are differences of opinion regarding how significant and incompletely or covertly tested system might be. A covert system might not engender high confidence, it might not be as reliable as a dedicated, overtly tested system, and it might be discovered, but it might nevertheless still be developed. There is disagreement not only about how remote this possibility is, but also about how this possibility affects the relative advantages of a treaty versus the risks.

ASAT arms control is also complicated by more general considerations regarding the military use of space. On the one hand, emplacing weapons in space or using weapons against targets in space can be seen as breaking a de facto political taboo which would be difficult to restore. Furthermore, introducing weapons into space might make the world a more dangerous place; this is now almost universally believed to be the case concerning introduction of multiple independently targetable reentry vehicles (MIRVs.) On the other hand, any space arms control might be viewed as a political and psychological barrier inhibiting the much wider exploration and exploitation of space as a theater of military operation. A primary example of wider possibilities of space is ballistic missile defense—while many would not be willing to limit ASAT weapons at the price of impeding investigations into the possibilities of BMD, others see those retrictions on BMD which would be included in an ASAT accord as reinforcing the ABM treaty in support of its original and continuing goals.

TOPICS FOR FURTHER RESEARCH

Among the more general subject areas suggested to the workshop for further research were possibilities for "rules of the road" agreements in space. As noted above, many participants believed that some measures to reduce uncertainty and ambiguity in space might be desirable. Although possible models were proposed, potential agreements were not discussed in detail. What sort of mechanisms (be they unilateral actions, treaties, or informal working arrangements) could be established to permit mutual U.S. and U.S.S.R. use of space with a minimum of suspicion?

Are there ways of characterizing ASATs such that we can define and ban the most threatening or destabilizing types? Certain activities in space are clearly more threatening than others, just as certain activities are more visible than others. Is there a way that a "rules of the road" agreement could focus on the more dangerous rather than the more visible? What are the implications for verification and for stability?

No treaty of any kind can be perfectly verified. Several questions arise in handling ASAT treaty provisions which must therefore be verifiable only partially, or with less than 100 percent confidence. One problem involves how general or specific treaty provisions must be made. Treaty language intended to prevent some particularly threatening activity (e.g., testing ASAT interceptors at geosynchronous orbit) might be phrased in general terms (e.g., forbidding all ASAT tests) which would include less threatening activities that might be less verifiable (e.g., testing ASATs in low earth orbit where they might be masked as non-ASAT-related operations). What are the implications of having varying levels of confidence in verifying compliance with treaty provisions? Are activities which are not explicitly proscribed under a treaty necessarily condoned?

Another verification issue requiring further work involves cooperative verification procedures. Although existing rules regarding freedom of navigation and innocent passage on the high seas permit forces of one country to approach those of another, approaching a foreign satellite closely enough to examine it in space might nevertheless not be taken kindly in the absence of prior approval. If nuclear weapons are to be kept out of space with high confidence, then cooperative inspection procedures (either in space or on the ground) will likely be required. Can such procedures be arranged?

ANALYSIS OF THE COSTS OF THE ADMINISTRATION'S STRATEGIC DEFENSE INITIATIVE 1985–89

(Note.—Unless otherwise indicated, all years referred to in the text are fiscal years. All dollars are budget authority dollars that include anticipated inflation using the Administration's economic assumptions.)

INTRODUCTION AND SUMMARY

Last year President Reagan called for the exploration of defensive technologies that would render nuclear weapons "impotent and obsolete." The resulting Administration plan—called the Strategic Defense Initiative (SDI)—has sparked intense debate on the technological and arms control implications of creating a novel strategic defensive system based largely in space.

Many in the Congress are also interested in the costs of the SDI. This paper, prepared at the request of the Arms Control, Oceans, International Operations and Environment Subcommittee of the Senate Foreign Relations Committee, examines near-term cost trends. It also discusses whether current SDI plans include all the efforts needed to support a strategic defense.

In summary, the paper finds that:

The Administration plans substantial growth in SDI spending over the next two years; from $991 million in 1984 to $3,790 million in 1986. Press reports suggest continued though slower growth through 1989. While such rapid growth is not atypical of newly started research and development (R&D) programs, the SDI will consume an increasing share of DoD R&D resources, growing from about 4 percent in 1984 to about 16 percent by 1989.

Everything else being equal, growth in SDI funds between 1984 and 1985 would have been larger had the Administration funded the Army's Ballistic Missile Defense (BMD) program at levels planned in its February 1983 budget. Changes in BMD funding plans were probably tied to the shift in basing plans for the MX missile. BMD changes not only offset growth in SDI but may also portend a more fundamental shift in the Army's BMD effort, emphasizing development of a capability to defend entire areas of the United States sometime in the future rather than emphasizing the defense of specific military installations in the nearer term. This could be of concern to those who feel the United States may need to deploy a near-term ballistic missile defense in response to a potential Soviet deployment.

There are questions about the inclusiveness of the Administration's current definition of SDI. The broad definition of strategic defense implied by the President and stated explicitly by others in the Administration embraces defense against all forms of nuclear attack. But the SDI currently contains funds for research on defense against ballistic missiles. Important components of a more comprehensive defense—most notably air defense—are missing. In addition, there appear to be a number of relevant programs that are not currently included in SDI even by the narrower definition of defense against ballistic missiles.

In accordance with the mandate of the Congressional Budget Office (CBO) to provide objective and impartial analysis, the paper makes no recommendations.

Lawrence J. Cavaiola and Bonita J. Dombey of CBO's National Security Division prepared this paper under the general supervision of Robert F. Hale. Francis Pierce edited the manuscript.

OUR NATION'S FOOD SAFETY LAWS

Mr. HATCH. Mr. President, as we near the close of the 98th Congress, I want to take this opportunity to call to the attention of the Senate the great progress made during the last 2 years toward the enactment of legisla-

tion that would modernize our Nation's food safety laws. Although we did not have the opportunity to act on a bill, the increased awareness of the need for change in the laws and the growing support for such legislation among leading scientists, health professionals, and Members of Congress provides a firm foundation for consideration of food safety legislation in the 99th Congress. Let me review briefly some of the milestones we reached.

In June of 1983, the Senate Labor and Human Resources Committee held 3 days of hearings at which Members of Congress, the administration, food safety regulatory agencies, prestigious scientists, former regulators—including former FDA Commissioners—and industry and consumer groups testified. The call for change in the food safety laws was overwhelming. To give my colleagues some idea of the views of some of the expert witnesses who testified at those hearings, I ask unanimous consent that selected comments of expert witnesses at the hearings be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit No. 1.)

Mr. HATCH. In essence, the June 1983 hearings confirmed in my mind that, since the last major revision of the food safety laws in 1958, our scientific capabilities have advanced greatly while the law has stood still. Laws that were state-of-the-art in 1958 are no longer adequate. Therefore, in October 1983, I introduced S. 1938, a bill that was designed to incorporate into the law the suggestions offered by the scientific experts. An identical bill, H.R. 4121, was introduced in the House by our colleague, Mr. MADIGAN, with broad bipartisan cosponsorship across the political spectrum. As of today, S. 1938 also enjoys broad bipartisan sponsorship with 17 cosponsors. Mr. MADIGAN's bill now has 17 cosponsors as well and the American Medical Association has also endorsed this measure.

S. 1938 is intended to permit science to play a greater role in the critical area of food safety regulation. At the same time it carefully preserves the authority of FDA and USDA to carry out their essential responsibilities. It continues to require that the food industry bear the burden of proof in establishing the safety of food constituents and it retains the historic focus of our food safety laws on protecting the public health. The consensus of support that surrounded S. 1938 shortly after its introduction—and the continued growth in this support—gives me great confidence that this bill represents the next plateau in the food safety modernization debate that began when I was joined by many of my colleagues in introducing S. 1442 in the 97th Congress.

I hope you will share with me the satisfaction that has come from the educational progress, with respect to this complicated matter of public policy, that I've had the pleasure to help lead. It is my sincere hope that we can conclude the debate and modify our food safety laws in a responsible and scientifically sound fashion in the 99th Congress. For now, I thank the many of you who have worked with me as the issues involved in the food safety debate have become more focused and refined.

EXHIBIT No. 1

SELECTED COMMENTS OF EXPERT WITNESS AT FOOD SAFETY HEARINGS

Donald Kennedy, Ph.D., President, Stanford University (former Commissioner of the Food and Drug Administration): "I don't think that the general safety standard is appropriate. I think that there should be exceptions added to the Delaney Clause to permit scientific demonstration of the inappropriateness of a particular animal test on the negligibility of a particular cancer risk, and I think that the Congress should adopt a standard for negligible risk that can at least be generally understood by the agency and by others."

"My own view, which I stated on a number of occasions at the end of my time as commissioner, is that the Delaney Clause should be made more flexible before it breaks . . . The Delaney Clause is undesirably inflexible in two different ways. First, it leaves no headroom for scientific progress. Second, by increasingly requiring Agency action under conditions where the risks appear to be trivial, it invites public ridicule and disregard for the food safety laws more generally."

Jere Goyan, Ph.D., Dean, School of Pharmacy, University of California (former Commissioner of the Food and Drug Administration): "One should start by focusing the effort on identifying the food substance most likely to be hazardous. It seems to me a poor allocation of effort at this time to dilute our resources by concerning ourselves with those substances of longstanding that are unlikely to be of toxicological significance."

"Because of this—the fact that Delaney is not sensitive to advances in technology—that I believe that it has lost much of its initial utility. It is time to return to the real issue that the Delaney Clause sought to address: reasoned and reasonable protection of the public."

Arthur H. Hayes, Jr., M.D., Provost—Dean—N.Y. Medical College (Commissioner, FDA at time of this testimony). ". . . a definition of safe should be in the law; that it should, if you will, codify that which everybody, as you've heard for two days now agrees is the way that safe must be applied in a regulatory mode. Therefore, the law should admit, in a codified way, that safe does not entail zero risk . . ."

"Another problem presented by the current law is that it may soon be possible to conclude that a substance that is a carcinogen in animal species may not—because of anatomical, metabolic or other factors—present a risk to humans. These scientific factors are excluded from the decision making process under the Delaney Clause.

Fred Robbins M.D., President Institute of Medicine, National Academy of Sciences: "Protecting the safety of the food supply within the values of our society is an exceedingly complex and significant task."

"It is impossible to have a food supply entirely free of 'harmful' chemicals, since some of these chemicals, in appropriate amounts, are needed for normal metabolic function. Furthermore, our current ability to detect minute amounts of certain chemicals means that foods previously thought to be 'safe' are found not to be totally free of toxic chemicals. The goal of sound food safety policy is to minimize risks to health from foods, without unreasonably compromising availability, quality, and variety."

Kenneth D. Fisher, Ph.D., Director, Life Sciences Research Office, Federation of American Societies for Experimental Biology: "There is ample reason to conclude that food scientists will continue to develop new forms that provide sources of bio-available nutrients. . . . Similarly, toxicity testing will continue to evolve more precise techniques for measuring biological effects of substances. Thus, food safety legislation should be sufficiently flexible to provide for inclusion of these expected changes in any mechanisms for scientific input into regulatory decisionmaking."

"Any modification of current legislation should permit appropriate regulatory responses to issues arising from continuing advances in analytical capabilities."

Vincent DeVita, M.D., Director, National Cancer Institute: "These advances in analytical techniques make it possible to detect synthetic and naturally occurring carcinogens at the parts per billion level or lower, as compared to the parts per million level possible a decade ago. . . . With such techniques, it is likely we will be able to identify some traces of carcinogens in our food and water that are not possible to remove and have been present as long as these foods have been available."

Paul Newberne, D.V.M., Ph.D., Professor of Nutritional Pathology, Massachusetts Institute of Technology: "First, I should like to point out that there is no such thing as absolute safety and that there is risk in virtually all of our activities including our food habits and the foods we eat. The public has been misled into believing that we can have all the benefits of an abundant, tasty and nutritious food supply without any element of risk. This, of course, is an ideal goal, but unachievable. A more rational, scientifically sound aim is to provide an abundant, attractive, nutritious food supply with the greatest benefit and the lowest risk measured by every reasonable methods."

"The Delaney amendment has served a useful purpose over the past two decades, and I personally feel more comfortable with it in place than I would if it were abolished. Progress in analytical procedures, biological testing systems and experience in making judgmental decisions clearly indicate, however, that some flexibility is needed in the face of equivocal animal data, or even positive tests in some cases. Regulatory decisions should be made in a milieu where science, judgment, and public benefit can be intermixed to the benefit of all. There should be legislation which, while keeping the Delaney principles in place, permits or stipulates that regulatory bodies make judgmental decisions outside the rigid edict the amendment is now perceived to require."

Gerald Wogan, Ph.D., Chairman, Department of Nutrition and Food Science, Massachusetts Institute of Technology: "If we look at the entire literature dealing with carcinogens in animals that is available

today . . . roughtly 300 compounds have been identified so far which everyone would agree are carcinogenic. However, in essence, this is the way the Delaney Clause views the subject, that is, substances are either carcinogenic or they are not carcinogenic—but if one looks at the details of these experiments and particularly with respect to the kinds of levels that were administered to animals one finds a range of effective doses that extends over a range of roughly a million-fold . . . some substances are very powerful carcinogens: others are very weak carcinogens. Here again, the Delaney Clause . . . as it . . . interpreted, in the past, does not permit an accounting of the potency factor.

"It seems to me that a change in the kind of language in the Delaney Clause that would permit adequate protection but introduce sufficient flexibility for the science would be very worthwhile."

Gilbert S. Omenn, M.D., Ph.D., Dean, School of Public Health and Community Medicine, University of Washington: "Interest in the techniques and assumptions, the data and models, and the embedded policies and values in risk asessment is widespread and growing. The relevant federal agencies are deeply engaged, and the last three Administrations have pushed hard for better and more explicit analytical work in the regulatory arena."

"We should be clear that there is much to be learned about the doing of risk assessment and the most appropriate assumptions and extrapolations. Policy guidance on such matters as testing guidelines, statistical treatment, choice of mathematical model for extrapolation to low doses, and choice of scaling factor for extrapolation from animals to humans can enhance the usefulness of risk assessment and remove some of the non-scientific, spurious discrepancies which are wrongly attributed either to the scientific evidence or to the methodologies of risk assessment. However, we should recognize that it is a long and uncertain leap from qualitative and quantitative risk assessment to politically and socially acceptable risk management decisions."

SPECIAL OLYMPICS

Mr. HATCH. Mr. President, I would like to share the following article about Special Olympics with my colleagues in Congress. The story appeared in the September 30, 1984 issue of Parade Magazine. It provides an excellent description of this special sports program and the positive effects it has had upon the lives of handicapped youth and their families.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A STORY OF WINNERS CHILDREN WHO CONQUER

Five years ago Jon Franklin, 9, could neither talk nor eat, could barely walk and was, quite literally, starving to death. He was born with Down's syndrome, a form of mental retardation. When his natural parents were told that their son was handicapped, they refused to take him home from the hospital. He was institutionalized for a time, and then passed from one foster family to another, for four years nobody's baby but God's. He was never taught how to talk or potty train or any of the other skills a child needs to survive decently. He knew how to cry and to make a gruff animal sound, a hoarse growl of distress, but nothing more. By the time Jon was almost 4, he could not keep food down anymore; after a bite or two, he threw it up. Doctors dismissed his vomiting as a psychological quirk, explaining that he simply refused to learn how to eat, as if this unhappy little boy had been spoiled by life. He was slowly dying of starvation, and no one wanted him.

But this story has a happy ending. Jon Franklin prevailed.

I visited Jon this summer in Alexandria, Va., where he lived with his adoptive family in a modest Cape Cod style house on the edge of a woods. It was early afternoon, and Jon had just come home from school, dressed in shorts, sneakers and a blue T-shirt on which was printed: I am a child of God. He is an active, sturdy boy now, although quite small for his age. Blond, given to laughter, immensely playful. His blue eyes express an innocence and trust that is remarkable given the cruelty and pain he has borne. He has trouble speaking—his enunciation is not always exact. Yet is is a miracle that he speaks at all.

In the living room, his adoptive mother, Wanda Franklin, 36, brought him over to meet me. I squatted to be nearer his height. He studied me a moment, grinned and yelled, "Hi!" falling against me in a hug.

He asked me if I would play basketball with him. I said sure. But first, his mother said, he had to nap for an hour. Jon made a face and walked to his room. "We'll play later?" he asked. Yes, I said, we'll play later. He smiled big.

Jon was to compete the next day in the regional Special Olympics at a high school in Alexandria: 550 other mentally handicapped children and adults would also participate. Founded by Eunice Kennedy Shriver and supported by the Joseph P. Kennedy Jr. Foundation and public gifts. Special Olympics has become the fastest-growing sports program in the world. Last summer it held more than 20,000 separate sports events for a million handicapped athletes in every state and 50 foreign countries.

Before Special Olympics began the mentally handicapped were considered incapable of competitive sports. It was argued that they might hurt themselves or become confused or frustrated, that such competition would only reinforce their feelings of inadequacy and abnormality. Special Olympics proved the falseness of those agruments and has given millions of handicapped children the thrill of physically striving and winning. Jon Franklin is one of the kids whose life has been changed by Special Olympics.

"It's always the biggest day of his life." said Britt Franklin, 39, Jon's adoptive father. "He gets to be king for the day. He lives for it and cherishes it. Special Olympics is Jon's chance to be normal. To be praised. No matter whether he placed first or last, everybody gets a standing ovation, a ribbon, to be the center of attention. It's absolutely astonishing the difference it makes. You want to cry when you see the look of triumph on their faces, these kids who have so little chance to triumph."

While Jon napped. I sat with Wanda and Britt in the living room, and we talked about their little boy. What I heard was the story of a defenseless child's long and lonely battle to live—a portrait in courage.

"We couldn't have children of our own" Wanda said, "but we badly wanted to." A very pretty woman with brunette hair and dark eyes. She spoke in a high somewhat unsteady voice. Shyly. "Every few years, I had medical tests to see if I might be able to become pregnant. I had some surgery and the doctors thought I might. I was in my mid-30's and there is a chance of having a Down's syndrome baby as you age. We had been taking in foster children, so I called social services and asked if I could take in a retarded child. Two weeks later, Jon came to us."

He came to them a very sick little boy of nearly 4. He was dying. Fragile and weak, when he tried to walk, he would take two or three steps, then sit down and cry. He was suffering from starvation caused by his inability to swallow food. Wanda took him almost daily to see doctors. She was told repeatedly that Jon's vomiting was psychological, as if he was doing it to get attention or out of stubbornness. The doctors, Wanda said, didn't seem to care; their attitude seemed to be that he would be better off dead.

"Then, one day, Jon was at the table," she continued. "He ate a little bit, spit up, then went to his bed and lay down. It broke my heart to see him lying there, so tiny and weak. I knew he was going to die, that he couldn't go on anymore."

She took him to the hospital and insisted that they admit him. If they refused, she told them, she would sit and hold him in the waiting room and he would die there. They admitted him.

"I sat in the waiting room for hours," Wanda recalled. "Nobody came to tell me how he was doing. Finally, I saw a doctor. He said Jon had come out of surgery hours ago. Somebody, he said, had poured lye down Jon's throat! I was shocked. I couldn't believe that anybody would make a baby drink lye." Tears came to her eyes. "They found he had a hiatal hernia. Acid from his stomach was getting into his esophagus, and he had a 2-inch ball of food choked up in there and cutting off his throat. That's why he couldn't swallow," she said angrily.

The surgeon reconstructed part of Jon's esophagus so he could eat again, and they removed the hernia in his stomach. That was June 1979. It was six months before he could eat solid food, three years before he could speak.

When Britt went to visit Jon in the hospital, he found the boy in bed with a fever of 104. The doctors didn't know what was causing it and, Britt said, they didn't seem to care much. Finally, they checked the incision across Jon's stomach, 6 inches in length. It was heavily infected. They tore out the stitches, and Jon screamed in pain. The doctor took a swab and started cleaning out the wound with peroxide. When Britt demanded that the doctor give the boy a pain killer, the doctor ignored him.

"I mean, his belly was open and they were swabbing it out, and the kid was in horrible pain," Britt recalled. "They did nothing to ease the pain. I had to sit there and hold this little kid while the guy cleaned him out. I've been in Vietnam, and I have never seen such agony as that boy went through.

"But within seconds after it was over, he was fine. I was so deeply impressed—his strength. Jon never quit. For weeks on end, I had to clean out his wound while Wanda held him down. He was uncomplaining. He's really special. The joy of being around someone with that kind of courage is indescribable. I could not bring myself to give him back. We adopted him because I knew

Jon was home. He is where he belongs. He is ours."

I went into the bedroom to get Jon. When I turned on the light, I saw him lying on the bed grinning up at me. He hadn't slept a wink. He stood up on the bed. "See my ribbons?" he said. On the wall were pinned ribbons he had won in Special Olympics. Blues and reds. "Basketball throw." He pointed a ribbon. "Fifty-meter dash. Softball throw." He smiled with pride.

Late that afternoon Jon spent the remaining hours of light practicing on a blacktop basketball court in a clearing in the woods near his home. For hours, he raised the heavy ball, eyed his target, gritted his teeth against fatigue and with a burst of effort threw it into the air, trying to make a basket, never giving up. He would shout with delight when the ball merely banged off the backboard. At last he made it in. I marveled at his determination. I have met many brave people, but Jon Franklin, this little boy, was their match.

When it was time to go, I lifted him in my arms and carried him through the darkening woods toward home. "Didn't I do good? I made a basket!" he exclaimed.

The following afternoon at Special Olympics, he won two second-place ribbons, in the standing long jump and the 50-meter dash. He came home, clutching his ribbons, in triumph.

Another Special Olympian is Jeff Gregory, II, who until recently lived in Fowler, Colo., a small farming community where his father was school principal. Jeff, like Jon Franklin, is a Down's syndrome child, one of more than a million who compete in Special Olympics each year.

I arrived in Fowler in time to go to the regional Special Olympics in Lajunta (15 miles away), where Jeff would participate with 250 other handicapped kids and adults. He is a handsome child, blond and blue-eyed like Jon Franklin and, like Jon, small for his age. Jeff is a very competitive boy and, like many handicapped kids, unusually affectionate. He is without a sense of hate.

It was a warm, sunny day. The high school stadium was crowded with volunteers, members of the Olympians' families, friends, teachers and "huggers," volunteers whose sole task is to hug and praise the athletes. Every child, regardless of how he does, receives lots of praise and a ribbon simply because he had the courage to enter an event.

I sat in the bleachers with Jeff's parents, Mike and Pam Gregory, both 36, watching the athletes warm up. Jeff was stretching and doing jumps, looking earnest, getting ready for the 50-meter dash.

The entire event, played out on a dusty field in a small town, was a pageant of human courage.

It began with the lighting of the Olympic flame and the saying of the oath. One of the first events was a wheelchair race, six boys and girls with physical and mental disabilities pushing themselves in wheelchairs up a 100-yard track, their faces filled with determination and, for some, pain. They would not give up. As each in turn crossed the finish line, each was cheered and applauded and embraced by huggers.

Five children in wheelchairs crossed the line. The sixth, far back in the distance, was a boy of about 13, with dark hair and beautiful eyes that were focused with fierce intensity on the paper ribbon that marked the finish line. He was shoving his chair backward, the only way he could make it move, looking over his shoulder at his goal. I didn't think he could make it—he had only partial use of one leg. His thin body contorted and hunched grotesquely in the chair, he kicked with his foot at the dusty track, moving his chair inch by inch toward the finish line. It took him a very long time, but his eyes never left the ribbon, his foot continually digging into the earth like a protest against his infirmity. We cheered him on, this crippled, disfigured, heroic child who refused to give up the race.

At last his wheelchair lurched over the line. He came in last, yet he had won the hardest race of all. I will never forget seeing him line up in center field with the other racers to receive his ribbon. We cheered him again as he sat in that awful chair, tears filling his eyes, his beaming face declaring, more strongly than words, his pride.

Then it was Jeff Gregory's turn to run the 50-meter dash. He stood in place with five other retarded children, each nervously eyeing the others. The gun fired, and they went running down the track, some moving awkwardly, others, like Jeff, running like normal children, all of them determined to complete the race. They all did, and we ran to the finish line and hugged them all."I won! I won!" Jeff shouted, jumping up and down. He had come in third, but in a larger sense he had indeed won.

I looked at his parents. They were unabashedly proud. Later, his father said to me, "Jeff's very sensitive. Every time he does something new, we cheer, because it's a miracle. The least little thing he does is exciting. If he tries to use a big word—he tried to use 'obnoxious' last night—or when he added seven and eight and finally got it right, that's exciting. He loves sports, but he wouldn't be able to compete if it weren't for Special Olympics. It's the biggest thing in his life. The school districts provide for athletics, but not for Jeff.

"He loves basketball, but he'll never know what it feels like to play it. This year, even when it snowed, he went out and shot baskets. He's gotten really good. But he'll never be part of it, and there's a sadness there. Three years ago, we first took him to Special Olympics, and his ribbons made him King Tut! Was he excited! What it said to him was, 'I can be somebody.' He could strut his stuff, and nobody could put him down. He performs the best he can. He knows that, and that's all that matters to him."

Until the Gregorys moved to Cedar Edge, Colo., not long ago, Jeff was the only retarded child in his school. Today, in another school, he's in a class with other retarded kids. But because he lives in a normal world where he will never do as well as the majority of other children, where he will fail and fail again. Special Olympics are the only occasions where he will win and know that he has. In time, as he gets older, he may grow isolated and removed, as do many such children as they age. But he will always have the memory of these games, the ribbons he won, the praise he received.

When the meet was over, dusk settling over the stadium, I sat in the bleachers and watched the children scattered like petals at random on the grass, their shadows long across the field. I remembered other children, also retarded, whom I had seen in state hospitals—children whose parents cannot or will not care for them and are dumped like so much refuse in prisonlike institutions, holding pens for many of the weakest, most defenseless among our people. I have seen them housed there, unable to appeal, often physically and sexually abused. I have seen them sitting by the hundreds in dim, bare rooms, sitting in their own urine and feces, little children naked and unwanted, their arms cradling their bodies, rocking endlessly in rooms with concrete floors. If nothing else, Special Olympics teaches us that the Jeffs and Jons of this world, and the boys who make their triumph in wheelchairs down dirt tracks, deserve better than to be locked away. Their singular courage adorns the earth.

SENATOR JENNINGS RANDOLPH

Mr. PRYOR. Mr. President, I want to say a final word on the floor of the Senate in recognition of my friend and mentor, Senator JENNINGS RANDOLPH of West Virginia.

Emerson said that history is nothing more than the shadow of great men, and I think he must have had great foresight in looking ahead to the distinguished career of JENNINGS RANDOLPH. Our friend and colleague was a freshman 50 years ago, and in a real sense he never ceased being new to the job. Even when he was celebrating a half-century of dedication, he was as fresh and original as the first day he came to work. He never tired. And he never let the duties and responsibilities of being a Senator overcome him.

Look for a minute at the background JENNINGS RANDOLPH brought to this body: newspaperman, college professor and dean, airline executive, even Member of the House of Representatives for 14 years before coming to the Senate. We will miss his example as a hardline parliamentarian. We will miss his optimism and determination, his friendly persuasion, and his sense of what is right in legislation.

I commend JENNINGS RANDOLPH and wish him all the best for a long and distinguished retirement.

SENATOR JOHN TOWER

Mr. INOUYE. Mr. President, for more than two decades Senator JOHN TOWER has served in this body in a manner that I have respected and admired. His stated No. 1 priority as a Senator has been national security, and in this area he has enjoyed notable success and fulfillment of his goals.

On this eve of his retirement, I wish to join in praising JOHN TOWER's rich contributions to this body and to our Nation.

As the chairman of the Armed Services Committee for the past two Congresses, Senator TOWER has devoted substantial time and enormous energy to strengthening our Nation's military defenses. Under his leadership the role of this committee in influencing national defense policy has grown, and with it the voice of the Senate. His dedication to this task and attention to detail has been unsurpassed. None of us could ask more of a chairman.

JOHN TOWER and I have occasionally found ourselves on opposite sides of

issues facing this body. But I have always been impressed with him as a reasonable and very articulate spokesman for his position. Through our debates, we have breathed life into the Senate envisioned by our Founding Fathers—a deliberative body that serves as a crucible in which conflicting ideas can be discussed, thereby enabling consensus decisions.

The Senate has been enriched by the presence of our colleague from Texas. He will be deeply missed. I wish JOHN TOWER and his family the best of success in all their endeavors in the years to come.

TRIBUTE TO SENATOR HOWARD H. BAKER, JR.

Mr. INOUYE. Mr. President, I wish to join my colleagues in paying such deserved tribute to our departing friend and colleague, the distinguished majority leader of the U.S. Senate. I will keep these comments brief because the measure of a man is not the length of our tributes to him but the imprint that he has left upon this institution and the business of our Nation. In the case of HOWARD BAKER, this has been great.

Senator BAKER is a man who has earned the deep respect and admiration of all those who have had the privilege of knowing him. His skillful leadership over the past years as both minority and majority leader has transcended party lines and attests to his capabilities as a fair and compassionate man, a skillful legislator, and a great American. His early leadership in the area of civil rights, his vision during the debate on the Panama Treaties, his incisive and insistent pursuit of truth during the Watergate hearings all point to a man who will be greatly missed not just by Members of the Senate but the Congress as a whole.

I wish HOWARD BAKER every success in his new pursuits and feel certain that he is someone about whom we shall hear a great deal more in the years ahead.

TRIBUTE TO RETIRING SENATOR JENNINGS RANDOLPH

Mr. THURMOND. Mr. President, I rise today to salute my good friend and distinguished colleague, Senator JENNINGS RANDOLPH, who is retiring at the end of his current term in the U.S. Senate.

Senator RANDOLPH and I have served together in this body for 26 years, during which time I have admired him for his staunch character and great ability. He has displayed enormous energy, and his courtesy and diplomacy have made him very popular among his colleagues, regardless of party affiliation.

Mr. President, I served as a delegate to the Democratic Presidential Nominating Convention in 1932, the year that the party nominated and the country elected Franklin D. Roosevelt as President. That same year the people of West Virginia sent JENNINGS RANDOLPH to Congress, where he served for 14 consecutive years. He is the only Member currently serving in Congress who was elected with Roosevelt. He has served long and well, casting approximately 10,700 votes during his House and Senate tenure.

Throughout his career in public service, Senator RANDOLPH has been at the forefront in addressing issues of importance to the citizens of West Virginia and the entire Nation. He has always been keenly interested in young people, for whom he has a natural affinity. In fact, Senator RANDOLPH was the author of the constitutional amendment which granted the right to vote to 18-year-olds. He continues to give speeches encouraging young people to register and vote and recently spoke on that theme at my alma mater, Clemson University, where he made a fine impression.

Senator RANDOLPH has also been a great champion of public works. For example, he has sponsored legislation which improved our Nation's highway system, and legislation creating various water projects, the Appalachian Regional Commission and the Economic Development Administration.

Senator RANDOLPH has taken an especially active role in addressing the needs of our Nation's veterans and those who are handicapped. He is a true patriot and a great American.

Mr. President, Senator RANDOLPH has revered the Senate and has insisted on dignity and decorum in these Chambers. He will be sorely missed. I want to take this opportunity to salute him and wish him the best in his retirement.

SALUTE TO SENATOR HOWARD BAKER

Mr. SPECTER. Mr. President, I consider myself fortunate to have begun my service in the U.S. Senate when Senator HOWARD BAKER was the leader of my party and the leader of the Senate. He has provided a unique blend of leadership combining strength to achieve legislative goals with an understanding of his fellow Senator's requirements for independence and the interests of his State.

Beyond his extraordinary qualities of leadership, Senator BAKER has exhibited a refreshing sense of humor which both captures the spirit of the occasion and breaks the tension to the benefit of all within earshot.

All of us in the Senate, Democrats and Republicans alike, will miss him. I look forward to continuing our personal relationship and friendship, as he pursues his new career.

When I congratulated him recently on his prospective association with his new law firm, I did not inquire about the accuracy of the media report that he would earn $700,000 a year. Knowing something about big firms, the practice of law, hourly rates, and so forth even at that compensation, HOWARD BAKER will be underpaid.

SENATOR HOWARD BAKER

Mr. MATTINGLY. Mr. President, it is difficult, in a few words, to characterize a man like my friend HOWARD BAKER. Somehow, it is not enough to say that the distinguished majority leader is an outstanding statesman, a warm, intelligent, and dedicated public servant. I believe a personal experience I had with the majority leader about 4 years ago gives some insight into the character and personality of the man.

Senator BAKER came to Georgia in 1980 to give my campaign for the Senate a shot in the arm. Among the questions that reporters often asked him as to assess my chances in the election. Without hesitation, he would respond that he believed MACK MATTINGLY had as good a chance for victory in 1980 as he had the first time he ran for the Senate in Tennessee. Coming from the Republican leader of the Senate, that seemed to me the perfect answer to that question. The press, apparently, was satisfied by it as well. It wasn't until some time later that I learned HOWARD BAKER had lost his first Senate race back in 1964. Since no one remembered that fact, what Senator BAKER had said was the perfect answer to what could have been a difficult question. To me, that was an early example of the kind of diplomacy that is so often needed here on the Senate floor and that we have come to expect from the majority leader. More than that, it demonstrated that subtle sense of humor which I have grown to appreciate.

Mr. President, it has been a privilege for me to serve my first two Congresses under the strong leadership of HOWARD BAKER. For that is what Senator HOWARD BAKER is—a strong leader. We in this Senate recognize that and, I believe, so do the American people. Prior to Senator BAKER's being elected as Senate majority leader, he had his eyes on the 1980 Presidential race. Writing in "America in Search of Itself" Theodore White described HOWARD BAKER as one of the big four contenders for that year's Republican Presidential nomination. He said of the Senator:

> Both the shortest * * * and the youngest * * * of the major candidates, HOWARD BAKER could not be taken lightly. Seated, he was the tallest man in the room. He was as smooth and well-spoken as

anyone in high place, a political professional in the best sense of the word.

There is no disputing the fact that during his tenure as majority leader, seated or standing, HOWARD BAKER has often been the tallest man in the Congress. As the first Republican majority leader in 25 years, he has led the Senate during a pivotal time in our history. It has been a time and a position which have demanded much from him—ingenuity, intelligence, a kind of pioneer spirit of leadership, fortitude, and courage. My good friend from Tennessee has artfully exhibited all of these qualities.

They are the stuff, Mr. President, of which great men are made. It is history, more than it is a man's contemporaries, which recognizes greatness and gives perspective to a career. But I am confident that when students of history look back on our time, Senator HOWARD BAKER will rank among the giants who have served in this body. He will be blamed alongside Webster, Clay, and Calhoun, Johnson, and Dirksen, and Russell.

In these closing hours of the 98th Congress, we are preparing to say goodbye to a distinguished leader. I am saying farewell to a close personal friend as well. I want history to know something of HOWARD BAKER the private man. Despite the demands of his office, Senator BAKER always had time for a freshman Senator. Because of that, we have cultivated a warm friendship. Many are familiar with HOWARD BAKER's photographic accomplishments; few know that he has spent hours with me and others who are interested in photography imparting to us what he knows of the subject.

I mention this, Mr. President, because I think it says something else about the man. He is generous with his time and with his expertise. He does not serve to bring glory to himself, but he serves to give. That is what I will remember about my friend HOWARD BAKER.

Best of luck, Mr. Majority Leader, as you reenter private life. We will miss you and the country will surely feel the loss of your leadership in the Senate. I know Theodore White was right—you are not to be taken lightly. I suspect we in this Nation will continue to profit by your service. And I thank you.

THE RETIREMENT OF SENATOR JOHN TOWER

Mr. THURMOND. Mr. President, I rise in tribute to one of our distinguished colleagues who is retiring after more than 23 years in the U.S. Senate. He is JOHN TOWER of Texas. His accomplishments are legion, but he will probably be remembered most for his contribution to the defense of our Nation as the ranking minority member and then chairman of the Senate Armed Services Committee.

Senator TOWER was born in Houston, TX, on September 29, 1925. He is the son and grandson of Methodist ministers. Senator TOWER grew up in a number of east Texas communities, and now makes his home in Wichita Falls.

At the age of 17, shortly after the outbreak of World War II, JOHN TOWER enlisted in the Navy and saw combat on a gunboat in the western Pacific. He is proud of his Navy background and, as a master chief petty officer, is the only enlisted Reservist in the U.S. Congress.

Senator TOWER received a bachelors degree in political science from Southwestern University, a masters degree in political science from Southern Methodist University, and did graduate work at the London School of Economics. Prior to his election to the U.S. Senate in 1961 to fill the seat vacated by then Vice President Lyndon B. Johnson, he was a government professor at Midwestern University in Wichita Falls, TX. He has been reelected three times, in 1966, in 1972, and in 1978.

JOHN TOWER is the second most senior Republican in the Senate, in addition to his chairmanship of the Armed Services Committee, he is the chairman of the Senate Republican Policy Committee and sits on the Budget Committee and the Banking, Housing, and Urban Affairs Committee, where he is the chairman of the Housing and Urban Affairs Subcommittee.

Senator TOWER is a 33d degree Mason and Shriner and is a member of the American Association of University Professors, the American Legion, the Texas Historical Society, the Texas Philosophical Society, and the Methodist Church. He is a trustee of Southwestern University and of Southern Methodist University, a past worthy grand master of the Kappa Sigma fraternity and an honorary fellow of the London School of Economics. Senator TOWER is married to the former Lilla Burt Commings and has three children, Penny, Marion, and Jeanne.

As the former ranking minority member of the Senate Armed Services Committee and then as chairman, Senator TOWER has become known as one of the most effective and knowledgeable Members of the Congress in matters relating to our national defense. In September 1979, he used the focus of the SALT II debate to highlight U.S. deficiencies in our Armed Forces. His efforts were instrumental in Congress voting for an increased defense budget ceiling far beyond that planned by the Carter administration. Senator TOWER's consistent ability to identify in detail the relationship between levels of defense spending and the ability of our Nation to fulfill its national defense commitments have played an important role in the increased defense spending authorized by the Congress in recent years.

Understanding the importance of service men and women to our national security, he has sponsored legislation to correct deficiencies in the retired servicemen's family protection plan and was the author of the provision in law whereby active duty military personnel who choose to retire at a date after they first become eligible for retirement will not suffer a pay cut for their patriotism.

Senator TOWER's hard work has been recognized by numerous honors throughout his career, such as the L. Mendel Rivers Award from the Noncommissioned Officers Association, the Doughboy Award from the U.S. Army, and the Maxwell D. Kriendler Award from the Air Force Association. Probably the most unique honor bestowed on Senator TOWER, however, came in 1982 when he became the first Member of Congress in more than 80 years to be invited to deliver the commencement address at the U.S. Military Academy at West Point.

Mr. President, the Nation is indebted to JOHN TOWER for his efforts during his past 23 years of public service as a Member of the U.S. Senate. We will miss his leadership, his courage, and his dedication to our Nation.

Senator JOHN TOWER has been a close friend and a colleague, and I sincerely hope that his retirement from the Senate will in no way signal an end to his distinguished career of public service. I wish him, his lovely wife, and his children good health and happiness in the years ahead.

TRIBUTE TO SENATOR PAUL TSONGAS

Mr. KENNEDY. Mr. President, as the 98th Congress prepares to adjourn, I want to take this opportunity to pay tribute to my friend and outstanding colleague from Massachusetts, PAUL TSONGAS, who is retiring from the Senate as this session ends.

All of us respect the decision PAUL has made to leave the Senate after only a single term. But we understand his decision and we respect him all the more for it.

From the day he took his seat in the Senate, PAUL impressed us all with his unusual ability, profound commitment, and quiet passion. His uncommon eloquence in the cause of peace and his principled leadership in the search for arms control have immeasurably enriched our national debate on this all-important issue that will determine the fate of all humanity.

Time and again on the floor of the Senate, we have seen PAUL TSONGAS cut through the confusion of debate,

and teach the Senate a new lesson and a new wisdom about the nuclear peril. Always, when the going has been toughest, he has summoned us to stand firm against any strategy that relies on relentless nuclear buildups and mindless nuclear militarism.

In this Chamber, PAUL TSONGAS has also been perhaps the truest and most persistent voice of our time on the issue of human rights. A quarter century ago, John F. Kennedy had the idealism and concern of young Americans like PAUL TSONGAS in mind when he created the Peace Corps. And in all the years since his own days as a volunteer, PAUL TSONGAS has generously fulfilled the dream my brother had for a new generation of American leaders who would dedicate themselves to the cause of hope and progress for all peoples everywhere.

In the Senate, PAUL TSONGAS has been a powerful voice for an end to the conflict in Central America, for freedom for Soviet Jews, for majority rule in South Africa, and for all those on this Earth who suffer from tyranny and oppression.

There was no finer moment in recent years in the U.S. Senate than when PAUL TSONGAS took the floor a few months ago, and in simple words of powerful eloquence made an irrefutable case to halt the flow of American dollars for terrorism against innocent civilians in Nicaragua. By the narrow margin of two votes, PAUL's position failed. But I suspect that everyone on the Senate floor who heard that debate understood in their heart—however they may have voted—that PAUL TSONGAS was right.

We will also remember PAUL for his extraordinary facility in dealing with new and complex economic principles, his dedication to education and high technology, and his perseverance in achieving compromises that others had found impossible on deeply divisive issues like the Alaska lands legislation, the rescue of Chrysler, and the future of the auto industry.

But most of all, PAUL TSONGAS left an indelible mark in the Senate through his leadership in urging a new agenda for the Nation that would be equal to the new challenges of the 1980's. And in all of these endeavors, PAUL has sought to point us to the future without losing sight of the values of the past. This is the lesson of his service—that if we seek new ideas—and we do—it is in order to advance the abiding principles of progress and justice, compassion and peace.

Truly, it can be said of PAUL TSONGAS—everything he touched, he left better than he found it. He gave something back to America in return for all it has given him.

Massachusetts will miss him in the Senate, and so will each of us. I am proud to have had him as a colleague and a friend, for he is one of the best Senators Massachusetts has ever had.

TRIBUTE TO SENATOR HOWARD BAKER

Mr. KENNEDY. Mr. President, as the Senate prepares to adjourn and the 98th Congress comes to an end, all of us in this Chamber, on both sides of the aisle, regret that our distinguished Majority Leader HOWARD BAKER has decided to take his leave—and move on to other things.

Over the years, all of us have come to respect HOWARD BAKER for his intellect and integrity, and to love him for his country eloquence.

HOWARD BAKER is one of the most able and most decent human beings I have ever met. He may just be the finest Senator Tennessee has sent to Washington since Andrew Jackson—who also left the Senate to go on to other things.

HOWARD BAKER is also a leader with great patience—and, I might say, with a reputation for patience even greater than the patience itself.

Of course, as we all know, HOWARD BAKER got his start in politics because his father-in-law was Senator Everett McKinley Dirksen. And I for one have always been a little wary of anyone who tries to get ahead on the basis of a famous family connection.

Actually, HOWARD BAKER likes to tell the story how his career began—at a Republican campaign rally in 1960 when my brother was running for President. At the time, HOWARD had been driving Senator Dirksen around the State of Illinois for a round of campaign appearances. And at this particular rally, in Alden, IL, Senator Dirksen complained that my brother was becoming famous for serving on a PT boat—but that no one had ever suggested that his son-in-law and chauffeur, HOWARD BAKER, who had also served on a PT boat, was qualified for public office.

From that point on, though, people did start to notice HOWARD BAKER, with results that are plain for all to see and that obviously are not concluded yet. Certainly, he is not being carried back to Tennessee on his shield.

We will remember HOWARD BAKER in the Senate for many things: Poet, philosopher, photographer—and politician in the finest sense of the word. Surely, he will be in Bartlett's next edition for his famous epigram in Watergate about what the President knew and when he knew it.

We will miss HOWARD BAKER in the 99th and future Congresses—but his leavetaking now from the Senate is unusual in one other important respect. For HOWARD BAKER is departing, not in an atmosphere of sadness, but with an air of anticipation and at the height of his powers.

For HOWARD BAKER, it may well be that the best is yet to come—and I suspect that all 99 of us who have valued his friendship in this body these many years will say: "It couldn't happen to a nicer guy."

TRIBUTE TO JENNINGS RANDOLPH

Mr. LAUTENBERG. Mr. President, I could not let this session come to an end without paying tribute to the senior Senator from West Virginia, JENNINGS RANDOLPH, who is retiring from the Senate after 26 years of distinguished service to the people of West Virginia and the Nation.

This year I had the privilege of working with this native of Elkins, WV as a member of the Environment and Public Works Committee. Senator RANDOLPH currently serves as ranking Democratic member and, of course, was chairman of the committee for many years. I have come to rely on him as an invaluable source of advice, encouragement and support, and I will miss him.

Mr. President, the legislative accomplishments of JENNINGS RANDOLPH are so extensive, and have had such a pervasive influence on our Nation's development, that it is impossible to do more than touch on the highlights of his contribution to our country. But, one clear thread emerges from his decades of devoted public service: a commitment to progress and a vision of the future. Since 1932, when he came to Washington with Franklin Delano Roosevelt, JENNINGS RANDOLPH has been a part of the national political landscape. He has served during days of despair and poverty, and during times of war and peace. He has played a central role in the Congress during a remarkable period of American history.

Among JENNINGS many achievements is the creation of the Interstate Highway System. Perhaps no other Member of the Senate has a more intimate knowledge of America's highways and the programs that serve them. Our Nation's extensive airport system stems from legislation he championed in 1946. The remarkable transportation system that has developed as a result of his initiatives underpins our economy. His authorship of the Appalachian Regional Development Act and Economic Development Act has played a critical role in the economy of West Virginia and the Nation.

While JENNINGS is perhaps best known for his work on the Environment and Public Works Committee, he has made a far broader contribution. In 1936 he authored the Randolph-Sheppard Act to assist the blind and was the first chairman of the Senate Subcommittee on the Handicapped. As

a long-standing and senior member of the Labor and Human Resources Committee, he has steadfastly supported a humane government, which assists those in need and provides opportunities for all of our citizens.

In 1942, JENNINGS introduced an amendment to the Constitution to grant 18-year-olds the right to vote, a reflection of his faith in our young people and his interest in involving them in public life. His persistence in seeking voting rights for young adults resulted in the ratification of this proposal as the 26th amendment to the Constitution in 1971.

JENNINGS' commitment to eliminating war and building a lasting peace around the world is evident in his determined effort to secure congressional approval of a U.S. Academy of Peace. The respect and affection all of us feel for JENNINGS is reflected in congressional approval, in the closing days of his last session of Congress, of the U.S. Institute for Peace as part of the DOD authorization bill. I joined with many of my colleagues in cosponsoring JENNINGS' original legislation to establish such an institution and am enormously pleased that we were able to approve it before his retirement. Establishment of the Institute will permit scholars and others devoted to peace to better understand the roots of war and the steps we must take to move us away from international conflict. The U.S. Institute for Peace will stand as a lasting legacy to JENNINGS' hopes for his country and the world.

Mr. President, on a more personal note, I want to make mention of the fact that I have a particularly warm spot in my heart for the senior Senator from West Virginia. On many an occasion, I have listened with rapt attention to his recollections of critical decisions for our country in which he participated, and to his recall of personalities and political encounters he witnessed over his years of public service. He has a faith in this Nation, and an understanding of its dynamics, paralleled by few in public life.

JENNINGS is also a source of comfort to his colleagues. When I rose in this body to offer my first amendment, he was there to support it and encourage me in my efforts. Earlier this year, when my first major bill, The Uniform Minimum Drinking Age Act of 1984, was considered by the Senate, JENNINGS made a remarkable speech in support of that measure. The bill was not without controversy and he could have remained silent. But he did not. His words carried great weight because of his experience and insight.

JENNINGS RANDOLPH, Mr. President, is a great Democrat, with both a capital "D" and a small "d." He has championed the cause of those who, for one reason or another, could not help themselves. He has kept faith with the great Democratic traditions into which he was born. Nevertheless, the Senator from West Virginia has never let progress fall victim to partisanship. He knows that the future will be shared by all of us, regardless of party.

Mr. President, a few days ago, the Committee on Environment and Public Works approved legislation to name the Federal building in Elkins, WV, for our esteemed colleague. No one could deserve this honor more than JENNINGS, and I was pleased to support that bill. Yet, Mr. President, in a sense, all of our Nation's public buildings, roads and bridges, airports, environmental programs, and historic sites carry JENNINGS RANDOLPH's name. There are monuments to JENNINGS RANDOLPH in every State in the Nation.

The gentleman from Elkins, VA, is a deeply religious man, and he knows the biblical admonition that "Where there is no vision, the people perish." The citizens of the United States have been nourished and enriched by the vision of JENNINGS RANDOLPH. Mr. President, I thank the Senator from West Virginia for his friendship and guidance. I wish him Godspeed in his work in the years ahead.

GOOD WISHES TO SENATOR PAUL TSONGAS

Mr. PRYOR. I wish to commend my colleague, PAUL TSONGAS, Mr. President. And I wish to say that in my time here he has acted as a friend and example to me. We came to the Senate together in 1979. Even then, PAUL TSONGAS had distinguished himself in the House of Representatives, where he had served for 4 years. We expected outstanding work from him, and that is exactly what he delivered.

Although we were saddened to learn of his retirement from the Senate, all of us who knew and admired PAUL also knew that his was the right decision. He will be able to devote valuable time and attention to his family. His wife and children will be the beneficiaries of his time and devotion, and they are the ones who will value the most his dedication and sense of responsibility.

I want to wish everything good to my friend and colleague. We will miss PAUL TSONGAS in the Senate. We'll miss his sense of fair play and his grasp of the complex issues the Senate faces. I will miss him as a friend. I hope he will return often and that he has every success in his law practice. He has the best regards of all our Members, Mr. President, just as he had while serving in this body.

TRIBUTE TO SENATOR JENNINGS RANDOLPH

Mr. INOUYE. Mr. President, I rise today to express my appreciation of and admiration for Senator JENNINGS RANDOLPH, a true legislative pioneer and the only person serving today in the U.S. Congress who had a very real part in the difficult economic decisions made in the "first 100 days" of the Roosevelt administration.

Senator RANDOLPH's legislative accomplishments are monumental. He has been a leader for all of us in transportation, and his expertise transcends our Nation's transcontinental highway system as well as our Nation's airway system. He sponsored the legislation authorizing the construction of the National Air and Space Museum, which many of us see every day on our way to the U.S. Senate. His efforts on behalf of our comprehensive environmental legislation, including the Clean Air Act, the Clean Water Act, The Endangered Species legislation, as well as various energy conservation measures, are unsurpassed.

As an original member of the Senate Veterans' Affairs Committee, many of us in this body personally owe him a great deal of gratitude. On a personal level, his continued enthusiasm for innovative approaches to address the many pressing and truly unique rehabilitation and social needs of the Pacific Basin region are especially appreciated. In fact, it was Senator JENNINGS RANDOLPH who first suggested to me that we should jointly seek to establish the comprehensive Pacific Basin Research and Training Center so that all the residents of the Pacific Basin have an opportunity to lead their individual lives to the fullest. His concern for the individuals extended even further, and Senator RANDOLPH has become one of the most staunch supporters of my State's native Hawaiians. Most recently they were included in the Developmental Disabilities Reauthorization Act at Senator RANDOLPH's request.

Mr. President, as I indicated earlier, Senator RANDOLPH's legislative record is, indeed, truly remarkable. He has single-handedly provided a wide range of diverse citizens across the Nation with the opportunity to blossom and commit themselves to our society beyond their wildest dreams. In my mind, Senator RANDOLPH never really left his former profession of education and, every day, he has been expending his energies to teach each one of us how truly magnificent the individual can be.

I will never forget the Senator's dedication to our Nation's youth nor his continuing admonition that we should always make time no matter how busy our schedules are, to speak with these young citizens, to share our views with them and encourage them to become more actively involved in the political process. In my judgment, it is truly most fitting that the U.S. Congress has finally decided to establish a U.S. Institute of Peace, a vision that Senator RANDOLPH shared with

his colleagues in both Houses of Congress since the early 1940's. As I reflect on Senator RANDOLPH's career, I never cease to be amazed by his concern for the individual. His faith in mankind continues to lead each of us on to think even more creatively about how we can best serve the citizens of this Nation. Even in his final days in the Senate, his creativity continues; for example, during the past legislative session, he and I have been working closely with our colleagues on the Senate Labor and Human Resources Committee to establish a special pediatric-oriented emergency medical service demonstration project to ensure that these most vulnerable citizens will truly have the highest quality of health care possible when they are most in need.

I will always be deeply indebted to the wisdom of my colleague from West Virginia and continue to look forward to hear from him in the years to come.

SENATOR HOWARD BAKER

Mr. LEVIN. Mr. President, last night I said a few things that were in my heart about the departure of HOWARD BAKER from the U.S. Senate. I wanted to add a thought or two today.

HOWARD BAKER is a great legislator.

The qualities that he invariably displays of patience, understanding, good humor, and fairness have made a permanent mark on me and, I believe, on this institution.

While he was majority leader for but a few years, it took him but a brief period to win the admiration and affection of all of us regardless of our party affiliation.

He is particularly kind and reassuring to new Members and the younger Members of the Senate. He is an especially decent and gentle man and makes all of his colleagues feel as though they are equally worthy of being heard and having their views and needs considered.

Taking on the responsibility of leadership in this institution is, of course, a historical and dramatic challenge but it also reflects a personal commitment to hold 99 colleagues in esteem and to seek to harmonize the different needs and goals of all of us into a coordinated body politic. HOWARD BAKER has that unusual talent.

He is a special person in a very special institution. He has left his unique brand of gentle persuasion, modesty, and good nature upon it.

SENATOR JENNINGS RANDOLPH

Mr. LEVIN. Mr. President, one of the first Senators I ever met other than my own Michigan Senators was JENNINGS RANDOLPH of West Virginia. It was about two decades ago and I was testifying before a Senate committee that he chaired. The subject of my testimony is lost in memory. What is not forgotten is the warm and inquisitive reception with which it was received by JENNINGS RANDOLPH of West Virginia.

Nor will I forget the dedication and commitment that he has shown to important and noble causes during the years that I have watched him as a colleague. He has played a pivotal role in obtaining a Peace Academy. He has spoken up constantly for energy independence and for education and for greater opportunities for all Americans. He has a special sensitivity for people who need a hand and a special love for his own beloved State of West Virginia.

He has more passion and fire at the age of 82 than most people one quarter his age.

He has been a good friend as well as a tireless source of good will and good humor.

I shall miss him.

SENATOR PAUL TSONGAS

Mr. LEVIN. PAUL TSONGAS of Massachusetts came to the Senate the same time I did. He brought to this institution a background in legislation and in serving the underdog. He utilized those talents and sensitivities to the fullest measure during his 6 years here.

His priorities are straight.

He has stated eloquently that America must stand for justice and progress in the world if we are to be secure in this world. He has been a passionate proponent of freedom for humankind wherever people might inhabit the globe.

He has shown political courage in pointing out the need of his party to change its course and to be future oriented and to respond to the hopes and aspirations of Americans. He has told us that, if we are to aspire to lead this country, we must inspire confidence in our managerial capability as well as our ideals. That argument is particularly compelling coming from as idealistic a person as PAUL TSONGAS.

He has shown great physical courage in the face of adversity. He has shown strength and good humor and will not only overcome that adversity but has strengthened those who know him in the process.

He has, by example, shown that the commitment to one's family is ultimately as good a test of one's humanity as one's commitment to a larger community or to grand causes. His special affection for his wife, Niki, and for their three children, Ashley, Katina, and Molly, has helped put things in perspective for many who have watched those relationships grow.

He has shared his conscience with all of us, particularly his classmates who, in 1978, were elected to take a seat with him in the Senate.

While we are all just temporary occupants of those seats, some leave lasting marks. PAUL TSONGAS is one.

TRIBUTE TO RETIRING SENATOR PAUL TSONGAS.

Mr. THURMOND. Mr. President, with the adjournment of the 98th Congress, the Senate will lose the services of Senator PAUL TSONGAS of Massachusetts. While Senator TSONGAS and I bring a distinctly different philosophical approach to our work as Senators, I have always found him to be bright, sincere, dedicated, courteous, and pleasurable to work with in the Senate.

PAUL TSONGAS was born to parents of humble means. He graduated from Dartmouth College, earned his law degree from Yale University, and spent time in Ethiopia and the West Indies with the Peace Corps. He has engaged in the private practice of law, has served as city counselor for his hometown of Lowell, MA., and was a deputy assistant attorney general in his home State. After two successful terms in Congress, he was elected to the U.S. Senate in 1973, where he has ably served on the Energy and Natural Resources Committee, the Small Business Committee, and the Foreign Relations Committee.

Those who have worked with PAUL in the Senate, and those who have followed his career, will especially remember him for his leadership role in helping to shape the historic Alaska lands bill, which many regard as the most significant environmental legislation enacted in this century. Senator TSONGAS has displayed a keen devotion to the conservation and wise use of this Nation's abundant natural resources, and he can be very proud of his accomplishments in this area.

Similarly, PAUL TSONGAS has shown himself to be a knowledgeable Senator in matters involving foreign affairs. He has been an especially strong champion of the freedom-loving people of Afghanistan. On Wednesday past, the Senate, by a unanimous vote of 97 yeas, adopted a resolution authored by Sentor TSONGAS to encourge and support the people of Afghanistan in their struggle to throw off the heavy yoke of Soviet domination.

Mr. President, as Senator PAUL TSONGAS returns to his home State of Massachusetts, I would like to take this opportunity to wish him, his wife Nicola, and their three fine children the very best. I am sure all of us hope that this career change will be the right tonic for him and that PAUL will enjoy good health and happiness for many years to come.

VOCATIONAL TECHNICAL EDUCATION ACT OF 1984

Mr. COCHRAN. Mr. President, I am pleased to rise in support of the conference report to accompany the Vocational Technical Education Act of 1984.

The managers of this important legislation have worked diligently to achieve a well-balanced and effective compromise.

The conference committee began its work with over 100 items in disagreement. To effect a compromise was indeed a difficult task, and I commend the managers of the bill for their long and hard work.

During my service in Congress, I have become more and more convinced of the value of vocational technical education. The legislation we have adopted here is tailored to be more responsive than ever to the skills required to serve our fast-changing job market.

I would like to share with you just a few illustrations of the new needs vocational technical education must meet.

According to the Congressional Budget Office, fully a quarter of the workers who are currently unemployed will never again work in the areas for which they were prepared because these jobs have disappeared.

The proportion of skilled workers in the labor force has fallen from 29 to 26 percent and current programs cannot meet the needs of industry to replace these workers.

Robots and computers will affect almost 7 million jobs in factories and 38 million jobs in offices, requiring a new level of technical literacy from these workers.

These types of unhappy observations were all considerations during the 3 years of extensive hearings held by the House and Senate Education Subcommittees. It was these sorts of deficiencies that prompted this reauthorization to be much more than a continuation of the status quo. This legislation provides much needed program improvements.

I am delighted that we were able to achieve a consensus and pass the Vocational Technical Education Act of 1984. I am confident that the results will be measured by the ability of the United States to retain the lead in technological and industrial development in the international market.

I would like to add a special word of commendation to Mississippi's Division of Vocational and Technical Education. I am proud to represent one of the country's finest and most effective systems of vocational and technical training. I intend to continue to support the efforts to provide vocational education opportunities for all.

BANKRUPTCY JUDGES

Mr. DECONCINI. Mr. President, I want to state my strong support for H.R. 6216, a bill to amend the vesting date for retirement for bankruptcy judges. This bill corrects a good faith oversight that occurred during the processing of the Bankruptcy Amendments and Federal Judgeship Act of 1984. I want to particularly thank Chairman THURMOND of the Committee on the Judiciary, who also chaired the conference committee on the Bankruptcy Amendments and Federal Judgeship Act, for his diligence in correcting the earlier omission.

The bill states that the retirement provisions for bankruptcy judges vested on March 31, 1984, for judges serving on that date. This is the original date their retirement was to have vested, however, in the hectic days of last spring and summer when the Senate repeatedly extended the March 31 deadline for the transition period, in the process we prevented the vesting of the bankruptcy judges retirement rights. By passage of this bill, we correct the unintended result and keep our earlier legislative promise. Our Nation's bankruptcy judges have labored long and hard in recent years as the bankruptcy caseload has increased dramatically and as they had to undergo a lengthy period of uncertainty about their own positions following the Supreme Court's ruling in the Marathon case which negated much of their jurisdictional delegation. Despite often finding themselves in a position not worthy of the importance of their judicial office, these judges have maintained the highest standards and continued to serve their courts and the public in a distinguished manner. Passage of today's bill is a tangible expression of our thanks for their service.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

EXTENSION OF MAXIMUM PRODUCTION PERIOD OF THE NAVAL PETROLEUM RESERVES—MESSAGE FROM THE PRESIDENT—PM 177

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report, which was referred to the Committee on Armed Services:

To the Congress of the United States:

In accordance with Section 201(3) of the Naval Petroleum Reserves Production Act of 1976 (10 U.S.C. 7422(c)), I wish to inform you of my decision to extend the period of maximum efficient rate production of the naval petroleum reserves for a period of three years from April 5, 1985, the expiration of the currently authorized period of production.

I am transmitting herewith a copy of the report investigating the necessity of continued production of the reserves as required by section 7422(c)(2)(B) of the Naval Petroleum Reserves Production Act of 1976. In light of the findings contained in that report, I hereby certify that continued production from the naval petroleum reserves is in the national interest.

RONALD REAGAN.

THE WHITE HOUSE, *October 5, 1984.*

ANNUAL REPORT ON HAZARDOUS MATERIALS TRANSPORTATION MESSAGE FROM THE PRESIDENT—PM 178

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Commerce, Science, and Transportation:

To the Congress of the United States:

In accordance with the requirements of section 109(e) of the Hazardous Materials Transportation Act (Public Law 93-633), I hereby transmit the Fourteenth Annual Report on Hazardous Materials Transportation for calendar year 1983.

RONALD REAGAN.

The White House, October 5, 1984.

MESSAGES FROM THE HOUSE

At 11:38 a.m., a message from the House of Representatives. delivered by Ms. Goetz, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 905) to establish the National Archives and Records Administration as an independent agency.

The message also announced that the House agrees to the report of the

committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1146) to amend the Federal Aviation Act of 1958 to provide for the revocation of the airman certificates and for additional penalties for the transportation by aircraft of controlled substances, and for other purposes.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1330) to authorize the U.S. Army Corps of Engineers to provide grants to the several States to encourage and foster the construction of necessary public capital investment projects, and for other purposes.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2166) to authorize appropriations to carry out the Indian Health Care Improvement Act, and for other purposes.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2303) to revise and extend the alcohol and drug abuse and mental health services block grant.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2496) to amend the Adult Education Act in order to simplify requirements for States and other recipients participating in Federal adult education programs, and for other purposes.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4164) to amend the Vocational Education Act of 1963 to strengthen and expand the economic base of the Nation, develop human resources, reduce structural unemployment, increase productivity, and strengthen the Nation's defense capabilities by assisting the States to expand, improve, and update high-quality programs of vocational-technical education, and for other purposes.

The message also announced that the House has passed the following bill, with an amendment, in which it requests the concurrence of the Senate:

S. 1160. An act to authorize Douglas County of the State of Nevada to transfer certain land to a private owner.

The message further announced that the House has passed the following bill, with amendments, in which it requests the concurrence of the Senate:

S. 1689. An act to authorize appropriations for the Coast Guard for fiscal years 1985 and 1986, and for other purposes.

The message also announced that the House agrees to the amendment of the Senate to the text of the bill (H.R. 5479) to amend section 504 of title 5, United States Code, and section 2412 of title 28, United States Code, with respect to the award of expenses of certain agency and court proceedings, and for other purposes, with an amendment, in which it requests the concurrence of the State.

The message further announced that the House has passed the following bills and joint resolution, each without amendment:

S. 1151. An act to compensate heirs of deceased Indians for improper payments from trust estates to States or political subdivisions thereof as reimbursement for old age assistants received by desendants during their lifetime;

S. 2483. An act to rename Dulles International Airport in Virginia as the "Washington Dulles International Airport";

S. 2663. An act pertaining to the inheritance of trust or restricted land on the Lake Traverse Indian Reservation, North Dakota and South Dakota, and for other purposes;

S. 2773. An act to designate certain National Forest System lands in the State of Georgia as wilderness, and for other purposes;

S. 2808. An act to designate certain National Forest System lands in the State of Mississippi as wilderness, and for other purposes; and

S.J. Res. 80. Joint resolution to grant posthumously full rights of citizenship to William Penn and to Hannah Callowhill Penn.

The message also announced that the House has agreed to the following concurrent resolutions, each without amendment:

S. Con. Res. 74. Concurrent resolution to encourage and support the people of Afghanistan in their struggle to be free from foreign domination;

S. Con. Res. 119. Concurrent resolution expressing the sense of the Congress concerning infringements of religious freedom by the governments of the Warsaw Pact states;

S. Con. Res. 150. Concurrent resolution directing the Secretary of the Senate to make corrections in the enrollment of S. 2303; and

S. Con. Res. 151. Concurrent resolution to correct technical errors in the enrollment of the bill H.R. 4164.

The message further announced that the House has agreed to the amendment of the Senate to the following bills and joint resolution:

H.R. 2889. An act to amend the national Historic Preservation Act;

H.R. 3788. An act to designate certain areas as components of the Natinal Wilderness Preservation System in the national forests in the State of Texas;

H.R. 4263. An act to designate certain lands in the Cherokee National Forest, Tennessee, as wilderness areas, and to allow management of certain lands for uses other than wilderness;

H.R. 5076. An act to designate certain areas in the Allegheny National Forest as wilderness and recreation areas; and

H.J. Res. 158. Joint resolution to make technical corrections in the act of January 12, 1983 (Public Law 97-459).

The message also announced that the House agrees to the amendments of the Senate to the following bills:

H.R. 2645. An act to amend the act of August 15, 1978, regarding the Chattahoochee River National Recreation Area in the State of Georgia;

H.R. 5172. An act to authorize appropriations to the Secretary of Commerce for the programs of the National Bureau of Standards for fiscal years 1984 and 1985 and for related purposes;

H.R. 5271. An act to extend the Wetlands Loan Act; and

H.R. 6221. An act to provide for the use and distribution of certain funds awarded to the Wyandotte Tribe of Oklahoma.

The message further announced that the House agrees to the amendment of the Senate to the amendment of the House to the bill (S. 864) to amend the Volunteers in the Parks Act of 1969, and for other purposes.

The message also announced that the House agrees to the amendments of the Senate to the amendments of the House to the bill (S. 1510) to establish uniform single audit requirements for State and local governments who receive Federal assistance and for recipients of Federal assistance from such governments, and for other purposes.

The message further announced that the House agrees to the amendments of the Senate to the following concurrent resolution:

H. Con. Res. 111. Concurrent resolution to commemorate the Ukrainian famine of 1933.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1881. An act to grant a Federal charter to the National Society, Daughters of the American Colonists;

H.R. 2122. An act to require the Secretary of the Interior to conduct a study of trapping in the Ozark National Scenic Riverways Area;

H.R. 2372. An act to recognize the organization known as the Navy Wives Clubs of America;

H.R. 2519. An act for the relief of Audrey O. Lewis and Emerson B. Vereen;

H.R. 3406. An act to recognize the organization known as the Daughters of Union Veterans of the Civil War 1861-1865;

H.R. 4853. An act to authorize the creation of a record of admission for permanent residence in the cases of certain natives of Cuba and Haiti, and for other purposes;

H.R. 5492. An act to provide for the conservation and management of Atlantic striped bass, and for other purposes;

H.R. 5728. An act to permit aliens lawfully admitted for permanent residence who are employed by the American Embassy of Beirut to return to the United States as special immigrants after completion of such employment; and

H.R. 6342. An act concerning approval of the governing international fishery agreements with Iceland and the European Economic Community.

ENROLLED BILLS SIGNED

The message further announced that the Speaker has signed the following enrolled bills:

H.R. 2838. An act entitled the "Federal Timber Contract Modification Act";

H.R. 2859. An act for the relief of John Brima Charles;

H.R. 2878. An act to amend and extend the Library Services and Construction Act;

H.R. 4994. An act to exempt from taxation by the District of Columbia certain property of the Jewish War Veterans, U.S.A. National Memorial, Incorporated;

H.R. 5223. An act to amend the Federal Meat Inspection Act and the Poultry Products Inspection Act to exempt restaurant central kitchens under certain conditions from Federal inspection requirements;

H.R. 5513. An act to designate the Delta States Research Center in Stoneville, Mississippi, as the Jamie Whitten Delta States Research Center";

H.R. 5631. An act to provide for the acquisition of a visitor contact and administrative site for the Big Thicket National Preserve in the State of Texas; and

H.R. 6223. An act to amend the Act providing for the incorporation of certain persons as Group Hospitalization, Inc.

The enrolled bills were subsequently signed by the President pro tempore (Mr. THURMOND).

At 5:18 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House agrees to the amendments of the Senate to the bill (H.R. 5688) to amend title 38, United States Code, to provide a cost-of-living increase for fiscal year 1987, in the rates for compensation paid to veterans with service-connected disabilities and the rates of dependency and indemnity compensation paid to survivors of such veterans, and for other purposes.

The message also announced that the House agrees to amendment of the Senate to following bill:

H.R. 6296. An act entitled "The San Juan Basin Wilderness Act of 1984".

The message further announced that the House agrees to the amendments of the Senate to the following bill:

H.R. 4966. An act to recognize the organization known as the Women's Army Corps Veterans' Association.

The message also announced that the House has passed the following bills and joint resolution, without amendment:

S. 607 An act to amend the Communications Act of 1934;

S. 1688. An act to amend the act of October 18, 1972, to authorize additional authorization of appropriations for Sitka National Historical Park, Alaska; and

S.J. Res. 259. Joint resolution to designate the week of November 12, 1984, through November 18, 1984, as "National Reye's Syndrome Week".

The message further announced that the House has agreed to the following concurrent resolution, without amendment:

S. Con. Res. 140. A concurrent resolution authorizing the printing of a revised edition of the "Handbook for Small Business" as a Senate document.

The message also announced that the House has passed the following joint resolutions, in which it request the concurrence of the Senate:

H.J. Res. 655. Joint resolution designating February 16, 1985, as "Lithuanian Independence Day"; and

H.J. Res. 659. Joint resolution making further continuing appropriations for fiscal year 1985.

The message further announced that the House has agreed to the following resolution:

H. Res. 611. A resolution appointing the Honorable JIM WRIGHT as Speaker pro tempore during the absence of the Speaker.

ENROLLED AND JOINT RESOLUTION SIGNED

The message also announced that the Speaker has signed the following enrolled bills and joint resolution:

S. 566. An act to direct the Secretary of Agriculture to release on behalf of the United States a reversionary interest in certain tracts of land conveyed to the South Carolina State Commission of Forestry, and to direct the Secretary of the Interior to convey certain mineral interests of the United States in such land to such Commission, and for other purposes.

S. 905. An act to establish the National Archives and Records Administration, and for other purposes.

S. 1097. An Act to consolidate and authorize certain atmospheric and services programs and functions of the National Oceanic and Atmospheric Administration under the Department of Commerce.

S. 1868. An Act to add $2,000,000 to the budget ceiling for new acquisitions at Sleeping Bear Dunes National Lakeshore.

S.J. Res. 295 Joint resolution to provide for the designation of the week of October 24 through October 20, 1984, as "Myasthenia Gravis Awareness Week".

H.R. 2889. An Act to amend the National Historic Preservation Act, and for other purposes.

H.R. 3601. An Act to modify the boundary of the Pike National Forest in the State of Colorado, and for other purposes.

H.R. 3697. An Act to modify Federal land acquisition and disposal policies carried out with respect to Fire Island National Seashore, and for other purposes.

H.R. 4932. An Act to withdraw certain public lands in Lincoln County, Nevada, and for other purposes.

H.R. 5540. An Act to provide for restoration of Federal recognition to the Confederated Tribes of Coos, Lower Umpqua, and Siuslaw Indians, to institute for such Tribe those Federal services provided to Indians who are recognized by the Federal Government and who receive such services because of Federal trust responsibility, and for other purposes.

H.R. 5782. An act granting the consent of Congress to an amendment to the Delaware River Basin Compact.

H.R. 5818. An act to enable the Consumer Product Safety Commission to protect the public by ordering notice and repair, replacement or refund of certain toys or articles intended for use by children if such toys or articles contain a defect which creates a substantial risk of injury to children.

H.R. 5997. An act to designate the United States Post Office and Courthouse in Pendleton, Oregon, as the "John F. Kilkenny United States Post Office and Courthouse".

The enrolled bills and joint resolution were subsequently signed by the President pro tempore [Mr. THURMOND].

At 5:50 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that pursuant to the order of the House of September 26, 1984, the House is deemed to have disagreed to the amendments of the Senate to the joint resolution (H.J. Res. 648) making continuing appropriations for the fiscal year 1985, and for other purposes, and agree to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. WHITTEN, Mr. BOLAND, Mr. NATCHER, Mr. SMITH of Iowa, Mr. ADDABBO, Mr. LONG of Maryland, Mr. YATES, Mr. ROYBAL, Mr. BEVILL, Mr. LEHMAN of Florida, Mr. DIXON, Mr. FAZIO, Mr. HEFNER, Mr. CONTE, Mr. MCDADE, Mr. EDWARDS of Alabama, Mr. MYERS, Mr. ROBINSON, Mr. COUGHLIN, and Mr. KEMP as the managers of the conference on the part of the House.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

At 6:50 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled bills and joint resolutions:

S. 416. An act to amend the Wild and Scenic Rivers Act by designating a segment of the Illinois River in Oregon and the Owyhee River in Oregon as components of the National Wild and Scenic Rivers System, and for other purposes.

S. 1146. An act to amend the Federal Aviation Act of 1958 to provide for the revocation of the airman certificate and for additional penalties for the transportation by aircraft of controlled substances, and for other purposes.

S. 1711. An act providing for a fifteen-year extension of patent numbered 3,376,198.

S.J. Res. 299. Joint resolution to designate November 1984, as National Diabetes Month.

S.J. Res. 309. Joint resolution authorizing and requesting the President to designate January 1985 as "National Cerebral Palsy Month".

H.J. Res. 659. Joint resolution making further continuing appropriations for fiscal year 1985.

MEASURES REFERRED

The following bill was read the first and second times by unanimous consent, and referred as indicated:

H.R. 1881. An act to grant a Federal charter to the National Society, Daughters of the American Colonists; to the Committee on the Judiciary.

MEASURES PLACED ON THE CALENDAR

The following bill was read the second time, and placed on the calendar:

S. 3017. A bill to improve and extend certain domestic food assistance programs, and for other purposes.

The Committee on Veterans' Affairs was discharged from the further consideration of the following bill, which was place on the calendar:

H.R. 5252. An act to redesignate the Regional Veterans' Administration Medical Center Located Popular Bluff, MO, as the "General Black Jack Pershing Regional Veterans' Administration Medical Center".

MEASURES HELD AT THE DESK

Pursuant to the order of the Senate of October 4, the following bill was held at the desk:

H.R. 5492. An act to provide for the conservation and management of Atlantic striped bass, and for other purposes.

ENROLLED BILLS AND JOINT RESOLUTION PRESENTED

The Secretary reported that on today, October 5, 1984, he has presented to the President of the United States the following enrolled bills and joint resolutions:

S. 1967. An act to compensate the Gros Ventre and Assiniboine Tribes of the Fort Belknap Indian Community for irrigation construction expenditures;

S. 2819. an act to make technical and conforming amendments in certain laws relating to housing and community development;

S.J. Res. 201. Joint resolution to provide for the designation of the week of November 25 through December 1, 1984, as "National Epidermolysis Bullosa Awareness Week";

S.J. Res. 237. Joint resolution to designate the week of November 25, 1984, through December 1, 1984, as "National Home Care Week";

S.J. Res. 260. Joint resolution designating the week beginning on November 11, 1984, as "National Blood Pressure Awareness Week";

S.J. Res. 322. Joint resolution designating the week beginning on October 7, 1984, as "Mental Illness Awareness Week";

S.J. Res. 324 Joint resolution designating the month of November 1984, as "National Christmas Seal Month"; and

S.J. Res. 332 Joint resolution to proclaim October 16, 1984, as World Food Day".

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. GOLDWATER, from the Select Committee on Intelligence:

Special Report entitled "Recent Political Violence in El Salvador (Rept. No. 98-659); and

Special Report entitled "The Foreign Intelligence Surveillance Act of 1978. The First Five Years" (Rept. No. 98-660).

By Mr. PERCY, from the Committee on Foreign Relations, with an amendment:

H.J. Res. 136. Joint resolution calling for a wildlife preserve for humpback whales in the West Indies (Rept. No. 98-661).

By Mr. THURMOND, from the Committee on the Judiciary, with an amendment in the nature of a substitute:

S. 2171. A bill to amend title 35 of the United States Code for the purpose of creating a uniform policy and procedure concerning patent rights in inventions developed with Federal assistance, and for other purposes (Rept. No. 98-662).

S. 1535. A bill to amend title 35 of the United States Code to increase the effectiveness of the patent laws, and for other purposes (Rept. No. 98-663).

By Mr. ROTH, from the Committee on Governmental Affairs:

Special Report of the Permanent Subcommittee on Investigations entitled "Transfer of Technology" (Rept. No. 98-664).

● Mr. ROTH. Mr. President, on behalf of the Senate Committee on Governmental Affairs, I submit a report of its Permanent Subcommittee on Investigations entitled, "Transfer of Technology."

The Investigations Subcommittee, under the very able leadership of the ranking minority member, Senator SAM NUNN, examined and evaluated the efficiency and effectiveness of the Departments of Commerce, Defense, and State, the Customs Service and other agencies in their programs and joint efforts to prevent the export of certain nonclassified but militarily useful technology to the Soviet Union, the Warsaw Pact nations and other countries.

In its findings, conclusions and recommendations for corrective action, the subcommittee report urges the executive branch to improve its intelligence gathering capability to determine more accurately those controlled technologies and products the Soviet Union and other nations want and need most. Obviously, this is an area which has received a lot of attention this year. The subcommittee's report is designed to summarize what several days of hearings indicated.●

● Mr. NUNN. Mr. President, I am pleased to join with Senator ROTH in remarks as he files the report of the Permanent Subcommittee on Investigations on the efficiency and effectiveness of the executive branch in controlling the export of militarily useful technology to the Soviet Union, the Warsaw Pact nations and certain other countries.

The 4 days of public hearings last April were based on preliminary investigation conducted by the subcommittee minority staff under my direction. As ranking minority member, I wish to express my thanks to Chairman ROTH, Vice Chairman RUDMAN, and the majority staff for their cooperation and participation in the inquiry and the hearings. The findings, conclusions, and recommendations for corrective action in this report reflect a bipartisan consensus among subcommittee members that there have been important improvements in the export control system in the last 2 years but that serious problems still remain.

The subcommittee's principal finding is that Federal authorities should seek to reduce selectively the number of controlled exports, thereby placing trade restrictions only on those militarily useful technologies and products which the Soviets and their satellites are known to want and need the most.

This finding is similar to the principal conclusion reached in 1982 when the Investigations Subcommittee issued an earlier report on the transfer of technology to the Soviet Union. In the 1982 report, as in the report filed today, the subcommittee asserted that improved intelligence and a more effective enforcement mechanism are essential if undesired technology transfers and diversions are to be avoided.

Through improved intelligence, the Government can learn which technologies and products the Soviets need and want most. In turn, improved enforcement will enable U.S. authorities in the Commerce Department and the Customs Service to move promptly to immobilize illegal technology diversion syndicates.

Unfortunately, the Customs Service and the Commerce Department, which share investigative responsibilities on export controls, still do not cooperate fully and occasionally have been found to be engaged in unhealthy interagency competition. Such competition is not in the national interest and should be ended.

In the report filed today, the subcommittee recommends that while the export licensing function should remain in the Commerce Department, the enforcement responsibility should be transferred to Customs. It has been my position since the subcommittee hearings of 1982 that the Commerce Department is not institutionally suited to carry out law enforcement work. Conversely, the Customs Service has been conducting law enforcement duties since the Nation was founded and it is housed in a Cabinet-level department with long experience in law enforcement operations. Customs is the logical and appropriate agency to investigate reported export violations. This recommendation, which I introduced as legislation, is embodied in the Senate version of the Export Administration Act.

Regarding intelligence, while it is better than it was in 1982 when the subcommittee evaluated it last, it still

does not give policymakers and agents sufficient information on what the Soviets are shopping for. Nor does it always let officials know what technologies are readily available in foreign nations. As a result, American high technology exporters frequently are prevented from selling their products overseas when the very same items are being offered in foreign markets by other nations. This penalizes American exporters, hurts the U.S. economy, aggravates the balance of payments problem—and does not prevent adversaries from acquiring the targeted technologies. The system determining foreign availability should be improved.

Another finding of the subcommittee report is in the form of a cautionary note to the Defense Department, wherein DOD officials are urged not to allow technical judgments to be submerged by political considerations in export control decisions. There is no question but that the Pentagon has a vital role to play in export control matters. I have supported a strong DOD presence in these concerns. However, there should be a clear and separate audit trail for those Pentagon assessments that are strictly technical in nature and those which are formed primarily by nontechnical considerations such as policy questions and historical, ideological, political, and diplomatic factors. Other participating Federal agencies as well as the National Security Council and the President must be able to distinguish between Pentagon policy judgments and Pentagon technical judgments.

Other subcommittee findings are that:

The National Security Council should mediate interagency disputes over export controls by expanding its current role in the process by which Senator Nunn technology transfer regulations are established. This finding stemmed from evidence developed at the hearings indicating that sharp differences between the Commerce and Defense Departments over export policy had rendered the Government unable to decide certain trade questions in a timely and efficient manner.

The Defense Department should utilize fully its own technical assessment capabilities and avoid unnecessary reliance on outside consultants. Learning that the Pentagon, in some cases, had turned to outside consultants for technical assistance in export cases, the subcommittee noted that, while some consulting services may be justified, there remains within DOD and its component armed services ample technical competence for most high technology export questions to be decided in-house.

The views of private industry, which develops most of the militarily useful high technology, should be heard and accorded appropriate consideration in the interagency process which develops export control policies. Industry spokesman complained that frequently their views were not given sufficient attention when policies were set.

The Department of State should oversee export control negotiations between the United States and foreign nations.

Finally, one of the most important points resulting from this year's hearings is that, in its enthusiasm to stop undesired exports, the Government should be ever mindful of the risk inherent in any effort to impose constraints on the freedom and creativity of American scientists, engineers, industry leaders, and managers and exporting businesses.

At the hearings, Dr. Richard DeLauer, Under Secretary of Defense for Research and Engineering, warned that the country should not go overboard in Senator Nunn trying to protect our technologies. Dr. DeLauer feared that if we go too far we risk smothering and suppressing the very technological genius that makes American technical know-how the envy of the rest of the world. I share Dr. DeLauer's concern.

The United States enjoys preeminence or parity in most technical pursuits because as a nation our people have been free to develop new ideas and concepts in an atmosphere relatively unfettered by Government restrictions and constraints. In our efforts to reduce and limit the transfer of militarily useful technology, we must not stifle technology development in our Nation.●

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation.

Mr. PACKWOOD. Mr. President, for the Committee on Commerce, Science, and Transportation, I report favorably nomination lists in the Coast Guard and the National Oceanic and Atmospheric Administration which appeared in their entirety in the CONGRESSIONAL RECORD of October 3, 1984, and, to save the expense of reprinting them on the Executive Calendar, I ask that they lie at the Secretary's desk for the information of Senators.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. THURMOND, from the Committee on the Judiciary:

Jasper R. Clay, Jr., of Maryland, to be a Commissioner of the U.S. Parole Commission for a term of 6 years.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. PERCY (for himself and Mr. PELL):

S. 3069. A bill to authorize international development and security assistance programs and Peace Corps programs for fiscal year 1985, and for other purposes; to the Committee on Foreign Relations.

By Mr. PRESSLER:

S. 3070. A bill to amend the Tariff Schedules of the United States to increase the tariff on live and processed geese; to the Committee on Finance.

By Mr. TSONGAS:

S. 3071. A bill to establish the Agency for Technology Innovation; to the Committee on Governmental Affairs.

By Mr. BOSCHWITZ:

S. 3072. A bill to amend title 10, United States Code, to provide for the forfeiture of proprietary rights to certain technical data by a debarred or suspended contractor of the Department of Defense, and for other purposes; to the Committee on Armed Services.

By Mr. DURENBERGER:

S. 3073. A bill to amend title XVIII of the Social Security Act to provide for grants for graduate medical education and other clinical training activities, and to replace the current medicare reimbursement for the direct costs of such activities; to the Committee on Finance.

By Mr. MATHIAS:

S. 3074. A bill to protect copyrighted computer programs from illegal copying; to the Committee on the Judiciary.

By Mr. DURENBERGER (for himself and Mr. STAFFORD):

S. 3075. A bill to amend the Toxic Substances Control Act; to the Committee on Environment and Public Works.

By Mr. DURENBERGER:

S. 3076. A bill to amend section 408 of the Federal Food, Drug, and Cosmetic Act to authorize emergency action with respect to pesticide chemicals which present an imminent hazard to the public health, to revise the procedures under such section for changes in tolerances and exemptions for pesticide chemicals, and for other purposes.

By Mr. TOWER:

S. 3077. A bill to exempt any activity involving the harvesting of penaeid shrimp from certain provisions of the Lacey Act; to the Committee on the Judiciary.

By Mr. BOSCHWITZ:

S. 3078. A bill to provide for separation of the Mille Lacs Band of Chippewa Indians from the Minnesota Chippewa Tribe; to the Select Committee on Indian Affairs.

By Mr. DOLE (for himself, Mr. WARNER, Mr. WILSON, and Mr. TRIBLE):

S. 3079. A bill to clarify the meaning of the phrase "program or activity" as applied to educational institutions that are extended Federal financial assistance, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. DANFORTH (for himself and Mr. ROTH) (by request):

S. 3080. A bill to discontinue or amend certain requirements for agency reports to Congress; to the Committee on Governmental Affairs.

By Mr. HATFIELD:

S.J. Res. 359. A joint resolution to designate July 23, 1985, as "Ulysses S. Grant Day"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PRESSLER:

S. 3070. A bill to amend the Tariff Schedules of the United States to increase the tariff on live and processed geese; to the Committee on Finance.

INCREASE IN TARIFF ON LIVE AND PROCESSED GEESE

● Mr. PRESSLER Mr. President, today I am introducing legislation to increase the duty on goose imports by 10 cents per pound. I recent years, the American goose producers and processors have lost nearly one-half of the American market to imported goose products. The majority of these imports are coming from Canada. In 1981, only four carloads (or 160,000 pounds) of geese were imported from Canada. This year, as of June 14, and 1.2 million pounds of geese had been imported by the United States. During this 3-year period, domestic goose producers have lost 43 percent of their market to imports.

The National Goose Council has filed petitions with the International Trade Commission, but to date, no protection has been provided. The goose industry is a very small industry in this country and cannot afford, either financially or in terms of time and personnel, to fight long International Trade Commission battles. If some action is not taken in the near future, we will no longer have a domestic goose industry to preserve. It is estimated that only about 180,000 geese will be processed domestically and many of those will either not be sold or will have to be sold at a loss.

The Canadian goose producers have benefits, including subsidies, from various government programs. This has given them an unfair advantage. The American goose producers are not protectionist, but they now find it virtually impossible to compete with subsidized imports. If some action is not taken soon, the U.S. goose industry might well be lost.

Mr. President, I urge my colleagues to carefully consider the impact of these imports and the need for legislation.●

By Mr. TSONGAS:

S. 3071. An act to establish the Agency for Technological Innovation; to the Committee on Governmental Affairs.

AGENCY FOR TECHNOLOGICAL INNOVATION ACT

● Mr. TSONGAS. Mr. President, as many of my colleagues know for the last several years I have been an active participant in the debate over the U.S. international competitive position. Through speeches, articles, and legislation I have advocated a national policy to encourage technological innovation and increase productivity. I have advocated a governmental role that concentrates on creating an economic environment which encourages individual companies to make the decisions and investments that strengthen our international competitive position. I have articulated this role through a range of legislative initiatives that include: Joint R&D Venture Act, 2714—97th, S. 568—98th, High Technology Morrill Act, S. 631, Export Administration Improvement Act, S. 1299, Economically Strategic Technologies Act, S. 428, New Venture Investment Incentive Act, S. 1496, U.S. Skills Corp., S. 2811, and National High Technology Week, Senate Joint Resolution 316.

I am gratified that the Congress has enacted legislation to modify antitrust laws to encourage joint R&D ventures and to support math and science education including matching Federal grants for industry/education partnership and has come so close to passing legislation to modify export controls to permit easier export of high technology consistent with our national security.

Today I would like to introduce an additional bill to create an Agency for Technological Innvoation. I would like to say at the outset that this is not a Government institution intended to innovate where the private sector fails to innovate. The Agency's objective is to improve the functioning of the innovation process. It is intended to use Government resources to affect the process by which the private sector's inventions and ideas get translated into commercial reality. The Agency also is not a new program but consolidates existing programs from other agencies and provides clearer focus for their activities.

I would also like to say that this bill represents work-in-progress. If I were returning to the Senate next year, we would continue to develop this bill. I am uncomfortable with the organizational structure. The format of the bill is the creation of an independent agency not because it is the best solution but because we have not had time to sort through the existing institutions. While the internal structure is useful for demonstrating aspects of the innovation process it may not be the most efficient way of organizing these functions. There are also many other changes and modifications suggested by individuals who have reviewed the proposal that we have not had the chance to incorporate. My hope in introducing this bill in this form today is that it will become part of the debate and form a basis that others may build upon.

The following paper entitled "A Pragmatic Approach to Technological Innovation" describes the rationale for the bill, and lays out specifications for the Agency.

Mr. President, I ask unanimous consent that the paper and the text of the bill be printed in the RECORD in full.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 3071

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Agency for Technological Innovation Act of 1984".

TITLE I—GENERAL PROVISIONS

FINDINGS

SEC. 101. The Congress finds and declares that—

(1) the ability of many American industries to compete in international markets has declined in the last ten years;

(2) increased technological innovation is a prerequisite for increased economic competitiveness;

(3) technological innovation is only indirectly responsive to macroeconomic factors, such as capital investments and tax credits, as well as regulatory reforms;

(4) the United States has no integrated or coherent policy to promote technological innovation, and has little knowledge concerning the effects of current or potential programs for innovation; and

(5) in order to stimulate technological innovation, the United States must—

(A) enhance the transfer and utilization of scientific and technological information between employees, management, educational institutions, Federal, State, and local governments, business and industrial concerns, and other organizations involved in technological development;

(B) make optimal use of human resources, including efforts to improve labor management relations;

(C) encourage research and development of new and improved manufacturing processes; and

(D) promote the creation and growth of small business concerns and new enterprises.

PURPOSES

SEC. 102. It is the purpose of this Act—

(1) to provide the private sector with an environment which fosters innovation, productivity, and international competitiveness; and

(2) to provide a coherent Federal approach toward the stimulation of technological innovation by establishing an independent agency which—

(A) consolidates existing Federal programs with the purpose of stimulating technological innovation;

(B) conducts research to identify problems relating to technological innovation and formulates effective solutions for such problems;

(C) provides a forum for employees, management, educational institutions, State and local governments, business and industrial concerns, and other organizations involved in technological innovation to express their concerns and influence the policies and programs of the Federal Government;

(D) ensures effective dissemination and transfer of scientific information and technology in order to increase the commercialization of technology, as well as to enhance the use of general scientific and technical information;

(E) demonstrates and develops new technologies for manufacturing processes;

(F) coordinates Federal, State, and local efforts to promote new enterprise development; and

(G) encourages and conducts research and development in human resource aspects of technological innovation, including the retraining and training of workers and improved managerial practices.

DEFINITIONS

SEC. 103. For purposes of this Act—

(1) the term "Agency" means the Agency for Technological Innovation established under section 201;

(2) the term "Board" means the National Innovation Board established under section 204;

(3) the term "Council" means the Interagency Coordinating Council on Innovation established under section 205;

(4) the term "Director" means the Director of the Agency appointed under section 201(b);

(5) the term "Deputy Director" means the Deputy Director of the Agency appointed under section 201(c);

(6) the term "Federal agency" has the same meaning as in section 551(1) of title 5, United States Code;

(7) the term "function" includes any duty, obligation, power, authority, responsibility, right, privilege, activity, or program;

(8) the term "office" includes any office, administration, agency, institute, unit, division, directorate, organizational entity, or any component thereof;

(9) the term "small business concern" has the same meaning as in section 3 of the Small Business Act; and

(10) the term "technological innovation" means the process whereby knowledge derived from basic science is transformed to marketable technology.

ESTABLISHMENT

SEC. 201. (a) There is established the Agency for Technological Innovation. The Agency shall be composed of—

(1) the Office of Innovation Policy established by section 202;

(2) the Office of Program Evaluation and Development established by section 203;

(3) the National Innovation Board established by section 204;

(4) the Interagency Coordinating Council on Innovation established by section 205;

(5) the Directorate for Human and Organizational Resources established by section 206;

(6) the Directorate for Enterprise Development established by section 207;

(7) the Directorate for Production Research and Development established by section 208; and

(8) the Directorate for Information and Technology Transfer established by section 209.

(b) The Agency shall be headed by a Director, who shall be appointed by the President, by and with the advice and consent of the Senate. The Director shall be responsible for the administration of all functions transferred to, and specified for, the Agency by this Act.

(c)(1) There shall be in the Agency a Deputy Director, who shall be appointed by the President, by and with the advice and consent of the Senate. The Deputy Director shall—

(A) administer the Office of Program Evaluation and Development established by section 203;

(B) be Chairman of the Interagency Coordinating Council on Innovation established by section 205; and

(C) perform such additional functions as the Secretary may prescribe.

(2) The Deputy Director shall act for and exercise the functions of the Director during the absence or disability if the office of the Director becomes vacant. the Deputy Director shall act for and exercise the functions of the Director until the absence or disability of the Director no longer exists or until a successor to the Director has been appointed by the President and confirmed by the Senate.

OFFICE OF INNOVATION POLICY

SEC. 202. (a) There shall be in the Office of the Director the Office of Innovation Policy. The Office of Innovation Policy shall be administered by the Assistant Director, who shall be appointed by the President, by and with the advice and consent of the Senate.

(b) The Director, through the Assistant Director, shall—

(1) conduct research, studies, and analyses concerning policy trends, policy alternatives, and current issues relating to technological innovation, including issues relating to antitrust, patents, taxation, procurement, regulation, human resources utilization, research and development, and domestic and international trade;

(2) publish in appropriate publications the findings and results of research, studies, and analyses conducted pursuant to paragraph (1); and

(3) prepare and transmit to the Congress, by January 1 of each year, a report concerning important current issues relating to technological innovation in the United States.

OFFICE OF PROGRAM EVALUATION AND DEVELOPMENT

SEC. 203. (a) There is established in the Agency the Office of Program Evaluation and Development, which shall be administered by the Deputy Director.

(b) The Director, through the Office, shall—

(1) develop, evaluate, and assess programs and studies conducted and supported by the Agency; and

(2) conduct and support basic research on the process of technological innovation, including research on the effect of economic factors, management practices, and employee utilization on technological innovation.

NATIONAL INNOVATION BOARD

SEC. 204. (a) There is established in the Agency the National Innovation Board, which shall provide advice and assistance to the Director concerning the policies and programs of the Agency.

(b) The Board shall be composed of ten members, who shall be appointed by the President from among individuals who represent business and industrial concerns, employees, educational institutions, and State and local governments. In appointing members to the Board, the President shall select members in a manner which assures a balanced representation of the concerns, employees, institutions, and governments described in the preceding sentence.

(c) Each member of the Board shall be appointed for a four-year term, except that the term of office of the members first appointed shall expire, as designated by the President at the time of appointment, two at the end of one year, two at the end of two years, three at the end of three years, and three at the end of four years.

(d) The board shall elect one of its members as Chairman of the board.

(e) Six members of the Board shall constitute a quorum for the transaction of business, but a lesser number may hold hearings. A vacancy in the Board shall not impair its powers.

(f) The Board shall meet at least twice each year, and shall meet at the call of the Chair or the Director.

(g) Members of the Board shall not hold any other Federal office or be a full-time employee of the United States while serving as a member of the Board.

(h) Each member of the Board shall receive compensation at a rate equal to the daily rate prescribed for GS–18 under the General Schedule under section 5332 of title 5, United States Code, for each day, including traveltime, such member is engaged in the actual performance of duties as a member of the Board, and shall be reimbursed for travel, subsistence, and other necessary expenses incurred in the performance of the duties as a member of the Board.

(i) To carry out the provisions of this section, the Board is authorized to—

(1) hold such hearings and sit and act at such times and places, either as a whole or by subcommittee, and request the attendance and testimony of such witnesses and the production of such books, records, correspondence, memorandums, papers, and documents as the Board or such subcommittee may deem advisable; and

(2) request the cooperation and assistance of Federal agencies in carrying out the provisions of this section, and such Federal agencies are authorized to provide such cooperation and assistance.

(j) The Director shall provide the Board with such support, staff, and facilities as may be necessary to enable the Board to carry out this section.

INTERAGENCY COORDINATING COUNCIL ON INNOVATION

SEC. 205. (a) There is established the Interagency Coordinating Council on Innovation. The Council shall be composed of—

(1) the Deputy Director, who shall be Chairman of the Council;

(2) the Secretaries of Commerce, Defense, Education, Energy, and Labor (or the designee of each such Secretary);

(3) the Director of the National Science Foundation (or the designee of the Director);

(4) the Administrators of the National Aeronautics and Space Administration and the Small Business Administration (or the designee of each such Administrator); and

(5) the heads of such other Federal agencies as the Deputy Director considers appropriate (or the designees of such agency heads).

(b) The Council shall meet at least once each month, and at the call of the Deputy Director.

(c) Every three months, the Council shall prepare and transmit to the Director a report concerning its activities. Each report shall contain recommendations for legislation and administrative action to coordinate and consolidate programs carried out by Federal Agencies which affect policies and practices relating to technological innovation.

(d) The Director shall provide the Council with such support, staff, and facilities as may be necessary to enable the Council to carry out this section.

DIRECTORATE FOR HUMAN AND ORGANIZATIONAL RESOURCES

SEC. 206. (a) There is established in the Agency the Directorate for Human and Organizational Resources. The Directorate shall be composed of—

(1) the Division of Technical Education established by subsection (c);

(2) The Division of Manpower Training established by subsection (d); and

(3) the Division of Managerial Innovation established by subsection (e).

(b) The Director, through the Directorate for Human and Organizational Resources, shall—

(1) promote improvements in the productivity of the American work force and in managerial methods that enhance technological innovation;

(2) study and evaluate programs conducted by Federal agencies, State and local governments, business and industrial concerns, and educational institutions concerning—

(A) employee training and retraining practices; and

(B) employer organizational arrangements which affect technological innovation; and

(3) make grants or enter into contracts to carry out projects to demonstrate methods to improve—

(A) employee training and retraining practices; and

(B) employer organizational arrangements which affect technological innovation.

(c) There is established in the Directorate for Human and organizational Resources the Division of Technical Education. The Director, through the Division of Technical Education, shall—

(1) study and evaluate programs providing technical training to entry level employees and the impact of such programs on promoting the adjustment of such employees to technological innovation, including programs conducted by secondary schools, vocational and technical schools, junior colleges, colleges and universities, and employers; and

(2) make grants to secondary schools, junior colleges, colleges and universities, and employers for projects to demonstrate technical training programs for entry level employees that will improve the adjustment of such employees to technological innovation.

(d) There is established in the Directorate for Human and Organizational Resources the Division of Manpower Retraining. The Director, through the Division of Manpower Retraining, shall—

(1) study and evaluate the effectiveness of all types of programs to retrain employees who are displaced by technological innovation and foreign competition;

(2) assess and identify needs for new programs to retrain such employees, including an assessment of types of occupational retraining needed, appropriate institutions which may conduct such retraining, and alternative approaches for retraining programs; and

(3) make grants to appropriate public and private nonprofit institutions for the conduct of projects to demonstrate alternative approaches to improve the quality and availability of educational programs for the retraining of employees who are displaced by technological innovation and foreign competition, including a program under which—

(A) such employees are provided with vouchers to be used by such employees to pay providers of educational retraining for education and training received by such employees; and

(B) such providers present such vouchers for redemption for cash payments for the provision of such education and training.

(e) There is established in the Directorate for Human and Organizational Resources the Division of Managerial Innovation. The Director, through the Division of Managerial Innovation, such study and evaluate management practices and innovations which enhance technological innovation, productivity, labor-management relations, and the quality of the work place.

DIRECTORATE FOR ENTERPRISE DEVELOPMENT

SEC. 207. (a) There is established in the Agency the Directorate for Enterprise Development. The Directorate for Enterprise Development shall be composed of—

(1) the Division of Cooperative Research and Development established by subsection (c);

(2) the Division of State and Local Initiatives established by subsection (d);

(3) the Division of Small Business Innovation established by subsection (e); and

(4) the Division of Capital Resources for Innovation established by subsection (f).

(b) The Director through the Directorate for Enterprises Development, shall—

(1) study the development and formation of new enterprises;

(2) make grants to appropriate public and private nonprofit institutions for projects to demonstrate models for the development and formation of cooperative enterprises; and

(3) promote successful models for the development and formation of new enterprises, including the dissemination of information concerning such models and the provision of grants for the planning, development, and initial operation of new enterprises which use such models.

(c) There is established in the Directorate for Enterprise Development the Division of Cooperative Research and Development. The Director, through the Division of Cooperative Research and Development, shall—

(1) evaluate and disseminate information on existing and potential models of cooperative research and development arrangements, including models of arrangements among business and industrial concerns and models of arrangements between business and industrial concerns and educational institutions;

(2) assess potential and existing governmental barriers to such cooperative research and development arrangements, such as the provisions of antitrust laws and tax policies, and suggest methods to eliminate such barriers; and

(3) make grants to appropriate institutions and organizations to support demonstrations of cooperative research and development arrangements, including grants to support—

(A) research programs at university centers concerning specific technologies relevant to business and industrial concerns;

(B) cooperative research projects between business and industrial concerns and educational institutions which focus on fundamental research of potential industrial relevance; and

(C) cooperative arrangements among business and industrial concerns which include financial participation by such concerns, such as limited partnerships for research and development.

(d) There is established in the Directorate for Enterprise Development the Division of State and Local Initiatives. The Director, through the Division of State and Local Initiatives, shall—

(1) evaluate the role of State and local governments in the promotion of technological innovation and new enterprise development, including an assessment of existing State and local programs to promote such development and innovation;

(2) make grants to appropriate institutions and organizations for projects to demonstrate potential models of cooperative research and development arrangements between State and local governments and business and industrial concerns which include significant financial participation by such governments and concerns; and

(3) facilitate information dissemination and the development of networks among programs supported by State and local governments to promote technological innovation.

(e) There is established in the Directorate for Enterprise Development the Division of Small Business Innovation. The Director, through the Division of Small business Innovation, shall—

(1) coordinate and monitor small business innovation research programs conducted under the Small Business Act, and, in consultation with the Office of Program Evaluation and Development, evaluate activities by Federal agencies to carry out such programs;

(2) study and evaluate methods (other than such small business innovation research programs) by which Federal programs for the procurement of research and development services can more effectively promote innovation by small business concerns; and

(3) provide, in cooperation with the Division of State and Local Initiatives, technical assistance to state governments and regional organizations to enable such governments and organizations to establish state and regional programs similar to the small business innovation research programs established under the Small Business Act.

(f) There is established in the Directorate for Enterprise Development the Division of Capital Resources for Innovation. The Director, through the Division of Capital Resources for Innovation, shall—

(1) study and evaluate capital markets for the establishment of new enterprises and for the commercialization and development of products of small business concerns and individual inventors; and

(2) assess the cost and availability of capital for such enterprises and products.

DIRECTORATE FOR PRODUCTION RESEARCH AND DEVELOPMENT

SEC. 208. (a) There is established in the Agency the Directorate for Production Research and Development. The Directorate for Production Research and Development shall be composed of—

(1) the Division of Manufacturing Technology established by subsection (c);

(2) the Division of Process Technology established by subsection (d); and

(3) the Division of Sociotechnical Design established by subsection (e).

(b) The Director, through the Directorate for Production Research and Development, shall—

(1) study and evaluate the state of the American manufacturing technologies and process technologies;

(2) provide guidance and financial assistance to universities, colleges, and vocational and technical schools for curriculum development and equipment acquisition in order to improve manufacturing technologies and process technologies;

(3) support cooperative arrangements among universities, colleges, business concerns, the Federal Government, and State and local governments for the conduct of research concerning manufacturing technologies and process technologies, especially

technologies applicable to a wide range of industries; and

(4) make grants to appropriate public and private nonprofit institutions to support field experiments with a high potential for commercial success in the development of process technologies and the successful implementation of such technologies.

(c) There is established in the Directorate for Production Research and Development the Division of Manufacturing Technology. The Director, through the Division of Manufacturing Technology, shall—

(1) support and stimulate redevelopment of the scientific and technical infrastructure in manufacturing research and development, inlcuding the dissemination of the latest developments in applied research and technology to all participants in the manufacturing process;

(2) study the factors involved in the successful implementation of new manufacturing technologies, including factors such as managerial practices, and develop strategies to improve the utilization of such technologies; and

(3) provide measurement services, test procedures, and reliable technical data with respect to automated manufacturing processes.

(d) There is established in the Directorate for Production Research and Development the Division of Process Technology. The Director, through the Division of Process Technology, shall support research concerning the development of improved manufacturing processes in new and developing product areas such as biotechnology and microelectronics.

(e) There is established in the Directorate for Production Research and Development the Division of Sociotechnical Design. The Director, through the Division of Sociotechnical Design and in cooperation with the Division of Managerial Innovation, shall conduct research on organizational arrangements, designs, and methods which will—

(1) prevent the dislocation of employees which may result from technological innovation; and

(2) enable employees affected by technological innovation to be integrated in business and industrial concerns which have benefited from technological innovation.

DIRECTORATE FOR INFORMATION AND TECHNOLOGY TRANSFER

SEC. 209. (a) There is established in the Agency the Directorate for Information and Technology Transfer. The Directorate for Information and Technology Transfer shall be composed of—

(1) the Division of Mission-Oriented Transfer established by subsection (c); and

(2) the Division of Information Systems established by subsection (d).

(b) The Director, through the Directorate for Information and Technology Transfer, shall conduct a program to disseminate information concerning, and to promote the successful use of, new products and technology. Such program shall—

(1) evaluate the factors which contribute to the failure of processes for the transfer of information concerning new products and technologies to employees, educational institutions, business and industrial concerns, and State and local governments; and

(2) develop new mechanisms for the transfer of such information and methods to improve existing mechanisms to transfer information.

(c) There is established in the Directorate of Information and Technology Transfer the Division of Mission-Oriented Transfer. The Director, through the Division of Mission-Oriented Transfer, shall—

(1) identify products and processes developed by Federal agencies such as the Department of Defense, the National Aeronautics and Space Administration, and the Department of Energy, which have potential for commercial applications;

(2) operate a center to make inventions and technical information which are developed from federally funded research available to business and industrial concerns; and

(3) evaluate, promote, and license to business and industrial concerns Government patents which have potential commercial applications, especially patents for exemplary inventions relating to the development, production, and conservation of energy.

(d)(1) There is established in the Directorate for Information and Technology Transfer the Division of Information Systems. The Director, through the Division of Information Systems, shall—

(A) operate a national technical information service to make Federal technological, scientific, economic, and engineering information readily accessible to business and industrial concerns, State and local governments, educational institutions, and other interested individuals and organizations;

(B) act as a repository of all scientific and technical information collected by Federal agencies, including information on processes of technological innovation and foreign manufacturing technologies;

(C) operate a clearinghouse for data relating to technological innovation by using a computerized network to coordinate available informational resources in the private sector;

(D) promote the identification and dissemination of important findings and successful technologies which relate to technologies which relate to technological innovation; and

(E) establish a national technology extension center program in accordance with paragraph (2).

(2) The Director, through the Division of Information Systems, shall establish twelve centers in cooperation with State and local governments, business and industrial concerns, and educational institutions. Each such center shall—

(A) enhance the transfer to, and utilization by, business and industrial concerns of technological knowledge and information development by educational institutions;

(B) with respect to one or more types of technologies, establish and intellectual center and a comprehensive clearinghouse for research and development;

(C) facilitate the demonstration of new technologies and enable adaptation of such technologies by industries according to the particular needs of such industries;

(D) provide technical assistance to business and industrial concerns which have adopted and implemented the technologies referred to in subparagraph (C);

(E) provide practical training for university personnel and new employee retraining for structurally unemployed individuals; and

(F) conduct research and collect empirical data concerning the effects of current programs or the likely effects of new programs which are designed to stimulate technological innovation.

TITLE III—TRANSFERS

TRANSFERS FROM THE NATIONAL SCIENCE FOUNDATION

SEC. 301. (a) There are transferred to the Director all functions of the National Science Foundation with respect to or administered through—

(1) the Division of Policy Research and Analysis of the Foundation; and

(2) the Division of Industrial Science and Technological Innovation of the Foundation.

(b) There are transferred to the Director all functions of the National Science Foundation relating to—

(1) the enhancement of scientific and technological resources of State and local governments, including functions relating to the conduct of demonstration projects to enhance such resources, the evaluation of State and local projects to improve technological innovation, and the promotion of networks between State and local governments conducting such projects; and

(2) the study and evaluation of programs providing technical training to entry level employees and the impact of such programs on promoting the adjustment of such employees to technological innovation, including the study and evaluation of programs conducted by secondary schools, vocational and technical schools, junior colleges, colleges and universities, and employers.

TRANSFERS FROM THE DEPARTMENT OF COMMERCE

SEC. 302. (a) There are transferred to the Director all functions of the Secretary of Commerce with respect to or administered through—

(1) the Assistant Secretary of Commerce for Productivity, Technology, and Innovation;

(2) the Director of the National Technical Information Services; and

(3) the Director of the Center for the Utilization of Federal Technology.

(b) There are transferred to the Director all functions of the Secretary of Commerce relating to the identification, promotion, and licensing to business and industrial concerns of inventions developed by Federal agencies.

TRANSFER FROM THE DEPARTMENT OF ENERGY

SEC. 303. There are transferred to the Director all functions of the Secretary of Energy relating to the identification and promotion of exemplary inventions relating to the development, production, and conservation of energy.

TRANSFER FROM THE SMALL BUSINESS ADMINISTRATION

SEC. 304. There are transferred to the Director all functions of the Administrator of the Small Business Administration relating to the Small Business Act.

TITLE IV—ADMINISTRATIVE PROVISIONS

PERSONNEL PROVISIONS

SEC. 401. (a) The Director may appoint and fix the compensation of such officers and employees, including investigators, attorneys, and administrative law judges, as may be necessary to carry out the functions of the Director and the Agency. Except as otherwise provided by law, such officers and employees shall be appointed in accordance with the civil service laws and compensated in accordance with title 5, United States Code.

(b)(1) At the request of the Director, the Director of the Office of Personnel Management shall, under section 5108 of title 5, United States Code, provide for the establishment in each of the grade levels GS-16, GS-17, and GS-18, and in the Senior Executive Service, of a number of positions in the

Agency equal to the number of positions in that grade level which were used primarily for the performance of functions transferred by this Act and which were assigned and filled on the day before the effective date of this Act.

(2) Appointments to positions provided for under this subsection may be made without regard to the provisions of section 3324 title 5, United States Code, if the individual appointed in such position is an individual who is transferred in connection with the transfer of functions under this act and, on the day before the effective date of this Act, holds a position and has duties comparable to those of the position to which appointed under this subsection.

(3) The authority under this subsection with respect to any position established at the grade level GS-16, GS-17, or GS-18 shall terminate when the person first appointed to fill such position ceases to hold such position.

(4) For purposes of section 414(a)(3)(A) of the Civil Service Reform Act of 1978, an individual appointed under this subsection shall be deemed to occupy the same position as the individual occupied on the day before the effective date of this Act.

(c) The Director may obtain the services of experts and consultants in accordance with section 3109 of title 5, United States Code, and compensate such experts and consultants for each day (including traveltime) at rates not in excess of the rate of pay for grade GS-18 of the General Schedule under section 5332 of such title. The Director may pay experts and consultants who are serving away from their homes or regular place of business travel expenses and per diem in lieu of subsistence at rates authorized by sections 5702 and 5703 of such title for persons in Government service employed intermittently.

(d)(1)(A) The Director is authorized to accept voluntary and uncompensated services without regard to the provisions of section 1342 of title 31, United States Code, if such services will not be used to displace Federal employees employed on a full-time, part-time, or seasonal basis.

(B) The Director is authorized to accept volunteer service in accordance with the provisions of section 3111 of title 5, United States Code.

(2) The Director is authorized to provide for incidental expenses, including but not limited to transportation, lodging, and subsistence for individuals who provide voluntary services under subparagraph (A) or (B) of paragraph (1).

(3) An individual who provides voluntary services under paragraph (1)(A) shall not be considered a Federal employee for any purpose other than for purposes of chapter 81 of title 5, United States Code, relating to compensation for work injuries, and chapter 171 of title 28, United States Code, relating to tort claims.

GENERAL AUTHORITY

SEC. 402. In carrying out any functions transferred by this Act, the Director, or any officer or employee of the Agency, may exercise any authority available by law with respect to the function to the official or agency from which the function is transferred. Any action of the Director in exercising such authority shall have the same force and effect as when exercised by the official or agency from which the function was transferred.

DELEGATION AND ASSIGNMENT

SEC. 403. Except where otherwise expressly prohibited by law or otherwise provided by this Act, the Director may delegate any function specified for or transferred to the Director by this Act and any function transferred or granted to the Director after the effective date of this Act to such officers and employees of the Agency as the Director may designate, and may authorize successive redelegations of such functions as may be necessary or appropriate. No delegation of functions by the Director under this section or under any other provision of this Act shall relieve the Director of responsibility for the administration of such functions.

SUCCESSION

SEC. 404. (a) Subject to the authority of the President, and except as provided in section 201(c)(2), the Director shall prescribe the order by which officers of the Agency shall act for, and perform the functions of, the Director or any other officer of the Agency during the absence or disability of the Director or such other officer, or in the event of a vacancy in the office of the Director or such other officer.

(b) Notwithstanding any other provision of law, and unless the President directs otherwise, an individual acting for the Director or another officer of the Agency pursuant to subsection (a) shall continue to serve in that capacity until the absence or disability of the Director or such other officer no longer exists or a successor to the Director or such other officer has been appointed by the President and confirmed by the Senate.

REORGANIZATION

SEC. 405. (a) Subject to subsection (b), the Director is authorized to allocate or reallocate functions among the officers of the Agency, and to establish, consolidate, alter, or discontinue such offices in the Agency as may be necessary or appropriate.

(b) The authority of the Director under subsection (a) does not extend to any function which this Act specifies shall be performed through a particular office or officer of the Agency, or to any office established by this Act.

RULES

SEC. 406. The Director is authorized to prescribe, in accordance with the provisions of chapters 5 and 6 of title 5, United States Code, such rules and regulations as the Director determines necessary or appropriate to administer and manage the functions of the Director or the Agency.

CONTRACTS, GRANTS, AND COOPERATIVE AGREEMENTS

SEC. 407. (a) Subject to the provisions of the Federal Property and Administrative Services Act of 1949, the Director may make, enter into, and perform such contracts, leases, cooperative agreements, grants, or other similar transactions with public agencies, private organizations, and persons, and make payments (in lump sum or installments, and by way of advance or reimbursement, and, in the case of any grant, with necessary adjustments on account of overpayments and underpayments) as the Director considers necessary or appropriate to carry out the functions of the Director or the agency.

(b) Notwithstanding any other provision of this Act, the authority to enter into contracts or to make payments under this Act shall be effective only to such extent or in such amounts as are provided in advance in appropriation Acts. This subsection does not apply with respect to the authority granted under section 410.

PUBLICATIONS

SEC. 408. Subject to such procedures as the Director of the Office of Management and Budget may prescribe, the Director may disseminate in the form of reports of publications such information as the Director considers appropriate.

USE OF FACILITIES

SEC. 409. (a) With their consent, the Director, with or without reimbursement, may use the research, services, equipment, and facilities of—

(1) an individual;

(2) any public or private nonprofit agency or organization, including any agency or instrumentality of the United States or of any State, the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States;

(3) any political subdivision of any State, the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States; or

(4) any foreign government.

in carrying out any function of the Director or the Agency.

(b) The Director, under terms, at rates, and for periods that the Director considers to be in the public interest, may permit the use by public and private agencies, corporations, associations of other organizations, or by individuals, of any real property, or any facility, structure or other improvement there on, under the custody of the Director. The Director may require permittees under this section to maintain or recondition, at their own expense, the real property, facilities, structures, and improvements used by such permittees.

GIFTS AND BEQUESTS

SEC. 410. (a) The Director is authorized to accept, hold, administer, and utilize gifts and bequests of property, both real and personal, for the purpose of aiding or facilitating the work of the Agency. Gifts and bequests of money and the proceeds from sales of other property received as gifts or bequests shall be deposited in the United States Treasury in a separate fund and shall be disbursed on order of the Director. Property accepted pursuant to this paragraph, and the proceeds thereof, shall be used as nearly as possible in accordance with the terms of the gift or bequest.

(b) For the purpose of Federal income, estate, and gift taxes, and State taxes, property accepted under subsection (a) shall be considered a gift or bequest to or for use of the United States.

(c) Upon the request of the Director, the Secretary of the Treasury may invest and reinvest in securities of the United States or in securities guaranteed as to principal and interest by the United States any moneys contained in the fund provided for in subsection (a). Income accruing from such securities, and from any other property held by the Director pursuant to subsection (a), shall be deposited to the credit of the fund, and shall be disbursed upon order of the Director.

SEAL OF AGENCY

SEC. 411. The Director shall cause a seal to be made for the Agency of such design as the Director shall approve. Judicial notice shall be taken of such seal.

ANNUAL REPORT

SEC. 412. The Director shall, as soon as practicable
after the end of each fiscal year, prepare and transmit a written report to the Presi-

dent for transmission to the Congress on the activities of the Agency during such fiscal year.

TITLE V—TRANSITIONAL, SAVINGS, AND CONFORMING PROVISIONS

TRANSFER AND ALLOCATIONS OF APPROPRIATIONS AND PERSONNEL

SEC. 501. Except as otherwise provided in this Act, the personnel employed in connection with, and the assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds employed, used, held, arising from, available to, or to be made available in connection with the functions transferred by this Act, subject to section 1531 of title 31, United States Code, shall be transferred to the Director. Unexpended funds transferred pursuant to this section shall be used only for the purposes for which the funds were originally authorized and appropriated.

INCIDENTAL TRANSFERS

SEC. 502. (a) The Director of the Office of Management and Budget, at such time or times as the Director shall provide, is authorized to make such determinations as may be necessary with regard to the functions transferred by this Act, and to make such additional incidental dispositions of personnel, asets, liabilities, grants, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds held, used, arising from, available to, or to be made available in connection with such functions, as may be necessary to carry out the provisions of this Act. The Director of the Office of Management and Budget shall provide for the termination of the affairs of all entities terminated by this Act and for such further measures and dispositions as may be necessary to effectuate the purposes of this Act.

(b) After consultation with the Director of the Office of Personnel Management, the Director of the Office of Management and Budget is authorized, at such times as the Director of the Office of Management and Budget may provide, to make such determinations as may be necessary with regard to the transfer of positions within the Senior Executive Service and connection with the functions transferred by this Act.

EFFECT ON PERSONNEL

SEC. 503. (a) Except as otherwise provided by this Act, the transfer pursuant to this Act of full-time personnel (except special Government employees) and part-time personnel holding permanent positions shall not cause any such employee to be separated or reduced in grade or compensation for one year after the date of transfer of such employee under this Act.

(b) Any person who, on the day preceding the effective date of this Act, held a position compensated in accordance with the Executive Schedule prescribed in chapter 53 of title 5, United States Code, and who, without a break in service, is appointed in the Agency to a position having duties comparable to the duties performed immediately preceding such appointment shall continue to be compensated in such new position at not less than the rate provided for such previous positions, for the duration of the service of such person in such new position.

AGENCY TERMINATIONS

SEC. 504. Except as otherwise provided by this Act, whenever all the functions of any office of a Federal agency have been transferred by this Act from that agency, such agency shall terminate. If an office terminates pursuant to the provisions of the preceding sentence, each position and component therein which was expressly authorized by law, or the incumbent of which was authorized to receive compensation at the rates prescribed for a position at level II, III, IV, or V of the Executive Schedule contained in sections 5313 through 5316 of title 5, United States Code, shall terminate.

SAVINGS PROVISIONS

SEC. 505. (a) All orders, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges that—

(1) have been issued, made, granted, or allowed to become effective by the President, any Federal agency or official thereof, or by a court of competent jurisdiction, in the performance of functions which are transferred by this Act; and

(2) are in effect when this Act takes effect,

shall continue in effect according to their terms until modified, terminated, superseded, set aside, or revoked in accordance with law by the President, the Director, a court of competent jurisdiction, or by operation of law.

(b)(1) The provisions of this Act shall not affect any proceedings, including notices of proposed rule making, or any application for any license, permit, certificate, or financial assistance pending on the effective date of this Act before a Federal agency or any office thereof with respect to functions transferred by this Act; but such proceedings or applications, to the extent that they relate to functions transferred, shall be continued. Orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made under such orders, as if this Act had not been enacted; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or revoked by the Director, by a court of competent jurisdiction, or by operation of law. Nothing in this subsection prohibits the discontinuance or modification of any such proceeding under the same terms and conditions and to the same extent that such proceeding could have been discontinued or modified if this Act had not been enacted.

(2) The Director and the head of each Federal agency from which functions are transferred by this Act are authorized to issue regulations providing for the orderly transfer of proceedings continued under paragraph (1).

(c) Except as provided in subsection (e)—

(1) the provisions of this Act do not affect actions commenced prior to the effective date of this Act, and

(2) in all such actions, proceedings shall be had, appeals taken, and judgments rendered in the same manner and effect as if this Act had not been enacted.

(d) No action or other proceeding commenced by or against any officer in his official capacity as an officer or any Federal agency with respect to functions transferred by this Act shall abate by reason of the enactment of this Act. No cause of action by or against any Federal agency with respect to functions transferred by this Act, or by or against any officer thereof in his official capacity, shall abate by reason of the enactment of this Act. Causes of action and actions with respect to a function transferred by this Act, or other proceedings may be asserted by or against the United States or the Director, as may be appropriate, and, in an action pending when this Act takes effect, the court may at any time, on its own motion or that of any party, enter an order which will give effect to the provisions of this subsection.

(e) If, before the date on which this Act takes effect, any Federal agency or any officer thereof in his official capacity, is a party to an action, and under this Act any function of such Federal agency is transferred to the Director, then such action shall be continued with the Director substituted or added as a party.

(f) Orders and actions of the Director in the excercise of functions transferred by this Act shall be subject to judicial review to the same extent and in the same manner as if such orders and actions had been by the head of the Federal agency exercising such functions immediately preceding their transfer. Any statutory requirements relating to notice, hearings, action upon the record, or administrative review that apply to any function transferred by this Act shall apply to the exercise of such function by the Director.

AMENDMENTS

SEC. 506. (a) Section 5313 of title 5, United States Code, is amended by adding at the end thereof the following new item: "Director, Agency for Technological Innovation.".

(b) Section 5314 of such title is amended—

(1) by striking out the item relating to the Assistant Secretaries of Commerce and inserting in lieu thereof the following: "Assistant Secretaries of Commerce (7).''; and

(2) by adding at the end thereof the following new item: "Deputy Director. Agency for Technological Innovation.".

(c) Section 5316 of such title is amended by adding at the end thereof the following new item: "Assistant Director, Agency for Technological Innovation.".

SEPARABILITY

SEC. 507. If a provision of this Act or its application to any person or circumstance is held invalid, neither the remainder of this Act nor the application of the provision to other persons or circumstances shall be affected.

REFERENCE

SEC. 508. With respect to any functions transferred by this Act and exercised after the effective date of this Act, reference in any other Federal law to the Federal agency from which such functions were transferred or the head of such Federal agency, shall be considered to refer to the Director.

TRANSITION

SEC. 509. With the consent of the head of each Federal agency from which functions are transferred by this Act, the Director is authorized to utilize—

(1) the services of officers, employees, and other personnel of each such Federal agency with respect to functions or offices transferred to the Agency by this Act; and

(2) funds appropriated to such functions for such period of time as may reasonably be needed to facilitate the orderly implementation of this Act.

TITLE VI—MISCELLANEOUS

EFFECTIVE DATE

SEC. 601. (a) This Act shall take effect one hundred and twenty days after the date of enactment, except that—

(1) section 509 shall take effect on the date of enactment; and

(2) at any time after the date of enactment of this Act—

(A) the officers provided for in title II may be nominated and appointed, as provided in such title; and

(B) the Director and the head of each Federal agency from which functions are transferred by this Act may promulgate regulations under section 505(b)(2).

(b) Funds available to a Federal agency, with respect to functions transferred by this Act, may be used, with approval of the Director of the Office of Management and Budget, to pay the compensation and expenses of an officer appointed under subsection (a)(2)(A) who will carry out such functions until funds for that purpose are otherwise available.

INTERIM APPOINTMENTS

SEC. 602. (a) If one or more officers required by this Act to be appointed by and with the advice and consent of the Senate have not entered upon office on the effective date of this Act and notwithstanding any other provision of law, the President may designate any officer who was appointed by and with the advice and consent of the Senate, and who was such an officer on the day before the effective date of this Act, to act in the office until it is filled as provided by this Act.

(b) Any officer acting in an office pursuant to subsection (a) shall receive compensation at the rate prescribed by this Act for such office.

AUTHORIZATION OF APPROPRIATIONS

SEC. 603. To carry out this Act, there are authorized to be appropriated $100,000,000 for fiscal year 1985 and each of the four succeeding fiscal years.

A PRAGMATIC GOVERNMENT APPROACH TO TECHNOLOGICAL INNOVATION

INNOVATION: PROBLEMS AND ISSUES

It is impossible to ignore the precarious competitive position of many American industries that has evolved over the past decade. Traditional sources of American manufacturing strength—automobiles, steel, machine tools—have yielded significant amounts of market share to Western European and Japanese companies. More recently, America's newer, high technology industries have also begun losing ground to foreign competitors. In the face of this situation, American industry has increasingly looked to innovation as a remedy.

Innovation is a process that involves the transformation of knowledge from basic science to marketable technology. Many institutions are integrally involved including universities, research and development oriented private companies, entrepreneurs, the venture capital system, organized labor, and government at every level. Innovation occurs in no single place, but in many places, from the laboratory to the shop floor. Most importantly, it is a process that takes years to unfold; steps that are taken now will not have a measureable effect on technological innovation until the next decade. Moreover, it should be obvious that no single group or institution is either responsible for the decline in America's capacity to capture key market shares, or is able to solve the problem alone.

There is an increasing concensus that the prerequisite of economic competitivenses is the ability to develop fundamentally new products and industrial processes, produce them inexpensively and with high quality, and successfully market them. Nonetheless, it is not yet clear what role, if any, the federal government should play in the industrial innovation process. In the past, government activity has focused primarily on traditional areas of macroeconomic policy (e.g., changes in taxation and regulatory practice). The main premises of this approach have been that American industry needs two remedies for successful renewal. (1) more capital, and (2) more freedom to spend that capital. Congruent with this view, a number of changes in the U.S. tax code have been legislated, and changes in regulatory practices have been implemented. The problem is that technological innovation is only indirectly responsive to economic and policy levels. Capital investment and regulatory reform do not automatically yield technological innovation.

In a free and complex society the process of technological innovation can never be fully managed nor completely understood. However, interventions can constructively be made in certain "high leverage" ways, in order to make maximum use of the nation's scientific and technological capabilities. The focus should be on strengthening certain institutions and functions that are crucial to American technological innovation.

A successful effort to influence American industrial innovation will need to address the following issues and problems:

Scientific and technical information transfer and utilization is crucial to innovation, yet linkages between various sectors of the technology infrastructure are weak and/or poorly developed.

There is as much need for innovation in new industrial processes, as for new innovative products. The U.S. is in a particularly vulnerable position relative to its competitors in the development and deployment of advanced process technologies (e.g., CAD/CAM, robotics, group technology, FMS).

A major unaddressed issue concerning technological innovation is the optimal utilization and management of human resources. Our foreign competitors have been much more attentive to issues of training, retraining, and more cooperative labor/management relations.

A predominant share of scarce U.S. R&D resources have been allocated to space and defense-related activities, with limited commercial exploitation of these public expenditures, at the expense of civilian-related activities, which have higher innovation and commercial potential.

Our innovation process has not adequately addressed the issue of new enterprise development. We lack an adequate system to provide technical, management, and financial assistance to new enterprises.

Little is known empirically about the effects of current programs, or the likely effects of new programs designed to stimulate technological innovation and economic recovery.

America has no integrated, coherent innovation policy. Programs and policies are scattered across a wide array of federal agencies, and the aggregate effects are unknown. No single agency is either charged with, or able to implement, a coordinated approach.

A more detailed analysis of these key issues follows:

INFORMATION AND TECHNOLOGY TRANSFER

The creation of new technology essentially involves the transfer or transportation and knowledge. Nearly every commercially successful technology can be traced to basic scientific research that has been iteratively changed, expanded upon, and transferred over a period of years. Since information transfer is at the core of all technological innovation, this activity is a particularly good candidate for high impact intervention.

While much of the knowledge that is transferred during the innovation process is proprietary in nature, a significant portion is not. Information gets transferred between universities and industries, between small companies and large, and between the Federal Government and the private sector, through a wide variety of mechanisms. Moreover, the Federal Government, as the largest single supporter of basic science, is the most crucial information broker in the country. Its activities range from agency-specific knowledge dissemination, to support of libraries in various institutional settings. Unfortunately, the Federal information transfer "system" that has evolved, is neither a system nor is it particularly effective at providing critically needed domestic and international scientific and technical information to potential users.

Numerous examples of the system's inadequacies can be found in defense-related science and technology programs. Defense R&D and space R&D comprise over 60% of the total Federal R&D budget. Further, the industries which show the largest expenditures for R&D (from internal and Federal funds) are aircraft and missiles, and electrical equipment and communications. While there have been some significant payoffs from defense related research in the form of new consumer products, these payoffs have been few relative to the vast amount of money expended. Although the semiconductor and aircraft industries owe much to military and space research and procurement policies, the dissemination of defense-related scientific and technical knowledge, and the commercial application of technologies in other areas have been quite limited. The NASA Technology Utilization Program, for example, has achieved mixed results in the direct transfer of space research to commercial applications.

These facts illustrate two fundamental problems for American technological growth. First, if the "militarization" of American technology continues to grow, America's share of burgeoning consumer markets may be further jeopardized. Second, since such a large proportion of the nation's public R&D resources are presently tied to mission-oriented activities, methods must be found for substantially expanding civilian commercial benefits from these expenditures. Improving the currently inadequate information and technology transfer mechanisms between sectors is one such method.

Yet, regardless of the sector, much of what has been discovered about effective methods of information dissemination has not been incorporated into federally-supported transfer activities. In addition, virtually every R&D agency has its own idiosyncratic knowledge transfer mechanisms resulting in a patchwork of policies and practices. If a significant improvement can be realized in the transfer of technologically-relevant information to users, the downstream payoff in increased innovation is likely to be considerable. Consequently, this is potentially a "high leverage" area for a well-considered, coherent set of initiatives aimed at coordinating the dissemination of technical information and facilitating the adoption of new technologies.

HUMAN RESOURCES

Too often, U.S. firms view and use human resources in a vastly different way than our major foreign competitors. In America, people are too often perceived as being as interchangeable as machines. The design of

manufacturing systems is seen as nothing more than a problem of individual machine design on a larger scale. The results in human terms are a limited use of worker talents, the isolation of workers from their fellow workers, and alienation from the product being produced. The results in technical and economic terms is less than optimal performance: incomplete utilization of resources, inflexible manufacturing systems, and high absenteeism and turnover among employees.

By contrast, our foreign competitors have been more concerned with designing innovative manufacturing systems which both take advantage of new technologies and more fully utilize valuable human resources. Advanced manufacturing systems by their very nature seem to require new ways of working. Frequently, routine tasks are absorbed by the technology, with increased demands placed on maintenance and control functions. In general, workers are needed less to perform a prescribed sequence of work, than to respond to exceptions. In many cases our competitors have been more cognizant of the importance of workers in advanced systems, and have been more attentive to issues of training, retraining, decentralizing authority, and shifting labor/management relations to a more cooperative model.

The growth of quality control circles, and other socio-technical systems developed by U.S. scientists, have been well documented. It is dismaying that these innovations in the human resources field which were first developed in the U.S., have been exported for effective use by our competitors, while American industry has not yet exploited their full potential. The implications of Scanlon systems, employee-stock-ownership-plans, worker participation programs, and other socio-technical systems need to be integrated into any overall innovation strategy.

NEW AND SMALL ENTERPRISES

The small R&D-based company is a major ingredient in technological innovation. Either as innovative suppliers to major firms, as spinoffs from larger companies, or as outgrowths of academic basic science, it is clear that the small company is crucial to the development of new technologies. Small companies often seem to function as incubators of new ideas, and the competition in key high technology areas is fierce.

While there have been Federal policies and programs earmaked for small business in general, little has been designed explicitly for the high technology oriented small company. For example, the U.S. Small Business Administration has not considered the high tech company as its primary client. Perhaps more importantly, recent economic policies, such as the introduction of the R&D tax credit have been formulated as if only Fortune 500 companies existed in the U.S. To the extent that a patron exists, the leadership in promoting small high technology companies has emerged primarily at the state and local level.

This should, however, in no way imply that new, small high technology firms have no need for external assistance. Studies of new R&D based companies indicate that they are often weak in managerial and business skills, despite their technological sophistication. It is in these areas that a variety of assistance mechanisms might be developed. Linkages to universities, government agencies, venture capitalists, and private associations have all been fruitful in enhancing entrepreneurial management, business, and survival skills.

PRODUCT AND PROCESS INNOVATION

In current discussions of international economic competition, a great deal of attention has been focused on the success of new "hi-tech" products. This kind of emphasis has often blurred the distinction between the technology "embedded" in the product, and the process technology employed to manufacture the products. In no other area is the U.S. at such an obvious disadvantage relative to its competitors as in the development, adoption, and implementation of advanced process technology. This has been particularly true in traditional industrial sectors, such as automobiles, steel, and rubber.

In the past several years there have been major advances world-wide in the development of new process technologies, particularly those oriented toward manufacturing. These include robotics, computer-assisted design and manufacturing (CAD-CAM), group technology and flexible manufacturing systems. Although 20 years ago the U.S. enjoyed a comfortable lead in the early development of these technologies, today that competitive edge has largely dissipated, poignantly illustrating critical market imperfections. For example, Japan now is generally considered the world leader in the development and manufacture of industrial robots—an industry initially dominated by American research and technological innovation.

One ingredient missing from the U.S. approach to product and process innovation during this period was a major leadership and brokering role played by government. By contrast, Germany and Japan have witnessed a much more proactive role by their own national governments. The opportunities for Federal action are several and need not include the controversial practice of "picking" winning and losing technologies. For example, the funding of early high risk research could be shared among industrial consortia, or in government-industry-university cooperative research centers. Assistance could be provided in facilitating the adoption and implementation of new technologies. Clearly, the effective deployment of advanced process technology is crucial to U.S. industrial rejuvenation. These kinds of assistance will be especially critical if the traditional manufacturing sector of the U.S. is to retain some defensible market share.

UNDERSTANDING INNOVATION

Attempts to influence the process of innovation—whether emanating from the government or the private sector—have had a patent medicine flavor to them. There has been great enthusiasm about various nostrums, virtually no defensible evidence of effects, and consequently, the endless re-inventing or re-packaging of various tactics. One characteristic of both public and private sector efforts to influence industrial recovery has been their increasing reliance on a theoretical or ideological underpinning. In other words, programs have been designed with an eye to what "should" be, rather than what is.

Two types of information seem called for. First, there need to be continuous and vigorous data collection efforts to assess public and private sector programs designed to effect industrial innovation. Evaluation results should be built into program design, rather than added post facto. Second, more basic knowledge about the process of innovation is clearly needed to ensure that managers in all sectors can assess the likely effects of their actions on innovation and productivity.

Restoration of America's technological competitiveness will require a devotion to pragmatism and patience. Programs to influence technological innovation should be designed on the basis of what we know about the process, and should be implemented as "temporary systems"—to be assessed, altered, or replaced on the basis of ongoing data collection and the evaluation of outcomes. America's current technological plight has taken many years to develop; time and an adequate knowledge base will be essential to designing solutions that work.

POLICY AND PROGRAM INTERGRATION

Given the complexity of technological innovation, a successful strategy to influence this process will need to be comprehensive, coordinated, well articulated in both policies and programs, and given high priority status. Contrasting this proposed method of policy and program integration with current reality yields several salient discrepancies. There is no industrial innovation policy in government; there are many policies. There is no single innovation program in the Federal Government, but there are a wide range of innovation-related activities. Executive agencies with a major stake in the pace of U.S. technological innovation include, but are not restricted to, the following: Department of Commerce; Department of the Treasury; Department of Justice; National Science Foundation; Department of Labor; National Aeronautics and Space Administration; Department of Defense; and the White House Office of Science and Technology Policy. Similarly, there are several legislative-branch organizations with vested interests (e.g., Office of Technology Assessment, General Accounting Office).

While such a variety of agency interests is encouraging in its richness, it is also discouraging in terms of coherence and cumulative effect. Too often the unit that has an innovation mandate within an agency will be a bureaucratic "orphan," somewhat out of step with the overall mission of its parent. Similarly, there is little effective contact or coordination across agencies on either a policy or operational level.

While tolerance for diversity is generally considered an American virtue, in the case of industrial technological innovation it may be a negative impediment. The current laissez-faire approach of too many agencies with uncertain mandates and ineffective interagency coordination has not produced an effective response to date. Agency infrastructure and policy coordination problems will have to be solved first before financial and human resources can be constructively earmarked for "solutions."

SUMMARY

The threefold challenge our nation now faces is to modernize America's traditional manufacturing strength in its basic industries, to facilitate the development and growth of new, emerging high technology industries, and to maintain our older more established high technology strengths. Far from being mutually exclusive goals, these elements of a realistic approach must be met simultaneously and should be recognized clearly as interdependent, rather than competing, industrial challenges. Enabling America to successfully meet its challenge will require the Federal Government to provide the private sector with an environment which fosters innovation, productivity, and international competitiveness. This strategy would constitute a coherent approach to innovation, to replace these uncoordinated

and demonstrably ineffective practices currently in place which no longer fit the realities of domestic and world commerce.

ELEMENTS OF A COHERENT GOVERNMENT APPROACH TO INNOVATION

Given the critical and pressing problems currently facing future technological innovation in this country, and the present lack of a coherent organization framework within which to develop and implement desperately needed solutions, a new way of structuring Federal government activities pertaining to technology must be designed. In order to be effective in influencing technological innovation, the Federal government will need to perform the following key functions:

Provide a research and development capacity adequate both to define problems in the innovation process and to formulate effective solutions for those problems once identified.

Coordinate Federal government programs with potential impact on the process of technological innovation.

Ensure the effective dissemination and transfer of scientific information and technology to increase the commercialization of mission-oriented technology, and to enhance the utilization of general scientific and technical information.

Provide a focus in government for the demonstration and development of process technologies with applications for manufacturing, and for the enhancement of productivity throughout the economy.

Provide a coordinating and operational focus for programs at the state, local, and Federal levels addressing the issue of new enterprise development.

Provide a clearinghouse, demonstration, and experimental focus for examining the human resource aspects of technological innovation, including retraining, training, and management practices.

Provide a setting in which stakeholders in the process of industrial innovation—labor, management, education, and state and local governments—may express their concerns and influence the policy and programmatic responses of the Federal government.

Analyze and assess policy options pertaining to technological innovation and development, and present those options at the highest level of government, up to and including the Executive Office of the President.

DESIGN PRINCIPLES

An informed knowledge of the process of technological innovation suggests a number of principles which should be employed in reorganizing and strengthening Federal efforts to influence that process. Moreover, experiences of the past two decades with overambitious and ineffective federal programs can provide additional guidelines for constructing a coherent government approach. Some principles that should be employed include the following:

STAKEHOLDER INVOLVEMENT

As has been noted, the process of technological generation, diffusion, and implementation involves a number of stakeholders, sectors, and institutions. Any one of these participating groups can derail a process of technological change. It is also true that the process of innovation can be positively exchanced when "demand pull" by users is built into the system.

It is essential that a variety of mechanisms be used to involve constituents in ongoing federal efforts. For example, advisory committees, when used, should include representatives of labor, academia, the corporate world, state and local government and professional societies. Similary, whatever transaction devices are used to expend public funds, a guiding principle should be "risk-sharing" by recipients. For example, research and development projects that are co-funded by industry will more likely reflect market realities than "technology push" initiated by Government alone.

LEVERAGE THROUGH INSTITUTION-BUILDING

Massive injections of public funds into the industrial system are not necessarily required. Rather, the focus should be on "leveragings" the process of the technological innovation by improving the performance of constituent institutions, and the interactions between those institutions. For example, it is not fiscally possible to look for 100% Federal funding for retraining of workers displaced by the technological advance in the next decade. However, it would be practical and important for the government to identify exemplary approaches to retraining, and to disseminate that knowledge to already existing programs at state, local, and Federal levels. Similarly, the fostering of cooperative research relationships (e.g., university/industry, industry/industry) contributes to the process of technological innovation, but all of these cooperative relationships cannot, and should not, be directly funded or managed by government. Again, a mixture of direct intervention, paired with institutional renewal and leveraging, seems a more appropriate approach to follow.

EMPIRICISM

Knowledge about "that works" to stimulate the process of technological innovation is fragmentary. This is true at both the macro-policy level and at the operational progam level. Federal efforts to influence innovation should adopt an operating philosophy and establish management procedures that emphasize experimentation and assessment of program effects. Moreover, any new efforts should be sunsetted with a comprehensive substantive evaluation built into its enacting legislation. Every relevant program or organizational unit should assess current results and rigorously evaluate program options that might be used in accomplishing its objectives.

INCREMENTAL IMPLEMENTATION

The experience in social programming of the past two decades should be sufficient warning against the immediate, massive implementation of large numbers of new programs. Furthermore, new programs are always of uncertain or unknown impact, and should be tested at a relatively low level of support. They could then be expanded (or reduced) on the basis of demonstrable results. Moreover, initial efforts should be seen as a lean vanguard approach, testing experimenting with alternative solutions as needed.

OPTIONS

Four options designed to reorganize and strengthen Federal government activities pertaining to technological innovation suggest themselves.

The first option is to leave existing programs where they are, add new programs when appropriate, and enhance the coordination of all programs and activities by establishing a lead office. However, establishing coherence across agency lines is always very difficult, and the existing evidence indicates that the present disaggregated efforts have not been highly successful. Moreover, past experience suggests that parent agencies with other more general mandates are rarely effective advocates and supporters of technological innovation per se. Therefore, this option appears to be an inadequate approach to the problem.

A second option would be to create a new agency that reports to an existing Cabinet Department, such as the Department of Commerce. This solution has some attractiveness, particularly in terms of speed of implementation and management coherence. However, it is questionable whether embedding a new effort in an existing agency would give it sufficient stature and visibility to be effective. It is also doubtful whether the relatively narrow constituency and clientele of established Departments would match the variety of groups and activities that would need to be incorporated into a comprehensive effort to stimulate industrial innovation. This option may also be an inadequate approach to the problem.

A third option would be to create a new federal capability in technological innovation by using the National Science Foundation as the organizational core and transferring to it pertinent technology-based programs and activities from other agencies. This would result in a "National Science and Technology Foundation". In theory, the basic science and technological functions of this agency would have co-equal status, with perhaps a parallel deputy director(s) administrative structure. The primary advantage of such an approach is that it would build on the enviable track record and expertise of the NSF in managing large scale, high quality extramural research. The primary disadvantage is that the culture and mindset of NSF has been preoccupied with basic science as opposed to technological innovation, and previous efforts at pairing applied or technology oriented activities with this primary mission have been less than successful. Whether an aggressive applied research and action program could exist and flourish in this setting is debatable.

A fourth option is to establish an independent agency that reports to the President, consolidating therein most existing programs to stimulate innovation, and creating new ones as needed. Clearly, designing and establishing a new agency is always an arduous task and organizational solutions by themselves rarely solve problems. The creation of any new government body should be approached with a degree of skepticism and caution.

Nonetheless, what is needed now is to define a coherent set of federal programs and policies to stimulate technological innovation, and to create an organizational framework in which these programs and policies can be implemented for optimal effectiveness.

In short, we need to describe the functions and types of programs that would need to be brought together for a viable federal effort in technological innovation. To illustrate how such a federal effort might be organized, the following proposal for an Agency for Technological Innovation has been developed. While couched in terms of a new independent agency initiative, the functions described could be modified to fit any of the organizational options described above.

PROPOSAL FOR THE AGENCY FOR TECHNOLOGICAL INNOVATION (ATI)

In many respects the proposed agency will be an organizational innovation. It will be

an independent agency, but will also have direct ties to Presidential authority. It will be both a policymaking organization and an operational agency. Moreoever, its internal operations and policies will be guided to a significant degree by its external clientele in both the private and public sectors. The agency should not reach full-scale implementation until at least three years after inception. All personnel and budget estimates in subsequent sections should be seen as third year targets, unless otherwise stated. Moreover, sunset oversight prior to five years of operations would seem premature, although a sunset review at that time would be quite appropriate. The process of technological change is both complex and lengthy, and the evolution of the proposed agency should proceed apace.

In subsequent discussions of proposed organizational functions and structure, the reader is referred to Figure I.

[Chart not reproducible in RECORD.]

Office of the Director

The Director will serve a four year term and be a Presidential Appointee. The incumbent will have both administrative responsibilities for the agency, and will serve as the Presidential Advisor in Innovation Policy, thus having clear status within the executive branch. The agency would be chartered as an independent agency in the U.S. Government, but in the person of the Director would have direct access and stature within the Executive Office of the President. The Director would have the clear mandate and authority to coordinate, and in some cases assume co-responsibility for, operations in other government agencies that may fall within the innovation domain.

Office of Innovation Policy

An Office of Innovation Policy shall be established in the Agency for Technological Innovation, attached to the Office of the Director. As Presidential Advisor on Innovation Policy, the Director of the agency shall serve as nominal head of this office. Administrative responsibilities for the office shall be handled by an Executive Director, and various section heads as appropriate.

The purpose of the Office of Innovation Policy will be to advise the President, the Cabinet, and other government agencies on policy trends, options, and issues pertaining to technological innovation. Areas of inquiry would include antitrust, patents, taxation, procurement, regulation, manpower utilization and training, research and development, and trade. It will be empowered to conduct both analytical and empirical studies, and will be obligated to report its findings in the public record. The Office of Innovation Policy shall make a quarterly report to the Congress on emerging issues concerning U.S. technological innovation.

This unit will assume the policy mandate pertaining to private sector technology issues that has been nominally assigned in enabling legislation to the Office of Science and Technology Policy (OSTP). However, in point of fact OSTP has occupied itself primarily with policy pertaining to basic science and to Federal mission-oriented R&D (e.g., defense, energy, and space). The Office of Science and Technology Policy will continue to exist, but its functions pertaining to industrial technological innovation will be the sole responsibility of the Office of Innovation Policy.

Staff and resources from the Division of Policy Research and Analysis and the Division of Industrial Science and Technological Innovation, National Science Foundation, and personnel from the Department of Commerce will be transferred to this agency for staffing purposes. This staff will be supplemented with personnel from other sources as needed. A staff of 25 full-time professionals is envisioned with a budget of $5 million, when the unit achieves full implementation.

National Innovation Board

The constituencies of this proposed agency will span a variety of instutitional groups. Moreover, the economic and political interests of these various groups will not always coincide, whether on issues of innovation policy or matters concerning the operational programs of the Agency. The purpose of the National Innovation Board will be to provide a forum to guide agency practice and policy, with input from a variety of interest groups.

A 10-person National Innovation Board is visualized. Each member will serve a four year term, and will be appointed by the President. Terms of the initial appointees will be staggered so that one-quarter of the membership will rotate off the board each year. Appointees should be selected such that approximately equal representation will be given to industry, labor, education, and representatives from state and local government.

Administrative and operational structure

The Agency for Technological Innovation will be organized into four Directorates, each headed by an Assistant Director, reporting to the Deputy Director for Operations. Each Directorate shall structure itself into Divisions and Sections as appropriate. In operation, the agency is not intended to function as a strict hierarchical or function-segregated organization. Interdirectorate interchange should be frequent, and the Directorate for Information and Technology Transfer will have an explicit matrix function in this regard. The four Directorates are:

Directorate for Human and Organizational Resources.

Directorate for Enterprise Development.

Directorate for Production Research and Development.

Directorate for Information and Technology Transfer.

These units will be discussed in detail in subsequent sections.

Office of Program Evaluation and Development

An Office of Program Evaluation and Development should be established at the level of the Deputy Director of Operations, reporting directly to that office. One purpose of the office is to conduct ongoing evaluations of operational programs, and to assist the Directorates in real-time experimentation for program development. It will operate with the authority of the Deputy Director for Operations, but in a matrix relationship with the operational Directorates. It will devise operational, quantitative measures of outcome for the programs in the operational Directorates, and also function as an assessment resource for studies initiated by the operational units.

In addition to its assessment activities, the Office will conduct and support basic research on the process of innovation. Much of what we know, and more of what we need to know, have no direct program corollary in the proposed agency. Continued efforts to sort out the particular and relative effects of economic factors, management practices, and labor inputs to the innovation process is a high priority function.

The Office of Program Evaluation and Development will be headed by an Office Director, and will eventually be staffed by 20 full-time professionals, and necessary support staff. A first year budget of $10 million is visualized. Positions and resources currently assigned to the Division of Industrial Science and Technological Innovation of the National Science Foundation, and the Division of Policy Research and Analysis of the National Science Foundation, will be transferred to this new agency for staffing purposes.

Interagency Coordinating Council on Innovation

The Deputy Director for Operations will convene, and head, an Interagency Coordinating Council on Innovation with membership from each government agency managing programs linked to technological innovation practice or policy. The council shall meet monthly, and shall prepare quarterly reports to the agency Director. It shall have the responsibility to recommend administrative procedures or legislation in order to achieve coordination and/or consolidation among government programs with an impact on technological innovation.

A support staff of five full-time professionals and a budget of $1 million is recommended for the first year of operations.

OPERATIONAL PROGRAMS OF THE AGENCY FOR TECHNOLOGICAL INNOVATION (ATI)

As noted above, the operational programs of the agency will be organized into four directorates, with considerable matrix organization involved. In the following discussion the mission of each of these Directorates will briefly be presented, as well as some consideration of what existing government programs might be transferred into this new agency.

In considering the transfer of existing programs to this agency, the following criteria should be borne in mind: (1) whether that program or function would be more appropriately placed in the new agency; (2) whether withdrawing that function from its current context would harm operations of the current host agency; and (3) whether addition of that program or function would expand the scope of this agency beyond its limited vanguard, experimental posture.

Directorate for Human and Organizational Resources

Personnel and organizational dislocations are heavily involved in the process of technological innovation. Issues of technical training, retraining, and organizational design are usually corollaries of technological advance. There are a variety of programmatic efforts currently underway to address these issues. These efforts are being conducted by private sector firms, by state and local units of government, educational institutions, and agencies of the Federal government.

The purpose of this directorate is not to supplant those efforts. Rather, the intent of this directorate should be two-fold: (1) identify exemplary, demonstrably effective efforts in these areas; and (2) through competitive contract or grant, support a limited number of experiments to improve current practices. Reflecting the array of issues in this general area, a divisional structure approximating the following is visualized:

Division of Technical Education. This division would focus on pre-college, technical school, junior college, and baccalaureate level technical training programs. These

programs would concentrate on initial entry-level training.

Those portions of the Science Education activities of the National Science Foundation which are relevant to these levels of training would be transferred to this Division. Positions and resources currently assigned to the Departments of Labor and/or Education also shall be transferred to this Division as appropriate. An eventual staff of 201 full-time professionals is recommended, with a budget of $20 million.

Division of Manpower Retraining. The retraining of workers displaced by technology advance is a major problem in the U.S. Yet it is still unclear what these individuals should be trained for, what institution should be conducting the training, and what is the relative effectiveness of alternative training approaches. A major program of research, development, demonstration, and dissemination is visualized. In particular, it is recommended that field tests be undertaken to assess the viability of education retraining vouchers. (e.g., GI Bill of Retraining).

Eventually a staff of 30 full-time professionals and a budget of $40 million is recommended. Positions and resources currently assigned to the Department of Labor and/or Education shall be transferred to this Division as appropriate.

Division of Managerial Innovation. This division would focus on Managerial innovations that would both enhance innovation and productivity, and also improve labor relations and the quality-of-work-life in an industrial setting. Little systematic effort has been made in the U.S. to exploit the productivity-enhancing potential of gain-sharing plans, employee stock ownership, quality-of-work-life programs, quality circles, and the like.

A staff of full-time professionals, and a budget of $5 million is visualized for first year operations. Positions and resources currently assigned to the Departments of Labor and/or Education shall be transferred to this Division as appropriate.

Directorate for Enterprise Development

A major result of technological innovation is the creation of new enterprises, producing new products and/or developing new technical processes. Often this enterprise development process involves interaction across sectors or institutions. For example, cooperative research between university and industry is believed to accelerate the process of converting basic research to applied research and development, and then into new products and processes. Similarly, research and development conducted in small firms is both an important ingredient in new enterprise development, and also facilitated by programs of technical, financial, and managerial assistance. Components of this Directorate would include the following:

Division of Cooperative Research and Development. Several Federally funded or brokered programs of cooperative research have been considered as successful institutional innovations. These include the University/Industry Cooperative Research Centers Program and the University/Industry Cooperative Projects Program, both currently located in the Division of Industrial Science and Technological Innovation, National Science Foundation. These programs should be transferred intact to this Division. In addition, efforts are currently underway in the Office of Productivity and Technological Innovation, Department of Commerce, to promote limited partnerships and other types of finanical arrangements to stimulate and facilitate industry-industry cooperative research and development. These efforts should also be transferred into this division.

Overall, the Division should have two purposes. One, it should continue to fund a limited number of cooperative research activities, while insuring that industrial involvement in these ventures in both scientific and financial. In addition, it should be charged with identifying and developing other types of university-industry and industry-industry cooperative research relationships, and to catalog exemplary practices and programs. Again, a major dissemination function is visualized.

Eventual funding for this Division would be on the order of $30 million, with a staff of 10 full-time professionals.

Division of State and Local Initiatives. A variety of efforts are underway among units of state and local government to accelerate technological innovation and new product-process development. These range from promoting spin-offs from state university-base research, programs of technical and managerial assistance to small companies, development of research parks and consortia, and efforts to improve the operation of the venture capital system in states or regions. The magnitude of these efforts is large in the aggegate, and the pattern of public and private cooperative support that has evolved should not be disturbed by a massive injection of Federal money.

In this spirit, the purpose of this Division should be to fund a limited number of state and local experimental projects to assist the enterprise development process. Each project would range from $250,000 to $1,000,000, would last 3–5 years, would be closely monitored and quantitatively assessed, and would need to involve significant cost-sharing by both government and industry.

A program of 10 to 20 such projects would be visualized for the first year, with a total budget of $10 million. In addition to this function, the Division would also identify existing exemplary programs and try to document operations and results.

In implementing this Division, it is recommended that the Intergovernmental Program of the National Science Foundation be transferred to this agency. Staffing should ultimately reach a level of 10 full-time professionals.

Division of Small Business Innovation. Small high-technology firms are considered extremely important in new product and process development, and in the generation of new jobs for the economy. Congruent with this view was the passage of the 1982 Small Business Innovation Development Act establishing small business innovation research (SBIR) programs governmentwide.

The purpose of this Division is severalfold. One, it will be given an administrative responsibility to coordinate and oversee all SBIR programs in the Federal Government. Second, it will have a research, development, and demonstration mandate to work with Federal agencies to explore other ways in which the Federal R&D procurement process can more effectively foster small business innovation. Third, it is to work closely with the Office of Evaluation and Program Development to conduct a summative evaluation of the Small Business Innovation Research Program, now due to be sunsetted by its enabling legislation in 1987. Fourth, working closely with state goverment and the Division of State and Local Initiatives, it would provide technical assistance for the establishment of state and regional SBIR-type programs.

In implementing this Division, an eventual budget of $5 million is recommended, with 10 professional staff. Positions and resources currently assigned to the U.S. Small Business Administration would be transferred as appropriate.

Directorate for Production Research and Development

A major source of competitive pressure on the U.S. in recent years has been the increased ability of other nations to manufacture products of high quality and low cost. Moreover, with many new manufacturing or process technologies, the issue of their implementation is as important as their development per se. This Directorate will be dedicated to limited laboratory and field experimentation dealing with both the development of process technology and with better understanding and demonstrating successful implementation. It will be designed to improve American technology in the making and processing of products. Three Divisions are visualized:

Division of Manufacturing Technology. The U.S. over the past twenty years has lost much of its scientific and technological infrastructure in discrete parts manufacturing. For a variety of reasons universities have closed their foundries and machine shops, while firms have invested more of their R&D funds in new product development.

The purpose of this division is to redevelop that infrastructure, to provide guidance and funding to universities, colleges and technical schools, for curricular development and the purchase of equipment and machinery, and to support cooperative university, industry and government research on new manufacturing systems.

The automation project of the National Bureau of Standards (NBS) would be transferred to this Division, as would the Production Research Program within the National Science Foundation. The budget of the Division would increase to about $18–20 million after 5 years, with a staff of 10 professionals.

Division of Process Technology. Many radically new products require radically new production processes. The private sector, however, is often preoccupied with the new product to the detriment of process development. With international competition in high technology areas increasing, the U.S. cannot afford an excessive lag in getting quality products into the market place.

Current activities in biotechnology and microelectronics illustrate U.S. weakness in process development. This Division will support research on process development in new developing product areas and in biotechnology and microelectronics. It will work closely with industry and universities to reduce the time it takes to get quality products to the market.

The activities of this Division are both more experimental and more generic than those of the Division of Manufacturing Technology. The initial projects will involve 2 professional staff and about $1 million. A project a year will be added (along with additional staff) reaching $6 million and 5 permanent staff members after 5 years.

Division of Socio-Technical Design. New complex manufacturing systems require new design procedures to avoid major dislocation in human and organizational systems. This Division will focus on the devel-

opment of new design paradigms to jointly optimize organizational and technical systems and to explore the impacts on human and organizational systems of new process technologies.

The initial budget of this Division will be $1 million with 2 staff members increasing to $2 million after 5 years.

Directorate for Information and Technology Transfer

As noted previously, ATI would be designed to maximally leverage technical information, and optimally utilize the institutional infrastructure of the innovation process. Information dissemination and knowledge transfer are crucial ingredients in such activities. Although this Directorate will serve as the focal point for these agency functions, all parts of the agency will be active and formal participants.

The Directorate's generic purpose will be to ensure the dissemination and implementation of new products and processes in American industry. A secondary goal is to improve the information and technology transfer process among all sectors by developing new mechanisms and increasing the effectiveness of existing ones. The divisional structure of the Directorate will be based on the sources of knowledge or technology being transferred, as follows:

Division of Mission-Oriented Transfer. The function of this Division will be to identify potential commercializable products and processes, so-called "spinoffs" stemming from programs in mission-oriented agencies in the Federal Government. Given the substantial proportion of funds currently allocated to the R&D programs of DOD, NASA and DOE, and the massive Federal laboratory structure which has evolved to serve those agencies, these programs will receive top priority within this Division. Operational programs such as the Technology Commercialization Program in the Department of Commerce would be transferred to this Division appropriate.

An additional function of this Division will be to encourage the private sector licensing of government-held patents. The Government Licensing Program in the Department of Commerce and the Energy Related Inventions Program in the Department of Energy should be transferred to this Division to carry out this function.

An eventual budget of $10 million and a professional staff of 20 will be needed for these activities.

Division of Information Systems. This Division will serve as the repository of all scientific and technical information collected by the government with relevance to the process of technology innovation. It will also operate as a clearinghouse for pertinent data by using a computerized network to tap into information resources in the private sector. Through these data base linkages, the Division will both identify exemplary findings and technologies and engage in dissemination and transfer activities. Portions of the National Technical Information Service, now located in the Department of Commerce, should be transferred to help establish this agency function.

An eventual budget of $10 million and a professional staff of 20 will be needed for these activities.

Division of Interagency Information Utilization. The purpose of this Division will be to identify and coordinate research findings merging from each of the agency's operational and R&D programs and to ensure the dissemination and transfer of these activities both inside and outside the agency.

An eventual of $2 million and a professional staff of 5 will be earmarked for these activities.

Although this Directorate will be capable of serving as a suitable base for ATI operations in this area, there will be a critical need for a more decentralized approach to information and technology transfer activities. Therefore, in addition to the three divisions outlined above, the Directorate will be supplemented by, and oversee, twelve regional centers. Each of these centers will be located in a land grant university, and will serve as the focal point for field activities in that region. These centers will be structured as follows:

Technology Extension Centers. Loosely patterned after the agricultural extension service model, and NASA's Regional Dissemination Centers, each region will establish a multi-sector technology development center. The centers will be oriented around a particular technology or set of technologies, and would be located at a land grant institution in each region. The centers would be initially funded by Federal government seed money, but would require the pooling of industry, university, and state and local financial and human resources to successfully continue under established guidelines. These centers will serve a variety of functions, including:

Enhancing the transfer and utilization of knowledge produced in universities in new business development.

Establishing an intellectual center and comprehensive clearinghouse for all R&D relevant to a particular technology across disciplines and sectors.

Enabling managers to see these new technologies in action and be actively involved in adapting them to their own business needs, including follow-on R&D where necessary.

Facilitating the trail use of new technologies in industries on a modified "lending library" system.

Providing technical assistance to companies that are adopting and implementing the new technologies.

Enabling hands-on training for university personnel, new workers, and retraining for the structurally unemployed.

An eventual budget of $10 million and a professional staff of 20 are earmarked for these activities.●

By Mr. BOSCHWITZ:

S. 3072. A bill to amend title 10, United States Code, to provide for the forfeiture of proprietary rights to certain technical data by a debarred or suspended contractor of the Department of Defense, and for other purposes; to the Committee on Armed Services.

RIGHTS OF DEBARRED OR SUSPENDED DEFENSE CONTRACTORS

● Mr. BOSCHWITZ. Mr. President, I rise today to offer a piece of legislation which will help to ensure that our Government will be in a strong position to deal firmly with Government contractors whose fraudulent actions ought to debar them from further Government contracts. These contractors currently have the Government over a bit of a barrel when their misconduct is uncovered, and I hope that this bill will be a first step toward correcting that situation.

Mr. President, it is currently the practice of many contractors to retain proprietary rights to certain of their properties and processes when they furnish the Government with a particular item. While this right has often been abused in the past, no one would argue that it doesn't have a proper place in the relationship of a contractor to the contracting agency in some cases.

But a problem arises, Mr. President, when that proprietary data holder is found to be guilty of a criminal fraud, which would ordinarily expose him to debarment from further Government contracting for a period of time. If his proprietary rights are in fact unique, by debarring him the Government at the same time is left in a situation where the part or item previously provided by the contractor cannot be supplied from an alternate source, since no other contractor is possessed of the proprietary data required to reproduce the part or item.

This bill will solve this problem, Mr. President. No longer will a Government agency be unable to debar a contractor for fear of losing access to the proprietary data upon which the Government has come to rely. If a contractor is debarred from Government contracting as a result of a criminal fraud, he will lose all his proprietary rights as part of that debarment. This will enable the Government to find a second source for a part or item, using the proprietary data which it receives from the debarred contractor. In debarring fraudulent contractors in the future, the Government will no longer be cutting off its nose to spite its face.

I want to make clear that this loss of rights is only occasioned by conviction of a criminal fraud, so it cannot be used arbitarily by a Government contractor who wants to obtain proprietary rights in order to purchase things from a second source. I think this protects a contractors legitimate rights while at the same time ensuring that he doesn't become the proverbial indispensable man who must be tolerated no matter how poorly he performs.

I realize that time is short for action in this Congress, but I hope that, by introducing the Members to this bill now, to have a leg up on its rapid passage in the next Congress. I look forward to working with my colleagues on this matter next year, and I will welcome their support and suggestions at that time.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3072

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That (a) chapter 141 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 2402. Proprietary rights: forfeiture

"(a)(1) Any individual, corporation, partnership, sole proprietorship, or other entity who—

"(A) is awarded a contract with the head of an agency to develop or supply a manufactured product to the United States; and

"(B) after the contract is awarded, is debarred or suspended from performing the contract or from award of any other contract by the United States by reason of a conviction of any criminal offense described in paragraph (2),

shall forfeit all proprietary rights in technical data relating to the manufacture of such product. The United States shall be entitled to the possession of technical data when the proprietary rights to the data have been forfeited by the application of this paragraph.

"(2) For the purposes of paragraph (1), a criminal offense referred to in such paragraph is any criminal offense that—

"(A) is committed in connection with the performance of a contract with the United States, and

"(B) requires, as an element, an intent to defraud.

"(b) Any contractor referred to in subsection (a)(1) who forfeits rights to technical data pursuant to such section shall furnish the technical data to the Secretary of Defense not later than 30 days after the date the Secretary transmits to the contractor a written demand for the technical data.

"(c) At any time after a contractor has forfeited proprietary rights in the technical data pursuant to subsection (a), the Secretary may refer the matter to the Attorney General of the United States for appropriate action. The Attorney General (without regard to whether a demand has been made pursuant to subsection (b) or the time for furnished technical data pursuant to such a demand, as provided in such subsection, has lapsed) may bring an action in the appropriate United States district court to require the contractor to furnish the technical data to the Secretary.".

(b) The table of sections at the beginning of such chapter is amended by inserting, after the item relating to section 2401, the following:

"2402. Proprietary rights: forfeiture.".

SEC. 2. The amendment made by the first section shall take effect with respect to contracts awarded by the Department of Defense on or after the date of enactment of this Act.●

By Mr. DURENBERGER:

S. 3073. A bill to amend title XVIII of the Social Security Act to provide for grants to States for graduate medical education and other clinical training activities, and to replace the current medicare reimbursement for the direct costs of such activities; to the Committee on Finance.

MEDICARE CLINICAL TRAINING AMENDMENTS

Mr. DURENBERGER. Mr. President, this past Monday the Senate Finance Health Subcommittee, which I chair, conducted a hearings on the current financing of graduate medical education. In my opening remarks I suggested a number of reasons why there is a need for the Congress to reassess the Nation's medical education priorities. I would like my introductory statement from the hearing printed in the RECORD following these remarks.

The hearing was a first step in the process of developing new Federal policy concerning the financing of graduate medical education and the clinical training activities of other health professionals.

The next step is a bill which I am introducing today, S. 3073, entitled "Medicare Clinical Training Amendments of 1984." This bill would amend title XVIII of the Social Security Act. It ends the current passthrough for the direct expenses of graduate medical education and other clinical training programs by medicare and replaces it with a fixed grant to the States to accomplish comparable goals. The direct passthrough will cost the medicare trust fund approximately $1 billion in 1984. The new grant approach would begin funding in its first year at the level of $900 million.

At the hearing I learned that—

First, medicare has generously funded the provision of graduate education and other clinical programs since its inception. The new medicare prospective payment system for hospital services has continued the cost-based reimbursement approach for the direct expenses of clinical training. This passthrough for teaching hospitals covers medicare's portion of the costs of resident and intern stipends and benefits, faculty salaries and operating educational programs.

In addition, medicare is now paying an adjustment for the indirect medical education expenses incurred by teaching hospitals. This adjustment was included in the medicare payment structure to account for the higher costs of services provided in teaching hospitals. This higher cost is due to factors such as a sicker patient load, a more elaborate and expensive medical technological capacity and those additional but nonqualified costs associated with the training of residents.

As I mentioned in my opening statement at the hearing, the indirect adjustment can partially be replaced by restructuring the DRG payment system to better accommodate variations in severity of illness. When the methodologies are available we will do this. The other factors attributable to the indirect expense, clearly need to be examined as Congress develops its overall medical education policy for medicare.

Second, there is a growing consensus that we are now training more physicians than we may actually need. At the hearing Dr. Robert Graham, Administrator of the Health Resources and Services Administration at the Department of Health and Human Services told us by the mid-1990's, there will be 40 percent more practicing than today. According to recent projections done by Dr. Graham's agency there will be a surplus of physicians of 35,000 by 1990 and 51,800 by the year 2000. These aggregate surpluses do not mean we should no longer pay for the training of physicians. There remains a maldistribution of physicians for some specialists and locations around the country. However, it does call into question our current open-ended mechanisms for funding graduate medical education.

Third, teaching hospitals are important community resources. These institutions usually have the major tertiary care responsibilities for their locales and frequently offer the only access the poor may have to health care services. Residents and interns assume an integral role in both functions.

Any changes in the funding of graduate medical education must be sensitive to these conditions. No community will want to forego its critical care services provided in the burn, trauma or neonatal intensive care units of teaching hospitals. And, it would be difficult for many counties and States to replicate the services provided to the poor by residents and interns.

Fourth, the philosophy of medical education has always been "more is better." Quality, especially in graduate medical education, has been equated with lengthier training programs. The developments of new procedures and technologies have exacerbated this situation. Up to very recently the refinancing mechanisms for residencies provided no incentives for the medical education community to reassess benefit-cost of the length or breadth of its training programs.

These and other factors affirm my belief it is time to develop a new national policy on medical education. A piece of this process should be a restructuring of the direct medical education expense under medicare. My bill makes a proposal to do this. This bill should provoke attention in the academic medical community. I look forward to both their feedback on the approach taken by the bill and additional options for reform they and others may proposed.

31-059 O-87-10 (Pt. 22)

The "Medicare Clinical Training Amendments of 1984" would amend title XVIII of the Social Security Act to provide for grants to States for graduate medical education and other clinical training activities for health professionals. The amendments provide a limit on the funding medicare will devote to these purposes and a new methodology for the distribution of medicare clinical training dollars.

The grants to be awarded under the amendments will be funded through the medicare hospital trust fund in recognition of the services provided by residents, interns and other health professionals in clinical training to medicare beneficiaries. The lid on medicare spending for clinical training applied by the amendments reflects the concerns I expressed in my remarks at the hearing and today. It reflects the need for the Federal Government to set an explicit policy concerning its commitment to clinical training.

The grant mechanism to the States also makes the proposition that these clinical training activities need to be better rationalized by the community and that this can best be accomplished at the State level. Trends indicate that the States will have to take more of an interest in this area as both third party payers and alternative delivery systems begin to forego the funding of their clinical training activities and discourage the use by beneficiaries of the higher cost teaching hospitals.

Under the amendments the Secretary of the Department of Health and Human Services would make grants to the States based on a State's proportion of approved intern and residency slots and adjusted it for variations in the salaries of interns and residencies between States. The distribution of funds based on numbers of interns and residencies is used as a proxy for all graduate medical education and other clinical training activities. The States would use the grants to fund the types of activities medicare now reimburses under the direct medical education expense.

For fiscal year 1986, the amendments set the funding level at $900 million. Funding in subsequent years would be increased or lowered based on the changes in the Consumer Price Index. This yearly adjustment will allow the grants to keep pace with inflation.

The State grants would be divided into two portions. The larger share, 95 percent in fiscal year 1986, 90 percent in fiscal year 1987, 85 percent in fiscal year 1988 and 80 percent thereafter, would be allocated to hospitals with existing clinical training programs. The amendments place a limit on the amount any one hospital can receive from this portion of the grant based on payments made to that institution under part A in the reimbursement for direct medical education expense in 1984. This provision assures that a given hospital may, dependent on the decision of the State, continue to be funded at near current levels by medicare for clincial training activities. The State has the flexibility, however, to give less to hospitals. This is likely to happen since the overall allocation for these activities is reduced by the amendments.

The other portion of the grant, 5 percent of a State's allocation in fiscal year 1986, 10 precent in fiscal year 1987, 15 percent in fiscal year 1988, and 20 percent thereafter, would have to be matched on a dollar-for-dollar basis to be received by the State. This portion of the grant allows States an even greater degree of discretion than the larger share. The funds awarded under this provision of the amendments can be used by the States to assist approved graduate medical education and other clinical training programs, having relevance to the medicare program and displaying innovations in medical training and related services. The funds from the matched share of the grant could be used, for example, to meet priorities the State sets in training certain specialties which may be of particular need for the medicare population, such as primary care physicians or for purposes such as interdisciplinary and interprofessional training programs which develop and provide improved models of service for the medicare patient.

The States accepting grants would be required to establish an advisory board to develop recommendations for State policy in supporting the graduate medical educations and other clinical training activities financed through the grant. The board is required to include consumers, representatives of medical schools, nursing schools, and other health profession schools, hospital representatives and the appropriate State officials. The State must submit a plan to the Secretary to describe the designated uses for the funding.

The provisions of these amendments would be effective October 1, 1985.

Mr. President, I ask that my remarks and the bill be printed in the RECORD at this point.

There being no objection, the introductory statement and the bill were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR DAVE DURENBERGER

The Social Security Act Amendments of 1983 provided for radical reform in the payment of hospitals under Part A of the Medicare program. The new prospective payment system mandated by the act was designed to phase-in over a three year period. By the end of the phase-in, the Medicare rates for hospitals will be set according to a national average payment per diagnosis-related grouping.

In recognition of the disparate locations and service and training mix for hospitals, the Congress provided under the new scheme for urban and rural variations in payment; pass-throughs for hospital incurred capital costs; and a pass-through for the direct costs allocated with graduate medical education and other clinical training activities. An additional adjustment was allowed for the indirect costs of graduate medical education incurred by teaching hospitals.

This adjustment for indirect medical education expenses accounts for the high costs of teaching hospitals due to factors such as a sicker patient load, a more elaborate and expensive medical technological capacity, and those additional costs associated with the training of residents. The DRG system, used for Medicare prospective payment, is relatively insensitive to severity of illness so this indirect expense is in part a proxy for severity. As improved methods of establishing severity are devised, these developments will be incorporated into the overall DRG payment system. These refinements will make some portion of this indirect expense unnecessary. The remainder of the adjustment, based on broad assumption about the nature of teaching hospitals, also requires close scrutiny.

Congress has set the end of the phase-in period for prospective payment two years from today, as the deadline for setting in place a new methodology under which the capital portion of hospital expense will be paid by Medicare. Events now require we do the same with the medicare funding for the direct and indirect expenses for graduate medical education and other clinical training activities. The hearing today is a first step in that process.

Let me share with you several reasons why I believe the direct graduate medical education pass-through, as we now know it, will be eliminated within two years, and the indirect adjustment for medical education expenses will require refinement.

First, the pressure to reduce the federal deficit combined with the impending bankruptcy of the Medicare Trust Fund demand an end to these types of open-ended subsidies. There are only three ways to reduce the costs of Medicare to the federal Treasury. These are to reduce payments for Medicare services to providers, to increase cost sharing for Medicare beneficiaries and to increase taxes for all of us. I assure you, before additional cost sharing is considered, the beneficiaries will place great political pressure on the Congress to eliminate subsidies paid both under Part A and Part B to providers.

It is worth noting that Medicare covers only half of the total health care costs of the elderly and disabled, and we know from members of the Council of Teaching Hospitals, the group of the largest teaching hospitals, that 70 percent of the support for the direct cost of residents came from patient care revenues. These two figures will not be lost on these involved as the debate over cut-backs begins to intensify.

Second, traditionally, third party payors have been willing to include graduate medical education as justified expense in paying teaching hospitals. At the same time, though, insurance plans placed no significant incentives for patients to seek or use

lower cost medical facilities. Both these factors are changing in the current environment.

In a competitive marketplace, third party payors and alternative delivery systems are less willing to pay for graduate medical education and are steering plan members away from the more expensive teaching institutions.

These trends were illustrated for me at a recent conference I attended in Minneapolis on the financing of graduate medical education. As one attendee, who heads a major HMO in the Twin Cities put it, "They (the HMO's) want to purchase only those services which directly benefit their patients." It was obvious from his remarks and others we heard that the new environment is not supportive of the status quo for graduate medical education or teaching hospitals.

It is important to stress in the developing health care environment, that it is not only the HMO's and PPO's which will be placing the squeeze on teaching institutions. The consumer will begin to be a player, also. To cut costs, employers are now increasing cost sharing for employees. This trend is likely to speed up as efforts in the Congress contrive next year to cap the burgeoning tax subsidies, now over $30 billion provided for employee paid health insurance. As more of the costs of services are covered by individuals, they will be less prone to seek the services of high cost teaching institutions.

All of this is not to say that either physician training or the unique set of tertiary services provided by teaching hospitals is unnecessary. However, it does reflect the fact that Americans are going to be less willing to pay for either of these activities from their premium dollar. Therefore, we now have a tough set of questions to answer—who will take responsibility for graduate medical education, and how much will we pay for it?

Third, as we learned last Friday from our hearing, we have as of yet failed to resolve the tough question of "responsibility" for our indigent health care problem. It was pointed out at the hearing that the courts are beginning to settle this issue for us. But, I feel strongly it is the Congress together with the other governmental units which must take the "responsibility" and set explicit policies to assure access to quality and cost-effective care for all Americans.

The solution to financing care for the poor will greatly affect teaching hospitals and the financing of graduate medical education. It should not be assumed as a given that as financing mechanisms are arranged to fund the health care of the poor that they will either be encouraged or choose to seek care in teaching hospitals.

The Association of American Medical Colleges (AAMC) in its testimony on Friday pointed out that the nonfederal Council of Teaching Hospital members incur 35 percent of the bad debts and 47 percent of the charity care for the nation's community hospitals. This level of commitment is laudable but it also fits with the need for many of the institutions to have teaching material for their student physicians. I have concerns about the provision of care for the poor and whether or not the teaching hospital is the best environment for them to receive necessary services.

We heard on Friday from Dr. Janelle Goetheus that the care in teaching hospitals—at least for the poor—lacks continuity and is depersonalized. Evidence indicates it is also more costly. Today, we should learn more about these issues.

Fourth, the deficit crunch we face next year will cause the Congress to re-examine current federal priorities. Many cuts are likely, and this may mean reductions in the federal funding for undergraduate and graduate medical education.

This process may include such "sacred cows" as the Veterans Administration health expenditures. Currently, the Veterans Administration hospital system has 8000 full-time equivalent residency slots and 77 percent of the 172 V.A. hospitals have affiliation with medical schools. This significant commitment needs to be evaluated in light of the health needs of an aging veterans population as well as the constraints we face on federal appropriations. Limited Veterans Administration appropriations must be spent for the good of the beneficiaries first.

Along the same lines, the federal commitment to funding training of the health profession must also always be scrutinized. This year, Title VII of the Public Health Services Act is likely to be reauthorized at levels above the 1984 budget. The authorizations are moderate but will need to be revisited next year as we consider overall new policies on the financing of graduate medical education.

Fifth, I believe there is a growing concern about equity and fairness across our health care system. We see this concern to some extent between urban and rural areas in the determination of prospective payment rates for Medicare. It may become further exacerbated by the Medicare waivers under which high cost states have adopted status quo-oriented all-payor systems. Under these waivers, the high cost of graduate medical education and care for the economically disadvantaged is locked in for all payors including Medicare.

It is not fair that the cost shift we have experienced in the past to fund graduate medical education and care for the poor be structured into the payment scheme for all-payors states while in others the pressure of competition ends this same shift. Instead, we should have explicit government policies which enable appropriate funding for graduate medical education and the economically disadvantaged.

These are a few of the reasons we are here discussing medical education today. I see a growing consensus that the direct and indirect subsidies for medical education have helped produce a substantial surplus of physicians. This surplus has brought with it inflated, economic returns to certain specialties without solving many of our problems of maldistributions of physicians by specialty and geography.

The issue of financing graduate medical education is definitely on the "front burner". The Department of Health and Human Resources has contracted with Arthur Young to do a major analysis of graduate medical education costs. This study, due this fall, is late but we should begin to get preliminary results over the next 12 months. The Commonwealth Fund has commissioned a set of thought papers on graduate medical education and the cost of teaching hospitals. These papers should be completed early next year and will provide an important resource. Finally, and most importantly, the AAMC has appointed a committee to re-examine the policy of the academic medical community for financing graduate medical education. I look forward to the options which this committee will present.

The hearing today will provide us with important background on medical. A second hearing will focus on medical education from the point of view of its various types of consumers or those who benefit; the students, the community hospitals, the teaching hospitals, and the patients. It will also examine the issue of physicians distributed by specialty and location. Future hearings will examine options for establishing explicit responsibility for the financing of graduate medical education and other clinical training as well as define the federal role in the financing of these activities.

I appreciate our witnesses taking time to be with us today and look forward to learning from their testimony.

S. 3073

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Medicare Clinical Training Amendments of 1984".

SEC. 2. (a) Title XVIII of the Social Security Act is amended by adding at the end thereof the following new section:

"GRANTS FOR GRADUATE MEDICAL EDUCATION AND OTHER CLINICAL TRAINING ACTIVITIES

"SEC. 1889. (a)(1) The Secretary shall make grants to States under this section for the purpose of assisting hospitals in carrying out approved graduate medical education and other clinical training activities. Each State shall be entitled to a grant under this section for each fiscal year if such State agrees to abide by the requirements of this section for distributing such grant among hospitals in such State.

"(2)(A) The amount of a State's grant for each fiscal year shall be an amount which bears the same ratio to the amount established under paragraph (3) for such fiscal year, as the number of interns and residents-in-training in the preceding fiscal year at hospitals in such State having approved graduate medical education or other clinical training activities, bears to the number of such interns and residents-in-training for the preceding fiscal year in all hospitals having such activities, adjusted in accordance with subparagraph (B).

"(B) Each State's grant amount determined under subparagraph (A) shall be adjusted by the Secretary to take into account State differences in wage levels for interns and residents-in-training. Each grant amount shall be adjusted by a factor (established by the Secretary) reflecting the relative wage level for interns and residents-in-training in such State compared to the national average wage level for interns and residents-in-training. Such adjustment shall be made in a manner such that the aggregate amount of the grants to the States for the fiscal year remains fixed at the amount established under paragraph (3).

"(3) The amount established under this paragraph is—

"(A) $900,000,000 for fiscal year 1986; and

"(B) in the case of each succeeding fiscal year, an amount equal to the amount established under this paragraph for the preceding fiscal year, increased or decreased by the percentage change in the Consumer Price Index (prepared by the Department of Labor and used for purposes of section 215(i)) for the preceding fiscal year.

"(4) Grants under this section shall be made from the Federal Hospital Insurance Trust Fund.

"(b)(1) Grants received by a State under this section shall be used by the State to make grants to hospitals having approved graduate medical education or other clinical training activities. Such grants to the hospitals shall be made as follows:

"(A)(i) A portion, determined under paragraph (2), of the amount received under this section shall be used to make grants to all hospitals having such activities. The amount of the grant to each such hospital shall be an amount which bears the same ratio to such portion as the product described in clause (ii) for such hospital bears to the sum of such products for all hospitals in such State; except that the amount of the grant to any such hospital for any fiscal year shall not exceed the cap amount described in clause (iii), and any such excess shall be redistributed to those hospitals whose grants have not exceeded such cap amount.

"(ii) For any hospital, the product applicable for clause (i) is the percentage of such State's interns and residents-in-training (full-time equivalent) who were in training at such hospital in the preceding fiscal year, multiplied by the number of such hospital's medicare patient days in the preceding fiscal year.

"(iii) The cap amount for any hospital for fiscal year 1985 is an amount equal to the payments made to such hospital under part A for the fiscal year 1984 which were attributable to direct costs incurred for approved graduate medical education and other clinical training activities. The cap amount for each fiscal year thereafter shall be the hospital's cap amount for the preceding fiscal year, increased or decreased by the same percentage applicable under paragraph (3)(B).

"(B)(i) The remaining portion of the amount received under this section shall be used by the State to make grants to hospitals having approved graduate medical education or other clinical training activities, for the purpose of assisting programs having special relevance to the medicare program and displaying innovation in medical training and related services. All grants under this subparagraph must be matched on a dollar-for-dollar basis by the State, and shall be made only if the State submits a plan to the Secretary with respect to how such grant shall be used.

"(ii) Any amounts under this subparagraph which are not used by a State because the State does not match the grant or because the State does not submit a plan to the Secretary, shall be redistributed among those States which have complied with the matching and plan requirements, and shall be treated by those States in the same manner as amounts described in subparagraph (A).

"(2) The portion of a State's grant which shall be used for making grants to hospitals as specified in subparagraph (A) of paragraph (1) shall be 95 percent in the case of fiscal year 1986, 90 percent in the case of fiscal year 1987, 85 percent in the case of fiscal year 1988, and 80 percent in the case of each fiscal year thereafter, plus, in the case of any fiscal year, any amounts redistributed to such State under subparagraph (B)(ii) of paragraph (1).

"(c) Each State receiving a grant under this section must establish an advisory board to develop recommendations for State policy in supporting graduate medical education and other clinical training activities, and to advise the State with respect to the allocation of grants pursuant to subsection (b)(1)(B). Such advisory board must include, but is not limited to, consumers, representatives of medical schools, nursing schools, and other health profession schools, hospital representatives, and State officials involved in graduate medical education and other clinical training programs.

"(d) States are encouraged to assure sufficient funding for all graduate medical education and other clinical training activities through mechanisms similar to those provided under this section.

"(e) For purposes of this section—

"(1) the term 'approved graduate medical education and other clinical training activities' means those activities conducted at a hospital having a provider agreement under section 1866, and which are of the type which were recognized by the Secretary as approved educational activities for purposes of reimbursement on a cost basis (for all hospitals) under part A under regulations and provider reimbursement principles in effect on September 30, 1984; and

"(2) the term 'medicare patient days' means the number of days of inpatient hospital services for which payment was made (or would have been made but for the application of the inpatient hospital deductible) under part A.".

(b) Section 1861 (v)(1) of such Act is amended by adding at the end thereof the following new subparagraph:

"(P) Such regulations shall provide that the reasonable cost shall not include the direct costs of graduate medical education and other clinical training activities.".

(c) The amendments made by this Act shall become effective on October 1, 1985. The amendments made by subsection (b) shall apply to payments for services rendered on or after such date.

By Mr. MATHIAS:

S. 3074. A bill to protect copyrighted computer programs from illegal copying; to the Committee on the Judiciary.

COMPUTER SOFTWARE PROTECTION ACT

● Mr. MATHIAS. Mr. President, the computer software industry is one of America's leading growth industries. By some estimates, there are more than 3,000 companies that create and market computer software, with thousands more seeking to enter the marketplace. These entrepreneurs, many working long hours in their own small firms, have made us the envy of our trading partners. Through their efforts, the United States has become the world's leading producer of computer software. Yet today, an anachronism in our laws poses a serious threat to the economic health of the computer software industry.

Unlike producers of furniture or footwear, those who create computer programs must rely upon the protection offered by our copyright laws. The principle of copyright is, of course, that authors should be appropriately rewarded for the use of their creative works. That principle, with its origins in the era in which books were the only type of copyrighted work, today provides protection for many new types of works, including computer software. This legal protection is vital to the production of software—without which the most sophisticated computer is little more than an expensive paperweight.

One provision of the Copyright Act is today creating an undesirable loophole in the protection offered to computer software. Under that act, once someone has purchased a copyrighted work, whether a book, a record, or a computer software diskette, he can dispose of it in any way he likes—by selling it, renting it, or giving it away. This rule, known as the "first sale" doctrine, generally serves us well. No one should need to worry about a copyright liability when he lends a book to a friend, or sells an old record.

Because of recent economic developments, however, that doctrine now needs revision in certain critical respects. Last year, for example, the Senate recognized that a modification of this doctrine was called for in one important area; the rental of sound recordings. Hearings in the Judiciary Committee revealed the existence of a growing number of commercial record rental outlets. Many witnesses testified that the commercial rental of records is often little more than a subterfuge for encouragement of illegal copying. To address that problem, Congress has recently passed my bill, S. 32, the Record Rental Amendment of 1984, which the President signed into law on October 4, 1984. That bill makes a commonsense reform: it provides that a person who wishes to rent out records on a commercial basis must get the permission of the copyright owner before doing so.

Mr. President, a similar problem has arisen in connection with computer programs. Several establishments have now gone into the business of renting computer software. They lend out popular programs—such as Lotus 1-2-3, Spellstar, or Apple Writer—which sell for anywhere from $50 to $1,000. And few observers doubt that the real purpose of most of these transactions is to permit the renter to make a permanent copy of the program for future use—with no compensation to the author.

Software rental threatens the principle of copyright even more seriously than rental of records or tapes. A single program may reflect years of arduous work, and may sell for up to $1,000—as opposed to $6 to $12 for a record. Yet a blank diskette—onto which a progam can be copied—sells for just a few dollars, not much more than the price of a blank audio tape.

Thus, it costs little more to make an illegal copy of a $1,000 computer program than to copy a $10 record. Moreover, copying a software diskette is usually quicker and easier than duplicating a sound recording. Illegal copying of rented software is thus both more tempting and easier to accomplish than copying of rented musical recordings.

Some rental operators have argued that rental of software serves the legitimate purpose of permitting customers to "take software for a test drive." Although this is little more than a pretext in many instances, there may, indeed, be cases in which customers do wish to try out software before purchasing it. But there are many other ways of meeting this legitimate need without the enormous risk of illegal copying that is created by unauthorized rental of software. For example, some retail stores will permit customers to test software on the premises, and numerous software manufacturers have responded to this need by providing demonstration disks to customers. Should those efforts not fully satisfy consumer needs, however, there is no reason retailers should not be able to get the permission of the software copyright owners before renting out software, to ensure that the interests of copyright owners, rental outlets, and consumers are all respected.

Mr. President, I believe that only congressional action can ensure that software rental does not deal a damaging blow to the copyright protection of computer software. For that reason, I am today introducing, along with my distinguished colleague from Vermont, Senator LEAHY, a bill that will make a modest but important correction in the copyright law. Like the rental record bill, this legislation would require authorization from the copyright owner before one may engage in the rental, lease, or lending of computer programs for commercial purposes.

The just-enacted record rental law recognizes that commercial rental may take many forms. That act, therefore, prohibits not only commercial rental, but also other activities in the nature of commercial rental. The same problem arises in connection with software. For example, a retailer might sell software to customers with the understanding that the customer may return it within a few days for a restocking fee. Indeed, some software rental outlets appear to be employing a similar gambit. The bill that I introduce today borrows the language of the record rental act of this point, and will ensure that efforts to conduct unauthorized commercial rental of software under a different name will not succeed.

Mr. President, I would like to emphasize that the text of the bill that we introduce today is certainly subject to further improvements. I believe that hearings and discussions with interested parties will enable us to make any revisions that may be necessary.

Let me note one area that will certainly deserve careful discussion: Whether the bill should make special provision for the rental of software by nonprofit educational institutions. In the case of record rental, a consensus has developed that nonprofit libraries and schools should be exempt from the new rule prohibiting unauthorized lending of records. While the same accommodation could be made for software, some might argue that organized software rental policies, even on a nonprofit basis, so encourage improper copying that they should be permitted only with the consent of the copyright owner. I am confident that these and related concerns will be fully explored in the coming months, and that we will then know better how to proceed in this regard.

I ask unanimous consent that the text of the proposed bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3074

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Computer Software Protection Act of 1984."

SEC. 2. Section 109 of title 17 of the United States Code is amended by redesignating subsection (c) as subsection (d), and by inserting a new subsection (c) as follows:

"(c) Notwithstanding the provisions of section 117 and of subsection (a) of this section, unless authorized by a copyright owner, the owner of a particular copy of a computer program may not, for purposes of direct or indirect commercial advantage, dispose of, or authorize the disposal of, the possession of that copy by rental, lease, or lending, or by any other activity or practice in the nature of rental, lease, or lending."●

By Mr. DURENBERGER (for himself and Mr. STAFFORD):

S. 3075. A bill to amend the Toxic Substances Control Act; to the Committee on Environment and Public Works.

TOXIC SUBSTANCES CONTROL ACT AMENDMENTS

Mr. DURENBERGER. Mr. President, it was nearly 8 years ago that Congress passed the Toxic Substances Control Act [TSCA]. It was passed in response to a strong public commitment to do something about the kinds of toxic chemical disasters that were pressing on the public consciousness at that time—PCB contamination of the Hudson River, the flame retardant Tris in children's sleepware, and hazardous waste dumps throughout the land leaking tongue twisting chemicals that no one knew very much about. TSCA was designed around three fundamental concepts: the need for risk assessment of new chemicals to prevent harm before it occurs, the need for broad authority to gather basic data about chemicals and exposure to chemicals to spot harm that is occurring, and broad authority to regulate chemicals throughout the market chain.

As is so often the case, however, the results have not lived up to the expectations that Congress had for this law. In order to find out why this is so, the Subcommittee of Toxic Substances and Environmental Oversight, which I chair, undertook a thorough review of TSCA. This review has led me to the conclusion that TSCA can be improved. As a first step in that direction, I am today introducing, in conjunction with Senator STAFFORD, a bill that would amend TSCA in a number of significant ways. Our purpose in introducing the bill in the final days of this Congress is to call attention to these issues and attract additional comments about how to solve the problems that have hindered TSCA implementation. I intend to pursue vigorously the reauthorization and amendment of TSCA next year.

Mr. President, allow me to point out some of the highlights of this bill.

First, it seeks to improve the information base upon which risk assessments of new chemicals must be based. At the present time, the Environmental Protection Agency receives inadequate toxicity data on many new chemicals. A study by the Office of Technology Assessment found, for example, that 47 percent of new chemicals are submitted without any toxicity data whatsoever. The reason is that no data are required to be submitted.

I acknowledge that not all new chemicals need to be tested extensively, but it does seem clear that there needs to be some presumption favoring data submission. The bill that I am introducing today establishes such a presumption. It calls upon manufacturers of chemicals to evaluate the potential environmental and health effects of their intended products and to submit the information needed to back up that evaluation. However, it does not require testing for the sake of testing. A manufacturer has flexibility to tailor his data submission to the type of risk assessment that is appropriate for his product.

Second, the bill improve EPA's ability to follow up on the changing use patterns of toxic new chemicals. The General Accounting Office has called attention to the need for better follow-up capability. Often, a new chemical clearly is toxic but does not warrant regulation because its intended use would lead to insignificant exposure.

However, once marketed its uses may change, leading to types of exposure and risks that were not evaluated before manufacture. The bill improve EPA's ability to assure that such chemicals do not later lead to undetected harm by clarifying ambiguous terms, requiring followup notices in limited situations, and assuring that control requirements will follow a chemical down the marketing chain.

Third, the bill seeks to improve the toxicity data base on existing chemicals. TSCA provides authority to require that manufacturers and processors test specified chemicals. However, after 8 years, only 21 chemicals and groups of chemicals have been subjected to this provision. Furthermore, in all cases the testing was negotiated. It was not required by rule. A recent district court decision has invalidated the negotiated testing program. The bill that I am introducing today would streamline the existing administrative chemical selection procedures by eliminating redundant analyses, establish a program for testing large-volume chemicals, and authorize negotiated testing agreements in lieu of rules while establishing certain procedural safeguards and providing for needed enforcement.

Mr. President, I want to comment further on the testing program for large volume chemicals. It is a sad fact that many of the most common chemicals have never been tested to see whether they cause gene mutations, cancer, birth defects, or other health or environmental problems. This "toxicity data gap" appears to be immense. It was documented by a recent National Academy of Sciences study, which found that, in a random sample of the industrial and consumer chemicals covered by TSCA, none contained data adequate for a full health effects assessment. The picture was no better for the large volume chemical than for small volume chemicals.

Mr. President, this lack of basic data undercuts all the programs to identify and reduce chemical risk, both voluntary and regulatory. It is hard to see how we can resolve problems of toxic air pollution, toxic water pollution, toxic ground water contamination, or occupational health hazards until we develop a better data base on chemicals in common use. This bill begins to attack that problem, and it does so by starting in the obvious place: with the largest volume chemicals. It does so by establishing a presumption that large volume chemicals should be tested and it calls on EPA to schedule the testing in light of priorities and availability of laboratory capacity. To avoid unnecessary testing, it sets up procedures for waivers and modifications of the testing requirement.

Mr. President, it is not going to be easy to rebuild our flimsy data base, but it must be done, and I believe the time to start is now.

A fourth improvement proposed by the bill involves improving public access to data about chemical risk. Mr. President, this is a difficult topic because these also are legitimate business concerns about trade secrets. However, the privilege of asserting claims of confidentiality has been abused. Too much is being withheld from the public. Numerous examples of clearly spurious claims have come to light, and there has been a pattern of increasing frequency of confidentiality claims.

The bill deals with this problem by discouraging frivolous claims in several ways. It also recognizes that often the business sensitivity of certain information diminishes over time. Therefore, the bill calls for periodic reassertion of confidentiality claims. Last, it provides that State regulatory agencies can have access to confidential business information under limited circumstances. These measures, I believe, will lead to better public access to information about chemical risk while not denying companies the right to assert valid claims.

Mr. President, there are a number of other provisions in this bill which I believe will improve TSCA. What I have tried to do in this explanation is hit the high points, and thereby show that there are positive steps that can be taken to improve the workings of this important law. I invite my colleagues and other interested persons to examine them and offer their comments.

This bill is a collection of thoughts on how TSCA might be modified to make it more workable. Many including GAO, OTA, the EPA and the chemical industry have made recommendations. We have collected those recommendations in this bill and offer it as a discussion document to be used over the next few months. At the beginning of the 99th Congress, we will offer a bill that will serve as a vehicle for hearings and markup.

Mr. President, I ask that the text of the bill and a staff draft analysis be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 3075

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act be cited as the "Toxic Substances Control Act Amendments of 1984."

SEC. 2. Section 2 of the Toxic Substances Control Act is amended by—

(a) deleting the semicolon and the word "and" at the end of subsection (a)(2) and inserting a comma in lieu thereof, deleting the period at the end of subsection (a)(3) and inserting thereafter new subsections as follows:

"(4) for many chemical substances and mixtures, there exists inadequate information about the toxic effects of such substances and extent of exposure to human beings and the environment; and

"(5) this lack of information impedes the identification and control of unreasonable risks presented by such chemical substances, both by regulation and by voluntary action.", and

(b) redesignating paragraphs (2) and (3) of subsection (b) as paragraphs (3) and (4), respectively, and adding a new paragraph (2) as follows:

"(2) persons who manufacture and persons who process chemical substances and mixtures have a duty to be informed about the toxic effects of such chemical substances and mixtures and to take appropriate actions to prevent exposures that might be harmful to human health or the environment."

SEC. 3. Section 3 of the Toxic Substances Control Act is amended by—

(a) deleting the period at the end of paragraph (1) and adding the phrase "or his designee.",

(b) inserting a comma and the word "and" in lieu of the period at the end of clause (ii) of paragraph (2)(A) and adding thereafter a clause as follows:

"(iii) any microorganism or other biological substance.",

(c) adding at the end of paragraph (2) a new sentence as follows:

"The term "pesticide" as used in clause (i) of this subparagraph shall not be taken to exclude from jurisdiction under this Act exposures to chemical substances which occur during the manufacture of a pesticide.",

(d) deleting the word "and" at the end of clause (i) of paragraph (12)(A), renumbering clause (ii) as clause (iii), and inserting a new clause as follows:

"(ii) environmental or human monitoring or other exposure studies, and".

TESTING OF CHEMICAL SUBSTANCES AND MIXTURES

SEC. 4. (a) Section 4 of the Toxic Substances Control Act is amended by—

(1) inserting after the first sentence of subsection (b)(2)(a) the following sentences: "Standards also may be prescribed for environmental or human monitoring or other exposure studies."

(2) amending subsection (b)(2)(B) to read as follows: "Periodically the Agency shall establish test methodology guidelines which may be used for development of data prescribed in rules under subsection (a) and in testing agreements under subsection (h). From time to time, but not less than once each five years, the Administrator shall review the adequacy of the test methodology guidelines and shall, if necessary, make appropriate revisions of such guidelines."

(3) deleting the last sentence of subsection (e)(1)(A).

(4) adding after subsection (e)(2) the following new subparagraph:

"(E) Meetings of the committee shall be open to the public and announcements of meetings shall be published in the Federal Register not less than two weeks in advance, subject to the provisions of section 14. Closed meetings may also be conducted with respect to administrative and personnel matters."

(5) inserting after the first sentence of subsection (e)(1)(A) the following sentence: "In making a recommendation under this subsection, the Committee shall identify the chemical properties or effects for which testing is recommended."

(6) adding to the end of subsection (e) the following new paragraph:

"(3) With respect to chemical substances and mixtures added to the priority list by the Committee it shall be presumed that testing for the effects recommended is needed. The manufacturers of the listed substances shall either individually or collectively submit study plans for the conduct of such testing no later than 180 days from the date of submission of the Committee's report to the Administrator; provided, however, that the manufacturers and processors of the listed substances be afforded the opportunity to provide evidence which demonstrates to the satisfaction of the Administrator that such testing is not appropriate, in whole or in part. Factors relevant to the Administrator's consideration in this regard include the existence of adequate data to reasonably determine the reasonableness of the risk presented by exposure to or release of the substance, the ability of on-going testing to provide such data, the magnitude of exposure to the substance, and such other factors as the Administrator may determine. The Administrator shall establish procedures concerning the content, form, and timing for such submissions in order to insure that all such material is received by the Agency in a timely fashion and of such a quality as to allow the Administrator to make a reasoned decision concerning the continued need for such testing. Nothing in this subsection shall preclude the Administrator from making the required findings under subsection (a) based upon the Agency's independent analysis of the issues involved. The provisions of section 4(c) shall apply to testing conducted pursuant to this subsection."

(7) adding at the end of subsection (e)(2)(A) new clauses as follows: "(ix) One member appointed by the Director of the Fish and Wildlife Service from officers or employees of the Service." "(x) One member appointed by the Chairman of the Consumer Products Safety Commission from officers or employees of the Commission. (b) Section 4 of the TSCA is amended by adding at the end thereof the following new subsection:

"(h)(1) TESTING OF LARGE VOLUME CHEMICALS.—Notwithstanding any other provision of this Act, each chemical substance which is manufactured, processed, or sold in, or is imported into, the United States in aggregate quantities of 100,000,000 or more pounds per year, shall be deemed to be subject to a test rule under this section. Each person who manufactures such chemical substance shall test it, or cause it to be tested, in accordance with the requirements of this subsection. The Administrator may permit two or more persons subject to testing requirements under this subsection with respect to any chemical substance to designate one such person or a qualified third party to conduct such tests and submit such data on behalf of the persons making the designation.

"(2)(A) EFFECTS FOR WHICH TESTING IS REQUIRED.—Except as provided in paragraph (4) of this subsection, each chemical substance to which this subsection applies shall be tested according to the schedule established pursuant to subparagraph (C) of paragraph (3) of this subsection in order to determine whether such chemical substance will persist or bioaccumulate in the environment or causes or contributes to mutagenic, carcinogenic, teratogenic (including developmental), chronic, reproductive, neurotoxic, (including behavioral), or ecotoxic effects.

"(B) TEST PROCEDURES AND GUIDELINES.—The tests under this subsection shall be conducted in accordance with test guidelines issued pursuant to this section (except as otherwise permitted pursuant to subparagraph (C), with regulations under this section prescribing good laboratory practice, and with applicable procedures for test sequencing and reporting of test results. The procedures referred to in the preceding sentence shall be promulgated by the Administrator, after notice and opportunity for public comment, not later than two years after date of enactment of this subsection (and may be modified by rule from time to time thereafter).

"(C) ALTERNATIVE OR INNOVATIVE TEST METHODS AND PROCEDURES.—In order to encourage the development and use of innovative, less expensive, and at least equally effective test methods and procedures for the effects listed in this paragraph in lieu of current methods and procedures, the Administrator may, by rule, establish procedures for the submission, expeditious review, and approval (or disapproval) of alternative test guidelines or procedures for the purpose of satisfying test requirements under this subsection.

"(3)(A) LISTING PROCEDURE.—Not later than three months after the enactment of this subsection, the Administrator shall publish for comment in the Federal Register an initial list containing each chemical substance which he believes, on the basis of information available to him at that time, meets the requirements of paragraph (1) of this subsection. Not later than nine months after enactment of this subsection, the Administrator shall publish in the Federal Register a final list of each chemical substance which he believes, on the basis of information available to him at that time, meets the requirements of paragraph (1) of this subsection. The Administrator may from time to time thereafter amend the list to include other chemicals which meet the requirement of paragraph (1) of this subsection. Upon a satisfactory showing by any manufacturer of a chemical substance contained on such list that such chemical substance—

"(i) does not meet the requirements of paragraph (1), or

"(ii) is not likely to meet the requirements of paragraph (1) in the next five years,

the Administrator may remove such chemical substance from such list.

"(B) SECTION 8 RULES.—Each manufacturer of a chemical substance on the final list under subparagraph (a) shall, as of the date of its inclusion on such list in the Federal Register, be deemed subject to generally applicable reporting rules under section 8(a) and health and safety study submission rules under section 8(d), with respect to such chemical substance. Each manufacturer shall cease to be subject to such rules with respect to such chemical substance on the earlier of the following dates:

"(i) the date on which such chemical substance is removed from the list pursuant to subparagraph (A); or

"(ii) the date which is five years after the date on which the last data are received by the Environmental Protection Agency pursuant to a testing program which meets the requirements of this section.

"(C) Test Scheduling. Not later than one year after the enactment of this subsection, the Administrator shall designate chemical substances from the final list pursuant to paragraph (A) of this subsection and publish in the Federal Register a five-year schedule for the initiation of testing of chemical substances selected from the list. The number of substances designated and the schedule of testing shall be such as to make maximum use of available testing facilities. The order and scheduling of testing of chemical substances shall be in descending order from highest production volume to lowest production volume unless the Administrator decides, in his discretion, to accord higher priority to a particular chemical substance because of

"(i) significant or widespread exposure to human beings or the environment;

"(ii) structural similarity to a chemical substance known to be or suspected of being toxic; or,

"(iii) other factors that the Administrator deems appropriate.

"The schedule under this subparagraph shall include requirements for the timely completion of required tests and the submission of test results. The Administrator shall from time to time, but in no case less frequently than every two years, revise and extend the five year schedule to incorporate additional chemical substances and testing requirements.

"(4)(A) EXEMPTIONS AND MODIFICATIONS.—The Administrator may, from time to time after notice and opportunity for public comment in accordance with 5 U.S.C. 553, promulgate regulations authorizing the exemption of one or more of the chemical substances subject to this subsection from one or more of the requirements of this subsection (or the modification of any such requirement with respect to one or more chemical substances).

"(B) An exemption or modification may be issued by the Administrator pursuant to regulations under this paragraph only upon a demonstration by a manufacturer satisfactory to, and a finding by, the Administrator that

"(i) the requisite test has previously been performed, or is currently being performed, in accordance with adequate test protocols for the effect in question;

"(ii) the test is not necessary because exposure of the chemical substance to human beings or the environment is, and will be, insignificant in extent, duration, and intensity; or

"(iii) the test cannot be performed, or the results would be meaningless, for the particular chemical substance for technical reasons.

"(5)(A) CERTIFICATION OF TEST RESULTS.—Upon completion of any required phase of testing under this subsection and upon completion of the final portion of the testing required by this subsection for each chemical substance, each person to which the requirements of this subsection applies shall submit, in addition to the requisite data and reports, a certification which meets the requirements of subparagraph (B).

"(B) A satisfactory certification under this paragraph shall—

"(i) be signed by a designated officer of each manufacturer of the chemical substance which is subject to the testing requirements of this subsection, on behalf of such manufacturer;

"(ii) be co-signed by a designated officer of each corporation or other entity which conducted the tests of the chemical substance on behalf of such manufacturer (if different from the manufacturer);

"(iii) certify that the data and reports submitted are complete and accurate in all material respects and have been produced in accordance with applicable test guidelines

and procedures, with good laboratory practice rules promulgated by the Agency, and with all other requirements of this subsection;

"(iv) certify that such chemical substance has been found to be positive, negative, or equivocal with respect to each effect listed under paragraph (2) of this subsection; and

"(v) contain such other information as the Administrator may reasonably require by rule, promulgated after notice and opportunity for public comment in accordance with 5 U.S.C. 553.

"(C) The Administrator may, by rule after notice and opportunity for comment, establish procedures, criteria or standards for assessing the results of tests under this subsection and for determining whether such results should be deemed to be positive, negative, or equivocal for the purpose of subparagraph (B)(iv).

"(D) Inspection and Audit.—The Administrator may by order or regulation, or a combination thereof, institute or require such independent inspection and audit measures (including use of Agency personnel or contractors) as are reasonably necessary to assure compliance with this subsection and to verify the completeness and accuracy of certifications made under this subsection.

"(6) At least quarterly, the Administrator shall publish in the Federal Register a summary of the certifications submitted during the preceding three months with respect to each chemical substance under paragraph (5)(B)(iv) of this subsection.

"(7) Nothing in this subsection shall be construed to restrict or limit the Administrator's authority on duty under any other provision of law."

(c) Section 15 of the Toxic Substances Control Act is amended by striking out "or" after paragraph (3) thereof; by striking out the period at the end of paragraph (4) and inserting "; or" in lieu thereof, and by inserting a new paragraph (5) as follows:

"(5) fail or refuse to comply with any requirement of section 4(h), or to provide a false or misleading certification under section 4(h)."

(d) Section 16 of the Toxic Substances Control Act is amended by—

(a) inserting a new sentence after subsection (a) thereof as follows:

"Each day after a false or misleading certification is made under section 4(h) shall constitute a separate violation of section 15 until the day such certification is withdrawn and a complete and accurate substitute certification is filed in its place."

(b) inserting at the end thereof the following new subsection:

"(c) Disqualification.—Any corporation or other entity which makes a certification under section 4(h)(5)(B)(ii) which it knows or should have known is false or misleading shall be disqualified from making further certifications under section 4(h) for a period of five years (or such longer period as may be determined by the Administrator after notice and opportunity for a hearing on the record.)"

(e) Section 3 of the Toxic Substances Control Act is amended by inserting at the end thereof the following:

"(15) The term 'person', when used in sections 15 and 16 of this Act for the purpose of ensuring compliance with the certification requirements of section 4(h), shall include corporate officers and officers of other entities, in their personal as well as official capacities."

(f) Section 4 of the Toxic Substances Control Act as amended is amended by adding at the end thereof the following new subsections:

"(i)(1) Negotiated Testing Agreements.—If the Administrator determines that adequate test data can be developed more promptly under a negotiated agreement than under a test rule, the Administrator may negotiate such an agreement with any person, or group of persons, who manufacturers or processes or intends to manufacture or process a chemical substance or mixture pursuant to which agreement such person or group of persons, shall conduct testing of such substance or mixture. Such an agreement shall include the elements described in subsections (b)(1)(A), (B), and (C) of this section.

"(2) The text of a proposed agreement shall be published in the Federal Register, and the Administrator shall provide a period of not less than 60 days for public comment. The Administrator shall maintain a record of all information and data regarding any agreement under the subsection which information shall be public, subject to section 14. No such agreement may be based in whole or in part on any information or data which has not been placed in such record and that portion of the record which is not confidential in accordance with section 14 shall provide a reasonable basis for the agreement.

"(3) Upon petition of any person or on the Administrator's own motion, the Administrator may reopen any agreement entered into under this subsection if the Administrator determines that changed circumstances of law or fact require that such agreement be modified.

"(4) Nothing in this subsection shall be construed to affect the authority of the Administrator to subsequently promulgate a rule under subsection (a) for any chemical substance or mixture which is the subject of an agreement under this subsection.".

"(5) In the event that a person or group of persons who have agreed to conduct testing under this subsection fails to conduct such testing, in whole or in part, in accordance with the agreement, the Administrator shall promptly promulgate a test rule under subsection (a) of this section to require that such testing be performed. In promulgating a test rule pursuant to the requirements of this paragraph, the Administrator shall not be required to make the findings specified in subsection (a) of this section.

(g) Section 4(f) of the Toxic Substances Control Act is amended by—

(1) inserting "(1)" before the first sentence and changing "(1)" and "(2)" to "(i)" and "(ii)", respectively, and

(2) adding at the end thereof the following:

"(2) When the Administrator has made the requisite finding under paragraph (1)(ii) of this subsection that there may be a reasonable basis to conclude that a chemical substance or mixture presents or will present a significant risk of serious or widespread harm to human beings from cancer, gene mutations, or birth defects, and when the Administrator finds that the Agency's ability either to initiate appropriate action under section 5, 6, or 7 to prevent or reduce to a sufficient extent such risk or to make a finding that such risk is not unreasonable is limited due to the lack of relevant data concerning exposure, release, or effects, to satisfy the requirements of subsection (1) the Administrator may perform or contract to perform such additional testing and exposure studies as in the Administrator's judgment are reasonable and necessary to initiate such appropriate action, provided that such activities are initiated with the time period specified in subsection (1) and that an explanation of the Administrator's actions is published in the Federal Register within the time period specified in subsection (1). The Administrator may seek reimbursement for the costs of such reasonable and necessary testing and exposure studies from the manufacturers and processors of the chemical substances as to which action is required under subsection (1). The Administrator may adopt procedures concerning obtaining reimbursement from such parties."

NEW CHEMICAL REVIEW PROGRAM

Sec. 5. (a) Section 5(a)(1) of the Toxic Substances Control Act is amended by:

(1) deleting paragraph (B) and inserting in lieu thereof the following:

"(B) manufacture or process any chemical substance in a manner or for a use that the Administrator has determined, in accordance with paragraph (2), may lead to significant new exposure to human beings or significant new release to the environment," and,

(2) adding at the end thereof the following:

"If after reviewing a notice submitted under this subsection, the Administrator determines that he will not take action concerning such notice under sections 5(e), 5(f), 6, 7 or 8 of this Act, he may, in his sole discretion, notify in writing the person who submitted the notice of his determination. Upon receipt of such notification, the person who submitted the notice may commence manufacture or processing of the chemical substance that was the subject of the notice for the uses specified in the notice."

(b) The portion of Section 5(a)(2) of the Toxic Substances Control Act that precedes subparagraph (A) is amended to read as follows:

"With respect to the requirement for notification under paragraph (1)(B), the Administrator may determine that the manufacturing or processing of a chemical substance or the use of a chemical substance may lead to a significant new exposure to human beings or significant new release to the environment. Such determination shall be made by rule after consideration of such relevant factors as—"

(c) Section 5(b)(2)(B) of the Toxic Substances Control Act is amended by deleting the phrase "the person submitting the data believes shows" and inserting in lieu thereof the phrase "demonstrates to the satisfaction of the Administrator".

(d) Section 5(d) of the Toxic Substances Control Act is amended by:

(1) deleting subparagraph (B) and (C) of paragraph (1) and inserting in lieu thereof new subparagraphs as follows:

"(B) specific information and data concerning (i) the physical and chemical properties of the chemical substance, (ii) the physical hazards and toxicological properties associated with the chemical substance, and (iii) the manner, duration, magnitude and extent of exposure to human beings or release into the environment, and

"(C) based on such data and information, a reasoned evaluation of the potential acute and chronic human health effects and adverse environmental effects of the substance under its anticipated conditions of manufacture, processing, distribution in commerce, use and disposal."

(2) by renumbering paragraphs (2) and (3) as paragraphs (3) and (4) respectively and inserting after paragraph (1) the following:

"(2)(A) Except as provided in subparagraph B of this paragraph, the data required by subparagraph (B) of paragraph (1) of this subsection shall include the test data recommended for use in evaluating the chemical properties and potential human health and environmental effects of new chemical substances recommended by the Organization for Economic Cooperation and Development.

"(B) A person submitting a notice pursuant to subsection (a) of this section may omit an element of test data otherwise required by paragraph (A) of this subsection upon a showing, satisfactory to the Administrator, that—

"(i) the element of test data cannot be obtained because it is not possible, for technical reasons, to perform the required test on the chemical substance or mixture;

"(ii) the element of test data is not needed in order to permit a reasoned evaluation of the health and environmental effects of the chemical substance, or,

"(iii) conditions of manufacture or intended use, or other aspects of potential exposure to human beings or the environment, are such that the chemical substance will not present an unreasonable risk of injury to the health of any person or to the environment.

Each chemical substance or mixture for which an element of test data is omitted on the basis of the factors set forth in clause (ii) shall be deemed subject to the requirements of subsection (a)(1)(B) with respect to any material change in such factors."

(e) Sections 5(e) of the Toxic Substances Control Act is amended by—

(1) By amending subparagraph (1)(B)(ii) to read as follows:

"(ii) unless the Administrator has, on or before the issuance of the proposed order, notified, in writing, the manufacturer or processor who submitted the notice under subsection (a) for such substance to which the proposed order would apply of the determinations which underlie such order."

(2) By amending subparagraph (C) and adding new subparagraphs (D), (E), (F), and (G) to paragraph (1) to read as follows:

"(C) If the manufacturer or processor notified of a proposed order under subparagraph (B), or a person who is likely to obtain the chemical substance directly or indirectly from such manufacturer or processor, files with the Administrator (within the 30-day period beginning on the date such manufacturer or processor received the notice required by subparagraph (B)(ii)) objections specifying with particularity the provisions of the order deemed objectionable and stating the grounds therefor, the proposed order shall not take effect unless the Administrator takes the actions in subparagraph (D)(ii).

"(D) The Administrator shall consider any objections filed under subparagraph (C) and shall determine whether the contents thereof change the Administrator's determinations under subparagraph (A).

"(i) If the Administrator determines that there is no longer a basis for issuing an order under subparagraph (A), the Administrator shall, before the end of the notification period, notify, in writing, the manufacturer or processor, and any person who filed objections, that the order has been withdrawn and the reasons therefor.

"(ii) If the Administrator determines that there is a basis for issuing an order under subparagraph (A), the Administrator shall, before the end of the notification period, notify, in writing, the manufacturer or processor, and any person who filed objections, that the order will take effect on the expiration of the notification period and shall include the reasons therefor and responses to any objections. In taking such an action, the Administrator may modify the order, or the determinations supporting it, as appropriate, in response to any objections under subparagraph (C).

"(E) An order issued under this subsection shall apply to the manufacturer or processor who submitted the notice for the chemical substance under subsection (a). The Administrator may also provide that the order shall apply to any other person (i) who manufacturers the substance for the manufacturer or processor or (ii) who processes, distributes in commerce, uses, or disposes of the chemical substance after obtaining the chemical substance, directly or indirectly, as a chemical substance or as part of a mixture, from such manufacturer or processor, whether the person was a party to the issuance of the order or not; however, such order shall not apply to any person who has not received direct notice of the order either from the Administrator or under subparagraph (F).

"(F) An order issued under this subsection may require any person subject to the order who distributes in commerce the chemical substance, either as a chemical substance or as part of a mixture, to provide a copy of the order to persons to whom the substance is distributed.

"(G) Any person subject to an order under this subsection who complies with the provisions of such order shall be considered in compliance with this Act with respect to those activities that are subject to the order."

(3) By amending paragraph (2) to read as follows:

"(2) If an order becomes effective under paragraph (1)(D)(ii), a person who filed objections with the Administrator under paragraph (1)(C) may commence a civil action in the United States District Court for the District of Columbia or the United States district court for the district in which the person resides or has his principal place of business for review of the Administrator's decision to issue the order. Any such action shall be filed within 60 days after the order becomes effective. The district court shall have jurisdiction to review such order in accordance with chapter 7 of title 5, United States Code. This paragraph is the exclusive remedy for judicial review of an order under this subsection."

(f) Section 5(h)(3) of the Toxic Substances Control Act is amended by striking the initial "The" and inserting in lieu thereof the following:

"Except for the release into the environment of genetically engineered microorganism, the".

(g) Section 5(i) of the Toxic Substances Control Act is amended by deleting the closing period and inserting in lieu thereof a comma and the phrase "except that with regard to release of genetically engineered microorganism into the environment these terms shall mean manufacturing and processing for research purposes as well as commercial purposes."

(h) Section 5 of the Toxic Substances Control Act is amended by inserting at the end thereof the following new subsection:

"(j)(1) Not later than one year after enactment, the Administrator shall promulgate a list of categories of chemical substances pursuant to section 5(b)(4)(A). Except as provided in paragraph (2) of this subsection, such list shall contain at a minimum the categories of chemical substances described in the following table:

Simple acrylates containing fewer than 12 carbon atoms Polycrylates of molecular weight less than 1,000 Aromatic amines and aromatic azo compounds that contain: Phenylenediamine; anisidine; cresidine; naphthylamine; aminostilbene; aminonanthraquinone; benzidine; aminobiphenyl; tolidine; toluidine; methylenedianiline; oxydianiline; thiodianiline; and nitroaniline.

Dithiophosphate esters.—Epoxides: epoxide containing substances including glycidyl ethers, esters and amines.

Glycol ethers.—Phthalates: Alkyl and alkoxy phthalate esters containing fewer than 12 carbon atoms.

Polyhalogenated aromatics.—Pyridines: Substituted with alkyl, aminoalkyl, halogen, nitrile, and nitro groups.

Quaternary ammonium compounds.—Ureas, thio, and alkyl

"(2) The Administrator may, by rule, delete from or refine the list of categories of chemical substances set forth in the Table in paragraph (1) of this subsection on the basis that the chemical substances thus removed from the list do not meet the requirements of section 5(b)(4)(A)."

SEC. 6. (a) That portion of section 6(a) of the Toxic Substances Control Act that precedes paragraph (1) is amended by inserting a semicolon after the word "risk" the second time it appears in the sentence and deleting the phrase "using the least burdensome requirements:".

(b) Section 6(a)(1)(A) of the Toxic Substances Control Act is amended by inserting a comma after the word "commerce", and inserting thereafter the phrase "use, or disposal".

(c) Section 6(a)(1)(B) of the Toxic Substances Control Act is amended by deleting the word "or" where it appears after the word "processed", inserting a comma after the word "commerce", and inserting thereafter the phrase "used or disposed of."

(d) Section 6(a)(2) of the Toxic Substances Control Act is amended by deleting the period at the end of subparagraph (B), inserting in lieu thereof a comma, inserting thereafter the word "or", and inserting the following subparagraph:

"(C) limiting the manufacturing, processing, distribution in commerce, use, or disposal of such substance or mixture, where such activities give rise to release to the environment or human exposure in excess of levels specified by the Administrator in a rule imposing the requirement."

(e) Section 6(a)(3) of the Toxic Substances Control Act is amended by inserting after the word "its" in the fourth line the phrase "manufacture, processing,".

(f) Section 6(a)(5) of the Toxic Substances Control Act is amended by deleting the phrase "commercial use" and inserting in lieu thereof the phrase "manufacture, processing, distribution in commerce, use, or disposal".

(g) Section 6(c)(1) of the Toxic Substances Control Act is amended by deleting the two sentences that follow subparagraph (D), by renumbering paragraphs (2) and (3) as paragraphs (3) and (4), respectively, and by inserting a new paragraph (2) as follows:

"(2) In promulgating a rule under subsection (a) with respect to a chemical substance or mixture, the Administrator shall make a reasonable attempt to impose the least bur-

densome requirements consistent with the primary goal of abating unreasonable risk to human health or the environment in a timely manner. The Administrator's judgment in this regard is discretionary and shall not be overruled in response to a challenge to such requirement except to the extent that it is arbitrary and capricious."

(h) Section 6(c)(5) of the Toxic Substances Control Act is amended by deleting the word "and" and inserting after "(4)" the phrase "and (5)".

SEC. 7. (a) Section 8(a) of the Toxic Substances Control Act is amended by—

(1) by amending paragraphs (1)(A) and that part of paragraph (1)(B) that precedes clause (i) to read as follows:

"(A) each person (other than a small manufacturer, processor, distributor, user, or disposer) who manufactures, processes, distributes in commerce, uses, or disposes of, or who proposes to manufacture, process, distribute in commerce, use, or dispose of a chemical substance (other than a chemical substance described in subparagraph (B)(ii)) shall maintain such records, and shall submit to the Administrator such reports, as the Administrator may reasonably require, and

"(B) each person (other than a small manufacturer, processor, distributor, user, or disposer) who manufactures, processes, distributes in commerce, uses, or disposes of, or who proposes to manufacture, process, distribute in commerce, use, or dispose of—"

(2) adding the following new paragraph (4):

"(4) As an alternative to a rule under paragraph (1), the Administrator may, by written request, require any person who manufactures, processes, distributes in commerce, uses, or disposes of a chemical substance to submit such information as the Administrator may reasonably require to carry out this Act. Such a request shall be delivered to the person, shall specify with particularity the information required, and shall provide a reasonable time for response. The person must provide the requested information insofar as known to the person or reasonably ascertainable at the time of the request."

(b) Section 8(a)(2) of the Toxic Substances Control Act is amended by—

(1) in the second and third lines of subparagraph (C), inserting a comma after the word "manufactured," deleting the word "or", and inserting after the word "processed" the phrase "used or disposed of";

(2) inserting after the word "byproducts" in subparagraph (D) the phrase "and impurities";

(3) inserting after the word "duration" in subparagraph (F) the phrase "and extent"; and

(4) inserting after subparagraph (G) two new subparagraphs as follows:

"(H) The delivery movement, or holding of chemicals, including the quantity, the date of shipment, and receipt, and the consignor and consignee.

"(I) Such data as may be reasonably necessary to evaluate the economic consequences of activities undertaken pursuant to this Act."

(c) Section 8(a)(3) of the Toxic Substances Control Act is amended to read as follows:

"(3)(A) The Administrator may by rule require a small manufacturer, processor, distributor, user, or disposer of a chemical substance or mixture—

"(i) subject to a testing agreement under section 4 or a rule proposed or promulgated under section 4, 5(a)(2), 5(b)(4), or 6, or an order in effect under section 5(e),

"(ii) with respect to which relief has been granted pursuant to a civil action brought under section 5 or 7, or

"(iii) where the Administrator has reason to believe that the activities of such small manufacturer, processor, distributor, user or disposer of such chemical substance or mixture may present an unreasonable risk of injury to health or the environment and where additional information is needed to ascertain the nature and extent of such risk,

to maintain such records on such substance or mixture, and to submit to the Administrator such reports on such substance or mixture, as the Administrator may reasonably require. A rule under this clause requiring reporting may require reporting with respect to the matters referred to in paragraph (2).

"(B) The Administrator, after consultation with the Administrator of the Small Business Administration, shall by rule prescribe standards for determining the manufacturers, processors, distributors, users, and disposers which qualify as small manufacturers, processors, distributors, users, and disposers for purpose of this paragraph and paragraph (1)."

(d) Section 8(b)(1) of the Toxic Substances Control Act is amended by inserting at the end thereof the following: "The Administrator shall publish a current inventory of chemical substances as required by this paragraph at least every five years."

SEC. 8. Section 9 of the Toxic Substances Control Act is deleted in its entirety and is replaced by the following:

"SEC. 9. COORDINATION WITH OTHER FEDERAL LAWS

"(a) COORDINATION.—In administering this Act, the Administrator shall consult and coordinate with the Secretary of Health, Education and Welfare and the heads of any other appropriate Federal executive department or agency, any relevant independent regulatory agency, and any other appropriate instrumentality of the Federal Government for the purpose of achieving the maximum enforcement of this Act while imposing the burdens of duplicative requirements on those subject to the Act and for other purposes. The Administrator shall, in the report required by section 30, report annually to the Congress on actions taken to coordinate with such other Federal departments, agencies, or instrumentalities.

"(b) OCCUPATIONAL SAFETY AND HEALTH.—In exercising any authority under this Act, the Administrator shall not, for purposes of section 4(b)(1) of the Occupational Safety and Health Act of 1970, be deemed to be exercising statutory authority to prescribe or enforce standards or regulations affecting occupational safety and health."

SEC. 9. Section 12 of the Toxic Substances Control Act is amended by—

(a) inserting before the phrase "under section 4" in subsection (b)(1) the phrase "by a test rule or a testing agreement.", and

(b) deleting subsection (a), striking the subsection designation "(b)", and redesignating paragraphs (1) and (2) of subsection (b) as subsections (a) and (b), respectively.

SEC. 10. Section 14 of the Toxic Substances Control Act is amended by:

(a) inseting after "employee of the United States in subsection (a) the phrase "or any State";

(b) redesignating paragraphs (3) and (4) of subsection (a) as (4) and (5), respectively, and inserting a new paragraph (3) as follows:

"(3) shall be disclosed to any officer or employee of any State

"(A) in connection with the official duties of such officer or employee under any law for the protection of health or the environment, or

"(B) for specific law enforcement purposes provided such State has adopted authorities and procedures for the protection of such information that will provide protection substantially equivalent to that provided by this Act."

(c) deleting the phrase "this Act" from paragraph (4) of subsection (a) and inserting in lieu thereof the phrase "any Federal or State law intended to protect health or the environment,"

(d) redesignating paragraph (2) of subsection (c) as paragraph (4) and inserting new paragraphs as follows:

"(2) each designation under paragraph (1)(A) shall include a statement of justification that

"(A) describes the harm to the competitive position of the entity submitting the data that would result from release of the data, and

"(B) in the case of designations concerning data in health and safety studies, explains how release of such data would disclose processes used in the manufacturing or processing of a chemical substance or mixture or, in the case of a mixture, would disclose the portion of a mixture comprised by any of the chemical substances in the mixture.

"(3) Each designation under paragraph (1)(A) shall be signed by an officer of the entity submitting the data and shall include an affirmation by such official of his belief that such designation is being made validly."

(e) inserting at the end of subsection (c) the following new paragraphs:

"(5) Designations of confidentiality of data made in a notice required by section 5(a)(1) shall remain in effect until such time as the chemical substance is manufactured. At the time that manufacturing commences, the persons that submitted the notice may designate again the data that he believes is entitled to confidential treatment under subsection (a), in accordance with the requirements of this subsection.

"(6) Except as provided in paragraph (5) of this subsection, any designation of data for confidential treatment made under paragraph (1) of this subsection shall remain in effect for three years from the date of such designation, subject to disclosure of such data under the provisions of this section. Such designations may be renewed for additional 3-year periods in accordance with the requirements of this subsection and in such manner as the Administrator my prescribe.",

(f) inserting after the phrase "employee of the United States" at each place it appears in subsection (d)(1) the phrase "or any State"; and,

(g) inserting before the phrase "shall be guilty of misdemeanor" in the first sentence of subsection (d) the phrase "and any person who solicits such disclosure or obtains such material knowing that its release was unlawful,".

(h) inserting after "section 4" in clause (ii) of subsection (b)(1)(A) the phrase "by a test rule or a testing agreement".

SEC. 11. Section 25 of the Toxic Substances Control Act is amended by adding at the end thereof the following:

"(c) The Administrator shall, within one year of enactment of this subsection, submit a report to the Congress on (1) the extent to which the authorities in sections 4, 8, and 11

of this Act could be used to provide information that directly would support the activities of other programs administered by the Environmental Protection Agency and of other agencies that have the authority to regulate the risk presented by chemical substances and mixtures, (2) the extent to which these authorities have been used for this purpose, and (3) the factors that inhibit greater use of these authorities for this purpose.

"(d) The Administrator shall, within one year of enactment, submit a report to the Congress on the relationship between the authorities and requirements under this Act and the activities of small businesses. Such report shall, at a minimum, include a discussion of the following:

"(1) the need for a uniform definition of "small business" for purposes of this Act, and the extent to which such a definition would support or inhibit effective implementation of this Act;

"(2) the extent to which the small business exemption in section 8 of this Act may be preventing the Agency from receiving reports related to the risks presented by chemical substances and mixtures, which risks might be regulated by this Act or other laws were they known; and

"(3) innovative and alternative approaches to regulating the activities of small businesses to achieve the purposes of this Act in a more cost effective manner, including, if appropriate, recommendations for amendments to this Act to authorize such approaches."

DESCRIPTION OF BILL TO AMEND THE TOXIC SUBSTANCES CONTROL ACT

FINDINGS, POLICY AND INTENT

Section 2 of the bill expands the Toxic Substances Control Act Statement of Findings and Policy. The additional findings concern the present dearth of toxicity and exposure information about many chemical substances and the need for such information to support both voluntary and regulatory chemical risk reduction actions. Both findings have been demonstrated in hearings before the Subcommittee on Toxic Substances and Environmental Oversight.

TSCA's statements of policy presently assert that toxicity data should be developed by chemical manufacturers and processors. The statements of policy added by the bill go on to say that chemical manufacturers and producers should be informed about the toxic effects of their products and take appropriate actions to prevent harmful exposure.

DEFINITIONS

Section 3 of the bill amends the definitions in TSCA section 3.

Subsection (a) clarifies that the Administrator may delegate his functions under TSCA if he so chooses.

Subsection (b) states that the term "chemical substance" includes microorganisms or other biological substances. The effect of this amendment is to clarify that TSCA can be used to regulate the release of certain genetically engineered microorganisms as well as the manufacture of chemical substances by biological methods.

Subsection (c) clarifies that the exclusion of pesticides from TSCA jurisdiction does not include chemical substances that occur during the manufacture of a pesticide. This amendment is consistent with EPA policy and practice.

Subsection (d) expands the definition of "standards for the development of test data" to include exposure monitoring studies. This change makes this definition comport with the existing definition of "health and safety study", which includes exposure studies, and is consistent with amendments to section 4 (Chemical Testing) which authorize the use of TSCA to require exposure monitoring studies as well as toxicity testing.

TESTING OF CHEMICAL SUBSTANCES AND MIXTURES

Section 4 of the bill amends Section 4 of TSCA, which establishes EPA's authority to require chemical manufacturers and processers to test chemical substances.

The amendments are designed to streamline the process of interagency designation of and subsequent testing of high priority chemicals, establish a new program of testing for large volume chemicals, and improve the Agency's ability to respond promptly, as required by present law, to information about chemicals that may cause cancer, genetic damage or birth defects. The following discussion establishes a context for these amendments.

Section 4 of TSCA authorizes EPA to require that chemical substances be tested. EPA may select any chemical for testing, provided the required statutory findings can be made. However, it must respond within one year, either by initiating a test rule or publishing a notice explaining why testing is not needed, to recommendations for priority testing made by an Interagency Testing Committee (ITC). After being sued for repeated failure to meet the one year deadline, EPA has, under court order, recently caught up with ITC designations. However, the Agency has never initiated a test rule on a chemical of its own choosing; it has dealt only with chemicals recommended by the ITC. Further, the Agency has never finalized a test rule under section 4. Instead, it has created a system of negotiated testing agreements. EPA argues that, by negotiating testing agreements with companies that otherwise could be subjected to a test rule, the needed testing can be accomplished much more quickly than if the Agency were to use lengthy and laborious notice-and-comment rulemaking procedures. Critics argue that bypassing rulemaking procedures frustrates opportunity for citizen comment and challenge, that testing agreements are unenforceable, and that such agreements fail to trigger other sections of TSCA that cross-reference to *rules* under section 4.

At the present time, 21 chemicals and chemical categories have been tested or are being tested under negotiated testing agreements. However, a District Court recently found these agreements unlawful because they are not authorized by the statute, and it ordered EPA to initiate rulemaking on all present and future testing.

One of the reasons the test rule process runs slowly is that the ITC and EPA engage in redundant analysis. The ITC examines available information on toxicity and exposure in order to determine whether a testing recommendation for a particular chemical is warranted. EPA then undertakes a similar analysis to support a proposed test rule. Subsection 4(a)(6) of the bill would accord greater weight to the ITC's recommendation by establishing a statutory presumption that an ITC recommendation is appropriate and that a priority chemical recommended by the ITC should be tested, while allowing persons who would perform the testing the opportunity to provide evidence which demonstrates that testing is not needed. The effect of this amendment is to save time and avoid redundancy by relieving EPA of the necessity of independently supporting a proposal for testing when the Interagency Testing Committee already has determined that priority testing is needed because of perceived potential risk. Test rules for other chemicals (i.e., those not analyzed by the Interagency Testing Committee) would not be affected.

Subsection 4(f) of the bill authorizes negotiated testing agreements in lieu of test rules when the Administrator determines that adequate test data can be obtained more quickly in this way. The amendment requires the establishment of a publicly available record to support the adequacy of the agreement, calls for a public comment period, and provides opportunity for agreements to be reopened under certain circumstances. In addition, it requires EPA immediately to promulgate a test rule if a chemical manufacturer or processor reneges on a testing agreement, and it relieves the Administrator of the requirement to make the usual threshold findings in this circumstance.

TESTING LARGE VOLUME CHEMICALS

A recent study by the National Academy of Sciences found that few chemicals have been adequately tested for their toxic effects, even the large volume chemicals that often lead to significant human and environmental exposure. Section 4(b) of the bill would establish a new program for testing large volume chemicals whose manufacturing or processing exceeds 100 million pounds per year. The bill would establish as a matter of law that such chemicals should be tested by their manufacturers or processors for an array of health and environmental effects. EPA would be required to administer the program by listing the high volume chemicals and exempting chemicals from certain tests or modifying the testing requirements as needed. Exemptions or modifications could be obtained for a particular chemical by showing that adequate data already exist, that a particular test cannot be performed for technical reasons, or demonstrating that, notwithstanding the large volume, actual exposure or release is not significant.

EPA also would be responsible for scheduling the testing. Scheduling is needed because all large volume chemicals cannot be tested at once due to limitations of laboratory capacity. The bill gives EPA considerable flexibility in scheduling, but requires that unless and until EPA establishes a schedule of its own testing will begin in order of production volume, with the largest volume chemicals being considered first. In scheduling testing, EPA is required to make maximum use of available testing capacity. This requirement is intended to assure that the large amount of currently unutilized laboratory capacity will be utilized and to encourage the development of additional capacity to perform toxicological tests.

The large volume testing provision also requires certification and interpretation of test results by the person performing the test, and it amends other sections of TSCA as needed to make the new program enforceable.

EXPEDITED REVIEW

Section 4(f) of TSCA requires an expedited regulatory review of chemical substances for which the Administrator receives information indicating that such substance may cause serious or widespread harm from cancer, gene mutations, or birth defects. Upon receipt of such information, the Administrator is required within 180 days

either to initiate appropriate action or publish a finding that the identified risk is not "unreasonable."

This section has proven difficult to implement. One reason is that whereas section 4(f) requires an expedited regulatory review, it does not contain provisions for expedited gathering of information that may be necessary to inform the regulatory review and to complete it within the statutory time frame. Thus, there may be enough information about a chemical to trigger the section 4(f) process, but not enough information to make the control action vs. no-unreasonable-risk decision that is required 180 days later. This conundrum has discouraged EPA's use of this section of TSCA.

Section 4(g) of the bill would provide authority for expedited information gathering to support the section 4(f) expedited review process. When the Administrator finds that the section 4(f) criteria are met but that the Agency's ability to make the required decision within 180 days is limited by lack of information concerning exposure, release, or effects, he may perform or contract to perform the needed studies during the 180 day period. He then may seek reimbursement of the costs of necessary and reasonable testing and exposure studies from the manufacturers and processors of the subject chemical substance.

The bill (in section 4(a)(1)) also authorizes the establishment of standards for environmental or human monitoring or exposure studies. The data yielded by monitoring and exposure studies is just as important for a risk assessment as is toxicity data. This amendment clarifies EPA's authority to require such studies in the same way that toxicity studies may be required.

NEW CHEMICAL REVIEW PROGRAM

Section 5 of the bill amends section 5 of TSCA, which contains the premanufacture notice (PMN) program and related authority to require notice of significant new uses of chemicals. Both programs are intended to prevent chemical risk before it occurs by allowing risk assessment prior to exposure, and to make control easier by reacting to incipient unreasonable risk *before* there is a large economic stake in a new chemical or new use.

Under the premanufacture notice program, manufacturers of new chemical substances are required to notify EPA 90 days before beginning manufacture. The notice must include basic information about chemical identity, anticipated production volume and use, and the likely human exposure and environmental release. If toxicity tests have been performed, the results must be disclosed, but there is no requirement in TSCA that any testing be performed.

Upon receipt of the notice, EPA evaluates the potential risk presented by the chemical. The Agency has discretionary authority to prohibit or limit manufacture upon a finding that the chemical "may present an unreasonable risk" but that available data are insufficient to perform a reasoned risk assessment.

The PMN program began in 1979. To date, over 4,000 notices have been reviewed and the authority to limit manufacture has been invoked a little over 100 times.

The two major problems in the PMN program are the general lack of toxicity data in premanufacture notices and the cumbersome nature of chemical specific follow up. Both are discussed below.

To perform a risk assessment, EPA must evaluate the toxicity of a new chemical. But an Office of Technology Assessment Study found that 47 percent of premanufacture notices contain no toxicity data at all. Further, EPA rarely receives a notice that contains any data about chronic health effects. Even mutagenicity screening tests, which are simple and inexpensive, are reported in only 17 percent of the notices. This lack of data significantly inhibits EPA's ability to perform the necessary risk assessments.

The difficulty of follow up of specific new chemicals was identified by the General Accounting Office as a major problem in TSCA. The problem arises in this way: Frequently, a new chemical described in a premanufacture notice is known to be toxic, but the conditions of manufacture and use that are described would lead to low exposure, and therefore low risk. In this case, EPA would not attempt to prohibit manufacture. However, once the chemical has cleared through the review process, the manufacturer (or subsequent manufacturers) are free to produce the chemical in any quantity and for any use without further review. Thus, serious health and environmental risks can arise later due to factors that were not evaluated at the time of the original notice, thus frustrating the intent of premanufacture review.

As mentioned above, TSCA provides authority to promulgate a rule that identifies "significant new uses" for a chemical. Realization of these uses at some point in the future would trigger a notice requirement, with the "significant new use" notice being reviewed like a premanufacture notice. The major problem with use of this authority is that it requires EPA to try to anticipate possible future uses which, if they arose, might present an unreasonable risk, and to be prepared to support these necessarily "soft" analyses in the context of rulemaking. And the Agency must do this on a case by case basis for each chemical that presents low risk under the conditions in the original notice but may present significant risk later. As a result of these problems, this authority has been used infrequently.

The bill would deal with the premanufacture notice data problem by calling for better information in the original notices. It would deal with the follow-up problem by making follow-up automatic in limited cases. Both new provisions are described below.

Section 5(d) of the bill would improve EPA's ability to assess chemical risk and identify toxic chemicals before they are marketed by requiring two additional elements to be included in premanufacture notices. First, the notice would include the manufacturer's evaluation of the potential risk to health and the environment presented by the chemical substances. Second, the notice would be required to contain information to support the evaluation. The bill would establish a presumption that such information would include the health and environmental effects data recommended for new chemicals by the Organization for Economic Cooperation and Development. (These recommended data for toxicity assessment of new chemicals were the result of several years' negotiation among the 24 member nations of the OECD).

The bill would not require a particular set of toxicity data on each and every chemical. Rather, it would allow the manufacturer considerable flexibility in tailoring the OECD data requirements to the characteristics of his chemical and its circumstances of use and exposure by adding, deleting or modifying tests.

In the event deletion of certain toxicity data from a notice is justified by the manufacturer on the grounds that anticipated small production volume or restricted intended use (low exposure) preclude "unreasonable risk," the bill would require a subsequent notice if those parameters later changed in a material way. This requirement means that EPA would not have to promulgate a rule in order to assure that a subsequent notice would be received on the basis of significantly changed human or environmental exposure in cases when the manufacturer justifies lack of toxicity data on the basis of low exposure.

Subsection (e) amends TSCA § 5(e), which authorizes orders to prohibit or limit manufacture of a chemical substance for which notice has been received under § 5(a) pending the development of adequate information to perform a reasoned risk assessment. The amendment changes the process for issuing a 5(e) order. Current law allows a manufacturer or processor to object to a proposed order and by that action prevent it from going into effect until the Administrator convinces a U.S. district court to issue an injunction. The amendment would allow directly affected parties to file objections, but the Administrator could put the order into effect in spite of the objections if he determines the basis for the order withstands the objections. The burden of judicial review is shifted to persons who object to the Administrator's action under 5(e) to prevent unreasonable risk.

The amendment also establishes that a 5(e) order may be applied to a person who processes, distributes in commerce, uses or disposes of the substance after obtaining it, directly or indirectly from the manufacturer who submitted the notice. This authority is necessary in order to assure that the protective requirements in a 5(e) order can, if necessary, be made to follow a chemical substance "downstream" through the marketing chain.

The bill makes three additional improvements to the existing program. First, sections 5(a)(1) and 5(b) clarify confusing language in the statute related to the significant new use notices described above. Whereas the statute speaks of significant new uses, it really is addressing significant new exposure situations. Significant new exposures may arise from changes in manufacturing processes, for example, as well as changes in literal "use". The bill would alter existing language to clarify that the intent is to obtain information about significant new exposures, however they may arise.

Second, section 5(a)(2) of the bill allows the Administrator to release a new chemical for manufacture when the notice review is completed. Presently, the 90 day notice requirement prevents manufacture for 90 days even if EPA decides early in the review process to take no action as it does on the majority of notices.

Third, section 5(h) of the bill requires implementation of the present discretionary authority under TSCA section 5(b)(4) to identify families of chemicals that are "suspect". There are certain categories of chemicals that contain many individual chemicals that are known to cause cancer or other toxic effects. New chemicals that lie within such categories inherently are suspect, and in fact EPA relies heavily on structural analogy in premanufacture notice review. The Agency has testified that it has identified internally a number of such categories. Under TSCA 5(b)(4), EPA has discretionary authority to identify these categories in a rule, but has not done so. The practical effect of such an identification is that it

shifts the burden of persuasion concerning manufacture of new chemicals within these categories to the person who intends to introduce the chemical. For these chemicals that, a priori, are suspected of being toxic, the intended manufacturer is required by present law to submit information which he believes shows that the chemical will not present an unreasonable risk.

The bill requires implementation of this authority within one year. It also references a list of chemical categories for inclusion in the list. These chemical categories were identified by EPA, with the caveat that in some cases the category may be defined more broadly than necessary. Therefore the bill authorizes EPA to delete from or otherwise modify these categories in order to remove any substances that do not meet the statutory criteria for listing.

Section 5(c) of the bill changes the responsibility of the manufacturer of a new chemical that falls within a listed category. Present law requires the manufacturer to submit information which "he believes" shows that the chemical will present an unreasonable risk. The bill would call for information that makes this showing "to the satisfaction of the Administrator." This change cures problems of enforceability associated with the present language.

Sections 5(f) and 5(g) clarify EPA's authority under TSCA to regulate the release of genetically engineered microorganisms. These language changes remove technical impediments to regulation of such releases under the premanufacture review program.

REGULATION OF CHEMICAL SUBSTANCES AND MIXTURES

Section 6 of the bill amends section 6 of TSCA, which establishes the authority and procedures for actions to regulate unreasonable risk. The purpose is to confer more flexibility and efficiency in the control of chemical risk.

Subsections (a) and (g), taken together, reduce the extensive procedural and analytical requirements that the Administrator must meet under present law before taking action under TSCA to control unreasonable risk. These requirements in present law are (1) that the Administrator show that the requirements he would impose are the "least burdensome" on the regulated party of all requirements he might have chosen and (2) that he perform extensive analyses of the relative costs and efficiencies of proceeding under TSCA in any case where another EPA law might also be used. The bill substitutes a requirement that the Administrator make a reasonable attempt to impose the least burdensome requirement, but he would not be required to prove that the requirements chosen are in fact the least burdensome. Review of the Administrator's judgement in this regard would be based on an "arbitrary and capricious" standard.

Subsections (b), (c), (d), (e) and (f) make clear that the full range of TSCA's regulatory authority under § 6(a) is applicable to the full range of activities giving rise to situations involving unreasonable risk, viz., manufacture, processing, distribution in commerce, use, and disposal.

REPORTING OF RETENTION OF INFORMATION

Section 7 of the bill amends § 8 of TSCA, which provides authority to require record keeping and reporting of information that may be relevant to the identification of situations involving unreasonable risk.

Subsection (a)(1) and (b), taken together, establish that TSCA can be used to gather information related to chemical risk in all situations that might give rise to unreasonable risk, including manufacturing, processing distribution in commerce, use and disposal. The effect is to make the authority to gather information to identify risk coextensive with the authority to regulate chemical risk expressed in TSCA § 6. Also added is new authority to require the submission of information on the economic consequences of actions under TSCA. Such information is needed to accomplish the risk/benefit analysis that is required to underlie a regulatory action under TSCA.

Subsection (a)(2) establishes letter writing authority that may be used in lieu of notice and comment rulemaking to gather information from specific and identified persons. Such a procedure will be useful when the Administrator needs information from only a small group of persons, all of whom can be readily identified. This authority is modeled on similar authority in the Clean Water Act and Clean Air Act. It can only be used to gather information that is immediately available; it cannot be used to establish a future or ongoing reporting requirement. Where the latter type of requirement is needed, EPA would use normal rulemaking procedures.

COORDINATION WITH OTHER FEDERAL LAWS

Section 8 of the bill amends the complicated and burdensome coordination requirements in present law. It deletes requirements for filing of reports, waiting periods, etc., and substitutes a requirement that TSCA implementation be coordinated with other agencies to assure maximum enforcement while imposing the least burdens of duplicative requirements.

Section 9 of the bill eliminates the general prohibition against TSCS's applicability to chemical substances and mixtures intended solely for export. The fact that a chemical is being produced for export does not preclude that manufacturing, processing, and distribution in commerce from presenting an unreasonable risk to persons within the United States or to the environment.

Section 9(b) conforms the export notification requirements to the new authority for negotiated testing agreements provided by this bill.

CONFIDENTIALITY

The amendments to TSCA section 14 in section 10 of the bill are intended to discourage spurious and excessive claims of confidentiality for the various kinds of risk-related data obtained under TSCA and to provide for access to confidential business information by state regulatory agencies.

Subsection (a), (b), (c) and (f) provide state regulatory agencies with the same access to information obtained under TSCA that presently is afforded Federal regulatory agencies.

Subsection (d) requires that claims of confidentiality be accompanied by an explanation of why the claim is justified. It also requires signoff for such claims by an officer of the entity submitting the data. These requirements preclude the present practice of extensive claims made by junior persons using the present "check-off" procedure for claiming confidential status.

Subsection (e) establishes a sunset provision for confidentiality claims, while allowing for reassertion of such claims. The commercial sensitivity of some types of information decreases over time. For example, companies generally are less concerned about disclosure of chemical identity and intended use after a new chemical has been marketed. This provision provides a mechanism for reducing, over time, the amount of confidential information related to a chemical while maintaining the opportunity to keep such claims in force.

Subsection (g) makes a person who solicits or received confidential business information illegally subject to the same penalties as a person who wrongfully discloses such data.

Section —— of the bill amends section 15 of TSCA to simplify the statement of prohibited acts in paragraph (1) and to conform to the new sampling authority provided by the bill.

STUDIES

Section 11 of the bill requires EPA to submit to Congress, within one year of enactment, two additional studies of the implementation of TSCA.

The first is a study of the degree to which the information gathering authorities in TSCA could be used and have been used to support other chemical regulatory programs. The second is a study of the relationship between TSCA implementation and the activities of small businesses.

By Mr. DURENBERGER:

S. 3076. A bill to amend section 408 of the Federal Food, Drug, and Cosmetic Act to authorize emergency action with respect to pesticide chemicals which present an imminent hazard to the public health, to revise the procedures under such section for changes in tolerances and exemptions for pesticide chemicals, and for other purposes; to the Committee on Labor and Human Resources.

PESTICIDE FOOD RESIDUE LEGISLATION

Mr. DURENBERGER. Mr. President, today I am introducing amendments to the Food, Drug, and Cosmetic Act which would tighten regulation of pesticide residues on food. EPA's delay in banning the use of the cancer-causing fumigant EDB earlier this year dramatized the defects in the law governing pesticide residues on food.

EDB had been granted an exemption from residue limits—called tolerances—in 1956 on the assumption that it did not leave any residues in food. Thus, there was no legal limit on the amount of EDB that could remain on food. EPA is supposed to set a tolerance limiting residues that is "adequate to protect the public health" and can only grant an exemption where a tolerance is not necessary to protect the public health.

But even after the Department of Agriculture informed the Food and Drug Administration in 1956 that EDB residues remained on citrus and could be dangerous, the FDA waited until 1981 to start testing for EDB on citrus. EPA did not ban EDB use on grain and citrus until the spring of 1984 after a public furor erupted following extensive publicity about the State of Florida pulling EDB-contaminated products off the shelves.

The legislation amends the law in several major ways to correct the defects which led to the EDB incident.

First, section 8 of the bill directs the Administrator of EPA to collect missing health and safety data on pesticides used on food. EPA will notify pesticide companies over a 4-year period of the missing or inadequate data that must be submitted, and the manufacturers will have 3 years to provide the missing information.

According to the December 1982 staff report of the House Agriculture Subcommittee on Department Operations, Research, and Foreign Agriculture, approximately 85 percent of current pesticides lack health and safety data. For example, 93 percent have not been tested for their ability to cause mutations, and 84 percent lack carcinogenicity tests. In the meantime, the American people continue to consume untested pesticides at the dinner table.

Second, section 6 of the bill requires the Administrator to revoke a tolerance or exemption based on false, misleading or inaccurate information. This amendment is designed to respond to the problems created by the Industrial-BioTest Laboratories [IBT] scandal. During 1976 the FDA discovered that many health and safety studies conducted by IBT had been falsified. On April 9, 1984, a Federal judge sentenced three IBT officials to jail for submitting false data. However, EPA has allowed IBT-tested pesticides used on food to remain on the market, exposing consumers to pesticides for which EPA lacks valid health and safety tests.

Third, the bill requires EPA to take action whenever the agency receives information which indicates that there is a reasonable basis to conclude that the food residues may not be safe. When the Administrator receives such information, he must issue an order to show cause why the exemption should not be revoked or the tolerance revoked or reduced. Then the manufacturer has an opportunity to show at a hearing that the food residues are safe.

Even though EPA knew after a National Cancer Institute study was issued in 1974 that EDB was a potent carcinogen, it failed to act for 10 years. An exemption for the questionable EDB substitute carbon tetrachloride and a tolerance for methyl bromide remain in place. But under this amendment, EPA could not engage in its usual delays, and would have to act to protect the public.

Fourth, the legislation requires EPA to cancel a tolerance or exemption for a pesticide that has been canceled, suspended or voluntarily withdrawn under the Federal Insecticide, Fungicide and Rodenticide Act.

This amendment codifies EPA's stated policy to eliminate food residue limits for canceled pesticides. Unfortunately, despite this policy, tolerances for many banned pesticides remain on the books.

Fifth, this bill makes it clear that pesticide residues permitted on food must be safe for consumers. This change codifies the legislative history of the pesticide section of the Food, Drug and Cosmetic Act and pertinent case law.

Sixth, the bill simplifies the current cumbersome administrative procedures governing amendment and repeal of tolerances and exemptions for pesticide residues on food. EPA is slow to amend outmoded residue limits because it must plow through a procedural labyrinth that can take 2 to 3 years to complete if industry exercises all its procedural options. Under this legislation, EPA could use an informal hearing process instead, which would preserve due process for manufacturers but provide quicker action to protect the public health.

The bill also sets up an expedited procedure EPA could use when residues of a particular pesticide on food present an imminent hazard. EPA had no such imminent hazard procedure available during the EDB crisis and was forced to act to revoke EDB's exemption under the usual cumbersone process. Because of public pressure, industry did not demand an adjudicatory hearing and referral to an advisory committee, but EPA would have had no power to act quickly if industry had exercised its procedural rights. I believe EPA should have the flexibility to act swiftly in a crisis, and this amendment provides that flexibility.

Finally, the bill requires EPA to review the exemptions from pesticide residue limits within 12 months to determine whether they are safe. Many of the 85 current exemptions were granted before the development of modern testing and are long overdue for review.

In sum, this legislation will close many of the loopholes in the law governing pesticide residues on our food. The American people expect the Government to make sure that the food they eat is not contaminated by unsafe pesticides. This food safety legislation corrects the fundamental flaws in current law and will help reduce the dose of pesticides we consumer in our daily diets.

Mr. President, I ask that the text of the bill be printed in the RECORD along with my comments today.

There being no objection, the bill was orderd to be printed in the RECORD, as follows:

S. 3076

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. (a) Section 408 of the Federal Food, Drug and Cosmetic Act (21 U.S.C. 346a) is amended by redesignating subsections (f) through (o) as subsections (g) through (p), respectively, and by inserting after subsection (e) the following:

"(f)(1) revocation of an exemption under subsection (c) from the tolerance requirements for a pesticide chemical in or on a raw agricultural commodity,

"(B) in conjunction with the revocation of such an exemption, establishment of a tolerance for the pesticide chemical covered by the exemption under which tolerance only residues of the pesticide chemical which are safe will be permitted to remain on the commodity, or

"(C) establishment of a tolerance for a pesticide chemical in or on a raw agricultural commodity which is lower than a tolerance permitted in a regulation in effect for such pesticide chemical and under which new tolerance only residues of the pesticide chemical which are safe will be permitted to remain on the commodity,

is necessary to prevent an imminent hazard to the public health, the Administrator shall, without regard to the procedures required for such action by subsections (d) and (e) or (n), by order take such action. In issuing such an order, the Administrator shall give prompt notice of the action to the person who requested the exemption or tolerance which will be changed by the order. Such an order shall be effective upon its issuance and shall be published in the Federal Register.

"(2)(A) Within five days after the publication in the Federal Register of an order issued under paragraph (1), any interested person may request the Administrator to hold a public hearing on the order. If the Administrator receives a request for a public hearing within the time period prescribed by the preceding sentence, the Administrator shall commence such hearing within five days after the receipt of the request. Within ten days after the completion of such a hearing, the Administrator shall either affirm the order which was the subject of the hearing or revise it. The Administrator shall publish any revised order in the Federal Register.

"(B) If a hearing is requested under subparagraph (A) with respect to an order issued under paragraph (1), the Administrator shall not delay the effective date of the order. Such an order may not be judicially reviewed under chapter 7 of title 5, United States Code, until the order has been affirmed or revised by the Administrator after the completion of the hearing.

"(3) The order issued under paragraph (1) may not be set aside by a court while the order is being judicially reviewed.".

(b) Section 409 of such Act (21 U.S.C. 346) is amended by inserting "(a)" after "Sec. 40." and by adding at the end thereof the following new subsection:

"(b)(1) In any case in which the Administrator of the Environmental Protection Agency issues an order pursuant to section 408(f) or section 408(n)(2) which revokes an exemption or establishes a new tolerance for a pesticide chemical in or on a raw agricultural commodity, the Administrator shall also modify the regulations under this section so as to provide for comparable and proportionate adjustments in the concentration of such residue in processed food when ready to eat.

"(2) Such modification in the regulations shall be made in accordance with the same procedure as applies to the order issued under section 408(f) or 408(n)(2), and the Administrator shall include such modification in the notification and hearing (if requested) procedures carried out under those sections.".

(c) Section 201(u) of such Act (21 U.S.C. 321(u)) is amended by adding at the end thereof the following sentence: "The term 'safe' as used in sections 406(b) and 408 means having a reasonable certainty of no harm.".

SEC. 2. Subsection (n) (as so redesignated) of section 408 of such Act is amended to read as follows:

"(n)(1)(A) Except as provided in subsection (f) and paragraph (2), an amendment of a regulation in effect under subsection (b) or (c) shall be made in accordance with the procedure prescribed by subparagraph (B).

"(B) Section 553 of title 5, United States Code, shall apply to a rule to amend a regulation in effect under subsection (b) or (c), except that the Administrator shall provide interested persons an opportunity to request, within the thirty-day period beginning on the date of the publication in the Federal Register of a notice of proposed rule making respecting such rule, an informal hearing on the rule. If no request is made within such period: the rule shall take effect as prescribed by the Administrator. If the Administrator receives a request for a hearing within the time period prescribed, the Administator shall commence such hearing within thirty days after the receipt of the request. Within thirty days after the completion of such a hearing, the Administrator shall either affirm the rule which was the subject of the hearing or revise it. A revised rule shall take effect as prescribed by the Administrator and shall be published in the Federal Register.

"(2) Upon the receipt of any information which indicates that there may be a reasonable basis to conclude that residues of a pesticide chemical permitted by a tolerance established under subsection (b) or an exemption provided under subsection (c) may not be safe, the Administrator shall, not later than ninety days after the receipt of such information, make a finding either that such tolerance or exemption is safe or that it may not be safe. If the Administrator finds that such tolerance or exemption is safe, he shall publish his finding and the basis therefor in the Federal Register pursuant to the procedures set forth in paragraph (3) of this subsection. If the Administrator finds that such tolerance or exemption may not be safe, the Administrator shall, pursuant to the provisions set forth in paragraph (3) of this subsection, publish an order in the Federal Register to show cause why the agency should not proceed to—

"(A) revoke the exemption established under subsection (c) for the pesticide chemical,

"(B) in conjunction with the revocation of such an exemption, establish a tolerance for the pesticide chemical covered by the exemption under which tolerance only residues of the pesticide chemical which are safe will be permitted to remain on a raw agricultural commodity,

"(C) establish a tolerance for the pesticide chemical in or on a raw agricultural commodity which is lower than a tolerance permitted in a regulation in effect for such pesticide chemical and under which new tolerance only residues of the pesticide chemical which are safe will be permitted to remain on the commodity, or

"(D) take any combination of the actions described in subparagraph (A) through (C).

"(3) The Administrator shall provide interested persons thrity days beginning on the date of the publication in the Federal Register, to request an informal hearing on the order issued under paragraph (2). If no request is made within such period, the order shall take effect upon the expiration of such period. If the Administrator receives a request for a hearing within the time period prescribed, the Administrator shall commence and complete such hearing within sixth days after the receipt of the request. Within thrity days after the completion of such a hearing, the Administrator shal either affirm the order which was the subject of the hearing or revise it. A reivsed order shall take effect as prescribed by the Administrator, and the Administrator shall publish it in the Federal Register.".

SEC. 3. Section 408(b) of such Act is amended—

(1) in the first sentence, by inserting a comma after "tolerances" and by striking out "to the extent necessary to protect the public health" and inserting in lieu thereof "for residues which are safe";

(2) in the second sentence, by redesignating clause (3) as clause (4) and by striking out clause (2) and inserting in lieu thereof "(2) the potential acute and chronic health hazards which may result from exposure to the residues of the pesticide chemical, including carcinogenicity, mutagenicity, and teratogenicity, (3) the combined effect upon health of combining the residue of such pesticide with the residue in or on raw agricultural commodities of other pesticide chemicals or other related substances which are poisonous or deleterious, and"; and

(3) by adding at the end thereof the following: "If the Administrator determines that a pesticide chemcial does not leave any resuidue in or on raw agricultural commodities, the Administrator shall establish a tolerance for such pesticide chemical at the limit of detection for such pesticide chemical.".

SEC. 4. Section 408(c) of such Act is amended by striking out "when such a tolerance is not necessary to protect the public health" and inserting in lieu thereof "if residues of the pesticide chemical in or on such commodities are safe".

SEC. 5. (a) Section 408(d)(1) of such Act is amended—

(1) by inserting before the semicolon in subparagraph (C) a comma and the following: "including the potential acute and chronic health hazards which may result from exposure to the residues of the pesticide chemical, including carcinogenicity, mutagenicity, and teratogenicity, and the combined effect upon health of combining the residue of such pesticide with the residue in or on raw agricultural commodities or other pesticide chemcials or other related substances which are poisonous or deleterious"; and

(2) by adding at the end thereof the following: "Data on the hazards and effects described in subparagraph (C) shall be based on well-conducted scientific studies and shall be consistent with scientific principles. In determining if studies are well-conducted and consistent with sound scientific principles, the Administrator shall review the protocols for the studies and the conclusions drawn by the persons conducting the studies and determine if the reported results of the studies support such conclusions.".

(b) Section 408(d)(5) of such Act is amended—

(1) in the first sentence by striking out ", any person adversely affected by a regulation published pursuant to paragraph (2) or (3) of this subsection, or pursuant to subsection (e)." and inserting in lieu thereof "of a regulation under paragraph (2) or (3) or under subsection (e), any interested person";

(2) in the fourth sentence, by striking out "such public hearing" and inserting in lieu thereof "such hearing";

(3) in the fifth sentence by striking out all after "hearing" and inserting in lieu thereof a period; and

(4) by striking out the seventh sentence.

SEC. 6. Subsection (g) (as so redesignated) of section 408 of such Act is amended to read as follows:

"(g)(1) Not less than thirty days before issuing a tolerance under section 408 of this Act, the Administrator shall make available to the public all data (other than data relating to manufacturing or quality control processes) submitted to or otherwise obtained by the Administrator or an advisory committee relating to the safety of a pesticide chemical.

"(2) If the Administrator finds that false, misleading, or inaccurate information was submitted in connection with the promulgation of a regulation under subsection (b), (c), or (n) or an order under paragraph (f) or (n) for a pesticide chemical in or on a raw agricultural commodity and such information is material to the promulgation of such regulation or order, the Administrator shall propose an order revoking the regulation or order, publish the order in the Federal Register, and provide interested persons an opportunity to request, within the thirty-day period beginning on the date of the publication in the Federal Register of the order, an informal hearing on the order. If no such request is made within such period, the order shall take effect as prescribed by the Administrator. If the Administrator receives a request for a hearing within the time period prescribed, the Administrator shall commence such hearing within thirty days after the receipt of the request. Within thirty days after the completion of such a hearing, the Administrator shall either affirm the order which was the subject of the hearing or revise it. The Administrator shall publish any revised order in the Federal Register.".

SEC. 7. Subsection (k) (as so redesignated) of section 408 of such Act is amended—

(a) in the first sentence by striking out "whenever in his judgment such action is deemed necessary to protect the public health" and inserting in lieu thereof "at residue levels which are safe",

(b) in the first sentence by inserting before the period "if residues of the pesticide chemical in or on raw agricultural commodities are safe", and

(c) by adding at the end thereof the following: "No tolerance or exemption established under this section shall be in effect for a period of more than 12 months. If, during the period a tolerance or exemption is in effect under this subsection for a pesticide chemical, the Administrator determines that the tolerance permits residues of the pesticide chemical in or on raw agricultural commodities which are not safe or, in the case of a pesticide chemical for which an exemption is in effect, residues of the pesticide chemical in or on such commodities are not safe, the Administrator shall consult with the Secretary of Agriculture, and by order immediately revoke the tolerance or exemption.".

SEC. 8. (a) Section 408 of such Act is amended by adding at the end thereof the following new subsection:

"(q)(1) During the four-year period beginning on the date of the enactment of this subsection, the Administrator shall conduct a survey of—

"(A) the information provided to the Administrator in connection with the proceedings undertaken under subsection (d) or (e) to establish tolerances for the pesticide chemicals for which tolerances are in effect on such date of enactment, and

"(B) information otherwise available to the Administrator with respect to such pesticide chemicals,

to determine if information described in paragraph (4) had been submitted in connection with any such proceeding or is otherwise available to the Administrator and if such information submitted to or otherwise available to the Administrator was derived from well-conducted studies and is consistent with sound scientific principles. In each year of such four-year period, the Administrator shall survey information provided or otherwise available with respect to one-fourth of the pesticide chemicals covered by such tolerances.

"(2) If the Administrator determines—

"(A) that information described in paragraph (4) was not submitted in connection with a proceeding undertaken to establish a tolerance for a pesticide chemical or is not otherwise available to the Administrator, or

"(B) that information submitted in connection with such a proceeding or otherwise available to the Administrator was not derived from well-conducted scientific studies or is not consistent with sound scientific principles, the Administrator immediately shall require the submission within sixty days of a plan for the development, as soon as is practical but not later than the expiration of three years from such date, of the information described in paragraph (4) in the case of a determination described in subparagraph (A) or submission of information derived from well-conducted scientific studies or consistent with sound scientific principles in the case of determinatioin described in subparagraph (B).

"(3) If within the time requirements of the preceding paragraph, a plan for the submission of information satisfactory to the Administrator is not submitted or such information in accordance with such a plan is not submitted, the Administrator shall revoke the tolerance in effect for such pesticide chemical under this section. If the Administrator determines that information submitted with respect to a pesticide chemical in accordance with a plan under paragraph (2) was not derived from well-conducted scientific studies or is not consistent with such scientific principles, the Administrator may take action with respect to the pesticide chemical in accordance with subsection (f) or (n).

"(4) The information referred to in paragraph (1) is information respecting—

"(A) the potential acute and chronic health hazards which may result from exposure to the residues of a pesticide chemical, including carcinogenicity, mutagenicity, and teratogenicity, and

"(B) the combined effect upon health of combining the residue in or on raw agricultural commodities of a pesticide chemical with the residues of other pesticide chemicals or other related substances which are poisonous or deleterious.

"(5) In determining if studies are well-conducted and consistent with sound scientific principles, the Administrator shall review the protocols for the studies and the conclusions drawn by the persons conducting the studies and determine if the reported results of the studies support such conclusions.".

SEC. 9. Section 408 of such Act is amended by adding after the subsection added by section 8 the following new subsection:

"(r)(1) Within 12 months after the date of the enactment of this subsection, the Administrator shall review each of the exemptions in effect under subsection (c) on such date to determine—

"(A) if a pesticide chemical which is exempt from tolerance requirements under such an exemption leaves any residue in or on raw agricultural commodities; or

"(B) if residues in or on raw agricultural commodities of a pesticide chemical which is exempt from tolerance requirements under such an exemption are safe.

"(2)(A) If the Administrator determines that there is no practical method of detecting in or on raw agricultural commodities the residues of a pesticide chemical which is exempt from tolerance requirements under an exemption reviewed under paragraph (1), the Administrator shall, by an order issued in accordance with subsection (f), revoke the exemption.

"(B) If the Administrator determines that a pesticide chemical which is exempt from tolerance requirements under an exemption reviewed under paragraph (1) does not leave any residue in or on raw agricultural commodities, the Administrator shall revoke, by an order issued in accordance with subsection (f), the exemption and shall, in accordance with such subsection, establish a tolerance for the pesticide chemical at the level of detection for such pesticide chemical.

"(C) in the case of any other pesticide chemical covered by an exemption reviewed under paragraph (1), the Administrator—

"(i) shall, by an order issued in accordance with subsection (f), revoke the exemption unless the Administrator determines that residues of the pesticide chemical in or on raw agricultural commodities are safe, and

"(ii) may, with respect to the pesticide chemical under the exemption and in accordance with such subsection, take any of the actions described in such subsection.".

SEC. 10. Section 408 of such Act is amended by adding after the subsection added by section 9 the following new subsection:

"(s)(1) The Secretary of Health and Human Services shall conduct random and selective sampling of raw agricultural commodities grown in the United States to determine if the residues of pesticide chemicals on such commodities meet the applicable requirements of this section. The Secretary shall sample a sufficient number of raw agricultural commodities to produce a statistically valid estimate of pesticide consumption and compliance with this section. Such sampling shall include selected pesticide chemicals subject to tolerance requirements, selected pesticide chemicals exempt from tolerance requirements, and selected pesticide chemicals that have been cancelled, suspended, or voluntarily withdrawn under the Federal Insecticide, Fungicide, and Rodenticide Act.

"(2) In determining which commodities to sample, the Secretary shall take into account the dietary importance of the commodities and potential for residue contamination. The Secretary shall continously evaluate the results of the random and selective sampling. The Secretary shall make a semiannual public report summarizing such results and shall use such results in the enforcement of this section.".

SEC. 11. Section 801 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 381) is amended by adding at the end thereof the following new subsections:

"(e) A raw agricultural commodity imported into the United States shall be considered adulterated unless it is accompanied by a certification by the importer that the commodity—

"(1) does not contain residues of pesticide chemicals which exceed tolerances in effect under section 408, and

"(2) does not contain residues of pesticide chemicals which are not exempt from tolerance requirements under such section and for which no tolerance has been established under such section.

Such a certification shall be made in accordance with such procedures as the Secretary of Health and Human Services shall by regulation prescribe.

"(f) The Secretary of Health and Human Services shall conduct random and selective sampling of raw agricultural commodities imported into the United States to determine if the residues of pesticide chemicals on such commodities meet the applicable requirments of section 408. The Secretary shall also conduct random sampling of the raw agricultural commodities which are imported into the United States by persons who have imported such commodities into the United States with residues of pesticide chemicals in violation of applicable tolerance requirements of section 408.

"(g) No agricultural commodity shall be imported into the United States if it contains detectable residues of a pesticide—

"(1) that has been cancelled, suspended, or voluntarily withdrawn from the market for use on such commodity; or

"(2) if no tolerance or exemption from tolerance has been granted pursuant to section 408 of this Act.".

SEC. 12. Section 408 of such Act is amended by adding after the subsection added by section 10 the following new subsection:

"(t)(1) If a tolerance has been established under subsection (b) for a pesticide chemical or an exemption has been provided under subsection (c) for a pesticide chemical and if the use of such pesticide chemical is cancelled under the Federal Insecticide, Fungicide, and Rodenticide Act, the Administrator shall by order repeal the regulation establishing such tolerance or providing such exemption. With respect to such pesticide chemical the Administrator may, in accordance with the procedure prescribed by subsection (f), take any of the actions described in such subsection, including, if the residues of the pesticide chemical unavoidably persist, establishing a new tolerance or action level.

"(2) If the use of a pesticide chemical which is covered by a tolerance under subsection (b) or an exemption under subsection (c) is suspended or voluntarily withdrawn under the Federal Insecticide, Fungicide, and Rodenticide Act, the Administrator shall within 90 days by order suspend such tolerance or exemption for the period of the suspension or withdrawal under such Act.".

SEC. 13. (a) Section 408(a)(1) of the Federal Food, Drug, and Cosmetic Act is amended by striking out "Secretary of Health, Education, and Welfare" and inserting in lieu thereof "Administrator of the Environmental Protection Agency (hereinafter in this section referred to as the 'Administrator').

(b) Section 408 of such Act is amended—

(1) by striking out "Secretary" except in the last sentence of subsection (b) and where it is followed by "of Agriculture" or "of Health and Human Services", and

(2) by striking out "Secretary of Health, Education, and Welfare",

each place it occurs and inserting in lieu thereof "Administrator".

(c) Section 408(d)(5) of such Act is amended by striking out ": *Provided*, That this shall not preclude any other member of the advisory committee from appearing and testifying at the hearing" and inserting in lieu thereof a period and the following: "Any other member of the advisory committee may appear and testify at the hearing.".

(d) Section 408(o) of such Act (as so redesignated) is amended by striking out "of the Federal Food, Drug, and Cosmetic Act".

(e)(1) Subsections (b), (d), and (i) of section 408 of such Act are each amended by striking out "(l)" each place it occurs and inserting in lieu thereof "(m)".

(2) Subsections (e) and (h) of section 408 of such Act are each amended by striking out "(g)" and inserting in lieu thereof "(h)".

(3) Section 408(p) of such Act (as so redesignated) is amended by striking out "(i)" and inserting in lieu thereof "(j)".

SEC. 14. Section 304(g) of such Act (21 U.S.C. 334(g)) is amended by inserting before "is found in such facility or vehicle" the following: ", or a food which the officer has reason to believe is adulterated or misbranded," and by striking out "device" each place it subsequently appears and inserting in lieu thereof "food or device".

DEFINITION

SEC. 15. As used in redesignated sections 408(f), 408(g)(2), 408(n), 408(q), 408(r), and 408(s), the term "pesticide chemical" means an active ingredient of a pesticide chemical as defined in section 2(a) of the Federal Insecticide, Fungicide, and Rodenticide Act.

By Mr. TOWER:

S. 3077. A bill to exempt any activity involving the harvesting of penaeid shrimp from certain provisions of the Lacey Act;' to the Committee on the Judiciary.

ACT EXEMPTING THE HARVESTING OF PENAEID SHRIMP

● Mr. TOWER. Mr. President, along with my distinguished colleagues, Senators BENTSEN and STEVENS, I am introducing legislation today to amend the Lacey Act, a wildlife protection law. In 1980, the Lacey Act was amended to state that it is "unlawful to import or export or to transport, sell, receive, acquire or purchase in interstate or foreign commerce any fish or wildlife taken, possessed, transported or sold in violation of any law or regulation of any State or foreign country." My amendment would exempt penaeid shrimp, which is a transboundary stock, from provisions of the Lacey Act. There is only one shrimp stock in the Gulf of Mexico, which is shared by the United States and Mexico. These shrimp migrate in a north-south, south-north direction. There is precedent established already to exempt a species of fish. Tuna, a migratory species, is exempted from provisions of the Lacey Act.

The Lacey Act Amendments of 1980 were not intended to be used as an enforcement tool against shrimpers in the gulf. Those amendments were intended to strenghten international conservation efforts. My bill will have no effect whatsoever in international conservation efforts. Penaeid shrimp is not an endangered or threatened species or even a species with specific conservation problems. The question here is one of allocation, not of conservation.

The south Texas shrimp industry was established and financed on the ability to shrimp in waters off both the United States and Mexico. In 1975, the Mexican fishery law was changed to declare a 200-mile exclusive economic zone. The Mexicans, beginning in 1975, instituted a 3½-year phaseout of U.S. shrimpers. Since 1979, U.S. shrimpers have not been permitted to fish in Mexican waters.

While Mexico does have a 200-mile exclusive economic zone, their law also includes a provision that a surplus in a fishery may be harvested by foreign vessels under certain conditions. Although for several years there has been more shirmp than can be harvested by the current Mexican fleet, Mexico has declared no surplus. Conservation of the species is not a valid argument. The decision not to declare a surplus is purely an allocation decision. Therefore, the provisions of the Lacey Act should not apply.

Moreover, the United States has supplied the Mexicans with enforcement vessels throughout the years. Mexico has the capability to protect and defend its borders and to protect its system of allocation if it so chooses. Instead, a U.S. law—the Lacey Act—is being used to require our Department of Commerce, through the National Marine Fisheries Service, and our Department of Transportation, through the Coast Guard, to enforce a law where the only beneficiary is a foreign country. This is an example of fiscal irresponsibility. Both the National Marine Fisheries Services and the Coast Guard are spending a lot of taxpayers' money for the benefit of Mexico while important violations of U.S. law—for example, drug trafficking and fishery management regulations—are not stopped due to inadequate law enforcement effort.

I ask unanimous consent that an article from today's Wall Street Journal on this matter be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

STRUGGLING SOUTH TEXAS SHRIMPERS INVADE MEXICAN WATERS IN SEARCH OF BETTER CATCH

(By Bryan Burrough)

IN THE GULF OF MEXICO.—Capt. Willis Rock slowly maneuvers his 73-foot shrimp boat into Mexican waters, some 30 miles southeast of Brownsville, Texas. Peering through the moonlight and studying the slow-moving blips on their radar screen, the captain and his crew are constantly on the alert for patrolling Mexican gunboats.

Suddenly, Capt. Rock spots a bright light in the sky that seems to be approaching his boat. "What's that, a helicopter?" he shouts. "I swear I seen that move!"

The light quickly turns out to be a star, but Capt. Rock's nervousness is understandable.

Mexico, responding to a similar move by the U.S. extended its territorial claim 200 miles offshore in 1976 and banned foreign fishing in the area three years later. Since then these waters have become the scene of a growing battle between struggling U.S. shrimpers and the Mexican navy.

In the past 20 months, according to the Mexican government, about 120 U.S. boats have been seized, taken under armed guard to Tampico, Mexico, and ordered to pay thousands of dollars in fines. Many shrimpers are fighting back with high-powered radar and even airplanes to spot Mexican navy vessels before they can spot U.S. boats. Some say they feel safer carrying handguns.

"It's like a war out there," says William K. Zimmerman, a shrimper from Port Isabel, Texas, who says his boats don't poach.

Other Texas shrimpers say they couldn't survive by fishing only the U.S. side of the gulf. About 44% of the U.S. shrimp catch last year was caught off the Texas coast or poached from Mexican waters, according to the National Marine Fisheries Service.

"In 10 days south (of the border) I can catch as much shrimp as in 30 days north," says Julius Collins, a Brownsville shrimper and a member of a Commerce Department advisory council that helps formulate U.S. fishing policy.

CLAIMS ON CURRENTS

Marine biologists say there is evidence to support the shrimpers' claims: Currents in the gulf sweep U.S.-spawned shrimp south into Mexican waters.

But the Mexicans are standing firm. Efforts by south Texas congressmen Kika de la Garza and Solomon Ortiz and Rep. John Breaux of Louisiana to negotiate a treaty that would give U.S. shrimpers access to Mexican waters have been rejected.

"They violate the law, they violate Mexican sovereignty, and they will be subject to punishment under Mexican law," says Juan Manuel Castaneda, an official of the fisheries ministry in Mexico City. Last month, Mexico threatened to confiscate boats found poaching and throw their crews in jail.

The U.S. government supports Mexico. Under a 1981 law that outlaws poaching in foreign waters, shrimpers caught returning from fishing south of the border are stopped by the Coast Guard and fined up to $10,000.

So far the dispute hasn't raised consumer prices because of competition from low-cost imports from Venezuela, Colombia and other countries. Imports now account for as many as three of every four shrimps eaten in the U.S.

For South Texas shrimpers, however, loss of their best fishing grounds is an ever-present concern that has forced some to hang up their nets. The Port Isabel-Brownsville fleet has shrunk to 450 boats from 600 in the past five years.

"I don't see any future in it any more," says Carl Gayman, a Brownsville shrimper who is trying to sell his boats. "Anybody with any sense ought to get out."

Adds David Eymard, president of the Texas Shrimp Association: "In the long run, we're doomed."

Jack Waller isn't quite so pessimistic, but after his second unplanned trip to Tampico he is thinking about giving up poaching. As Mr. Waller recounts the experience, he and his four-man crew had fallen asleep at the radar one night last August and didn't hear the radioed warnings of nearby shrimpers, who scrambled north as a Mexican gunboat approached.

Mr. Waller says he and his crew were awakened by Mexican soldiers armed with .45 caliber pistols and taken to Tampico, where they were watched by an armed guard. After a brief stay, Mr. Waller paid $4,823 in fines and bribes to petty bureaucrats to hasten their release, he says.

Other reports are even more harrowing. Last December, a Mexican gunboat, claiming to be in pursuit of a poacher, machinegunned, rammed and captured a shrimp boat fishing in U.S. waters. A nearby shrimper was also captured by Mexican soldiers, who surprised the crew at night, bashed a gun butt through a door and threatened to shoot the captain if he used the radio owners of the two boats deny they had been fishing in Mexican waters.

Despite such experiences, the pressures to poach continue to mount for those who remain in the business, because of three poor U.S. shrimp harvests, a rise in fuel and equipment costs and a steady decline in shrimp prices because of competition from imports. Prices at the Brownsville docks have declined about 25% in the past year.

Poaching reached what a federal agent calls monumental proportions last June, when the Texas shrimp season ended for 51 days. At one point, a Coast Guard plane spotted a 50-boat armada cruising into Mexican waters, but the fleet broke up when a Mexican gunboat approached. Back in Port Isabel, returning shrimpers waited in line to be boarded and fined. Traffic was so heavy that the Coast Guard called in cruisers from Port Mansfield, Texas, and from Louisiana to assist.

LOWERING ODDS OF CAPTURE

"The incredible thing was that these boats would be boarded, go back to the dock, pick up more ice and head right back to Mexico," says Perry Allen, an agent for the National Marine Fisheries Service. "Some of these vessels did this five, six times in a two-week period."

To lower the odds of being caught by Mexican gunboats, Fred Feurtato and about two dozen other shrimpers chipped in last summer and chartered private planes to make twice-weekly reconnaissance flights over Mexican waters. But the flights stopped after a warning from U.S. officials.

Mr. Feurtato says, however, that he continues to shrimp in Mexican waters with the help of a new radar wth a 72-mile range. "That baby is my insurance," he says.

Another Texas shrimper who feels there's no alternative to poaching is Robin Taliancich. His boat, the Fearless Leader, recently returned to Brownsville after paying $8,795 in fines to the Mexican government for its second poaching offense.

The boat had been towed 300 miles to Tampico and stripped of its catch as well as its nets and cables, which cost Mr. Taliancich about $12,000 to replace. In addition, the frustrated boat owner says, he was thrown into a Mexican jail for eight days after being charged—falsely, he says—with attempting to bribe the captain of a Mexican gunboat.

Still, Mr. Taliancich is renaming the Fearless Leader in preparation for another poaching trip. "I've got no choice but to go south," he says. "It's either the banks get the boat up here, or the Mexicans get it down there."●

By Mr. BOSCHWITZ:

S. 3078. A bill to provide for the separation of the Mille Lacs Band of Chippewa Indians from the Minnesota Chippewa Tribe; to the Select Committee on Indian Affairs.

SEPARATION OF THE MILLE LACS BAND OF CHIPPEWA INDIANS FROM THE MINNESOTA CHIPPEWA TRIBE

● Mr. BOSCHWITZ. Mr. President, today I am introducing legislation at the request of the Mille Lacs Band of Chippewa Indians to allow the Mille Lacs Band to separate from the Minnesota Chippewa Tribe, a confederation of six separate and distinct Chippewa bands, which the Mille Lacs joined in 1936.

The Mille Lacs Band historically has functioned as an independent tribal polity. During the past 150 years, the band has struggled, with great tenacity, to preserve its separate identity, to govern itself, and to determine its own future.

In recent years, the band has endeavored to reorganize its tribal government to incorporate the principle—often lacking in tribal governments—of separation of powers. To the regret of the Mille Lacs Band it has realized that their goal of a reorganized and revitalized tribal government cannot be achieved so long as it remains a member of the confederation known as the Minnesota Chippewa Tribe.

I believe that what the Mille Lacs seeks is right and proper. Allowing the Mille Lacs to achieve full self-government fulfills the commitment of the United States to Indian self-determination.

This legislation should not increase costs to the Federal Government. It does not seek additional services or programs. It seeks only to fulfill the promise of tribal self-determination, which is at the heart of our Indian policy.

It is unfortunate that this legislation was not introduced earlier in this Congress. The bill, in substantially its current form, and a thorough explanation report, was provided to me by the Mille Lacs Band in early February 1984. Since that time, I have been waiting patiently for a written statement from the administration of its position on this legislation. During this time, I have received verbal assurances from the administration that it supports this legislation. Because I believe this legislation has merit, I decided to introduce the bill at this time, anyway. I will reintroduce the bill when the 99th Congress convenes and will ask Chairman ANDREWS of the Senate Select Committee on Indian Affairs to hold a prompt hearing.

Mr. ANDREWS. Thank you Senator BOSCHWITZ. As chairman of the Senate Select Committee on Indian Affairs, I can assure you that the principle of tribal self-determination is of utmost importance, and that this legislation will receive the careful attention of the committee.

It is, unfortunately, too late to hold hearings on this legislation during this Congress. However, you have my commitment that hearings will be held by the Senate Select Committee on Indian Affairs as early as possible following introduction of the bill in the next Congress.

I ask unanimous consent that the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3078

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

Section 1. This Act may be cited as the "Mille Lacs Band of Chippewa Indians Separation Act".

SEC. 2. (a) The Congress finds that—

(1) There are seven federally recognized bands of Chippewa Indians in the State of Minnesota: the Bois Forte Band (Nett Lake), the Fond du Lac Band, the Grand Portage Band, The Leech Lake Band, the Mille Lacs Band, the Red Lake Band, and the White Earth Band. Each of these bands occupies separate reservation lands scattered throughout the State of Minnesota. The Red Lake Band exercises sovereign powers and governs itself independently of the other six bands. The other six bands of Chippewa Indians, acting under the Indian Reorganization Act of 1934, established a tribal federation known as the Minnesota Chippewa Tribe.

(2) Under the constitution and ordinances of the Minnesota Chippewa Tribe, each of the six constituent

---

By Mr. DOLE (for himself, Mr. WARNER, Mr. WILSON, and Mr. TRIBLE):

S. 3079. A bill to clarify the meaning of the phrase "program or activity" as applied to educational institutions that are extended Federal financial assistance, and for other purposes; to the Committee on Labor and Human Resources.

GROVE CITY

● Mr. DOLE. Mr. President, I am pleased to introduce the Grove City compromise that was worked out among Senate Republicans and the administration during Tuesday's 11th hour negotiations on the Byrd amendment to the continuing resolution. Because of our inability to reach bipartisan consensus on this approach, or any of the other various compromises that were considered, the Senate was unable to pass legislation overturning Grove City this year. Nonetheless, I believe there were a number of Senators who opposed the Byrd amend-

ment but supported this alternative approach, as well as a number of Senators who supported the Byrd amendment but felt this alternative was better than no bill at all. As a consequence, I felt that it was important that the compromise formally be made a part of the RECORD before the Senate adjourns.

Under the compromise, the four major civil rights laws that prohibit discrimination in federally assisted programs or activities would each be amended to clarify that where an educational institution is extended Federal financial assistance, the institution itself is the covered program. In this way, the Grove City court's holding that coverage extends only to the specific program to which Federal funds can be traced is wiped out, and civil rights protections in those educational activities that typically do not receive Federal funds, such as athletics, are restored.

The compromise would also clarify that the meaning of the phrase "program or activity" in circumstances not involving educational institutions should remain the same and should not be restricted by the narrow Grove City holding. This provision is responsive to concerns that if Grove City were to be applied beyond its facts, coverage of other institutions and agencies which are subject to these laws, such as hospitals, could also be restricted.

Mr. President, I appreciate that this bill does not go as far as some would like but the fact of the matter is, after extensive negotiations, it is the only proposal that had a chance of passing the last remaining days of the 98th session. So again, I believe it is important that the proposal at least be placed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3079

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. . (a) Title IX of the Education Amendments of 1972 is amended by adding at the end thereof the following new section:

"SEC. 908. (a) Notwithstanding the decisions of the Supreme Court in *Grove City College et. al. v. Bell, Secretary of Education*, and in *North Haven v. Bell*, the phrase "program or activity" as used in this title shall, as applied to educational institutions which are extended Federal financial assistance, mean the educational institution.

"(b) In any other application of the provisions of this title, nothing in paragraph (A) shall be construed to expand or narrow the meaning of the phrase "program or activity" and that phrase shall be construed without reference to or consideration of the Supreme Court decision in *Grove City* and *North Haven.*".

(b) Section 504 of the Rehabilitation Act of 1973 is amended by inserting "(a)" after the section designation and by adding at the end thereof the following new subsection:

"(b)(1) Notwithstanding the decisions of the Supreme Court in *Grove City College, et. al. v. Bell, Secretary of Education* and in *North Haven v. Bell*, the phrase "program or activity" as used in this title shall, as applied to educational institutions which are extended Federal financial assistance, mean the educational institutional.

(2) In any other application of the provisions of this title, nothing in paragraph (A) shall be construed to expand or narrow the meaning of the phrase "program or activity" and that phrase shall be construed without reference to or consideration of the Supreme Court decision in *Grove City* or *North Haven.*".

(c) The Age Discrimination Act of 1975 is amended by adding at the end thereof the following new section:

"SEC. 310. (a) Notwithstanding the decisions of the Supreme Court in *Grove City College, et. al. v. Bell, Secretary of Education* and in *North Haven v. Bell*, the phrase "program or activity" as used in this title shall, as applied to educational institutions which are extended Federal financial assistance, mean the educational institution.

"(b) In any other application of the provisions of this title, nothing in paragraph (A) shall be construed to expand or narrow the meaning of the phrase "programs or activity" and that phrase shall be construed without reference to or consideration of the Supreme Court decision in *Grove City* and *North Haven.*".

(d) Title VI of the Civil Rights Act of 1964 is amended by adding at the end thereof the following:

"SEC. 606. (a) Notwithstanding the decisions of the Supreme Court in *Grove City College et. al. v. Bell, Secretary of Education* and in *North Haven v. Bell*, the phrase "program or activity" as used in this title shall, as applied to educational institutions which are extended Federal financial assistance, mean the educational institution.

"(b) In any other application of the provisions of this title, nothing in paragraph (A) shall be construed to expand or narrow the meaning of the phrase "program or activity" and that phrase shall be construed without reference to or consideration of the Supreme Court decision in *Grove City* and *North Haven*".●

By Mr. DANFORTH (for himself and Mr. ROTH) (by request):

S. 3080. A bill to discontinue or amend certain requirements for agency reports to Congress; to the Committee on Governmental Affairs.

CONGRESSIONAL REPORTS ELIMINATION ACT

● Mr. DANFORTH. Mr. President, I am introducing today, along with Senator ROTH at the request of the administration, the Congressional Reports Elimination Act of 1984. This bill is similar to legislation that passed the Congress in 1980 and 1982. It would elimininate congressional reporting requirements that in the administration's view no longer serve a useful purpose.

Clearly, there is no time to act on the legislation this year, but I am introducing it nonetheless for the information of the Senate and the public. It will be reintroduced in the 99th Congress. It is my hope that Senate committee staffs will take the opportunity between now and then to review the provisions that fall within their jurisdiction. Early next year, the Committee on Governmental Affairs will seek the comments of other Senate committees on such provisions before marking up the bill.

For the convenience of the Senate and the public, I ask unanimous consent that a copy of the bill, together with the transmittal letter for OMB Director Stockman, a section-by-section analysis, and a breakdown of the bill's provisions by committee, be included in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 3080

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act be cited as the "Congressional Reports Elimination Act of 1984."

TITLE I—ELIMINATIONS

REPORTS BY MORE THAN ONE AGENCY

SEC. 101. (a) Section 218(a) of the Biomass Energy and Alcohol Fuels Act of 1980 (42 U.S.C. 8818(a)) is repealed.

(b) Section 202 of Positions in Top Grades of Classification Act of 1949 (5 U.S.C. 3104(c)) is amended by—

(1) striking subsection (b);

(2) paragraphs (a)(1), (a)(2), and (a)(3) are redesignated as subsections (a), (b), and (c) respectively; and

(3) references to former paragraph (1) of subsection (a) hereafter will be references to subsection (a).

(c) Section 26(e)(2) of the Toxic Substances Control Act (15 U.S.C. 2625(e)(2)) is amended to read as follows:

"(A) define the term 'known financial interests' for purposes of paragraph (1), and

"(B) establish the methods by which the requirement to file written statements specified in paragraph (1) will be monitored and enforced, including appropriate provisions for review by the Administrator and the Secretary of such statements."

(d) Section 307(b) of the Supplemental Appropriations and Recission Act of 1980 (31 U.S.C. 28(b)) is repealed.

(e) Section 1113(e)(3) of Title 31 U.S.C. "Money and Finance" (P.L. 97-258; 31 U.S.C. 1113(e)(3)) is repealed.

(f) Section 311(c) of Title 37, United States Code, is repealed.

(g) Section 203(o) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 484(o)) is amended in the first sentence by striking out "and the head of each executive agency disposing of real property under subsection (k) of this section."

REPORTS BY THE EXECUTIVE OFFICE OF THE PRESIDENT

SEC. 102. (a) 31 U.S.C. 1105, Public Law 97-258, the Budget and Accounting Act of 1921, is amended to delete Section 1105(a)(12).

(b) 31 U.S.C. 3524, Public Law 97-258, is amended to delete section 3524(b).

REPORTS BY THE DEPARTMENT OF AGRICULTURE

SEC. 103. (a) Section 7(b) of the Soil Water Resources Conservation Act of 1977 (16 U.S.C. 2001) is repealed.

(b) Section 17(j) of the Child Nutrition Amendments of 1978 (42 U.S.C. 1786) is repealed.

REPORTS BY THE DEPARTMENT OF COMMERCE

SEC. 104. (a) Section 6(b) of the Federal Water Pollution Control Act Amendments of 1972 (33 U.S.C. 1251) is repealed.

(b) Section 1 of the Department of Labor Organic Act (15 U.S.C. 183) is repealed.

(c) Section 201 of the Marine Protection Research, and Sanctuaries Act of 1972 (33 U.S.C. 1441) is amended by striking the words "and shall report from time to time, not less frequently than annually, his findings (including an evaluation of the short term ecological effects and the social and economic factors involved) to the Congress."

(d) Section 5(e) of the Fair Packaging and Labeling Act (15 U.S.C. 1454(e)) is repealed.

(e) Section 117 of the Ocean Thermal Energy Conversion Act of 1980 (42 U.S.C. 9127) is amended by striking the words "the results of each such review shall be included in the next annual report required by Section 9165 of this Title."

(f) Section 405 of the Ocean Thermal Energy Conversion Act of 1980 (42 U.S.C. 9165) is repealed.

(g) Section 406 of the Outer Continental Shelf Lands Act Amendments of 1978 (43 U.S.C 1846) is repealed.

(h) Section 2(d)(2) of the Act of August 11, 1939 (commonly referred to as the Saltonstall-Kennedy Act) (15 U.S.C. 713c-3(d)(2)) is repealed.

(i) Section 3 of the 1980 Amendments to the Atlantic Tunas Convention Act (16 U.S.C. 972(i)) is repealed.

(j) Section 5 of the Central, Western and South Pacific Fisheries Development Act (16 U.S.C. 758e-2) is repealed.

REPORTS BY THE DEPARTMENT OF DEFENSE

SEC. 105. (a) Section 2397 of Title 10, United States Code, is repealed.

(b) Section 2672(a) of Title 10, United States Code, is amended by striking out the last sentence.

(c) Section 511(a) of the Military Construction Act of 1960 (10 U.S.C. 2662; P.L. 86-500) is repealed.

(d) Section 207(a) of the Act of September 7, 1962 (10 U.S.C. 2208(i)) is repealed.

(e) Section 221 of the Flood Control Act of 1970 (42 U.S.C. 1962d-5b; 84 Stat. 1824) is amended by striking out subsection (d) and by redesignating subsection (e) as subsection (d).

(f) Section 608 of the Military Construction and Reserve Forces Facilities Act of 1971 (10 U.S.C. 2675; P.L. 91-511) is amended by striking out the subsection designation "(a)" and by repealing subsection (b).

(g) Section 28 of the Arms Export Control Act (22 U.S.C. 2768) is repealed.

(h) Section 62 of the Arms Export Control Act (22 U.S.C. 2796 et. seq.) is repealed.

(c) Section 112(g)(4) of the Rehabilitation Act of 1973 (29 U.S.C. 732(g)(4)) is amended by striking the second sentence.

(d) Section 117(d) of the Higher Education Act of 1965 (20 U.S.C. 1017) as amended by the Education Amendments of 1980 (P.L. 96-374) is repealed.

(e) Section 553(c) of the Higher Education Act of 1965 (20 U.S.C. 1119(c-2)) is repealed.

(f) Section 605(b) of the Higher Education Act of 1965 (20 U.S.C. 1125(b)) is repealed.

(g) Section 403(a)(2) of the Department of Education Organization Act (20 U.S.C. 3463(a)(2)) is repealed.

REPORTS BY THE DEPARTMENT OF ENERGY

SEC. 107. (a) Section 18 of the Federal Energy Administration Act of 1974 (15 U.S.C. 777) is amended by—

(1) striking subsection (d); and.

(2) redesignating subsection (e) as subsection (d).

(b) Section 7(b)(7) of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5906(b)(7)) is amended by—

(1) striking subparagraph (A); and—

(2) striking the subparagraph designator "(B)".

(c) The Department of the Interior and Related Agencies Appropriations for Fiscal Year 1980 Act (P.L. 96-126; 42 U.S.C. 5915 note) is amended by striking the last paragraph under the heading "Department of Energy Alternative Fuels Production" in Title II.

(d) Section 11 of the Energy Supply and Environmental Coordination Act of 1974 (15 U.S.C. 796) is amended by—

(1) striking subsection (c); and

(2) redesignting subsections (d), (e), (f), and (g) as (c), (d), (e), and (f) respectively.

(e) The Powerplant and Industrial Fuel Use Act of 1978 is amended by—

(1) repealing Section 801 (42 U.S.C. 8481); and

(2) striking the item relating to section 801 in the table of contents.

(f) Section 205(h) of the Department of Energy Organization Act (42 U.S.C. 7135(h)) is repealed.

(g) Section 7 of the Coal Research and Development Act of July 7, 1960, (P.L. 86-599; 30 U.S.C. 667) is repealed.

(h) Section 11 of the Wind Energy Systems Act of 1980 (42 U.S.C. 9210) is amended by—

(1) striking paragraph (5);

(2) inserting "and" at the end of paragraph (4); and

(3) redesignating paragraph (6) as paragraph (5).

(i) Section 6(a) of the Alaska Federal-Civilian Energy Efficiency Swap Act of 1980 (P.L. 96-571; 40 U.S.C. 795(d)) is repealed.

(j) Section 314 of the Energy Research and Development Administration Appropriation Authorization for Fiscal Year 1976 Act (89 Stat. 1076) is amended by striking the colon and all that follows, and by inserting a period in its place.

(k) Section 908 of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1328) is amended by—

(1) striking subsection (d); and

(2) redesignating subsection (e) as subsection (d).

(l) The Energy Security Act is amended by—

(1) repealing section 106 (50 U.S.C. App. 2096a);

(2) repealing title III (42 U.S.C. 7361-64); and

(3) striking the items relating to section 106 and title III in the table of contents.

(m) The Public Utility Regulatory Policy Act is amended by—

(1) striking Section 116 (16 U.S.C. 2626); and

(2) striking Section 309 (15 U.S.C. 3209).

(n) Part E of Title III of the Energy Policy and Conservation Act (42 U.S.C. 6345) is repealed.

(o) Section 221(c) of the Energy Tax Act of 1978 (26 U.S.C. 4041 note)) is repealed.

(p) Section 218(c) of the Energy Security Act (42 U.S.C. 8818) is repealed.

(q) Section 4 of the Wind Energy Systems Act of 1980 (42 U.S.C. 9203) is repealed.

(r) Section 3 of the Ocean Thermal Energy Conversion Research, Development, and Demonstration Act (42 U.S.C. 9002) is repealed.

(s) Section 6 of the Ocean Thermal Energy Conversion Research, Development, and Demonstration Act (42 U.S.C. 9005) is amended by striking paragraphs (a) and (b), and by striking "(c) Respondent proposals".

REPORTS BY THE DEPARTMENT OF HEALTH AND HUMAN SERVICES

SEC. 108. (a) Section 27(c) of the Toxic Substances Control Act (15 U.S.C. 2626(c)) is repealed.

(b) Section 308(a) of the Public Health Service Act (42 U.S.C. 242m(a)) is amended—

(1) by striking out paragraph (1);

(2) in pargraph (3), by striking out "or (2)"; and

(3) by renumbering paragraphs (2) and (3) as (1) and (2), respectively.

(c) Section 317(h) of the Public Health Service Act (42 U.S.C. 247b(h)) is repealed.

(d) Section 336A of the Public Health Service Act (42 U.S.C. 254i) is repealed.

(e) Section 338A(i) of the Public Health Service Act (42 U.S.C. 254(e)(i)) is repealed.

(f) Section 357 of the Public Health Service Act (42 U.S.C. 263e) is repealed.

(g) Section 360D of the Public Health Service Act (42 U.S.C. 2631) is repealed.

(h)(1) Section 2111 of the Public Health Service Act (42 U.S.C. 300aa-10) is repealed.

(2) The first sentence of section 383(b) of that Act (42 U.S.C. 277(b)) is amended by striking out ", and the Secretary shall include in his annual report to the Congress a statement covering the recommendations made by the Board and the disposition thereof".

(k) Section 1122 of the Public Health Service Act (42 U.S.C. 300c-12) is amended to read as follows:

"SUDDEN INFANT DEATH SYNDROME RESEARCH

"SEC. 1122. From the sums appropriated to the National Institute of Child Health and Human Development under section 441, the Secretary shall assure that there are applied to research which relates specifically to sudden infant death syndrome, and to research which relates generally to sudden infant death syndrome, including high-risk pregnancy and high-risk infancy research which directly relates to sudden infant death syndrome, such amounts each year as will be adequate, given the leads and findings then available from such research, in order to make maximum feasible progress toward identification of infants at risk of sudden infant death syndrome and prevention of sudden infant death syndrome.".

(l) Section 1315 of the Public Health Service Act (42 U.S.C. 300e-17(e)) is repealed.

(m) Section 1318(e) of the Public Health Service Act (42 U.S.C. 300e-17(e)) is repealed.

(n) Section 1705 of the Public Health Service Act (42 U.S.C. 300u-4) is repealed.

(o) Section 402(c) of the Social Security Act (42 U.S.C. 602(c)) is repealed.

(p) Section 1114(f) of the Social Security Act (42 U.S.C. 602(c)) is amended by striking out the last sentence.

(q) Section 1161 of the Social Security Act (42 U.S.C. 1320c-10) is repealed.

(r) Section 1881(c)(6) of the Social Security Act (42 U.S.C. 1395rr(c)(6)) is amended by striking out the last sentence.

(s) Section 1881(g) of the Social Security Act (42 U.S.C. 1395rr(g)) is repealed.

(t) Section 1903(g)(6) of the Social Security Act (42 U.S.C. 1396b(g)(6) is repealed.

(u) Section 1200 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (42 U.S.C. 3509) is repealed.

(v) Section 315 of the Runaway Homeless Youth Act (42 U.S.C. 5715) is repealed.

(w) Section 154(e) of the Clean Air Act (42 U.S.C. 7454(e)) is amended by striking out the last sentence.

(x) Section 640(d) of the Head Start Act (42 U.S.C. 9835) is amended by striking out the second sentence.

REPORTS BY THE DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SEC. 109. (a) Section 904 of the Housing and Community Development Act of 1977 (P.L. 95-128; (42 U.S.C. 3540)) is repealed.

(b) Section 311 of the Energy Conservation Standards for New Buildings Act of 1976 (42 U.S.C. 6831) is repealed.

(c) Section 505(f) of the Housing and Urban Development Act of 1970 (12 U.S.C. 1701z-4) is repealed.

(d) Section 506(c) of the Housing and Urban Development Act of 1970 (12 U.S.C. 1701z-5) is repealed.

REPORTS BY THE DEPARTMENT OF THE INTERIOR

SEC. 110. (a) Sections 1962(d) of 42 United States Code (42 U.S.C. 1962(d)(12-14)) is amended by—

(1) striking subsection 12;

(2) striking subsection 13; and

(3) striking subsection 14.

(b) Section 8 of the Act of August 18, 1970 (84 Stat. 825), as amended, Title 16 U.S.C., sections 1a-5, is deleted and replaced by the following: "The Secretary is directed to transmit annually to the Speaker of the House of Representatives and to the President of the Senate, at the beginning of each fiscal year, a complete and current list of all areas included on the Registry of Natural Landmarks and those areas of national significance listed on the National Register of Historic Places which areas exhibit known or anticipated damage or threats to the integrity of their resources, along with notations as to the nature and severity of such damage or threats. The annual listing shall be printed as a House document. For the purpose of monitoring the welfare and integrity of the national landmarks, there are authorized to be appropriated annually not to exceed $1,500,000.".

(c) Section 13 of the Mining in the Parks Act (16 U.S.C. 1912) is repealed.

(d) Section 313 of the Federal Land Policy Management Act (43 U.S.C. 1743) is repealed.

(e) Section 605 of the Outer Continental Shelf Lands Act Amendments of 1978 (43 U.S.C. 1864, (Supp. II 1978)) is repealed.

(f) Section 908(d) of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1328(d)) is amended by deleting the sentence "On December 31 of each calendar year, the Secretary shall report to the Congress . . ." to the end of section 908(d).

(g) Section 522 of the Energy Policy and Conservation Act (42 U.S.C. 6392 (Supp. II 1978)) is repealed.

(h) Section 11 of the Wild Horses and Burros Act of 1971 as amended (16 U.S.C. 1340) is further amended by striking the first paragraph.

(i) Section 17(g) of the Mineral Leasing Act of 1920 as amended (30 U.S.C. 226(g)) is repealed.

(j) Section 205(a) of the Outer Continental Shelf Lands Act Amendments (43 U.S.C. 1337(a)) is amended by—

(1) striking subsection (8); and

(2) striking subsection (9).

(k) Section 207(a)(2) of the Outer Continental Shelf Lands Act Amendments (43 U.S.C. 1343(2)) is repealed.

(l) Section 302 of the Federal Oil and Gas Royalty Management Act of 1982 (30 U.S.C. 1752) is amended by—

(1) striking subsection (a); and

(2) redesignating subsection (b) as (a).

(m) Section 606(e) of the Outer Continental Shelf Lands Act Amendments (43 U.S.C. 1865(e)) is repealed.

(n) Section 2 of the Act of September 22, 1961 (75 Stat. 584; 25 U.S.C. 165) is repealed.

(o) The Act of September 22, 1961 (75 Stat. 577; 25 U.S.C. 15) is amended by striking out the last sentence thereof.

(p) Section 601(a) of the Outer Continental Shelf Lands Act Amendments of 1978 (43 U.S.C. 1861) is repealed.

(q) Section 28(w) of the Mineral Leasing Act of 1920 as amended (30 U.S.C. 185(w)) is amended by—

(1) striking subsection (1); and

(2) striking subsection (2).

REPORTS BY THE DEPARTMENT OF JUSTICE

SEC. 111. (a) Section 8B of the Federal Coal Leasing Act (30 U.S.C. 208-2) is amended by striking the words, "Each submission shall also contain a report by the Attorney General of the United States on competition in the coal and energy industries, including an analysis of whether the antitrust provisions of this Act and the antitrust laws are effective in preserving or promoting competition in the coal or energy industry.".

(b) Section 104(a) of the Civil Rights Act of 1968 (18 U.S.C. 2101(d)) is amended by deleting the semicolon and all that follows the word "prosecution" and inserting a period.

(c) Section 10 of the Small Business Act (15 U.S.C. 639(c)) is amended—

(1) by striking subsection 10(c) (1) and (2); and

(2) by renumbering subsection 10 (d), (e), (f), and (g) as subsection 10 (c), (d), (e), and (f) respectively.

REPORTS BY THE DEPARTMENT OF LABOR

SEC. 112. (a) Section 4(e) of the Fair Labor Standards Act of 1938, as amended by section 3 of the Fair Labor Standards Amendments of 1961 (29 U.S.C. 204(e)) is repealed.

(l) Section 1302(c)(2) of the Panama Canal Act of 1979 (Stat. 478; 22 U.S.C. 3712(c)(2)) is amended by striking the last sentence of the subsection.

(m) Section 136(f) of the Nuclear Waste Policy Act of 1982 (96 Stat. 2240; 42 U.S.C. 10156) is amended by striking subsection 136(f)(1), and by renumbering the remaining subsections accordingly.

REPORTS BY THE AGENCY FOR INTERNATIONAL DEVELOPMENT

SEC. 116. (a) Section 620(s)(2) of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2370 (s)(2); 83 Stat. 820) is repealed.

(b) Section 634(a)(2)(B) of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2394(a)(2)(B); 92 Stat. 957) is repealed.

(c) Section 634 (a)(6) and (a)(7) of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2394 (a)(6) and (a)(7); 92 Stat. 957) are repealed.

REPORTS BY THE CONSUMER PRODUCT SAFETY COMMISSION

SEC. 117. Section 35(e) of the Consumer Product Safety Act (15 U.S.C. 2082; P.L. 92-573 as amended by P.L. 95-319), is repealed.

REPORTS BY THE ENVIRONMENTAL PROTECTION AGENCY

SEC. 118. (a) Section 33(a)(7) of the Solid Waste Disposal Act of 1980 as amended (42 U.S.C. 6901 note) is repealed.

(b) Section 2001(b)(3) of the Solid Waste Disposal Act as amended (42 U.S.C. 6911 (b)(3)) is repealed.

(c) Section 2006 of the Solid Waste Disposal Act as amended (42 U.S.C. 6915) is repealed.

(d) Section 7007(c) of the Resource Conservation and Recovery Act of 1976 as amended (42 U.S.C. 6977(c)) is repealed.

(e) Section 127 of the Clean Air Act Amendments of 1977 (42 U.S.C. 7479 note) is amended by—

(1) striking subsection (b);

(2) striking subsection (d); and

(3) redesignating subsection (c) as (b).

(f) Section 202(a) of the Clean Air Act Amendments of 1977 (42 U.S.C. 7521 note) is repealed.

(g) Section 203(a) of the Clean Air Act Amendments of 1977 (42 U.S.C. 7551(a) is repealed.

(h) Section 241(b) of the Clean Air Act Amendments of 1977 (42 U.S.C. 7548) is repealed.

(i) Section 403(f) of the Clean Air Act Amendments of 1977 (42 U.S.C. 7521 note) is amended by deleting the following sentence: "The Administrator shall report to the Congress within six months of the date of enactment of this section and each year thereafter regarding the status of the contractual arrangements and conditions necessary to implement this paragraph.".

(j) Section 102(d) of the Clean Water Act (33 U.S.C. 1252(d)) is repealed.

(k) Section 104(n)(3) of the Clean Water Act (33 U.S.C. 1254(n)(3)) is repealed.

(l) Section 516(a) of the Clean Water Act (33 U.S.C. 1375(a)) is repealed.

(m) Section 9 of the Used Oil Recycling Act of 1980 (42 U.S.C.A. 6932 note) is repealed.

(n)(1) Section 1442(a)(3)(A) of the Safe Drinking Water Act, as amended (42 U.S.C.A. 300j-1(a)(3)(A); 88 Stat. 1683) is repealed.

(2) Section 1442(a)(3)(B) of the Safe Drinking Water Act, as amended (42 U.S.C.A. 300j-1(a)(3)(B); 91 Stat. 1393) is repealed.

(3) Section 1442 of the Safe Drinking Water Act, as amended (42 U.S.C.A. 300j-1) is amended by repealing paragraph (c) and redesignating (d), (e), and (f) as (c), (d), and (e) respectively.

(o) Section 1412(e)(2) of the Safe Drinking Water Act, as amended (42 U.S.C.A. 300g-1(e)) is repealed.

(p) Section 1450(h) of the Safe Drinking Water Act, as amended (42 U.S.C.A. 300j-9(h); 88 Stat. 1691) is repealed.

(q) Section 5 of the Environmental Research Development and Demonstration Act of 1976 (42 U.S.C. 4361) is repealed. The Environmental Research Development and Demonstration Authorization Act of 1978 (42 U.S.C. 4361(a)) is amended by—

(1) striking Section 4;

(2) striking Section 8(c); and

(3) redesignating Section 5, 6, 7 and 8 as Section 4, 5, 6 and 7 respectively.

(r) Section 11 of the Federal Non-Nuclear Energy Research and Development Act of 1974 (42 U.S.C.A. 5910) is repealed.

(s) Section 745 of the Power Plant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8455) is repealed.

REPORTS BY THE FEDERAL COMMUNICATIONS COMMISSION

SEC. 119. Section 404(c) of the Communications Satellite Act of 1962 (P.L. 87-624; 76 Stat. 426; 47 U.S.C. 744(c)) is repealed.

REPORTS BY THE FEDERAL ENERGY REGULATORY COMMISSION

SEC. 120. (a)(1) Section 11(a) of the Natural Gas Act (15 U.S.C. 717j(a); 52 Stat. 827) is amended to read as follows: "In case two or more States propose to the Congress compacts dealing with the conservation, production, transportation, or distribution of natural gas, the Commission, upon a request from Congress, will be required to assemble pertinent information relative to the matters covered in any such proposed compact, to make public and to report to the Congress information so obtained, together with such recommendations for further legislation as may appear to be appropriate or necessary to carry out the purposes of such proposed compact, and to aid in the conservation of natural gas resources within the United States and in the orderly, equitable, and economic production, transportation, and distribution of natural gas.".

(2) Section 11(b) of the Natural Gas Act (15 U.S.C. 717j; 52 Stat. 827) is amended to read as follows: "The Commission, upon a request from Congress will be required to assemble and keep current pertinent information relative to the effect and operation of any compact between two or more States heretofore or hereafter approved by the Congress, to make such information public, and to report to the Congress, as requested, the information so obtained together with such recommendations as may appear to be appropriate or necessary to promote the purposes of such compact."

(b) Section 4(d) of the Federal Power Act (16 U.S.C. 797(d); 42 Stat. 1065; 46 Stat. 798; 49 Stat. 840) is amended by deleting the sentence stating "The Commission, on or before the third day of January of each year, shall submit to Congress for the fiscal year preceding a classified report showing permit and licenses issued under this Part, and in each case the parties thereto, the terms prescribed, and the moneys received, if any, on account thereof.".

REPORTS BY THE FEDERAL LABOR RELATIONS AUTHORITY

SEC. 121. Section 7104(e) of the Federal Service Labor Management Statute of the Civil Service Reform Act of 1978 (5 U.S.C. 7101 *et. seq.;* P.L. 94-454) is repealed.

REPORTS BY THE GENERAL ACCOUNTING OFFICE

(1) adding the word "and" following the semicolon at the end of subsection (3);

(2) replacing the semicolon at the end of subsection (4) with a period; and

(3) deleting subsection (5).

REPORTS BY THE NUCLEAR REGULATORY COMMISSION

SEC. 126. Section 201(h) of the Energy Reorganization Act of 1974 (P.L. 93-438; 42 U.S.C. 5841; 88 Stat. 1233) is repealed.

REPORTS BY THE OFFICE OF PERSONNEL MANAGEMENT

SEC. 127. Section 5114 of title 5, the Act of September 6, 1966, (P.L. 89-554; 80 Stat. 456) is amended by—

(1) striking subsection (a); and

(2) striking subsection (b).

REPORTS BY THE SMALL BUSINESS ADMINISTRATION

SEC. 128. Section 10 of the Small Business Act (88 Stat. 746; 15 U.S.C. 639) is amended by striking out paragraph (g).

REPORTS BY THE VETERANS ADMINISTRATION

SEC. 129. (a) Section 10 2(b)(1)(C) of the Veterans Health Care Amendments of 1979 (38 U.S.C. 612(b)) is amended by striking the paragraph beginning with "in any year in which the President's budget for the fiscal year . . ." and ending with "Any report submitted pursuant to this subsection shall include a comment by the Administrator on the effect of the application of the criteria prescribed in the second sentence of section 610(c) of this title for furnishing incidental dental care to hospitalized veterans."

(b) Section 201(b) of the Veterans Health Care Admendments of 1979 (38 U.S.C. 601, Note 1) is repealed.

(c) Section 210(c)(3)9B) of the Veterans Compensation and Relief Act of 1972 (38 U.S.C. 210(c)(3)(B)) is repealed.

(d) Section 212 of Vietnam Era Veterans Readjustment Act of 1974 (38 U.S.C. 1976(d)) is repealed.

TITLE II—MODIFICATION

REPORTS BY MORE THAN ONE AGENCY

Sec. 201. (a) Section 2(d) of the Act of December 5, 1979 (25 U.S.C. 472a(d); P.L. 96-135) is amended by—

(1) striking out "following the close of each fiscal year";

(2) striking out "which they took in such fiscal year" and inserting instead "which they have taken"; and

(3) inserting "biennial" before "report."

(b) Section 2(e)(2) of the Act of December 5, 1979 (25 U.S.C. 472a(e)(2); P.L. 96-135) is amended by—

(1) striking out "following the close of each fiscal year";

(2) striking out "which they took in such fiscal year" and inserting instead "which they have taken"; and

(3) by inserting "biennial" before "report".

(c) Section 26 of the Occupation Safety and Health Act of 1970 (29 U.S.C. 675) is amended by striking out "Within one hundred and twenty days following the convening of each regular session of each Congress, the Secretary and Secretary of Health, Education, and Welfare shall each" and inserting instead "The Secretary and the Securetary of Health and Human Services shall each biennially. . .".

REPORTS BY THE EXECUTIVE OFFICE OF THE PRESIDENT

SEC. 202. (a) Section 1515(b)(2) of Title 31 U.S.C., "Money and Finance," is amended to read as follows: "If an official making an apportionment decides that deficiency or supplemental appropriation is required (except to permit payment of Federal pay raises, pursuant to law), the official shall submit immediately a detailed report of the facts to the Congress. The report shall be referred to in submitting a proposed deficiency or supplemental appropriation."

(b) 31 U.S.C. 1106, P.L. 97-258, is amended to delete sections 1106(a)(2) and (a)(3).

(c) Section 9503 of Title 31 of the United States Code (P.L. 97-258) is amended by—

(1) striking from Section 9503(a)(1) the word "annual" and inserting after "shall be" the words "submitted every five years, and shall be"; and

(2) inserting in Section 9503(a)(1)(B) the word "fifth" before the words "plan year involved;".

(d) Title X of the Congressional Budget and Impoundment Control Act of 1974 (P.L. 93-344) is amended as follows:

(1) Section 1013(a), first paragraph, is amended to read as follows: "(a) TRANSMITTAL OF SPECIAL MESSAGE.—whenever the President, the Director of the Office of Mangement and Budget, the head of any department or agency of the United States, or any official or employee of the United States proposes to defer any budget authority provided for a specific purpose or project that is not a temporary financial management action, the President shall transmit to the House of Representatives and the Senate a special message specifying . . .".

(e) Title X of the Congressional Budget and Impoundment Control Act of 1974 (P.L. 93-344), is amended as follows:

(1) Section 1014(e)(i) is amended to read as follows: "(i) The President shall submit a report to the House of Representatives and the Senate, not later than the 10th day of each quarter during a fiscal year, listing all budget authority for that fiscal year with respect to which, as of the first day of such quarter . . .".

(f) 31 U.S.C. 1109(a) (P.L. 97-258) is amended by—

(1) striking the phrase in the beginning sentence of section 1109(a) "Before November 11 of each year,"; and

(2) substituting the phrase "Concurrent with the transmittal of the Budget," for the deleted phrase.

REPORTS BY THE DEPARTMENT OF AGRICULTURE

SEC. 203. Section 101 of the Agriculture and Related Agencies Appropriation Act of 1976 (15 U.S.C. 713a-10) is amended by striking "quarterly" and inserting in lieu thereof, "annual".

REPORTS BY THE DEPARTMENT OF COMMERCE

SEC. 204. (a) Section 7 of the Marine Resources and Engineering Development Act of 1966 (33 U.S.C. 1106) is amended by striking "in January of each year " and inserting in lieu thereof "biennially in January".

(b) Section 81p of the Foreign Trade Zones Act of 1934 (19 U.S.C. 81p) is amended by—

(1) striking from subsection (b) "containing a full statement of all the operations, receipts, and expenditures, and such other information as the Board may require" and inserting in lieu thereof "on zone operations"; and

(2) striking subsection (c) and inserting in lieu thereof (c) The Board shall make a report to Congress annually containing a summary of zone operations.".

(c) Section 5(d)(9) of the National Climate Program Act of 1978 (15 U.S.C. 2904) is amended by striking "that shall be revised and extended biennially" and inserting in lieu thereof "that shall be reviewed every year and revised as appropriate.".

(d) Section 202(c) of the Marine Protection, Research and Sanctuaries Act of 1972 (33 U.S.C. 1442(c)) is amended to read "In March of every other year, the Secretary of Commerce shall report to the Congress on the results of activities undertaken pursuant to this section during the previous two fiscal years.".

REPORTS BY THE DEPARTMENT OF EDUCATION

SEC. 205. (a)(1) Section 12(c) of P.L. 81-815 (20 U.S.C. 642, September 23, 1950) is amended by striking "annual report" and inserting in lieu thereof "biennial report".

(2) Section 401(c) of P.L. 81-874 (20 U.S.C. 242, September 30, 1950) is amended by striking "annual report" and inserting in lieu thereof "biennial report".

(b) Section 618(f)(2)(E) of the Education of the Handicapped Act (20 U.S.C. 1418(f)(2)(E)) is amended to read as follows: "(E) an analysis and evaluation of the effectiveness of procedures undertaken by State educational agencies, local educational agencies, and intermediate education units to ensure that handicapped children and youth receive special education and related services in the least restrictive environment commensurate with their needs and to improve programs of instruction for handicapped children and youth in day or residential facilities;".

(c) Section 417 of the General Education Provisions Act (20 U.S.C. 1226c) is amended—

(1) in the heading by striking "Annual";

(2) in subsection (a)—

(A) in the first sentence—

(i) by striking "of each year" following "November 1" and inserting in lieu thereof "1985 and alternate years thereafter"; and

(ii) by striking "annual" preceding "evaluation report".

(B) in subparagraph (B), by striking "during the previous fiscal year"; and

(C) in subparagraph (C), by striking "during the previous fiscal year"; and

(3) in subsection (b)(1) by striking "preceding year" and inserting in lieu thereof "two preceding years."

(d) Section 112(c) of the Vocational Education Act of 1963 (20 U.S.C. 2312(c)) is amended in the first sentence by—

(1) striking "annually";

(2) striking "each fiscal year" and inserting in lieu thereof "fiscal years 1985 and alternate fiscal years thereafter"; and

(3) striking "during that fiscal year".

REPORTS BY THE DEPARTMENT OF ENERGY

SEC. 206. Section 165(b)(1) of the Energy Policy and Conservation Act (42 U.S.C. 6245(b)(1)) is amended by striking "fifteenth" and inserting "forty-fifth" in its place.

REPORTS BY THE DEPARTMENT OF HEALTH AND HUMAN SERVICES

SEC. 207. (a) Section 5(h) of the International Health Research Act of 1960 (22 U.S.C. 2103(h)) is amended by striking out "to the Congress at the beginning of each regular session," and inserting instead "biennially to the Congress".

(b) The first sentence of section 701 of the Indian Health Care Improvement Act (25 U.S.C 1671) is amended by striking out "annually" and instead inserting "biennially".

(c) Section 22(f) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 671(f)) is amended—

(1) by inserting "biennially" after "submit"; and

(2) by striking "an annual report" and inserting instead "a report".

(d) Section 301(b)(4) of the Public Health Service Act (42 U.S.C. 241(b)(4)) is amended—

(1) in the matter preceding subparagraph (A), by striking "an annual" and inserting instead "a biennial"; and

(2) in subparagraph (D), by striking "year" and inserting instead "period".

(e) Section 404(a)(9) of the Public Health Service Act (42 U.S.C. 285(a)(9)) is amended by striking "not later than November 30 of each year,".

(f) Section 434(e) of the Public Health Service Act (42 U.S.C. 289c-1(e)) is amended—

(1) in the first sentence, by striking ", as soon as practicable, but not later than sixty days, after the end of each fiscal year,";

(2) in the first sentence, by striking "an annual" and inserting instead "a biennial"; and

(3) in the matter in the last sentence preceding paragraph (1) by striking "annual" and inserting instead "biennial".

(g) Section 435(b) of the Public Health Service Act (42 U.S.C 289c-2(b)) is amended by striking "(on or before November 30 of each year)".

(h) Section 439(e) of the Public Health Service Act (42 U.S.C 289c-6(E)) is amended by striking "an annual" and inserting instead "a biennial" and by striking "on or before November 30 of each year".

(i) Section 1875(b) of the Social Security Act (42 U.S.C. 139511(b)) is amended by striking "a validation of the accreditation process of the Joint Commission on the Accreditation of Hospitals,".

(j)(1) Section 308(a) of the Age Discrimination Act of 1975 (42 U.S.C. 6106a(a)) is amended by striking all that precedes "a report" and inserting instead "Not later than December 31 of 1979 and of each succeeding year through 1984, and not later than December 31 of each year after 1984 in which the Secretary of Health and Human Services requires such a report, the head of each Federal department or agency shall submit to the Secretary of Health and Human Services".

(2) Section 308(b) of that Act (42 U.S.C. 6106a(b)) is amended by striking all that precedes "shall compile" and inserting instead "Not later than March 31 of 1980 and of each succeeding year through 1985, and not later than March 31 of each succeeding year following a year in which he requires reports under subsection (a), the Secretary of Health and Human Services".

REPORTS BY THE DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SEC. 208. (a) Section 4(d)(2) of the Department of Housing and Urban Development Act (42 U.S.C 3531; 79 Stat. 667) is amended by—

(1) striking "The Secretary shall, not later than December 1 of each year, submit to Congress an annual report which shall include . . ." and inserting in lieu thereof "The Secretary shall, not later than May 1, 1985 and not later than May 1 of every second year thereafter, submit to Congress a report which shall include . . ."; and

(2) inserting "and the preceding" after "current" in clause (A).

(b) Section 408(b)(2) of the Housing and Community Development Amendments of 1978 (42 U.S.C. 8007(b)(2)) is amended by striking "publish annually and submit to the Congress" and inserting in lieu thereof "publish and submit to the Congress not later than September 30, 1986, and not later than September 30 of every second year thereafter".

REPORTS BY THE DEPARTMENT OF THE INTERIOR

SEC. 209. Section 6 of the Act of June 22, 1936 (49 Stat. 1804), as amended (25 U.S.C. 389e), is further amended by adding the following sentence: "Adjustments, deferrals, and cancellations of charges pursuant to this Act shall be effective only after following the procedure prescribed by the Act of July 1, 1932 (47 Stat. 564; 25 U.S.C. 386a)."

REPORTS BY THE DEPARTMENT OF JUSTICE

SEC. 210. (a) Section 252(i) of the Energy Policy and Conservation Act (42 U.S.C. S. 6272(i)) is amended by striking the words "6 months," and inserting in lieu thereof the words "other year, on an alternating basis,".

(b) Section 488 of the Act of August 19, 1958 (P.L. 85-680; 72 Stat. 631 (1958); 40 U.S.C. 488) is amended—

(1) in subsection (c)(1), by striking the words "aggregate amount of the original acquisition cost of such property to the Government and all capital expenditures made by the Government with respect thereto" and inserting in lieu thereof the words "estimated appraised fair market value";

(2) in subsection (c)(1), by striking the number "$1,000,000" and inserting in lieu thereof the number "$3,000,000"; and

(3) in subsection (c)(2), by striking the words "acquisition cost" and inserting in lieu thereof the words "estimated appraised fair market value.".

REPORTS BY THE DEPARTMENT OF TRANSPORTATION

SEC. 211. (a) Sections 107(b) and 107(c) of the Federal Aviation Act of 1958, as amended, (49 U.S.C. 1307(b) and (c)) are amended as follows:

(1) in section 107(b), strike out "each January 31 thereafter" and insert in lieu thereof "each June 30 thereafter"; and

(2) in section 107(c), strike out "each January 31 thereafter" and insert in lieu thereof "each June 30 thereafter".

(b) Section 315(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1356(a)) is amended by striking out "The Administrator shall submit semiannual reports to the Congress" and inserting in lieu thereof, "The Administrator shall submit semiannual reports to the Congress" and inserting in lieu thereof, "The Administrator shall submit annual reports to the Congress".

REPORTS BY THE DEPARTMENT OF THE TREASURY

SEC. 212. (a) Section 201(f) of the Magnuson Fishery Conservation and Management Act of 1976 as amended (16 U.S.C. 1821(f); 90 Stat. 331) is amended by—

(1) striking out "Secretary of the Treasury, in cooperation with the"; and

(2) striking out the comma after "the Secretary of State".

(b) Section 4(c) of the International Investment Survey Act of 1976 (22 U.S.C. 3103(c); 90 Stat. 2061) is amended by—

(1) striking out "five years" in Subsection (c)(1), inserting in lieu thereof "ten years" and by striking out the paragraph designated "(1)"; and

(2) repealing paragraph (2).

(c) Section 1202(a)(1) of the Tax Reform Act of 1976 (26 U.S.C. 6103(p)(5); 90 Stat. 1684) is amended by deleting the word "quarter" and inserting in lieu thereof the word "year".

(d) Section 701(c)(2) of the International Financial Institutions Act as amended by Section 501(a) of Public Law 96-259 (22 U.S.C. 262d(c)(2)(B) is amended by—

(1) striking subparagraph (B); and

(2) striking subparagraph designation "(A)".

REPORTS BY THE GENERAL ACCOUNTING OFFICE

SEC. 213. Section 11(1) of the AMTRAK Improvement Act of 1974 (45 U.S.C. 644(2)(A)) is amended by striking "The Comptroller General of the United States shall conduct annually a performance audit" and inserting in lieu thereof "The Comptroller General of the United States may conduct audits".

REPORTS BY THE GENERAL SERVICES ADMINISTRATION

SEC. 214. (a) Section 201(7) of the Architectural Barriers Act of 1968, as amended (42 U.S.C. 4157(a)) is amended by inserting after the word "year" the following: "and biennially thereafter".

(b) Section 1(4) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 484(i)(4)(E)) is amended by striking "$3,000 or more" and inserting "$5,000 or more".

REPORTS BY THE NATIONAL SCIENCE FOUNDATION

SEC. 215. Section 3(f) of the National Science Foundation Act of 1950, as amended (42 U.S.C. 1862(f); P.L. 81-507) is amended by deleting the second sentence.

REPORTS BY THE NUCLEAR REGULATORY COMMISSION

SEC. 216. Section 147(e) of the Atomic Energy Act of 1954 (42 U.S.C. 2167; Public Law 96-295), is amended by striking "a quarterly" and inserting in lieu thereof "an annual."

REPORTS BY THE UNITED STATES MERIT SYSTEMS PROTECTION BOARD

SEC. 217. The Civil Service Reform Act of 1978 (5 U.S.C. 7701; P.L. 95-454; 92 Stat. 1140) is amended in section 7701(i)(2) by deleting "calendar" and inserting in lieu thereof "fiscal".

REPORTS BY THE VETERANS ADMINISTRATION

SEC. 218. (a) Section 102(b) of P.L. 98-160 (38 U.S.C. 612A) is amended by striking "October 1, 1986" and inserting "October 1, 1987".

(b) Section 101(b)(2) of P.L. 98-160 (38 U.S.C. 612A) is amended by striking the word "results" and inserting "preliminary findings".

(c) Section 5022 of 38 United States Code (38 U.S.C. 5022) is amended by—

(1) out "$50,000" and inserting in lieu thereof "$100,000" in subsection (a)(2)(A);

(2) inserting "excluding a lease or easement" after "interest in real property" in subsection (a)(2)(B); and

(3) striking "including a lease" from subsection (a)(2)(C).

SEPTEMBER 7, 1984.

Hon. GEORGE BUSH,
President of the Senate, Washington, DC.

DEAR MR. PRESIDENT: I am transmitting, for referral to the appropriate Committee, a legislative proposal entitled the "Congressional Reports Elimination Act of 1984."

This legislation is modeled after the Congressional Reports Elimination Act of 1982 (P.L. 97-375) and is designed to improve the effectiveness and efficiency of agency operations by eliminating or modifying recurring reports to the Congress. These proposals were selected for elimination or modification only after a case-by-case analysis concluded that the reports no longer serve their original purpose, no congressional use is evident, information is provided to the Congress through other sources, or the cost and time involved in the production of a report outweigh its utility or benefit to the government.

This legislative proposal should be viewed not only as one directed at reducing burdens placed on Federal agencies, but also as an attempt to streamline information that flows from these agencies to the Congress. Elimination or modification of the reports

identified in this proposal will permit Federal agencies to devote more attention to the more than 3,000 recurring reports that we will continue to provide to the Congress.

A section-by-section analysis is also enclosed for your information.

This legislative proposal is directly supportive of the President's program to improve the efficiency and effectiveness of Federal Government operations.

Sincerely,

DAVID A. STOCKMAN,
Director.

SECTION-BY-SECTION ANALYSIS OF PROPOSED BILL TO DISCONTINUE OR AMEND CERTAIN REPORTING REQUIREMENTS

TITLE I—MULTIAGENCY

Section 101. (a) Deletes the requirement that the Secretary of Agriculture and the Secretary of Energy submit quarterly reports to the Congress on activities on Biomass Energy Development. Prepared only a few times since enactment of the legislation, this report is no longer considered essential by the Congress and therefore has not been filed recently.

(b) Deletes the requirement that heads of agencies submit annual reports to the Congress concerning agency utilization of scientific or professional positions that are established outside the General Schedule and outside the Senior Executive Service. This requirement duplicates a biennial report submitted by the Office of Personnel Management.

(c) Deletes the requirement that the Secretary of Health and Human Services (HHS) and the Administrator of the Environmental Protection Agency (EPA) report annually to the Congress on conflicts of interest involving HHS or EPA employees who perform functions under the Toxic Substances Control Act.

(d) Deletes the requirement for Federal agencies to complete an annual evaluation of their progress in improving consultant service contractual arrangements. The purpose of the requirement, to assure that agencies had implemented appropriate budgetary controls over consultant service contracts, has been accomplished.

(e) Deletes the requirement that the Director of the Office of Management and Budget (OMB) and the Secretary of the Treasury report annually on their plans to meet the information needs of the Congress. This requirement duplicates information provided to the Congress in other documents.

(f) Repeals the requirement that the Secretary of Defense and the Secretary of Health and Human Services each submit an annual report on the continuation pay program for dentists in the uniformed services. This report requires an inordinate amount of time to prepare and there appears to be little congressional interest in it.

(g) Deletes the requirement that the Secretaries of Health and Human Services, Education, and the Interior report annually to the Senate and the House of Representatives on certain costs associated with the surplus property disposal program. There is no need for a requirement for an annual report. Any information will readily be provided upon request.

EXECUTIVE OFFICE OF THE PRESIDENT

Section 102. (a) Deletes the requirement that the President shall include in each budget for each proposal in the budget for legislation that would establish or expand a government activity or function, a table showing (1) the amount proposed in the budget for appropriation and for expenditure because of legislative proposals in the fiscal year for which the budget is submitted; and (2) the estimated appropriation required because of the legislative proposal for each of the four fiscal years after that year that the proposal will be in effect. The information is already available through reports provided to Congress by OMB comparing long range current services estimates with the long range estimates of the President's budget proposals.

(b) Deletes the requirement that the Director of OMB provide an annual listing of every account containing unvouchered expenditures that are potentially subject to audit by the Comptroller General.

DEPARTMENT OF AGRICULTURE

Section 103. (a) Deletes the requirement that the President submit a report to Congress within 30 days of the submission of his annual budget expressing in qualitative and quantitative terms the extent to which the programs and policies projected under the budget meet the Presidential Statement of Policy submitted under Section 7(a) of the Soil Water Resources Conservation Act. This report duplicates information submitted to Congress in the annual budget and the Secretary's annual report on the effectiveness of the national program.

(b) Deletes the requirement that the Secretary prepare a report describing plans to ensure that eligible members of migrant populations continue to participate in the special supplemental food program. This information will continue to be provided to the National Advisory Council on Maternal, Infant, and Fetal Nutrition during meetings and through correspondence, and to the Congress as requested.

DEPARTMENT OF COMMERCE

Section 104. (a) Deletes the requirement that the Secretary study and report to the Congress on the effects that U.S. and foreign pollution abatement programs have on foreign production costs, market prices and international trade. The absence of reliable foreign cost data prevents meaningful analysis of the topics outlined in this report.

(b) Deletes the requirement that the Secretary report to Congress on the results of information collected during the preceding year upon the condition of manufacturers, domestic trade, currency, and banks of States and territories. This requirement duplicates information in the Economic Report of the President and in the Annual Report of the Council of Economic Advisors.

(c) Deletes the requirement for the Secretary to submit a separate report to Congress on the results of monitoring and research regarding the effects of dumping materials into ocean waters, other coastal waters where tides ebb and flow, or into the Great Lakes or their connecting waters. The information required in this report will be consolidated in the Report to the Congress on Ocean Pollution, Monitoring and Research.

(d) Deletes the requirement for the Secretary to report to Congress that a voluntary product standard has not been developed as he requested or that a published standard has not been observed by the industry. Because manufacturers, packers, and distributors have developed product standards under subsection (d) of the Fair Packaging and Labeling Act and are observing them, there is no need for such a report.

(e) Deletes the requirement that the Administrator of the National Oceanic and Atmospheric Administration review regulations developed pursuant to the provisions of Title I of the Ocean Thermal Energy Conversion Act of 1980 and report to the Congress on the impact of these regulations on the continued development, evaluation, and commercialization of ocean thermal energy conversion.

(f) Deletes the requirement that the Administrator of the National Oceanic and Atmospheric Administration report to the Congress on the administration of the Ocean Thermal Energy Conversion Act of 1980 during each fiscal year.

(g) Deletes the requirement that the Secretary report annually to the Congress on the administration of the provisions of Title IV of the Outer Continental Shelf Lands Act Amendments of 1978.

(h) Deletes the requirement that the Secretary report annually to the Congress on the administration of the National Fisheries Research and Development Program.

(i) Deletes the requirement that the Secretary report biennially to the Congress on the level of taking and the status of bluefin tuna stocks.

(j) Deletes the requirement that the Secretary report annually to the Congress on activities pursuant to the Central, Western and South Pacific Fisheries Development Act.

DEPARTMENT OF DEFENSE

Section 105. (a) This section deletes the requirement that a retired officer or former officer in pay grade 0-4 or above annually submit to the Department an individual report on employment if such person is paid a salary of $15,000 or more per year from a defense prime contractor receiving $10 million or more in negotiated contracts. Also, the section deletes a similar reporting requirement for any former Department of Defense civilian officer or employee who, at any time during the 3-year period immediately preceding the termination of last employment with the Department was paid at a rate equal to or greater than the minimum rate payable for grade GS-13 and was employed by a prime defense contractor at a salary of $15,000 or more. Additionally, the annual reporting requirement will be deleted for a civilian officer or employee of the Department who during a fiscal year was paid a salary equal to or greater than the grade GS-13 rate, and who was previously employed by a defense prime contractor at a salary of $15,000 or more. The Secretary is relieved of the requirement to submit a consolidated report of the above information to the House and Senate and to hold such reports for public review. Repeal of this statute will in no way change existing conflict-of-interest statutes and regulations governing the contracting process.

(b) Deletes the requirement that the Secretary of a military department provide written notice to the Armed Services Committee of the Senate and House of Representatives at least 30 days in advance of acquiring an interest in land that is urgently needed in the interest of national defense when the estimated fair market value is in excess of $100,000 and the urgency is such that the acquisition cannot be included in an annual Military Construction Authorization Act.

(c) Deletes the requirement that the Secretary of a military department, or his designee, submit a report to the Committee on Armed Services of the Senate and House of Representatives before entering into the ac-

quisition, lease, transfer, or disposal of property exceeding $100,000.

(d) Deletes the requirement to report annually to the President and to Congress on the condition and operation of Defense Department working capital funds established under 10 U.S.C. 2208(i).

(e) Deletes the requirement that the Secretary of the Army annually report to the Congress on the inventory of agreements between the Secretary of the Army and each non-Federal interest which will be reimbursed for construction of any water resource project sponsored by the Corps of Engineers.

(f) Deletes the requirement that the Secretary of a military department report to the Committee on Armed Services of the Senate and the House of Representatives on leases in foreign countries if the average estimated annual rental during the term of the lease is more than $250,000.

(g) Amends the Arms Export Control Act by repealing the requirement to submit the reports on: (1) price and availability estimates which details Defense articles, equipment and services provided by the U.S. Government to foreign countries under Section 28(a) of the Arms Export Control Act; and (2) price and availability estimates for request for issuance of letters of offer received by the U.S. Government from foreign countries under section 28(b) of the Arms Export Control Act.

(h) This section amends the Arms Export Control Act by repealing the requirement to submit reports to Congress on proposed leases of Defense property to a foreign country, or emergency waivers of the waiting period subject to presidential approval.

(i) Deletes the requirement that annual assessments on children enrolled in the Department of Defense Dependent's Education System be submitted to Congress. Under Section 1405(a) the Director is required to assess annually the performance of the Department of Defense dependents' education system in providing an education of high quality to children enrolled in the system. Section 1405(b) provides that the results of each annual assessment with respect to an individual enrolled in the system shall be made available to the sponsor of such individual, and summary results shall be made available to professional employees in the system. The results of the assessments are available upon request.

DEPARTMENT OF EDUCATION

Section 106. (a) Deletes the requirement that the Secretary make an annual report to Congress on activities of Centers on Education Media and Materials for the Handicapped. This report provides no useful information that is not reported elsewhere, e.g., in the budget justification.

(b) Deletes the requirement that studies evaluating the impact and effectiveness of programs authorized by the Rehabilitation Act of 1973 (29 U.S.C. 713) be reported annually to Congress and to the public. The Department disseminates executive summaries of evaluation studies, and full reports are available upon request. Evaluation findings are not always available annually, given the time required for certain studies.

(c) Deletes (1) the requirement in the Rehabilitation Amendments Act of 1984 that each agency that conducts a client assistance program shall submit an annual report to the Secretary on the operation of the program during the previous year, including a summary of the work done and the uniform statistical tabulation of all cases handled by such program, and (2) the requirement that a copy of each report be submitted to the Congress by the Secretary along with a summary of such reports and the Secretary's evaluation of the program including appropriate recommendations. This information will be included in the Annual Report on Federal Activities related to the Administration of the Rehabilitation Act.

(d) Deletes the requirement that an annual report on the findings and recommendations of the National Advisory Council on Continuing Education be reported to the President, the Congress, and the Secretary. This reporting requirement is duplicative of the requirement that all statutory advisory councils make such a report (Section 443(a)(2)) of the General Education Provisions Act (20 U.S.C. 1233(b)).

(e) Deletes the requirement that the Secretary report biennially to the Congress on the findings and recommendations of the Office of Education Professional Development. The Office of Education Professional Development was abolished in 1981.

(f) Amends the Higher Education Act of 1965, as amended by the Education Amendments of 1980, to eliminate the requirement of an annual report (interpreted as a report to Congress) which includes an index and analysis of the books or research materials produced under Title IV. This report is duplicative of other efforts in both the public and private sectors, such as: (1) a fully indexed Department of Education publication which cumulatively lists all completed research projects funded since the inception of the program in 1957, and (2) annual announcements to the public of research underway in the relevant newsletter of the Center of Applied Linguistics.

(g) Amends the Department of Education Organization Act (20 U.S.C. 346(a)(2)) to eliminate two reports on the allocation and use of work-years. This information is routinely provided as part of the justification of the President's Department of Education Salaries and Expenses Budget Request.

DEPARTMENT OF ENERGY

Section 107. (a) Deletes the requirement that the Secretary, under P.L. 93-275, submit to the Congress semi-annually a report on the impact of energy shortages and the Secretary's actions on employment and the economy.

(b) Deletes the requirement that the Secretary, under P.L. 93-577, submit a report prior to the establishment of any joint Federal-industry experiment, demonstration, or commercial corporation. This reporting requirement is not necessary because congressional action is required prior to the establishment of the corporation.

(c) Deletes the requirement under the Department of the Interior and Related Agencies Appropriations for Fiscal Year 1980 Act, P.L. 96-126, that the Secretary submit a written report to Congress every six months detailing the activities carved out under the appropriation for the Special Energy Security Reserve Fund.

(d) Deletes the requirement that the Secretary submit quarterly reports to the President and the Congress containing statistical information about energy sources.

(e) Deletes the requirement for an annual report on coal reserves disclosure. The United States coal reserves are estimated to last in excess of 300 years.

(f) Eliminates the reporting requirements under the Financial Reporting System (FRS). The FRS requires detailed information on the structure of the energy industry. The availability of this information from sources both within and outside of the government coupled with the burdensome nature of the FRS reporting requirements justifies repeal.

(g) Deletes the requirement that the Department of Energy submit to Congress an annual summary of combined DOE-industry efforts to develop and demonstrate technologies for synthetic fuels from coal; improved recovery methods for natural gas, petroleum, and oil from shale; and development of advanced methods of utilizing fossil fuels.

(h) Deletes the requirement that the Secretary, under P.L. 96-345, submit a report to Congress on a study of prospects for application of wind energy systems in foreign countries.

(i) Deletes the requirement for the Secretary to submit biennial reports to Congress on actions taken pursuant to section 6(a) of P.L. 96-571. In 1982 the Alaska Power Administration submitted a comprehensive report under section 6(a) describing in full the actions taken under the Act. There remains nothing further to report with the exception of information that could be incorporated easily into the Department's annual report.

(j) Deletes the requirement under Section 314 of P.L. 94-187 that the Secretary make a determination on proposed fossil energy major construction projects exceeding $250,000 and report to the Congress. This requirement related to FY 1976 appropriations. The Department of Energy no longer has FY 1976 funds under this statute.

(k) Deletes the requirement under subsection 908(d) of P.L. 95-87 that the Secretary submit annually a report on the research studies, survey, experiments or demonstration of alternate coal mining technologies. Pubic Law 97-257 transferred responsibility for this program to the Department of the Interior.

(l) Deletes the requirement under section 106 of the Energy Security Act that (1) the President submit an annual report to Congress on actions taken with regard to synthetic fuel development, contracts, loan guarantees, bids, liability, and with regard to the Synthetic Fuels Corporation, and (2) the President transmit to Congress (a) energy targets and reports thereon in 1981 and every second year thereafter, and (b) reports on net imports, domestic production and end-use consumption of synthetic fuels for calendar years 1985, 1990, 1995 and 2000. The Defense Production Act Amendments transferred the projects covered by this report to the Synthetic Fuels Corporation which has assumed responsibility for reporting this information to Congress.

(m) Amends the Public Utility Regulatory Policy Act to eliminate the requirement that the Secretary (1) report to Congress on rate design initiatives by non-regulated electric utilities and State regulatory authorities, and (2) submit annual reports by non-regulated gas utilities and State regulatory authorities, on adoption and implementation of certain business practices including service termination policies and recovery of costs of advertising.

(n) Eliminates the requirement that certain major energy consuming industries report annually to the Secretary and that the Secretary submit an annual report to the Congress on the industrial energy efficiency program.

(o) Deletes the requirement that the Secretary submit annual reports to the Congress which contain an analysis of the effect of the termination of the excise tax exemption provided under Section 4041(k) and

4081(c) of the Internal Revenue Code of 1954 on the alcohol fuel industry.

(p) Deletes the requirement that the Secretary submit annual reports to the Congress on alcohol fuels and use of alcohol in fuel. For the most part this requirement duplicates information already provided to the Congress. To the extent that the information in this report is not duplicative, it will be included in the Department's Annual Report to the Congress.

(q) Deletes the requirement that the Secretary submit annually to Congress a detailed description of the comprehensive program management plan currently in effect.

(r) Deletes the requirement that the Secretary transmit annually to Congress a detailed description of the status of the Ocean Thermal Energy Conversion (OTEC) comprehensive program management plan.

(s) Deletes the requirement that the Secretary update annually the comprehensive technology application and market development plan.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Section 108. (a) Deletes the requirement that the Secretary annually reports to the Congress on the number, progress, and results of contracts and grants for developing and evaluating methods to measure the effects of toxic substances. This information will be supplied to the Congress upon request.

(b) Deletes the requirement that the Secretary report annually to the Congress on health services research, health statistics, health care technology, and international cooperation in these fields and in biomedical research. Much of this information duplicates information provided in the reports required by sections 306(k)(4)(6) and 308(a)(2) of the Public Health Service Act (42 U.S.C. 242(m)(a)).

(c) Deletes the requirement that the Secretary submit an annual report to the President for submission to the Congress on disease control activities.

(d) Amends the Public Health Service Act to eliminate the requirement that the Secretary annually submit to the Congress a report on the National Health Service Corps. For the most part, the information in this report is available in other reports, and additional information will be supplied to the Congress upon request.

(e) Deletes the requirement that the Secretary submit an annual report on the National Health Service Corps Scholarship Program. Although this report may have been useful when the program was new, the need no longer exists. Any information desired by the Congress will be submitted upon request.

(f) Deletes the requirement that the Secretary periodically study and report to the Congress on State and Federal control of health hazards from electronic product radiation, standards for the use of nonmedical electronic products, and procedures for the detection and measurement of electronic product radiation. This information would continue to be supplied to the Congress upon request and, as appropriate, in the FDA annual report.

(g) Deletes the requirement that the Secretary annually submit to the President for submission to the Congress a report on the administration of the electronic product radiation control program. This information would continue to be supplied to the Congress upon request and, as appropriate, in the FDA annual report.

(h) Deletes the requirement that the Secretary report annually on the administration of the functions of the Public Health Service. The information provided in this report is duplicative of information routinely furnished in the course of congressional budgetary hearings and legislative oversight hearings. In addition, many of the agencies' offices also submit individual comprehensive reports to Congress, duplicating information in this report.

(i) Deletes the requirement that the Secretary report to the House Committee on Energy and Commerce and the Senate Committee on Labor and Human Resources (formerly the Committee on Labor and Public Welfare) on the number of filled first year positions in direct or affiliated medical residency programs at medical schools eligible to receive capitation grants. This information will be provided to the committees upon request.

(j) Deletes the requirement that the Secretary annually furnish the Congress with a five-year plan for population research and family planning. The annual five-year plan may have been a desirable planning device when the program was new, to insure momentum and thoughtful choices. At this time, however, the need no longer exists.

(k) Deletes the requirement that the Secretary transmit an annual report on sudden infant death syndrome research. Much of the information submitted in these reports is already submitted in other reports. Further, the Department will readily submit any other information that is requested.

(l) Deletes the requirement that the Secretary submit an annual report on health maintenance organizations. Although this report may have been useful when the HMO program was starting up, it is no longer useful. Further, any desired information will be submitted upon request.

(m) Deletes the requirement that the Secretary report annually on Health Maintenance Organization (HMO) financial information, including insider transactions. Since no adverse impact on the fiscal soundness of an HMO has been found in the reports prepared to date, the requirement to submit further reports is a burdensome and unnecessary expense.

(n) Deletes the requirement that the Secretary annually submit to the President for transmittal to the Congress a report on the status of health information and health promotion, preventive health services, and education in the appropriate use of health care. This recurring reporting requirement is repealed because the information it provides is furnished in at least three different reports to Congress. Also eliminated is the requirement that the Secretary study health education services and preventive health services to determine the coverage of such services under public and private health insurance programs. This study has already been conducted.

(o) Deletes the requirement that the Secretary compile data and periodically publish findings on reports received from States on family planning services which the States are required to provide to individuals receiving Aid to Families with Dependent Children (AFDC). This subsection would also eliminate the requirement for an annual report to the Congress on these State programs. The Omnibus Budget Reconciliation Act of 1981, in converting the social services program, repealed the requirement that the States submit to the Secretary the reports on their family planning services programs upon which the Secretary's reports were formerly based.

(p) Deletes the requirement that the Secretary report annually on the numbers and activities of advisory committees appointed to carry out Social Security Act functions. This reporting requirement is duplicative of the requirement at section 6(c) of the Federal Advisory Committee Act (5 U.S.C. App. 2) which requires the President to report to the Congress on the activities of all advisory committees.

(q) Deletes the requirement that the Secretary report annually to the Congress on the program for peer review of the utilization and quality of health care services. This requirement duplicates information provided to the Congress in hearings and in the President's Budget. Additional information will be provided upon request.

(r) Deletes the requirement that the Secretary periodically submit legislative recommendations to further the use of home dialysis and transplantation by individuals suffering from end stage renal disease. This requirement is unnecessary; any recommendations will be submitted to the Congress upon request.

(s) Deletes the report on the End Stage Renal Disease Program (ESRD) that the Secretary is required to submit annually to the Congress. Although this report may have been a useful planning device early in the ESRD Program, it is no longer necessary. Further, any information that is requested will be readily supplied.

(t) Deletes to report on the effectiveness of State Medicaid utilization control programs that the Secretary is required to submit quarterly to the Congress. A requirement for an annual report is not necessary. The information can easily be provided upon request.

(u) Deletes the requirement that the Secretary report annually to the Senate Committee on Labor and Human Resources and the House Committee on Energy and Commerce on the activities of advisory councils established pursuant to the Public Health Service Act or the Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963. This reporting requirement is duplicative of the requirement of section 6(c) of the Federal Advisory Committee Act (5 U.S.C. App. 2) which require the President to report to Congress on the activities of all advisory committees.

(v) Deletes the requirement that the Secretary report annually to the Congress on the status and accomplishments of centers funded under the Runaway and Homeless Youth Act. This annual report was useful the first few years after the centers were established. However, now that they are well established, routine reporting is no longer essential. Information on the status and accomplishments of centers will be supplied upon request.

(w) Deletes the requirement that the Secretary transmit biennially a report on research into the effects of changes in atmospheric ozone on human health. There is no need for this reporting requirement as the Department will report to the Congress on recent research as requested.

(x) Deletes the requirement that the Secretary report annually to the Congress on the status of handicapped children in Head Start programs. Since no problem in meeting the statutory goal has been identified, and handicapped enrollment is stable, routine report submissions are unnecessary. Information will of course be submitted to Congress upon request.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Section 109. (a) Repeals Section 904 of the Housing and Community Development Act of 1977, which requires HUD to report annually on prototype housing costs for one-to-four family dwelling units for each housing market area of the United States. The provision was originally enacted because of Congressional concern that nationally uniform maximum mortgage amounts did not reflect market area price differences. The information was to be used as the basis for legislation to make mortgage limits more reflective of area-by-area housing costs. However, the information is no longer necessary. Section 336 of the Housing and Community Development Act of 1980 authorized the Secretary to increase maximum mortgage amounts on an area-by-area basis, based upon median housing prices in a given area. The Department, to implement Section 336, has developed areawide housing prices for the entire country. Therefore, there is no further need for the prototype report.

(b) Deletes Section 311 of the Energy Conservation Standards for New Buildings Act of 1976 which requires the Secretary to monitor the progress made by States and localities in adopting and enforcing Building Energy Performance Standards (BEPS), to identify procedural obstacles or technical constraints inhibiting implementation of these standards, to evaluate the effectiveness of the standards, and to report to Congress semiannually on these issues. When this provision was enacted, BEPS were mandatory requirements, and the report was intended to provide information for Congress to monitor BEPS' implementation and to make a final decision on the appropriate sanctions to force States and localities to adopt energy conservation codes which met or exceeded the BEPS requirements. However, the Omnibus Budget Reconciliation Act of 1981 (P.L. 97-35) has made BEPS voluntary rather than mandatory. Therefore, the information contained in the report on implementation of mandatory requirements is no longer needed, and the question of sanctions is moot.

(c) Deletes the requirement to submit upon the request of the Congress evaluation reports on the application of solar energy to residential housing demonstration projects. Congress never requested such report and the demonstration program expired in FY 1979.

(d) Deletes the requirement that the Secretary report annually to Congress with respect to the status of HUD-assisted housing abandonment demonstration projects. The Department has not sponsored any demonstrations on housing abandonment under this authority and has no plans to do so in the future. Thus, the reporting requirement is unnecessary.

DEPARTMENT OF THE INTERIOR

Section 110. (a) Deletes the requirement that the Secretary report to the President and Congress, from time to time, on investigations of projects for the conservation, development and utilization of the water resources in Alaska. This requirement is obsolete, having been effectively superseded by the Alaska Statehood Law. P.L. 85-508.

(b) Deletes the Congressional reporting requirement mandating that the Secretary (1) conduct an ongoing investigation of areas nationwide having the potential for inclusion in the National Park System, (2) prepare a comprehensive report outlining such areas' potential for inclusion in the National Park System, and (3) compile a list of at least twelve of these areas annually.

(c) Deletes the requirement that the Secretary of the Interior shall report to the Congress on June 1 of each calendar year the status of the financial disclosure statements filed by Interior employees who performed duties or functions under the National Park System—Mining Activity Act during the preceding calendar year. This report contains a summary of general findings, problems encountered, and any actions taken on employees required to file financial disclosure statements under the Mining in the Parks Act.

(d) Deletes the public disclosure requirement of financial statements by officers and employees of the Department of the Interior and the resulting report to Congress. Section 207(c) of the Ethics Act (P.L. 95-521) supersedes any general requirement under any other provision of law and regulation with respect to the reporting of information required for purposes of preventing conflict of interest or apparent conflicts of interest. A Department of Justice opinion has interpreted this section to in effect eliminate the filing requirement established by the "Sunshine in Government" clause of P.L. 94-579.

(e) Deletes the public disclosure requirement of financial statements by officers and employees of the Department of the Interior and the resulting report to the Congress. Section 207(c) of the Ethics Act (P.L. 95-521) supersedes any general requirement under any other provision of law and regulation with respect to the reporting of information required for purposes of preventing conflicts of interest or apparent conflicts of interest. A Department of Justice opinion has interpreted this section to in effect eliminate the filing requirement established by the "Sunshine in Government" clause of P.L. 95-372.

(f) Deletes the requirements that the Secretary of Energy submit annually a report on research studies, surveys, experiments or demonstrations of alternate coal mining technologies. This program was transferred to the Department of the Interior in September 1982.

(g) Deletes the public disclosure requirement of financial statements by officers and employees of the Department of the Interior and the resulting report to Congress. Section 207(c) of the Ethics Act (P.L. 95-521) supersedes any general requirement under any other provision of law and regulation with respect to the reporting of information required for purposes of preventing conflict of interest or apparent conflicts of interest. A Department of Justice opinion has interpreted this section to in effect eliminate the filing requirements established by the "Sunshine in Government" clause of P.L. 95-619.

(h) Eliminates the biennial report on the administration of the Wild Horses and Burros Act of 1971, that the Departments of the Interior and Agriculture are required to submit to the Congress. This information could more appropriately be included in these agencies' annual reports.

(i) Deletes the requirement to submit an annual report on all negotiated agreements to compensate the United States, or the United States and its lessees, for drainage of oil or gas from United States deemed lands, by wells drilled on adjacent lands.

(j)(1) Deletes the requirement for a report to be submitted to Congress 30 days before any lease sale. The information in this report duplicates the information already included in the Final Notice of Lease Sale which is transmitted to Congress before each sale.

(2) Deletes the requirements contained in Section 205 of the Outer Continental Shelf Lands Act Amendments for an annual report to Congress on the use of various bidding options. This requirement was promulgated in conjunction with a five-year experimental period to test alternative bidding systems. The experimental period has expired.

(k) Deletes the requirement for an annual report to Congress prepared after consultation with the Attorney General, and which discusses recommendations for promoting competition in the leasing of Outer Continental Shelf Lands. This report requirement was promulgated in conjunction with a five year experimental period to test alternative bidding systems. The five year period has since expired.

(l) Deletes the requirement for an annual report on the implementation of the Federal Oil and Gas Royalty Management Act and progress on reconciling account balances. The information contained in this report is duplicative of the information reported to Congress in other documents, in particular the annual budget submissions.

(m) Deletes the requirement of the biennial report to Congress on the investigation and determination of the Maximum Attainable Rate (MAR) of production of crude oil and natural gas from significant outer continental shelf fields. This information is no longer a valid basis for the Congress to use in order to determine whether the Outer Continental Shelf production is sufficient to meet supply emergencies.

(n) Deletes the requirement for reports to Congress on proposed disposition of a per capita share of any fund which has remained unpaid and unclaimed for more than six years.

(o) Deletes the requirement of reporting to Congress any proposed contract for the sale, operation, maintenance, repair or relocation of facilities administered by the Bureau of Indian Affairs.

(p) Deletes the requirement for a separate report to be submitted to the Comptroller General of the General Accounting Office and the Congress concerning all shut-in oil and flaring wells. A provision requiring that a list of these wells be included in the Secretary's annual report to Congress on the Outer Continental Shelf (OCS) leasing program is retained in section 207 of the Outer Continental Shelf Land Act as amended by P.L. 95-372 (43 U.S.C. 1343).

(q)(1) Deletes the requirement for the annual report on the administration of right-of-way activities. This requirement duplicates information contained in the Bureau of Land Mangement's annual publication Public Land Statistics.

(2) Deletes the requirement for the Secretary or agency head to notify the House and Senate Committee on Interior and Insular Affairs (1) when applications are received for a right-of-way for pipelines 24 inches or more in diameter, and (2) when the agency intends to grant the right-of-way together with detailed findings as to terms and conditions to be imposed. Unless waived by the committees, the latter notice must be submitted sixty days prior to the right-of-way being granted. Both reports are quite voluminous, and the second one can cause project delays.

DEPARTMENT OF JUSTICE

Section 111. (a) Eliminates the requirement that an annual report to the Congress by the Secretary of the Interior on the leasing and production of coal lands contain a

report by the Attorney General on competition in the coal and energy industries, including an analysis of whether the antitrust provisions of the Federal Coal Leasing Act and the antitrust laws are effective in preserving or promoting competition in the coal or energy industry.

(b) Deletes the requirement that a report be submitted when a prosecution is not pursued for an alleged violation of 18 U.S.C. 2101(a). 18 U.S.C. 2101(a) provides that a Federal crime is committed by anyone engaging in interstate or foreign commerce with the intent to incite a riot, to organize or promote a riot, to commit any act in furtherance of a riot or to aid or abet any person in inciting a riot. 18 U.S.C. 2101(d) provides in part that the Department of Justice shall report to the Congress when a determination is made not to seek prosecution of an individual under 18 U.S.C. 2101(a). The determination to prosecute a particular Federal crime is one of the major responsibilities of the Department of Justice. The purpose or need to report declinations of prosecutions in this area versus the numerous other areas is questionable. In fact, the public disclosure of a determination not to seek prosecution in any area may be unfair to the individual subject to an investigation. It would be more appropriate to treat offenses under 18 U.S.C. 2101 in a manner similar to other offenses.

(c) Deletes (1) the requirement that the Attorney General make or direct the Federal Trade Commission to make surveys of activity of the government which may affect small business, for the purpose of determining factors which may tend to eliminate competition, create or strengthen monopolies, promote undue concentration or economic power, or otherwise injure small business, and (2) the requirement that the Attorney General submit to Congress and the President, at least once a year, reports and recommendations on the results of the required surveys.

DEPARTMENT OF LABOR

Section 112. (a) Deletes the requirement that whenever the Secretary has reason to believe that any industry covered by the Fair Labor Standards Act is adversely affected by foreign competition, a study of the matter with a report to the Congress should be undertaken. This requirement duplicates the provision under Section 163 of the Trade Act of 1974.

(b) Deletes an annual joint report to the Congress from the Secretaries of Labor and Education on the status of bilingual vocational training which describes efforts by both departments to support bilingual vocational training and other programs for persons whose English-speaking ability is limited. This report is to be submitted annually although no submission date is specified. This report duplicates the Department of Education's annual evaluation report which includes information on bilingual vocational training.

(c) Deletes the requirements that the Secretary report annually to the Department of Energy, the Department of Housing and Urban Development, the Office of Management and Budget, and the Congress, on the impact of energy technology on energy development and conservation employment.

(d) Deletes the requirements for an annual report by the Secretary of Labor on the Work Incentive Program under Part C of Title IV of the Social Security Act. Any needed information on activities under this program can be included in the annual report of the Secretary.

DEPARTMENT OF STATE

Section 113. (a) Repeals section 306(b) of the Foreign Assistance Act of 1961, requiring semi-annual reports to the Congress on United States Government contributions to international organizations. The reporting of voluntary contributions is also required by section 2 of P.L. 81-806 which mandates annual reporting of all financial contributions by the United States to international organizations in which the United States participates as a member. That annual report by the Secretary of State, includes much of the information required by section 306(b), making the semi-annual report redundant and unnecessary.

(b) Amends the Foreign Service Act of 1980 to delete the requirement in section 703(f) for an annual report to the Congress on the status of the professional development program. The report was originally mandated to encourage interagency coordination and attention to career development matters. Better means have been developed to accomplish these ends.

DEPARTMENT OF TRANSPORTATION

Section 114. (a) Deletes the requirement that reports be submitted to Congress each year on all sales and chartering activities under the Merchant Ships Sales Act of 1946.

(b) Deletes the requirements that the Secretary each year report to appropriate committees of the Congress on agreements to provide for participation of military personnel in carrying out the functions of the Department, and on the number, rank, and position of members of the armed services detailed pursuant to these agreements.

(c) Deletes the requirement for a biennial report to Congress by the Secretary on railroad-highway crossings demonstration projects.

(d) Deletes the requirements for annual reports by the Secretary to Congress on the hazard elimination program and the rail crossings program. (These two reports have been consolidated into a single Annual Report on the Stewardship of the Highway Safety Program.)

(e) Deletes the requirement for the Secretary to report annually to Congress on: (1) the latest annual inventory of state penalties for violation of vehicle weight laws, rules, and regulations; (2) the latest annual inventory of State systems for issuance of special permits authorizing vehicles to exceed the weight limitations for such vehicle under State law, rule or regulation; and (3) the annual certification by each State which indicates that it is enforcing all State laws governing maximum vehicle size and weights permitted on the Interstate, primary, urban and secondary systems.

(f) Deletes the requirements for annual reports by the Secretary to Congress on the hazard elimination program and the rail crossings program. (These two reports have been consolidated into a single Annual Report on the Stewardship of the Highway Safety Program.)

(g) Deletes the requirement for the Secretary to report to Congress monthly on the amount of obligation, by State, for Federal-aid Highway and the Highway Safety Construction programs.

(h) Deletes the requirement for the Secretary to annually report to the Congress on each State's highway safety performance.

(i) Deletes the requirement that the Secretary examine pipelines and associated facilities on Federal lands annually and report safety problems and corrective actions to the President, the Congress, the Secretary of the Interior, and the Interstate Commerce Commission.

DEPARTMENT OF THE TREASURY

Section 115. (a) Deletes the requirement that the Secretary report to Congress each year on the financial condition and the results of the operations of the Reforesting Trust Fund during the preceding fiscal year, and on the expected condition and operations during the next fiscal year.

(b) Repeals the requirement that the National Advisory Council on International Monetary and Finance Policies include in its annual report: (1) certain data on loans approved by the multilateral development banks; and (2) information on steps taken by member countries of the Inter-American Development Bank to restrain their military expenditures, and to preserve and strengthen free and democratic institutions.

(c) Repeals the requirement that the Secretary submit an annual report to Congress evaluating the effects of policies adopted by certain countries, resulting from standby agreements with the International Monetary Fund, on the basic human needs in such countries. The report has proven to be of limited usefulness because of unsurmountable problems in obtaining complete and current data, and in identifying linkages between macroeconomic policies adopted under IMF programs and their microeconomic effects on basic human needs. Relevant data on loans approved by the multilateral development banks are generally available to the public through the annual reports of the respective institutions, and are provided quarterly to the Congress under the International Financial Institutions Act (P.L. 95-118; 91 Stat. 1067), as amended by Sec. 501(a) of P.L. 96-259 (94 Stat. 431). Information on the military expenditures of countries, which receive assistance under the Foreign Assistance Act of 1961, as amended (P.L. 87-195; 75 Stat. 424), or to which sales are made under the Agricultural Trade Development and Assistance Act of 1954, as amended (P.L. 83-480; 68 Stat. 454), is provided to the Congress in annual reports (Foreign Assistance Act, Sec. 620 (s)(2)).

(d) Amends the Tax Reform Act of 1976 to eliminate the annual report on disclosures of tax returns and return information and the public report of requests for inspection and disclosure of tax returns information.

(e) Deletes the requirement that the Secretary report to Congress each year on the financial condition and results of operations of the Black Lung Disability, Airport and Airway, and Highway Trust Funds during the preceding fiscal year and on the projected condition and operations of the Funds during the next five fiscal years.

(f) Deletes the requirement that the Secretary shall on the first day of each regular session of Congress, submit to the Senate and House of Representatives a report setting forth as of the close of the preceding September 30, the aggregate and individual amounts of the contingent liabilities and the unfunded liabilities of the Government, and of each department, agency, and instrumentality thereof.

(g) Deletes the requirement that the Secretary submit an annual report on the financial condition and results of the operations of the Nuclear Waste Fund during the preceding fiscal year.

(h) Deletes the requirement that the Secretary report to the Congress each year on the financial condition and the results of

the operations of the Inland Waterways Trust Fund during the preceding fiscal year and on its expected conditions and operations during the next five fiscal years.

(i) Deletes the requirement that the Secretary shall report to the Congress each fiscal year on the financial condition and results of the operations of the Hazardous Substance Response Trust Fund for the past fiscal year and its expected condition and operations during the next five years.

(j) Deletes the requirement that the Secretary make an annual report on the statement of liabilities and other financial commitments of the United States.

(k) Deletes the requirement that the Secretary make an annual report on the financial condition of the Highway Trust Fund.

(l) Deletes the requirement that the Secretary make an annual report on the financial condition of the Panama Canal Commission Fund.

(m) Deletes the requirement that the Secretary make an annual report on the financial condition of the Interim Storage Fund.

AGENCY FOR INTERNATIONAL DEVELOPMENT

Section 116. (a) Deletes the requirement that the President submit annual reports on the amount of foreign exchange resources and other funds that aid recipients spend to acquire weapons. This requirement is particularly onerous due to the specificity of its terms.

(b) Deletes the requirement that the Chairman of the Development Coordination Committee submit a report on the dollar value of all U.S. foreign assistance and guarantees by category and by country as presented to Congress for the immediately preceding fiscal year. This data is already available to Congress in the congressional presentation for the preceding year, making the requirement in this section of the Foreign Assistance Act (FAA) repetitive. Repealing this requirement would eliminate the need to laboriously enter the requested data by hand, since it is not maintained in the computer data base once the operating year budget is established.

(c) Deletes the requirement that the Chairman of the Development Coordination Committee (DCC) submit a report on the dollar value of all official development assistance and all other types of assistance provided by the Organization for Economic Cooperation and Development (OECD) countries and Organization of Petroleum Exporting Countries (OPEC), and that such data also be shown as a percentage breakdown. These data are almost impossible to derive, since other donors do not disaggregate and report official development assistance into categories comparable to those used in categorizing United States assistance. In addition, data on assistance by OPEC countries are particularly sparse and available, if at all, only in gross aggregated terms. Finally, such data as are available for both categories of donors are already contained in the annual report by the DCC Chairman, as well as in other OECD and World Bank publications.

CONSUMER PRODUCT SAFETY COMMISSION

Section 117. Amends the Consumer Product Safety Act by deleting the requirement for a report to Congress describing the enforcement of the Interim Safety Standards for cellulose insulation during the most recent 6-month period.

ENVIRONMENTAL PROTECTION AGENCY

Section 118. (a) Deletes the requirement in Section 33(a)(7) of the Solid Waste Disposal Act Amendments of 1980 that the National Advisory Commission on Resource Conservation and Recovery, established in the executive branch and appointed by the President, submit an interim report on February 15, 1982. This report was to focus on the Commission's initial review of the following: existing budgetary priorities and program goals of the Federal resource conservation and recovery program; the status of existing technology; the economic development or savings potential, including markets, for recovered energy materials; and the institutional obstacles impeding the development of resource conservation programs. The membership of the Commission was appointed by the President on January 19, 1981. To date, the Commission has not met and no funds have been appropriated to support its activities.

(b) Deletes the requirement in the 1980 amendments to the Resource Conservation and Recovery Act that an Interagency Coordinating Committee, chaired by EPA and include representatives from the Departments of Energy, Commerce, the Treasury, and others, prepare and submit to the Congress an annual five-year action plan. The plan, on Federal resource conservation or recovery activities, is to propose among other things, programs to encourage resource conservation or material and energy recovery as well as to describe a coordinated and non-duplicatory Federal program to achieve this purpose. The Inter-agency Committee has never been activated, and there is no expectation that it will be in the near future.

(c) Deletes the requirement for an annual report on hazardous waste activities. Since 1978 this information has been included in the Agency's budget request and has been provided during annual oversight hearings. It need not be submitted to the Congress as a separate annual report.

(d) Deletes the requirement for a one-time report on State and local needs for trained personnel to implement the resource conservation program.

(e)(1) Deletes the requirement that the Administrator report to the Congress on the consequences of major emitting facilities, (i.e., those facilities having the potential to emit 250 tons or more per year of a particular pollutant), and on the prevention of significant deterioration (PSD) in air quality. The issue of the effect of source coverage under PSD has been addressed and analyzed by EPA, the National Commission on Air Quality, the Business Roundtable, and other major industrial and environmental groups. In light of the extensive analysis already undertaken by EPA and other governmental and private groups, further work on this subject would be duplicative.

(2) Deletes the requirement that the Administrator complete a study and report to the Congress on the progress made on the prevention of significant deterioration of air quality and the problems associated with doing so. This information duplicates the discussion of the PSD program included in the agency's annual report to the Congress on measures taken in the implementation of the Clean Air Act under Section 313.

(f) Deletes the requirement in the Clean Air Act Amendments of 1977 that EPA report to the Congress on the public health implications of attaining a nitrogen oxides (NO_x) emissions standard of 0.4 gram per mile (gpm) for light-duty motor vehicles. Also to be included in the report are an assessment of the costs and technological requirements of attaining such a standard as well as the need for such a standard to protect public health and welfare. The report is also to include recommendations and was to be submitted to the Congress no later than July 1, 1980. EPA has submitted extensive information to the Congress indicating that, outside of California, there is no current foreseeable air quality or health need for a standard more stringent than 1.0 gpm. With regard to the requirement for an assessment of the technological requirements of attaining such a standard, the State of California already has a standard of 0.4 gpm, so, the technological feasibility has already been demonstrated, at least for gasoline-powered vehicles.

(g) Deletes the requirement for an annual report on motor vehicle fuel consumption. Staff engineers with the Agency's Office of Mobile Sources have been preparing annually since 1975 a technical paper on this subject for the Society of Automotive Engineers. This data is generated on a regular basis within the Agency and will continue to be made available each year.

(h) Deletes the requirement that the Administrator report to the Congress by August 1979 the findings and results of the study of the effects on health and welfare of particulate emissions from motor vehicles or motor vehicle engines, authorized under Section 214(a). This report would duplicate information already provided in other reports already available to Congress.

(i) Deletes the requirement that the EPA Administrator report to the Congress within six months of the date of enactment of this section (August 7, 1977), and each year thereafter regarding the status of the contractual arrangements and conditions necessary to enter into appropriate arrangements with the National Academy of Sciences (NAS) to conduct continuing comprehensive studies and investigations of the public health and welfare effects of mobile source emissions, including sulfur compounds, and the technological feasibility of meeting standards on mobile source emissions. A requirement to report yearly on the "contractual arrangements and conditions" for the purpose of carrying out the work called for in this section of the statute appearing unnecessary. In the past, informal liaison with appropriate Congressional staff has been sufficient to keep Members of Congress apprised of the contractual arrangements involved and to address any concerns which may arise in this connection.

(j) Deletes the requirement that the Administrator submit a report to Congress, after consultation with the States and river basin commissions established under the Water Resources Planning Act, analyzing the relationship between programs under that statute and other programs by which States and Federal agencies allocate quantities of water. The river basin commissions were abolished in 1981.

(k) Deletes the requirement that the Administrator submit to the Congress at least once every six years a report on studies of the effects of pollution in the estuaries and estuarine zones of the U.S., on fish and wildlife, on commercial fishing, on recreation, on water supply and water power, and on other beneficial purposes. This report duplicates information already available through other reporting mechanisms, specifically the water quality inventory that is required under section 305(b) of the Clean Water Act as well as other specific estuary studies.

(l) Deletes the requirement that the Administrator submit an annual report on measures taken toward the objectives of the Clean Water Act. This report largely dupli-

cates information collected for the Congress and the public in connection with several other statutorily mandated reports.

(m) Deletes the requirement that the Administrator, in cooperation with the Secretary of Energy, the Secretary of Commerce, and the Federal Trade Commission conduct a study of environmental problems associated with used oil recycling. On January 1, 1981, EPA transmitted to the Congress a report, "Listing of Waste Oil as a Hazardous Waste", under Section 8 of the Used Oil Recycling Act. This report presented the Agency's basis for determining that certain waste oils are hazardous wastes, according to criteria promulgated under the Solid Waste Disposal Act, as amended in 1976. The Agency is currently studying the appropriate regulatory requirements for these oils, pursuant to the Used Oil Recycling Act. Since the required components of this study and report to the Congress have been completed or are in the process of being satisfied, it is no longer necessary to retain this requirement.

(n)(1) Deletes the regulation that the Administration conduct studies and make periodic reports to Congress on costs of carrying out the National Interim Primary Drinking Water Regulations pursuant to Section 1412(a) of the Safe Drinking Water Act. This requirement duplicates information already provided to Congress during yearly oversight investigations on EPA drinking water activities under the Safe Drinking Water Act.

(2) Deletes the requirement that the Administrator, not later than May 1979, submit a report to the Congress identifying the anticipated costs of compliance with interim and revised national primary drinking water regulations. The basic information outlined by this requirement has been provided to the Congress in discussions of alternate financing and related issues, particularly during oversight hearings.

(3) Deletes the requirement that the Administrator submit a report to the Congress on the present and projected future availability of an adequate and dependable supply of safe drinking water to meet present and projected future needs. Information similar to that covered in this report is routinely provided to members of Congress and their staffs, during oversight hearings and upon request. This paragraph also redesignates the remaining paragraphs in this subsection.

(o) Deletes the requirement that the Administrator report to the Congress on the results of a study with the National Academy of Sciences to determine maximum safe contaminant levels in the drinking water. The subject matter has been addressed extensively in reports prepared by the National Academy of Sciences and submitted in May 1977 pursuant to Section 1412(e)(1) of the Safe Drinking Water Act. The information required by this reporting requirement has been satisfied through existing reporting mechanisms.

(p) Deletes the requirement that the Administrator, not later than April 1 of each year, submit a report on the activities under the Safety Drinking Water Act together with a recommendation for necessary legislation and a statement on the actual and anticipated cost to public water systems in each State for compliance with the requirements of the subchapter. Much of the required information duplicates data already being provided to the Congress by existing reporting mechanisms.

(q) Deletes the requirement that the Administrator annually submit a comprehensive five-year plan for environmental research, development, and demonstration including extensive budget projections and Environmental Protection Agency Science Advisory Board comments.

(r) Deletes the requirement that the Administrator carry out a continuing analysis of the effect of applying non-nuclear energy technologies to evaluate the adequacy of non-nuclear conservation programs and environmental protection. Since 1981, the scope of the non-nuclear energy research and development program has been reduced.

(s) Deletes the requirement for an annual report containing (1) information on a program which continually monitors emissions from new coal-burning electric power plants, and (2) an assessment of the public health and welfare implications of such emissions in the atmosphere. This requirement duplicates information already provided to Congress by the Environmental Protection Agency and other Federal agencies under other statutory authorities.

FEDERAL COMMUNICATIONS COMMISSION

Section 119. The report deleted in this section describes Commission proceedings involving Comsat's organization and activities and it summarizes international and domestic satellite activities. This information is already included in the Commission's annual report.

FEDERAL ENERGY REGULATORY COMMISSION

Section 120. (a) Deletes the requirement that the Commission automatically be required to assemble, distribute, and report to the Congress information concerning compacts dealing with the conservation, production, transportation, or distribution of natural gas. Since the States involved would have to propose the compact to Congress, thus providing information directly to Congress, the Commission could become involved as a third party unnecessarily.

(b) Deletes the requirement that the Federal Energy Regulatory Commission submit a classified annual report to Congress showing permits and licenses issued under the Federal Power Act, the parties thereto, the terms prescribed, and the moneys received. This report is redundant because Congress is advised directly by copies of licenses and preliminary permits or other orders that are mailed to Congressmen and Senators within whose districts the projects are located.

FEDERAL LABOR RELATIONS AUTHORITY

Section 121. Repeals the requirement that the Authority make an annual report to Congress containing information as to the cases it has heard and the decisions it has rendered.

GENERAL ACCOUNTING OFFICE

Section 122. (a) Amends the Outer Continental Shelf Lands Act to eliminate the requirement that the Comptroller General submit to the Congress annual reports on offshore oil and gas wells suspended from production (shut-in) or wells with natural gas burned off (flared).

(b) Amends the Civil Service Reform Act of 1978 to eliminate the requirement that the Comptroller General submit to the Congress an annual report on the significant actions of the Merit Systems Protection Board under Title I of the Act and of the Office of Personnel Management, including an analysis of whether or not the actions of the Office are in accord with merit system principles and free from prohibitive personnel practices.

(c) Amends Title 31 to eliminate the requirement that the Comptroller General submit an annual report on progress in improving program and budget information for Congress.

GENERAL SERVICES ADMINISTRATION

Section 123. (a) Deletes the requirement for the Administrator to make a biennial report to Congress on the progress made in meeting the objectives of the Federal Property and Administrative Services Act. This report duplicates information provided to the Congress in the Administration's annual reports to Congress required under Section 203(o), 202(e), and 212 of the Federal Property and Administrative Services Act of 1949, as amended.

(b) Deletes the requirement for the Administrator to submit an annual report to the Congress on the status of each public building under construction, alteration, or acquisition. This report duplicates information already reported to the Congress.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Section 124. Deletes the requirement in 5 U.S.C. 648(f) that the National Aeronautics and Space Administration submit an annual report on cooperative efforts between NASA's Industrial Application Centers (IACs) and Small Business Development Centers and on ways to strengthen the IAC network.

NATIONAL SCIENCE FOUNDATION

Section 125. Deletes a requirement that the National Science Foundation make quarterly reports to Congress on the activities of its Office of Small Business Research and Development.

NUCLEAR REGULATORY COMMISSION

Section 126. Deletes the requirement that the Nuclear Regulatory Commission prepare and submit to the Congress a quarterly report which documents, for grades GS-11 or above: (1) the number of minority and women candidates hired by grade level; (2) the number of minority and women employees promoted, by grade level; (3) the procedures followed by the Commission in preparing job descriptions, informing potential applicants of decisions, and selecting from candidates the persons to be employed in positions at grade GS-11 or above; and (4) the other steps taken to meet the provisions of the Equal Employment Act. The information in this report duplicates information annually submitted to the EEOC and subsequently reported to Congress by that Agency.

OFFICE OF PERSONNEL MANAGEMENT

Section 127. Deletes the requirement that the Office of Personnel Management submit a report by February 1 of each year to the House Committee on Post Office and Civil Service and the Senate Committee on Governmental Affairs. This report lists the positions in GS-16, GS-17, and GS-18 for the preceding calendar year including the total number of positions placed or allocated to all these grades, in each grade, and the total number of such positions in existence. The name, rate of pay, and description of the qualifications of the incumbent in each of these positions is provided, together with the position title and a statement of duties and responsibilities. Also included are the position or positions in or outside the Government held by each incumbent and the rates of pay for the 5 year period preceding the appointment to the present position. Only approximately 700 positions remain at the GS-16, GS-17, and GS-18 levels. The majority of these are Administrative Law

Judges and those in agencies excluded from the Senior Executive Service—e.g., Government corporations and intelligence agencies. This report is largely outmoded by the Civil Service Reform Act of 1978 (CSRA), P.L. 95-454 and the requirement to publish Senior Executive Service Information in the Federal Register.

SMALL BUSINESS ADMINISTRATION

Section 128. Deletes the requirement in Section 10 of the Small Business Act, as amended, that the Small Business Administration transmit, no later than December 31 of each year, to the Senate Select Committee on Small business and the Committee on Small Business of the House of Representatives a sealed report of complaints alleging illegal conduct by employees of the Administration which were received or acted upon by the Administration during the preceeding fiscal year. This requirement is duplicative of a requirement in the 1978 Office of the Inspector General Act, (5 U.S.C. (5)(a) Appendix 1), that the Office of the Inspector General provide biennial reports to Congress on all investigations.

VETERANS ADMINISTRATION

Section 129. (a) Deletes the requirement that the Chief Medical Director report through the Administrator to the appropriate committees of the Congress justifying the need to exceed the cap of 45.1 million dollars for patient care and an explanation as to the need to exceed the cap. The report requires periodic review of the Veterans Administration (VA) reporting system to determine when the cap will be reached since the information required is not routinely reported. Cost and statistical data are available through automated reporting systems at the end of each quarter and for the fiscal year. The report does not appear to serve a useful purpose since it does not prevent the VA from exceeding the cap and does not result in any constructive or remedial action after the fact.

(b) Deletes the requirement that the Chief Medical Director submit to Congress through the Administrator of Veterans Affairs a full report on the implementation of section 601(4)(C)(v) of Title 38, United States Code. The report must also include information on the number of veterans receiving contract and fee basis care, the average cost per visit or day, the duration of care, and summaries of each of fifteen separate categories of entitlement by State, including the possessions and territories, the District of Columbia, and the Commonwealth of Puerto Rico. This detailed information is not available in current VA computer-assisted statistical systems. It must be collected manually at each VA medical facility. Using this manual collection method with computer tabulation support, the cost of complying with the reporting requirement is conservatively estimated at $1,104,000 per year. Resources allocated to this data collection effort can be directed more appropriately toward direct support of the VA health care delivery system.

(c) Deletes the requirement that the Administrator report to the Congress on the number of cases granted equitable relief for administrative error. The last report summarized 25 cases in which a total of $37,808 was granted in equitable relief by the Administrator. This report appears to have minimal utility to the agency and to the Congress.

(d) Deletes the requirement that the Administrator report annually to the Congress on the nature and disposition of all cases involving deceptive advertising, sales, or enrollment practices by educational institutions. The most recent report included only 35 cases nationwide. Many of these involved only minor infractions and all were promptly collected.

TITLE II

MULTI-AGENCY

Section 201. (a) Amends the requirement that the Secretary of the Interior and the Secretary of Health and Human Services each submit an annual report on actions taken to recruit and train Indians for Indian preference positions. The report will now be submitted bienially, and additional information will be provided between reporting periods as necessary.

(b) Amends the annual requirement of the Secretary of the Interior and the Secretary of Health and Human Services to submit a report on actions taken to transfer non-Indian employees in the Bureau of Indian Affairs and the Indian Health Service to other positions. The report will be submitted biennially. Information will be readily provided between reporting periods if requested.

(c) Amends the requirement that the Secretary of Labor and the Secretary of Health and Human Services each submit an annual report on occupational safety and health. The amendment would make the report biennial and would also eliminate the specific date by which the reports are due, thereby allowing consolidation of this report with other related reports.

EXECUTIVE OFFICE OF THE PRESIDENT

Section 202. (a) Amends Section 1515(b)(2) of Title 31 U.S.C., P.L. 97-258, to remove the requirement that detailed reports must be made to the Congress when appropriations are apportioned on a deficiency basis to permit payment of Federal pay raises.

(b) Deletes the requirement that the supplementary summary of the budget which the President transmits to the Congress before July 16 of each year include: (1) for the four fiscal years following the fiscal year for which the budget is submitted, information on estimated expenditures for programs authorized to continue in future years, or that are considered mandatory under law, and (2) for future fiscal years information on estimated expenditures of balances carried over from the fiscal year for which the budget is submitted.

(c) Amends the annual reporting requirement contained in Section 9503 of Title 31 of the United States Code to require that Federal pension plans be submitted every five years.

(d) Amends the Impoundment Control Act to require that only those deferrals which are not temporary, financial management actions need to be reported to Congress in a special message.

(e) Amends the Impoundment Control Act to require that the Cumulative Report be submitted on a quarterly instead of a monthly basis.

(f) Amends the requirement for the submission of current service estimates by the President to the Congress from on or before November 10 of each year to the submission of the estimates concurrent with the transmittal of the President's budget.

DEPARTMENT OF AGRICULTURE

Section 203. Amends the requirement that the General Sales Manager submit quarterly reports to the Chairman, House Committee on the Budget; Chairman, House Committee on Agriculture; Chairman, Senate Committee on Agriculture, Nutrition and Forestry; and Chairman, Senate Committee on the Budget. An annual report would be submitted in lieu of the quarterly report.

DEPARTMENT OF COMMERCE

Section 204. (a) Amends the requirement that the Secretary submit an annual report to the Congress on or before January 1 of each year on his actions under Section 7 of the Marine Resources and Engineering Development Act of 1966. A biennial report will be submitted in lieu of the annual report.

(b) Amends the Foreign Trade Zones (FTZ) Act to reduce the reporting requirements on zone grantees and/or on the Board by; (1) eliminating reports from zones and from the FTZ Board to the Congress on zone finances; and (2) eliminating the need for attaching zone reports to the Board's report to Congress. The number of zone projects has increased from 10 to 98 since 1970, significantly increasing the reporting burden of the FTZ Board.

(c) Modifies the requirement that the Secretary of Commerce revise the National Climate Plan every two years to enable the Secretary to prepare and submit revisions as appropriate. This modification will save the Secretary significant printing and publication costs each year that the Plan does not have to be revised, and enables the Department to allocate personnel resources more efficiently.

(d) Modifies the requirement that the Secretary submit to the Congess an annual report on research activities with respect to the possible long-range effects of pollution, over-fishing, and man-induced changes to ocean ecosystems. A biennial report will be sumitted in lieu of the annual report.

DEPARTMENT OF EDUCATION

Section 205. (a) Amends Public Laws 81-815 and 81-874 to provide for a report on actual payments for individual school districts every second year instead of every year. By changing the reporting frequency, it will be possible to show actual payments for individual school districts rather than estimated payments at half the cost of producing the annual repoort.

(b) Deletes the requirement that the Secretary evaluate the procedures of each State education agency, local education agency, and intermediate education unit, but retains the requirement for an aggregate evaluation of effectiveness.

(c) Amends Section 417 of the General Education Provisions Act to require the Secretary to transmit to the Congress biennially rather than annually an evaluation report which examines the effectiveness of the Department's programs in achieving their statutory purposes and make recommendations to improve the effectiveness of these programs.

(d) Amends Section 112(c) of the Vocational Education Act of 1963 to require the Secretary to submit to Congress biennially rather than annually a report on the status of vocational education.

DEPARTMENT OF ENERGY

Section 206. Amends the statutorily mandated deadline for submission of the first quarterly report required on activities under the Strategic Petroleum Reserve Amendments Act of 1981.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Section 207. (a) Amends the International Health Research Act of 1960 to require the President to report to the Congress on international health research activities biennially rather than annually. Updates will be

provided between reporting periods as requested.

(b) This subsection requires the Secretary to report on progress made in affecting the purposes of the Indian Health Care Improvement Act biennially rather than annually. The information in this report does not alter enough to justify an annual submission.

(c) This section requires the Director of the National Institute of Occupational Safety and Health to submit a report on the operations of that Institute biennially rather than annually. Information will be supplied between reporting periods as requested.

(d) This section requires the Secretary to publish a report on carcinogens biennially rather than annually. The information in these reports does not change enough to justify the expense involved in annual submissions.

(e) Amend the Public Health Service Act to eliminate the requirement that the annual report of the Director of the National Cancer Institute on the National Cancer Program be submitted by November 30 of each year. Eliminating the specific due date will allow consolidation of this report with other mandated reports.

(f) This subsection requires the Director of the National Institute of Arthritis, and Digestive and Kidney Diseases to submit a report on the Institute's activities biennially rather than annually, and would eliminate the specific date by which the report is due. The information in these reports does not change enough to justify annual submissions of this report.

(g) This subsection requires the Secretary to report on the activities of diabetes research and training centers biennially rather than annually, and would eliminate November 30 as the specific date by which the report is due. Eliminating the specific due date will allow submission of this report in conjunction with other reports.

(h) This subsection requires the Secretary to report on multi-purpose arthritis centers biennially rather than annually, and would eliminate November 30 as the specific date by which the report is due. Information will be submitted between reporting periods as requested by the Congress.

(i) Eliminates the requirement that a validation of the accreditation of the Joint Commission on the Accreditation of Hospitals be included in the continuing study of Medicare by the Secretary. Routine submission of this validation is no longer necessary, although it will of course be submitted upon request.

(j) This subsection amends the provisions of the Age Discrimination Act of 1975 requiring Federal departments and agencies to submit reports to the Secretary, as well as the Secretary to submit reports to the Congress. The present requirement for annual reports is amended to provide for such reports after 1984 only as the Secretary deems necessary.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Section 208. (a) Amends a provision in the Department of Housing and Urban Development Act requiring the Secretary to report annually to Congress concerning (1) activities undertaken with respect to Indian and Alaska Natives programs, (2) estimates of such costs of projected activities, (3) the conditions of Indian and Alaska Native housing, and (4) recommendations for legislative or other action. The Department has found that the statistics developed for the report vary little from year to year. Therefore, the report's purpose could be accomplished in a more useful manner and at less expense by requiring the report to be provided every two years instead of annually. If this amendment is enacted, the next report under this provision would be issued not later than December 1, 1985.

(b) Amends Section 408(b)(2) of the Housing and Community Development Amendments of 1978. This provision requires the Secretary to publish and submit an annual report to Congress on the impact and effectiveness of assisted congregate services programs. The proposed amendment would make the report requirement biennial instead of annual. The report is to be based, in part, on evaluations of the performance of nonprofit corporations and public housing agencies receiving congregate housing assistance. A biennial report would allow the Department to make more comprehensive study of program experiences. If this amendment is enacted, the next report under this provision would be issued not later than September 30, 1985.

DEPARTMENT OF THE INTERIOR

Section 209. Amends the requirement to report adjustments of irrigation charges due from non-Indian landowners served by irrigation projects administered by the Bureau of Indian Affairs. The statute currently contains an erroneous citation to Section 2 of the Act of June 22, 1936.

DEPARTMENT OF JUSTICE

Section 210. (a) Amends Section 252(i) of the Energy Policy and Conservation Act, by changing the requirement for a semi-annual report by the Attorney General and the Federal Trade Commission on the impact on competition and small business of actions authorized by the International Voluntary Agreements section of the Act to require that such report be made at least once every other year by each agency on an alternating basis.

(b) Amends Section 488(c) (1) and (2) of the Act of August 19, 1958, by (1) changing the basis for evaluating the monetary limit for both real and the basis for evaluating the monetary limit for both real and personal property from acquisition cost (plus capital expenditures in the case of real property) to "estimated appraised fair market value"; and (2) establishing a minimum value of $3,000,000 for both real and personal property before requiring advice from the Attorney General on whether the disposition of property would tend to create or maintain a situation inconsistent with the antitrust laws.

DEPARTMENT OF TRANSPORTATION

Section 211. (a) Amends section 107(b) of the Federal Aviation Act of 1958, as amended, which requires the Secretary to submit annual reports to the Congress and the Civil Aeronautics Board on the extent to which the implementation of the Airline Deregulation Act of 1978 has affected, during the preceding calendar year, or will affect in the succeeding calendar year, the level of air safety. The amendment changes the submission date of the report from January 31 to June 30. The subsection also amends Section 107(c) of the Federal Aviation Act of 1958, as amended, which requires the Secretary of Transportation to submit to Congress and the Civil Aeronautics Board recommendations with respect to the level of surveillance necessary to enforce air safety regulations. The amendment changes the submission date of the recommendations from January 31 to June 30.

(b) Amends section 315(a) of the Federal Aviation Act of 1958, as amended, which requires the Administrator of the Federal Aviation Administration to submit semiannual reports to the Congress on the effectiveness of the civil aviation security program. The amendment changes the submission from a semiannual to an annual report.

DEPARTMENT OF THE TREASURY

Section 212. (a) This section transfer primary responsibilities to the Secretaries of Commerce and State from the Secretary of the Treasury, for preparing the annual Report on Fishery Allocations, Permits and Foreign Import Barriers.

(b) Amends the International Investment Survey Act of 1976 to reduce the frequency of reporting from once every five years to every ten years. Deletes Section 4(c)(2) of the International Investment Survey Act of 1976, as amended by Section 2 of P.L. 97-33, which requires an annual report to Congress pertaining to United States investment abroad.

(c) Amends Section 1202(a)(1) of the Tax Reform Act of 1976 to make the Report on Procedures and Safeguards an annual, rather than a quarterly report.

(d) Deletes the requirement that the annual report of the National Advisory Council on International Monetary and Financial Policies contain information on loans considered by the multilateral development banks, and the U.S. position on loans. This information is duplicative of information already submitted to the Congress under Subsection 501(a) of P.L. 96-259.

GENERAL ACCOUNTING OFFICE

Section 213. The AMTRAK Improvement Act of 1974 requires that the Comptroller General annually conduct a performance audit of the Corporation and submit a report of the audit to Congress. This section makes the performance audit and required report discretionary rather than mandatory.

GENERAL SERVICES ADMINISTRATION

Section 214. (a) Deletes the requirement that the Administrator report annually to the Congress on the activities directed towards facilitating access to public buildings by the physically handicapped. The report would instead be made biennially.

(b) Amends the requirement that the Administrator submit an annual report to the Congress showing the acquisition cost of all donated personal and real property which exceeds $3,000. The report would be submitted biennially and include personal and real property valued equal to or in excess of $5,000.

NATIONAL SCIENCE FOUNDATION

Section 215. Amends the National Science Foundation Act of 1950 to eliminate a requirement that the National Science Foundation Annual Report include information concerning the acquisition and disposition by the Foundation of any patents and patents rights.

NUCLEAR REGULATORY COMMISSION

Section 216. This section amends the Atomic Energy Act of 1954 to reduce the frequency of the report, Non-disclosure of Safeguards Information. The report will continue to be issued annually.

UNITED STATES MERIT SYSTEMS PROTECTION BOARD

Section 217. Amends the Civil Service Reform Act of 1978 to allow the Merit Systems Protection Board to use (for the analysis and reporting required by 5 U.S.C.

7701(i)(2)) fiscal year data which it otherwise collects and reports.

VETERANS ADMINISTRATION

Section 218. (a) Extends by one year the October 1, 1986, date by which the Administrator must submit to the Committee on Veterans Affairs of the Senate and House of Representatives a report on the results of a study of post-traumatic stress disorder.

(b) Amends the requirement that the readjustment counseling report which is to be submitted on April 1, 1987, contain the findings of the post-traumatic stress disorder study provided for in 38 U.S.C. 612A. This change is necessary because the post-traumatic stress disorder study will not be completed until after the readjustment counseling report has been submitted. This amendment will allow the readjustment counseling report to contain any preliminary findings of the post-traumatic stress disorder study that are available.

(c) Amends the requirement to notify Congress concerning transfers of interests in Veterans Administration real property valued at less than $100,000 and transfers in the form of a lease or easement. Raising the reporting requirement from properties valued in excess of $50,000 to $100,000 will reduce the number of reports required, making the management of Veterans Administration real property more efficient and will also expand the use of Federal property.

By Mr. HATFIELD:

S.J. Res. 359. Joint resolution to designate July 23, 1985, as "Ulysses S. Grant Day"; to the Committee on the Judiciary.

ULYSSES S. GRANT DAY

● Mr. HATFIELD. Mr. President, in the final, hectic days of this session, amid the legislative and appropriations deadlines competing for congressional action at this time, I want to introduce a joint resolution commemorating the life of one who worked, as we do now in our deliberations, to improve the situation of the people of this Nation.

Today I take great pleasure in recognizing the contribution to the history of our Nation made by our 18th President, Ulysses S. Grant, as the 100th Anniversary of his death nears next year. Having debated civil rights issues in recent days, we must remind ourselves of such struggles in the past. It is our duty to honor those who in previous times worked for the rights of all our citizens. That recognition deserves to be bestowed on President Grant for what he did to secure the unity of the Nation and to extend civil rights to blacks following the divisive Civil War.

Mr. President, I should like to bring to the attention of my colleagues the life and achievements of President Grant. Born and schooled in Ohio, the son of a tanner and farmer, Grant went on to attend the U.S. Military Academy at West Point. He excelled in mathematics and horsemanship, and upon graduation in 1843, served his first appointment as an infantryman in the Mexican War, 1846–1848. Although deploring this war which he felt was fought to extend slavery, Grant served with distinction and emerged from the conflict as a captain.

In subsequent years Captain Grant served at a variety of remote Army posts, as far away as Fort Vancouver in the Oregon Province. He grew unhappy with these far-flung assignments and in 1854 resigned the military to move with his wife, Julia, and family, to St. Louis, MO, and later to Galena, IL.

With the Confederate secession from the Union, Grant offered his services to the Northern Army, strongly believing in the need to reunite the Nation. Appointed as a colonel over volunteers in Illinois, Grant was soon promoted to brigadier general in Missouri. Grant's bold action enabled him to capture Fort Donelson on the Cumberland River in one of the first important Northern victories of the war, and winning for himself promotion to major general.

His famed response of "no terms except an unconditional and immediate surrender" to Confederate attempts at an armistice earned him the nickname "Unconditional Surrender" Grant and raised speculation that that was the meaning of his first two initials.

Following the triumphant, yet bloody, battle at Shiloh on the Tennessee River, Grant was criticized for his troop losses. Urged to replace Major General Grant, President Abraham Lincoln refused saying, "I can't spare this man—he fights." Grant was a ruthless fighter and by his attitude and military tactics embodied his belief that the Union must be restored at all costs.

Beginning with his successes in the Mississippi River Valley campaigns, the most notable being the capture of strategic Vicksburg, Grant was given greater responsibility and more critical assignments until he was selected by President Lincoln to take command of the entire Union Army of over one-half million men, as a lieutenant general. Leaving his troops with energy and determination Grant proposed a unified plan and coordinated effort of all Union forces to fulfill the goal of ending the war..

The personal characteristics that carried Grant to the zenith of his military career continued to be displayed as General of the Army. He had deep resources of character and a quiet forcefulness, decisiveness and tenacity that won him the respect and confidence of his subordinates and helped him plan and carry out military oper-

ations. Behind the unprepossessing exterior and the modesty of manner lay a powerful, strategic genius.

Grant realized military success would not come with the capture of localities alone, but with the destruction of armies as well. His military philosophy was to resist retreat and his strategy was sound: To divide the Confederate armies, engage them in battle simultaneously, and continue to hammer away at them until they were forced to retreat and surrender.

In the spring of 1865 Confederate troops under Lee surrendered to Grant at Appomattox near Richmond. Grant's terms were magnanimous, as he released Lee and his soldiers on their honor, and he allowed them to keep their horses. This decisive battle signaled the end of the war which was over 17 days later.

After President Lincoln's death, Grant was the North's foremost war hero. His military successes during the Civil War and his generous treatment of Lee at Appomattox had made him a popular hero in both the North and South. Grant served for a short time as Secretary of War under President Andrew Johnson, and his strengthened Republican ties led to his nomination for President in 1868, a candidate embodying the forces that maintained the Union. The last line of his acceptance letter, "Let us have peace," constituted his contribution to American opinion and it became the Republican campaign slogan.

Grant became President and went on to win reelection easily in 1872. During the course of his two terms he faced the difficult circumstances and demanding conditions that existed in the aftermath of the Civil War. An emotionally divided nation needed to be united and the South rebuilt. To this end Grant pardoned many former Confederate leaders and limited the use of Federal troops stationed in the South. Turmoil and violence continued in the South with the harassment and persecution of freed blacks. Believing President Johnson's policies had permitted the Southern States to restrict black rights, Grant worked to enfranchise the blacks. He enforced the 14th and 15th amendments giving citizenship to blacks and making illegal the denial of voting rights to males of any race. In 1870 and 1871 force bills were passed to ensure the voting rights for blacks; 200,000 blacks had served in the Union Army and Grant acknowledged their great contribution to the Northern victories. He worked to help them through the Freedman's Bureau which offered the freed blacks help in obtaining education, homes, jobs, and protection of their interests.

There were economic as well as emotional tensions for Grant to deal with as President. Taking steps to fund the confused mass of Civil War securities, Grant also worked to hold off a panic of the gold market.

Following his terms in office the former President traveled the world with his family, eventually settling in New York where, in financial difficulty, he began to prepare his memoirs.

President Grant wrote the memoirs, in collaboration with Mark Twain, while slowly dying of throat cancer. Written modestly and with a sense of humor, Grant's story of his career ranks high among military autobiographies. Unfortunately, Grant never saw the success of his book having died before its publication in 1885.

Ulysses S. Grant's reputation and lasting image is one of a military giant, the most important military leader for the Union during the Civil War. Recognized by his bluntness, lack of ostentation, and the success of his operations, he advanced from the saddle to the President's chair—the model of American individualism and opportunity.

Shortly before he died Grant told his doctor how years before, on the way to a reception in his honor he came across a stranger who was going to the reception, as well. "I have always thought that he was a very much overrated man," said the stranger to Grant. "That's my view also," was Grant's reply. Such was the humility with which Grant viewed his life and achievements.

But today we recognize that he was not an overrated man. He is deserving of his excellent reputation. President Grant is memorialized here in Washington, DC by the Grant Memorial located at the east end of the Mall, near the west front of the Capitol. The imposing sculpture by Henry Merwin Shrady shows General Grant mounted on his horse between two sculpture groups of military figures. July 23, 1985 will mark the 100th Anniversary of the death of President Ulysses S. Grant. Plans are being made at this time to celebrate the day with appropriate festivities, including a military ceremony to be held at the Grant Memorial. To remind ourselves and our Nation of the great contributions of this former President, I am introducing a resolution to declare July 23, 1985 as "Ulysses S. Grant Day".

Joining me in the introduction of this resolution are Senators D'AMATO, GLENN, METZENBAUM, and PERCY.

I ask unanimous consent that the resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 359

Whereas July 23, 1985 marks the one-hundredth anniversary of the death of President Ulysses S. Grant;

Whereas Ulysses S. Grant served as General of the Union Army during the Civil War, fought to restore the Union, and commanded the victorious Union Army at the close of the Civil War; and

Whereas Ulysses S. Grant as the eighteenth President of the United States, worked to unite the North and South following the Civil War, to rebuild the war damaged South, and to extend civil rights to blacks: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That July 23, 1985 is designated as "Ulysses S. Grant Day", and the President of the United States is authorized and requested to issue a proclamation calling upon all government agencies and the people of the United States to observe the day with appropriate ceremonies, programs, and activities.●

ADDITIONAL COSPONSORS

S. 2770

At the request of Mr. MELCHER, the name of the Senator from Arkansas [Mr. BUMPERS] was added as a cosponsor of S. 2770, a bill to protect consumers and franchised automobile dealers from unfair price discrimination in the sale by the manufacturer of new motor vehicles, and for other purposes.

S. 2956

At the request of Mr. WARNER, the names of the Senator from South Dakota [Mr. PRESSLER] and the Senator from Alabama [Mr. HEFLIN] were added as cosponsors of S. 2956, a bill to recognize the organization known as the Navy Wives Clubs of America.

S. 2958

At the request of Mr. BINGAMAN, the name of the Senator from West Virginia [Mr. BYRD] was added as a cosponsor of S. 2958, a bill to amend the Public Works and Economic Development Act of 1965 to authorize appropriations for additional fiscal years.

S. 3008

At the request of Mr. ARMSTRONG, the name of the Senator from South Dakota [Mr. PRESSLER] was added as a cosponsor of S. 3008, a bill to recognize the organization known as the Retired Enlisted Association, Inc.

S. 3010

At the request of Mr. BUMPERS, the name of the Senator from Washington [Mr. GORTON] was added as a cosponsor of S. 3010, a bill to amend the act of May 29, 1884, to grant States and political subdivisions greater flexibility in conducting indemnity programs for the control and eradication of brucellosis of domestic animals, and for other purposes.

S. 3034

At the request of Mrs. KASSEBAUM, the names of the Senator from Texas [Mr. TOWER], the Senator from Kansas [Mr. DOLE], the Senator from North Carolina [Mr. EAST], the Senator from Kentucky [Mr. FORD], the Senator from Alabama [Mr. HEFLIN], the Senator from Maryland [Mr. MATHIAS], and the Senator from Vermont [Mr. LEAHY] were added as cosponsors of S. 3034, a bill to grant a Federal

charter to the National Society, Daughters of the American Colonists.

S. 3047

At the request of Mr. HEINZ, the names of the Senator from New Jersey [Mr. BRADLEY], and the Senator from Idaho [Mr. SYMMS] were added as cosponsors of of S. 3047, a bill to amend the Trade Act of 1974.

S. 3059

At the request of Mr. GORTON, the name of the Senator from Oklahoma [Mr. NICKLES] was added as a cosponsor of S. 3059, a bill to amend the Congressional Budget and Impoundment Control Act of 1974 to impose limits on aggregate Federal outlays, and for other purposes.

SENATE JOINT RESOLUTION 339

At the request of Mr. HOLLINGS, the name of the Senator from Mississippi [Mr. COCHRAN] was added as a cosponsor of Senate Joint Resolution 339, a joint resolution designating March 1985 as "National Mental Retardation Awareness Month."

SENATE JOINT RESOLUTION 352

At the request of Mr. DANFORTH, the name of the Senator from Utah [Mr. HATCH] was added as a cosponsor of Senate Joint Resolution 352, a joint resolution designating October 1984 as "National Head Injury Awareness Month."

SENATE RESOLUTION 241

At the request of Mr. LEVIN, the name of the Senator from Rhode Island [Mr. CHAFEE] was added as a cosponsor of Senate Resolution 241, a resolution expressing the sense of the Senate that the foreign policy of the United States should take account of the genocide of the Armenian people, and for other purposes.

SENATE RESOLUTION 386

At the request of Mr. CRANSTON, his name was added as a cosponsor of Senate Resolution 386, a resolution entitled the "Mandela Freedom Resolution."

At the request of Mr. LEVIN, the name of the Senator from Massachusetts [Mr. KENNEDY] was added as a cosponsor of Senate Resolution 386, supra.

SENATE RESOLUTION 466

At the request of Mr. GORTON, the names of the Senator from Iowa [Mr. JEPSEN], and the Senator from Illinois [Mr. PERCY] were added as cosponsors of Senate Resolution 466, a resolution expressing the sense of the Senate that the Customs Service should suspend for a period of at least 6 months the interim regulations issued on August 3, 1984, which change the standards and procedures for U.S. imports of textiles and apparel.

SENATE RESOLUTION 467

At the request of Mr. ROTH, the name of the Senator from Florida [Mrs. HAWKINS] was added as a cosponsor of Senate Resolution 467, a resolution expressing the appreciation of the Senate to members of the entertainment industry, especially the Entertainment Industries Council, for their concern over the drug problem in America, and urging the industry to undertake a comprehensive program to communicate to the citizens of the United States the dangers of drug abuse.

AMENDMENT NO. 7043

At the request of Mr. THURMOND, the name of the Senator from Montana [Mr. MELCHER] was added as a cosponsor of Amendment No. 7043 proposed to House Joint Resolution 648, a joint resolution making continuing appropriations for the fiscal year 1985, and for other purposes.

AMENDMENTS SUBMITTED

RELIEF OF THERESE NYUWIUR POUPELE KPODA

SIMPSON AMENDMENT NO. 7066

Mr. STEVENS (for Mr. SIMPSON) proposed an amendment to the bill (S. 2518) for the relief of Therese Nyuwiur Poupele Kpoda; as follows:

On page 1, line 3, insert after "That," the following: "(a)".

On page 2, after line 4, add the following:

"(b) Section 101(a)(9) of the Immigration & Nationality Act (8 U.S.C. 1101(a)(9)) is amended by deleting the second sentence thereof."

INCREASE IN PUBLIC DEBT LIMIT

KENNEDY AMENDMENT NO. 7067

Mr. KENNEDY (for himself and Mr. HATFIELD) proposed an amendment to the joint resolution (H.J. Res. 654) increasing the statutory limit on the public debt; as follows:

At the appropriate place in the joint resolution, insert the following:

NUCLEAR WEAPONS FREEZE AND REDUCTIONS

SEC. . The Congress finds that the greatest challenge facing the Earth is to prevent the occurrence of nuclear war by accident or design.

HATFIELD (AND OTHERS) AMENDMENT NO. 7068

Mr. HATFIELD (for himself, Mr. KENNEDY, Mr. PELL, Mr. BAUCUS, Mr. BINGAMAN, Mr. BRADLEY, Mr. BUMPERS, Mr. BURDICK, Mr. CRANSTON, Mr. DODD, Mr. EAGLETON, Mr. GLENN, Mr. HART, Mr. HUDDLESTON, Mr. INOUYE, Mr. LAUTENBERG, Mr. LEVIN, Mr. MATSUNAGA, Mr. MELCHER, Mr. MITCHELL, Mr. MOYNIHAN, Mr. PROXMIRE, Mr. RIEGLE, Mr. SARBANES, Mr. STAFFORD, and Mr. TSONGAS) proposed an amendment to amendment No. 7069 proposed by Mr. KENNEDY (and Mr. HATFIELD) to the joint resolution (H.J. Res. 654), supra; as follows:

At the end of the amendment add the following:

(2) the nuclear arms race is dangerously increasing the risk of a holocaust that would be humanity's final war; and

(3) a mutual and verifiable freeze followed by reductions in nuclear warheads, missiles, and other delivery systems is needed to halt the nuclear arms race and to reduce the risk of a nuclear war.

(b) As an immediate arms control objective, the United States and the Soviet should—

(1) pursue an immediate and complete halt to the nuclear arms race;

(2) decide when and how to achieve a mutual verifiable freeze on the testing, production, and further deployment of nuclear warheads, missiles, and other delivery systems; and

(3) give special attention to destabilizing weapons whose deployment would make such a freeze more difficult to achieve.

(c) Proceeding from the freeze, the United States and the Soviet Union should pursue major, mutual, and verifiable reductions in nuclear warheads, missiles, and other delivery systems, through annual percentages or equally effective means, in a manner that enhances stability.

MELCHER AMENDMENT NO. 7069

Mr. MELCHER submitted an amendment intended to be proposed by him to the joint resolution (H.J. Res. 654), supra; as follows:

At the appropriate place, insert the following new section:

SEC. . (a) Subsection (e) of section 483 of the Internal Revenue Code of 1954 (relating to reduced rate of interest in case of sales of principal residences or farms) is amended to read as follows:

"(e) Reduced Rate of Interest in Case of Sales of Residences, Farms, or Real Property Used in a Trade or Business.—

"(1) IN GENERAL.—In the case of any debt instrument arising from a sale or exchange to which this subsection applies, the discount rate under subsections (b) and (c)(1)(B) shall not be greater than 10 percent and 9 percent, respectively.

"(2) SALES OR EXCHANGES TO WHICH THIS SUBSECTION APPLIES.—This subsection shall apply to any sale or exchange—

"(A) of property for use as a residence by an individual,

"(B) of a farm (within the meaning of section 6420(c)(2))—

"(i) by an individual, estate, or testamentary trust,

"(ii) by a corporation which as of the date of the sale or exchange is a small business corporation (as defined in section 1244(c)(3)), or

"(iii) by a partnership which as of the date of the sale or exchange meets requirements similar to those of section 1244(c)(3), or

"(C) of real property by any person (whether or not described in subparagraph (A)) used in a trade or business of such person or held by such person for the production of income.

"(3) DOLLAR LIMITATION.—

"(A) IN GENERAL.—Paragraph (1) shall not apply to the portion of the stated principal amount of the debt instrument arising from

the transaction which exceeds the applicable limit.

"(B) APPLICABLE LIMIT.—For purposes of this paragraph, the term 'applicable limit' means the limit determined in accordance with the following table:

"If the transaction is described in:	The limit is:
Paragraph (2) (A)	$250,000
Paragraph (2) (B)	$2,000,000
Paragraph (2) (C)	$1,000,000

"(C) REDUCTION IN APPLICABLE LIMIT WHERE SALES PRICE EXCEEDS APPLICABLE LIMIT.—In the case of any transaction with respect to which the sales price exceeds the applicable limit, the applicable limit shall be the amount which bears the same ratio to the applicable limit as—

"(i) as the applicable limit, bears to

"(ii) the sales price.

"(f) SPECIAL TEST RATES FOR SALES OR EXCHANGES INVOLVING CERTAIN REAL PROPERTY.—

"(1) IN GENERAL.—In the case of any sale or exchange to which this subsection applies, subsection (c)(1)(B) shall be applied by substituting—

"(A) '80 percent' for '110 percent' in the case of any debt instrument described in paragraph (3), and

"(B) '100 percent' for '110 percent' in the case of any debt instrument described in paragraph (4).

"(2) SALES OR EXCHANGES TO WHICH THIS SUBSECTION APPLIES.—

"(A) IN GENERAL.—Except as provided in this paragraph, this subsection applies to any sale or exchange of—

"(i) land, or

"(ii) 15-year of 18-year real property (within the meaning of section 168), disregarding de minimis amounts of personalty associated with such real property.

"(3) DEBT INSTRUMENTS TO WHICH 80 PERCENT RATE APPLIES.—A debt instrument is described in this paragraph if—

"(A) the term of the instrument (determined with regard to any extension or renewal) is not greater than the lesser of—

"(i) 12 years, or

"(ii) in the case of a debt instrument involving recovery property, ⅔ of the recovery period under section 168 for such property, and

"(B) the total deferred payments under such instrument, when added to the sum of the total deferred payments under all other debt instruments issued in connection with the sale or exchange—

"(1) to which this paragraph applies, and

"(ii) which were issued before such instrument was issued,

do not exceed $4,000,000.

"(4) DEBT INSTRUMENTS TO WHICH 100 PERCENT RATE APPPLIES.—A debt instrument is described in this paragraph if—

"(A) the rate of interest stated in the instrument is not less than the applicable Federal rate,

"(B) such instrument provided for—

"(i) the unconditional payment each year of at least 80 percent of the interest so stated, or

"(ii) after the close of the 2-year period beginning on the date such instrument was issued the instrument provides the unconditional payment each year of the total interest accruing thereunder, and

"(C) such instrument is not described in paragraph (3).

"(5) SPECIAL RULES FOR DETERMINATION OF DISCOUNT RATES.—

"(A) IN GENERAL.—If the applicable Federal rate determined under section 1274(d) for any period (other than the Federal short-term rate) exceeds by more than 2 percent such rate for the preceding period, such applicable Federal rate for purposes of applying this section to any debt instrument to which this subsection applies shall be equal to the greater of—

"(i) the sum of—

"(I) such applicable Federal rate for such preceding period, plus

"(II) the greater of 1 percent or one-half of such excess, or

"(ii) the highest such applicable Federal rate during the 2-year period before the period for which such determination was made after the application of this paragraph.

"(B) SPECIAL RULES FOR 1985 AND 1986.—Notwithstanding any other provision of this section, in the case of any sale or exchange with respect to which a binding contract was entered into during 1985 or 1986—

"(i) TEST RATE.—The discount rate for purposes of applying subsection (c)(1)(B) to any debt instrument described in paragraph (3) shall not be greater than the rate determined in accordance with the following table:

"For contracts entered into during the period:	The rate is:
Jan. 1-June 30, 1985	10.5
July 1-Dec. 31, 1985	11
Jan. 1-June 30, 1986	11.5
July 1-Dec. 31, 1986	12.

For purposes of applying subsection (c)(1)(B) to any debt instrument described in paragraph (4), the discount rate shall not be greater than the rate determined in accordance with the table, plus one-half percentage point.

"(ii) IMPUTED RATE.—The discount rate for purposes of applying subsection (b) to any debt instrument described in paragraph (3) or (4) shall not be greater than the rate determined under clause (i), plus 1 percentage point.

"(6) AGGREGATION RULES.—For purposes of this subsection—

"(i) all debt instruments arising from any transaction (or any series of related transactions) shall be treated as 1 sale or exchange.

"( ) SALES PRICE.—For purposes of this paragraph, the sales price shall be determined as of the time of the sale or exchange.

"(7) APPLICATION WITH SUBSECTION (f).—In the case of any qualified sale (as defined in subsection (f)(2)), the applicable limit determined under paragraph (3) shall be reduced by the amount of any debt instrument to which subsection (f)(1) applies."

(b) Special rule for determination of Applicable Federal Rate for 1984.

In the case of any debt instrument issued during the first 6 months of 1985 pursuant to a sale or exchange for which a binding contract was entered into during 1984, the applicable Federal rate for purposes of Section 483 and 1274 of the Internal Revenue Code of 1954 shall be 10 percent.

(c) Subparagraphs (A) and (B) of Section 1274(c)(2) (relating to exceptions from the determination of the issue price in the case of certain debt instruments issued for property) are amended to read as follows:

"(A) SALES OF FARMS AND REAL PROPERTY USED IN A TRADE OR BUSINESS.—Any debt instrument arising from a sale or exchange described in subparagraph (B) or (C) of section 483(e)(2) but only to the extent of that portion of the stated principal amount to which Section 483(e) applies."

"(B) RESIDENCES.—Any debt instrument arising from the sale or exchange of any property for use as the residence of the obligor under such instrument."

(d)(1) Section 483(d) of the Internal Revenue Code of 1954 (relating to exceptions and limitations) is amended by adding at the end thereof the following new paragraph:

"(5) ASSUMPTIONS.—This section shall not apply to any debt instrument which is assumed (or taken subject to) by the transferee as part of the sale or exchange of property, or to the portion or any wraparound mortgage equal to the unpaid balance of the seller's existing financing."

(2) Section 1274(c)(4) of such Code (relating to exceptions) is amended by adding at the end thereof the following new subparagraph:

"(G) ASSUMPTIONS.—Any debt instrument which is assumed (or taken subject to) by the transferee as part of the sale or exchange of property, or to the portion of any wraparound mortgage equal to the unpaid balance of the seller's existing financing."

(e) Subparagraph (F) of section 1274(c) (relating to exceptions for sales or exchanges to which section 483(e) applies) is amended by striking out "section 483(e)" in the text and heading thereof and inserting in lieu thereof "section 483(f)."

(f) The amendments made by this section shall take effect as if included in the amendments made by the Tax Reform Act of 1984.

SAN JUAN BASIN WILDERNESS PROTECTION ACT

DOMENICI (AND BINGAMAN) AMENDMENT NO. 7070

Mr. BAKER (for Mr. DOMENICI, for himself and Mr. BINGAMAN) proposed an amendment to the bill (H.R. 6296) entitled "The San Juan Basin Wilderness Protection Act of 1984"; as follows:

At the appropriate place, add the following new section:

SEC. . Section 11(a) of Public Law 93-531 (25 U.S.C. 648d-10) is amended—

(1) in paragraph (1) by striking out the last sentence, which begins "Such lands";

(2) by inserting after paragraph (2) the following:

"Subject to the provisions of the following sentences of this subsection, all rights, title and interests of the United States in the lands described in paragraph (1), including such interests the United States as lessor has in such lands under the Mineral Leasing Act of 1920, as amended, will, subject to existing leasehold interests, be transferred without cost to the Navajo Tribe and title thereto shall be taken by the United States in trust for the benefit of the Navajo Tribe as a part of the Navajo Reservation. So long as selected lands coincide with pending noncompetitive coal lease applications under the Mineral Leasing Act of 1920, as amended, the Secretary may not transfer any United States interests in such lands until the noncompetitive coal lease applications have been fully adjudicated. If such adjudication results in issuance of Federal coal leases to the applicants, such transfer shall be subject to such leases. The leaseholders rights and interests in such coal leases will in no way be diminished by the transfer of the rights, title and interests of the United States in such lands to the Navajo Tribe. If

any selected lands are subject to valid claims located under the Mining Law of 1872 the transfer of the selected lands made subject to those claims."; and

(3) by inserting the following new paragraph:

(2) Those interests in lands acquired in the State of New Mexico by the Navajo Tribe pursuant to subsection 2 of this section shall be subject to the right of the State of New Mexico to receive the same value from any sales, bonuses, rentals, royalties and interest charges from the conveyance, sale, lease, development, and production of coal as would have been received had the subsurface interest in such lands remained with the United States and been leased purusant to the Mineral Lands Leasing Act of 1920 as amended or any successor Act, or otherwise developed.

The state's interest shall be accounted for in the same manner as it would have been if a lease had issued pursuant to the Minerals Lands Leasing Act of 1920, as amended.

At the appropriate place in the bill insert the following:

SEC. . (a) Subject to valid existing rights and except as provided in subsection (b), the Secretary of the Interior is authorized and directed to convey to the New Mexico State University, Las Cruces, New Mexico, at a cost of $2.50 per acre, all right, title, and interest of the United States in and to the followng described public lands aggregating approximately 5,711.39 acres in Dona Ana County, New Mexico, to be used for the purpose of conducting educational, demonstrative, and experimental development with livestock, grazing methods, and range forage plants and other agricultural related research:

NEW MEXICO PRINCIPAL MERIDIAN

Township 20 South, Range 1 East

Secs. 16, 32, and 36 all.

Township 21 South, Range 1 East

Sec. 2, and 16 all.

Township 20 South, Range 1 West

Sec. 2, and 16 all;

Sec. 26, north half northeast quarter, northeast quarter northwest quarter;

Sec. 32, north half, north half southwest quarter, north half southeast quarter, southeast quarter southeast quarter; and

Sec. 36, all.

(b) There are reserved to the United States all minerals that may be found in the lands described in subsection (a) together with the right of the United States, its permittees, lessees, or grantees, at any time, to prospect for, mine and remove such minerals.

(c) In the event that the lands described in subsection (a), or any part thereof, are used for any purpose other than those for which conveyance is authorized, title to the entire tract shall immediately revert to the United States without the necessity for further action to accomplish the reversion of title to the United States.

At the appropriate place in the bill, insert the following:

SEC. . In order to relieve the Elephant Butte Irrigation District of any obligation to reimburse the Bureau of Reclamation for leave and severance payments to certain employees of the Rio Grande project separated as a result of the transfer of operation and maintenance responsiblities to the Elephant Butte District, miscellaneous revenues having been collected by the Bureau of Reclamation from the sale or lease of project lands, interests in lands or other sources may be credited to the Elephant Butte Irrigation District for such leave and severance payments and accrued interest penalties on the District's obligations. Penalties shall be assessed up till September 23, 1983.

At the appropriate place in the bill, insert the following new title:

SEC. . An approximate twenty-acre area as shown on a map entitled Sandia Mountain Wilderness additions, dated March 26, 1981, on file in the Office of the Chief of the Forest Service, Department of Agriculture, is hereby added to and made a part of the Sandia Mountain Wilderness: *Provided*, That the Secretary of Agriculture may allow the continuance of the existing diversion dam and existing related facilities conforming to the terms and conditions of maintenance he deems appropriate, including the provision for access and the use of mechanized equipment only for construction and maintenance of existing structures: *Provided further*, That any upgrading of the existing diversion dam shall be completed within four years of the date of this section in accord with the plans approved by the Secretary of Agriculture. The Secretary of Agriculture may extend the time of such reconstruction if he deems such extension is necessary and in the public interest.

At the appropriate place in the bill, insert the following:

SEC. . (a)(1) The Secretary of the Interior (hereafter in this section referred to as the "Secretary") may convey to Sumner Lake Corporation of the State of New Mexico all right, title, and interest of the United States in and to the real property described in paragraph (2), but such conveyance to such corporation may be made only in the event that the state of New Mexico has given a written release to the United States Government from the State's lease of such property.

(2) The real property referred to in paragraph (1) is located in Lake Sumner State Park, in the State of New Mexico, and is more particularly described as follows: all portions of sections 28 and 34 in township 5 north, range 24 east, that are more than 4,280 feet above sea level. The acreage and legal description of such real property shall be determined by the Secretary after consulting with Sumner Lake Corporation.

(b)(1) In consideration for the conveyance authorized in subsection (a), Sumner Lake Corporation shall pay to the Secretary for deposit in the United States Treasury the fair market value of the real property conveyed as determined on the date of such conveyance. Such fair market value shall be determined by the Secretary by means of an appraisal conducted in accordance with established appraisal procedures.

(2) Any administrative cost incurred by the Secretary incident to any conveyance under subsection (a), including any surveying cost, recording cost, or legal cost, shall be reimbursed by Sumner Lake Corporation.

(c)(1) Any conveyance under subsection (a) shall reserve to the United States all oil, coal, and other minerals in the real property conveyed, and the right to prospect for, mine, and remove such oil, coal, and other minerals. Any damage sustained by any surface owner as a result of the exercise of any right reserved in this paragraph shall be reimbursed by the United States or the lessee of such right.

(2) Any conveyance under subsection (a) shall not affect any easement, servitude, or right-of-way existing with respect to the real property conveyed on the date of such conveyance.

(3) The Secretary may attach to any conveyance under subsection (a) any additional conditions and reservations that the Secretary determines to be appropriate.

COLORADO RIVER BASIN SALINITY CONTROL ACT AMENDMENTS

METZENBAUM AMENDMENT NO. 7071

Mr. METZENBAUM proposed an amendment to the bill (H.R. 2790) to amend the Colorado River Basin Salinity Control Act to authorize certain additional measures to assure accomplishment of the objectives of title II of such act, and for other purposes; as follows:

Strike section 4(b) of the bill in its entirety and insert in lieu thereof the following, and re-identify the subsequent paragraphs of section 4 of the bill accordingly:

(b) Section 205(a)(1) of such Act is amended by inserting before "shall be nonreimbursable." the words "authorized by section 202(a) (1), (2), and (3), including 75 per centum of the total costs of construction, operation, and maintenance of the asssociated measures to replace incidential fish and wildlife values foregone, 70 per centum of the total costs of construction, operation, maintenance, and replacement of each unit or separable feature thereof authorized by section 202(a) (4) and (5), including 70 per centum of the total costs of construction, operation, and maintenance of the associated measures to replace incidental fish and wildlife values foregone, and 70 per centum of the total costs of implementation of the on-farm measures authorized by section 202(c), including 70 per centum of the total costs of the associated measures to replace incidential fish and wildlife values foregone,". Section 205(a)(1) of such Act is further amended by adding at the end thereof "The total costs remaining after these allocations shall be reimbursable as provided for in paragraphs (2), (3), (4), and (5), of section 205(a)".

(c) Section 205(a)(2) of such Act is amended by striking "Twenty-five per centum" and inserting in lieu thereof "The reimbursable portion".

In section 2(c) of H.R. 2790, after "research, demonstration, and education activities.", add the following:

"(F) in entering into contracts or agreements pursuant to section 202(c)(2)(C), require a minimum of 30 per centum cost-sharing contribution from individuals or groups of owners and operators of farms, ranches, and other lands as well as from local governmental and non-governmental entities such as irrigation districts and canal companies, unless the Secretary finds in his discretion that such cost-sharing requirement would result in a failure to proceed with needed on-farm measures.".

INCREASE IN PUBLIC DEBT LIMIT

TSONGAS (AND OTHERS) AMENDMENT NO. 7072

Mr. TSONGAS (for himself, Mr. BAUCUS, Mr. BIDEN, Mr. GRASSLEY, Mrs. KASSEBAUM, Mr. ARMSTRONG, Mrs.

HAWKINS, Mr. INOUYE, Mr. LEVIN, Mr. MELCHER, Mr. EXON, Mr. PRYOR, Mr. PROXMIRE, Mr. EVANS, Mr. MATTINGLY, Mr. ANDREWS, Mr. JEPSEN, Mr. BOREN, Mr. NICKLES, Mr. MURKOWSKI, Mr. MITCHELL, and Mr. LEAHY) proposed an amendment to the joint resolution (H.J. Res. 654), supra; as follows:

Strike out all after the resolving clause and insert in lieu thereof the following:

SECTION 1. INCREASE IN PUBLIC DEBT LIMIT.

Subsection (b) of section 3101 of title 31, United States Code, is amended by striking out "may not be more" and all that follows through "outstanding at one time" and inserting in lieu thereof "may not be more than $1,730,000,000,000.00 outstanding at one time".

SEC. 2. CONSIDERATION OF A SUBSTANTIAL REDUCTION IN THE FEDERAL DEFICIT.

(a)(1) Notwithstanding any other provision of law, any concurrent resolution, any resolution, or the Standing Rules of the Senate or the Rules of the House of Representatives, it shall not be in order in either the Senate or the House of Representatives to consider, or to vote upon the question of agreeing to, a bill, a joint resolution, or an amendment that would, upon becoming law, authorize the United States Government to issue or insure a face amount of obligations in excess of the face amount of obligations authorized to be issued or insured under chapter 31 of title 31, United States Code, pursuant to subsection (b) of section 3101 of such title (as such section is amended by section 1 of this joint resolution) prior to consideration of, and a vote upon the question of agreeing to, a Federal deficit reduction bill conforming with the requirements of paragraph (3).

(2)(A) The Federal deficit reduction bill required to be considered in a House of the Congress pursuant to paragraph (1) shall be introduced by the presiding officer of such House.

(B) Time for debate on the Federal deficit reduction bill required to be considered in a House of the Congress pursuant to paragraph (1) (and any amendments thereto) shall be equally divided between the majority and minority parties, and shall be controlled by the majority leader and the minority leader of such House, or their designees.

(3) For the purpose of this subsection, a Federal deficit reduction bill means, with respect to a House of the Congress, a bill of such House, the matter after the enacting clause of which reads as follows:

"LIMITATIONS ON BUDGET AUTHORITY

"Section 1. (a) It shall not be in order in the Senate or House of Representatives to consider any bill or resolution making appropriations, if the enactment of such bill or resolution, as recommended by the respective committee on appropriations, would cause the aggregate total budget authority for function 050, National Defense, to exceed $292,900,000,000 in fiscal year 1986.

"(b) It shall not be in order in the Senate or House of Representatives to consider any bill or resolution making appropriations, if the enactment of such bill or resolution, as recommended by the respective committee on appropriations, would cause the aggregate total budget authority for nondefense discretionary activities to exceed $139,800,000,000 in fiscal year 1986.

"(c) For the purposes of this section, budget authority shall be determined on the basis applicable for fiscal year 1985.

"(d) The provisions of subsection (a) or (b) of this section may be waived or suspended in the Senate by a majority vote of the Members voting, a quorum being present, or by unanimous consent of the Senate.

"(e) It is the sense of Congress that the unprecedented magnitude and persistence of current and projected Federal budget deficits must be addressed in a comprehensive strategy to moderate increases in defense spending while continuing the effective constraints on nondefense discretionary programs. To assure the success of such an initiative, the foregoing procedural restraints, in addition to the total aggregate spending limitations pursuant to the Congressional Budget Act of 1974, as amended, are necessary on budget authority both for defense and for nondefense discretionary programs for fiscal year 1986.

"MEDICARE FREEZE

"SEC. 2. (a) Notwithstanding any other provision of law, the "applicable percentage increase" under section 1886(b)(3)(B) of the Social Security Act for any 12-month cost reporting period or fiscal year beginning on or after October 1, 1985, and before October 1, 1986, shall be zero percent.

"(b) The Secretary of Health and Human Services shall report to the Congress within 45 days after the date of the enactment of this Act with respect to suggested methods for assuring that hospitals will not increase amounts charged to patients who are not entitled to benefits under title XVIII of the Social Security Act in order to compensate for amounts not paid by reason of the limitation under subsection (a).

"LIMITATIONS ON COST-OF-LIVING ADJUSTMENTS

"SEC. 3. (a) Notwithstanding any other provision of law, no increase shall be made in payments or benefit amounts under any provision of law which would otherwise require such increase to become effective during fiscal year 1986 as a result of changes in—

"(1) the Consumer Price Index (or any component thereof); or

"(2) any other index which measures costs, prices, or wages.

"(b) No person shall be entitled to any increase in payments or benefit amounts under any provision of law if payment thereof is denied by reason of this section.

"(c) Notwithstanding any other provision of law, any change in—

"(1) the Consumer Price Index (or any component thereof); or

"(2) any other index which measures costs, prices, or wages,

which would have resulted in any increase in payments or benefit amounts during fiscal year 1966 but for the provisions of subsection (a) shall not be taken into account for purposes of determining any increase in payments or benefit amounts during fiscal year 1987 or any fiscal year thereafter.".

(4) The provisions of this subsection are enacted by the Congress—

(A) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(B) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House.

(b)(1) Notwithstanding any other provision of law, the head of each agency of the Federal Government shall take such actions as may be necessary to ensure that such agency is prepared to carry out promptly any provisions of law enacted pursuant to this section that require action to be taken by such agency. Actions taken by an agency pursuant to this paragraph shall include the development of contingency plans for carrying out the programs, projects, and activities of such agency in the event that the amounts available for obligation and expenditure by such agency during fiscal year 1985 are reduced pursuant to this section.

(3) For purposes of this subsection, the term "agency" has the meaning given to such term in section 101 of title 31, United States Code.

PRESSLER AMENDMENT NO. 7073

(Ordered to lie on the table.)

Mr. PRESSLER submitted an amendment intended to be proposed by him to the joint resolution (H.J. Res. 654) increasing the statutory limit on the public debt; as follows:

At the appropriate place in the bill insert the following: "It is the sense of the Senate that the President should hold a domestic summit meeting on the problem of high interest rates with the Governors of the Federal Reserve Board, Congressional leaders and representatives of the largest U.S. banks participating.".

Mr. PRESSLER. Mr. President, my amendment, if adopted, would express the sense of the Senate that the President should hold a domestic summit meeting on the problem of high interest rates. Participants should include the President, the Governors of the Federal Reserve Board, congressional leaders and representatives of the largest U.S. banks.

There is no question that high interest rates remain our No. 1 economic problem. Despite the recent drop in the prime rate to 12¾ percent, rates for average Americans are still prohibitive. In a rural State like South Dakota, farmers and small business people alike are highly dependent on credit. Today's rates are preventing these groups from participating in the economic recovery which has benefited so many other Americans.

In 1981, I was the first Republican Senator to say that interest rates could prove to be the Achilles heel of the President's economic recovery plan. I am afraid my concerns were well founded.

Our efforts to bring down inflation and ignite economic growth have been very successful. But interest rates have not followed the downward trend of the inflation rate as is traditionally the case. In fact, the spread between the inflation rate and the prime rate has normally been 3 to 4 percent—about one-half of what the spread is now.

As we are all aware, there are many culprits responsible for keeping interest rates high. The Congress and the President have certainly failed to get budget deficits under control. The Federal Reserve Board, in its zeal to bring down inflation, has kept the money supply tight. Finally, the Nation's largest banks must share some of the blame for keeping a large spread between the prime and consumer rates.

The many complicated factors which cause high interest rates preclude an easy solution. All the players must make a coordinated and careful effort if rates are to come down. Currently, there is far too much finger pointing and far too little cooperation.

We have often used summit meetings in foreign affairs as an effective means of bringing together those of divergent views. I believe the severity of the interest rate problem demands similar attention and effort.

If each of the participants were to make commitments to attack the high interest rate problem, real progress is possible. Specifically:

The Governors of the Federal Reserve Board should pursue a monetary policy which helps rates come down;

The Nation's largest banks should pledge the smallest possible spread between the prime rate and rates to average individuals;

The congressional leadership must make a larger downpayment to reduce the deficit.

President Reagan should submit a budget for 1985 which would substantially reduce interest rates.

I hope my colleagues will join me in supporting this amendment.

AIRCRAFT SABOTAGE ACT

LEAHY AMENDMENT NO. 7074

Mr. BYRD (for Mr. LEAHY) proposed an amendment to the bill (S. 2623) to implement the Montreal Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation, and for other purposes; as follows:

Page 3, beginning in line 24 strike out "interferes with the operation of or makes unsuitable for use" and insert in lieu thereof "wrecks".

Page 4, line 12, insert "by force or violence" after "interferes".

EXCHANGE OF CERTAIN FEDERAL LANDS

WALLOP AMENDMENT NO. 7075

Mr. BAKER (for Mr. WALLOP) proposed an amendment to the bill (H.R. 3331) to authorize the exchange of certain lands between the Bureau of Land Management and the city of Los Angeles for purposes of the Santa Monica Mountains National Recreation Area; as follows:

On page 2, line 1, strike "paragraph" and insert "paragraphs".

On page 2, lines 3 and 4, strike "(acting through the Bureau of Land Management)".

On page 3, line 2, strike the quotation marks and insert the following new subparagraph:

"(C) The city shall assume full responsibility for the protection of cultural resources and shall develop a cultural resource management program for the public lands to be transferred to the city in the vicinity of the Haiwee Reservoir. The program shall be developed in consultation with the Secretary of the Interior, the California State Historic Preservation Officer, and the Advisory Council on Historic Preservation.".

COAST GUARD AUTHORIZATION ACT

PACKWOOD AMENDMENT NO. 7076

Mr. BAKER (for Mr. PACKWOOD) proposed an amendment to the bill (S. 2526) to authorize appropriations for the Coast Guard for fiscal years 1985 and 1986, and for other purposes; as follows:

Strike all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Coast Guard Authorization Act of 1984".

AUTHORIZATION OF FUNDS

SEC. 2. Funds are authorized to be appropriated for necessary expenses of the Coast Guard for fiscal years 1985 and 1986, as follows:

(1) For the operation and maintenance of the Coast Guard, including expenses related to the Capehart housing debt reduction, $1,800,000,000 for fiscal year 1985 and $1,950,000,000 for fiscal year 1986; and for increases in salary, pay, and other employee benefits authorized by law, and for the full amount of fixed costs associated with operation of five Coast Guard polar icebreaking vessels manned by Coast Guard military personnel, such sums as may be necessary for each such fiscal year.

(2) For the acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto, $580,000,000 for fiscal year 1985 (of which $30,000,000 shall be for design, survey, acquisition and construction of a search and rescue facility in Western Alaska to serve the Aleutian Islands) and $680,000,000 for fiscal year 1986 (of which $30,000,000 shall be for construction of such facility).

(3) For research, development, test, and evaluation, $35,000,000 for fiscal year 1985 and $38,000,000 for fiscal year 1986.

(4) For the alteration or removal of bridges over navigable waters of the United States, constituting obstructions to navigation, $8,700,000 for fiscal year 1985, and such sums as may be necessary for expenses of the Coast Guard for such purposes for fiscal year 1986.

(5) For retired pay including the payment of obligations therefor otherwise chargeable to lapsed appropriations for this purpose, and payments under the Retired Serviceman's Family Protection and Survivor Benefit Plans, and for payments for medical care of retired personnel and their dependents under the Dependents' Medical Care Act, such sums as may be necessary for fiscal years 1985 and 1986.

PERSONNEL LEVELS

SEC. 3. Notwithstanding any other provision of law, the Coast Guard's full-time equivalent strength levels for fiscal years 1985 and 1986 shall be maintained as follows:

(1) For active duty military personnel, not less than 39,150 for fiscal years 1985 and 1986, which shall not include members of the Ready Reserve called to active duty under the authority of section 712 of title 14, United States Code, or Public Health Service officers on active duty with the Coast Guard.

(2) For civilian employees of the Coast Guard, not less than 5,484 for fiscal years 1985 and 1986.

MILITARY TRAINING

SEC. 4. For fiscal years 1985 and 1986, the Coast Guard is authorized average military training student loads as follows:

(1) For recruit and special training, 3,500 student-years.

(2) For flight training, 118 student-years.

(3) For professional training in military and civilian institutions, 556 student-years.

(4) For officer acquisition, 1,038 student-years.

TRANSFER OF FUNDS

SEC. 5. (a) Whenever the Secretary of the department in which the Coast Guard is operating determines it to be in the national interest, the Secretary may transfer not to exceed 5 percent of the funds appropriated for the purposes described in paragraph (1) or (2) of section 2 of this Act for use for any purpose described in any paragraph of section 2, except that the total available for the purposes for which the funds are transferred shall not be increased by more than 10 percent as a result of the transfer.

(b) No transfer of funds may occur under subsection (a) of this section until 15 days after the Secretary has provided written notification to the Chairman of the Committee on Commerce, Science, and Transportation of the Senate and the Chairman of the Committee on Merchant Marine and Fisheries of the House of Representatives stating the reasons for the determination and a description of the purposes for which the funds proposed to be transferred will be used.

POLAR ICEBREAKING

SEC. 6. (a) It is the sense of the Congress that the United States has important security, economic, and environmental interests in developing and maintaining a fleet of icebreaking vessels capable of operating effectively and independently in the heavy ice regions of the Arctic and Antarctic.

(b) The Secretary of the department in which the Coast Guard is operating shall prepare design and construction plans for the purchase of at least 2 new polar icebreaking vessels to be operational by the conclusion of fiscal year 1990, and shall provide detailed reports to the Congress describing the status of those plans in January 1985 and January 1986. In preparing such plans, the Secretary shall consult with other interested Federal agencies for the purpose of ensuring that all appropriate military, scientific, economic and environmental interests are taken into account.

ALCOHOL USE BY BOATERS

SEC. 7. (a) Section 2302 of title 46, United States Code, is amended by redesignating subsection (c) as subsection (d) and inserting immediately after subsection (b) the following:

"(c) An individual who is intoxicated when operating a vessel, as determined under standards prescribed by the Secretary by regulation, shall be—

"(1) liable to the United States Government for a civil penalty of not more than $1,000; or

"(2) fined not more than $5,000, imprisoned for not more than one year, or both.".

(b)(1) Section 6101(b) of title 46, United States Code, is amended by adding at the end thereof the following: "Each report filed under this section shall include information as to whether the use of alcohol contributed to the casualty.".

(2) Section 6102(a) of title 46, United States Code, is amended by inserting immediately before the period at the end thereof the following: ", including information and statistics concerning the number of casualties in which the use of alcohol contributed to the casualty".

(3) Section 13102(c)(4) of title 46, United States Code, is amended by inserting immediately after "program" the following: ", that includes the dissemination of information concerning the hazards of operating a vessel when under the influence of alcohol".

RECREATIONAL BOATING SAFETY AMENDMENTS

SEC. 8. (a) Section 4307(a)(1)(A) of title 46, United States Code, is amended—

(1) by inserting "(i)" immediately after "(A)";

(2) by striking "or" at the end of clause (i), as so redesignated by paragraph (1) of this subsection, and inserting in lieu thereof "and"; and

(3) by adding at the end thereof the following:

"(ii) it does not contain a defect which has been identified, in any communication to such person by the Secretary or the manufacturer of that vessel, equipment or component, as creating a substantial risk of personal injury to the public; or".

(b) Section 4311(b)(1) of title 46, United States Code, is amended by inserting "defect or the" immediately before "nonconformity".

(c) Section 4311(f)(1) of title 46, United States Code, is amended by inserting "or that the person was not advised by the Secretary or the manufacturer of that vessel, equipment or component that the vessel, equipment or component contains a defect which creates a substantial risk of personal injury to the public" immediately before the semi-colon.

RESCUE SWIMMING PROGRAM

SEC. 9. The Secretary of the department in which the Coast Guard is operating shall use such sums as are necessary, from amounts appropriated for the operation and maintenance of the Coast Guard, to establish a helicopter rescue swimming program for the purpose of training selected Coast Guard personnel in rescue swimming skills.

LIFESAVING EQUIPMENT ON PASSENGER FERRIES

SEC. 10. The Secretary of the department in which the Coast Guard is operating shall proceed vigorously with efforts to develop improved lifesaving equipment for use on passenger ferries.

SAN FRANCISCO VTS

SEC. 11. (a) of the funds authorized to be appropriated by paragraph (1) of section 2 of this Act, such sums as are necessary shall be used to maintain in full operation the vessel traffic service (VTS) system in San Francisco, California, throughout fiscal years 1985 and 1986.

(b) None of the funds authorized to be appropriated by this Act may be used to develop or issue a request for proposals to contract any function or activity involved in operating the vessel traffic service (VTS) system in San Francisco, California, which is, on the date of enactment of this Act, performed by Coast Guard personnel.

(c) None of the funds authorized to be appropriated by this Act may be used to hire, train, or otherwise utilize civilian personnel to replace Coast Guard military personnel involved in operating the vessel traffic service (VTS) system in San Francisco, California, until the Coast Guard has conducted a study in accordance with this subsection and has submitted the results of such study to the Congress. Such study shall identify the costs, efficiencies, and benefits, if any, that would accrue to the Federal Government, the Coast Guard, the ports, the Navy, and other users of the vessel traffic service (VTS) system in San Francisco, California, from the use of civilian personnel in that system.

LONG RANGE SEARCH AND SURVEILLANCE AIRCRAFT

SEC. 12. (a) Of the amounts authorized to be appropriated by paragraphs (1) and (2) of section 2 of this Act, such sums as are necessary shall be used to procure, maintain, and operate a fleet of not less than twenty seven long range search and surveillance aircraft for use by the Coast Guard.

(b) The Secretary of the department in which the Coast Guard is operating is encouraged to conduct the research, development, test and evaluation necessary for an electronic surveillance system, capable of producing and documenting images for search and rescue or law enforcement purposes, for the long range serch and surveillance aircraft of the Coast Guard.

PROTECTION OF SEAMEN

SEC. 13. (a) Chapter 2 of title 46, United States Code, is amended by adding at the end thereof the following:

"§ 2114. Protection of seamen against discrimination

"(a) An owner, charterer, managing operator, agent, master, or individual in charge of a vessel may not discharge or in any manner discriminate against a seaman because the seaman in good faith has reported or is about to report to the Caost Guard that the seaman believes that a violation of this subtitle, or a regualtion issued under this subtitle, has occurred.

"(b) A seaman discharged or otherwise discriminated against in violation of this section may bring an action in an appropriate district court of the United States. In that action, the court may order any appropriate relief, including—

"(1) restraining violations of this section; and

"(2) reinstatment to the seaman's former position with back pay.".

(b) The analysis of chapter 21 of title 46, United States Code, is amended by adding at the end thereof the following:

"2114. Protection of seamen against discrimination.".

CONTRACTING FOR SERVICES PERFORMED BY THE COAST GUARD

SEC. 14. (a) The Secretary of the department in which the Coast Guard is operating is encouraged to idenitfy those funcitons and services presently performed by Coast Guard personnel which are not inherently governmental in nature, and which may be performed with equal effectiveness and at lower cost under contract to the private sector.

(b) None of the funds authorized to be aproriated by this Act may be used—

(1) to issue any contract that would have the effect, either by itself or in combination with other contracting proposals, of causing a deterioration in the overall ability of the Coast Guard to carry out its missions in behalf of the security, safety, and economic and environmental well-being of the United States; or

(2) to issue a request for proposals to contract out any function or activity which is, on the date of enactment of this Act, performed by civilian employees or members of the Coast Guard, unless a period of 30 days in which either the Senate or House of Representatives is in session has expired after the Secretary has submitted in writing to the President of the Senate, the Speaker of the House of Representatives, the Chairman of the Committee on Commerce, Science, and Transportation of the Senate, and the Chairman of the Committee on Merchant Marine and Fisheries of the House of Representatives a full and complete statement (including revelant supporting studies) concerning the proposed contracting and the reasons therefor.

(c) Prior to the beginning of fiscal years 1985 and 1986, the Secretary shall submit to the Congress a list of functions or activities for which the Secretary expects to submit notifications required by subsection (b)(2) of this section during the fiscal year.

(d) The requirements of subsection (b)(2) of this section do not apply to contracts for functions or activities which are performed by three or fewer Coast Guard personnel.

LEGAL EQUITY FOR WOMEN

SEC. 15. (a)(1) Section 371 of title 14, United States Code, is amended—

(A) by striking "male" both places it appears in the second sentence of subsection (a);

(B) in subsection (c)(1)—

(i) by striking "he agrees in writing that, upon his" and inserting in lieu thereof "the person agrees in writing that, upon"; and

(ii) by striking "he will" and inserting in lieu thereof "the person will"; and

(C) by striking "he has the consent of his parent or guardian to his agreement" in subsection (c)(2) and inserting in lieu thereof "the person has the consent of the person's parent or guardian to the agreement".

(2) The first sentence of section 487 of such title is amended by striking "widows" and inserting in lieu thereof "surviving spouses".

(3)(A) The following sections of such title are amended by striking "enlisted man" each place it appears and inserting in lieu thereof "enlisted member": 353, 354, 355, 357, 359, 360, 361, 362, 365, 366, 367, 370, 421, 432 and 424.

(B) The following sections of such title are amended by striking "enlisted men" each place it appears and inserting in lieu thereof "enlisted members": 41, 211(a)(2), 212(a)(2), 213(a)(1), 214, 357, 432(c), 478(d) and 480.

(C) The following sections of such title are amended by striking "Enlisted men" each place it appears and inserting in lieu thereof "Enlisted members": 41, 352, 367, 478(a), 481 and 482.

(D) The following sections of such title are amended by striking "officers and enlisted men" each place it appears and inserting in lieu thereof "members": 92(b), 144(a), 145(a)(2), 148, 149, 487 and 832.

(E) Section 149 of such title is amended by striking "Officers and enlisted men" inserting in lieu thereof "Members".

(F) Section 351(a) of such title is amended by striking "men" and inserting in lieu thereof "persons".

(G) Section 361 of such title is amended by striking "the man" and inserting in lieu thereof "the member".

(H) Section 192 and 483 of such title are amended by striking "commissioned officer, warrant officer, or enlisted man" each place it appears and inserting in lieu thereof "member".

(I) Section 488 of such title is amended by striking "officers and men" and inserting in lieu thereof "members".

(4)(A)(i) The heading of section 149 of such title is amended to read as follows:

"§ 149. Detail of members to assist foreign governments".

(ii) The item relating to such section in the analysis of chapter 7 of such title is amended to read as follows:

"149. Detail of members to assist foreign governments.".

(B)(i) The heading of section 360 of such title is amended to read as follows:

"§ 360. Recall to active duty with consent of member".

(ii) The item relating to such section in the analysis of chapter 11 of such title is amended to read as follows:

"§ 360 Recall to active duty with consent of members.".

(C)(i) The heading of section 361 of such title is amended to read as follows:

"§ 361. Relief of retired enlisted member promoted while on active duty".

(ii) The item relating to such section in the analysis of chapter 11 of such title is amended to read as follows:

"361. Relief of retired enlisted member promoted while on active duty.".

(D)(i) The heading of section 487 of such title is amended to read as follows:

"§ 487. Procurement and sale of stores to members and civilian employees".

(ii) The item relating to such section in the analysis of chapter 13 of such title is amended to read as follows:

"487. Procurement and sale of stores to members and civilian employees.".

(E)(i) The heading preceding section 350 in such title is amended to read as follows:

"ENLISTED MEMBERS"

(ii) The heading preceding the item relating to section 350 in the analysis of chapter 11 of such title is amended to read as follows:

"ENLISTED MEMBERS".

(b)(1) The first section of the Act of August 19, 1950 (33 U.S.C. 771) is amended—

(A) by striking "he" in clause (1) and inserting in lieu thereof "that employee";

(B) by amending clause (2) to read as follows:

"(2) the surviving spouse of the former employee was married to the former employee prior to the retirement of the former employee from the Lighthouse Service and has not remarried—"; and

(C) by striking "such widow, so long as she" in the material after clause (2) and inserting in lieu thereof "the surviving spouse, so long as the surviving spouse".

(2) Section 2 of such Act (33 U.S.C. 772) is amended—

(A) by amending clause (2) to read as follows:

"(2) the surviving spouse of the employee has not since remarried,"; and

(B) by striking "such widow, so long as she" in the material after clause (2) and inserting in lieu thereof "the surviving spouse, so long as the surviving spouse".

COASTAL AND INLAND NAVIGATION SAFETY

SEC. 16. (a) Subsection (e) of Public Law 96-380 (33 U.S.C. 1231a(e)) is amended by striking "five years from the date of enactment of this Act" and inserting in lieu thereof "on September 30, 1990".

(b)(1) Rule 24(i) of the Inlands Navigational Rules, enacted by section 2 of the Inland Navigational Rules Act of 1980 (33 U.S.C. 2024(i)), is amended by inserting "(except below the Huey P. Long Bridge on the Mississippi River)" immediately after "Western Rivers".

(2) Section 5 of the Inland Navigational Rules Act of 1980 (33 U.S.C. 2073) is amended—

(A) by amending the second sentence in subsection (c) to read as follows: "Members of the Council, while away from their home or regular place of business, may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code."; and

(B) by striking "5 years from the date of enactment of this Act" in subsection (d) and inserting in lieu thereof "on September 30, 1990".

(c) Rule 14 of the Inland Navigational Rules, enacted by section 2 of the Inland Navigational Rules Act of 1980 (33 U.S.C. 2014), is amended—

(1) in subsection (a), by striking "When" and inserting in lieu thereof "Unless otherwise agreed, when"; and

(2) by adding at the end thereof the following:

"(d) Notwithstanding paragraph (a) of this Rule, a power-driven vessel operating on the Great Lakes, Western Rivers, or waters specified by the Secretary, and proceeding downbound with a following current shall have the right of way over an upbound vessel, shall propose the manner of passage, and shall initiate the maneuvering signals prescribed by Rule 34(a)(i), as appropriate.".

COAST GUARD MANAGEMENT AND EFFICIENCY

SEC. 17. (a) Section 971(b) of title 10, United States Code, is amended—

(1) by striking "and" at the end of clause (1);

(2) by striking the period at the end of clause (2) and inserting in lieu thereof "; and "; and

(3) by adding at the end thereof the following:

"(3) no officer of the Coast Guard may be credited with service as a midshipman at the United States Naval Academy or as a cadet at the United States Military Academy, United States Air Force Academy, or United States Coast Guard Academy.".

(b)(1) Section 257 of title 14, United States Code, is amended by adding at the end thereof the following:

"(e) An officer whose involuntary retirement or separation is deferred under section 295 of this title is not eligible for consideration for promotion to the next higher grade during the period of that deferment.".

(2)(A) Chapter 11 of such title is amended by inserting immediately after section 294 the following:

"§ 295. Deferment of retirement or separation for medical reasons"

"(a) Subject to subsection (b), the Secretary may defer the retirement or separation of a commissioned officer, other than a commissioned warrant officer, if the evaluation of the physical condition of the officer and determination of the officer's entitlement to retirement or separation for physical disability require hospitalization, medical observation, or other physical disability processing that cannot be completed before the date on which the officer would otherwise be retired or separated.

"(b) A deferment under subsection (a)—

"(1) may only be made with the consent of the officer involved; and

"(2) if the Secretary receives written notice from the officer withdrawing that consent, shall end not later than the end of the 60-day period beginning on the date the Secretary receives that notice.".

(B) The analysis of such chapter is amended by inserting immediately after the item relating to section 294 the following:

"295. Deferment of retirement or separation for medical reasons.".

(3)(A) Section 647 of such title is amended by striking "$25,000" and inserting in lieu thereof "$100,000".

(B) The amendment made by subparagraph (A) of this paragraph shall apply to all claims considered, ascertained, adjusted, determined, compromised or settled on or after the date of enactment of this Act.

(4) Section 367 of such title is amended—

(A) by striking "(a)" before "Under regulations";

(B) by striking "person detained" and inserting in lieu thereof "member detained"; and

(C) by striking "(1) of this subsection" and and inserting in lieu thereof "clause (1)".

(c) Section 1114 of title 18, United States Code, is amended by striking "any officer or enlisted man of the Coast Guard," and inserting in lieu thereof "any member of the Coast Guard, any employee of the Coast Guard assigned to perform investigative, inspection or law enforcement functions,".

(d) Section 402(d) of title 37, United States Code, is amended by inserting "and the Secretary of Transportation with respect to the Coast Guard when it is not operating as a service in the Navy" immediately after "Secretary of Defense".

(e)(1) Subsection (a) of section 3732 of the Revised Statutes of the United States (41 U.S.C. 11) is amended—

(A) by striking "except in the War and Navy Departments" and and inserting in lieu thereof "except in the Department of Defense and in the Department of Transportation with respect to the Coast Guard when it is not operating as a service in the Navy"; and

(B) by striking "or transportation" and and inserting in lieu thereof ", transportation, or medical and hospital supplies".

(2) Subsection (b) of such section is amended by inserting "and the Secretary of Transportation with respect to the Coast Guard when it is not operating as a service in the Navy" immediately after "The Secretary of Defense".

(3) The first proviso under the heading "MEDICAL DEPARTMENT" in the Act entitled "An Act making appropriations for the support of the Army for the fiscal year ending June thirteenth, nineteen hundred and seven", approved June 12, 1906 (34 Stat. 255), is repealed.

(f)(1) Section 911 of the Military Construction Authorization Act, 1982 (42 U.S.C. 248c) is amended—

(A) by striking "and the Secretary of Health and Human Services" each place it appears and and inserting in lieu thereof ", the Secretary of Health and Human Services, and the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy"; and

(B) by inserting "the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy," immediately before "and the appropriate officials".

(2) Section 1252 of the Department of Defense Authorization Act, 1984 (42 U.S.C. 248d) is amended—

(A) by striking "and the Secretary of Health and Human Services" each place it appears and inserting in lieu thereof ", the Secretary of Health and Human Services, and the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy"; and

(B) by inserting "and the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy" immediately after "with the Secretary of Health and Human Services" each place it appears.

(g)(1) The first section of the Act of March 23, 1906 (33 U.S.C. 491), popularly known as the "Bridge Act of 1906", is amended—

(A) by striking "and Chief of Engineers for their approval, nor until they" and inserting in lieu thereof "for the Secretary's approval, nor until the Secretary";

(B) by striking "by the Chief of Engineers and";

(C) by striking "of the Chief of Engineers and"; and

(D) by striking "of Transportation" the second and third place it appears.

(2) Section 502(b) of the General Bridge Act of 1946 (33 U.S.C. 525(b)) is amended—

(A) by striking "the Chief of Engineers and"; and

(B) by striking "they" both places it appears and inserting in lieu thereof "the Secretary".

REPEAL OF DUPLICATE TANKERMAN MANNING REQUIREMENT

SEC. 18. Section 8703(b) of title 46, United States Code, relating to tankerman manning requirements, is repealed.

INCLUSION OF SECRETARY OF TRANSPORTATION IN CERTAIN MEDICAL MATTERS

SEC. 19. Chapter 55 of title 10, United States Code, is amended—

(1) in section 1072—

(A) by striking all after "by" through "may be," in paragraph (2)(D)(iii) and inserting in lieu thereof "the administering Secretary"; and

(B) by adding at the end thereof the following:

"(3) 'Administering Secretaries' means the Secretaries of executive departments specified in section 1073 of this title as having responsibility for administering this chapter.";

(2) in section 1073, by striking all after "jurisdiction," through "Navy, and" and inserting in lieu thereof "the Secretary of Transportation shall administer this chapter for the Coast Guard when the Coast Guard is not operating as a service in the Navy, and the Secretary of Health and Human Services shall administer this chapter";

(3) in section 1074, by striking "Secretary of Defense and the Secretary of Health and Human Services" each place it appears and inserting in lieu thereof "administrating Secretaries";

(4) in section 1074a(a), by striking "Secretary of Defense and the Secretary of Health and Human Services" and inserting in lieu thereof "administrating Secretaries";

(5) in section 1076(b) and (d), by striking "the Secretary of Defense and the Secretary of Health and Human Services" and inserting in lieu thereof "the administrating Secretaries";

(6) in section 1078(a) and (b), by striking "the Secretary of Health and Human Services" and inserting in lieu thereof "the other administrating Secretaries";

(7) in section 1079—

(A) by striking "the Secretary of Defense and the Secretary of Health and Human Services" each place it appears and inserting in lieu thereof "the administrating Secretaries"; and

(B) by striking "with the Secretary of Health and Human Services" in subsections (a), (b)(2) and (k) and inserting in lieu thereof "with the other administering Secretaries";

(8) in section 1080, by striking "the Secretary of Health and Human Services" and inserting in lieu thereof "the other administrating Secretaries";

(9) in section 1081, by striking "the Secretary of Defense or the Secretary of Health and Human Services" and inserting in lieu thereof "the appropriate administrating Secretaries";

(10) in section 1083, by striking "the Secretary of Health and Human Services" and inserting in lieu thereof "the other administrating Secretaries";

(11) in section 1084—

(A) by striking "the Secretary of Defense or the Secretary of Health and Human Services" and inserting in lieu thereof "an administrating Secretary"; and

(B) by striking "he" and inserting in lieu thereof "the administering Secretary";

(12) by amending the text of section 1085 to read as follows:

"If a member or former member of a uniformed service under the jurisdiction of one executive department (or a dependent of such a member or former member) receives inpatient medical or dental care in a facility under the jurisdiction of another executive department, the appropriation for maintaining and operating the facility furnishing the care shall be reimbursed at rates established by the President to reflect the average cost of providing the care.";

(13) in section 1986—

(A) by striking "the Secretary of Health and Human Services" in subsection (a) and inserting in lieu thereof "the other administering Secretaries"; and

(B) by striking "the Secretary of Defense and the Secretary of Health and Human Services" in subsection (e) and inserting in lieu thereof "the administering Secretaries"; and

(14) in section 1092(a)(1), by striking "Secretary of Health and Human Services" and inserting in lieu thereof "other administering Secretaries".

CUTTER AVAILABILITY

SEC. 20. Throughout fiscal years 1985 and 1986, there shall be available for service at all times on the Atlantic and Gulf Coasts of the United States not less than, in the aggregate, thirty high and medium endurance Coast Guard cutters.

COAST GUARD REPRESENTATION ON RESERVE FORCES POLICY BOARD

SEC. 21. Section 175(b) of title 10, United States Code, is amended to read as follows:

"(b) Whenever the Coast Guard is not operating as a service in the Navy, the Secretary of Transportation may designate two officers of the Coast Guard, Regular or Reserve, to serve as voting members of the Board.".

EXPOSURE SUITS

SEC. 22. (a)(1) Chapter 31 of title 46, United States Code, is amended by adding at the end thereof the following;

"§ 3102. Exposure suits

"(a) The Secretary shall be regulation require exposure suits on vessels designated by the Secretary that operate in the Atlantic Ocean north of 32 degrees North latitude or south of 32 degrees South latitude and in all other waters north of 35 degrees North latitude or south of 35 degrees South latitude. The Secretary may not exclude a vessel from designation under this section only because that vessel carries other lifesaving equipment.

"(b) The Secretary shall establish standards for an exposure suit required by this section, including standards to guarantee adequate thermal protection, buoyance, and flotation stability.

"(c)(1) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel violating this section or a regulation prescribed under this section is liable to the United States Government for a civil penalty of not more than $5,000. The vessel also is liable in rem for the penalty.

"(2) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel violating this section or a regulation prescribed under this section may be fined not more than $25,000, imprisoned for not more than 5 years, or both.".

(2) The analysis of chapter 31 of title 46, United States Code, is amended by inserting immediately after the item relating to section 3101 the following:

"3102. Exposure suits.".

(b) Section 3102 of title 46, United States Code (as added by subsection (a) of this section), does not limit the authority of the Secretary of the department in which the Coast Guard is operating to prescribe regulations requiring exposure suits on vessels not required by section 3102 to have exposure suits.

(c) The regulations prescribed under section 3102 of title 46, United States Code (as added by subsection (a) of this section), shall be effective not later than 60 days after the date of enactment of this Act.

(d) Not later than 6 months after the date of enactment of this Act, the Secretary of the department in which the Coast Guard is operating shall submit a report to the Congress evaluating the benefits and disadvantages of extending the regulations prescribed under section 3102 of title 46, United States Code (as added by subsection (a) of this section) to require exposure suits on designated vessels operating in all waters north of 31 degrees North latitude or south of 31 degrees South latitude.

VESSEL FIRE RESPONSE CAPABILITY

SEC. 23. (a) The Secretary of the department in which the Coast Guard is operating shall make a grant to the Maritime Fire and Safety Association, a non-profit organization incorporated in the State of Oregon. Such grant shall be used for a demonstration project to develop a fire response capability for vessels through the acquisition of equipment and supplies and through training of fire response personnel. The Secre-

tary shall ensure that funds made available by such grant are used for such purposes.

(b) For purposes of subsection (a) of this section, there are authorized to be appropriated not to exceed $349,000 for fiscal year 1985, not to exceed $160,000 for fiscal year 1986, and not to exceed $103,000 for fiscal year 1987.

CADET PREAPPOINTMENT TRAVEL EXPENSES

SEC. 24. (a) Chapter 9 of title 14, United States Code, is amended by inserting immediately after section 181 the following:

"§ 181a. Cadet applicants; preappointment travel to Academy.".

"The Secretary is authorized to expend appropriated funds for selective preappointment travel to the Academy for orientation visits of cadet applicants.".

(b) The table of sections at the beginning of such chapter is amended by inserting immediately after the item relating to section 181 the following:

"181a. Cadet applicants; preappointment travel to Academy.".

COMMODORE AND REAR ADMIRAL RESERVE POSITIONS

SEC. 25. (a)(1) Section 42(b) of title 14, United States Code, is amended by striking ".375" both places it appears and inserting in lieu thereof "0.375".

(2) Section 290 of such title is amended by striking "Board" in the fourth sentence and inserting in lieu thereof "Boards".

(3) The table of sections at the beginning of chapter 13 of such title is amended by striking the item relating to section 462a.

(4) Section 724 of such title is amended—

(A) by inserting "(1)" immediately after "(b)";

(B) by striking the last sentence; and

(C) by adding at the end thereof the following:

"(2) The authorized number of Reserve officers in an active status not on active duty in the grades of commodore and rear admiral is a total of two. However, the Secretary of the department in which the Coast Guard is operating may authorize an additional number of Reserve officers not on active duty in the grades of commodore and rear admiral as necessary in order to meet planned mobilization requirements.".

(b)(1) The matter in the table in section 201(a) of title 37, United States Code, under the heading "Navy, Coast Guard, and National Oceanic and Atmospheric Administration" and in the columns for 0-8 and 0-7 is amended to read as follows: "Rear admiral Commodore".

(2)(A) The heading of section 202 of such title is amended to read as follows:

"§ 202. Pay grade: retired Coast Guard commodores".

(B) The item relating to section 202 in the table of sections at the beginning of chapter 3 of such title is amended to read as follows:

"202. Pay grade: retired Coast Guard commodores".

(c) The matter in the table in section 741(a) of title 10, United States Code, under the heading, "Navy and Coast Guard" is amended—

(1) by striking "Rear admiral (Navy) and Rear admiral (upper half) (Coast Guard)" and inserting in lieu thereof "Rear admiral"; and

(2) by striking "Commodore (Navy) and Rear admiral (lower half) (Coast Guard)" and inserting in lieu thereof "Commodore".

ASSOCIATE DEPUTY SECRETARY OF TRANSPORTATION

SEC. 26. (a) Section 102 of title 49, United States Code, is amended by redesignating subsection (d) as subsection (e) and inserting immediately after subsection (c) the following:

"(d) The Department has an Associate Deputy Secretary appointed by the President, by and with the advice and consent of the Senate. The Associate Deputy Secretary shall carry out powers and duties prescribed by the Secretary.".

(b) Section 5316 of title 5, United States Code, is amended by adding at the end thereof the following: "Associate Deputy Secretary, Department of Transportation.".

(c) Notwithstanding any other provision of law, until April 15, 1985, the position created by subsection (a) of this section may be held by a person named by the President alone from among qualified individuals.

FLAT RATE PER DIEM TEST

SEC. 28. (a) Before October 1, 1986, the Secretary of the department in which the Coast Guard is operating may test a flat rate per diem allowances system for military travel allowances.

(b) Such flat rate per diem allowances shall be an amount determined by the Secretary to be sufficient to meet normal and necessary expenses in the area in which travel is performed but such allowances may not be more than $75 for each day in the continental United States.

(c) The test authorized by this section may not begin before the Committees on Commerce, Science, and Transportation and Armed Services of the Senate and the Committee on Merchant Marine and Fisheries and Armed Services of the House of Representatives are notified of the test.

IMPROVEMENTS IN SHIPPING LAWS ADMINISTERED BY THE COAST GUARD

SEC. 29. (a) Section 7101(e)(3) of title 46, United States Code, is amended to read as follows:

"(3) has a thorough physical examination each year while holding the license except that this requirement does not apply to an individual who will serve as a pilot only on a vessel of less than 1600 gross tons;".

(b) Section 8101(g) of title 46, United States Code, is amended by striking "or part B of this subtitle applies" and inserting in lieu thereof "applies or which is subject to inspection under chapter 33 of this title".

(c) Section 8301(a) of title 46, United States Code, is amended—

(1) by inserting "(except the Great Lakes)" immediately after "lakes"; and

(2) by striking "to which part B of this subtitle applies" and inserting in lieu thereof "subject to inspection under chapter 33 of this title".

(d) Section 8301(a)(1) of title 46, United States Code, is amended by inserting "propelled by machinery or carrying passengers" immediately after "vessels".

(e) Section 8501(a) of title 46, United States Code, is amended by striking "part" and inserting in lieu thereof "subtitle".

(f)(1) Section 8502(a) of title 46, United States Code, is amended to read as follows:

"(a) Except as provided in subsection (g) of this section, a coastwise seagoing vessel shall be under the direction and control of a pilot licensed under section 7101 of this title if the vessel is—

"(1) not sailing on register;

"(2) underway;

"(3) not on the high seas; and

"(4)(A) propelled by machinery and subject to inspection under part B of this subtitle; or

"(B) subject to inspection under chapter 37 of this title.".

(2) Section 8502 of title 46, United States Code, is amended by adding at the end thereof the following:

"(g) The Secretary shall designate by the regulation the areas of the approaches to and waters of Prince William Sound, Alaska, on which a vessel subject to this section is not required to be under the direction and control of a pilot licensed under section 7101 of this title.".

(3)(A) Chapter 85 of title 46, United States Code, is amended by adding at the end thereof the following:

"§ 8503. Federal pilots authorized

"(a) The Secretary may require a pilot licensed under section 7101 of this title on a self-propelled vessel when a pilot is not required by State law and the vessel is—

"(1) engaged in foreign commerce; and

"(2) operating on the navigable waters of the United States.

"(b) A requirement prescribed under subsection (a) of this section is terminated when the State having jurisdiction over the area involved—

"(1) establishes a requirement for a State licensed pilot; and

"(2) notifies the Secretary of that fact.

"(c) For the Saint Lawrence Seaway, the Secretary may not delegate the authority under this section to any agency except the Saint Lawrence Seaway Development Corporation.

"(d) A person violating this section or a regulation prescribed under this section is liable to the United States Government for a civil penalty of not more than $25,000. Each day of a continuing violation is a separate violation. The vessel also is liable in rem for the penalty.

"(e) A person that knowingly violates this section or a regulation prescribed under this section shall be fined not more than $50,000, imprisoned for not more than five years, or both.".

(B) The analysis of chapter 85 of title 46, United States Code, is amended by inserting immediately after the item relating to section 8502 the following: "8503. Federal pilots authorized.".

(g) Section 7 of the Ports and Waterways Safety Act (33 U.S.C. 1226) is repealed.

(h) Section 10 of the Ports and Waterways Safety Act (33 U.S.C. 1229) is amended by striking "6, and 7" and inserting in lieu thereof "and 6".

LOGBOOK REQUIREMENT

SEC. 30. Section 11301(a) of title 46, United States Code, is amended to read as follows:

"(a) Except a vessel on a voyage from a port in the United States to a port in Canada, a vessel of the United States shall have an official logbook if the vessel is—

"(1) on a voyage from a port in the United States to a foreign port; or

"(2) of at least 100 gross tons and is on a voyage between a port of the United States on the Atlantic Ocean and on the Pacific Ocean."

TRENT RIVER RAILROAD BRIDGE

SEC. 31. Notwithstanding any other provision of law, the Trent River Railroad Bridge, mile 0.0, in New Bern North Carolina, is deemed an unreasonable obstruction to navigation.

AMENDMENTS TO THE COASTWISE LOAD LINE ACT

SEC. 32. (a) Section 1(b) of the Act of August 27, 1935 (46 App. U.S.C. 88(b)), popularly known as the "Coastwise Load Line Act, 1935" is amended to read as follows:

"(b) This Act does not apply to—

"(1) a fish tender vessel of not more than 500 gross tons—

"(A) constructed, under construction, or contracted to be constructed as a vessel of this type before January 1, 1980; or

"(B) converted for use as a vessel of this type before January 1, 1983; and

"(2) a fish processing vessel of not more than 5,000 gross tons, except a vessel constructed after August 15, 1974, or converted for use as a vessel of this type after January 1, 1983;".

(b) Section 2 of such Act (46 App. U.S.C. 88A) is amended to read as follows:

"SEC. 2. (a) For vessels to which this Act applies, the Secretary of the department in which the Coast Guard is operating shall establish by regulation load lines and marks indicating the maximum depth to which these vessels may be loaded safely.

"(b) In prescribing regulations under this Act, the Secretary shall consider the age, condition, character, design, and construction of a vessel to which this act applies, including subdivision and stability characteristics.

"(c) This Act applies to the Great Lakes, except that the Secretary may establish special operating regulations for barges operating close to shore between Calumet Harbor, Illinois, and Burns Harbor, Indiana, that exempt these barges from the load line and marking requirements of this section.

"(d) The Secretary may not establish on any vessel a load line that is above the actual line of safety.".

TECHNICAL AMENDMENTS REGARDING COMMERCIAL FISHING INDUSTRY VESSELS

SEC. 33. (a) Section 4502(b)(3) of title 46, United States Code, is amended by striking "the exemption" and inserting in lieu thereof "this chapter".

(b) Section 4503 of title 46, United States Code, is amended by striking "shall be deemed" and inserting in lieu thereof "is deemed".

(c) Section 8104(k) and (l) of title 46, United States Code, is amended by striking "may" and inserting in lieu thereof "shall".

(d) Section 402(13) of the Act of July 17, 1984 (Public Law 98-364) is amended by striking "Section 10101(a)" and inserting in lieu thereof "Section 10101".

SAILING SCHOOL VESSELS

SEC. 34. (a) Section 2101 of title 46, United States Code, is amended:

(1) in clause (21)(B), by inserting "or a sailing school vessel" immediately after "vessel" the first time it appears; and

(2) in clause (27), by striking all after "by sail" and inserting in lieu thereof "and may include—

"(A) any subject related to that operation and to the sea, including seamanship, navigation, oceanography, other nautical and marine sciences, and maritime history and literature; and

"(B) only when in conjuction with a subject referred to in subclause (A) of this clause, instruction in mathematics and language arts skills to sailing school students having learning disabilities.".

(b) Section 206 of the Sailing School Vessels Act of 1982 (46 App. U.S.C. 446(b) is amended by inserting "section 11101(a)-(c) of title 46, United States Code," immediately before "and".

COMPENSATION OF COMMANDANT OF THE COAST GUARD

SEC. 35. (a) Footnote 2 of the table entitled "COMMISSIONED OFFICERS" in section 101(b)(1) of the Uniformed Services Pay Act of 1981 (Public Law 97-60; 95 Stat. 990) is amended—

(1) by striking "or"; and

(2) by inserting "or Commandant of the Coast Guard," immediately after "Corps,".

(b) The first sentence of footnote 4 of the table in section 1401 of title 10, United States Code, is amended—

(1) by striking "or"; and

(2) by inserting "or Commandant of the Coast Guard," immediately after "Corps,".

AWARDS OF EXPENSES OF CERTAIN AGENCY AND COURT PROCEEDINGS

GRASSLEY AMENDMENT NO. 7077

Mr. BAKER (for Mr. GRASSLEY) proposed an amendment to the bill (H.R. 5479) to amend section 504 of title 5, United States Code, and section 2412 of title 28, United States Code, with respect to awards of expenses of certain agency and court proceedings, and for other purposes; as follows:

Strike out all after the enacting clause and insert in lieu thereof the following: That (a) section 504(a)(1) of title 5, United States Code, is amended—

(1) by striking out "as a party to the proceeding", and

(2) by adding at the end thereof the following: "The decision of the adjudicative officer on the application for fees and other expenses shall be the final administrative decision under this section.".

(b) Section 504(a)(2) of title 5, United States Code, is amended by adding at the end thereof the following: "When the United States appeals the underlying merits of an adversary adjudication, no decision on an application for fees and other expenses in connection with that adversary adjudication shall be made under this section until a final and unreviewable decision is rendered by the court on the appeal or until the underlying merits of the case have been finally determined pursuant to the appeal.".

(c) Section 504(b) of title 5, United States Code, is amended—

(1) by amending paragraph (1)(B) to read as follows:

"(B) 'party' means a party, as defined in section 551(3) of this title, who is (i) an individual whose net worth did not exceed $2,000,000 at the time the adversary adjudication was initiated, or (ii) any owner of an unincorporated business, or any partnership, corporation, association, unit of local government, or organization, the net worth of which did not exceed $7,000,000 at the time the adversary adjudication was initiated, and which had not more than 500 employees at the time the adversary adjudication was initiated; except that an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)(3)) exempt from taxation under section 501(a) of such Code, or a cooperative association as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1141j(a)), may be a party regardless of the net worth of such organization or cooperative association;";

(2) in paragraph (1)(c)—

(A) by inserting "(i)" before "an adjudication under";

(B) by inserting before the semicolon at the end thereof the following: ", and (ii) any appeal of a decision made pursuant to section 6 of the Contract Disputes Act of 1978 (41 U.S.C. 605) before an agency board of contract appeals as provided in section 8 of that Act (41 U.S.C. 607)"; and

(C) by striking out "and" at the end thereof;

(3) by striking out the period at the end of subparagraph (D) and inserting in lieu thereof "; and"; and

(4) by adding at the end thereof the following:

"(E) 'position of the agency' includes the underlying action which led to the adversary adjudication; except that fees and expenses may not be awarded to a party for any portion of the adversary adjudication in which the party has unreasonably protracted the proceedings.".

(d) Section 504(c)(2) of title 5, United States Code, is amended to read as follows:

"(2) If a party or the United States is dissatisfied with a determination of fees and other expenses made under subsection (a), that party or the United States (as the case may be) may, within 30 days after the determination is made, appeal the determination to the court of the United States having jurisdiction to review the merits of the underlying decision of the agency adversary adjudication. The court's determination on all appeals heard under this paragraph shall be based solely on the factual record made before the agency. The court may modify the determination of fees and other expenses only if the court finds that the failure to make an award of fees and other expenses, or the calculation of the amount of the award, was unsupported by substantial evidence.".

(e) Section 504(d) of title 5, United States Code, is amended to read as follows:

"(d) Fees and other expenses awarded under this subsection shall be paid by any agency over which the party prevails from any funds made available to the agency by appropriation or otherwise.".

(f) Section 504 of title 5, United States Code, is amended by adding at the end thereof the following:

"(f) If complete payment of the fees and other expenses awarded under this section is not made within 60 days after the final agency action making an award of such fees and other expenses, interest shall be paid on the amount remaining due. Such interest shall be computed at the rate the Secretary of the Treasury establishes for interest payments under section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611), and shall run from the date which is 61 days after the date of such award up to and including the date such payment is posted by certified or registered mail.".

SEC. 2. (a) Section 2412 of title 28, United States Code, is amended—

(1) in subsections (a) and (b) by striking out "or any agency and any official of the United States" each place it appears and inserting in lieu thereof "or any agency or any official of the United States";

(2) in subsection (d)(1)(A) by inserting ", including proceedings for judicial review of agency action," after "in tort)"; and

(b) Section 2412(d)(2) of title 28, United States Code, is amended—

(1) in subparagraph (B)—

(A) in clause (i) by striking out "$1,000,000" and inseting in lieu thereof "$2,000,000"; and

(B) by striking out "(ii)" and all that follows through the end of the subparagraph and inserting in lieu thereof the following: "or (ii) any owner of an unincorporated business, or any partnership, corporation, association, unit of local government, or organization, the net worth of which did not exceed $7,000,000 at the time the civil action was filed, and which had not more than 500 employees at the time the civil action was filed; except that an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)(3)) exempt from taxation under section 501(a) of such Code, or a cooperative association as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1141j(a)), may be a party regardless of the net worth of such organization or cooperative association;";

(2) by striking out the period at the end of subparagraph (C) and inserting in lieu thereof a semicolon; and

(3) by adding at the end thereof the following:

"(D) 'position of the United States' includes the underlying agency action which led to the litigation; except that fees and expenses may not be awarded to a party for any portion of the litigation in which the party has unreasonably protracted the proceedings;

"(E) 'civil action brought by or against the United States' includes an appeal by a party, other than the United States, from a decision of a contracting officer rendered pursuant to a disputes clause in a contract with the Government or pursuant to the Contract Disputes Act of 1978;

"(F) 'court' includes the United States Claims Court;

"(G) 'final judgment' means a judgment that is final and not appealable; and

"(H) 'prevailing party', in the case of eminent domain proceedings, means a party who obtains a final judgment (other than by settlement), exclusive of interest, the amount of which is at least as close to the highest valuation of the property involved that is attested to at trial on behalf of the property owner as it is to the highest valuation of the property involved that is attested to at trial on behalf of the Government.".

(c) Section 2412(d)(4) of title 28, United States Code, is amended to read as follows:

"(4) Fees and other expenses awarded under this subsection to a party shall be paid by any agency over which the party prevails from any funds made available to the agency, by appropriation or otherwise.".

(d) Section 2412 of title 28, United States Code, is amended by adding at the end thereof the following:

"(f) If complete payment of the costs or fees and other expenses awarded under this section is not made within 60 days after the award of such costs or fees and other expenses, interest shall be paid thereafter on the amount remaining due. Such interest shall be computed at the rate the Secretary of the Treasury establishes for interest payments under section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611), and shall run from the date which is 61 days after the date of such award up to and including the date such payment is posted by certified or registered mail.".

SEC. 3. Section 206 of the Equal Access to Justice Act is amended—

(1) by striking out "Nothing" and inserting in lieu thereof "(a) Except as provided in subsection (b), nothing"; and

(2) by adding at the end thereof the following:

"(b) Section 206(b) of the Social Security Act (42 U.S.C. 406(b)(1)) shall not prevent an award of fees and other expenses under section 2412(d) of title 28, United States Code. Section 206(b)(2) of the Social Security Act shall not apply with respect to any such award but only if any fees collected by the claimant's attorney or withheld for such attorney pursuant to such section 206(b) are refunded to the claimant insofar as the fees relate to the same work for which the claimant's attorney is awarded fees under section 2412(d) of title 28, United States Code.".

SEC. 4. Section 203(c) of the Equal Access to Justice Act (Public Law 96-481) is repealed.

SEC. 5. Section 204(c) of the Equal Access to Justice Act is repealed.

SEC. 6. Section 207 of the Equal Access to Justice Act, is repealed.

SEC. 7. Section 208 of the Equal Access to Justice Act is amended by adding at the end thereof the following: "Awards may be made for fees incurred before October 1, 1981, in any such adversary adjudication or civil action.".

SEC. 8. (a) Section 7430(b)(1) of the Internal Revenue Code of 1954 (relating to maximum dollar amount) is amended by striking out "$25,000" and inserting in lieu thereof "$50,000".

(b) Subparagraph (A) of section 7430(c)(2) of such Code (defining prevailing party) is amended to read as follows:

"(A) IN GENERAL.—The term 'prevailing party' means any party to any proceeding described in subsection (a) (other than the United States or any creditor of the taxpayer involved)—

"(i) which has substantially prevailed with respect to—

"(I) the amount in controversy, or

"(II) the most significant issue or set of issues presented, and

"(ii) with respect to which the United States has not established that its position in the civil proceeding was substantially justified.

In determining whether the position of the United States in any civil proceeding was substantially justified, the court may take into account the administration actions of the Internal Revenue Service in the matter giving rise to the issues in such proceeding. Notwithstanding this subparagraph, a party shall not be treated as a prevailing party if special circumstances would make an award unjust.".

(c) Section 7430(f) of such Code (relating to termination date) is amended by striking out "1985" and inserting in lieu thereof "1989".

SEC. 9. (a) Except as otherwise provided in this section, the amendments made by this Act shall be effective as of October 1, 1984, and shall apply to cases pending on such date.

(b) The amendments made to section 504(b)(1)(C)(ii) of title 5, United States Code, by subsection (c)(2) of the first secton of this Act, and the amendments to section 2412(d)(2)(E) of title 28, United States Code, made by section 2(d)(3) of this Act shall apply to any adversary adjudication which was pending on or commenced on or after October 1, 1981 in which applications for fees and expenses were timely filed and were dismissed for lack of jurisdiction.

(c)(1) Except as provided in paragraph (2), the amendments made by section 8 of this Act shall apply to civil actions or proceedings pending on, or commenced after, the 45th day after the date of the enactment of this Act.

(2) The amendments made by section 8 shall not apply to any action or proceeding pending on such 45th day if there has been a determination by any court of the United States (including the Tax Court and the United States Claims Court) with respect to—

(A) the awarding of reasonable litigation costs in such proceeding, or

(B) the most significant issue or set of issues presented in such proceeding.

CONSERVATION SERVICE REFORM ACT

McCLURE AMENDMENT NO. 7078

Mr. BAKER (for Mr. McCLURE) proposed an amendment to the bill (H.R. 5946) to reform the Residential Conservation Service and to repeal the Commercial and Apartment Conservation Service; as follows:

Strike all after the enacting clause and insert the following:

SECTION 1. (a) During the period beginning on the date of the enactment of this Act and ending on January 1, 1986, the Secretary of Energy may not approve any plan under section 721(a) of the National Energy Conservation Policy Act (relating to energy conservation for commercial buildings and multifamily dwellings), and no public utility may be required to offer an energy audit to an eligible customer of such utility under section 731(a)(1) of such Act, except pursuant to a plan approved by the Secretary prior to the date of the enactment of this Act.

(b) Sections 215(d), and 217(e)(1) of the National Energy Conservation Policy Act (relating to utility programs and home heating supplier programs) are amended by striking out "January 1, 1985," each place it appears and inserting in lieu thereof "January 1, 1986,".

ST. ELIZABETHS HOSPITAL AND DISTRICT OF COLUMBIA MENTAL HEALTH SERVICES ACT

EAGLETON AMENDMENT NO. 7079

Mr. BYRD (for Mr. EAGLETON) proposed an amendment to the bill (H.R. 6224) to provide for the assumption of selected functions, programs, and resources of St. Elizabeths Hospital by the District of Columbia, and to provide for the establishment of a comprehensive mental health care system in the District of Columbia, and for other purposes; as follows:

On page 10, line 14, strike out "and".

On page 10, line 19, strike out the period and insert in lieu thereof a semicolon and the word "and".

On page 10, between lines 19 and 20, insert the following:

(7) identify the specific real property, buildings, improvements, and personal property to be transferred pursuant to section 8(a)(1) of this Act needed to provide mental health and other services provided by the

Department of Human Services under the final system implementation plan.

On page 21, line 11, immediately before the period, insert the following: "needed to provide mental health and other services provided by the Department of Human Services identified pursuant to section 4(c)(7) of this Act".

On page 21, between lines 15 and 16, insert the following:

(b) On or before October 1, 1991, the Mayor shall prepare, and submit to the Committee on the District of Columbia of the House of Representatives and the Committees on Governmental Affairs and Labor and Human Resources of the Senate, a master plan, not inconsistent with the comprehensive plan for the National Capital, for the use of all real property, buildings, improvements, and personal property comprising Saint Elizabeths Hospital in the District of Columbia not transferred or excluded pursuant to subsection (a) of this section. In developing such plan, the Mayor shall consult with, and provide an opportunity for review by, appropriate Federal, regional, and local agencies. Such master plan submitted by the Mayor shall be approved by a law enacted by the Congress within the twelve-month period following the date such plan is submitted to the Committee on the District of Columbia of the House of Representatives and the Committees on Governmental Affairs and Labor and Human Resources of the Senate. Immediately upon the approval of any such law, the Secretary shall transfer to the District, without compensation, all right, title, and interest of the United States in and to such property in accordance with such approved plan. The real property, together with the buildings and other improvements thereon, including personal property used in connection therewith, known as the Oxon Cove Park and operated by the National Park Service, Department of the Interior, shall not be transferred under this Act.

On page 21, line 16, strike out "(b)" and insert in lieu thereof "(c)".

ADDITIONAL STATEMENTS

THE PERFORMING ARTS LABOR RELATIONS AMENDMENTS

● Mr. RANDOLPH. Mr. President, on September 13, 1984, the Senate Labor Subcommittee under the able leadership of our distinguished chairman, the Senator from Oklahoma [Mr. NICKLES], held the first of two hearings on Oversight of the Taft-Hartley Act. Testifying before the subcommittee were representatives of the American Federation of Musicians, the largest entertainment union in the world, representing 230,000 individuals in the United States. Mr. Victor Fuentealba, president of the American Federation of Musicians, accompanied by Ned Guthrie, national legislative director, and Cosimo Abato, general counsel, described for the subcommittee the serious situation facing musicians. Musicians, because of the unique nature of their work experiences, have been denied the opportunity to engage in collective bargaining with their true employers. This has occurred as a result of the application of labor law to the entertainment industry by the National Labor Relations Board.

In an effort to provide essential relief to beleaguered musicians and performing artists and to correct injustices which have developed from NLRB rulings, on January 31, 1983, I introduced S. 281, the Performing Arts Labor Relations Amendments. This legislation is pending before the Senate Subcommittee on Labor. Following the September 13, 1984, hearing before our subcommittee, and a hearing on comparable legislation before the Subcommittee on Labor-Management Relations of the House of Representatives which occurred September 18, 1984, I am encouraged and hopeful that these issues will be a top priority in the 99th Congress. Mr. President, I ask that the testimony of Victor W. Fuentealba, president of the American Federation of Musicians, be printed at this point in the RECORD.

The testimony follows:

STATEMENT OF VICTOR W. FUENTEALBA, PRESIDENT, AMERICAN FEDERATION OF MUSICIANS

Mr. Chairman, members of the Subcommittee, my name is Victor W. Fuentealba and I am International President of the American Federation of Musicians, the largest entertainment union in the world.

First of all, I want to thank you and the Committee for giving me the opportunity to appear before you today to explain the importance of S. 281 to the professional musicians throughout our country. Our union has represented professional musicians since 1896 and during its lengthy history, we have been faced with many challenges and threats to job opportunities and have survived. Technological developments, starting with the introduction of the sound track in motion pictures, the phonograph record which is now providing all of the music on radio and in many establishments, and devices that duplicate the sounds of musical instruments are examples of the myriad of problems that have faced the professional musician and which will continue to do so in future years. Despite those challenges, we have been successful in our continual efforts to create and preserve work for American musicians. However, one of the most serious problems threatening the music industry today can only be resolved by you and your colleagues. I am referring of course to the present labor law and its application by the National Labor Relations Board and the courts to the music industry.

Let me give you just one example. From the day that the hotels and casinos were opened in Puerto Rico, the musicians working in those establishments providing music for dancing and shows were considered employees of the hotel. Our local affiliate in Puerto Rico capably represented the interests of those * * * of our union and for assistance in resolving their problems with purchasers and we are unable to help them.

The amendments which we are seeking have not been arbitrarily chosen but are based on the bitter experiences of thousands of musicians since the adoption of the Taft-Hartley Act. The amendments that we are requesting could have probably been incorporated into the original legislation in 1947 or when amendments were adopted in 1959 were it not for the fact that at those times the law had not been applied to the music industry and there were no adverse rulings or decisions. Our problems began years later and culminated in hundreds of unfair labor practice charges in the late 1970's.

The music industry is a unique business and the ambitions of every young musician to become a star are marred by unscrupulous promoters, managers, agents, nightclub owners and others seeking to exploit the musician. The American Federation of Musicians is the only organization whose sole purpose in existing is to protect musicians from exploitation and to improve their financial welfare and professional careers. The present law not only prevents our union from protecting its members, but offers no suitable alternatives. The nightclub owner determines what compensation the musicians will receive, what hours they will work, when they will take their intermissions, what songs they will play, what they will wear, and occasionally, with whom they will associate when off the bandstand. Yet, under the present law, that same nightclub owner who has such complete control over the services of the musicians and their welfare is immune from any action on the part of the union to protect the musicians because he is not recognized as the employer of the band. Our only remedy is to amend the Taft-Hartley Act as we have requested.

Music is the universal language and there is not a family today without at least one member who plays a musical instrument. The caliber of musicianship is improving day by day and more and more youngsters are looking forward to careers in music. Our ability to protect their interests, to prevent their exploitation and to enable them to earn a decent livelihood is hampered by the current law. The relief we are seeking is not a major revision of the Taft-Hartley Act, but merely changes which will afford the professional musician the right to have a representative of his or her choosing to negotiate with those who wish to utilize their services. I do not feel that the drafters and proponents of the present law ever envisioned or intended that law to discriminate against musicians, but gentleman, that is what is happening today.

In the past, Congress has seen fit to make changes in the law when it was proven that those changes were necessary to protect the workers in a particular industry. In 1959, after listening to the pleas of the construction and garment industries, Congress realized that certain amendments to the Taft-Hartley Act were the only solution to the unique problems of those industries, and today we are here seeking similar relief for our industry. The musicians need protection also and the musicians need the changes which we are requesting. I urge your support of S. 281.

EXPLANATION OF BACKGROUND AND OBJECTIVES OF S. 281

(i)

LEGISLATIVE BACKGROUND

In 1959, Congress enacted a number of amendments to the Labor Management Relations Act of 1947 (or the "LMRA") in recognition of certain unique characteristics of the Building and Construction Industry and the Garment and Apparel Industry. Those amendments, which now are included in Sections 8(e) and 8(f) of the LMRA and are codified at 29 U.S.C. Sections 158(e) and 158(f), addressed specific problems that had arisen in the application of the Act to the Building and Apparel Industries since it was passed in 1947.

In adopting the 1959 amendments to the LMRA, Congress recognized that all industries are not equally affected by the Act, nor equally benefitted by its terms. In particular, the draftsmen of the 1959 amendments recognized the extremely temporal nature of employment within the construction industry. The Committee reports in both the Senate and House pointed out that "the vast majority of building projects are of relatively short duration". Senate Report No. 187, at p. 28, and House Report No. 741, at p. 19. Thus, the Committees of both Houses of Congress concluded that a prehire collective bargaining agreement, entered into even before a job has begun, was a socially acceptable self-regulative mechanism, even though the practice of making such agreements was "not entirely consistent with Wagner Act rulings of the NLRB." Indeed, the two Committees found that such agreements assisted employers in estimating labor costs before bidding on jobs, enabled employers to secure a reliable labor pool and stabilized labor-management relations in the industry. See Senate Report No. 187, at p. 28, and House Report No. 741, at p. 19.

The problem facing Congress with regard to the construction trades perhaps was best summarized by remarks which Senator Javits made on the floor of the Senate on April 21, 1959, when he said: "We cannot apply the Taft-Hartley law to the building and construction field. We all know the law is not being applied in that field and we might as well recognize the fact in the law. This is an essential amendment and the sooner we adopt it the better."

Congresssional Record, 86th Congress, 1st Session, at p. 5731.

Section 8(f) of the LMRA was passed, therefore, in order to place the building trades unions on an equal footing with unions in other industries in which employment is of a more permanent nature. See, Congressional Record, 86th Congress, 1st Session, at p. 14204. See, also, House Report No. 1147 at pp. 41–42. It sanctioned a standing industry practice which, while arguably prohibited by the LMRA, had been employed by labor and management to stabilize employment relationships in the building trades and to set prevailing work standards and wages.

In the case of the Garment and Apparel Industry, the object of the Congress in drafting a special proviso in Section 8(e) of the LMRA was much the same. Congress sought to retard the proliferation of small job shops that were set up to avoid union contracts and, thus, undermined union work standards and union wage scales. See, Congressional Record, 86th Congress, 1st Session at p. 15952.

That object was succinctly described by Representative Halpern as follows:

"Of all the industries in the Nation, the Garment Industry was one of the most susceptible to employer evasions of agreements. It was particularly difficult for unions to police competition from sweat shops because employers hired jobs out to hidden lofts and received back the finished work product before the unions could catch up with them.

". . . Consequently low wages and terrible working conditions at one time characterized the industry.

"The conference report language exempting the Garment Industry from the intradiction against coercing an employer from handling the products of another or from doing business with another is a welcome one indeed. The garment unions can continue to make agreements with jobbers not to contract out work to subcontractors using nonunion labor."

Congressional Record, 86th Congress, 1st Session at pp. 16651–16652.

(ii)

DESCRIPTION OF THE MUSIC INDUSTRY

The music industry is likewise unique in several respects and shares with the Garment and Construction Industries characteristics that put some of its longstanding practices in direct conflict with provisions of the LMRA. Musicians, like construction workers, usually enjoy only short term employment with particular employers. They, like their counterparts in the building trades, move from job to job with little hope of sustained work security with any one employer. Indeed, many professional musicians are forced to practice their profession in a nomadic fashion, traveling from city to city, working no more than a week or two at any one location, in night clubs, restaurants, and hotels across the country.

Because of the casual employment relationship into which traveling musicians are forced, they cannot enjoy the benefits of collective bargaining or association. For the most part they are compelled to strike their own bargain with little leverage as to the terms and conditions of employment under which they are employed. While many musicians were treated in the past as "house" employees by hotels, restaurants and similar business establishments, most who work today in lounges, bars and dining rooms are forced to accept employment without the benefit of employer contributions for FICA taxes, unemployment and workmen's compensation, or pension coverage. Many, if not most, purchasers of professional music refuse to consider themselves to be the musicians' employer, even though they continue to exercise the same control that they always have had over the musicians' working conditions, hours of work, days off and discipline. As a consequence, most traveling musicians are treated today as independent contractors. They are forced to bear their own expenses for self-employment taxes and health insurance, and risk periods of unemployment and illness alone without the security of either unemployment compensation benefits or group health coverage.

Paradoxically, precisely because of their status as independent contractors, professional musicians enjoy less power than ever before to control the terms and conditions under which they must work. Since the Taft-Hartley Act was passed in 1947, Section 2(3) of the LMRA has specifically excluded independent contractors from the protected status of an "employee" under the Act. Thus, rather than assist in the protection of musicians, sections of the LMRA stand as barriers to effective collective representation of professional musicians.

Under the National Labor Relations Board's (NLRB) interpretation of Sections 8(b)(4) and 8(e) of the Act, musicians are prohibited from compelling the purchasers of music who own nightclubs, restaurants or hotels to recognize their collection bargaining agent and from collectively setting wages and other terms and conditions of employment. See, Bow & Arrow Manor, Inc., 206 NLRB 581 (1973). Indeed, they cannot even picket or otherwise force purchasers of their services to sit down and bargain collectively with them. They are instead left to individually hazard the competitive pressures of the labor market in their industry, without union representation, which is a result that Congress surely did not intend. See, Findings and Declaration of Policy, Section A, LMRA, 29 USC Section 151.

(iii)

SELF-REGULATION OF INDUSTRY BY THE AMERICAN FEDERATION OF MUSICIANS

While many musicians are prohibited by present law from collectively bargaining with the purchasers of their services, they also are prohibited by the LMRA from effectively regulating their own affairs with their own labor union, the American Federation of Musicians (the "AFM"). Over a period of years, many of the AFM's longstanding practices, which were originally adopted to protect its membership in the labor market, have been found by the NLRB to be in violation of the LMRA.

(iv)

SUMMARY OF PURPOSE OF PROPOSED LEGISLATION

In *American Federation of Musicians* v. *Carroll*, 391 U.S. 99 (1968), the United States Supreme Court recognized the unique characteristics of the music industry and judicially fashioned a broad exemption from the provisions of federal anti-trust law for professional musicians and their Union. However, that recognition and exemption is meaningless because of the restrictive provisions of the LMRA, which prohibit the exercise of the exemption that was granted by the Supreme Court.

The music industry, much as the garment and construction industries, is an industry which is out of step with much of industry in the United States. Its economic structures and employer-employee relationships conflict on a daily basis with the generalized mandate of the LMRA. Just as the industries for which exceptions were made by Congress in 1959, the music industry must receive exemptions from the broad reach of the LMRA in order to stand on equal footing with the industries for which the LMRA was truly designed.

That equal footing is the objective of S. 281.●

SERVICE TO PUBLIC EDUCATION AWARD

● Mrs. HAWKINS. Mr. President, the State of Florida has had an outstanding record in the effort to improve public education. Our State can be grateful for a number of outstanding local educators who are taking the lead to bring better education to the children of Florida.

I am especially proud that Florida had nine schools recognized in the U.S. Department of Education's Secondary School Recognition Program for 1983–84. They were honored in a special ceremony in Washington, DC on August 27, 1984.

One of our outstanding school districts is the Duval County Public School District, Jacksonville, which had one senior high school, Ribault, and the State's only junior high school, Jeff Davis, recognized last year and two schools—John Gorrie Junior High and Terry Parker High School—of the nine Florida schools recognized this year. The Jacksonville School Dis-

trict, host of the annual "Academic Superbowl," has received other recognitions such as being named a national model urban school district by the prestigious Danforth Foundation and presented by the American Association of School Administrators of the Nation's top award for educational leadership to Jacksonville Superintendent Herb A. Sang.

The Duval County Public Schools has established an annual Service to Public Education Award recognizing an official who has made a major contribution to the advancement of public education in Duval County during the preceding year. The recipient for this year, held at the coliseum on August 23, was an official from the U.S. Department of Education: Dr. Donald J. Senese, Assistant Secretary for Educational Research and Improvement. Dr. Senese delivered some preceptive remarks which I ask to be printed in the RECORD.

The remarks follow:

REMARKS AT THE SERVICE TO EDUCATION AWARD CEREMONY

(By Dr. Donald J. Senese)

It is indeed a pleasure—and a humbling experience—to accept this award for "Service to Education" from the Duval County Public Schools.

Any award for service to public education would be welcomed by a recipient. However, this award is more significant, more meaningful, more notable because it comes from what I know from personal observation is one of the outstanding public school systems in the United States.

And I have had the opportunity to get to know your superintendent Herb Sang, and your other outstanding administrative staff, your principals, your teachers and some of your students.

This is my third trip to Jacksonville, Florida since I have been Assistant Secretary for Educational Research and Improvement—1982, 1983 and 1984. It is becoming an annual event.

Let me say, also, that when I travel to meetings and programs highlighting accomplishments in education, the Duval County people are there and I have had occasion in recent months to meet them at the National Forum on Excellence in Education in Indianapolis, Indiana, the Secondary School Recognition Forum in Columbia, South Carolina, and the National Conference on Technology and Education in Forth Worth, Texas.

All of us gathered here today know that education is one of the most important activities in our Nation. It has been encouraging to witness that in the last year the media, political leaders, and businessmen among others have come to realize what we knew all along. We only need to have more action in support of that conviction.

The National Commission on Excellence in Education in its report *A Nation at Risk* rendered our Nation a great service. The findings of the National Commission were not all bleak—gloom and doom. There were success stories in American education—islands of light in a sea of darkness. Duval County was one of those success stories.

The Secretary of Education on the first anniversary of the National Commission report this year stated that a tide of mediocrity had been replaced with "a tidal wave of reform." We must be careful to swim with it, and not drown in it. We must make sure our reforms are substantial, and not merely cosmetic changes.

For the road to reform and improvement in education is like Jason and the Argonauts and the search for the Golden Fleece—a journey full of dangers, difficulties and delusions.

Yet, nothing worthwhile is ever easy.

However, we as a nation cannot accept a second rate or substandard education as our norm. If we do, it will hang over us as the sword of Damocles—threatening our very livelihood, our prosperity, our very existence.

However, before the experts begin a second phase of their study of educational reform—forming new commissions, contracting for new studies, producing a plethora of scholarly tomes—perhaps they should pause, purchase a plane ticket to Jacksonville, and come here to see the world of reality on just how it is done.

The great Italian poet Dante in his magnificent story of the journey of an individual person through life in "The Divine Comedy" writes in Canto I:

Midway the journey of this life I was 'ware
That I had strayed into a dark forest and
The right path appeared not anywhere.

During the past decade or two, the United States in the field of education has strayed into a dark forest and we must now regain the right path. The right path can be found here in Duval County.

I will not impose on your time any further but I do wish you the best of luck for another successful year. All of you are on the battle front for providing a substantial and meaningful future for the next generation.

And I shall remember all of you fondly during this next school year and for this wonderful award you have bestowed upon me. It shall be a reminder like Diogenes and his lamp searching for one honest person—each one of you is a modern day Diogenes carry a bright torch in your search for scholars in the Duval County school system. Thank you.●

REAUTHORIZATION AND REFORM OF HEALTH PROFESSIONS PROGRAMS

● Mr. KENNEDY. Mr. President, I am pleased to support the recent adoption of the conference report and the passage of S. 2574. This bill reauthorizes and reforms programs supporting health professions training, nurse training, the National Health Service Corps, Community Health Centers, Migrant Health Centers, and Health Maintenance Organizations. In addition, the bill establishes a small demonstration program of grants to States for primary care and directs the Secretary to conduct studies and develop recommendations on the most useful means of providing consumer information to purchasers of health care.

These programs under the Public Health Service Act are small in dollars but large in importance. Total funding for programs in this bill are less than $1 billion in 1985. This is less than half the cost of a modern aircraft carrier and only slightly more than 1 percent of the cost of Federal health financing programs.

But the programs continued in this bill are far more important to the happiness and safety of the American people than any aircraft carrier. Without the functions that this bill funds, our $100 billion plus investment in Federal health financing programs could not possibly be as effective in providing services to the American people.

The programs this bill authorizes help assure an adequate supply of trained health personnel to meet the needs of the American people. They provide mechanisms to help place trained personnel in the areas where they are most needed. They provide essential health care services to those most in need. There is no more cost-effective investment this country can make than in high quality care for all our people.

I have long been a leading supporter of health manpower legislation and I am pleased to have been a leading participant in the efforts to preserve its funding and integrity. We must continue to do everything in our power to offer quality health care to all American citizens and to provide them with qualified health personnel.

Over the past years, we have made substantial progress in offering financial assistance to aspiring health professionals who were unable to afford the high price of education in our Nation's universities. We must continually remind ourselves not to become casual in this commitment or we face the danger of jeopardizing the progress which we worked so hard to achieve. Continued financial assistance is necessary so that the opportunity to attend the world's finest schools does not become a privilege for a mere select few. We must guarantee that a student's ability to pay does not become the prevailing admission criterion.

In this act we have recognized the problems of repayment of loans to health professions students. It has always been my intention as that of my colleagues in the Congress, that loans be promptly repaid so that new students might have the opportunity to study. In this act we have added measures to encourage prompt repayment and to insure full disclosure of all relevant information concerning repayment at the time the loan is made. We are aware of the problems of ambiguous regulations and uneven interpretation by the Department of Health and Human Services with respect to delinquent loan repayment. In our conference report we have made clear our desire to improve collection, but not with the use of unfair sanctions against schools making an honest attempt to comply with the wishes of the Congress.

An important component of the act is the continued support of programs in family medicine, general internal medicine, and general pediatrics. The enhanced role of primary care in our current health care delivery system is clear. If we are to encourage talented young physicians to pursue training in these fields, the programs that provide such training must be of the highest quality. This act continues aggressive support for these programs at both established and relatively new medical centers.

Nursing education, another major category in this act, under the current administration, has faced a perilous reduction in funding. I am disappointed that any U.S. leader could neglect this profession and place future nurse training in jeopardy.

In the Congress, we have recognized nurses as critical members of the health care team and we regard them as being absolutely essential to our ability to provide health care services to the sick and disabled of our society.

The Nurse Education amendments of 1984 works to provide:

Increasing nursing education opportunities for individuals from disdvantaged backgrounds;

Continuing education for nurses;

Appropriate retraining opportunities for nurses;

Improvement in the maldistribution problem in geographic areas or specialty groups;

Training and education to upgrade the skills of paraprofessional nursing personnel; and

Support for faculty and administrators at institutes of nursing eduation.

The reauthorization of the Community Health Centers Programs in this bill represents a truly creative and bipartisan compromise on the issue of appropriate Federal-State relationship in supporting this vitally important program.

The Community Health Centers Program is one of the great success stories of the various Federal attempts to secure access to health care for the poor and underserved.

This program has not only provided services to people with no other satisfactory access to health care, it has done so in a truly exemplary manner.

Last year, community health centers provided high quality comprehensive care to over 4.5 million people. They have a proven record of increasing the use of preventive services, of reducing illness and hospitalization rates among the deprived populations they serve, and of holding their costs to levels considerably below those of other health care providers.

To cite just a few examples, CHC's between 1974 and 1983 increased their volume of services by more than 300 percent while grant funding increased by only 43 percent. At the same time costs per encounter decreased 60 percent in real terms. Independent studies have found hospitalization rates that are 50 percent lower for individuals using CHC's than for comparable persons without access to CHC services. These lower hospitalization rates are estimated to have saved the medicaid program alone over one-half of a billion dollars last year; more important than the dollar savings are the needless suffering and illness avoided.

All in all, community health centers have a tremendous record of accomplishment in providing health care services to the poor.

This legislation amends current law in a number of important respects.

While assuring continuation of the Community Health Center Programs, the legislation assures that Federal and State primary care activities will be complementary and coordinated in situations in which the State has a genuine interest in and commitment to providing primary care services to underserved populations. The bill does this by providing a stautory basis for memorandums of understanding between States and Federal program managers. These memorandums have provided an effective coordinating device, and placing them on a statutory basis provides an additional impetus for these efforts.

Second, the bill establishes a new State grant for the provision of primary care services. This new program should be an effective device for assisting State innovation in the primary care area and for involving States without a prior commitment to primary care in this important activity.

The National Health Services Corps is another vital mechanism for meeting the need of the American people for access to primary care physicians and other health professionals. This country has established an NSHC that has the current potential of placing almost 3,600 physicians and other health professionals in 1985 to meet the needs of the underserved. No one who travels or lives in underserved rural and urban areas can possibly underestimate the importance of the corps in providing desperately needed medical services.

While recent years have seen an expansion in the supply of primary care health professionals and some diffusion of these professionals to underserved areas there is no question that the corps is still badly needed and will continue to be badly needed for a number of years to come.

As ranking minority leader of the Labor and Human Resources Committee and former chairman of the Health Subcommittee of the committee I have been intimately involved in the creation and development of these programs reauthorized in this bill. I know how important they are, and I take special price and pleasure in their reauthorization.

Despite such pleasure, I must express my continued concern over the decline in support for these vital programs. While the increases provided for in this reauthorization are reasonably close to current service levels compared to 1984, the Reagan administration has savagely cut the program funds of these important functions during his 4 years in office. Overall, funding for these programs has been cut 20 percent since 1980. After adjusting for the effects of inflation, the service programs are currently 50 percent below their 1980 levels.

I hope a future Congress and a future administration will redress these backward priorities.●

RELOCATION OF FCC MONITORING STATION IN FORT LAUDERDALE, FL

● Mr. CHILES. Mr. President, I would like to address a matter of great concern to many of my constituents in the Miami area. In 1947, the FCC built a monitoring station in Fort Lauderdale when the coast area north of Miami was largely undeveloped. This area is presently the 11th most populous in the United States. As result of that growth, the monitoring station is now located in the center of a densely populated area, and, ironically, its existence is inhibiting the expansion of radio and television coverage to serve the growing population.

Recently, the FCC and Miami area broadcasters have been working together to relocate the monitoring station to a less populated area of Florida. This effort has resulted in the identification of several plots of land that could meet the FCC's needs and eliminate the difficulties encountered by Miami-area broadcast stations.

I hope the FCC will continue to work with these broadcasters to finalize the site-selection process and proceed with the relocation of the monitoring station as soon as practical. I would hope that all relevant agencies, including GSA, will provide the FCC with whatever assistance it reasonably requires to complete this endeavor.●

VIOLENCE AGAINST WOMEN'S HEALTH CARE FACILITIES

● Mr. GORTON. Mr. President, prior to our adjournment, I would like to call the Senate's attention to a matter with respect to which I will introduce a resolution when we return in January 1985. The subject is one which has received a considerable amount of attention recently in my State.

I was shocked, Mr. President, when I learned that this year, as of September 13, there have been over 81 incidents of violence or harassment against women's health care facilities, incredibly 13 of which were bombings.

In Washington State alone, one women's health center was firebombed 3 times in 5 months.

Mr. President, the issue here is not whether any person is prochoice or antiabortion. This is a matter of order over chaos. This society cannot survive if we debate our public issues by way of violent acts rather than by the exercise of our precious right of free speech.

These incidents are the acts of a few individuals who do not appreciate that words are the tools of persuasion in our society, never violence. These criminal actions serve only to jeopardize the lives and safety of our citizens and to breed fear and suspicion in our communities. They should be condemned by all Americans who value the public peace and the preservation of our constitutional freedoms.

I call upon the administration, Mr. President, to do all that it can to bring those persons responsible for these deplorable attacks to justice and to assist local law enforcement officials in their efforts as well.

Mr. President, I condemn these vicious acts of violence throughout our country, and I hope we will see then no more. I urge my colleagues and the administration to join me in that condemnation and to support prompt, effective enforcement of our laws that prohibit these totally unacceptable actions.●

TRIBUTE TO COL. PAUL KAMINSKI

● Mr. NUNN. Mr. President, for many years, members of the Senate Armed Services Committee have been privileged to work with Col. Paul G. Kaminski, USAF, who is currently serving as a special assistant to the Under Secretary of Defense for Research and Engineering and the Deputy Chief of Staff, Research and Development, Headquarters, U.S. Air Force. Colonel Kaminski is one of the real leaders and experts in the Defense Department in our high technology efforts which are so critical to our future. I believe it is appropriate for the Senate to recognize the outstanding service rendered the Nation by Colonel Kaminski on the occasion of his retirement from the Air Force later this fall.

From his early days as a student at the Air Force Academy, Colonel Kaminski distinguished himself as an inquisitive and creative scientist. Following his commissioning in 1964, he pursued a double master of science degree in electrical engineering and aeronautics/astronautics from Massachusetts Institute of Technology. After a tour as a guidance systems analyst at the Air Force Missile Development Center, he was selected as a National Science Foundation Fellow at Stanford University where he received a Ph.D. in aeronautics and astronautics.

At this early point in his career, he began a long tenure of service as scientific counsel to the leadership of the Defense Department on technologies which have formed the cutting edge of our defense capabilities. For 5 years he served as Chief of Special Projects in the Office of the Secretary of the Air Force with detached duty at the Space and Missile Systems Organization in Los Angeles. After a year as a student at the Industrial College of the Armed Forces, he began an 8-year association with the Under Secretary of Defense for Research and Engineering as Executive Assistant.

In the midst of this challenging career, Colonel Kaminski found the time to complete his professional military education, serve as an associate professor for systems engineering with California Institute of Technology, and publish important technical papers. He is a recognized expert by his peers in the scientific and engineering communities. He has been decorated for his work with awards including the Defense Distinguished Service Medal and the Legion of Merit, as well as the Air Force Systems Command's Science Achievement Award and Award for Meritorious Achievement.

His reputation is well known to those in Congress who have worked with him. He is highly respected as an individual of integrity, vision, scientific brilliance, and that rare trait of objectivity about what he is involved in. His work will continue to have a very positive impact upon our Nation's security during the next generation. The Nation owes a debt of gratitude to Colonel Kaminski. It has been my distinct pleasure to be associated with this exceptional officer in conjunction with my duties on the Armed Services Committee. I wish him well and anticipate that his coming years in the civilian community will further contribute to the security of this Nation. My best wishes to Paul, his lovely wife Julia, and his two children Laura and Garrett, as they mark this special milestone.●

RUNAWAY CHILDREN

● Mrs. HAWKINS. Mr. President, despite the proclamations of doomsayers on the eve of 1984, certain events of this year have reaffirmed that people still care a very great deal about others. Since the President's signing of the Missing Children Act in 1982, we have made tremendous strides in rallying Americans to action—to do all that is humanly possible to protect our children from abduction and the threat of sexual abuse. There is no doubt that the premium we place on these lives is still a value we hold close to our collective hearts.

It is in this vein that I would like to recognize the unselfish and unsolicited efforts being made to help the runaway children and youth who live in the shadows of cities and towns across our Nation. These children, numbering hundreds of thousands, are confused youngsters who are running away from, not to, something.

All too often, these young lives are filled with sordidness and danger. Street gangs, drugs, and sexual exploitation become the elements of their world. Just 2 weeks ago, the dismembered body of 16-year-old Danny Bridges was found in a Chicago dumpster. Danny had a history of running away because, as he revealed months earlier during filming of the NBC documentary, "The Silent Shame," he had been sexually molested by a man during his childhood. Danny ran away from that overwhelming ugliness, but survived on the streets as a male prostitute, a wrenching irony indeed.

But there are still many runaways like Danny for whom it isn't too late. Thanks to Operation Home Free, the public service program jointly sponsored by the Trailways Corp. and the International Association of Chiefs of Police, these kids do have a way out, a way to piece their lives together again.

By contacting a local police officer, runaways can receive safe passage via Trailways bus rides, to home or shelter anywhere in America. But getting the word to the runaway that this alternative exists is critical.

In this capacity, the voluntary contributions made by the amusement game industry have been unmeasureable. Because young runaways are likely to gravitate to game rooms for inexpensive entertainment and to be with peers, the Amusement Game Manufacturers Association has spearheaded a campaign to distribute the official Operation Home Free poster to arcades throughout the country. Over 1,000 requests from local operators who want the poster prominently displayed in their arcade have been received to date.

Since the program's inception in June, over 800 runaways have sought the aid of Operation Home Free. Reports of the program have appeared in the media, including USA Today, Good Morning America, and Parade magazine. Nightline and KABC Talk Radio host Michael Jackson plan to air September segments which highlight the problems of runaways. Local media outlets in Detroit, San Francisco, and New York City are talking about Operation Home Free. All of this because people do still care in 1984.

I would like to enter for the RECORD the names of the board of directors of the Amusement Game Manufacturers Association who have so generously furthered the cause of runaway chil-

dren: Joseph Robbins, Glen K. Seidenfeld, Jr., Richard Simon, Gary Stern, Jerry Marcus, William Cravens, Ronald Judy, Robert Lloyd, Paul Moriarity, and executive director, Glenn E. Braswell.●

PEACE IN NORTHERN IRELAND

● Mr. RIEGLE. Mr. President, I rise to address the continuing troubles of Northern Ireland, with an eye specifically to the use of plastic bullets in the Province. While initially this issue may not seem to be an extremely important part of the difficult question of how to achieve peace in Ireland, the misuse of this ammunition, and the resulting injuries and death, constitutes yet another problem which, if solved through cooperation on both sides, may advance the efforts to end the violence in Ulster.

Plastic bullets, which are 4 to 6 inches in length, and 1½ inches in diameter, were introduced in 1975 solely for the purpose of crowd control. In recent months, however, they have been used in a much more lethal manner, causing the death of at least one person and wounding countless others. This abuse of a supposedly nonlethal crowd control devise is intolerable. All reasonable people, regardless of their views on the larger issues confronting the area, must realize that banning the use of plastic bullets is essential to achieving progress toward the goals of peace and the recognition of human rights in Northern Ireland.

In May of this year, a significant step was taken toward establishing a dialog between the Unionists and the Nationalists. The meeting of the New Ireland Forum, and their ensuing report, is evidence of the realization by both sides that cooperative and diplomatic action can, and must, be taken in Ulster. While the proposals presented by the Forum have not been met with enthusiasm by all sides, it is universally recognized that the report's moderate language and reasonable tone are indicative of a new willingness to negotiate. This is heartening news.

Having achieved a more concilliatory atmosphere, it is appropriate that we now lay to rest the controversy over the use of plastic bullets. A critical and human step toward ending the violence and promoting peaceful discussions in Northern Ireland would be the final banning of this destructive weapon.●

UNIVERSITY RESERACH CAPACITY RESTORATION

● Mr. DANFORTH. Mr. President, on June 23, 1983, Senator EAGLETON and I, along with Senators BRADLEY, CHAFEE, KENNEDY, MOYNIHAN, and PELL, introduced S. 1537, the University Research Capacity Restoration Act of 1983. This bipartisan initiative was intended to serve as a focal point in an effort to stem the erosion of basic science research capacity at our Nation's universities with increased Federal support. Fourteen other Members of this body later joined as cosponsors of this comprehensive, 5-year blueprint for increased and sustained Federal investment in our Nation's university research capacity.

The University Research Capacity Restoration Act of 1984 was prompted by our concern about the ability of our universities and colleges to provide the knowledge we need in the years ahead. We were also concerned about the ability of our universities to educate the future generations of scientists, engineers, biomedical researches, and skilled managers essential to the long-term vitality, security, and well-being of the Nation. A year later, our concerns persist. Today, as the 98th Congress comes to a close, I would like to review briefly the elements of S. 1537 and the progress we have made in this effort to restore and revitalize the basic science research capacity of our universities and colleges.

S. 1537 recognized six basic and pressing needs to be met with increased Federal support: First, to augment and strengthen Federal support for fundamental university research programs, including biomedical and engineering research; second, to upgrade, modernize, and replace the instrumentation and equipment of university research facilities and laboratories; third, to provide increased numbers of graduate fellowship awards to individuals and university science departments engaged in federally supported research; fourth, to support expanded faculty development awards and programs that promote the initiation of research careers by young facility; fifth, to support efforts, on a matching basis with the institutions involved, to rehabilitate, replace, or otherwise improve the quality of existing university research facilities and laboratories in which federally supported basic science and engineering research is carried out; and sixth, to modernize and improve undergraduate science and engineering instructional programs and curricula to meet the Nation's changing needs.

We proposed to increase Federal funding in these six basic areas by an overall total of approximately $1 billion annually over a 5-year period for those six Federal departments and agencies that provide 95 percent of Federal support for university basic science and engineering research. These six agencies and departments are the National Aeronautics and Space Administration [NASA], the National Science Foundation [NSF], the National Institutes of Health [NIH], and the Departments of Agriculture, Defense, and Energy.

This legislation was intended as a statement of priorities and a blueprint for a course of action to be achieved by working through the separate authorization and appropriation processes for the six agencies and departments involved. Since we first introduced this plan in 1983, Federal support for university basic science research has increased. For example, NASA will shortly announce a new graduate fellowship program that will directly support university researchers. Eventually, roughly 240 science and engineering students will receive NASA graduate fellowships. There will be $1 million apppropriated to start this fellowship program. The research budget for NIH reflects an increase of 15 percent. A significant portion of this increase will benefit universities. For NSF, the appropriation for graduate fellowships has increased from $20.3 million in fiscal year 1983 to $27.3 million in fiscal year 1985. Funding for research instrumentation through NSF has increased roughly 17 percent from fiscal year 1984 to fiscal year 1985. These instrumentation appropriations support the replacement of university research laboratories and other instructional equipment.

Congressional report language accompanying the fiscal year 1984 DOD Authorization Act requests the Department of Defense to conduct a study on the need to modernize university laboratories in physical science and engineering disciplines and "provide specific recommendations appropriate to the DOD and others designed to address the need." This congressional mandate resulted in the establishment of the Ad Hoc Interagency Steering Committee on Academic Research Facilities. NSF, NIH, DOE, NASA, DOD, and the USDA are participating in this committee which plans to complete a report by February 1985.

Although these increases in Federal funding reflect a greater commitment to university research, we must do more. We must increase funding to improve laboratory equipment and research facilities. The physical plants that house much of the Nation's university basic science research are deteriorating. In testimony before the Committee on Science and Technology of the U.S. House of Representatives on May 8, 1984, the chancellor of the University of California at Los Angeles, Charles E. Young, observed:

Inadequate facilities and outdated equipment are a direct threat, across the country, to the quality of instructional and research programs. I can give you some idea of the magnitude of the problem by describing the situation at the University of California. During the past few years, we had come to believe that our physical plant was seriously inadequate to meet our needs, but we lacked hard data on the subject. So we undertook a careful and realistic review of our need for

facilities funding over the next decade. What we learned is that we have an enormous problem; the university will need more then $4 billion for facilities renovation and construction in the next decade.

We are encouraged by the increased support for basic funding reflected in the fiscal 1985 budget proposals of both the administration and the Congress. We remain optimistic about the ability of our Nation to maintain its position of leadership in science and technology. However, maintenance of our Nation's leadership position depends on our ability to restore the research capacity of our Nation's universities and colleges. These goals can only be accomplished with biipartisan support for this program in the years ahead. I, therefore, urge my colleagues to review the proposals outlined in S. 1537 and to join our effort to restore the basic research capacity of our Nation's universities. This effort represents a vital investment in the future of our country.●

JAPAN ON U.S. CAMPUSES

● Mr. DECONCINI. Mr. President, the opening sentence of an article I saw last week was bound to catch my eye. A September 24, 1984, Businessweek article begins: "Scientists at the university of Arizona recently went hunting for corporate money * * *."

Since the article is titled "Japan Is Buying Its Way Into U.S. University Labs," I had a pretty good idea where my constituents went looking. It turns out that the University of Arizona is only one of a legion of U.S. colleges and universities that are doing research work with Japanese funding. It is mentioned that the Massachusetts Institute of Technology has become so accomplished at seeking Japanese funding that it has added to its staff an "assistant director for Japanese gifts." In addition, MIT now has its own liaison office in Tokyo.

What do we make of this, Mr. President? I am not really sure I know. At a time when we are in high stakes competition with Japan in numerous high technology areas, we have U.S. universities serving in effect as the R&D division of Japanese companies.

There has always been a divided mind in this country about foreign involvement in our economy. On the one hand, the orthodox free trader view would say that it is a healthy phenomenom. Capital should be allowed to wash back and forth across borders according to its own laws. On the other hand, we are continually facing trade behavior from competitors which cannot in any way be described by the code of free trade. In most respects, Japan has been one of the worst cases. It has been virtually unwilling to permit the entry of most U.S. consumer products into its economy. At the same time it markets its products in the United States at prices cheaper than are usually available to Japanese consumers.

I do not know if the contents of the Businessweek article should be cause for praise or alarm. Though I am pretty sure it ought to be at least a mild case of the latter.

Where lies the solution? I ask my collegues to read the article, which I ask be printed in the RECORD, and help form the proper response.

The article follows:

JAPAN IS BUYING ITS WAY INTO U.S. UNIVERSITY LABS

A LIST OF R&D FUNDERS AT SOME SCHOOLS READS LIKE A WHO'S WHO OF JAPANESE INDUSTRY

Scientists at the University of Arizona recently went hunting for corporate money to continue their research on a promising medical-imaging technology called digital radiography. They made the rounds of major U.S. companies that stood to gain the most from such development—X-ray equipment makers General Electric, Diasonics, and Picker International. Not one showed interest. After getting the cold shoulder from American industry, the Arizona researchers began looking overseas. And they struck gold in Japan: Toshiba Corp., the American companies' largest Japanese competitor, was willing to support the research. By pumping $5 million into the Arizona project, the electronics grant will get first crack at licensing any technology that comes out of the effort.

Arizona's arrangement with Toshiba is not unique. Despite increasingly strident calls to keep U.S. technology out of the hands of foreign competitors, an alliance is forming between cash-strapped American universities and Japanese manufacturers. Nearly every major Japanese corporation—from NTT to Sony, Mitsui, and Toyota—is funding research at one or more American campuses. the Japanese are deeply involved in virtually every aspect of U.S. technology, from the development of advanced computers at Stanford University to diesel engine design at Princeton University. The roster of R&D supporters at some of the major American universities reads like a who's who of Japanese industry.

INTO THE BREACH

"There is strong trend for increased Japanese support of research at American universities," says Hiroshi Morikawa, director of science and technology at Japan's Federation of Economic Organizations. "At present, many Japanese corporations lack the ability to carry out good basic research. And through international cooperation they can remedy what they lack."

The schools first turned to the Japanese in the 1970s when they were threatened by cutbacks in federal aid, especially in the humanities and social sciences. They increased their efforts and quickly found that the Japanese companies were eager to fund their programs. "The Japanese filled the breach," says Robert E. Cole, a sociology professor at the University of Michigan. When the Japanese made several large grants to U.S. colleges, including $1 million to a program on Japanese studies at Michigan, "every major university got into the act of trying to raise money in Japan," points out Cole, who formerly headed the school's Japan center.

Japanese funding of university research escalated dramatically over the past five years. The total amount contributed so far by Japanese companies is not known, but most experts believe that they make up an important share of corporate research grants to universities. During the past few years, such support—both from American and foreign companies—has been the fastest-growing source of funding for academic research. The National Science Foundation estimates that corporate funding of campus scientists grew by 13% in 1983, to an estimated $326 million. At the same time, however, overall funding of university research climbed only 6%, to $7.7 billion.

U.S. colleges now see Japan as a major market for licensing the technology developed by their scientists. "We want Japan to take our discoveries and turn them into marketable products," says Gene D'Amour, associate provost at Tulane University. And one school—Georgia Institute of Technology—has even formed a partnership with a Japanese trading house to market its patents to companies in Japan. The agreement grants Nissho Iwai Corp. the exclusive right to sell licenses to Georgia Tech's technology in Japan, in return for a 10% share of any royalties. Since that agreement was signed, 10 Japanese companies have expressed strong interest in the school's technology in such areas as ceramics, electronics, lasers, biotechnology, and drugs.

Some schools are being particularly aggessive in their efforts to lure more research funds from Japan. Massachusetts Institute of Technology, for one, is getting so much money from Japan these days that it has appointed an assistant director for Japanese gifts. And the school has even set up a liaison office in Tokyo.

MIT's industrial liaison program allows member companies to obtain first-hand access, for $30,000 a year, to research projects not sponsored by other companies. Of the 297 companies in the program, 45 are Japanese. They include such big names as Canon, Mitsui, Hitachi, and NEC. Japanese companies have also endowed nine MIT chairs at $1 million apiece in such study areas as ceramics, management, and communications. And MIT officials say those contributions are dwarfed by Japanese funding of research projects, including ocean engineering, materials processing, and management. "Japan was the first place we went to get sponsors" declares Nicholas P. Negroponte, head of MIT's media lab, which was set up last year to conduct research in advanced communications technology. That laboratory alone is already pulling in $500,000 a year—25% of its total corporate funding—from Japanese companies, including Toshiba, Sanyo, and NEC.

Competing with MIT for money from Japanese industry is Tulane, which is soliciting contributions to build a major biomedical research center. So far, it has raised $1.5 million toward its goal of nearly $10 million from a group of companies that includes Kawasaki Steel, Suzuki Motor, Mitsubishi, and Hitachi.

HANDS-ON EXPERIENCE

Japanese researchers often accompany Japanese money. AT MIT's media lab, for example, each research contract gives the Japanese sponsor a royalty-free, perpetual, nonexclusive license to any technology that comes out of the participation—and the right to send research assistants to the school to help with the study. NTT, which is supporting research in computer voice recognition and synthesis, is sending two of its scientists annually for five years. "This

gets us the very best young Japanese researchers," points out Negroponte.

It also provides Japanese industry with invaluable expertise—their researchers can get hands-on experience at the cutting edge of U.S. basic research. Such arrangements give the Japanese access to scientific developments before results are even published in technical journals.

Their interest in research is concentrated heavily in those technologies in which Japan is challenging America's competitive lead in the marketplace. Stanford's Computer Forum, an industrial liaison program aimed at getting companies to participate in the school's advanced computer research, includes 11 Japanese corporations among its 58 sponsors. And some are leading participants in Japan's "fifth generation" project to leapfrog the U.S. in computer technology.

But mounting concern that foreign manufacturers are exploiting American technology is causing a number of schools to shy away from Japanese research support. One of them is Carnegie-Mellon University in Pittsburgh, a leading center for research in robotics and artificial intelligence. About 20% of the university's $52.5 million research budget this year came from industry, but it has no grants or endowments from Japan and does not plan to seek any. "Japan has approached us, but we have avoided it," comments Angel G. Jordan, Carnegie-Mellon provost. "There is some concern on our part that this would be a transfer of technology to Japan which we should avoid."

Schools such as Carnegie-Mellon, however, are in the minority. Closing the door to foreign support or foreign students is an idea most academics vigorously oppose. In recent years, efforts by a group of Pentagon officials to control the dissemination of U.S. research have met with stiff resistance from the colleges. "American universities are open places," says Frank Press, president of the National Academy of Sciences. "They take students from abroad, they take professors from abroad. Where would you draw the line?"

Indeed, much of the growing involvement of Japanese industry in American university research is the natural outgrowth of the number of Japanese students on campus. This year more than 14,000 students from Japan are studying at U.S. colleges, nearly 30% of them in graduate schools. Many Japanese graduates have returned to Japan, where they have become executives in companies now investing in American university research. The result is that the Japanese are part of the "old boy" network through which colleges have traditionally raised money from alumni. And many of the research grants are going to Japanese-American researchers. Hitachi Chemical Co., for one, recently gave $600,000 to support the research of Masayasu Nomura, a biochemist at the University of California at Irvine.

Japanese companies are well aware of the protectionist climate in the U.S., and they do their best to play down the technological aspects of their relationships with American scientists. Some companies even decline to identify the schools they fund. "They see the handwriting on the wall," says Justin L. Bloom, an industry consultant who was formerly a State Dept. science aide in Japan.

The Japanese prefer to emphasize their funding of other programs, which are aimed at easing trade barriers and fostering understanding between their country and the U.S. At the University of Michigan, for example, Japanese auto companies gave $300,000 to study the differences in manufacturing practices of American and Japanese auto makers. And the Japanese point to other "no-strings-attached" contributions to American schools, such as their endowment of chairs in law and business at such schools as Harvard University and Columbia University.

FRONT-ROW SEATS

Many Japanese executives maintain that the U.S. misunderstands their motives in contributing to American universities. Japanese schools, they argue, still run far behind those in the U.S. in technical education—even though the Japanese government is making major efforts to upgrade its system. The U.S., they say, is simply the best place to train future researchers for Japan. "We are not after technology in our support of research at American universities," claims Michiyuki Uenohara, a senior vice-president at NEC Corp. "We want to obtain new approaches to basic research."

Whatever the motivation, supporting academic research here buys Japanese industry an admission ticket to the centers of American science. And the schools are not about to walk away from badly needed support, especially when funding is hard to find in the U.S. "Our institutions have resources, and if they are not tapped by our own companies, those in Japan are going to take advantage of the opportunities," says Andrew A. Frank, a professor of electrical engineering at the University of Wisconsin. Frank was bailed out by a $1 million grant from a Japanese automotive supplier when his research on continuously variable transmissions was threatened by cutbacks at the Energy Dept. and he was unable to drum up support from American auto makers.

And not all American executives are opposed to the idea of the Japanese supporting ailing university laboratories. "Japan is highly dependent on U.S. basic research and skilled in taking the know-how and putting it into imaginative products," says David Packard, chairman of Hewlett-Packard. "The Japanese are very much aware they benefit greatly from U.S. research. It's about time we found some way for them to help pay for it."●

CUBA

● Mrs. HAWKINS. Mr. President, there is a great deal of misinformation circulating about Cuba. Cuba's international adventures in Africa, Asia, and South America are well known, and if the reports of some people are to be believed, in spite of the enormous expenses associated with these activities, Cuba has been able to provide its people with a vast array of benefits that have dramatically improved the social welfare as compared to the so-called prerevolutionary period. Even considering the fact that the Soviets subsidize over 25 percent of the Cuban economy, this would still be noteworthy—were it true. This problem is that it is not true.

I have, Mr. President, an article written by Prof. Norman Luxemburg, a professor of Russian studies at the University of Iowa and recently a scholar in residence at the Cuban-American National Foundation. This article originally appeared in Encounter magazine and because of its importance I would ask that it be included in the RECORD. I believe that this article will help dispell the myth of the bountiful blessings that the Castro dictatorship has bestowed on the island of Cuba, and put the whole issue in a proper context.

The article follows:

A LOOK AT CASTRO'S STATISTICS

(By Norman Luxenburg)

A quarter of a century ago (in January 1959) Fidel Castro entered Havana in triumph, grabbed the reins of the government, and began re-ordering Cuban society and Cuban life in general. In looking back to assess Castro's achievements since he assumed power in 1959, there is a tendency to assume pre-Castro Cuba was a typical, underdeveloped Caribbean nation, and to forget that in many ways its standard of living was comparable to Western European countries. For example, about a year ago *The Wall Street Journal* wrote on its front pages: "The average Cuban lives very well these days by Third World standards." It went on to state that this fact had made Castro popular with the Cuban people.

However, pre-Castro Cuba was definitely not a Third World nation in the commonly accepted sense. Neither was it a typical Caribbean nation. By whatever measure used, whether it is the number of students in higher and secondary education, the number of physicians per capita, the infant-mortality rate, the gross national product in relation to its population, or number of telephones, television sets, or cars, the Cuba of the late 1950s was far ahead of any other nation in the Caribbean and the Third World. Its social development made strides—indeed significantly in the liberal administrations of Dr. Grau San Martin and others, long before the Batista dictatorship—towards modernisation and the creation of large professional middle classes. Journalists, no matter how quick with typewriters, cannot safely dispense with the perspectives offered by history and sociology. It is not only the popular journals that make such errors. In 1977, a Congressional House committee headed by Representative Jonathan Bingham of New York visited Cuba and, apparently impresed by talks with Cuban officials, stated in its official report that before Castro there were "187,000 students" in Cuba and that the literacy rate under Castro had risen from 25 to 99%.

However, in pre-Castro Cuba there were not 187,000 students, but about one million. The literacy rate was not 25% but 78% (source: *Britannica*, 1959 article on Cuba; UN *Statistical Yearbook*, 1960, 1962).

If one accepts without question such outlandish figures, as the Committee apparently did, it becomes very easy to excuse almost all excesses and inadequacies of the Castro regime and to ascribe many underserved virtues to it. Before Castro, Cuba had a favourable balance of trade and a steady "hidden" income from tourism. Today the nation is operating at a deficit and is kept afloat only because the Soviets sell Cuba petroleum at below-market prices and buy its sugar at inflated prices. Cuban capital was gaining on foreign capital in the pre-Castro economy. Cubans were taking control of enterprises held by North Americans and other outsiders.

Before any realistic assessment of Castroism can be made, many important facts

have to be looked at and then looked at again.

The fact that pre-Castro Cuba was no typical Caribbean nation becomes immediately evident upon an examination of the statistics for public health. Thus for example, in 1958, on the eve of Castro's seizure of power, Cuba's 6.6 million inhabitants had twice as many physicians as the 19 million residents of the other Caribbean nations combined.

Number of physicians in 1957

Cuba	6,421
Costa Rica	379
Dom. Republic (1954)	544
El Salvador	437
Honduras	365
Panama	286

Source: U.N. *Statistical Yearbook* (1958), table 176

In Cuba, as in virtually every other nation, the doctor ratio was growing. Thus, for example, the number of medical doctors in Cuba had grown from 3,100 in 1948 to 6,400 in 1958. The ratio in the ten-year period had increased from one doctor for every 1,650 persons to one per 1,021—which compared rather well with many nations of the developed world.

Between 1960 and 1976, the last year for which the United Nations Statistical Yearbook listed Cuban medical figures, the number of doctors relative to population actually decline slightly in Cuba while increasing very greatly in the other Caribbean nations. However, in a speech of 14 June 1980—a speech published in the government paper Granma two days later—Castro stated that Cuba had at present 15,000 medical doctors, a figure almost twice that given for 1976.

POPULATION PER PHYSICIAN

	1960	1976
Cuba	1,020	1,121
Costa Rica	2,729	1,524
Dominion Republic (1973)	7,149	1,866
El Salvador	5,232	3,745
Guatemala (1973)	4,644	4,338

(The 1980 U.N. Year book gives no figures more recent for Cuba.)

Source: Statistical Abstract of Latin America (1977), p. 116; U.N. Statistial Year book (1978), table 207.

If Cuba really did have the 15,000 physicians claimed by Fidel the increase would have come since the mid-1970s and would represent a great improvement. However, when it is borne in mind that the number of physicians in Cuba had more than doubled in the pre-Castro decade, even an increase from 6,421 doctors in 1957 to 15,000 in 1980 would represent something less than the rate of increase that occurred in the pre-Castro period.

Misinformation about Cuban public health is still repeated and printed in official Cuban publications and makes its way into the western new media.

A recent Cuban National Bank Report (*Informe*, August 1982) states on p. 6, para. 7, for example, that life expectancy in Cuba at the time of the Castro takeover was only 53 years. *Stern* (20 February 1980) uses 58 years as the starting point for the Castro regime.

In actuality, life expectancy in pre-Castro Cuba was not 53 years, but 61.8 years (U.N. *World Population Trends and Policies*, 1977, vol. 1, Table 75). By comparison, life expectancy in Guatemala, Honduras, Nicaragua, and Haiti ranged from 41 to 46.

Many popular journals in the United States and Europe, *The New York Times*, *Newsweek*, *Time*, and *Stern* among them, have pointed to a reduction in infant mortality as proof of improved health care under Castro. The Cuban National Bank report, *Informe*, stated that the infant mortality rate in pre-Castro Cuba was more than 60 per 1,000 for the first year of life, and Castro himself, in the speech cited in *Granma* (16 June 1980), confirmed this figure, which had been accepted and printed without question by the German illustrated weekly *Stern* (20 February 1980). Fortunatley, Cuban infant mortality before Castro was not 60 per 1,000 live births, but 32 per 1,000 (*Latin American Statistical Abstract*, 1977, p. 107).

For some reason, Cuba's present relatively low infant mortality rate is accepted by a number of writers as an extremely positive indication of what Castro has wrought on that island. Thus, *Newsweek* (23 May 1980) stated, "The most notable achievement of Castroism is the infant mortality rate. . ." *Time* Magazine (11 March 1978) also ascribed the low Cuban rate to Castroism. However, the pre-Castro rate of 32 infant deaths per 1,000 births was already one of the best in the world. It was not only far better than that of any other Latin American nation (the rate for countries such as Brazil, Colombia, Guatemala, and Peru was about 100 infant deaths per 1,000 births) but better than that of Germany, Italy, Spain, and a host of developed nations. An indication of how Cuban public health had been improving in the pre-Castro years is the fact that the number of infant deaths in Cuba in the first year of life had been reduced from 99 per thousand in the period 1935-39 to 32 per 1,000 in the period 1955-59.

The Cuban infant mortality rate today, after having worsened during the first decade of Castro's rule, is stated to be 19 per 1,000; and this is better than it was 23 years ago. However, it would be difficult to find a nation of the developed or developing world where this is not the case. Moreover, a number of states such as Spain, Puerto Rico, Germany, and Italy, with higher infant mortality rates than Cuba in the pre-Castro period, now have lower rates.

A fairly typical example of the plaudits given to Castro's public health achievements can be observed in the following letter published in *The New York Times* (6 April 1982). Irwin Kaiser, Professor of Gynaecology and "Chairman of the U.S.-Cuban Health Exchange," writes,

"It is a matter of public record, based on statistics endorsed by the Pan-American Health Organization and the World Health Organization, that in this period [Castro] the level of health in Cuba has risen from that of an underdeveloped country to that of the United States and other developed societies."

This assertion deserves closer analysis.

If Cuba were indeed an "underdeveloped country" in its "level of health" as Dr. Kaiser asserts, the term "underdeveloped" would take on a meaning far beyond that which is normally understood by it. Cuba had a life expectancy of 61.8 years compared with that of 43 and less for some Latin American nations. Ethiopia, in the period of 1955-60, had a life expectancy of 33.5; Angola's was 32; Nigeria had 33.5, and Guinea-Bissau's inhabitants could expect to live 30.5 years. To use the term "underdeveloped" to apply in terms of health both to Cuba and to these other nations is stretching it somewhat.

I have already noted that on the eve of Castro coming to power, Cuba's 6.6 million people had more than twice the number of medical doctors than the 19 million inhabitants of the other Caribbean nations mentioned. The number of doctors there had doubled in the decade 1948-58 and obviously would have continued to increase. For health advances in the Cuba of the pre-Castro period could well be considered most impressive. Thus, fewer persons died in Cuba in 1953 than died in 1943, and fewer Cubans died in 1943 than died in 1933. During this period of time the population had grown considerably.

	Number deceased	Total Cuban population
1933	51,000	3,962,000
1943	50,000	4,7791000
1953	37,000	5,829,000

Source: For 1933, Censo de Cuba (1943), p. 530; for 1943, *Censo de Cuba* (1953). For 1953, U.N. Demographic Yearbook (1958), table 9.

An idea of how some of the diseases that had formerly plagued the Cubans were being successfully combated, and consequently changing the public health picture in the Island, can be obtained from the following table.

CUBAN MORTALITY FROM SOME SELECTED DISEASES

	1943	1951
Gastroenteritis	7,803	3,469
Bronchial Pneumonia	3,424	1,913
Chronic Bronchitis	574	247
Typhoid Fever	597	62
Septicaemia	239	56
Pulmonary TB	3,295	2,172

Source: Censo de Cuba (1953), table D, p. 321.

These figures merit another look.

In 1933, 14,000 more Cubans died than in 1953. However, the population in 1953 was amost 50% greater than it had been twenty years earlier. In other words, had the mortality rate in 1953 remained what it had been just twenty years earlier, one could have expected some 70,000-75,000 deaths in the island that year, instead of just 37,000. Obviously, the Cuba of 1953 in the area of public health was a far different nation than it was in either 1933 or 1943.

It is only by ignoring the basic social trends of a country, and in this case the real advances of the pre-Castro decades, that Castro and his supporters are able to take credit for subsequent Cuban health progress. In reality, 25 years in the mid-20th century is a long period in medical progress.

In Puerto Rico, for example, the number of deaths from tuberculosis was reduced from 3,200 in 1949 to 252 in 1974. The number of deaths from pneumonia in that island was reduced from 2,057 (in 1949) to 905 (in 1947), and during that same period of time the number of deaths from enteritis was lowered from 3,000 to 179 (source: *Anuario Estadistico de Puerto Rico*, 1964, 1974).

With a steady increase in the ratio of physicians to population, with new treatments, improved medicines, greater hygienic awareness, increased medical knowledge, and such factors as refrigeraton and education, it is only natural to suppose that there would have continued to be significant improvements in Cuban public health, and that this would be the case regardless of who controlled the government.

Fidel Castro's government, by denigrating the level of Cuban medicine, public health, infant mortality rates, life expectancy, etc.,

in the pre-Castro period, has been presenting an inaccurate, exaggerated picture about the achievements of Cuban medicine over these last 25 years, and has attributed them to "Castroism."

Those who wish to arrive at a fair assessment of Castroism's achievements in public health would be well advised to go back to the sources for pre-Castroite figures and then draw their own conclusions. Propaganda's first victory is always over historical knowledge, and sociological analysis is not far behind. One needs always to look at the patterns of the past and the basic social trends. It is unfortunate that our Western press lends itself so ignorantly to mendacious handouts.●

UNIVERSITY RESEARCH CAPACITY RESTORATION ACT OF 1983

● Mr. EAGLETON. Mr. President, I am very pleased to join with my distinguished colleague, Senator DANFORTH, in urging all of my colleagues to maintain and strengthen the congressional efforts in the 98th Congress to restore our Nation's university research capacity.

In 1945, President Truman stated:

No nation can maintain a position of leadership in the world of today unless it develops to the full its scientific and technological resources. No government adequately meets its responsibilities unless it generously and intelligently supports and encourages the work of science in universities, industry, and its own laboratories.

Those words, spoken almost 40 years ago are even truer in our increasingly advanced technological society of today. It was during the Truman administration that the Government established the National Science Foundation, dramatically expanded the National Institutes of Health, and funded other programs to promote basic research and education in the sciences. One of President Truman's legacies has been this country's remarkable national commitment to scientific research.

Despite our past successes in this area, the Nation has allowed our technological lead to erode and our support for education and research to decline. Recognizing this decline, Senator DANFORTH and I, along with a number of our other colleagues in the Senate, introduced S. 1537, the University Research Capacity Restoration Act of 1983. That act set forth an ambitious 5-year plan to regain the ground we have lost as the scientific and technological leader in the world today. At the time we introduced S. 1537, we made it clear that the legislation was a blueprint for action to be taken on a variety of different authorization and appropriation bills. Although we have not by any means accomplished all of the goals of the University Research Capacity Restoration bill, I am pleased that we have made some substantial progress.

Specifically, in the area of biomedical research, the bill appropriating funds for the National Institutes of Health for this fiscal year provides over $5 billion, an increase of over one-half billion dollars over last year's level and the administration's request for this year. With respect to the research components contained in the Department of Agriculture appropriations bill, the final agreement contains $46 million, a very significant increase over the amount available last year, for competitive research grants, and a total of $5 million for postgraduate fellowships. In the other areas of S. 1537, research funds within NASA, DOE, NSF, and DOD, we have also made similar progress, but our efforts are far from complete.

In the 99th Congress, Senator DANFORTH and I intend to reintroduce the University Research Capacity Restoration Act and to once again pursue our efforts through various other legislative vehicles to place the scientific and technological well-being of our Nation on a sound research and educational base. We hope that once again we will be joined by a broad group of our colleagues who also recognize that a strong Federal investment in the educational and research capacity of our universities is essential to retaining this country's leadership in science, technology, and industry.●

JOB WELL DONE: RON WINEINGER'S YEAR AS FFA PRESIDENT

● Mr. DOLE. Mr. President, the Senator from Kansas wishes to congratulate the national president of the Future Farmers of America, Ron Wineinger, who will soon finish his year in office. Ron hails from the small town of Marion in my State, and we Kansans are proud of the fine job he has done this year for the FFA.

The Senator from Kansas has had the pleasure of meeting with Ron many times during the past year. Let me say that the FFA made a marvelous choice when they picked this young man to be their leader.

Now that his term is ending, Ron will soon be returning to one of the country's top agriculture schools—Kansas State University. Although he is still a college student, Ron displays a maturity far beyond his years. As a spokesman for agriculture, he is first rate: Farmers of all ages can be proud of his achievements.

Ron has traveled to 32 States, and four foreign countries during his term of office. For those of us from farm States, it is pleasing that so many people around the world have had the opportunity to discuss the issues with this outstanding example of our young American farmer.

The Senator from Kansas congratulates Ron Wineinger for a job well done, and offers his best wishes as Ron returns to K-State, and prepares for other successes.●

ELLSWORTH BUNKER

● Mr. HOLLINGS. Mr. President, last week our Nation lost one of its preeminent diplomats. I speak, of course, of Ellsworth Bunker, who died at 90 years of age in Vermont. When I think of Ellsworth Bunker, two qualities come to mind—two virtues that in this modern day are often seen as opposites. Those virtues are strength and civility. So often nowadays the heroes and heroines created for us by the media are tough talking, insensitive, and totally without grace. Not so Ellsworth Bunker. No one could be tougher or more resolute in a negotiation or in the practice of the many professions he mastered. But always, always, there was the assured quiet and calm and civility of inner peace and confidence. He well understood the admonition of Teddy Roosevelt—"Speak softly and carry a big stick."

He was a diplomat of the old school, and how our country could use a few more graduates of that old school now. Patriotism was his lodestar, duty his guide. He undertook all the difficult ones, including a long, lonely stint in Vietnam and also those seemingly interminable negotiations over the Panama Canal. The wisdom of those treaties is proved anew every day, in the building of entrepreneurship and private enterprise in Panama and in the increasing warmth of relations between our two peoples.

Diplomacy was a family matter to Ellsworth Bunker, because his wife, Caroline Laise, our former Ambassador to Nepal, is a distinguished diplomat in her own right. To her in this hour of sorrow, the Nation sends its sense of loss and also its spirit of pride in all that Ellsworth Bunker accomplished—and in all that he stood for.

People of such stature too seldom pass our way, and it is fitting that we pause to reflect on the life of this good and wise man. All his impact on his country was for the good, and the country's memory of him will always be for the good.●

MINORITY DEVELOPMENT ENTERPRISE WEEK

● Mr. HEINZ. Mr. President, the week of October 7 has been set aside by the President as the second annual "Minority Enterprise Development Week." I want to commend the President for once again designating a week to recognize the contributions made by minority-owned businesses to our country and to our economy.

The essence of the entrepreneurial spirit in this country is the dream of making it on one's own. For too long, however, this goal was unreachable for

certain Americans; even with hard work and dedication, members of the minority community could not realistically share that vision.

While important work remains to be done, Mr. President, I am proud to say that we have made significant strides toward opening our system up to any and all who dare to dream the American dream, and seek to make the free enterprise system work for them.

Next week, the Greater Pittsburgh Business Development Corp. will be honoring one such individual: Milton Washington, president of Beacon Construction in Pittsburgh, who is the regional winner of the "Contractor of the Year Award." Mr. Washington was chosen as the winner from the region encompassing Pittsburgh, Philadelphia, Baltimore, Washington, Richmond, Norfolk, and Newport News.

The growth of the firm, its innovativeness, and its contributions to the community are the criteria upon which this award is based. Since the inception in 1978, Beacon Construction has been one of the most successful construction firms in Allegheny County engaged in rehabilitating government housing. Milton Washington began his career with the Philadelphia Housing Authority after receiving a B.S. from LaSalle College and an MBA from Temple University. In addition, he has worked at the Department of Housing and Urban Development and currently serves as the president and chief executive officer of Beacon Construction's parent firm, Allegheny Housing Rehabilitation Corp. Through his hard work and dedication, Milton Washington has made vital contributions to the community and to the economy, and is most deserving of praise.

Mr. President, the Nation's 600,000 minority-owned businesses reveal the true meaning of entrepreneurship. We must continue to work to increase the opportunities for these firms which have contributed so much to our economy and our lives by providing innovative products and services to the economy and by being the principal source for jobs and training for thousands of American workers. In celebrating "Minority Enterprise Development Week," we are reaffirming our commitment to ensure that the American dream of owning your own business is one which all Americans can realistically share.●

COLORADO RIVER SALINITY CONTROL

● Mr. DECONCINI. Mr. President, I rise in support of H.R. 2790, a bill to amend the Colorado River Basin Salinity Control Act. The original Salinity Control Act was passed by the Congress some 10 years ago for the purpose of improving the quality of water from the Colorado River and to meet the obligations of the U.S. Government under a treaty with the Republic of Mexico. The bill before us authorizes new salinity control units in the Upper Basin and Lower Basin States to help further reduce the salt content of Colorado River water and as a result reduce the damage to farms and crops from the salty water.

This legislation has the support of the Departments of the Interior and Agriculture who jointly manage the Salinity Control Program and numerous environmental and wildlife organizations. The Salinity Control Program is very important to my State of Arizona and this legislation is supported by the Arizona Department of Water Resources.

The beneficiaries of salinity control contribute a share of the total costs for water quality improvement and the share for the States and on-farm irrigation improvements will be further increased under the provisions of H.R. 2790. Increases in cost sharing are never easy propositions to negotiate, particularly when they increase the already substantial non-Federal participation. An agreement has been reached which is acceptable to all interested parties, however, and I therefore urge adoption of H.R. 2790 with amendment.●

LOW-INCOME HOME ENERGY ASSISTANCE

Mr. DENTON. Mr. President, on October 4 the Senate passed S. 2565, which reauthorized the Low-Income Home Energy Assistance Program for 2 years. The bill also contained a change in the allocation formula under which low-income home energy assistance funds are distributed to States.

Several Senators entered tables prepared by Department of Health and Human Services into the RECORD to show how each State would fare under the new formula. These tables contained a minor mathematical error affecting the State of Indiana's allocation, and I want to insert into the RECORD for the benefit of my colleagues revised tables prepared by the department on the new formula. I can assure Senators that no State's allocation is significantly affected by the correction.

Mr. President, I ask that the revised tables be printed in the RECORD.

The tables follow:

State	Fiscal year 1985 (floor at fiscal year 1984 shares of $2.075 billion; funding assumption—$2.1 billion)	
	Percent	Dollars
Alabama	.00874242	18,315,551

Note.—Excludes $2,139,000 for Federal administration and .001354 percent for the territories October 5, 1984.

CHILD SUPPORT

● Mr. LEAHY. Mr. President, in its deliberation of the Deficit Reduction Act of 1984, the conference committee followed the Senate's amendment to allow a monthly disregard of $50 of child support to be applied at the time of eligibility determination and benefit calculation.

The intent behind this recommendation was to provide a higher AFDC benefit to families where States were successful in collecting support payments from the absent spouse.

While support payments up to $50 in any month will not be counted as income in the determination of AFDC benefits, the disregard will be counted as additional income in the computation of food stamp benefits. This inconsistency in treatment of income between the two programs is expected to increase States error rates.

Because three Federal programs are involved in calculating the correct benefits for recipients—AFDC, child support, and food stamps—the chances are further raised that States, error rates have will be increased.

Secretary Heckler of the Department of Health and Human Services has recognized the problem this new provision will present to States as they adapt procedures and regulations to comply with the $50 disregard. She has said she will announce that HHS will waive the error rate sanctions for 1 year on the AFDC portion of the calculation.

However, the U.S. Department of Agriculture has not expressed any willingness to waive sanctions on error rates for food stamp computations due to this new provision.

A number of Governors and others concerned with the potential impact on States error rates have asked me to speak about this problem. I want to make it clear that I am not suggesting that error rates should not be held to the lowest minimum possible. I am simply suggesting that a waiver on sanctions on errors, brought about because of inconsistencies between the two Federal agencies, is appropriate.

The similarities between the food stamp program and the AFDC program are many. The clientele are often the same, and the case have workers in both programs are the same. As States implement this new change in AFDC eligibility and benefit determination there are bound to be increases in errors of computation. It seems unfair to give an increased benefit—through the $50 disregard—on one hand, and turn around and penalize States for errors made because they have had no time to accommodate changes made in this session of Congress, on the other hand.

Mr. President, I believe there should be consistency between the involved programs in the treatment of error rates. A chief cause of errors in AFDC and food stamps is, ironically, due to inconsistencies between the two programs in the treatment of the same income. While the $50 disregard is not treated as income in the AFDC program, it is treated as income in the food stamp program. It must be factored in when determining food stamp eligibility and benefits. Errors are more likely to occur, since under prior law, child support payments were retained by the States as reimbursement for AFDC benefits and thus did not have to be taken into account.

Unfortunately, it is not the State workers who will ultimately be affected by sanctions; it is the children and families for whom the program exists. Sanctions mean loss of Federal revenue. Unless States can replace funds lost through sanctions, the intent of the Senate to provide higher benefits to welfare families through the $50 disregard may have been in vain.

I intend to urge the Department of Agriculture to declare a 1-year moratorium for counting food stamp errors associated with implementation of the disregard for child support collections as the Secretary of HHS has said she intends to do.

I intend, also, to bring this matter up again in the next Congress.●

PAPERWORK REDUCTION ACT

● Mr. DANFORTH. Mr. President, it is now clear that we will not have time this session to consider S. 2433, the Paperwork Reduction Act Amendments of 1984. This outcome is a considerable disappointment to me personally, as I believe that S. 2433 represents a good effort to strengthen an already successful law.

There has been some concern about the effect of this inaction on the workings of the Paperwork Reduction Act. Such concern is unwarranted, however. While S. 2433 would have made some valuable and needed improvements in the act, the act's provisions continue in full force and effect.

Some confusion has arisen about this point because the act authorized appropriations only through September 30, 1983. OMB has continued and will continue to pay for the operations of the act under its general appropriation, however.

Since the act was passed, nearly 500 million hours of annual paperwork burden on the American public have been eliminated. Calculated at $20 an hour, that amounts to a tax cut of $10 billion.

The analogy, I might add, is a fair one. Reporting and recordkeeping requirements cost the public—in real dollars and in lost time that otherwise could be used productively—many billions of dollars each year. OMB estimates the current inventory of paperwork requirements at more than 2 billion hours annually. Again using the $20-an-hour measure, that works out to a $40 billion annual burden on the public—one that surely could be cut further.

S. 2433 would direct OMB to continue its efforts to cut. The bill would require OMB to set annual goals reducing paperwork by 5 percent for each of the next 5 years. This 25-percent cut would eliminate another 500 million hours—another $10 billion—of annual burden.

S. 2433 would authorize $39 million for this program over the next 4 years. It would make crystal clear the fact that all Federal paperwork requirements are covered by the act. It would improve congressional oversight of the program, by requiring Senate confirmation of the Administrator of the Office of Information and Regulatory Affairs and by requiring additional annual reporting by the Office of the use of its funds and the implementation of its programs. It would increase public access to the regulatory process by making draft regulations available to the public. And it would enhance the Federal Government's ability to adapt to the information age by merging the Federal telecommunications fund and the automatic data processing fund into a new information technology fund.

S. 2433 floundered, in my judgment, because certain interest groups did not want the Congress to reemphasize the applicability of the act to reporting and recordkeeping requirements contained in existing rules. They raised a number of chimerical bugaboos to make their point and to persuade some Members of this body to block consideration of the bill, while they evaluated the arcane procedural questions involved. The committee addressed these concerns during its markup of the bill, in the committee report, and ultimately in a procedural amendment. However, the clock kept

ticking, and we were never able to proceed with floor action. With more time, I believe, the outcome would have been different, and I am hopeful that the outcome will be different in the 99th Congress.●

AMERICAN CONSERVATION CORPS

● Mr. LAUTENBERG. Mr. President, on October 3, the Senate passed S. 999, the American Conservation Corps. I joined the Senator from New York, Senator MOYNIHAN, by cosponsoring this legislation when he introduced it in 1983, I am very pleased we have passed this bill.

The idea embodied in S. 999, to put our young people to work on projects for public improvements, is not new. In the 1930's, President Roosevelt created programs to employ our young people to construct public works and make other improvements. S. 999 will likewise give our young people vital work experience while improving our natural resources. It will provide assistance for unemployed youth to work on soil conservation, urban revitalization, and flood control projects.

Unemployment among young people in our cities is still tragically high. Estimates are that fully one-half of black teenagers cannot find work. S. 999 promises to provide not only work, but an educational experience for participants.

All over the Nation we see the lasting value of the Civilian Conservation Corps of the 1930's. Rare is the area not touched by a CCC project. The projects undertaken by the American Conservation Corps promise similar benefits.

Mr. President, alumni of the old CCC have been some of the most vocal supporters of this legislation. This bill was brought to my attention by New Jersey Assemblyman George Otlowski, who introduced legislation to establish a State Conservation Corps in New Jersey. Mr. President, I am pleased to note the passage of this important legislation.●

TITLE V—H.R. 6163—GOVERNMENT PATENT POLICY

● Mr. DOMENICI. Would the Senator from Kansas please explain how title V of H.R. 6163, as passed by the Senate, will effect Government-owned laboratories that are operated by contractors.

● Mr. DOLE. The answer to this question has three parts.

First, Public Law 96-517 gave nonprofit organizations the right to own inventions made with Government R&D funding. That law included, however, an exception allowing the Government to retain title to inventions made by the nonprofit contractors of Government-owned laboratories. In the main, this bill removes that exception and allows nonprofit contractors to own their federally funded inventions regardless of whether they are made at their own or Government-owned facilities.

Second, most Federal agencies that have nonprofit organizations operating their laboratories have not been using the Government-owned, contractor-operated [GOCO] exception and are allowing the contract operators to own their inventions. The Department of Energy, however, has made a blanket use of the GOCO exception, so the bill will primarily effect the nonprofit DOE lab operators. For profit contractors such as the operators of labs such as Sandia and Oak Ridge are not directly effected by this bill.

Third, this bill includes a provision that allows the Department of Energy to own the inventions related to DOE's naval nuclear propulsion or weapons related programs that are made in the labs that are primarily related to these programs. This means that as work is now distributed among the labs, inventions in these categories made in Los Alamos and Lawrence Livermore, for example, could be owned by DOE. Inventions that do not fall into these categories would be owned by these nonprofit contractors.

● Mr. DOMENICI. In the case of Los Alamos, which is operated by a contractor based in another State, who specifically would manage inventions that do not fit in the nuclear propulsion or weapons categories?

● Mr. DOLE. This bill contains a provision that to the extent it provides the most effective technology transfer, the licensing of subject inventions shall be administered by contract employees on location at the facility. Acting under the Stevenson-Wydler Act, Los Alamos has established a particularly strong technology transfer office and program. In addition, it is our intent that title to inventions being licensed should be held in a wholly owned subsidiary running the facility for the Government so that in the event of a change of contractors, the licensing process may be transferred intact to the successor organization as a continuing operation of the GOCO. These factors are intended to result in the management of most Los Alamos inventions by the laboratory, which would then be free to deal directly with State agencies and the private sector to promote its inventions.●

FEDERAL HOME LOAN BANK BOARD CONVERSION REGULATIONS

● Mr. TOWER. Mr. President, during the last several weeks, I have endeavored to bring to the attention of my colleagues the facts surrounding a recent action that threatens the long-term health of the thrift industry.

That action was the improper, and perhaps unlawful, decision by the Federal Home Loan Bank Board to make its recent regulation concerning mutual to stock conversion retroactive. This regulation governs the amount of waiting time necessary for a shareholder, or potential shareholder, before he or she may acquire more than 10 percent of a recently coverted mutual institution. The required waiting period had been 1 year. In February 1984 the Bank Board proposed to make it a 3-year wait. They received comments on this proposal. Then, on August 2, 1984, the Bank Board met and decided, in fact, to make the 3-year rule final. However, Mr. President, in doing so they elected to make it retroactive back to March 1, 1983. Why, Mr. President, was this rule made retroactive when throughout the process the Board was considering only a prospective extension of 2 years to the waiting period? The shareholders in some 90 associations across the country are trapped in this "window of retroactivity," trapped with reduced value of their equity, trapped with potentially ineffective and uninspired management, and trapped without their rights as owners of publicly held corporations.

No other corporations have such arbitrary regulatory protection to the detriment of owners. And, Mr. President, aside from the shareholders, the ultimate victim of this action will be the long-term health of our Nation's savings and loan associations.

The health of the Nation's traditional suppliers of home mortgage finance, the thrifts and mutual savings banks, is in serious question. The symptom of this ailment is an unprecedented loss of equity and number of institutions. The cause of this equity and institution loss can be attributed to high interest rates and regulatory rigidity.

The period of 1981-82 saw the number of institutions dwindle from approximately 4,500 to 3,200. During the same period the regulatory net worth of thrifts fell by 25 percent, or $7 billion. Beginning in 1980, deregulation of the liability side allowed depository institutions to pay close to market rates for deposits. However, lack of efficient asset deregulation has caused a severe handicapping of banks and thrifts—especially thrifts which have large portfolios of long-term, low-yielding, fixed-rate home mortgages. According to some experts, a 1-percent rise in interest rates translates into $3 billion in lost earnings over the period of 1 year.

Institutions which fall into the traditional, federally chartered mutual structures are the weak links in the system. The larger, publicly held companies are in a better position to withstand another round of interest rate swings.

One thrift consultant commented, "I won't even accept an offer to study the portfolio of most mutuals. They make a lot of noise about doing something, but they rarely move once we chart out the alternatives." Sleepy mutual management must wake up to the fact that one must have equity capital to restructure old portfolios and to take advantage of the new powers granted thrifts by Congress.

In his February 23, 1984, confirmation hearings before the Senate Committee on Banking, Housing, and Urban Affairs, Federal Home Loan Bank Board Chairman Edwin Gray stated that "a trend toward conversion would be a healthy development." And, in fact, during 1983 conversions brought $6 billion in cash. Truly, Mr. President, conversions are one of the best hopes for strengthening the industry.

This regulation flies in the face of common sense and prevents infusion of equity into this capital-starved industry. Arbitrary and poorly made decisions by the Bank Board which damage the value of this fresh capital and trample shareholders' rights will scare off new conversions and shareholders. What good is the disclosure in a stock offering prospectus if the Washington regulators continue to change the rules in the middle of the game? Mr. President, in my view, the retroactive nature of this regulation is bad, and I believe Congress should act.

Mr. President, I would like to insert in the RECORD three newspaper articles that I believe my colleagues will appreciate. The first is a September 25, 1984, editorial from the Wall Street Journal which discusses a "creeping back" of regulation. While the Bank Board and the thrift industry are not mentioned specifically, I believe this industry is absolutely a case in point. We need a prudent, careful balance of both asset and liability deregulation in order that our thrifts can continue to profitably supply mortgage and real estate services to the consumer.

The other articles are from the American Banker, issues of July 13 and July 24, 1984. They discuss the health of the thrift industry generally, and mutuals specifically.

Now, Mr. President, I would ask that the articles as well as a letter to Chairman Gray signed by myself and my distinguished colleague, Senator BENTSEN, be placed in the RECORD at this point.

The information follows:

U.S. SENATE,
Washington, DC, October 4, 1984.

Hon. EDWIN GRAY,
Chairman, Federal Home Loan Bank Board, Washington, DC.

DEAR MR. GRAY: On August 2, 1984, the Federal Home Loan Bank Board issued Resolution 84-400 concerning the acquisition of stock in converted, mutual-to-stock form savings and loan associations. This decision modified—in part by making retroactive—a previous Bank Board regulation issued in February, Resolution 84-90, that extended from one year to three years limitations on investments of ten percent or more of stock in these thrift institutions. We wish to state our strong objection to the Bank Board's August 2 action giving retroactive effect, on a temporary basis, to Resolution 84-90, and ask that that portion of the Resolution not be extended when it expires by its own terms in February, 1985.

As you know, because of the fundamental fairness issue it raises, the Bank Board's August 2 action is the object of mounting concern here in Congress. Although too little time remains before adjournment for the full Congress to consider this matter, we want to emphasize the seriousness of our concern and urge you to consider thoroughly the substantial body of adverse public comment already received by the Bank Board on this issue.

Our concern is not the Bank Board's February decision that extended to three years certain restrictions on stock purchases in converted associations. As you know, this ruling was applied prospectively, putting the public on notice so that investment decisions could be made accordingly. Our concern is with the subsequent ruling which is retroactive in effect and which was issued in final form almost six months after the fact. We feel that this latter decision works to entrench incumbent management to the detriment of the shareholders, the true owners of these thrift institutions. For example, as we understand it, shareholder values in certain affected institutions declined precipitously following the issuance of this retroactive ruling, seriously diminishing the marketability of the stock, and eroding investor confidence.

Finally, the retroactive effect of the August rule raises serious questions as to whether adequate notice was given to shareholders who had invested substantial sums of money in good faith reliance on the rules in place at the time. These and other problems associated with the rulemaking are almost certain to invite legal challenges in the courts, a course of action which is inherently time consuming and may not produce immediate relief for shareholders whose investments have been dissipated.

For these reasons, and because of substantial Congressional interest in this matter, we urge the Bank Board not to make permanent the retroactive application of Resolution 84-400 when it comes up for review next year. We also ask that you keep us informed of the Bank Board's intentions on this issue and afford us timely notice of any planned action relating to the retroactive application of the rule.

Sincerely,

JOHN TOWER,
LLOYD BENTSEN.

[From the Wall Street Journal, Sept. 25, 1984]

CREEPING BACK

We'd like to invite some of our readers to put away their party hats today and take a look at an aspect of the recent Reagan record that is cause for growing concern.

Ronald Reagan entered office astride a set of policy ideas known popularly as Reaganomics—a reduction in federal spending and marginal tax rates; a noninflationary monetary policy, and deregulation. The great and glorious policy battles are, of course, fought over spending, taxes and Fed policy, but if you look closely you'll notice that federal regulations are being rolled back all right—back in the direction of inhibiting economic activity and free choice. In short, big government is creeping back, and the man in charge of the "gummn't" these days isn't named Jimmy.

Jimmy Carter in fact got the deregulation train well out of the station during his term by forcing more competition in the airline, trucking and rail businesses. And Ronald Reagan's 1980 campaign capitalized on the public's loss of patience with the government's impulse to overregulate anything it touched. Early on, Mr. Reagan made many first-rate appointments of deregulation advocates. But the record of late suggests that the Reagan White House either hasn't noticed or doesn't much care if deregulation's momentum begins to slow.

The most explicit, recent evidence of unconcern was the coercive manner in which the Federal Aviation Administration made some 100 airline executives come to Washington and re-regulate their airlines' flight schedules. The same day the final deal was cut—under the umbrella of an administration antitrust exemption—four newly formed airlines announced they had thereby been shut out of Chicago's O'Hare market. The FAA is part of Elizabeth Dole's Transportation Department. Eight weeks earlier, Secretary Dole herself regulated the auto industry by announcing a mandated schedule to install "passive restraints" in cars unless states enact mandatory buckle-up laws.

A less overt but potentially more damaging act of market regulation was Mr. Reagan's decision last week on steel imports. As with the flight schedules, the solution is "voluntary." But a steel-industry executive succinctly dismissed the administration's free-trade pretentions in a remark to the Journal's Thomas O'Boyle: "We got a five-year-quota bill. It's comprehensive and its enforceable."

Over the last two years, the Department of Health and Human Services, supported in court by the Justice Department, has attempted to impose an unprecedented degree of regulation on the decisions of doctors and hospitals that handle handicapped infants, or "Baby Doe" cases.

Over at the Federal Communications Commission, Chairman Mark Fowler and his staff, recognizing that modern communications is attracting innovators and entrepreneurs, was having notable success clearing the regulatory underbrush from that market. Then late last year, Mr. Reagan took the unprecedented step of personally intervening against the FCC's intention to free up the Market in TV-program-syndication rights, perhaps because the president's friends in the Hollywood production community said this would damage their business. Since that meeting, Mr. Fowler's deregulatory initiatives have hit a stone wall in Congress. Why should they help a guy whose own president disagrees with him?

In short, the larger message that these incidents send out is that however genuine Mr. Reagan's philosophical support of deregulation, it isn't an active, top-shelf priority in the White House anymore. That in turn gives regulation's proponents an incentive to reclaim lost ground. Witness the manner in which Rep. Fernand St Germain is using the Continental Illinois bank failure to assault financial deregulation.

The incentive to re-regulate in the face of little real White House opposition even extends to the judiciary. Last week the federal appeals court in Washington, D.C.—led by

longtime regulation advocates J. Skelly Wright and Abner Mikva—reversed the Interstate Commerce Commission's deregulation of railroad rates on exported coal. Only three months earlier, the Supreme Court—overturning a decision by this same D.C. appeals court—ruled that regulatory agencies should be given leeway to interpret the statutes they enforce. If the administration fails to appeal, the ICC will hardly be encouraged to pursue deregulation further.

This is a very troubling trend. The economic benefits of deregulation relative to controlled markets is no longer controversial. Even Ted Kennedy pushed hard for trucking deregulation. The shift in sentiment toward deregulation is the result of painstaking work by scholars such as James Miller, now head of the FTC. This popular president will suffer little initial political damage if the regulators creek back. But as with the "voluntary" steel decision, re-regulation will both limit free choice and drive up the cost of goods and services for consumers; the economy will suffer. Resisting those results, we suggest, is the point and purpose of being president.

[From The American Banker, July 13, 1984]

SAVINGS AND LOAN INDUSTRY IS THREATENED BY RISING INTEREST RATES; MUTUALS HIT HARDEST

(By David LaGesse)

NEW YORK.—The savings and loan business is quickly sliding into another fight for survival.

No segment of the financial industry is more threatened by the recent rise in interest rates. Especially since the thrifts remain weakened from the last round of high rates in 1981 and 1983.

"There's no doubt the industry has less capital than it had before the last bout." says Andrew Carron, an economist with Shearson Lehman/American Express Inc.

Higher rates will especially focus attention on the weaker thrift institutions. A survey of individual institutions, prepared by the *American Banker*, shows that, after most government aid is subtracted, the number of thrifts with negative net worth has actually increased through 1983. That was despite last year's moderate interest rates.

Institutions with traditional, federally chartered mutual structures dominate the weaker end of the industry, according to a recent study by the New York consulting firm of Lyons, Zomback & Ostrowski Inc., which first subtracted intangible assets.

Most of the larger and publicly traded savings and loans are in pretty good shape," says Robert Chaut, a thrift analyst with Becker Paribas Inc. "But the mutual institutions are quickly going to be back in trouble."

And this year's jump in rates is quickly sweeping away the small profits that savings and loans enjoyed last year.

"I'd say today's rates put thrifts, as an industry, right near the break-even point." says Dennis Jacobe, an economist and executive vice president of the U.S. League of Savings Institutions.

That was before the jump in the prime rate, a half-point shock, most analysts predict the industry tumbling back into the red.

The problem stems from the huge portfolios of long-term, fixed-rate loans that thrifts still hold from decades of mortgage lending. Loans made before 1980 generally earn less than what savings and loans now pay for their money, led by the higher rates that thrifts must offer to compete for consumer deposits.

Thrifts have lowered their vulnerability to interest rates by making more of their loans with rates that move with the market, primarily adjustable-rate mortgages.

"But the industry still remains very interest-rate sensitive," says Eric Hemel, director of the office of policy and economic research for the Federal Home Loan Bank Board.

INTEREST RATE SURGE PUTS RENEWED PRESSURE ON NATION'S THRIFTS

Each 1% rise in market rates, in fact, translates a year later to $3 billion in lowered annual earnings for the industry. Mr. Hemel says.

The Bank Board, regulator of savings and loans, reported that the industry earned a profit of $2 billion in 1983. With short-term rates up some 1.5% over a year ago, the industry would be losing at least $2 billion a year, according to Mr. Hemel's rule of thumb.

Many analysts, in fact, argue that savings and loans never even earned a profit in 1983. They tend to ignore the industry's nonrecurring profits, which totaled some $2.3 billion for last year alone. That includes some $1.3 billion in income from selling loans.

Jonathan Gray, a thrift analyst with Sanford C. Bernstein & Co., prefers studying what he calls "core earnings," which exclude profits from loan and security sales. The industry operated with core earnings that fell some $700 million in the red last year, Mr. Gray says.

Analysts also discount the growing intangible assets of the thrift industry. Those paper assets, primarily goodwill from the many mergers, had mushroomed to more than $28 billion at the end of 1983.

Goodwill is the difference between the market value of an asset, determined through appraisal, and what an acquiring institution actually paid for that asset. In a thrift merger, the acquiring institution must mark the assets that it is buying to market value, and it carries the difference as goodwill on its books.

Accounts recognize goodwill, in the theory that it represents the inherent value of the acquired institution's market share.

Analysts may look at it with skepticism, but goodwill cannot be studied in a vacuum, says Donald Kaplan, head of a Kaplan, Smith & Associates, a consulting firm.

"You must look at the transaction that created the goodwill," he says, to see what counterbalancing benefits came with the deal.

Glendale Federal Savings and Loan Association, for example, has accumulated more than $800 million in goodwill. That would give the savings and loan, the nation's fifth largest and one generally considered strong, a negative tangible net worth.

Most of that goodwill stems from the acquisition of First Federal Savings and Loan Association of Broward County, Fla.

"If that was the price for us getting into the Florida market, then it was well worth it," says David Hansen, Glendale's chief financial officer.

But just as depositors die and move away and decrease the original value of the market share, accountants require the acquiring thrift to subtract the goodwill from its assets over a number of years.

Goodwill hardly existed on thrift balance sheets before 1981. Because of the rash of intraindustry mergers, however, it mushroomed from about $200 million in 1980 to $2.3 billion in 1981 and $21.8 billion in 1983.

AFTER BRIEF REPRIEVE, THRIFT INDUSTRY FACING MORE HARD TIMES

But when the intangibles are removed, it is revealed that the entire industry has actually weakened over recent years, says Warren Heller, chief economist for Veribank Inc., a data processing firm.

"It's a matter of even the stronger getting weaker, not just the weak getting weaker," says Mr. Heller, who recently completed his own study of the industry's tangible net worth over the past three years.

Discounting intangible assets also leaves savings and loans with barely 0.5% of primary capital, or net worth.

A DEVASTATING ASSESSMENT

That washing out of the industry's questionable assets results in "a devastating assessment of the industry," says John Stone, a consultant with Lyons, Zomback & Ostrowski.

But, he says, that assessment also ignores a savings and loan's inherent attraction to potential buyers—and thus the industry's resiliency.

Adds Allan Bortel, a thrift analyst with Shearson/Lehman American Express, in a recent report on the industry: "A large buying interest exists for ownership of S&Ls among dozens of nonfinancial corporations and individual pools of capital as a way of getting into 'banking' or 'financial services.' "

Thrifts also can operate for years with a negative net worth, says Mr. Chaut of Becker Paribas. "There's a big difference between technical bankruptcy and liquidation," he points out.

The question is whether thrifts will drift further into the red. Mr. Chaut says: "If rates continue to go up, it will be a real problem."

Rates that ratchet up just another point or two, in fact, will renew an air of crisis: "We'll be back into the debacle of 1981-1982," Mr. Jacobe says.

If rates plateau at that high level for five years, 1,000 S&Ls would probably disappear into mergers or liquidations, says Richard Pratt, former chairman of the Bank Board.

That would shake out nearly a third of the remaining 3,200 institutions insured by the Federal Savings and Loan Insurance Corp. and would drain the insurance fund's reserves.

"Congress would have to step in and provide additional assistance," says Mr. Pratt, now president of Merrill Lynch Mortgage Capital Inc.

PULLING RABBITS FROM HATS

Another former regulator, James Croft, predicts that such a plateau in rates could hit the industry even more quickly.

"During the last round of high rates, the weak institutions pulled all the rabbits out of the hat that they had," says Mr. Croft, who formerly held Mr. Hemel's post as the Bank Board's director of policy and economic research.

Thrifts sold off assets to get them through the last crisis, assets they don't have as a cushion now, says Mr. Croft, who now works for the consulting firm of MCS Associates, Los Angeles.

"If rates go up and stay where they were before, the result would be much more severe than last time," Mr. Croft says.

But current regulators say those predictions sound too dire. Much depends on which rates go up, says Mr. Hemel, the

Bank Board's director of policy and research.

Thrifts now depend more on short-term deposits, such as money market accounts, he says, and they would be hit harder by a hike in short-term rates.

"Today does not yet parallel what happened at the worst of 1981." Mr. Hemel says, when short-term rates zoomed even higher than long-term rates and were as much as six percentage points higher than today.

"Things went really bananas then," he adds.

In 1981-82, the regulatory net worth of thrifts plunged by one-fourth, or $7 billion. Some 730 federally insured savings and loans—one of every six—dissolved into mergers or liquidations.

More than 400 other institutions faced the immediate danger of insolvency before interest rates fell in the fall of 1982.

MERGER PACE SLOWING

Fall they did, and rather dramatically, from an average of about 13% to an average of about 8%. By the end of 1982, the thrift industry began reporting profits again.

Mergers and closings continued in 1983 but involved fewer than 200 institutions. The pace this year has slowed further to an annual rate of about 50 institutions a year.

But the rising interest rates that crippled the industry for two years would undoubtedly do the same again.

"Last year's window of lower rates never opened for enough or long enough," says Mr. Bortel, the Shearson analyst. "There already are a lot of thrifts with their fingers caught in the window."

Industry leaders say they moved quickly to flush out their weak loan portfolios. Most thrifts last year switched to adjustable-rate loans, whose rates swing with the market. Some 80% of loans originated by savings and loans this year carry adjustable rates, according to Bank Board figures.

Thrifts also beefed up their mortgage banking activities, selling a record number of new and old loans to investors, rather than holding them in their portfolios.

"Mortgage banking has become a big part of every thrift's operations—and is a key to future profits," says Ray Martin, president of Coast Savings and Loan, Los Angeles.

But some say many thrifts, long protected by federal regulations, don't yet have the personnel to compete in today's deregulated ballgame.

"It's a shame that more institutions did not take advantage of last year's rates to rebuild," says Mr. Croft, who expresses general disappointment over the industry's response.

Adds Mr. Pratt: "In their defense, for decades there was no reason to learn how to compete."

CRITICISM OF MUTUALS

The urgency becomes more apparent for the publicly owned thrifts, whose managers must respond to their stockholders, consultants say.

"I won't even accept an offer to study the portfolios of most mutuals," says one consultant who helps thrifts restructure their assets. "They make a lot of noise about doing something, but they rarely move once we chart out the alternatives."

No matter; thrifts needed at least three years of lower rates to successfully restructure, economists say.

"Those institutions with the people and systems in place could and did restructure," Mr. Pratt says. "But even if the entire industry had been prepared, the markets just could not have absorbed that much activity."

Now, after only a year's reprieve that allowed slender profits, savings and loans face escalating rates again while still vulnerable.

Most of last year's profts came to the already stronger publicly held thrifts, and those in strong lending regions. California, a hotbed for housing and new loans at current rates, continues to attract applications for new thrifts.

But the industry's weaker end only grew weaker. New York's savings and loans, for example, continued to lose money because of portfolios still dominated by old fixed-rate loans.

A weak thrift cannot afford to sell its old loans: While selling loans brings a cool rush of cash, old loans sell at a loss.

"The weaker members just can't afford to give up that loss in the short-term," says Mark Clark, senior vice president of the U.S. League.

NEW POWERS NOT REALISTIC

Weaker thrifts also can less afford to dive into the new powers granted by Congress, such as expanded commercial lending rights.

Regulators appear well aware of the problems.

"We hear a lot of scare stories—that agencies are overwhelmed with supervisory cases," says Mr. Carron, the Shearson economist.

"What I want to suggest is that the regulators are trying to appear only somewhat more concerned," he adds, "so we won't really know how bad a shape the thrifts are in."

Regulators were accommodating during the last round. First, in 1981, the Bank Board eased net worth requirements from 5% net worth to 3% of assets: institutions below that point became candidates for forced mergers or liquidation.

As the industry continued to slide in the face of skyrocketing rates, the Bank Board decided to pump in interim support.

NET WORTH CERTIFICATES

The regulators, with the blessing of Congress, decided to give ailing thrifts "net worth certificates" that represent guaranteed cash from the government, above and beyond account insurance.

The program's authorization extended three years, until December 1985, but as early as this past March the U.S. League decided that would not be long enough. The league that month adopted a legislative program that includes a three-year extension for the net worth certificates.

The trade group also wants the Bank Board to expand the program to its current authorized level. The program actually in place gives qualifying savings and loans only about half the aid that has been authorized by Congress.

The Bank Board's adopted stance of supporting the thrift industry appears to have strengthened under Chairman Edwin Gray, a 1982 Reagan administration appointee, and the board also is reportedly looking for other ways to ease capital requirements.

"This board, as a whole, is about as pro-industry as any board has been," says Norman Raiden, Bank Board chief counsel.

The capital assistance and other accounting issues increasingly blur the true nature of the industry's strength. Analysts and stock investors thus usually prefer the "tangible" net worth ratios as a measure of relative strength.

Conversions from mutual to stock companies, which brought more than $6 billion in cold cash to the industry in 1983 alone, remain one of the best hopes for strengthening savings and loans.

So the skeptical light cast by analysis on the industry's performance in 1983 raises even more doubts that the savings and loans can recover on their own—or ever, for that matter.

"We need to extend the interim measures," says Mr. Clark of the U.S. League. "We just haven't had time enough as an industry to recover."

That requires congressional action, and that worries Mr. Pratt.

"The more they have to go to Congress, the more likely that Congress will get fed up with them," he says.

The price could be constraints on future growth—and that, in the industry's mind, would represent reregulation in the worst way.

"If carried through, that approach would strangle the thrift industry," says Mr. Carron.

He and many others argue that the regulators caused the current problems in the first place. Congress and the Bank Board took too long before lifting the ceilings on the rates that thrifts can pay for deposits, they say, and they crippled the industry's ability to compete in the late 1970s.

Mr. Carron argues that instead of sweeping industry constraints, the Bank Board should beef up its supervision of individual institutions. "They should be going after the few institutions that can cause the problems for the whole," he says.

But if rates cause another widespread crisis, thrifts may not escape a broad-brushed approach from Congress, Mr. Pratt believes.

"If thrifts continue to be a sore spot, if they can't get their own house in order," he says, "Congress will want to at least shrink that sore spot."

[From the American Banker, July 24, 1984]

RISING RATES THREATEN SAVINGS BANKS

1983 WAS MILD YEAR, BUT EXPERTS FEAR 1984 MAY BE BLEAK ONE FOR INDUSTRY

(By Lisa J. McCue)

WASHINGTON.—Financial experts doubt that the strength of many savings banks is sufficient to withstand another bout with high interest rates—a bleak assessment, considering that many economists predict climbing rates during the closing months of 1984.

Although most economists have gotten out of the business of predicting specific interest rates, there is substantial agreement that continued high federal budget deficits this year will keep pushing rates up—and keep the pressure on savings institutions.

As one savings bank expert points out, "Recent increases have thrown many institutions back against the ropes."

The relatively mild economic climate in 1983 should have helped the savings banks come back to solid ground that year, observers say, yet industry figures show that 30% of the country's traditional savings banks finished the year with losses.

In fact, after losing about $3 billion from 1980 to 1982, the industry as a whole made a profit of only $246 million in 1983, a mere 8% of its staggering three-year loss.

Traditional savings banks are those that are state chartered or were formerly licensed by the state. The grouping does not include savings and loans that converted to

federal savings banks under a recent law that authorized such switching.

A thrift trade group, the National Council of Savings Institutions, says in its annual report that it would take an increase of only 150 to 200 basis points in long- and short-term interest rates to plunge a large portion of the thrifts back into the red.

1983 RELATIVELY BENIGN

As one analyst explains it, "The critical issue is that 1983 was a year of low interest rates—and some savings banks were still not able to earn money."

That thrift expert, Ronald I. Mandle of Paine Webber, Inc., says, "If they had less than 3% net worth and lost money last year, you can pretty much write them off for '84."

As John Tucillo, a thrift economist, points out, "For savings institutions, the big question is interest rates." He adds that thrifts will be "against the ropes" this year with even slight increases in general interest rates.

In fact, about 12% of the 294 mutual savings banks insured by the Federal Deposit Insurance Corp. currently have less than the statutorily required 3% net worth, according to data prepared by the *American Banker*. That 12% is arrived at after subtracting the value of net worth certificates created by Congress to bolster the net worth of viable but financially strapped thrifts.

The net worth program, slated to expire in 1985, was designed for thrifts with dwindling net worth. Federal regulators allowed thrifts to issue the certificates as an interim measure to boost their net worth: the certificates are backed by a guarantee that the government will pay out that much more cash, above the level of support already committed through government deposit insurance, in the case of a liquidation.

Net worth is defined as the amount of assets in excess of liabilities.

Regulators consider it a sure danger signal when a thrift's net worth drops below 3%.

TREAT PROBLEMS OVER TIME

The most recent FDIC figures show that the agency's $16 billion insures almost $154 billion of savings bank deposits.

One industry official says the best the FDIC can hope for is to spread the cost of dealing with the savings banks' problems over time.

An FDIC official agrees that the problems are so large that the agency would not want to address them all at one time. But interest rates loom as the biggest threat.

"Continued rate rises will deliver the knockout punch," Mr. Tucillo says. He is vice president and director of research and economics of the National Council. That group is the result of a merger of the National Association of Mutual Savings Banks and the National League of Savings Institutions; of its 576 members, 388 are savings banks.

Robert F. Miailovich, assistant director of the FDIC's division of bank supervision, agrees that this year's higher rates are hurting thrifts.

"We are going to have to deal with a number of savings banks no matter what happens to rates," he says. "Some banks were predicting a return to profitability this year, but the recent rate experience pushes that back at least a quarter or two.

"Many that were hoping to earn their way out of their problems this year will find earnings are not going to be enough," he adds.

The severity of savings banks problems varies from state to state and depends in large part on how broad a business base the state allowed the institutions to work from.

New York, with such institutions as the Bowery Savings Bank—which led all losers in the first quarter of this year with a net operating loss of $15.6 million—is the industry's most crisis-ridden locale. The cost of deposits was blamed in part for the pathetic showing of such banks as the Bowery.

Nine of the 35 savings banks with less than 3% net worth are found in New York City, and they all fall on the lower end of the declining scale. Again, the Bowery was the worst of the lot, with a negative 0.83% net worth, according to FDIC figures.

Furthermore, 27 of those 35 are located in New York State, where savings bank powers have been heavily regulated.

If rising interest rates and restricted activities represent a bog that the industry must slog through, increasing competition from the outside is almost as threatening—a marshland, perhaps.

Savings banks have changed substantially since 1697, when Daniel DeFoe, the English author, reportedly first came up with the concept of "Friendly Societies for Provident Habits in General"—from which savings banks evolved.

The early organizers of these institutions aimed to combat pauperism; the institutions were considered semiphilanthropic, and to serve as a director was to fulfill a civic responsibility.

Massachusetts was probably the first state to take an interest in savings bank activities—an interest that took the form of supervisory laws passed in the 1830's.

The 1930's also brought federal supervision, and 50 years later came the movement toward deregulation and competition.

DIFFERENTIAL IS NO MORE

In the more permissive regulatory environment, the comfortably protective one-quarter of one percent differential between interest on savings accounts in banks and in thrifts is gone. And the opportunity to offer new types of deposit instruments has carried with it new costs required for competition.

For instance, money market deposit accounts were introduced in December 1982 to offset the dramatic drain of funds that money market mutual funds were taking from depository institutions, savings balances.

Initially, the new account had a dramatic effect on the savings balances of thrift institutions, particularly during the first five months after its introduction.

According to the National Council, savings institutions attracted $50 billion in money market deposit accounts, with at least 40% of that in new funds. Net deposit gains for savings banks were $3 billion on new deposits and an additional $16 billion representing interest credited on previous deposits.

But after the big bang—after savers moved much of their money back into federally insured accounts from the money market mutual funds—new savings activity died down.

Those accounts are currently paying an average of 9.53%, according to the Bank Rate Monitor, a substantial increase in cost to institutions that used to pay 5½% on deposits.

On the asset side, adjustable-rate mortgages were touted as the key tool to restructure the industry's portfolios so thrifts wouldn't be hit as hard as they had been by future interest rate swings.

ABUSES IN SCREENING BORROWERS

While the 1984 experience with ARMs is better than the two previous years, thrifts are still having problems convincing the consumer that the mortgages are a great deal.

Abuses have surfaced in which thrifts would offer a deeply discounted rate for the first year of the mortgage and screen borrowers only to see that they qualified for that low rate. When the increases come in the second year and beyond, the borrowers, unable to meet the payments, can lose their houses.

Bad publicity about such abuses came just as ARMs were gaining some notable acceptance from borrowers after an initial period of mass confusion, which arose because of the lack of standardization.

Despite the apparent weight of the factors working against savings bank viability in 1984 and beyond, some bankers maintain that things aren't that bad for the industry—at least outside the New York area. (Savings banks exist in 17 states: New York, Massachusetts, Connecticut, New Jersey, Pennsylvania, Washington, Maine, New Hampshire, Rhode Island, Maryland, Vermont, Delaware, Oregon, Indiana, Alaska, Wisconsin, and Minnesota.)

Robert Masterton of the Maine Savings Bank in Portland says rising interest rates are "a No. 1 problem only in a broad sense."

"Many of us have been able to develop a structure where we're less sensitive to rates," he says.

But he admits that while savings banks are less vulnerable to rate swings now than during the wild economic flux in 1980–81, there is still "very little perfect matching" of assets to liabilities. Mr. Masterton was chairman of the National Association of Mutual Savings Banks during part of 1981 and 1982.

STOCK-TO-MUTUAL CONVERSIONS

A lot of savings bankers have been hedging their deposit costs, he said, by matching them with such investments as six-month certificates. And many institutions, including Maine Savings, have brought out stock issues during the past year or so.

About 100 savings banks have converted to stock form from mutual in the last 12 to 18 months, according to James F. Carter, who is a vice president and analyst at Merrill Lynch & Co. in New York.

If worked properly, conversion may be one of the most important steps a thrift can take: the implications go farther than the immediate capital it brings into the savings bank.

As Mr. Masterton and Mr. Carter point out the importance of transforming to stock from the mutual form increases as the movement for regional banking grows.

LOW NET WORTH FIGURES CAST SHADOW OVER SAVINGS BANK INDUSTRY

"We didn't need more funds—we're more than adequately capitalized." Mr. Masterton explains of his institution. "We did it because of the thrust forward on regional banking."

Mr. Carter concurs: "[Thrifts] are increasing their capital position, not so much because they need it to survive, but to expand by acquisition."

"PSFS converted and has already bought a couple of mortgage banking subsidiaries, a land development company, a secondary mortgage concern, and a finance company," he notes, referring to the nation's oldest savings bank—formerly known as Philadel-

phia Saving Fund Society—which converted less than a year ago.

"They even have a tentative agreement to buy a thrift in Florida," Mr. Carter notes.

DIVERSIFICATION CAN HELP

There is a secondary benefit connected with the expansions, Mr. Carter says. That is that regional and operational divesification helps the parent institution through hard economic times.

But, savings bank experts warn, stock conversions are not a panacea.

Frank J. Barkocy, a vice president and analyst with Merrill Lynch Capital Markets, says, "Savings banks that have been in the conversion process recently have been unfortunately sensitive to interest rates, which bring declines in [stock] prices."

PSFS, as an example, cut the price of its proposed stock offering last August by about 25% because of "volatile conditions" caused by higher short-term interest rates.

And Mr. Masterton of Maine Savings Bank says those savings banks that have gone into nonbanking businesses will find there is a lot of fixed overhead.

"Also if rates stay up, business levels will come down," he adds.

The Maine Savings Bank executive also notes that there have been a lot of voluntary mergers as the industry braces for a second shock.

The Federal Deposit Insurance Corp. is also pushing ailing savings banks to find merger partners quickly, according to recent reports.

There are currently 23 savings banks receiving capital assistance from the FDIC as part of the net worth certificate program passed by Congress in 1982; and those certificates equal more than $385 million, according to agency figures.

Mr. Miailovich of the FDIC says the agency is doing everything possible to get certificate recipients to solve their own problems through merger, sale of assets, or conversion.

"APPLYING SIGNIFICANT PRESSURE"

"We don't want them to sit around enjoying the scenery after they receive assistance. We are applying signifcant pressure to get them to aggressively look for a way out of their financial problems without assistance, when possible," he says.

However, only five savings bank merger applications are pending with the FDIC now, according to an agency spokesman.

To some extent, discussion of the fate of savings banks, does not end with "will they or won't they survive?" There are some who ask, "Why should they?"

For instance, "The thrifts still market their product as if they were dealing with sailors just back from around the Horn," wrote William J. Quirk in *Harpers* magazine during the thrift crisis in 1982.

Mr. Quirk's article explored reasons why, as he said, the thrift industry was dying—and why it deserved to die.

But it is politically unfeasible, at least for now, that this country would let even a portion of the thrift industry die.

Thrifts were created to promote housing in America and they've done that to varying degrees for more than 50 years.

A vote against the thrift industry could be seen as a vote against the chance of fulfilling the American Dream of homeownership—and few politicians are willing to risk that yet.

Mr. TOWER. Mr. President, I would now ask that a statement by Senator BENTSEN also opposing this unfair action be placed in the RECORD.

The statement follows:

FHLBB STOCK CONVERSION RULES

Mr. President, I commend my distinguished colleague, the senior Senator from Texas (Mr. TOWER), for his leadership in opposing the retroactive portion of Federal Home Loan Bank Board Resolution 84-400. I am pleased to join once again with him in speaking to this important issue.

Among other changes, Federal Home Loan Bank Board Resolution 84-400 imposes a retroactive change in the rules regarding purchases of stock in thrift institutions which have recently converted from mutual to stock ownership.

This rule in effect abrogates existing private contracts, to the detriment of those who bought stock in these institutions after their conversion and to the benefit of the existing management of those institutions. I object most strongly to such action, no matter who it helps or hurts.

The sanctity of private contracts is a basic principal of our legal system. In this case, conversions from mutual to stock form which took place between February 29, 1983, and February 23, 1984, were done under rules which limited takeovers for one year. This one year limitation was clearly stated in the prospectus for each of these stock sales. The holders of the institutions made the decision to convert knowing that there would be a one-year limit on takeovers, and investors bought stock on the strength of this assurance.

The action of the Federal Home Loan Bank Board in changing this rule is unfair. Not only was it done retroactively, but it was done totally without prior notice. It has caused substantial losses to all stockholders in these institutions by causing immediate decreases in the price of their stock. The FHLBB should either repeal this temporary rule now or allow it to lapse when it comes up for review early next year.

This is a dangerous precedent for government rulemaking. I believe that if the FHLBB had given proper notice that it was considering this retroactive rule change there would have been substantial adverse comment. We have protested this change to the FHLBB, and I urge my colleagues to do likewise.●

UNITED STATES-CHINA RELATIONS

● Mr. MURKOWSKI. Mr. President, I rise to point out that, in its new relationship with China, the United States has an opportunity and challenge before it. It is the opportunity to strengthen our relationship as a trading partner with one-quarter of the Earth's population and to develop further an economic relationship that will reshape the social and economic structure of the world by the turn of the century. Specifically, it is an opportunity to strengthen our ties with China through trade and commerce. To have as a trading partner a nation of 1.1 billion people, scattered over 3.69 million square miles, is an opportunity which can be carried forward. One potentially important aspect of that commerce would be in the nuclear industry.

The need for a consistent national energy policy is clear. The Congress has sought to permanently ban the export of Alaskan crude oil. A majority of my colleagues maintain that by ensuring our own domestic oil supplies, we become relatively energy independent and strengthen our national security. I disagree with these arguments as shortsighted and suggest that the United States is relinquishing our role in international trade. National security is gained through exchange and common interest. A relationship based upon economic interdependence leads to greater understanding between the trading countries. Countries that trade together stay together.

In March of this year, I introduced an amendment which would lift the ban on Alaskan oil to allow for export of up to 200,000 barrels of crude per day. At that same time, I proposed an amendment which would ban all export of refined petroleum products. The purpose of this amendment was to define a consistent national policy regarding petroleum exports and to point out the anomaly of the course which we are presently pursuing. This body, myself included, voted to table the amendment which would ban export of refined petroleum products. It is a recognized fact that export of refined petroleum products is vital to the American economy. Presently, the United States exports about 460,000 barrels per day of refined petroleum products, with about 7,000 barrels per day going to the Soviet Union and Eastern bloc countries. If we permit export of refined petroleum products to our adversaries, we should surely encourage export of energy products to those we wish to have as our friends as long as our national security concerns are satisfied.

We must recognize the positive benefits to be gained in the energy trade. The administration realizes the great potential, but I am uncertain about the views of the Congress on this issue. Export of nuclear power reactors is consistent with the philosophy stated in the national energy plan of 1983—

Energy trade is likely to be an increasingly important aspect of international energy activity, and the U.S. ought to seek to increase its role as a reliable cost competitive energy trade partner.

The Asian-Pacific region has surpassed Western Europe in the volume of trade conducted with the United States, Japan, Korea, and Taiwan and have become vital to the United States as trading partners, as we enter the "Century of the Pacific." The United States, as an energy rich country, has much to offer the Asian nations. As we strengthen our geopolitical ties with the Pacific nations, we enhance our national security through a relationship based on trade and a community

of interests. The United States will benefit if the trade relationship with China were to expand as well.

The United States and China will mutually benefit from a strong trade relationship. We are a developed country whose economic and technological power is unequaled. China is the largest developing country. The potential for increased trade and expanded economic relations is unlimited. Just as we have built a strong, growing relationship with other Pacific Rim nations since 1948, we can build the same sturdy, mutually beneficial, commercial bridge across the Pacific to China.

China is at the beginning of a long-term modernization, as Japan was in 1970. China's emergence as a modern nation will have profound, long-range consequences both economically and culturally. To achieve its goals of modernization, China will need a long period of peace and internal stability. Opportunities for trade will increase. President Reagan, in his meeting with Premier Zhao Ziyang, noted that:

> Progress in four areas is particularly promising: Trade, technology, investment, and exchange of scientific and managerial expertise.

The United States is the largest foreign investor in China. As a trading partner, the United States ranks third. In 1982, United States exports to China constituted only 1.5 percent of its total volume of exports. This year, Chinese-United States trade is expected to be valued at between $5.5 and $6 billion, up 30 percent from last year.

Despite the increase in trade activity, there is room for much more. China, as a developing nation, is 10 to 15 years behind the rest of the world in some areas of modern technology, and much farther than that in many others. The Chinese have large foreign exchange reserves of nearly $20 billion and are willing and able to pay for the needed technology. China plans to invest $1 billion in Western technology in 1984. The Chinese Government is working to improve the economic climate to attract foreign investors. These improvements are evident in their legal system, patent laws, and the area of taxation. Fourteen special economic zones have been created to facilitate foreign trade.

China is particularly interested in encouraging high technology imports and energy technology. China is one of the largest consumers of energy in the world. Despite this fact, the Chinese per capita consumption of energy is only one-quarter of the world average. China is not an energy deprived country, as are our trading partners in Japan and Korea. China has plentiful oil, coal, and water reserves. Unfortunately, these conventional energy sources are not located near population centers. The development of these energy reserves has been held back because of uneven distribution and transportation difficulties. There exist practical limitations, even with the best of current technology, which preclude a short-term solution of the distribution problem. For example, the shipment of coal to China's population centers would require an upgrading of logistic facilities which appear to be beyond China's near-term economic and technical capabilities.

China is not energy deprived. Rather, it is deprived of energy technology. To catch up to the rest of the modern world, it will be necessary to import a great deal of technological expertise. The generation of electricity through nuclear power is obviously one method by which the living standards of the Chinese could be dramatically improved.

I do not intend to engage here in an extended discussion of this complicated and sensitive issue. I wish, however, to underscore certain important realities of the energy scene, and particularly with regard to the nuclear energy industry.

For some time, many members of the U.S. Congress have held the notion that if we refuse to engage in nuclear trade with a country, we have precluded them from any nuclear development of their own. The United States does not have a monopoly on the supply of any equipment, material, or services required for construction and operation of nuclear powerplants. In fact, the competitive position of the United States in international nuclear commerce is steadily declining. This is shown by the fact that in the mid-seventies the United States had a total monopoly on overseas sales of uranium enrichment services. Today, that share of the market has dropped to 30 percent. It is obvious that China will search out the most attractive conditions for nuclear reactor equipment, including the rapid transfer of its technology. Foreign nuclear suppliers, including the French, British, Japanese, and West Germans, have already presented China with detailed proposals for the construction of nuclear powerplants.

We cannot expect our trading partners to "Buy American" when we do not offer the goods for sale. For example, when we told our good friend, Japan, 10 years ago that we were not going to provide them additional fossil fuel resources, they did not stop with us. They went to other nations. Australia, Canada, Malaysia, Indonesia, Abu Dhabi, Thailand, and the Soviet Union now supply Japan with natural gas. Meanwhile, the U.S. domestic gas markets are glutted.

We should all understand clearly that the United States does not have a corner on the nuclear market. In fact, in China the French are well advanced in concluding an agreement to supply two nuclear power reactors to Guandong (Canton). Japan, Great Britain, and West Germany are also vying for Chinese nuclear contracts.

Another preconceived notion in the United States is that we unconditionally hold the trump card by being the most advanced in nuclear power technology. This can only be the case when the United States is actively involved in exports of nuclear technology. Commercial sales play a major role in providing the leverage that enables us to pursue diplomatic initiatives to control nuclear proliferation. Loss of markets to other suppliers limits the opportunity of the United States to monitor and attempt to influence activities of other countries that could lead to the capability to produce nuclear weapons.

One further consideration that should not be overlooked when determining whether to allow the sale of nuclear plants to China or to any other country is the matter of nuclear radiation safety. The United States imposes a higher level of restrictions and safety protections than most countries. If U.S. nuclear power reactors are sold to China, they will comply with our safety standards. At a time when there are those who are skeptical about the safety of nuclear power reactors, the application of the U.S. safety/regulatory regimen should provide some enhanced level of reassurance.

American companies enter the nuclear market a step behind our foreign competitors, due to the higher nonproliferation restrictions we place on purchasers of our nuclear goods. Such restrictions give the initial edge to our foreign competitors. Now there are those who wish to restrict the American companies from competing altogether. I am not suggesting that the United States lower its nuclear safeguards or safety standards. No amount of gain in jobs or export sales can justify actions which would defeat our nonproliferation goals. What I am suggesting is that we should understand the full implications of the current impasse with China on the question of nuclear cooperation.

We cannot ignore a country with such huge potential for affecting the political, military, and economic developments for the world in the coming century. We must nurture those trade relationships which will enhance our national security and further the goals of our national energy policy.●

CHILD HEALTH DAY 1984

● Mr. SPECTER. Mr. President, Monday, October 1, marked the observance of Child Health Day, 1984, proclaimed by President Reagan to celebrate the tremendous accomplishments in child health.

In his proclamation the President reminds us that although we have made

great strides in preventing diseases such as polio and the measles, we must also dedicate ourselves to addressing the needs of severely handicapped infants, teen mothers, and adolescents who abuse drugs and alcohol. As cochairman of the Senate Children's Caucus, I am acutely aware that the health needs of our youngsters are great, and I am deeply and personally committed to ensuring that those needs are met.

One of the functions of our Children's Caucus is to work with local and national children's organizations to address the full range of needs of our Nation's youth. A group with whom we cooperate and who is meeting the President's challenge is the National Children's Eye Care Foundation. Dedicated to advancing surgical, research and public education programs in areas of child eye care, the Foundation has actively worked toward safeguarding the precious gift of eyesight in our children.

Most recently, the Foundation cosponsored a vision development symposium which attracted some of the world's foremost medical authorities in areas of children's eye care. Researchers provided a revealing look at the miracle of sight, tracing the development of vision as early as the embryonic stages.

State of the art methods of testing infants and newborns for potential sight problems were also presented at this symposium, and doctors hope that this advanced technology will combat the estimated 700,000 eye- disorder cases in children under 17 reported by the Bureau of Health.

Despite myriad medical advances in this crucial field, the onus of responsibility for the health of our youth falls squarely upon our collective shoulders as concerned parents and adults. We cannot expect our children to advise us on matters such as eye problems—simply because they are children—and have no frame of reference other than their own eyesight. Our "vision" leads the way to prevent these problems from robbing our children of their chance to live their lives to the fullest.

To take the mesage inside the homes, the Foundation has joined forces with our Nation's dairies. The dairies are featuring eye charts and messages about care on milk and juice cartons in groceries nationwide.

An old proverb reads "He who has health has hope—He who has hope has everything."

In our observance of Child Health Day 1984, we want to instill that hope in children throughout America. As today's parents and adults, we must always remain alert for our children's health concerns as they grow into the adults of our future.

I ask that the President's proclamation be printed in the RECORD.

The proclamation follows:

CHILD HEALTH DAY, 1984
(By the President of the United States of America)
A PROCLAMATION

America as never before is the land of opportunity for all our children. But for some, that opportunity is denied by illness or disability. Although our health care system is the envy of the world, disease or accident can still deprive many of our children of this birthright of opportunity.

Today, we celebrate tremendous accomplishments in child health. The significant and steady decline in infant mortality, and the great strides in preventing such diseases as polio or measles, are proud examples of what can be accomplished by a free and vibrant medical care system.

On this Child Health Day, 1984, however, we must dedicate ourselves to increasing our efforts. Past achievements only suggest that greater things can be accomplished in the future. We must dedicate ourselves to making further progress in reducing infant mortality for our whole society, and we must also seek to reduce infant mortality in those areas where the level is higher then the national average.

There are also severely handicapped infants who require not only the love and support of their families but who also must have the help of many groups in their communities—doctors, hospitals, health departments, providers of health care, and others—if they are to thrive.

There are teenage mothers and teenagers who become involved with abuse of alcohol and other substances—all these young people need our help and attention. During the coming year, it is my hope that we can continue to demonstrate what a free, energetic, and enlightened society can do cooperatively to protect and improve the health status of our Nation's most vital asset, our children.

Now, therefore, I, Ronald Reagan, President of the United States of America, pursuant to a joint resolution approved May 18, 1928, as amended (36 U.S.C. 143), do hereby proclaim Monday, October 1, 1984, as Child Health Day, 1984.

In witness whereof, I have hereunto set my hand this third day of October, in the year of our Lord nineteen hundred and eighty-four, and of the Independence of the United States of America the two hundred and ninth.

RONALD REAGAN.●

RURAL ELECTRIFICATION AND TELEPHONE REVOLVING FUND SELF-SUFFICIENCY ACT OF 1984—S. 1300

● Mr. HUDDLESTON. Mr. President, it is apparent that the Senate will not consider S. 1300, the Rural Electrification and Telephone Revolving Fund Self-Sufficiency Act of 1984, during this Congress.

I am extremely disappointed by this failure to act because S. 1300 is legislation of vital importance to the 25 million rural Americans who depend on REA-financial electric and telephone service.

Since I introduced S. 1300 on May 17, 1983, I have worked to have the bill considered and debated in a free and open manner by the Senate Agriculture Committee and the Senate. However, despite the fact that this legislation—with 47 sponsors—has broad bipartisan support, it simply was not part of the administration's agenda and, therefore, did not receive the attention it deserved.

When it became clear, months after S. 1300 was introduced, that the administration was unalterably opposed to the legislation—opposing it from the time it was introduced while failing to offer a proposal of its own—34 Senators—including a majority of the Agriculture Committee—joined me in an effort to get the process moving.

We sent a letter to Chairman HELMS on February 21, 1984, requesting that hearings on S. 1300 be completed before the Easter recess and that a markup be scheduled so that, and I quote, "Congress will have time to complete its action on this important legislation prior to adjourning in October," end of quote. The first of three hearings was held on March 20 and the third hearing was completed on May 15.

On June 7, 1984, S. 1300 was marked up. During the committee's markup of the legislation, the committee considered not only S. 1300, but also the relevant provisions of current law, the House-passed companion bill to S. 1300—H.R. 3050, a bill introduced by Senator SIMPSON—S. 2646, and the administration's long-awaited legislative proposal, which was submitted on April 11, 1984, but not introduced.

During markup, the committee adopted two amendments designed to address concerns that were raised about S. 1300, as introduced. I will discuss the provisions of those amendments in a moment, but for now let me just say that they significantly reduced the cost of the legislation. Further, those amendments were the first of several efforts on my part to address the criticisms directed to S. 1300.

On June 29, over 3 weeks after markup and just hours before the July recess, S. 1300 was reported to the Senate.

Almost immediately I began my efforts to get this legislation considered by the Senate. On August 8, a letter signed by 53 Members of the Senate was sent to the majority leader requesting that S. 1300 be scheduled for Senate consideration as soon as possible.

I do not believe the people of rural America will understand how the Senate could not at least move forward with a motion to proceed on a bill that a majority of the Senate wanted to consider. Despite the excuses that someone has a hold on a bill or that only appropriations bills or bills with a time agreement could be considered, the records of the Senate over the last 2 months show that few legislative initiatives other than those

important to the administration were considered.

In another attempt to have S. 1300 brought up and debated on the floor, I recently made it known that I was open to other changes in the committee-reported bill. In a direct response to criticisms that were leveled at S. 1300, I developed alternative proposals that substantially altered S. 1300 and dramatically reduced the potential cost of the legislation.

I outlined my alternative proposal in a letter to Chairman HELMS. A similar letter was sent to the majority leader, appropriate administration officials, and Senators DOLE, SIMPSON, and GARN. I regret to say that my efforts to forge a compromise received no substantive response.

During the last few months, several Senators who were not sponsors of S. 1300, as well as administration officials, stated their desire to get this problem resolved. However, despite the appearance of activity and support for consideration of the bill, no one met with the proponents of the bill to discuss issues of concern nor did any other Senator or administration official offer a compromise.

It is clear that despite the rhetoric about the need to address this problem and the desire to put this issue behind us, the administration simply did not want to confront the issue.

The Rural Electrification Administration provides an essential service, and I believe the American people would have been better served if all the parties would have made a concerted effort to reach some agreement on this important matter. As a result of the Senate's failure to act, the problems of the REA revolving fund, like many other problems, will still be with us next year. Unfortunately, the cost of solving those problems will have increased.

PURPOSE OF S. 1300

S. 1300 would amend the Rural Electrification Act of 1936 to ensure that the Nation's rural electric and telephone systems will be able to continue to provide high quality, affordable electric and telephone service to consumers in rural America.

A major source of financing for rural electric and telephone systems—the rural electrification and telephone revolving fund administered by the Rural Electrification Administration—is in jeopardy. The solvency of the fund is threatened because of the high interest rates in recent years.

Action by Congress is needed to make the revolving fund self-sustaining and otherwise enable the rural electric and telephone systems to obtain adequate financing at a reasonable cost for their operations.

Without legislation to strengthen the fund and improve the operation of the Rural Electrification Administration loan programs, in the near future there will be only two options: Provide huge amounts of tax dollars each year to bail out the fund or greatly increease the cost of financing for many rural electric and telephone systems.

The most reasonable solution to the problem is the approach taken by S. 1300. This legislation represents a combined effort on the part of the Federal Government and the Rural Electrification Administration borrowers, who would contribute about $11.1 billion in the form of higher interest rates, to resolve the problem in a cost-effective and equitable fashion.

NEED FOR THE LEGISLATION

During the hearings on S. 1300, the individuals and organizations interested in maintaining the rural electric and telephone programs of the Rural Electrification Administration all agreed on one important point: The rural electrification and telephone revolving fund is in serious financial trouble and action by Congress is needed to resolve the problem.

For example, Harold Hunter, Administrator of the Rural Electrification Administration, while expressing reservations about S. 1300, testified that he was pleased Congress has, and I quote, "heeded the alarms we have sounded over the past several years concerning the deteriorating financial condition of the rural electrification and telephone revolving fund" end of quote.

Anthony J. Gabriel, Deputy Inspector General of the Department of Agriculture, testified that the interest expenses of the revolving fund will exceed interest income by the second half of fiscal year 1985 and that appropriations will be needed to cover the shortfall.

Rudolph G. Penner, Director of the Congressional Budget Office, testified that without congressional action the revolving fund's financial problems will cause the REA insured loan programs, operated through the revolving fund, to be shut down. In the absence of appropriations or legislation like S. 1300, Mr. Penner testified, the REA loan programs must be terminated within the next few years because the revolving fund will lack the assets to make new loans.

Out of a concern about the economic consequences for rural America if the Rural Electrification Administration insured loan programs are ended, numerous organizations and individuals—including three former Administrators of the agency—have carefully studied the possible solutions to the financial problems of the revolving fund. After an extensive examination of the problems, these organizations, including the National Rural Electric Cooperative Association, the National Telephone Cooperative Association, the National REA Telephone Association, the National Rural Utilities Cooperative Financing Corporation and the Power and Communication Contractors Association, concluded that a responsible and equitable solution to the problems must include a significant contribution from all parties to ensure the stability of this essential source of financing.

For that reason, those organizations have given their unqualified endorsement to S. 1300. The bill addresses the financial problems of the REA revolving fund by increasing interest rates on loans made to rural utilities from the fund and strengthening the capital base of the fund by reclassifying $7.9 billion in notes, due to the U.S. Treasury beginning in 1993, as equity capital of the fund.

COST OF MAINTAINING THE RURAL ELECTRIC AND TELEPHONE INSURED LOAN PROGRAMS

The Congressional Budget Office estimates that S. 1300 would increase budget outlays by $9.3 billion over 25 years. However, that estimate, while using standard budgetary procedures, is based on the unlikely supposition that, without enactment of this or similar legislation, Congress will not take other action to avert the termination of the REA rural electric and telephone insured loan programs.

Maintaining the essential Rural Electrification Administration insured loan programs can be accomplished through either the approach taken by S. 1300, that is raising interest rates and strengthening the revolving fund, or—the other most likely alternative—appropriations. Between those two alternatives, S. 1300 will ultimately reduce the Federal deficit because if it is not enacted—and the insured loan programs are to continue operating as they today—Congress will have to appropriate funds that will far exceed the cost of S. 1300.

The potential high cost of maintaining the present Rural Electrification Administration Programs through appropriations in future years is one of the strongest arguments in support of S. 1300 or similar legislation. In response to questions that were raised during the hearings on S. 1300, the Congressional Budget Office estimated that through the year 2010 about $13 billion in appropriations would be required to maintain the present REA electric and telephone insured loan programs. The Rural Electrification Administration estimates that $30 billion in appropriations would be required through the year 2017.

Although the cost of resolving the problem under S. 1300, as introduced, is substantially less than the cost involved in using appropriations, the Agriculture Committee adopted two amendments to S. 1300 that I offered to further reduce the potential cost of S. 1300.

The first amendment to S. 1300 requires that the revolving fund be managed in such a way as to be balanced;

that is, interest income must match the interest expenses of the fund. The General Accounting Office, the Congressional Budget Office, and the administration all acknowledge this change in S. 1300 reduces the cost of the legislation. According to the Congressional Budget Office, the savings could be as high as $1.5 billion.

The second amendment requires that the President of the Federal Financing Bank—the Secretary of the Treasury—give his approval before REA certificates of beneficial ownership held by the Federal Financing Bank may be refinanced. CBO transactions are used by the Rural Electrification Administration to obtain supplemental funds to finance its loan programs. CBO transactions are similar to loans, in that they require interest payments to the Federal Financing Bank and eventual repurchase of the CBO's by the Rural Electrification Administration.

The amendment addressed the administration's concern that if interest rates come down, under S. 1300 as introduced, the Rural Electrification Administration would refinance CBO's that bear high interest rates even though the Federal Financing Bank might have to continue paying high interest rates on the money it borrowed to buy the CBO's. That change in S. 1300, according to the Congressional Budget Office, will save about $1 billion.

Much of the debate about this legislation has focused on the cost to the Government of the various provisions. Under S. 1300, however, the balancing of the Rural Electrification Administration revolving fund will be a joint effort with borrowers and, therefore, the 25 million consumers served by Rural Electrification Administration-financed utilities. The Congressional Budget Office estimates that the contribution made by Rural Electrification Administration borrowers in the form of higher interest rates will be about $11.1 billion under S. 1300, as reported. The combined effort on the part of the Federal Government and REA borrowers will make it possible for the fund to become permanently self-sustaining.

A COMPROMISE PROPOSAL

Although the Agriculture Committee took important steps to reduce the potential cost of S. 1300, I recently offered a compromise proposal that was a good faith effort to address the concerns that were raised about S. 1300, as reported, while reducing the cost of the measure.

Specifically, the compromise I proposed included the following:

Elimination of the statutory 5-percent interest rate on REA loans to rural utilities in favor of a gradually increasing interest rate until fiscal year 1990 when the variable interest rate formula provided under S. 1300, as reported, would go into effect. Using that formula, the Administrator of REA would be required to make periodic adjustments in the interest rate to balance the REA revolving fund, more closely reflecting fluctuations in market interest rates.

Immediate repayment of the $7.9 billion in Treasury notes held in the REA revolving fund based on their present economic value, as determined by the Congressional Budget Office.

An annual loan cap of $1.3 billion for both REA electric and telephone loans. This is below the maximum loan limit of $1.4 billion set for fiscal year 1984 and substantially below the projected annual loan level of $2 billion by the year 2000.

Amortization of REA certificates of beneficial ownership to facilitate management of the revolving fund and eliminate sharp changes in the interest rate charged REA borrowers.

The Congressional Budget Office estimates that the cost of S. 1300, if amended to include the provisions outlined above together with the other provisions of the bill, would be reduced from $9.3 billion to $2 billion over 25 years. Under this proposal, it would not be necessary for Congress to make appropriations to cover the interest expenses of the revolving fund. The Congressional Budget Office has estimated that such appropriations would total about $13 billion.

CONCLUSION

Although the challenge of bringing electricity and telephone service to rural areas has been successfully met by the Rural Electrification Administration Programs, the job of the agency is not done. Like the utility systems in large cities where utility services have been available for decades, rural utility systems continue to need financing to replace obsolete facilities and equipment, extend service to new customers, and repair damaged equipment. Without a viable revolving fund, as provided under the amendment, for many rural utilities there will be no investment for the future and rural utility rates will have to be increased to prohibitively high levels.

S. 1300 could provide a permanent solution to the problem. Further, Congress, the administration, and all those with an interest in this legislation have had well over a full year to review it and suggest alternative ways of addressing the problems of the Rural Electification Administration revolving fund.

It is extremely regrettable that, given the length of time this legislation has been under review and the careful consideration the Agriculture Committee gave to a full range of alternative solutions, the Senate has not acted on this legislation.

I ask that the text of the letters referred to in my statement be printed in the RECORD.

The material follows:

COMMITTEE ON AGRICULTURE,
NUTRITION, AND FORESTRY,
Washington, DC, Feb. 21, 1984.

Hon JESSE HELMS,
U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: We respectfully request your assistance in scheduling hearings and a markup as soon as possible on S. 1300, the Rural Electrification and Telephone Revolving Fund Self-Sufficiency Act of 1983.

Enactment of S. 1300 is needed to ensure that the Nation's rural electric and telephone systems will be able to continue to provide high quality, affordable electric and telephone service to consumers in rural America. H.R. 3050, the House companion measure, was reported favorably by the Committee on Agriculture on a rollcall vote of 38 to 1.

We believe that the Senate hearings on the REA bill should be completed before the Easter recess so that Congress will have time to complete its action on this important legislation prior to adjourning in October.

Sincerely,

Senators Thad Cochran, Mark Andrews, Walter D. Huddleston, Edward Zorinsky, David L. Boren, Larry Pressler, Russell B. Long, Sam Nunn, Max Baucus, Dennis DeConcini, Arlen Specter, Jim Sasser, Carl Levin, Thomas F. Eagleton, Jennings Randolph, J. Bennett Johnston, James Abdnor, David Pryor, Alan J. Dixon, Charles H. Percy, Howell Heflin, Lloyd Bentsen, Ernest F. Hollings, Paul S. Sarbanes, Robert T. Stafford, Roger W. Jepsen, Chic Hecht, John Melcher, John C. Stennis, Wendell H. Ford, J. James Exon, Gary Hart, John Heinz, and Donald W. Riegle, Jr.

COMMITTEE ON AGRICULTURE,
NUTRITION, AND FORESTY,
Washington, DC, August 8, 1984.

Hon. HOWARD H. BAKER, Jr.,
U.S. Senate,
Washington, DC.

DEAR MR. MAJORITY LEADER: We respectfully urge you to schedule S. 1300, the Rural Electrification and Telephone Revolving Fund Self-Sufficiency Act of 1984, for floor consideration as soon as possible.

S. 1300 was introduced on May 17, 1983, and reported favorably by the Committee on Agriculture, Nutrition, and Forestry on June 29, 1984. Forty-seven Senators are sponsors of the legislation.

Enactment of S. 1300 is needed to ensure that the Nation's rural electric and telephone systems will be able to continue to provide high quality, affordable electric and telephone service to consumers in rural America.

Sincerely,

Senators Walter D. Huddleston, Edward Zorinsky, Thad Cochran, Mark Andrews, John Melcher, David L. Boren, Alan J. Dixon, David Pryor, Howell Heflin, Max Baucus, Lloyd Bentsen, Jim Sasser, John C. Danforth, James S. Abdnor, Larry Pressler, Robert S. Kasten, Jr., Charles H. Percy, Robert T. Stafford, Jeff Bingaman, Paul S. Sarbanes, John Glenn, Dennis DeConcini, J. James Exon, Wendell H. Ford, Ernest F. Hollings, Quentin N. Burdick, Gary Hart, Russell B. Long, J. Bennett Johnston, Thomas F. Eagleton, Sam Nunn, Dale Bumpers, John C. Stennis, Carl Levin, Donald W.

Riegle, Jr., Rudy Boschwitz, Jennings Randolph, George J. Mitchell, Daniel K. Inouye, Strom Thurmond, John W. Warner, Chic Hecht, Charles E. Grassley, John Heinz, Arlen Specter, Roger W. Jepsen, David Durenberger, Spark M. Matsunaga, Joseph R. Biden, Jr., Alan Cranston, Paul Laxalt, Pete V. Domenici, and Christopher J. Dodd.

COMMITTEE ON AGRICULTURE,
NUTRITION, AND FORESTRY,
Washington, DC, September 25, 1984.

Hon. JESSE HELMS,
Chairman, Committee on Agriculture, Nutrition, and Forestry, U.S. Senate, Washington, DC.

DEAR JESSE: Enclosed is a narrative description and analysis of an amendment to S. 1300, the Rural Electrification and Telephone Revolving Fund Self-Sufficiency Act of 1984. The amendment would revise the provisions of that legislation designed to restore the financial stability of the Rural Electrification Administration (REA) revolving fund loan programs. I believe this alternative is a good faith effort to address the major issues raised by the opponents of S. 1300, as reported.

I urge you to review this alternative as soon as possible and join me in working to persuade other Senators of its merits and seeking immediate Senate consideration of the legislation.

Specifically, the alternative I am proposing would include the following:

Elimination of the statutory 5 percent interest rate on REA loans to rural utilities. The alternative would provide a gradually increasing interest rate until fiscal year 1990 when the variable interest rate formula provided under S. 1300, as reported, would go into effect. Using that formula, the Administrator of REA would be required to make periodic adjustments in the interest rate to balance the REA revolving fund and more closely reflect fluctuations in market interest rates.

Immediate repayment of the $7.9 billion in Treasury notes held in the REA revolving fund based on their present economic value, as determined by the Congressional Budget Office.

An annual loan cap of $1.3 billion for both REA electric and telephone loans. This is below the current maximum loan limit of $1.4 billion set for fiscal year 1984 and substantially below the projected annual loan level of $2 billion by the year 2000.

Amortization of REA certificates of beneficial ownership to facilitate management of the revolving fund and eliminate sharp changes in the interest rate charged REA borrowers.

The Congressional Budget Office estimates that the cost of S. 1300, if amended to include the provisions outlined above together with the other provisions of the bill, would be reduced from $9.3 billion to $2 billion over 25 years. Under this proposal, it will not be necessary for Congress to make appropriations to cover the interest expenses of the revolving fund. The Congressional Budget Office has estimated that such appropriations would total about $13 billion.

Further, under this alternative, the revolving fund will remain solvent and be able to repay all of its obligations and eventually become debt free. At that point, the fund will no longer need to issue new certificates of beneficial ownership.

I am furnishing copies of this alternative proposal to other members of the Senate and to the representatives of the rural electric and telephone associations.

Sincerely,

WALTER D. HUDDLESTON.

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, September 25, 1984.

Hon. WALTER D. HUDDLESTON,
Committee on Agriculture, Nutrition, and Forestry, U.S. Senate, Washington, DC.

DEAR SENATOR HUDDLESTON: At the request of the Committee staff, the Congressional Budget Office (CBO) has reviewed the budgetary effects of amending S. 1300, the Rural Electrification and Telephone Revolving Fund Self-Sufficiency Act of 1984, as reported, to include the following provisions:

Require the fund to pay an amount equal to the present value of the Treasury notes, reduced by $227 million (it is assumed for this estimate that the fund would pay $648 million in 1985, which is $227 million less than the present value of the current notes, using a 12.5 percent discount rate);

Set the loan interest rate at 6.5 percent in 1985, 7.0 percent in 1986 and 1987, 7.5 percent in 1988, 8.0 percent in 1989, and use the interest rate formula in S. 1300 beginning in 1990;

Cap lending at a total of $1.3 billion a year for both accounts; and

Amortize the fund's payments on existing and future certificates of beneficial ownership (CBOs).

As requested, we have also assumed the enactment of an appropriation of $216 million for fiscal year 1985. Under the economic assumptions used for the CBO baseline projections, we estimate that enactment of S. 1300, if amended as proposed, would increase net federal outlays relative to current law by approximately $2.0 billion over the 1985–2010 period.

If you wish further details on this estimate, we will be pleased to provide them.

Sincerely,

RUDOLPH G. PENNER.

COMPARISON OF REVOLVING FUND FINANCIAL STABILITY PROVISIONS

	Current law	S. 1300, as reported	Proposed alternative
Interest rate on REA loans (standard rate).	5 percent	Variable using a formula. (CBO estimates the rate will start at just below 7 percent and average 8.5 percent over 25 years).	1985—6.5 percent. 1986—7.0 percent. 1987—7.0 percent. 1988—7.5 percent. 1989—8.0 percent. 1990—variable rate using the formula in S. 1300, as reported.
Treatment of $7.9 billion in Treasury notes.	To be repaid through a combination of appropriations and issuing new certificates of beneficial ownership.	To be made part of the permanent capital of the revolving fund.	To be repaid based on the present economic value of the notes. CBO has stated that the present value of the Treasury notes is $875 million. From that amount, the alternative credits $227 million that would otherwise be appropriated to cover the interest expense of the revolving fund for fiscal year 1984. (Similar appropriations were made for interest expenses incurred during fiscal year 1982 and fiscal year 1983.) The REA revolving fund will prepay the balance of $648 million, which will be treated as payment in full. The fund will issue a CBO for that amount and repay it, with interest, using funds generated by the higher interest rates charged for loans. No future appropriations to cover CBO interest expenses will be needed.
Loan caps	Set by appropriations, currently a range of $1.1 to $1.4 billion.	No provision	Caps the REA electric loan program at $1 billion and the REA telephone program at $300 million.
Amortization of CBO's	No provision	No provision	Requires amortization of CBO's.

COMPARISON OF REVOLVING FUND FINANCIAL STABILITY PROVISIONS—CONTINUED

	Current law	S. 1300, as reported	Proposed alternative
CBO cost estimate of all provisions	CBO assumes no cost but bases this on the loan program being terminated in the early 1990's. To continue the program through appropriations, CBO estimates appropriations of $13 billion would be required over 25 years.	$9.3 billion over 25 years...	$2 billion over 25 years.

DR. ANTHONY FAINBERG—CONGRESSIONAL SCIENCE FELLOW

● Mr. BINGAMAN. Mr. President, I take the next few moments to commend the outstanding work of Dr. Anthony Fainberg, an American Physical Society Congressional Science Fellow, who has served on my staff for the past year.

Tony came to my staff from Brookhaven National Laboratory, where he had worked on nuclear safeguards and on experimental elementary particle physics. On my staff, he has proven to be of immeasurable value in many areas of interest. He has worked on a variety of issues from the Central American situation, to the Defense Department polygraph policy, to arms control, to increased DOD support for basic research, to economic development in New Mexico, to energy policy, to nuclear nonproliferation, and many more. While he brings great technical knowledge to these issues, he also has the ability to convert technical jargon into layman's language. His facility with several foreign languages, as well as with the language of science, is invaluable as you might imagine. I should also remark, Mr. President, that his considerable scientific and intellectual skills are enhanced by his sense of humanity and concern for justice. Tony is one of those rare individuals who bridges the two cultures C.P. Snow has described—that of the sciences and that of the humanities.

Over the past year, Tony has assisted me in the preparation of numerous floor statements, often under severe time constraints. He has prepared necessary background for me at hearings and meetings I attended and he has contributed on more than one occasion toward the drafting of needed legislative initiatives. He has worked tirelessly, putting in hours as long as those of any regular member of my staff. His results have been outstanding.

During this period when I have had the task of organizing my office Tony has provided an invaluable contribution. I am grateful to him for his dedication, for his loyalty, and for his good humor. I wish him well in his future endeavors.

I also commend the American Physical Society for sponsoring the fellowship program under which Tony served on my staff and many other capable individuals have served other Members of Congress. We need to have more technically trained staff members in the Senate. So many of the issues which come before us have a large technical component, on which we need good skilled advice. I hope that the American Physical Society, the American Association for Advancement of Science, the American Chemical Society, the Institute of Electrical and Electronics Engineers, and other technical societies will consider expanding their fellowship programs so that more of my colleagues could benefit from the expertise these fellows bring to the Congress.●

CHEMICAL-BIOLOGICAL WEAPONS VERIFICATION: ARE WE INTELLIGENT ENOUGH?

● Mr. QUAYLE. Mr. President, last week the Senate approved the House-Senate conference report on the Defense authorization bill for fiscal year 1985. Accepted as part of that bill was an amendment that calls on the Executive to produce a report detailing existing and planned programs to support verification of the 1972 Biological and Toxin Weapons Convention and a chemical weapons ban.

This report is due December 31, 1984, and is vitally important on at least two counts. First, no matter how anxious we are to negotiate a comprehensive ban on chemical weapons—and President Reagan and the administration are anxious to get such an agreement—it will be of no value if we lack the intelligence and analysis resources sufficient to verify its possible violation.

In fact, without sufficient resources, even negotiating such an agreement may prove impractical: The first stage proposed for these negotiations requires both sides to verify what each claims it is stockpiling in the way of chemical weapons.

Second, chemical and biological weapons developments may be moving faster than we can track them. Chemical weapons capabilities now are spreading to hot spots such as the Middle East. In fact, use was actually proved earlier this year in the Iran-Iraq war. Also, there are new reports that biological weapons employing genetic engineering may be under development in the Soviet Union.

The latter development is particularly disturbing and has only recently come to light in an extensive newspaper series "Beyond Yellow Rain," by William Kucewicz in the Wall Street Journal and later in a briefer article in September's Reader's Digest, "Poison and Plague."

Mr. President, if these reports are true, it will only be more difficult to monitor against violations of existing and proposed bans against chemical and biological weapons. Because it will be these issues that Congress will have to struggle with in considering the required report I ask that the full text of the Reader's Digest article be entered into the RECORD following my remarks.

The text follows:

[From Reader's Digest, Sept. 21, 1984]

POISON AND PLAGUE

RUSSIA'S SECRET TERROR WEAPONS

(By Jack Anderson and Dale Van Atta)

In October 1980 and August 1981, Jane Hamilton-Merritt documented for Reader's Digest the use of poison gas by the Soviet-supplied Vietnamese and Pathet Lao against anti-Communist H'mong tribesmen in Laos. The gassings have continued—and spread. In this exclusive account, investigative reporters Jack Anderson and Dale Van Atta reveal top-secret intelligence on the widespread proliferation of Soviet chemical and biological weaponry—and the growing threat it poses to America.

Four years ago, Jose Romero* escaped from Cuba with secret knowledge of a development so terrifying that it could surpass the Cuban missile crisis in portent. Here are the stark details he related to the Defense Intelligence Agency (DIA):

In the 1960s Romero studied chemistry at a college near Havana. Later he was enrolled in a special army school at Limonar in Matanzas Province and trained by Soviet instructors as a chemical and biological warfare (CBW) adviser to Fidel Castro's army.

*Not his real name.

The Russians taught him that bacteria produced by rats, flies and other organisms could be introduced into an enemy's atmosphere or water supply. Romero said he had been shown pictures of U.S. cities that were "possible chemical and biological weapons targets." One Soviet briefing claimed that a deadly toxin strategically released in Mississippi "could contaminate a third of the United States."

Romero's story is verified by other sources, including a former interpreter for Castro. Both defectors have described Soviet chemical units and undergound-storage sites, some so sensitive that they were protected by surface-to-air missiles. These facilities, one defector warned, are "part of a chemical and biological strategic system developed by the Soviets and more dangerous than anyone in the United States can realize."

"Silent Killer." Meanwhile, reports had been reaching DIA headquarters revealing that the Soviets were putting into practice in Asia what they had been preaching in Cuba's CBW schools. In March 1981 a Thai citizen died from poison placed in drinking water by Vietnamese troops near the Kampuchean border. Others bled profusely from the nose and mouth. Two months later, Thai soldiers captured two Vietnamese trying to poison the water supply in a Kampuchean relocation camp in Thailand.

From Afghanistan came one horrifying report after another of poisoning and gassings. A favorite Soviet practice: pouring deadly chemicals into the guerrillas' karezes (underground canals used primarily for irrigation).

Victims of the Soviet-made chemical and biological agents have included Lao hill tribesmen, Kampuchean resistence fighters, Afghan mojahedin, Thai soldiers, Iranian revolutionary guards, Chinese soldiers, even civilians in the Soviet Union. A realistic estimate puts those killed at more than 30,000.

Descriptions of the slaughter are horrendous. The biologically produced poison that has come to be called "yellow rain" causes its victims to bleed through nearly every body orifice, including ears and eyes. Soviet nerve gases cause a terribly dance of death: breathing difficulty, sweating, nausea, vomiting, cramps, involuntary defecation and urination, jerking and staggering. Finally, the victims collapse in convulsions, succumbing then to complete paralysis and asphyxiation. One chemical agent used in Afghanistan causes corpses to bloat abnormally, the skin turning black and flaking away from the bones in less than a day.

Only one new Soviet agent seems relatively merciful—an unidentified substance nicknamed "The Silent Killer." Spread by Soviet troops in the eastern and northeastern provinces of Afghanistan since mid-1981, it is so swift that victims die as if frozen in place.

BLUE EARS

Soviet deployment of chemical and biological weapons is by no means a recent phenomenon. Red Army troops captured by the Germans during World War II told of an extensive Soviet program beginning in 1939, including development of a "powdery yellow-brown" agent called lebeda that could be sprayed from aircraft. A Soviet scientist who defected in the 1950s reported that political prisoners were fed toxic material in ground meat; then were closely monitored for reactions. A more recent Soviet defector revealed that the Central Committee of the Communist Party and the Ministry of Defense both specifically approved research into psychochemicals and biological toxins.

But certain intelligence analysts were so committed to the continuance of the 1972 Biological and Toxin Weapons Convention that prohibited development, production and stockpiling of these materials, that they at first gave little credence to any report suggesting that the Soviets were cheating.

All this changed in 1979, when a massive explosion rocked the area around a secret Soviet installation at Sverdlovsk in the Ural Mountains. Within four days the first seven or eight victims were admitted to a local hospital, choking, with high fever, blue ears and lips, and breathing difficulties. Each died within six to seven hours, and autopsies revealed severe pulmonary edema and blood poisoning. Soon victims were collapsing throughout the region. By the time the epidemic had run its course two months later, up to 1,000 people had died.

Not until the following April did President Carter receive the unequivocal report of "strong evidence that a biological production or storage site is at the Sverdlovsk facility. It shows an extremely large number of anthrax spores were released—effectively negating any assessment of peaceful or defensive research being conducted there. This flies in the face of the 1972 convention."

Since then, intelligence has identified another "major BW-related research and production installation" at Zagorsk, six more suspected sites—at Omutninsk, Aksu, Pokrov, Berdsk, Penza and Kurgan—and a storage facility in the town of Malta. A secret report reveals that the "offensive BW program" is run by a "covert apparatus" within the Ministry of Defense called the Seventh Main Directorate.

ERODING A THEORY

Governmental foot-dragging also prevailed in the investigation of "yellow rain" gassings of H'mong people in Laos. The gassings appeared to be retribution against the tribe, which had fought for the United States against the Communists in Laos until the American withdrawal in April 1975. The earliest known chemical attack occurred in the summer of 1975. But it took four years—until September 1979—before a competent U.S. medical team was dispatched to Thailand to investigate. By that time at least 4,596 H'mong had been killed with deadly biochemical weapons, according to U.S. estimates.

Even then, however, eyewitness reports weren't enough for the analysts. Among the literally millions of hours of intercepted communications it routinely records, the National Security Agency found the key pieces of the Laotian puzzle. One piece revealed that a Laotian-army chemical unit in Xiangkhoang expected a visit by a Soviet military team on February 7, 1979, and prepared Soviet-manufactured chemical items for their inspection. Another revealed that a Soviet team of seven chemical-artillery experts was scheduled to inspect chemical supplies at a Savannakhet storage facility the following June. A third indicated the Soviets would be looking over the same chemical agents used against the H'mong.

Finally, on February 2, 1982, six years after the attacks began, an interagency intelligence report concluded that the Soviets were directing chemical-weapons training, storage and use by the Pathet Lao and Vietnamese forces in Laos and Kampuchea. It also charged the Soviets with using lethal chemicals in Afghanistan.

One aspect of the attacks was unexplained: what was the killing agent in "yellow rain"? Journalist Sterling Seagrave, later the author of Yellow Rain, and Army medical intelligence specialist Sharon Watson discovered that peasants killed by a fungal poison in the Orenburg district of Russia during World War II exhibited many of the same symptoms as those who died decades later in Laos. More than 30,000 Russians perished of a trichothecene toxin (T2) in that epidemic, which resulted from fungal-contaminated millet, wheat and barley. Starving peasants baked it in bread. Tests since 1981 have identified unnatural levels of T2 and other trichothecene toxins at attack sites in Laos and Kampuchea.

The most vocal critic of this evidence, Harvard biochemist Matthew Meselson, argued that the yellow-rain poisons are produced in nature by fungi on the feces of bees. That theory eroded in May when two leading Canadian scientists reported that fungi collected in Thailand show little or no ability to produce yellow-rain poisons. Rutgers University scientist Joseph D. Rosen analyzed yellow-rain samples and found not only fungal poisons but a man-made chemical (polyethylene glycol) that could not possibly have been produced naturally. Asks Rep. Jim Leach (R., Iowa), one of Congress's top CBW experts: "How can the bee-excrement theorists explain how thousands of people have died from a bee-borne plague where no history of such plagues has ever been recorded, where the geography is so diverse, ranging from the arid mountains of Afghanistan to the jungle plateaus of Cambodia to the semi-tropical mountains of Laos?"

NEW THREATS

Although there has been a marked decline in the use of CBW weapons since early 1983, U.S. Ambassador Eugene Douglas, the coordinator for refugee affairs who helped bring "yellow rain" to world attention fears that the decline represents only a temporary lull as the Soviets prepare to test a new group of horror weapons. Indeed, President Reagan received an alarming report from the CIA earlier this year about biological-warfare possibilities of Soviet gene-splicing techniques. A secret program directed by Gen. V. I. Ogarkov is utilizing recent advances in biotechnology to produce toxins more potent than ever before. The report estimated that Soviet military biotech research could field such weapons in three to five years.

Intelligence agencies acknowledge another threat: the Soviets have tailored one of their strategic rockets for delivering chemical or biological weapons to America. It is the Mod 4 variant of the SS-11 "Sego" intercontinental ballistic missile with three to six re-entry war heads.

APOCALYPTIC PROPHECY

How can we defend ourselves against such weapons? As one answer, we maintain large CW stockpiles of our own, including tons of agents located under our control in West Germany. But we are still vulnerable to the threat of Soviet-backed terrorists' using these horrific agents in America. So much more needs to be done:

1. Intelligence regarding chemical and biological weapons must be upgraded. All CBW agents used by the Soviets must be identified, and defenses prepared against them.

2. As intelligence is gathered, it must be shared by all-enforcement agencies. All thefts of deadly pathogens and chemical agents should be reported to a central infor-

mation-gathering facility, perhaps at the FBI.

3. Two SWAT teams should be created, one each to deal with chemical and bacterial threats by terrorists. A national serum bank should be established and stocked for use during massive epidemics.

4. The Customs Service, Defense and Commerce Departments should cut off any exports of chemical or biological agent precursors and gene-splicing information to Soviet-bloc countries.

5. The U.S. government must vigorously pursue verifiable chemical- and biological-weapons bans—along the lines of Vice President George Bush's chemical-weapons proposals to the Soviets last April. It should consider, along with other governments, the possibility of a nonproliferation treaty regarding CBW weapons.

We can no longer ignore the threat. We have had sufficient warning of a potential devastation so appalling that it would fulfill the plagues and pestilences in apocalyptic prophecy.●

THE WELLINGTON NEGOTIATIONS

● Mr. QUAYLE. Mr. President, I commend to my colleagues and all who are concerned about the resolution of asbestos-related tort litigation, an article by Harry Wellington, dean of the Yale Law School and moderator of the Wellington Group. Dean Wellington mediated for 19 months between producers and insurers to develop the Wellington Agreement, which is being offered as one solution to the most serious toxic tort litigation and insurance coverage problems ever to confront our courts and the insurance business.

I hope that each of my colleagues will take the time to read this article, which I submit for the RECORD.

The article follows:

HOW TO SETTLE ASBESTOS CLAIMS

(By Harry H. Wellington)

Complex personal injury litigation is in need of reform. Such litigation clogs the courts and can be obscenely expensive.

Consider as a prime example claims against asbestos companies for injuries allegedly caused by their products. There are some 23,000 asbestos liability cases pending in state and federal courts. Moreover unless we do something dramatic, this congestion will continue into the third decade of the 21st Century and waste hundreds of millions, perhaps billions, of dollars in legal expenses.

Estimates have placed the total bill that will be attributable to asbestos-related injuries at tens of billions of dollars. Some companies—Manville is one—have already gone into reorganization under the protection of the federal bankruptcy laws. Others may have to follow. This could cost jobs and result in sick people not being compensated.

Asbestos-related diseases can be vary serious and result in large monetary awards. Trials are complicated, time-consuming and expensive. Indeed, according to a recent study, it costs defendants (asbestos companies and their insurers) $2.71 to get $1, free and clear, to an injured plaintiff.

This is grotesquely inefficient law. Yet the expense and the inefficiency are easily explained: Asbestos-related diseases have a latency period of 15 to 40 years.

Who produced the product that may have caused the disease? When was the disease caused? We never know the answer to the last question and, in many cases, there is no good answer to the first. Specific records probably do not exist, and even when they do, they do not always yield information of sufficient precision to be useful.

Plaintiffs, faced with understandable legal frustrations, tend to sue every asbestos producer who may have played a part in their illness. The average number of defendants involved in these suits has been about 20 per case. Each company comes to court with its own lawyers, its own agenda and its own self-interest—none of which may be compatible with fellow defendants. Nor is it easy for the defendant companies to know which insurers are responsible for the claim.

There has to be a better way, and I believe there is.

A group of major asbestos producers and large insurance companies has joined in an effort to resolve all asbestos-related disputes between producers and insurers and with the aid of prominent plaintiff lawyers, to design a private administration agency that would fairly and effectively manage the bulk of asbestos claims.

I was selected as the neutral moderator of this so-called "Wellington Group." It has developed ground rules that would resolve most of the problems I have outlined. The plan calls for the establishment of an independent, nonprofit organization to be known as the Asbestos Claim Facility. Asbestos-related claims would be evaluated, and privately settled with the assistance of neutrals. For the few cases that could not be settled successfully, the claim facility would defend the members—with one team of lawyers, not 20 or more. Funding would be provided by the producers and their insurers. At every stage, from claims handling through litigation, there would be enormous savings of time and expense for all sides and a more expeditious and equitable resolution of the plaintiff's claim would be provided.

What we are seeking is a privately funded, privately managed resolution of a crippling public policy problem. The rationale for the proposal is compelling, although there are still major producers and insurers that have not yet agreed to participate. Many of the gaps must be filled before we can proceed.

I am convinced the Asbestos Claims Facility will succeed. The time has come for traditional and expensive courtroom warfare to give way to a private and equitable settlement of the asbestos tragedy. The claims facility proposal shows the way.●

THE RECENTLY ENACTED BANKRUPTCY LEGISLATION

● Mr. DECONCINI. Apparently there may have been some misunderstanding regarding the effect of certain technical amendments made by the recently enacted bankruptcy legislation, Public Law 98-353, specifically section 421(i), which amended the definition of transfer in the Bankruptcy Code—11 U.S.C. section 101(48) in the new legislation—to add the phrase "and foreclosure of the debtor's equity of redemption,"; and section 467(a)(1), which amended section 548(a) of the Bankruptcy Code to add the phrase "voluntarily or involuntarily." A question has arisen whether these amendments somehow support the position taken by the U.S. Court of Appeals for the Fifth Circuit in *Durrett* v. *Washington National Insurance Co*, 621 F. 2d 201 (5th Cir. 1980), where the court held that a nonjudicial foreclosure sale could be set aside in bankruptcy if the sale price was not sufficiently high. My understanding is that these provisions were not intended to have any effect one way or the other on the so called Durrett issue. Is my understanding correct?

Mr. DOLE. The Senator's understanding is indeed correct. As the Senator knows, Senator THURMOND's amendment in the nature of a substitute to H.R. 5174, when introduced, contained language that would have overturned the position represented by the Durrett decision. Senator METZENBAUM, however, believed that no action should be taken on the Durrett issue until the Judiciary Committee had an opportunity to hold hearings on the issue and consider the matter thoroughly. In deference to Senator METZENBAUM's position, Senator THURMOND agreed to delete from his amendment all provisions dealing with the Durrett issue, and so stated on the floor on June 19—CONGRESSIONAL RECORD at page S7617. Consequently, no provision of the bankruptcy bill as passed by this body was intended to intimate any view one way or the other regarding the correctness of the position taken by the U.S. Court of Appeals for the Fifth Circuit in the Durrett case, or regarding the correctness of the position taken by the U.S. Court of Appeals for the Ninth Circuit in *Lawyers Title Insurance Corp.* v. *Madrid, 725 F2d 1197 (9th Cir. 1984), which reached a contrary result.*

The first provision, which amends the definition of "transfer" contained in section 101 of the Bankruptcy Code, appears to provide that certain foreclosures are included within the definition of "transfer." It does not purport to deal with whether such a transfer will fall within the scope of section 548(a)(2), which was the subject of the ninth circuit's decision, nor with the question of when a transfer occurs for purposes of section 548. Under section 548(d)(1), the transfer occurs on the date of the perfection of the mortgage or deed of trust, for after such date no bona fide purchaser from the mortgagor could take priority over the rights of a purchaser at the foreclosure sale. Those courts following Durrett have found and held that the former definition of "transfer" in section 101(41) was broad enough to include a foreclosure sale of the debtor's property while courts rejecting Durrett on the basis of the date of transfer, have done so under section 548(d)(1) and not section 101(41). Thus, the amendment should not be construed to in any way codify

Durrett or throw a cloud over noncollusive foreclosure sales.

The second provision, which adds "voluntarily or involuntarily" to section 548(a) is consistent with the majority holding in Madrid. Finally, neither of the provisions purport to deal with the question of whether a noncollusive, regularly conducted foreclosure sale should be deemed to be for a reasonably equivalent value.

Mr. DECONCINI. Then I am correct in concluding that parties in bankruptcy proceedings who seek avoidance of prepetition foreclosure sales would find no support for their arguments in these amendments?

Mr. DOLE. The Senator's conclusion is correct.

Mr. DECONCINI. On another matter, confusion has arisen concerning the payment of necessary expenses incurred by a creditors' committee appointed under section 1102. Although there is not a specific provision providing for this type of expense in the code, this has long been the practice and the obvious equitable thing to do. Would you agree that this type of expense should be paid and that nothing in the recently enacted Bankruptcy Amendments and Federal Judgeship Act would suggest a different construction?

Mr. DOLE. I absolutely agree. It is essential for the orderly and professional administration of bankruptcy cases, that creditors and creditors committees that incur reasonable and necessary expenses in their service on creditor committees be reimbursed. Nothing in BAFJA was meant to change the well-settled practice of paying necessary expenses of creditors while serving on creditors committees.●

FOREIGN TAXES ON U.S. TECHNICAL SERVICES

● Mr. CHAFEE. Mr. President, during this Congress, I have tried at various points to pass a bill which I introduced, S. 1550, to deal with the problem of the double taxation of services performed here in the United States by both the United States and foreign countries. We held hearings on this bill in the Finance Committee and I considered adding this measure to the Deficit Reduction Act of 1984. However, the Treasury Department, while recognizing the problem, has consistently opposed the solution proposed in S. 1550.

As a result, I requested that the Treasury Department do a study and report on the foreign taxation of fees paid to domestic companies for services performed here in the United States. The Treasury Department has finished this study and report which I would like to submit for the RECORD today immediately following my remarks.

The material follows:

DEPARTMENT OF THE TREASURY,
Washington, DC, October 3, 1984.

Hon. JOHN H. CHAFEE,
U.S. Senate,
Washington, DC.

DEAR SENATOR CHAFEE: I am enclosing our report on Foreign Taxes on U.S. Technical Services. I regret that, despite our best efforts, it was not possible for us to get this to you by September 30, as I had promised. I apologize for the delay and any inconvenience it may have caused you.

Sincerely,

RONALD A. PEARLMAN,
Acting Assistant Secretary
(Tax Policy).

DEPARTMENT OF THE TREASURY,
Washington, DC, October 3, 1984.

Hon. ROBERT DOLE,
Chairman, Committee on Finance, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Section 1082 of the Deficit Reduction Act of 1984 requires the Secretary of the Treasury or his delegate to report to the members of the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives on the practice of foreign countries of taxing income from services performed in the United States. The report was requested to assist the Committees in analyzing the potential international double taxation resulting from such taxes and in evaluating possible remedies, including income tax treaties with countries imposing such taxes.

In accordance with that requirement, I am transmitting the enclosed report, entitled, "Foreign Taxation of Fees Paid to U.S. Firms for U.S. Services".

Sincerely,

RONALD A. PEARLMAN,
Acting Assistant Secretary
(Tax Policy).

FOREIGN TAXATION OF FEES PAID TO U.S. FIRMS FOR U.S. SERVICES

TAXATION OF INCOME FROM INTERNATIONAL TRANSACTIONS: GENERAL RULES

There are two basic criteria on which countries rest their jurisdiction to tax income: because the recipient (beneficial owner) resides in that country or is a citizen of that country, or because the income has its source in that country. Most income is earned in the same country where the recipient (beneficial owner) resides. However, a substantial amount of income crosses international borders; that is, the income is derived in one country and the owner of the income resides in another. In such cases, there is a potential for international double taxation.

It is a widely-accepted principle that, when income is taxed both by the country of source and the country of residence, the country of residence has the responsibility to provide relief from double taxation of the foreign source income. Full relief from double taxation may be provided either by exempting foreign income from tax, or by including it in the tax base but allowing a credit for the foreign tax paid on that income. The purpose in each case is to avoid double taxation of foreign income, not to reduce the domestic tax on domestic income. (Alternatively, the foreign income may be taxed with a deduction for the foreign income tax paid; this approach provides only partial relief from international double taxation.) Under certain conditions, a foreign tax incurred in producing domestic income may also be treated as an expense deductible from the tax base.

THE U.S METHOD OF AVOIDING INTERNATIONAL DOUBLE TAXATION

The United States method of avoiding international double taxation is, in general, to include foreign source income in the tax base, but to allow a credit against the U.S. tax for foreign incomes taxes paid on foreign source income. In computing the credit, all foreign income is added together and all foreign income taxes are added together. Thus, foreign income taxes higher than the U.S. tax are averaged with those lower than the U.S. tax in calculating the foreign tax paid on all taxable foreign income. The credit claimed may not exceed the fraction of the total U.S. tax which foreign source taxable income is to total taxable income. Foreign taxes paid in excess of that limit may be carried over and used in the three preceding and five following years. The objective of the limitation is to avoid double taxation of foreign income, while preserving the U.S. tax on domestic income.

Foreign income taxes may be deducted rather than credited if the taxpayer so elects, in which case the election must be made for all creditable foreign income taxes paid in the year concerned. Foreign taxes, other than income taxes, incurred in carrying on a trade or business may only be deducted from taxable income.

The U.S. foreign tax credit mechanism provides fuller relief from double taxation than a deduction for foreign income taxes, and is more neutral between domestic and foreign source income than exempting foreign source income. The credit is not free of criticism, however. By allowing high foreign taxes to be credited against low-taxed income from other countries, it encourages tax-motivated investments in low tax countries. On the other hand, in some cases domestic losses can reduce the value of the credit. Questions also arise as to whether a particular tax should be allowed as a credit, i.e. whether it is an income tax or some other type of levy which should be treated instead as a deductible expense. In addition, if there are conflicts between the source rules used by other countries and the United States, there can be either double taxation or double exemption of the affected income.

THE "TECHNICAL ASSISTANCE TAX" PROBLEM

The problem encountered by U.S. construction firms, for which a legislative amendment was previously proposed to provide relief, arises because some foreign countries impose a tax on gross income paid to U.S. firms for design, engineering, procurement, and similar services performed in the United States on behalf of a foreign client. Such taxes typically apply to payments for all technical services, not only those related to construction activities.

Under the foreign tax credit regulations, such a foreign tax on gross income may qualify as a tax "in lieu of" an income tax under section 903 of the Internal Revenue Code ("the Code"). Therefore, it may be claimed as a foreign tax credit, even though it does not meet the criterion of section 901 of the Code of being imposed on net income. However, under the limitation, the credit claimed may not exceed the U.S. tax on foreign source income (measured as that portion of the U.S. tax on worldwide income which foreign taxable income bears to worldwide taxable income). Since, under the U.S. source rules of Code section 861, the income generated by the services performed

in the United States is U.S. source income, the credit allowed for a foreign tax on that income will only be effectively usable if the company has some other income which is of foreign source and on which it would otherwise owe U.S. tax, either in the current year or one of the preceding three years or following five years.

As noted, taxpayers may choose to deduct foreign income taxes rather than to credit them, but such an election must be made with respect to all foreign income taxes; they may not credit some and deduct others. The companies would like to deduct the foreign "technical assistance tax",* but they do not want to lose the credit with respect to other foreign income taxes.

The legislative amendment recently proposed to deal with this situation (H.R. 1609 and S. 1550) would allow U.S. companies to elect to deduct foreign taxes on income from U.S. "construction contract services" while continuing to credit other foreign income taxes. "Construction contract services" are defined in the bills as "engineering, architectural, design, project management, procurement, cost estimating, scheduling, construction planning or construction mobilization services or other services, including financial, administrative, clerical, data processing or reproduction services, which are related and subsidiary to any of the foregoing services."

This situation raises several questions, some empirical and some of principle. How big a problem is it? What do other countries do? What should the United States do? The following sections address these questions.

Magnitude of the problem

Geographical Scope

The problem arises almost exclusively in developing countries. Other industrial countries typically share the U.S. view that income from providing services in the United States (or any other country) has its source in the United States (or other country, as the case may be). They would not tax a payment by a resident of their country to a U.S. company in such a case. They would consider such income to be income from carrying on a business, and would tax it only to the extent attributable to a business carried on there. Similarly, the United States would not tax a payment by a U.S. resident to a foreign country which provided services for the U.S. resident, unless the income for those services was attributable to a business carried on by the company in the United States. Industrial countries do not tax foreign countries on their export of services, just as they do not tax them on the export of goods; the treatment is the same.

Developing countries, however, often require a local purchaser of services from a foreign supplier to withhold a tax on the gross amount of the payment. The rationale is not always clear. Sometimes it is said that the service income has its source in the country of the purchaser, it is appropriate to recover that lost revenue from the supplier. But rarely (we know of no case) does a developing country require a local purchaser to withhold tax from payments to a foreign supplier of merchandise, for which the same arguments could be made. The differential treatment of goods and of services seems to reflect in many cases a concern about large payments in individual cases to foreign service companies, such as management consulting firms. Developing countries tend to view payments under service contracts (incorrectly) as consisting mostly of profit.

The countries identified by the construction industry as imposing tax on payments for service performed in the United States were: in Europe, Spain; in Africa, Tanzania and South Africa; in Latin America, Argentina, Brazil, Chile, Colombia, Ecuador, Mexico, and Venezuela; in Asia, India, Indonesia, Malaysia and Thailand. Some of those countries claim that they distinguish between services performed for a specific client and activities which produce a property right of more general application, and impose tax only in the latter case. Argentina, for example, makes such a distinction. Some others, such as South Africa, impose a tentative withhholding tax on the gross payment but allow the recipients to file a return and pay tax on the net profit. But, in general, the list provided by the construction industry appears to be as accurate as one can be in this ill-defined area. There also appear to be other countries which impose such taxes on technical service contracts. (As noted earlier, the scope of such taxes is not limited to construction services.) Trinidad and Tobago and Sri Lanka are two which have come to our attention. In each case, of course, reference is to statutory rules in the absence of any tax treaty.

Companies Affected

The problem arises for those companies which have U.S. source income (by U.S. rules) subject to foreign tax and also have foreign source income subject to a foreign income tax as high or higher than the U.S. tax on that income. A U.S. company which has only U.S. source income, some of which is subject to a foreign tax, may deduct that tax under current law. A multinational company which has both U.S. and foreign income, including some foreign income on which the foreign tax is less than the U.S. tax, may use the credit for the "technical assistance tax" to offset the U.S. tax on that other foreign income. But companies whose only foreign income is taxed abroad in the aggregate at or above the U.S. rate cannot use the "extra" credit and may not make a selective election to deduct the technical assistance tax.

Effect on the Construction Industry

In 1983, 70 percent of new foreign contracts of the top 400 U.S. construction firms (representing over 90 percent of the total of such firms) were in the Middle East, Europe and Canada.[1] The other 30 percent were in Africa, Latin America and Asia, which accounted for 8, 6, and 16 percent, respectively, of the total new foreign contracts in 1983. We do not have figures by country. Clearly not all of the African, Latin America and Asian contracts are in countries which impose "technical assistance taxes." Nevertheless, those regions can be very roughly designated as establishing the outside limit of the problem.

The share of new contracts in Africa, Latin America and Asia dropped sharply during 1982 and 1983 as the worldwide recession deepened. It may increase as economic conditions recover. However, given the continuing economic difficulties in Latin America, it is likely that its share in new contracts was even lower in 1984. In Africa, only 8 of 43 new contracts in 1983 were in South Africa and none in Tanzania. In Asia, the U.S. firms won contracts in 20 countries in 1983, including some in those which impose "technical assistance taxes." Although these indicators are admittedly limited, they suggest that Asia is the principal area where the problem arises today.

As noted above, the problem does not occur if the company subject to the "technical assistance tax" is able to use the creidt allowed for that tax to offset the U.S. tax on other foreign income. The latest available data from tax returns pertains to 1980. At that time 69 U.S. corporations claiming a foreign tax credit reported their principal business activity as heavy construction, general building contracting, or architectural and engineering services. Of that group, 55 were able to credit all of the current (1980) foreign taxes paid (excluding carryovers from previous years) and had a net liability to the United States. The other 14 were in an excess credit position with more foreign tax paid or deemed paid currently than they would credit. For 7 of the 14 companies with excess foreign tax credits, the inability to claim the full foreign tax paid as a credit was due to a domestic loss (or in one case the recapture of a foreign loss) which, by reducing worldwide taxable income, also reduced the credit limitation. One other case is unclear; the company paid a foreign tax lower than the U.S. tax but did not claim credit for the full foreign tax paid. Only 6 of the 69 corporations paid foreign tax in excess of the U.S. tax on their foreign income. And in some of those cases the excess credit appears to be the result of foreign losses. These data would suggest that the problem is of limited impact.

The companies' likely response to such data is to point out that the true significance of the problem does not show up in their tax returns, because they are not paying foreign "technical assistance taxes" unless they can credit or deduct them. They claim that, when they cannot credit such taxes against the U.S. tax on other (foreign) income, they typically contract for the services through a subsidiary abroad in a country where the tax is deductible, and then subcontract part of the services back to the United States. Thus, they argue, the problem is not theirs, except for the inconvenience of doing part of the work abroad in some cases. We are not able to evaluate the scope of the problem based on the industry information. The companies report that there is no typical pattern in the industry and each firm's experience is individual (and protected). Therefore, they were not able to provide us with information on the overall impact of such taxes, but only hypothetical examples of specific situations that have arisen. Such examples are interesting and useful, but their usefulness is limited.

PRACTICE OF OTHER COUNTRIES

The following sections describe very briefly the method used by our major trading partners to avoid international double taxation in general and to deal with "technical assistance taxes" in particular. The references are to domestic law in the absence of a tax treaty, but special treaty provisions are noted.

France

As a general rule, French companies are not subject to French tax on their foreign earnings. Therefore, there is no foreign tax credit with respect to foreign taxes on such earnings. The exempt income is taken into account in determining the tax rate applicable to taxable income. There are two limited

*Hereafter, a reference to a "technical assistance tax" means a foreign tax on the gross fee paid by a foreign resident to a U.S. company for services performed in the United States.

[1] "Engineering News Record", McGraw-Hill Construction Weekly, April 19, 1984.

exceptions, in cases where the company requests and obtains permission to report its income on a worldwide or consolidated basis. In such cases, a credit is allowed for foreign tax on the foreign income if the Minister of Finance agrees that the foreign tax is comparable to the French income tax. If he does not grant a credit, the tax may only be deducted from the taxable income.

Income for services performed in France for a foreign client is considered to be of French source. Therefore, the income is not exempt from tax; nor is a credit allowed for foreign tax on that income. Any such foreign tax may only be deducted as an expense.

In income tax treaties with certain developing countries, France has agreed to credit a technical assistance tax subject to a treaty limit on the amount of such tax which may be imposed.

The Netherlands

The Netherlands exempts from tax certain categories of foreign income which have been subject to foreign income tax. The exempt categories are: profits of a permanent establishment or permanent representative abroad, income from foreign employment, income from foreign real property, and income from debts secured by mortgages on real property. The exempt income is taken into account in determining the rate applicable to taxable income.

Income for services performed in the Netherlands for a foreign client is considered to be of Dutch source. It is subject to tax, and any foreign tax on that income is only a deductible expense.

Tax treaties concluded by the Netherlands generally provide that income from services performed in the Netherlands may not be taxed by the other country, except to the extent attributable to a permanent establishment or fixed base in the other country, and then on a net basis. As an exception, the treaty with Australia (Article 12(3)) treats as royalties payments for "assistance of an ancillary and subsidiary nature furnished as a means of facilitating the application or enjoyment of scientific, technical, industrial and commercial knowledge".

Switzerland

Under Swiss law, profits earned through a permanent establishment abroad and income from real property situated abroad is exempt from Swiss tax. Swiss companies are taxed on their other income, domestic and foreign. There is no foreign tax credit; foreign income taxes are treated as a deductible expense. (In tax treaties a credit may be allowed for foreign taxes on dividends, interest, and royalties.)

Thus, income for services performed in Switzerland for a foreign client is subject to Swiss tax net of any foreign tax on that income.

Tax treaties concluded by Switzerland generally provide that income for services performed in Switzerland may not be taxed by the other country, except to the extent attributable to a permanent establishment or fixed base in the other country, and then on a net basis. However, the treaty with Trinidad and Tobago authorizes that country to impose a tax of 5 percent of gross "management charges" (payments for management, professional, personal, and technical services) for which Switzerland agrees to provide relief from double taxation by means of either a credit or a deduction. A similar provision is included in their treaty with Sri Lanka, which is not yet in effect.

Japan

Japan uses a foreign tax credit mechanism to avoid international double taxation. The Japanese credit is patterned on the U.S. credit, and, like ours, is limited to the domestic tax on foreign source income computed on an aggregate or "overall" basis.

Income for performing services in Japan is considered to be of Japanese source. Thus, it is subject to Japanese tax. A foreign tax credit is allowable, but only against foreign source income. Foreign taxes may be deducted rather than credited, but we are advised that, as in the United States, the election must be made on an overall basis.

A special measure permits Japanese companies to deduct from their taxable income 16 percent of the net income for technical services related to the construction of plan or equipment, or specified technical services related to agriculture, or fisheries, or surveys in exchange for foreign currency under service contracts of more than a specified amount. The deduction may not exceed 40 percent of the company's taxable income.

There are no special treaty provisions with respect to technical assistance taxes. The general rules prevail; such income derived by a Japanese company is taxable only in Japan unless attributable to a permanent establishment or fixed base in the other country, and then on a net basis.

Canada

Canada avoids international double taxation through a foreign tax credit mechanism in the case of "business income" and through a combined use of credits and deductions in the case of "nonbusiness income". Unlike the credits granted by the United States and Japan, the Canadian credit is not applied on an overall basis, but, credit is limited to the Canadian tax on each of these two types of income, country by country.

Income for services performed in Canada is considered of Canadian source. A foreign tax on such income is treated as a tax on nonbusiness income, and may be credited against Canadian tax on foreign income or deducted from taxable income, at the election of the taxpayer.

The United Kingdom

The United Kingdom grants a foreign tax credit to avoid double taxation. Credit is allowed for foreign income taxes on foreign source income. The United credit is limited to the United Kingdom tax on the same type of income, country by country.

Income for services performed in the United Kingdom for a foreign client is considered to be of United Kingdom source. Therefore, no credit is allowed for any foreign tax paid on that income. Such a foreign tax may, however, be deducted in computing the taxable income subject to United Kingdom tax.

In treaties with developing countries, the United Kingdom will agree to credit technical assistance taxes if the other country reduces its rate to a level which approximates a reasonable tax on the net profit element of such fees (e.g., a gross withholding tax of 5–7 percent).

Germany

Germany also uses a foreign tax credit mechanism to avoid international double taxation. Credit is allowed for foreign income taxes on foreign source income. The credit is limited to the German tax on foreign source income calculated country by country.

Income for services performed in Germany for a foreign client is considered to be of German source. Therefore, any foreign tax on such income is not allowable as a credit. Prior to 1980, German law did not even allow such taxes to be deducted from taxable income.

There are no special treaty provisions with respect to technical assistance taxes. The general rules prevail; such income derived by a German company is taxable only in Germany unless attributable to a permanent establishment or fixed base in the other country, and then on a net basis.

Summary

In short, while the methods of avoiding international double taxation used by our principal trading partners vary, there are some common elements in their treatment of technical assistance taxes. For example, there is a common consenses that the source of income from performing services is where the services are performed. In general, the deductibility of technical assistance taxes is the result of such taxes not being allowed as a credit, rather than of a bilateral option afforded the taxpayer. In tax treaties with developing countries, a reduced technical assistance tax may be accepted as a creditable tax as part of an otherwise satisfactory package of provisions.

POSSIBLE REMEDIES

When a foreign country taxes income derived by a U.S. resident for services performed in the United States, double taxation may result, because the United States will also tax that income and the credit allowed for the foreign tax may not be fully usable. There are three possible solutions to this problem. The foreign country can unilaterally provide relief by giving up its tax. The United States can unilaterally provide relief by increasing its credit limitation or allowing a deduction for the foreign tax. Or, the two countries can jointly provide relief through a tax treaty provision. These possibilities are discussed below.

Unilateral relief by the foreign country

It is the universally accepted norm that a country should tax the income of nonresident aliens and foreign companies only to the extent that the income has its source in that country or is connected with business activity carried on there by the nonresident. Among industrial countries, as illustrated above, it is the accepted norm that income from furnishing services is a business profit which has its source where the business activity is carried on.

These norms are incorporated into the model income tax treaty to avoid double taxation published by the Organization for Economic Cooperation and Development and the U.S. model income tax treaty. The same norms appear in the model draft income tax treaty published by the United Nations. The United Nations model was designed especially for negotiations between developed and developing countries by representatives from both groups of countries.

In all three model income tax treaties, income derived by a resident of one country for furnishing technical services to a client in another country may be taxed by the latter country only if, and to the extent that, the income is attributable to a business carried on through a "permanent establishment" or "fixed base" (e.g. office) there. If the services are performed entirely in the first country, the other country may not tax the resulting income. Even if the services are performed in the latter country, all three models provide that the income may not be taxed there unless the employer

has a permanent establishment in that country and the services are connected with that establishment. The U.N. model provides a special rule, that a company is deemed to have a permanent establishment in a country if it furnishes services in that country, but only if the services are carried on within that country for more than six months in a twelve-month period. In all three models, it is the net income, not the gross income, which is taxed.

Thus, consistency with internationally-accepted standards of taxing nonresidents puts the responsibility for eliminating the double taxation created by "technical assistance taxes" on the countries which impose such taxes.

Unfortunately, the countries which impose such taxes are often not willing to provide general unilateral relief. They may reject the source rule; they may be concerned that foreign companies which owe tax may evade it if any exceptions are made to taxing all such payments abroad; they may want to discourage such purchases; or they may simply be unwilling to give up the revenue. The revenue argument is less persuasive when the foreign government is the purchaser, if, as the companies claim, they gross up their price to cover the tax. For example, a contract price of $100 free of tax becomes $133 if there is a 25 percent tax imposed. In such cases a foreign government may waive the tax to reduce its cost, but it is unlikely to do so for all purchasers.

Unilateral relief by the United States

If the country imposing a "technical assistance tax" refuses to provide relief, a possible alternative is for the United States to do so. Either the source rule could be changed to treat all or part of the income subject to the "technical assistance tax" as foreign source income, or the income could continue to be treated as of U.S. source but with the foreign tax allowed as a deduction from the tax base.

Changing the Source Rule

In the cases under consideration, the economic activity giving rise to the income takes place in the United States, not in the country imposing the tax. One could take the position that the income depends, in part at least, on there being a foreign purchaser, and, therefore, the income arises partly in the foreign country. However, this would be contrary to international and U.S. standards; the Treasury Department would oppose such a sharp change in U.S. tax policy. It would imply that it is appropriate for any country to tax the income derived by nonresidents from exporting any good or service to its residents, even if the exporters have no other connection with that country.

There is no reason to provide a special source rule only for services related to construction projects, and doing so would give rise to definitional disputes. If the source of income depends on the residence of the purchaser of construction services, it should logically be the same for any service—and any merchandise. Thus, all exports of U.S. goods and services would give rise to foreign source income. Ceding our tax base to other countries in such a manner would be unacceptable in principle and costly in terms of revenue. It would also be disruptive of international trade.

Royalties for the use of a right or property are considered to have a source in the country where the right or property is used or, in some cases, where the payer resides. It can be argued that engineering and design services create a property, the payment for which amounts to a royalty. In some cases that is true. Furnishing pre-existing technical knowledge, such as blueprints for standardized buildings, to any customer purchasing a copy represents income from property rather than services. However, under U.S. tax rules, a payment for designing a building for a specific customer is considered income for services rendered. No doubt there are cases where the line is not clear, but the principle behind the distinction is clear and widely accepted.

If the existing U.S. source rule is correct, as we believe it is, changing it would encourage other countries to continue and perhaps expand a practice which should be discouraged. it would also create an additional pool of foreign source income in countries which do not impose technical assistance taxes. Under our overall limitation, excess credits on income from unrelated foreign activities could be used to offset that additional foreign source income. Perhaps the spillover to other foreign taxes could be avoided by creating a separate "basket" of income from services performed for foreign residents and restricting the credits which may be used within that basket of income to foreign taxes on the same income. However, that would involve added complexity in the taxation of international transactions, an area where the rules are already exceedingly complex. And it would not address the basic objection to encouraging such "technical assistance taxes."

Allowing a deduction for foreign taxes on U.S. source income

We oppose allowing taxpayers the option to deduction taxes on "construction contract services" on a selective basis while crediting other foreign income taxes, for the same reasons that we oppose a statutory change in our source rule. We believe our source rule is correct. Consequently, we believe that "technical assistance taxes" are overreaching and should be discouraged, not encouraged.

We do not see a basis for permitting one industry to decide which taxes it will deduct or credit, while denying that option to other industries, which may perform the same or similar services. The proposed bill defines services very broadly to include purchasing, accounting, computer processing and legal services, but restricts the deduction option to such services related to a foreign construction project. Why are accounting or computer services performed in connection with a foreign consulting contract different? Yet, if the option were broadened to include foreign tax on any U.S. service income (or any U.S. source income from any activity), not only would we be condoning—and thereby encouraging—such taxes, we would also be changing the basic purpose of the foreign tax credit. Moreover, by structuring their activities appropriately, companies might be able to credit foreign income taxes up to the limitation and deduct the excess from their U.S. tax base.

As described earlier, the deduction allowed by some of our trading partners for technical assistance taxes is generally not a special concession to the construction industry, but a partial relief from double taxation for foreign taxes which may not be credited. The income derived by residents of France, Germany, the Netherlands, Switzerland and the United Kingdom from performing services domestically on behalf of foreign clients is subject to tax in those countries, and no credit is allowed for any foreign tax on the fee received. The foreign tax is treated as a deductible business expense. There is no election to credit the foreign tax if doing so would provide greater benefit.

The U.S. foreign tax credit regulations, published in proposed form in June 1979 and in revised but still temporary form in November 1980, held that a foreign tax on the gross business income of a U.S. resident was not a creditable tax, because it was not imposed on net income. Nor could it be credited as a tax "in lieu" of an income tax, as it was not considered to be a substitute for the income tax otherwise generally applicable. Those regulations confirmed the position taken by the Internal Revenue Service in a 1978 ruling with respect to a 20 percent tax imposed by Tanzania on the gross amount of management and professional fees paid to nonresidents not engaged in business in Tanzania (Rev. Rul. 78-234, 1978-1 CB237.) The Tanzanian tax was held not to qualify for a foreign tax credit in the United States, because it did not allow deductions for the expenses incurred in deriving that income.

The final foreign tax credit regulations, published in October 1983, retain the basic requirement that, to qualify as an income tax eligible for the credit allowed under Code section 901, a foreign tax must be imposed on net income after deductions for significant business expenses. However, they reversed the 1978 ruling and the prior proposed and temporary regulations in taking the position that gross withholding taxes, although not income taxes under section 901, may qualify as taxes "in lieu of" an income tax under section 903. The regulations also take the position that such a substitute tax need not be imposed on net income or even bear any relation to income.

Thus, ironically, it is the more liberal position taken in the final regulations, which allow such taxes to be credited as taxes "in lieu" of the generally applicable income tax, which creates the problem for certain members of the construction industry. Under the earlier versions of the regulations there would have been no need for the industry's legislative proposal. "Technical assistance taxes" would have been deductible expenses, without jeopardizing the credit for foreign income taxes on foreign income. (The difference, of course, is that the deductibility of "technical assistance taxes" would have been the general rule, not an option which the taxpayer could exercise selectively. Thus, some other members of the construction industry would have been worse off than under the current rules.)

The "technical assistance tax" problem raises again the question whether such taxes should be creditable or only deductible expenses. The Code does not require that a foreign tax be imposed on foreign source income to qualify for the credit. The only requirements are that the tax either be imposed on income (meaning realized net income) or that it be imposed in substitution for the income tax generally applicable in that country. The latter category encompasses a broad class of taxes which need not bear any relation to income.

If Code sections 901 and 903 provided that a foreign tax on income for services performed in the United States were not creditable, such a tax would be a deductible expense under section 275, without prejudicing the use of credits for foreign taxes on foreign income. That is the approach taken by Germany, which amended its rules in 1980 to permit a deduction for such noncreditable taxes. At that time the United States also considered such taxes non-creditable, although not, as in the German case, because they were imposed on domestic

income, but because they were imposed on gross income. Consequently, such taxes could only be deducted. Subsequently, our change in regulations to allow a credit for technical assistance taxes benefited some U.S. service companies (those with low taxes foreign income from other activities) but hurt others. Since we believe the final regulations are consistent with the language of the statute, any further change would have to be addressed by a legislative amendment.[2] Any change to make such taxes deductible but not creditable would, of course, be opposed by taxpayers able to use the "extra" credit.

Alternatively, the issue could be addressed through the foreign tax credit limitation. Code sections 901 and 903 provide which foreign taxes may be credited (those paid on income or in substitution of a tax on income). Code section 904 is designed to preserve the U.S. tax on U.S. income by limiting the amount of credit which may be used in any given year to the U.S. tax on foreign source income. Beginning in 1976, the limitation has been determined on an "overall" basis. All foreign source income is aggregated and all creditable foreign taxes may be credited against the U.S. tax on that income. There is no linkage of the credit claimed for income tax paid to a particular country to the U.S. tax on income from that country. Income is either U.S. or non-U.S. income, with all foreign income lumped together. Consequently, the taxpayer's election to either credit or deduct creditable foreign taxes also applies on an overall basis.

If we used a country by country ("per-country") credit limitation, as do Canada, France, Germany, the Netherlands and Switzerland, it would be consistent to also allow the election to deduct or credit foreign income taxes to be made country by country. Some countries further limit their foreign tax credit, for example to domestic tax on business and non-business income within each country, as in Canada, or to the same class of income subject to domestic tax, as in the United Kingdom. In such cases, it may be appropriate to provide an election to deduct or credit on that same basis.

As noted earlier, the legislative proposal to allow taxpayers to elect to deduct technical assistance taxes cannot appropriately be limited to the construction industry. To an even greater extent, either changing the standards of creditable foreign taxes or changing the limitation on the foreign tax credit would have effects on many taxpayers, not only those seeking legislative relief from foreign technical assistance taxes. Accordingly, it is important in evaluating any potential remedy to the technical assistance tax problem to consider also the impact on other U.S. taxpayers and on U.S policy.

Any deduction from U.S. income for a foreign tax, whether under current law or any alternative approach which allows such a deduction, raises a further concern about the extent to which that deduction should be permitted to reduce the domestic U.S. tax base. If the deduction for a foreign tax on U.S income is not limited to that same income there is a risk that the taxpayer may be able to use such losses to reduce U.S revenues at no cost to the taxpayers.

For example, assume a U.S. firm receives a fee from a foreign client of $100 for services performed in the United States and its profit on that amount is $15 (i.e. $85 was to cover costs). If the foreign tax were $15, it would reduce the U.S. tax on this activity to zero. However, if the foreign tax were $25, under the legislative proposal the other $10 could be U.S. income. A U.S. company performing more than one item of income from the foreign client might be willing to operate at a loss in one activity (by paying a foreign tax in excess of the profit margin), reduce the U.S tax base by the amount of the loss, and then recover the loss by making a higher profit on another foreign activity not subject to U.S. tax (either by being conducted through a foreign subsidiary which does not remit the profit to the U.S parent or through the availability of foreign tax credits). An example of how this might occur is given in Tab A. One way to deal with this is to allocate the "excess" deduction for foreign taxes to foreign income. In the example given, after applying the $15 to reduce to zero the income from the U.S. services performed for the foreign client, the other $10 would have to be deducted aganist foreign income, if any, before it could reduce U.S income from other activities.

In the construction industry, we are told, this situation does not occur, because the charge to the foreign client is grossed up to cover the foreign tax, and thus the foreign tax never reduces the U.S. tax base. That may be the common practice in other service industries as well. Nevertheless, the issue deserves to be considered in evaluating any proposal to allow such a deduction.

Bilateral relief through tax treaties

In treaties to avoid double taxation of income, each country departs from its statutory practice to improve the climate for economic relations between investors and individuals of the two countries. The treaties cover income from business, investment, and employment in a wide range of activities. The concessions made seek an overall balance, but need not be reciprocal on any given item. For example, a developing country may be willing to reduce tax on certain income derived by U.S. investors in exchange for reduced U.S. taxation of its residents who come to the United States for training.

In such a treaty, a country imposing a "technical assistance tax" may be willing to give up that tax in exchange for other concessions it wants from the United States. Or, if it is unable to agree to waive the tax completely, it may be willing to reduce it or to impose it only on net income; and the United States may agree to treat the U.S. income as foreign source income to the extent necessary to avoid double taxation. Changing the U.S. source rule on certain transactions in a treaty can be justified as a concession to obtain concessions of equal value from the other country. It can also be more easily monitored.

Negotiation of a tax treaty, especially with a developing country, is time consuming, and it is not always possible to reach an agreement. The treaty solution to the "technical assistance tax" problem is admittedly a long-run solution. However, progress is being made in several instances. The United States has treaties in effect with some of the countries which impose "technical assistance taxes", and negotiations are in an advanced state with others.

Income tax treaties now in effect with Egypt, Jamaica, Korea, Malta, the Philippines, and Trinidad and Tobago prohibit the imposition of tax by those countries on profits derived by a U.S. company not attributable to a fixed place of business through which the company operates in those countries (a "permanent establishment"). Once a permanent establishment exists in the other country, the profits attributable to it may be taxed by that country, but the tax must be imposed on the net profit after expenses.

The treaties with Egypt, Jamaica, Korea, and Trinidad and Tobago explicitly define business profits to include income from furnishing the services of others. The treaties with Malta and the Philippines contain a shorter form of the profit definition, but income from providing services is implicitly covered. For example, the treaty with the Philippines states that a U.S. taxpayer will be considered to have a permanent establishment in the Philippines if it furnishes services in the Philippines through personnel who work there for more than 183 days. (The Jamaican treaty has a similar rule but with a 90-day limit.) The Malta treaty includes a limited amount of technical services as royalty income (assistance "of an ancillary and subsidary nature supplied as a means of enabling the application or enjoyment of such know-how or any other property or right" giving rise to a royalty). By implication, other services are considered to give rise to business profits or income from independent personal services, as is confirmed in the technical explanation of the Malta treaty.

In each of these treaties, payments for information concerning industrial, commercial or scientific experience (know-how) are treated as royalties, but such know-how, unless specifically stated otherwise, is understood to mean pre-existing knowledge, not services for a particular client. The official commentary on the OECD model, which is repeated in the U.N. model's commentary, describes the difference as follows.

"In the know-how contract, one of the parties agrees to impart to the other, so that he can use them for his own account, his special knowledge and experience which remain unrevealed to the public. It is recognized that the grantor is not required to play any part himself in the application of the formulae granted to the licensee and that the does not guarantee the result thereof. This type of contract thus differs from contracts for the provision of services, in which one of the parties undertakes to use the customary skills of his calling to execute work himself for the other party. Thus, payments obtained as consideration for after-sales service, for services rendered by a seller to the purchaser under a guarantee, for pure technical assistance, or for an opinion given by an engineer, an advocate or an accountant, do not constitute royalties within the meaning of paragraph 2. Such payments generally fall under Article 7 or

[2] The 1979 and 1980 regulations denied credit for foreign taxes on gross income from services, not because they were imposed on U.S. source income (the statute contains no such condition), but on the grounds that they were not: (a) imposed on net income, or (b) imposed in substitution for the tax on net income. At the same time, those regulations allowed credit for foreign withholding taxes on gross dividends, interest and royalties; to deny credit in such cases would be inconsistent with U.S. law, which also imposes such taxes. To distinguish the two cases, the regulations took the position that there is little expense associated with dividend, interest and royalty income, so that a tax on gross income is effectively on net income. In our view, that is a difficult position to uphold. The final regulations instead view foreign taxes on gross income, whether from services, business, or investment, as taxes "in lieu of" an income tax and allow credit on that basis for all such taxes under Code section 903. It would not be appropriate in regulations to distinguish on the basis of source. If source is to become a criterion of creditability, a legislative amendment would be needed.

Article 14." [concerning business profits or self-employment income].

The tax treaty with Morocco prohibits Morocco from imposing a "technical assistance tax" except with respect to payments by the Government of Morocco for technical studies for governmental use; in that case, Morocco may impose a tax of not more than 10 percent of the gross payment, and the United States agrees to treat such payments as of Moroccan source (See paragraph 3(c) of Article 12 and paragraph 3 of Article 5 of the U.S.-Morocco income tax treaty.) Payment for technical assistance which is accessory to the use of a property right, such as a patent, trademark, process, etc., may also be taxed by Morocco as a royalty, subject to the 10-percent maximum rate, but only if the services are performed in Morocco.

The income tax treaty with South Africa does not prevent the imposition by South Africa of a "technical assistance tax." That treaty was signed in 1946 and does not conform to more recent models.

Treaties with China and Cyprus now before the Senate for its advice and consent to ratification would provide relief from such taxes.

Negotiations of income tax treaties with Indonesia and Thailand, countries identified as imposing "technical assistance taxes", are in an advanced state, as are negotiations with Sri Lanka. A tax treaty with each of these three countries may be signed as early as 1985.

We hope to expand our income tax treaty network to include treaties with many more developing countries. While the tax treaty program may not provide immediate relief, we believe the bilateral approach it offers represents the best way to deal with such foreign taxes. Therefore, if the United States is to offer relief from foreign technical assistance taxes, our strong preference is to do so through an income tax treaty with the foreign country.

Tab A. Illustrative example to demonstrate reason for limiting application of a deduction for technical assistance taxes.

An industry-prepared analysis of H.R. 1609, provides an example of a construction company operating in a foreign country (which we shall refer to as country X) which levies a 30 percent technical assistance tax on gross billings for design work done in the U.S. Although not noted in the example, let us suppose that the same company supervises the actual construction in country X, and that the net income from such supervision is taxed at a 46% rate under country X's income tax. Using the numbers provided in the analysis (P.5) for the design work, and assuming, $200 in gross billing for supervision and $100 in supervision expenses, the results, under the assumption of the example, are as follows:

Design work (performed in United States)

Billings	$100
Foreign tax gross up	43
Costs	(90)
H.R. 1609 deduction	(43)
Pre-tax profit	10
U.S. tax	4.6
Net profit	5.4

Total U.S. tax equals $4.6; total net profit equals $59.4.

Supervision (performed in country X)

Billings	$200
Costs	(100)
Pre-tax profit	100
Gross U.S. tax	46
Foreign tax credit	(46)
Net U.S. tax	0
Net Profit	54

Suppose, however, that instead of asking the client to pay $143 for the design work, as assumed, the client is only billed $100. However, upon obtaining the supervision contract, the client is billed $243 (so the total bill to the client in both cases is $343).

The results in this case are as follows:

Design work (done in United States)

Billings	$100
Costs	(90)
H.R. 1609 deduction	(30)
Pre-tax profit	(20)
U.S. tax	0
Net profit [1]	(10.8)

[1] It is assumed the $20 pre-tax loss can offset $20 of other U.S. source income, thus yielding a net loss of only $10.80.

Total U.S. tax equals ($9.2) equals U.S. loss in revenue; total net profit equals $66.4.

Supervision (done in country X)

Billings	$243
Costs	(100)
Pre-tax profit	143
Gross U.S. tax	65.8
Foreign tax credit	65.8
Net U.S. tax	0
Net Profit	77.2

Note that in this case there is a U.S. revenue loss, and the net profit to the company is increased by $7, despite the fact that the foreign tax rate on the supervision activities was assumed to be higher than the technical assistance tax rate. Note also that by charging less for the design work (although correspondingly more for supervision), the U.S. construction company may be able to solicit more business than it might otherwise. In other words, there may be both business and tax reasons for structuring the activities in this fashion.●

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Without objection, it is so ordered.

SEPTEMBER UNEMPLOYMENT

Mr. BYRD. Madam President, there are more and more signs that the recovery is running out of steam when many Americans have yet to recover from the last recession. At 7.4 percent, September's civilian unemployment rate shows virtually no improvement from last month's 7.5 percent. The number of Americans at work is little changed while the number employed in manufacturing took a statistically significant fall. Today's unemployment figures are further confirmation that the rapid gains of the past year are over. The unemployment rate has been essentially stuck at or around 7.5 percent since May.

Last week, the economic indicators rose an anemic one-half of 1 percent. The revised figure for June still showed decline—although at a drop of 1.1 percent there was a slight improvement over the initial figure of 1.3 percent. Revised figures for July, however, more than doubled the decline shown by the initial report—dropping 0.8 percent to 1.8 percent. Even the slight rise in the August indicators must be kept in perspective. Only a sharp rise in stock prices kept the August indicators from actually turning downward as it did in June and July.

The stagnating unemployment rate and the downward drift of the economic indicators are only two of many signs that the recovery is slowing. Production, sales, income, and growth—the "Four Horsemen of Prosperity"—are all running at a slower pace. Growth fell from 7.1 percent in the second quarter to 3.6 percent in the third quarter. At 3.6 percent, Madam President, we will barely be able to take care of the young people who are entering the labor market in search of their first job.

Madam President, bad news is never welcome. But what is particularly disturbing to me is that the economy is slowing down when there is so much work still undone. At the roughly, 7.5 percent unemployment rate we have experienced since May, the economy is just where it was when President Reagan came into office. We started in a valley, got pushed off a cliff by the Reagan recession, and have just recently made it back to the same valley. Behind the unemployment rate stand 8.5 million Americans who are looking for work and cannot find it—450,000 more than when the President came into office—5.5 million Americans who are working part time because they cannot find full-time jobs and 1.2 million discouraged workers who want jobs but have simply given up looking.

It has been a very uneven recovery, Madam President. In my own State of West Virginia, the July unemployment rate—the most recent available—was 14.5 percent. Hardly the good news that ought to come with national economic health. Pennsylvania and Michigan still have unemployment that is in double digits.

What we have, Madam President, is a fragile recovery built on borrowed money. Our present is still burdened with too much double-digit unemployment. Our future is threatened by too many triple-digit deficits. I for one, Madam President, will not be satisfied until all of America is back and back to stay.

RICHARD HATHAWAY, THE SOCIAL WARRIOR

Mr. LEAHY. Madam President, some things seem especially natural in Vermont. Town meetings in the spring, foliage at this time of the year, and Vermont auctions at any time.

One of Vermont's best-known auctioneers is Richard Hathaway of Montpelier.

Going to an auction with Dick Hathaway as auctioneer is worth the trip, whether you go intending to buy or not—but after watching this enormously talented individual, you will not be able to resist the temptation to buy.

I was delighted to see an article in the Sunday Rutland Herald about Richard Hathaway, written by one of Vermont's best writers, Tom Slayton.

I ask unanimous consent that the article be included in the RECORD at this time.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Sunday Rutland Herald and the Sunday Times Argus, Sept. 23, 1984]

RICHARD HATHAWAY, THE SOCIAL WARRIOR

(By Tom Slayton)

Richard Hathaway, historian and auctioneer, arrives at the annual Washington County Democratic Auction ready for another struggle against the forces of darkness.

Although he doesn't like to admit it, he knows there is a category of auction known as the "Democratic auction." It bears the same relationship to most auctions that porch sales bear to the collectibles on an antique "shoppe's" front porch.

Most of the items in a classic Democratic auction are small and many are castoff. A few are downright shabby.

Hathaway, a lifelong Democrat himself, loves the party for its championing of the underdog, but has mixed feelings about Democratic auctions. They are hard work for the auctioneer, who happens to be him.

Like all auctioneers, he knows it's easier to raise money with large, attractive items than with smaller ones of marginal value. Large items before the right crowd almost sell themselves. Small items must be sold and sold hard.

But Hathaway has never turned away from auctions just because they might be difficult. Although they mean between four and eight hours of almost non-stop banter and leave him flat-out exhausted, he seems to relish them.

The reason? Richard Hathaway is a man with a mission. A scholar, to be sure. But also a cosmic clown with a heart of gold and a talent for moving merchandise.

And after all, the forces of darkness are there to be opposed.

"You see, what I do has a kind of housebroken prophetic nature," he says. "You might call it using the tongue as a lever for social change."

Hathaway, a Montpelier resident and Vermont College professor, donates his services as a witty auctioneer to about two dozen groups throughout the state every year. The poor, the elderly, the handicapped are always among the people for whom he raises money. So are the American Friends Service Committee, a central Vermont Quaker meeting, and, of course, the local Democrats. His causes tend to bunch at the liberal end of the political spectrum.

"If you want to be weepy-dreepy about it, you could say I'm clothing the naked, feeding the hungry." he says, then smiles his most recondite smile. "What it really amounts to is that each group I work for has to pass a socio-political ton-test.

Hathaway combines the auctioneer's street savvy with the eclectic intellect of a trained academic generalist and the verbal skills of a natural stump-orator. He is an intellectual salad bar, stocked with greens and condiments from a lifetime of reading, his many disparate influences united under the dressing of a richly associative mind—and a fast tongue.

It's his combination of erudition and blather that enables him to hold aloft a globe lamp trimmed with long hanging strands of green beads and declare to the bidding audience: "This is mildly seductive in a light breeze . . . but in a high wind, it's positively pornographic."

His gift allows him also to describe a plastic case for Star Wars figurines as: "A mechanistic, post-industrial fantasy item," and then include as part of the item "some pre-industrial, anthropomorphic Mickey Mouse stationery . . ."

His freewheeling approach also turns a cymbidium orchid into "an iris that's gone Episcopalian" and sees ginseng tablets as "a placebo for intellectuals." He describes Woodstock, VT., as "a wholly owned subsidiary of the Rockefeller family" and then introduces a series of environmentalist elders to their annual banquet with the comment: "We now come to what theologians would call the sanhedrin period of the evening . . ."

The Democratic auction shows Hathaway at his most typical: wringing cash for a cause out of a crowd with his haranguing wit, and making them love the process of parting with their money.

"The definition of Vermont is August plus an auction," he says. "So we're on the gateway to heaven."

Early in the auction, he grabs an old-fashioned wooden lawn chair.

"This is not your basic Zayre's plastic wilt-in-the-dark lawn chair," he says, adding a sonorous ring to his voice:

"This . . . is a statement of quality."

The statement of quality brings nearly $30—not bad for a lawn chair.

He hoists a slightly bent three-tiered glass candy dish, which he notes has "a tower-of-Babel slope," adds a jar of zucchini relish, and says "you can spread the relish on the dish and be accounted somewhat unique in Washington County."

The two items sell for about $4, more than either would have brought alone—or without the joke.

A prayer plant, small, green and suppliant, is brought forward.

"At night, when the Republicans come out," Hathaway explains, "the leaves fold up into a prayer-like attitude. It was designed by Albrecht Durer about five centuries ago . . . the plant that prays together . . ."

The plant having netted several dollars, a Havahart moustrap is next. He's intrigued by the trap's ability to catch the mouse alive, calls it a trap for "hemorrhaging-heart liberals" and explains: "You catch the mouse. You take it to another jurisdiction and let it go. And it takes at least three hours for it to find its way back into your house again."

An elderly typewriter comes on the block, and Hathaway hurriedly describes it as "hand-hit." Someone corrects him, noting the typewriter is properly called "a manual." And again, Hathaway is off: "A manual . . . Emmanuel . . . Wait! Emmanuel is another name for . . . it's a religious typewriter! Use it to proclaim the virtue of evangelical Protestantism . . ."

Just before it sells, he adds: "It's really a very nice typewriter. And you can always use it as a door weight if it doesn't work."

Religious references find their way quite often into Hathaway's humor, and he thinks of the auction form itself as a secular counterpart to the religious revival meeting.

"It's a kind of holy roller worship," he explains: "The auctioneer is the minister; the audience is the congregation; the patter can be either the Catholic incantation or the Protestant hymns.

"The moment of grace is when you convert someone from a bystander to a bidder, salvation is getting the item and penance is when you can't pay for it."

At 50, Hathaway is living proof that intellectuals can successfully work in the marketplace's hurly-burly. Born in Boston, educated at Bates College and transplanted from Bowdoin to Goddard College 20 years ago, Hathaway found his way to his auctioneering hobby by instinct.

He got his start in 1967 when auctioneer Walter Flatow of Waterbury Center offered him the gavel while Flatow took a 45-minute break at a Barre auction. It was love at first bid, and Hathaway began doing small benefit auctions for Goddard's Adult Degree Program. Other, larger auctions followed, his skills developed and for years his summers have not been his own.

After about a decade of practice, he's now state-licensed, a competent professional auctioneer with an intimate understanding of the dynamics of the craft.

"I have to admit to being naturally verbal," he says. "I talk for a living."

In addition to doing small-scale auctions for local aid-to-the-elderly programs and day care centers, he has overseen the national auctions of the American Historical Print Collectors' Society and this year raised more than $6,000 for the American Friends' Service Committee, a Quaker social action group, at its annual benefit auction in Burlington.

Other major auctions take him to virtually every part of the state and beyond, but he remains faithful to his earliest causes and still conducts regular benefit auctions—preceded by homemade omelets—for the Goddard Adult Degree Program, now run by Vermont College.

In all, that makes about 20 auctions per year, almost all of them at no charge to the sponsoring organization.

Now an expert, he knows the structure of a bidding afternoon as well as the williest cattle auctioneer, can quickly spot the standard bidding types and prod them to action with a well-chosen word or two.

The first hour of any auction, he knows, is warm-up. Hours two through five are prime time, when bids are best and the top items must be sold. Finally, in the last hour, come the remnant items and the lowest bidding. It's the time Hathaway refers to as "the gleaning."

The Democratic auction has finally reached that point.

"We're nearing the last sequence of this afternoon," he announces. "Are you ready for the 36 cans of housepaint, some of which go back to the administration of Wil-

liam McKinley? At least 30 percent of those cans are Unitarian-Universalist."

The paint sells, and the auction is over.

The Washington County Democrats are nearly $700 richer, and Hathaway is hoarse and tired. He drives home, recuperates on a sofa, and thinks about the meaning of it all. Why does he do this?

Having grown up a Baptist, with a strong Protestant impulse to witness to his beliefs in the world-at-large, may have something to do with it.

"It's egomania plus performance, but there has to be a social purpose served or it's no fun," he says. "I'm a latent manichaean, and the forces of darkness are always warring with the forces of light."

NO MORE SECRET HOLDS

Mr. EXON. Madam President, the Senator from Nebraska, for the last two evenings, has been on the floor in anticipation of consideration of S. 1407, that was reported out of the Commerce Committee after extensive hearings—it is on the calendar as item No. 952. I have run into a typical snag that I think frustrates other Senators from time to time. We talk about changing the rules of the United States and allowing the free exchange of information and eventually coming to rollcall votes if necessary, or voice votes, if that is possible. I object once again to the continuing interruption of the legitimate considerations of this body by oftentimes secret operating, usually—usually, I emphasize—by strong influenced special-interest groups—in this particular case, some of the large automobile companies of this Nation. I shall not mention their names at this time, but I might mention them at some other time.

The measure I am talking about we cannot get clearance on, after we thought we had clearance on numerous occasions, because of the fact that around these Halls and around these Senate offices today there are lobbyists working behind the scenes. There is a hold on S. 1407, Calendar No. 952, and this Senator cannot even find out which Senator or the staff of which Senator has placed a hold on that bill.

Madam President, I understand that everybody should have a right to enter objections, but I think the matter of an individual Senator, whether on this side or the other side of the aisle, placing holds on someone else's bill in secret thwarts the processes, the legitimate democratic processes, of this body We have felt, myself as a sponsor and Senator DANFORTH of the Commerce Committee, with whom I worked very closely on this—we talk about crime and we are in the process now, hopefully, if we can get the conferees to agree on the continuing resolution, of doing something about crime in this country. One of the largest and fastest growing crimes in this country is the network that has allowed the rolling back of odometers that is costing the used car buyers of this Nation, the consumers, billions and bilions of dollars.

We have a measure here that would go a long way toward correcting that.

I simply stand on the floor of the Senate this evening, Madam President, and object to some of the procedures that are being increasingly used to block legislation. I do not mind objections to any legislation that I introduce by one of my colleagues if they will stand on the floor of the U.S. Senate and say, "I object for this reason and this reason and this reason." But the facts of the matter are that the reason some of the major motor companies of this Nation do not want this measure passed is not the objections that they have to that part of the bill that was put together by this Senator. No; rather, they are aiming their opposition at an amendment to that bill that was approved in the Commerce Committee, introduced by the Senator from Missouri [Mr. DANFORTH]. That simply said that the major automobile companies should develop a tamper-proof odometer on automobiles. But the major automobile companies are afraid, you see, that that might cost them something. So what they are doing and have done very effectively is, through the contacts that they have with some staff member, evidently on the staff of one of my colleagues in this body, unbeknownst to this Senator and unbeknownst to the other Members of the U.S. Senate, they have blocked it.

They have blocked it, you see, because now, the fact that we are going to come back on Tuesday will give them more lobbying time to work their will—to work their will, the will of the major automobile companies—to thwart legislation that they are not in agreement with. I think that we are going to have to change the rule of this body, and I hear increasing comments about that from my colleagues with the total disaster situation that we have had here in the last week. One of the rules I think we have to change first is to prevent this Senator or any other Senator with the authority to block consideration of a bill on the calendar that is up for consideration by the U.S. Senate simply by putting a "secret" hold on a bill.

Madam President, to show how ridiculous this is, I cite the situation where even the majority leader—even the majority leader, whom we charge with the responsibility of trying to orderly carry on the business and procedures of the U.S. Senate, has to have 15 other Senators join him in a cloture motion. I would think that we would grant the majority leader or the minority leader a right to file a cloture motion on his own. But even the majority leader has to have 15 other Senators before he can file a cloture motion.

It seems to me that when we put a hold on someone else's bill, we should change the rule so that a Senator has to have 15 other Senators join with him in putting a hold on a bill if we are going to begin to give up some of the individual power and influence, if not secrecy, that is used from time to time to block otherwise acceptable legislation to the subcommittee of responsibility, to the committee of responsibility. But no, as we all know, many good pieces of legislation are literally killed right here on this floor by secret arrangements that are made off the floor.

I think that is not in the interests of good legislation. I think it is not, Madam President, in the best interest of the procedures that we all stand up for in this supposedly greatest deliberative body on Earth. I suggest it would be far better if we were to do our deliberations and our arrangements here, on the floor of the Senate, so it could be open to all concerned.

I therefore rise this evening, Madam President, to object and object very strenuously to what I see as one of the fatal flaws in the orderly operation of this body. Frankly, I felt very sorry for the majority leader and the minority leader, especially during these last few hours before we run up against a deadline, in trying their level best to work for orderly processes that I think should be the heart and soul of the U.S. Senate.

So I expect that when we come back next Tuesday, we will be coming back to renewed effort on the part of some of the major automobile manufacturers in opposition to this bill because and only because of the fact that they object to the amendment to the bill that was accepted in committee to make them do something on their own to try to limit a growing crime in this country, very costly to consumers, the matter of spinning back odometers. I will not repeat at this time all of the testimony that we took in the committee, but if every Member of this body had seen and heard that they would have known it is one of those important things we should do something about. I will be back fighting that cause again next week because that is the way the processes have taken us. I certainly hope that by that time, whoever the Senator is who has a hold on this bill, would stand up on the floor of this Chamber and say why. There may be some real good reason that that Senator should have a hold on my bill, but I think that Senator should have the courage to come up front and say why they are putting a hold on the bill.

They might convince me that they have some good reason to hold up this bill other than the opposition by the powerful lobbyists representing some of the major automobile manufactur-

ers of this Nation. Maybe they can. Or they may have a very legitimate reason other than what I suspect for placing a hold on this bill. If they do, then I simply say they have an obligation to tell the introducer of the bill and the Commerce Committee that looked over this measure there is something that should be corrected. We would like to know about it rather than secret holds being placed on the bill.

ORDER OF PROCEDURE

Mr. BAKER. Madam President, there is a great volume of material that appears to be cleared for action by unanimous consent or routinely. But while the staff of the minority leader and my staff are consulting on those matters to make sure that all Senators are protected and that the matters are in proper shape, it will take a little while longer to complete that. In the meantime, however, there are two bills on the calendar which I know are of particular interest to the senior and junior Senators from Mississippi, because both Senator STENNIS and Senator COCHRAN have spoken to me about these matters.

Senator BYRD and I have agreed that since it is going to take a while longer to get the rest of the material together, it would be appropriate now to proceed to the consideration of the two measures and then finish the rest of the material later.

JAMES O. EASTLAND U.S. COURTHOUSE

Mr. BAKER. Madam President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 1233, H.R. 3401.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3401) to designate the U.S. Post Office and Courthouse located at 245 East Capitol Street in Jackson, MS, as the "James O. Eastland United States Courthouse."

The bill was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Madam President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DR. A.H. McCOY FEDERAL BUILDING

Mr. BAKER. Madam President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 1234, H.R. 3402.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3402) to designate that hereafter the Federal building at 100 West Capitol Street in Jackson, MS, will be known as the "Dr. A.H. McCoy Federal Building."

The bill was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Madam President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Madam President, I ask unanimous consent that the time for the transaction of routine morning business be extended until 7 p.m., under the same terms and conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Madam President, I suggest that absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE EXECUTIVE CALENDAR

Mr. BAKER. Madam President, the distinguished minority leader has indicated to me in private conversation before I sought recognition that certain items on the Executive Calendar for today are cleared, I believe, on his side. They are cleared on this side.

Let me now propound a unanimous-consent request that I believe reflects a cross check against the two clearance processes and thus making them available for action by unanimous consent.

EXECUTIVE SESSION

Mr. BAKER. Madam President, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the following nominations: Calendar 1024, 1029, 1030, 1031, 1033, 1034, and on page 8 all of those nominations placed on the Secretary's desk in the Air Force, Army, and Marine Corps.

There being no objection, the Senate proceeded to the consideration of executive business.

Mr. BAKER. Madam President, I thank the Chair and I thank the minority leader for his clearance and I now ask that the nominations so identified be considered and confirmed.

The PRESIDING OFFICER. The nominations will be stated.

ASIAN DEVELOPMENT BANK

The legislative clerk read the nomination of Joe O'Neal Rogers, of Virginia, to be U.S. Director of the Asian Development Bank, with the rank of Ambassador.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

NATIONAL SCIENCE FOUNDATION

The legislative clerk read the nomination of Nam Pyo Suh, of Massachusetts, to be an Assistant Director of the National Science Foundation, and the nomination of Rita R. Colwell, of Maryland, to be a Member of the National Science Board, National Science Foundation.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

DEPARTMENT OF EDUCATION

The legislative clerk read the nomination of Linda M. Combs, of North Carolina, to be Deputy Under Secretary for Management, Department of Education.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

DEPARTMENT OF THE TREASURY

The legislative clerk read the nomination of Vilma Rosso Taracido, of New York, to be Assayer of the United States Assay Office at New York, NY.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

U.S. ADVISORY COMMISSION ON PUBLIC DIPLOMACY

The legislative clerk read the nomination of Tom C. Korologos, of Virginia, to be a member of the U.S. Advisory Commission on Public Diplomacy.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

NOMINATIONS PLACED ON THE SECRETARY'S DESK

The legislative clerk proceeded to read sundry nominations in the Air Force, Army, and Marine Corps placed on the Secretary's desk.

Mr. BAKER. Madam President, I ask unanimous consent that the nominations be considered en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

Mr. BAKER. Madam President, I move to reconsider the vote by which the nominations were confirmed.

Mr. BYRD. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Madam President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Madam President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CALENDAR

Mr. BAKER. Madam President, may I also say to the minority leader that I have a list of items that appear to be cleared for action by unanimous consent on today's Legislative Calendar.

May I identify them as they appear on my list and ask if the minority leader is in position to consider all or any part of these measures. I refer to calendar order Nos. 1278, 1279, 1280, 1281, 1282, 1283, 1284, 1285, 1286, 1287, 1289, 1290, 1299, 1311, 1321, and 1327.

Madam President, I inquire if the minority leader can approve any or all of that list of items.

Mr. BYRD. Madam President, all of the items that were enumerated by the distinguished majority leader have been cleared on this side.

Mr. BAKER. I thank the minority leader.

RELIEF OF PATRICK STARKIE

The bill (H.R. 437) for the relief of Patrick Starkie, was considered, ordered to a third reading, read the third time, and passed.

RELIEF OF THE AKERS FAMILY

The bill (H.R. 440) for the relief of Frederick Francisco Akers, Susan Ferniz Akers, spouse; Christopher Ferniz Akers, son; and Christina Ferniz Akers, daughter, was considered, ordered to a third reading, read the third time, and passed.

RELIEF OF HARRY CHEN TAK WONG

The bill (H.R. 932) for the relief of Harry Chen Tak Wong, was considered, ordered to a third reading, read the third time, and passed.

RELIEF OF MARGOT HOGAN

The bill (H.R. 1072) for the relief of Margot Hogan, was considered, ordered to a third reading, read the third time, and passed.

RELIEF OF TOMOKO JESSICA KYAN

The bill (H.R. 1152) for the relief of Tomoko Jessica Kyan, was considered, ordered to a third reading, read the third time, and passed.

RELIEF OF PHILLIP HARPER

The bill (H.R. 1426) for the relief of Phillip Harper, was considered, ordered to a third reading, read the third time, and passed.

RELIEF OF YELIZAVETA FANKUKHINA

The bill (H.R. 1713) for the relief of Yelizaveta Fankukhina, was considered, ordered to a third reading, read the third time, and passed.

RELIEF OF NERY DE MAIO

The bill (H.R. 1865) for the relief of Nery De Maio, was considered, ordered to a third reading, read the third time, and passed.

RELIEF OF MIREILLE LAFFITE

The bill (H.R. 1932) for the relief of Mireille Laffite, was considered, ordered to a third reading, read the third time, and passed.

RELIEF OF ANIS-UR-RAHMAN

The bill (H.R. 2418) for the relief of Anis-Ur-Rahman, was considered, ordered to a third reading, read the third time, and passed.

RELIEF OF DENNIS L. DALTON

The bill (H.R. 3382) for the relief of Dennis L. Dalton, was considered, ordered to a third reading, read the third time, and passed.

RELIEF OF SUTU BUNGANI WILLIAM BECK

The bill (H.R. 5691) for the relief of Sutu Bungani William Beck, was considered, ordered to a third reading, read the third time, and passed.

TRANSFER OF THE GENERAL POST OFFICE BUILDING TO THE SMITHSONIAN INSTITUTION

The bill (H.R. 4025) to authorize the Administrator of General Services to transfer to the Smithsonian Institution without reimburesment the General Post Office Building and the site thereof located in the District of Columbia, and for other purposes, was considered.

Mr. DANFORTH. Madam President, it is rare that Members of Congress take a strong interest in the location of a government agency. Nonetheless, I have found myself compelled to become involved in the relocation of the ITC, both because of the Commission's key role in international trade issues and because of the deplorable conditions in which the ITC must now perform its work.

The ITC is a unique body. As the chairman of the Finance Committee's International Trade Subcommittee, which oversees the operation of the ITC, I can attest to the importance of the relationship between Congress and the ITC. The Commission's structure guarantees that it will perform its functions independently, free of the political pressures and policy considerations that so often influence executive agencies. The Congress can be confident that the Commission will conduct its quasi-judicial functions with professionalism, and that the results of its factfinding investigations will be objective.

One measure of the importance of the Commission is the growth of its caseload. The ITC's investigative caseload rose by 82 percent from fiscal year 1981–83, and new investigations in the first 10 months of fiscal year 1984 were running 30 percent ahead of the fiscal year 1983 level. Moreover, the ITC recently completed work on several "escape clause" cases. These are cases in which the ITC must make recommendation to the President on requests for imports relief from major domestic industries.

Unfortunately, as the importance of the ITC is increasing, the building in which most of its staff works is deteriorating. Over the last decade requests by the ITC to have repairs made have been ignored, with predictable consequences. The building provides a poor and, in some cases an unsafe environment for Commission employees and is an embarrassment when representatives of foreign governments and industries appear at Commission proceedings.

I toured the ITC premises last year, along with several other Finance Committee members, and I can confirm the sorry state of the building.

The first response of the ITC to the deteriorating conditions of its building was to ask for repairs and to continue to occupy the building. I testified in support of this position before the Senate Public Works Committee last year.

The Public Works Committee chose, however, to proceed with the transfer of the building to the Smithsonian. Authority to do this was included in S. 1287, which passed the Senate in June, 1983. So now the focus shifted to the selection of a suitable location to which the Commission will relocate.

In this regard, Senator Bentsen, the ranking minority member of the Trade Subcommittee, and I offered an amendment on the Senate floor to S. 1287. Our amendment contained three

provisions: first, it would have given the Chairman of the ITC and the Administrator of the GSA joint responsibility to select a new site for the Commission. Second, the amendment would have established regular reports to various congressional committees on the status of the relocation. Third, our amendment would require the GSA to maintain properly the ITC's current building until the relocation takes place.

The bill before the Senate today, H.R. 4025, does not contain the joint determination provision. I understand, however, that H.R. 4025 does contain other provisions designed to protect the ITC's interests in its relocation. For example, the bill would require the GSA Administrator to consult and cooperate with the ITC Chairman in all actions related to the selection of a new location. The bill would also give the ITC an expedited review of an unfavorable decision by the GSA and would expand on the Congressional reporting requirements. Furthermore, I understand that the ITC supports H.R. 4025 as it appears before us today, even though it would prefer that the joint determination language be added. Therefore, I am prepared not to offer my amendment. But I would, however, like to obtain some assurances from the chairmen of the committees that have acted on this bill.

A concern of mine deals with GSA's maintenance of the General Post Office Building. A major reason for the poor quality of the building is that GSA, faced with the possibility that the building may at some future time be given to the Smithsonian, did not commit the necessary funds to prevent the deterioration of the building. I am concerned that once this bill passes the GSA will have even more incentive to defer maintenance until the Smithsonian takes it over. Thus, the condition of the building could worsen even more during the remaining time that the ITC spends in the building. Does the bill address this problem?

Mr. STAFFORD. Yes; the bill contains a provision that was part of the amendment the Senator from Missouri offered last year. This provision requires the GSA to maintain the building "in order to prevent its deterioration and to assure that conditions therein are safe and the building is presentable and suitable to the normal operations of the Commission." I assure the Senator from Missouri that as chairman of the Committee on Environment and Public Works I will monitor GSA's performances on this very closely.

Mr. DANFORTH. In lieu of the joint determination provision, H.R. 4025 states that the Chairman of the ITC "shall have the full opportunity to consult and cooperate" with the GSA Administrator on the studies and investigations that will form the basis for the selection of a new building. What is the Senator from Vermont's interpretation of this provision?

Mr. STAFFORD. The ITC Chairman would have the opportunity to participate in surveys of available buildings and to submit views and recommendations regarding the Commission's relocation to the GSA Administrator.

Mr. DANFORTH. I ask the distinguished chairman if it is the intent of the managers of this bill that a prospectus must be approved in accordance with the Public Building Act of 1959 before GSA may proceed to negotiate and sign a lease on a building for the ITC?

Mr. STAFFORD. If this legislation is enacted and signed by the President, it becomes the law of the land. A new act of Congress would vitiate any requirement of the 1959 Public Buildings Act that the Public Works Committees of the Senate and House approve a prospectus before GSA has the authority to sign a lease to relocate the ITC.

Mr. DANFORTH. I ask the manager of this legislation—the senior Senator from Vermont—if the bill places a limitation on the amount of space that GSA may provide the ITC. Does it permit the Administrator to lease 170,000 square feet?

Mr. STAFFORD. The bill does not place any limitation on the amount of space GSA is authorized to lease to house the ITC. The legislation states that the Administrator "shall relocate all operations" of the ITC. It does not specify any particular amount of space GSA may contract for, nor does it place any limitation on the amount of space. GSA could lease 170,000 square feet.

Mr. DANFORTH. If the monthly reports are to serve as an effective safeguard for the ITC, the committees to which the reports are sent will have to take an active interest in the relocation. As a member of two of those committees, the Senate Finance and Senate Government Affairs Committees, I intend to pay close attention to the progress of the move and, in particular, to the selection of new locations offered to the ITC. I would like to ask the chairman of the Senate Environment and Public Works Committee how he will evaluate the adequacy of a building offered by the GSA.

Mr. STAFFORD. The location of the building should be convenient to both the Congress and the relevant executive branch agencies. Also, the building should not be in an area that threatens the security of the Commission's employees.

The building should also provide adequate space to meet the ITC's special requirements, such as hearing rooms, court rooms, libraries, a printing plant, and a computer room.

Regarding office space, the allocation of square footage for Commission staff should be consistent with their needs to operate effectively and efficiently. In the prospectus approved by the House Public Works Committee on August 8, the ITC already had agreed to reduce its office space utilization rate from 167 square feet per person to 143 feet. A further reduction may not be consistent with the need to protect at all times highly sensitive business confidential material, which dictates the need for privacy. GSA will have to show some flexibility and understanding in allowing the ITC to have a utilization rate somewhat higher than the goal of a national average of 135 square feet per person.

Mr. DANFORTH. One final concern of mine deals with the need for the ITC to function smoothly during the relocation. Can I get the assurances of the chairmen of the Senate Public Works Committee and the Senate Rules Committee that first, the ITC will not begin its move until the new location is fully ready, as determined by the ITC Chairman and second, that the Smithsonian Institute will not begin renovating the General Post Office Building until the ITC has vacated the building?

Mr. STAFFORD. I can give those assurances to the Senator from Missouri. Let me also inquire of the ranking member of the Senate Environment and Public Works Committee, Senator RANDOLPH, and the Democratic member most concerned with matters such as this, Senator MOYNIHAN, if they concur with my assurances.

Mr. MOYNIHAN. Madam President, I can speak for both Senator RANDOLPH and myself that our distinguished chairman has provided proper and accurate assurances regarding the protection of the U.S. International Trade Commission's interests in its relocation.

Mr. MATHIAS. I agree. The Rules Committee will act to see that the transfer of the building will not interfere with the operations of the ITC.

Mr. DANFORTH. I thank the Senators for their answers and for their cooperation, and I look forward to working together on any further actions that may be required to assist the ITC in its relocation.

The bill (H.R. 4025) was ordered to a third reading, read the third time and passed.

LAW ENFORCEMENT OFFICERS MEMORIAL

The joint resolution (H.J. Res. 482) authorizing the Law Enforcement Officers Memorial Fund to establish a memorial in the District of Columbia or its environs, was considered, ordered to a third reading, read the third time, and passed.

NATIONAL HEAD INJURY AWARENESS MONTH

The joint resolution (H.J. Res. 638) designating October 1984 as "National Head Injury Awareness Month," was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

RELIEF OF THE SISTERS OF MERCY OF THE UNION, PROVINCE OF ST. LOUIS, MO

The bill (S. 2449) for the relief of the Sisters of Mercy of the Union, Province of St. Louis, MO, was considered, ordered to be engrossed for a third reading, read the third time, and passed; as follows:

S. 2449

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Sisters of Mercy of the Union, Province of Saint Louis, Missouri, the former owner of Mercy Hospital of Brownsville, Texas, is relieved of all liability to the United States under title VI of the Public Health Service Act resulting from the sale of such Mercy Hospital to Medenco, Incorporated, a for-profit organization.

Mr. BAKER. Madam President, I move to reconsider the vote by which the several items were agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Madam President, I would propose the Senate proceed to the consideration of S. 2623 if the minority leader has no objection.

Mr. BYRD. No objection.

ANTITERRORISM LEGISLATION

● Mr. DENTON. Mr. President, I rise to voice my support of S. 2623 and S. 2624, two antiterrorism bills that my distinguished colleague, Senator THURMOND, and I introduced in the Senate on May 2, 1984, on behalf of President Reagan.

S. 2624 is a bill to implement the International Convention Against the Taking of Hostages. The enabling legislation for the hostage-taking treaty is essential. The United States has been a party to the hostage-taking treaty for over 3 years. The treaty was adopted by the United Nations in 1979, and President Reagan signed the instrument ratifying the treaty in September 1981. When the President signed the instrument of ratification, the Congress was informed that the instrument would not be deposited with the United Nations until enabling legislation had been enacted.

And in the 3 years since we ratified the treaty, the enabling legislation necessary to implement it has languished. One might say that Congress has been derelict in passing the necessary legislation. We must demonstrate now to other governments and international fora that the United States is serious about its efforts to deal with international terrorism.

An even more egregious situation exists with regard to enabling legislation for the Montreal Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation. That treaty was ratified by the U.S. Senate 12 years ago, in 1972. Our failure to pass enabling legislation for the Montreal treaty means that certain criminal acts related to aircraft sabotage or hijacking are not adequately covered by U.S. law. This gap in the law sends a false signal to terrorists, and it also indicates to other governments that we may not be as serious as we should be, and as, in fact, we are, in our efforts to combat international terrorism.

S. 2623 closes that gap. It is a bill Senator THURMOND and I introduced last May to implement the Montreal treaty, and which was unanimously approved by the Senate Judiciary Committee.

Passage of both S. 2623 and S. 2624 would implement both the Montreal treaty and the hostage-taking treaty. Because their implementation is long overdue and so vital to our national interest, I urge my colleagues to support them.●

MONTREAL CONVENTION FOR THE SUPPRESSION OF UNLAWFUL ACTS AGAINST THE SAFETY OF CIVIL AVIATION

Mr. BAKER. Madam President, I ask the Chair to lay before the Senate S. 2623.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (S. 2623) to implement the Montreal Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 7074

Mr. BYRD. Madam President, on behalf of Mr. Leahy, I send a technical amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD], on behalf of Mr. LEAHY, proposes an amendment numbered 7074.

Mr. BYRD. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

Page 3, beginning in line 24, strike out "interferes with the operation of or makes unsuitable for use" and insert in lieu thereof "wrecks".

Page 4, line 12, insert "by force or violence" after "interferes".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 7074) was agreed to.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed as follows:

S. 2623

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Aircraft Sabotage Act".

STATEMENT OF FINDINGS AND PURPOSE

SEC. 2. The Congress hereby finds that—

(a) the Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation (ratified by the United States on November 1, 1972), requires each contracting State to establish its jurisdiction over certain offenses affecting the safety of civil aviation;

(b) such offenses place innocent lives in jeopardy, endanger national security, affect domestic tranquility, gravely affect interstate and foreign commerce, and are offenses against the law of nations; and

(c) the purpose of this Act is to implement fully the Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation and to expand the protection accorded to aircraft and related facilities.

SEC. 3. (a) Section 31 of title 18, United States Code, is amended—

(1) in the first paragraph by—

(A) striking out "and" before the term "spare part" and inserting "and 'special aircraft jurisdiction of the United States' " after the term "spare part"; and

(B) striking out "Civil Aeronautics Act of 1938" and inserting in lieu thereof "Federal Aviation Act of 1958";

(2) by striking out "and" at the end of the third undesignated paragraph thereof;

(3) by striking the period at the end thereof and inserting in lieu thereof ";" ; and

(4) by adding at the end thereof the following new paragraphs:

" 'In flight' means any time from the moment all the external doors of an aircraft are closed following embarkation until the moment when any such door is opened for disembarkation. In the case of a forced landing the flight shall be deemed to continue until competent authorities take over the responsibility for the aircraft and the persons and property on board; and

" 'In service' means any time from the beginning of preflight preparation of the aircraft by ground personnel or by the crew for a specific flight until twenty-four hours after any landing; the period of service shall, in any event, extend for the entire period during which the aircraft is in flight.".

(b) Section 32 of title 18, United States Code, is amended to read as follows:

"§ 32. Destruction of aircraft or aircraft facilities

"(a) Whoever willfully—

"(1) sets fire to, damages, destroys, disables, or interferes with the operation of or makes unsuitable for use any aircraft in the special aircraft jurisdiction of the United States or any civil aircraft used, operated, or employed in interstate, overseas, or foreign air commerce;

"(2) places or causes to be placed a destructive device or substance in, upon, or in proximity to, or otherwise makes or causes to be made unworkable or unusable or hazardous to work or use, any such aircraft, or any part or other materials used or intended to be used in connection with the operation of such aircraft;

"(3) sets fire to, damages, destroys, or disables any air navigation facility, or interferes by force or violence with the operation of such facility, if such fire, damaging, destroying, disabling, or interfering is likely to endanger the safety of any such aircraft in flight;

"(4) with the intent to damage, destroy, or disable any such aircraft, sets fire to, damages, destroys, or disables or places a destructive device or substance in, upon, or in proximity to, any appliance or structure, ramp, landing area, property, machine, or apparatus, or any facility or other material used, or intended to be used, in connection with the operation, maintenance, loading, unloading, or storage of any such aircraft or any cargo carried or intended to be carried on any such aircraft;

"(5) performs an act of violence against or incapacitates any individual on any such aircraft, if such act of violence or incapacitation is likely to endanger the safety of such aircraft;

"(6) communicates information, knowing the information to be false, thereby endangering the safety of any such aircraft in flight; or

"(7) attempts to do anything prohibited under paragraphs (1) through (6) of this subsection—

shall be fined not more than $100,000 or imprisoned not more than twenty years or both.

"(b) Whoever willfully—

"(1) performs an act of violence against any individual on board any civil aircraft registered in a country other than the United States while such aircraft is in flight, if such act is likely to endanger the safety of that aircraft;

"(2) destroys a civil aircraft registered in a country other than the United States while such aircraft is in service or causes damage to such an aircraft which renders that aircraft incapable of flight or which is likely to endanger that aircraft's safety in flight;

"(3) places or causes to be placed on a civil aircraft registered in a country other than the United States while such aircraft is in service, a device or substance which is likely to destroy that aircraft, or to cause damage to that aircraft which renders that aircraft incapable of flight or which is likely to endanger that aircraft's safety in flight; or

"(4) attempts to commit an offense described in paragraphs (1) through (3) of this subsection—

shall, if the offender is later found in the United States, be fined not more than $100,000 or imprisoned not more than twenty years, or both.".

(c) Section 101(38)(d) of the Federal Aviation Act of 1958 (49 U.S.C. 1301(38)(d)), relating to the definition of the term "special aircraft jurisdiction of the United States", is amended—

(1) in clause (i), by striking out "; or" and inserting in lieu thereof a semicolon;

(2) at the end of clause (ii), by striking out "and" and inserting in lieu thereof "or;" and

(3) by adding at the end thereof the following new clause:

"(iii) regarding which an offense as defined in subsection (d) or (e) of article I, section I, of the Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation (Montreal, September 23, 1971), is committed if the aircraft lands in the United States with an alleged offender still on board; and".

(d)(1) Chapter 2 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 36. Imparting or conveying threats

"Whoever imparts or conveys any threat to do an act which would be a felony prohibited by section 32 or 33 of this chapter or section 1992 of chapter 97 or section 2275 of chapter 111 of this title with an apparent determination and will to carry the threat into execution shall be fined not more than $25,000 or imprisoned not more than five years, or both.".

(2) The analysis of chapter 2 of title 18 of the United States Code is amended by adding at the end thereof the following new item:

"36. Imparting or conveying threats.".

SEC. 4. (a)(1) Section 901 of the Federal Aviation Act of 1958 (49 U.S.C. 1471) is amended by adding at the end thereof the following new subsections:

"(c) Whoever imparts or conveys or causes to be imparted or conveyed false information, knowing the information to be false, concerning an attempt or alleged attempt being made or to be made, to do any act which would be a crime prohibited by subsection (i), (j), (k), or (l) of section 902 of this Act, shall be subject to a civil penalty of not more than $10,000 which shall be recoverable in a civil action brought in the name of the United States.

"(d) Except for law enforcement officers of any municipal or State government or officers or employees of the Federal Government, who are authorized or required within their official capacities to carry arms, or other persons who may be so authorized under regulations issued by the Administrator, whoever while aboard, or while attempting to board, any aircraft in, or intended for operation in, air transportation or intrastate air transportation, has on or about his person or his property a concealed deadly or dangerous weapon, which is, or would be, accessible to such person in flight shall be subject to a civil penalty of not more than $10,000 which shall be recoverable in a civil action brought in the name of the United States.".

(2) That portion of the table of contents contained in the first section of the Federal Aviation Act of 1958 which appears under the side heading

"Sec. 901. Civil penalties."

is amended by inserting at the end thereof:

"(c) Conveying false information.

"(d) Concealed weapons.".

(b) Section 901(a)(2) of the Federal Aviation Act of 1958 (49 U.S.C. 1471(a)(2)) is amended by inserting the words: "penalties provided for in subsections (c) and (d) of this section or" after the words "Secretary of Transportation in the case of".

(c)(1) Section 902(l)(1) of the Federal Aviation Act of 1958 (49 U.S.C. 1472(l)(1)) is amended by striking the term "$1,000" and inserting in lieu thereof the term "$10,000".

(2) Section 902(l)(2) of the Federal Aviation Act of 1958 (49 U.S.C. 1472(l)(2)) is amended by striking the term "$5,000" and inserting in lieu thereof "$25,000".

(d)(1) Section 902(m) of the Federal Aviation Act of 1958 (49 U.S.C. 1472(m)) is amended to read as follows:

"FALSE INFORMATION AND THREATS

"(m)(1) Whoever willfully and maliciously, or with reckless disregard for the safety of human life, imparts or conveys or causes to be imparted or conveyed false information, knowing the information to be false, concerning an attempt or alleged attempt being made or to be made, to do any act which would be a felony prohibited by subsection (i), (j), (k), or (l) of this section, shall be fined not more than $25,000 or imprisoned not more than five years, or both.

"(2) Whoever imparts or conveys or causes to be imparted or conveyed any threat to do an act which would be a felony prohibited by subsection (i), (j), (k), or (l) of this section with an apparent determination and will to carry the threat into execution shall be fined not more than $25,000 or imprisoned not more than five years, or both.".

(2) That portion of the table of contents contained in the first section of the Federal Aviation Act of 1958 which appears under the side heading "Sec. 903. Criminal penalties." is amended by striking out "(m) False information." and inserting in lieu thereof "(m) False information and threats.".

(e) Subsection (a) of section 1395 of title 28, United States Code, is amended by striking the period at the end of such subsection and adding the following at the end thereof: ", and in any proceeding to recover a civil penalty under section 35(a) of title 18 of the United States Code or section 901(c) or 901(d) of the Federal Aviation Act of 1958, all process against any defendant or witness may be served, regardless whether authorized under the Federal Rules of Civil Procedure, in any judicial district of the United States upon an ex parte order for good cause shown.".

(f) The second sentence of section 903(b)(1) of the Federal Aviation Act of 1958 (49 U.S.C. 1473(b)(1)) is amended by striking out "Such" and inserting in lieu thereof "Except with respect to civil penalties under sections 901 (c) and (d) of this Act, such".

SEC. 5. This Act shall become effective on enactment.

Mr. BAKER. Madam President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REMOVAL OF IMPEDIMENTS TO CERTAIN OIL AND GAS LEASING

Mr. BAKER. Madam Preident, I ask unanimous consent that the Senate now proceed to the consideration of H.R. 5787.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 5787) to remove an impediment to oil and gas leasing of certain Federal lands in Corpus Christi, TX, and Port Henneme, CA, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

There being no objection, the Senate proceeded to consider the bill.

Mr. BENTSEN. Madam President, I am pleased to support the passage of H.R. 5787. I am an original cosponsor of the Senate version of this legislation, S. 2834, along with Senators WILSON, TOWER, CRANSTON, and MCCLURE.

This proposal is an asset to the cities of Corpus Christi, TX, and Port Heuneme, CA, as well as a positive step in the direction of decreasing our Nation's dependence on foreign energy supplies. The support these communities are giving to this legislation demonstrates their commitment to furthering America's domestic energy production.

This legislation proposes to amend the Mineral Leasing Act for Acquired Lands. The existing statute provides the Secretary of the Interior with authority to lease oil and gas rights on acquired Federal lands except for those lands situated within incorporated cities, towns, and villages. This preservation of local prerogatives is generally an idea of which I approve. In this situation, however, the statute denies local governments the flexibility they need to permit consenting parties to begin lease sales.

These cities are willing to allow oil and gas lease sales, indeed, they are seeking that right. The City Council of Corpus Christi and State Representative W.O. Bill Harrison, Jr., have strongly urged that the Senate approve this proposal. I agree. The local officials deserve the right to make those land use decisions that have historically been preserved for them.

The revenue gained from such Federal oil and gas lease sales is equally distributed between the Federal Government and the State involved. In Texas, 50 percent of the parcelled revenues will go to the independent school districts in the county where the leasing occurs. I enthusiastically endorse the efforts of Corpus Christi's local elected officials to raise additional money for the education of Nueces County's schoolchildren.

Madam President, I urge my colleagues to approve this legislation.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 5787) was read the third time, and passed.

COMBATING INTERNATIONAL TERRORISM

Mr. BAKER. Madam President, I ask that the Chair lay before the Senate Calendar Order No. 1313, H.R. 6311.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 6311) to combat international terrorism.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

There being no objection, the Senate proceeded to consider the bill.

Mr. DOMENICI. Madam President, waivers under section 904 of the Budget Act are intended to be reserved for emergency or highly unusual circumstances. I believe, and I am sure my colleagues would agree, that the recent disasters relative to the security of U.S. Embassies make this authorization such an emergency. Section 402 of the Budget Act requires that legislation authorizing the appropriation of funds for fiscal year 1985 must have been reported prior to May 25, 1984. As I am sure my colleagues understand, the most recent event which led to this additional authorization occurred after that date. Further, in order to make these additional funds available for rapid expenditure, it is necessary to consider this authorization immediately, so that an additional appropriation for the same purpose may be taken up during consideration of the continuing resolution. I fear that if we wait until next year to provide additional funding, it may be too late for another Embassy. It is for these reasons that the chairman of the Budget Committee supports this waiver.

I urge my colleagues to support this waiver.

Mr. BAKER. Madam President, I ask unanimous consent that, pursuant to section 904 of the Congressional Budget Act that section 402 of that act be waived with respect to the consideration of this measure, a bill to combat international terrorism.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Madam President, the bill is before the Senate and by unanimous consent the Budget Act has been waived.

● Mr. PERCY. Madam President, I urge my colleagues to support the passage of H.R. 6311, the 1984 Act to Combat International Terrorism. With the exception of some minor technical changes, this bill is identical to S. 3037 which was formally reported by the Senate Foreign Relations Committee on Friday, September 28.

This bill follows in the wake of the tragic and criminal bombing of the U.S. Embassy in Beirut on September 20, 1984. Last week, the administration requested an emergency supplemental authorization of $366,278,000 with no year authorization to enhance the security of U.S. diplomats and facilities located abroad. Specifically, $350,963,000 are requested for the Department of State, $5,315,000 for the U.S. Information Agency and $10,000,000 to be divided equally between the Secretary of State and the Attorney General for the purpose of awarding money for information relating to threats and acts of terrorism.

Madam President, I ask that a section-by-section analysis of this bill be printed in the RECORD at this point.

The material follows:

SECTION-BY-SECTION ANALYSIS TO ACCOMPANY H.R. 6311, AS AMENDED

Section 1 states the short title of H.R. 6311 as the "1984 Act to Combat International Terrorism."

TITLE I: REWARDS FOR INFORMATION ON INTERNATIONAL TERRORISM

Section 101(a) provides the authority of the Attorney General to pay rewards by amending Title 18 U.S. Code with six new sections as follows:

The Attorney General is authorized to pay rewards for information which: (1) which leads to the arrest or conviction in any country for the commission of an act of terrorism against a United States person or property; (2) information leading to the arrest or conviction in any country for a conspiracy or an attempt to commit an act of terrorism against a United States person or property; or (3) information leading to the prevention, frustration, or favorable resolution of an act of terrorism against a United States person or property.

The Attorney General is required to make a determinatin as to whether a particular person is entitled to a reward and sets a ceiling of $500,000 of total compensation and a subceiling of $100,000 which requires the approval of the President or the Attorney General.

The Attorney General is authorized to provide protective action for the recipient of a reward or the members of a recipients' immediate family and further stipulates that protection in connection with the paperwork necessary to the accomplishment of the payment of the reward.

Government employees who furnish information concerning terrorism in the performance of their officials duties are not eligible for a monetary reward under this chapter.

Five million dollars is authorized to be appropriated to the Attorney General without fiscal year limitation for this purpose.

Individuals who furnish information which would justify a reward under this chapter or under section 36 of the State Department Basic Authorities Act would be eligible to participate in the witness security program.

Definitions are contained in this section which apply to this new chapter.

Authority of the Secretary of State

Section 102 amends the State Department Basic Authorities Act of 1956 by adding a new section 36.

New Section 36 authorizes the Secretary of State to pay a reward for the information leading to the arrest or conviction of an individual for committing a terrorist act or for conspiring or attempting to commit a terrorist act. A reward may also be paid for information which results in the prevention or favorable resolution of an act of terrorism.

New Section 36(b) provides that a reward under this section may not exceed $500,000 and further stipulates that a reward of $100,000 may not be made without the prior approval of the President or the Secretary of State.

New Section 36(c) provides that the Secretary of State will consult with the Attorney

General before making a reward relating to a matter under federal criminal jurisdiction.

New Section 36(d) provides that the Secretary of State will certify the payment of any reward. The Secretary may also take measures to protect the identity of an individual who receives a reward as well as the identities of the members of the recipient's immediate family.

New Section 36(e) provides that government employees are not eligible for rewards if they provide such information during the course of their official duties.

New Section 36(f) authorizes an appropriation of $5 million to be used to pay rewards. These funds are authorized to remain available until expended. Future authorizations to fund rewards would be provided in the annual Department of State authorization legislation.

New Section 201(a) urges the President to seek more effective international cooperation in dealing with international terrorists. Areas of cooperation would include the punishment of terrorists for acts which threaten diplomatic staff, military or other government personnel, and private citizens, and cooperation in the extradition of terrorists.

New Section 201(b) encourages the U.S. to enter into negotiations which might lead to a permanent international working group to combat terrorism. The purpose of this group would be to increase international cooperation, develop new methods to deal with terrorism, negotiate agreements for the exchange of intelligence and technical assistance, and examine how terrorists may use diplomatic immunities and diplomatic facilities to further their goals.

TITLE III: SECURITY OF UNITED STATES MISSIONS ABROAD

Section 301 requires the Secretary of State to report to the House Foreign Affairs and Senate Foreign Relations Committees on the findings of the Secretary's Panel on Security of U.S. Missions Abroad.

Section 302(a) provides for the authorization of $350,963,000 for the Department of State and $5,315,000 for USIA for emergency security enhancement at U.S. Diplomatic Missions.

Section 302(b) requires a report by February 1, 1985, from the Secretary of State and the Director of USIA on how their respective agencies have allocated these funds.

Section 303(a) amends Section 2 of the State Department Basic Authorities Act of 1956 by:

Clarifying the Secretary of State's current authority to hire by contract individuals or organizations for services abroad.

Extending the Secretary of State's current authority for overseas personnel services contracting to enable the Secretary of State to hire local American nationals. These individuals employed by contract to perform these services would not be considered for the purposes of this section to be employed by the U.S. federal government.

Providing authority for the Secretary of State to hire outside experts and consultants and stipulates the rate of pay may not exceed the GS-18.

Providing the necessary flexibility and authority for the Secretary of State in consultation with the Administrator of General Services to provide for sole source procurement to meet overseas security requirements. This new authority to allow for sole source procurement preserves the requirements of the Competition and Contracting Act of 1984.

Providing the authority for the Deputy Assistant Secretary of State to use government owned vehicles for security purposes, for travel between his or her residence and places where official functions are performed.

Including USIA and AID in the authority to extend additional per diem benefits to security personnel and to members of the foreign service and employees of that agency who are performing security related functions abroad who by virtue of their official duties are required to engage in extended travel. It is intended that USIA and AID would following the State Department regulations regarding the definition of extended travel.

Section 304 expresses the sense of Congress that due to the current epidemic of worldwide terrorist activity, U.S. missions abroad should more extensively utilize the danger pay allowance.

Mr. PERCY. Madam President, the suicide-vehicle bombing attempt of our Embassy annex in Beirut 2 weeks ago, the fourth such attack against U.S. facilities in the Middle East within the last 18 months, underscores once again the vulnerability of U.S. personnel and facilities overseas to determined terrorist attacks.

While physical security has been a high priority of the Department of State, it finds itsef at a disadvantage when fanatical adversaries are involved.

In face of this escalating and threatening situation, the Department has taken several actions to protect against future instances of terrorist attack. For example, all posts have surveyed their vulnerability to vehicle penetration and taken actions to reduce it. These include such measures as requesting host governments to restrict traffic and provide additional guards, walls, fences, and gates. But, more must be done.

The major thrust of this urgent supplemental package is to enable the Department to initiate more comprehensive physical security measures.

Madam President, I ask that the Department of State's detailed justification for this request be printed in the RECORD.

The material follows:

FISCAL YEAR 1985 SECURITY SUPPLEMENTAL—SUMMARY OF INCREASES

	Positions	FTE	Amount
Department of State:			
Salaries and expenses:			
Security	136	102	$132,091
Communications	15	11	31,423

Grand total, 1985 security supplemental	247	186	366,278

DEPARTMENT OF STATE—FISCAL YEAR 1985 SUPPLEMENTAL ESTIMATES OMB SUBMISSION

Salaries and expenses

Appropriation: Salaries and Expenses, PL: 98-411.

Appropriation Requested to Date: $1,266,830,000; request: $173,421,000.

Amended Appropriation Requested: $1,440,251,000.

Purpose and Need for Supplemental Funds

Emergency Security Protection for U.S. Personnel and Missions

The suicide vehicle bombing attempt against our embassy annex in Beirut on September 20, 1984, the fourth such attack against U.S. facilities in the Middle East within the last eighteen months, underscores once again the vulnerability of U.S. personnel and facilities overseas to determined terrorist attack. This incident confirms the serious recent escalation in the security threat to our operations in the world in general and in the Middle East in particular. While the Department of State has long considered physical security to be a high priority, we will always be at a disadvantage, especially when fanatical adversaries are involved because the very nature of the threat places us on the defensive.

In the face of this situation, the Department has taken several actions to protect against future instances of terrorist attack. In the short term, all posts have surveyed their physical vulnerability to vehicle penetration, and have taken actions to increase their security. These include such measures as requesting host governments to restrict traffic and provide additional guards, and installing anti-ram devices, vehicle barriers and strengthening perimeter walls, fences and gates. We believe that, given a significant increase in both the Department's physical security and anti-terrorism program and its equally important security-related research and development efforts, we can do much to increase the level of overall security against known and projected terrorist threats.

Within this request are a number of programs that meet these goals. In the area of physical security and anti-terrorist programs, we propose to improve physical security at seventy of our most threatened posts through such measures as enhancing perimeter barriers by installing walls, fences, lighting, vehicle arrest barriers, guard booths, ballistics and forced entry-resistant doors, bollards and earth berms. Funds are also requested for Public Access Control (PAC) projects at ten of our posts which currently lack such a protection.

Vehicles continue to be a serious concern. For the past decade, the Department has not been able to fund the armored vehicle program adequately. At a minimum, every Ambassador and Consul General, at a high threat post, should be provided with a fully armored vehicle, and all motor pool vehicles at high-threat posts should be at least lightly armored to provide ballistics protection. This request includes a significant augmentation of our armored vehicle program to assist in attaining these goals.

Experience has shown that reliable communications is a necessity in crisis situations. Our recently developed tactical satellite communications systems has demonstrated its versatility and usefulness. The unit currently in Beirut remained operational after the recent bombing attempt and provided continuous secure communications between the crisis management team in

Washington and the post. We are requesting an expansion of this program to include a number of other high-threat posts. The need for both voice privacy and hand-held radio communications at post is also increasingly apparent, and we are providing additional posts with these capabilities in the request.

In order to install, maintain and operate the systems included in this request, we are requesting additional Seabees, Marine Security Guards, Regional Security Officers, and other necessary personnel and administrative support. Other initiatives incorporated in this package include expanded training for overseas and professional security personnel, an enhanced reaction capability to terrorist and security incidents and improved testing of Emergency Action Plans as joint training exercises involving military commands as well as other foreign affairs agencies.

Of equal importance with these short-term program augmentations is an additional area included in this request. To provide us with every possible advantage against terrorist attacks, it is vital that the Department do all that it can in the area of the research and development of security-related technology. The physical security needs of an embassy are truly unique. Few other U.S. Government facilities combine the need to be accessible to the legitimate public while being located in areas outside the boundaries of the U.S. where the terrorist and security-related threat levels can be as high as they are and will continue to be into the foreseeable future. We cannot rely on other agencies or organizations to provide us with this state-of-the-art technology, as to a certain extent we were able to do in the past. It is vital that the Department build on the initiatives that it has started through such areas as the Security Enhancement and Counter-Terrorism programs to expand dramatically our research and development efforts. We need imaginative and timely innovations in a host of areas to regain the initiative against terrorism and begin to anticipate successfully what the next specific threats will be. We are proposing a number of such programs directly related to the security requirements of our overseas activities. These include areas such as advanced ballistics and forced entry materials, electronic countermeasures and improved vehicle armoring.

APPROPRIATION LANGUAGE

Salaries and expenses

For an additional amount for the Department of State's "Salaries and Expenses," $173,421,000 of which, $135,782,000 is to remain available until September 30, 1986.

FISCAL YEAR 1985 SECURITY SUPPLEMENTAL—SUMMARY OF INCREASES

[Dollars in thousands]

	Positions	Amount
Overseas operations:		
Regional security office positions and support:		
Beirut	3	$410
Abu Dhabi	1	113
Tegucigalpa and San Salvador	5	623
N'Djamena	1	135

FISCAL YEAR 1985 SECURITY SUPPLEMENTAL—SUMMARY OF INCREASES—Continued

[Dollars in thousands]

	Positions	Amount
Emergency response personnel	14	2,490
Subtotal, RSO positions and support	51	7,226
Overseas physical security program:		
Perimeter barrier improvements	9	40,478
Internal physical security systems for short-term leased office buildings	3	11,986
Overseas physical security information management system	3	1,763
Computer-assisted marine security guard control booth systems		1,500
Subtotal, Overseas Physical Security Program	15	55,727
Overseas engineering offices	15	3,280
Additonal Seabees: Pay, allowances, and travel		4,280
Armored vehicle programs:		
Fully armored vehicle procurement and support		16,500
Light armored vehicles, ballistic material procurement and installation		3,124
Research and development: Modified fully armored vehicle prototype and locator system		600
Subtotal, armored vehicle programs		20,224
Marine Security Guard Program:		
Additional Marine security guard personnel		12,534
Marine Guard vehicles for existing detachments		780
Subtotal, Marine security guard program		13,314
Special protective equipment program:		
Ammunition		630
Special protective equipment		300
Shipment of ammunition and special protective equipment		558
Subtotal, special protective equipment program		1,488
Research and development program in support of overseas operations:		
Physical security barriers and materials research and development	5	5,627
Classified research and development program	15	17,225
Subtotal, research and development program	20	22,852
Overseas security coordination	3	110
Total, overseas operations	104	128,501
Threat analysis operations:		
Threat alert program	6	286
DESIST computer library	1	134
Total, threat analysis operations	7	420
Specialized security training:		
Mobile training team (MTT) and recorded security surveys program	17	1,987
Specialized security training support	4	695
Security engineering training	4	488
Total, specialized security training	25	3,170
Total, Office of Security	136	132,091

FISCAL YEAR 1985 SECURITY SUPPLEMENTAL ESTIMATES

Salaries and expenses justification

Office of Security Requirements—136 positions and $132,091,000.

Overseas Operations, 104 positions (American) and $128,501,000.

Regional Security Office Positions and Support, 51 positions (American) and $7,226,000:

With the alarming increase in terrorist activities abroad, greater demands have been placed on our Regional Security Officers (RSO). In some areas of the world, we do not have security officers assigned to high threat posts. In other areas, the security officer's geographic responsibilities extend over too large an area. This arrangement makes it impractical to provide an adequate level of security services to both resident and constituent posts, particularly when concurrent crises develop.

The additional regional security office positions will enable us 1) to assign RSOs at our high threat posts; 2) to trim the number of posts that individual RSOs cover, which will allow for more responsive and meaningful support in the areas of personnel protection, crisis management planning, liaison with host governments and physical security upgrading of facilities; and 3) to assign protective security officers to selected posts to improve continual control and training of foreign national bodyguards and building security guard forces. These additional regional security office positions are supported by the regional bureaus, the Inspector General's Office and the regional-based Associate Directors for Security (ADS).

The justification for each of the additional positions follows.

Beirut, 3 positions (American) and $410,000. The immense protective security requirements generated by the conflict in Lebanon have required the Department to augment the three-officer Beirut Regional Security Office with three TDY protective officers, two of whom have been from another agency since 1981. The other agency, however, has recently advised that it can no longer guarantee availability of personnel for this function. Inasmuch as these agents are part of the Ambassador's protective security detail, it is imperative that two positions be provided as replacements. In addition, a physical security officer position should be established to oversee the post's extensive physical security programs. The request includes $110,000 for salaries and benefits and $300,000 for travel, allowances, post assignment travel and other support costs.

Abu Dhabi, 1 position (American) and $113,000. The current political and security climate in the Gulf requires the establishment of an additional regional security office. The regional security office in Abu Dhabi, which will also cover Muscat and Qatar, will require a secretarial support position. This request includes $17,000 for salaries and benefits and $96,000 for travel, allowances, post assignment travel and other support costs.

Tegucigalpa and San Salvador, 5 Positions (Americans) and $623,000. Because of the high threat status of our posts in San Salvador and Tegucigalpa, each of their security offices have been supplemented by two special protective agents provided by another U.S. Government agency. This arrangement was established due to lack of Departmental personnel resources and to provide training to another agency. This agency has advised us that its training requirements have been fulfilled and due to changing priorities, it can no longer guarantee availability of personnel for the program. Since these agents form an integral part of the Ambassadors' protective security details, four security officer positions are requested as replacements. The requested funds will also provide for a support position for Tegucigalpa.

N'Djamena, 1 position (American) and $135,000. Chad has been in a state of civil war for much of its 22 years of independence. The threat to Americans at post range from getting caught in future terrorist attacks against the Government of Chad to a direct threat from Libyan-backed terrorists. Because of the precarious security situation, our embassy in Chad was assigned a detachment of Marines in May 1984. The funding requested would permit staffing of an RSO to manage the posts security programs.

Lusaka, 2 positions (Americans) and $246,000. Zambia's deteriorating economy has resulted in increases in armed robbery and other forms of criminal violence. The establishment of an RSO position in Lusaka would enable the RSO in Dar es Salaam (which now covers Zambia) to attend the security concerns of this resident and constituent posts. Requested funding would permit staffing of an RSO and a support position.

Manama, 2 positions (Americans) and $246,000. As a result of the ongoing war between Iran and Iraq, the political situation in all states along the Persian Gulf has been adversely affected. With Manama's strategic position on the Gulf and its long established U.S. presence, our personnel there are especially vulnerable. There is also a large Shia Muslim population whose loyalty to the present government is questionable. Currently the RSO Kuwait provides security services to Manama; however, because of the bombing in Kuwait and ongoing political problems throughout the region, he cannot provide adequate coverage. The post is also to be provided a six-man Marine Security Guard detachment which requires professional supervision. RSO Manama would cover Manama and Doha. The requested funds will provide for the establishment of one resident, full-time RSO position and a support position.

Harare, 1 position (American) and $135,000. With the independence of Zimbabwe and establishment of diplomatic relations in 1980, a new embassy was opened in Harare. Political tensions and increasing crime in the country require the establishment of a resident security officer position. In the wake of independence, we have seen increases in armed strife, politically-inspired kidnappings (including of American citizens) and a general degraduation of law and order in the country. The RSO position in Harare would handle one or more additional posts to relieve RSO Pretoria's workload in the Southern tier of Africa.

Athens, 1 position (American) and $129,000. The potential for terrorist (both indigenous and international) operations directed against U.S. personnel/installations, in Greece is very high. Since the assassination of Richard Welch in 1975, Athens, has witnessed 15 political murders. Besides Welch, U.S. Navy Captain George Tsantes was murdered in Athens in November 1983, and U.S. Army Master Sergeant Robert Judd barely escaped assassination in April 1984. All these attacks were carried out by an indigenous group which is violently anti-U.S./anti-NATO. The most conspicuous form of terrorism directed against U.S. interests in Greece has been firebombing. Since 1974, there have been over 300 bombings (the majority being U.S. military vehicles); carried out by various indigenous leftwing groups. Another area of security concern for U.S. interests in Greece could arise over developments in U.S. policy that may be interpreted as inimical to Greek interests (e.g. Cyprus). Internationally, Greece is the crossroads between the Middle East and Europe. Since 86% of all Palestinian attacks occur in Europe, and given the political climate in Beirut, Athens has become a support base for many of these groups. Of the 15 political murders carried out in Greece, nine have been a result of internecine fighting among the various Palestinian groups and/or state-directed terrorism (e.g. Syria, Jordan, Israel). Though Americans have not yet been targeted by these groups in Greece, their presence in country (50,000 Arabs in Athens alone) poses a serious security concern for U.S. personnel and installations. The requested funding would permit augmentation of the regional security office with an assistant RSO.

Lagos, 1 position (American) and $129,000. Rapid economic growth and the unsettled internal political situation of the country have created many problems, the most immediate and serious being crimes of violence. While the majority of victims are Nigerians, the large community of foreign nationals, including Americans, are also being affected by these crimes. Between September and November 1983, the U.S. Embassy in Lagos reported that diplomatic missions and the expatriate community in Lagos had reported a serious increase in crime against non-Nigerians with over 20 incidents of murder, armed car theft, burglary, armed robbery and rape. The problem is exacerbated by the poorly trained and equipped police departments and their unsuccessful attempts to combat the problem. The inability of the Government of Nigeria, to deal with the rampant corruption and economic malaise affecting the country led the military in December 1983 to assume control of the country in a coup. The coup marks the fifth time that the military has seized power since independence in 1960. It remains to be seen if the military government can do a better job of running the country. Until there are substantial improvements in the economic, social and political conditions in the country, the most serious threat to Americans in Nigeria and particularly in Lagos will be violent crime. The funding would permit augmentation of the RSO office with an assistant RSO.

San Jose, 2 positions (Americans) and $240,000. Our embassy and diplomats are very attractive terrorist targets. There is no professional military/police force in the country which can provide the protection we feel we need. As a consequence, the embassy has begun to upgrade its security posture. A new office building is scheduled for construction in FY 1985 and FY 1986 and an enhanced protective security program for the Ambassador is being developed. An assistant RSO position is needed to work with the wide range of programs to accelerate the tightening of the post's security posture. The required funds will also provide for a support position.

Accra, 1 position (American) and $135,000. The 1979 coup in Ghana resulted in political instability and a worsening economic situation in that country. U.S. Government facilities and personnel are spread throughout the capital, making security operations more difficult to implement. Professional security services are presently provided by the Regional Security Officer in Abidjan. In view of the embassy's overall size and scope of operations, coupled with the worsening security situation, a RSO position in Accra is required to provide an appropriate level of direct security support.

La Paz, 2 positions (Americans) and $246,000. The worsening political and economic conditions in Bolivia, coupled with local resistance to U.S.-sponsored narcotics eradication, has caused a definable increase to the security threat directed against the mission and its personnel. There have been several serious threats against the Ambassador, two Consular Agent offices have been bombed and a Binational Center has been ransacked. Most recently, an attempt was made to bomb the Ambassador's residence. The embassy has also been the target of several recent violent demonstrations. A security officer position and a support position are requested for La Paz to enable us to establish a security program which meets the needs of the post.

Geneva, 1 position (American) and $129,000. There is a critical need for the services of an assistant RSO in Geneva. The current staff of one RSO, one full-time secretary and one part-time foreign national security assistant is inadequate for the heavy daily operational requirements of U.S. Mission Geneva. The additional responsibilities associated with the four ongoing disarmament conferences, eight U.S. ambassadors and several classified conferences per month in Switzerland, usually absorb this staff's attention and force lengthy delays in routine security-related activities.

Overseas Special Protective Officers, 14 positions (Americans) and $1,820,000. During the past two years, Office of Security requirements to provide permanent protective security details, utilizing Security Officers for the personal protection of principal officers assigned to high threat posts, have more than doubled. The Office of Security has been forced to supplement its limited personnel resources to staff these growing protective requirements with special ninety-day rotational TDY personnel from other government agencies. This practice has proved highly undesirable, unmanageable, expensive and impractical.

Emergency Response Personnel, 14 positions (American) and $2,490,000. Overseas missions cannot afford to accept gaps in security officer coverage caused by emergencies and personnel transfers and/or home leaves. The presence of a full time professional security officer is required. The funds requested will provide for the establishment of nine security officers and one support position to provide needed coverage during emergencies, assignment gaps, home leaves, R&R periods and to also assist security officers in alleviating work loads caused by extraordinary circumstances. We cannot continue to absorb these needs in a rational fashion without these resources. Four security positions are also requested to support the Associate Directors of Security in Panama, Manila, Nairobi and Frankfort. The four officers will provide continuity in the ADS office while the ADS is traveling. It is also critical to support the ADS regionwide responsibility for emergency planning, coordination with the U.S. military commands regarding evacuation of personnel, sensitive investigations and other related tasks.

Overseas Physical Security Program, 15 positions (Americans) and $55,727,000:

A description of the Department's physical security program requirements follows below. There is no centrally-managed base to support these programs.

Perimeter Barrier Improvements, 9 positions (American) and $40,478,000. These funds are for the purchase, shipment, installation and construction of perimeter upgrade equipment and systems (i.e., vehicle arrest barriers, walls, fences, lighting, guard booths, ballistic transparencies, ballistic and forced entry doors, bollards, earth berms, etc.) at 70 of the 167 foreign service posts requiring these improvements. This request also includes the cost of contract engineers and architects to assist in the design, development and installation of these perimeter security systems. In addition, this request includes nine physical security officer positions (salary and support costs—$678,000). These posts have varying degrees of perimeter protection and the direct-hire personnel would be supported by a contract engineer and where applicable a contract architect.

Internal Physical Security Systems For Short-term Leased Office Buildings, 3 positions (Americans) and $11,986,000. Approximately 50 short-term leased office buildings worldwide have not received the required internal public access control improvements. The Office of Security can complete internal physical security improvements at 10 short-term leased posts during FY 1985 and

FY 1986. These funds will provide these posts with the minimum level of physical security protection. Funds will provide for the procurement, shipping and contract design and installation of technical security equipment (such as closed circuit television systems, walk through metal detectors, access denial systems and alarm systems) and ballistic materials (such as forced entry transparent/opaque doors, walls and windows) for internal improvements.

The requested funds are also to provide for three direct-hire personnel (salary and support—$377,000) to survey and identify security improvements for 115 posts that were not covered by the SPL and European Supplemental PAC/Upgrade programs. This effort requires development of the improvements, review of plans and drawings, identification of necessary equipment, hardware, etc., and tracking the projects through completion.

Overseas Physical Security Management System, 3 positions (Americans) and $1,763,000. Funds would provide for the development and operation of a physical security survey data base located in Washington, D.C. There is no base for this program. This data base would automate and expand upon the Region Security Officers' post surveys. There is no central management information system to produce a total post profile instantaneously. The requested funds would provide for a VS minicomputer, stand-alone systems for each RSO, telecommunication links, line charges and space. In addition, three positions would be established to support this system. These positions include a system manager, one data entry person and one research officer. This staff would 1) design and implement a data base and computerized network to provide immediate Department-wide access to post survey information; 2) obtain materials, products and technology required to implement the data base base; 3) maintain the data base; 4) track and profile the security status of all embassies, chanceries, annexes and other protected overseas State Department establishments which are the responsibility of the Office of Security; and 5) collect, corroborate, research and coordinate information from all offices which support the security at overseas posts. This program will also include funds to contract physical security recorded surveys of chanceries, annexes and residences at all high threat posts. This will include Omnivision video recordings of specially selected high threat posts. These video surveys will improve the Office of Security's ability to provide information in responding to emergencies.

Computer-Assisted Marine Security Guard Control Booth Systems and $1,500,000. The development of this program is a mandatory step in upgrading security systems at our larger missions overseas. The improved PAC/security systems installed at these facilities must be monitored efficiently by our Marine Security Guards. At some of our larger embassies, one Marine Guard in the main control booth must simultaneously: 1) survey the entrance lobby; 2) operate/monitor up to twelve CCTV systems; 3) monitor/activate access controls; 4) monitor/control radio nets; 5) direct visitors; 6) log entries and exits; 7) control packages and deliveries; 8) check alarms; 9) telephone/receptionist duties; 10) operate and monitor walk through metal detector; 11) issue keys; 12) operate Selectone warning system; and 13) monitor Ambassador's vehicle emergency alarm.

The extensive security systems, installed to protect our people abroad, have come to overburden the Marine at the main control booth. Computer security systems allow one person to monitor and record events on multiple systems efficiently. The funds requested would provide for the purchase and installation of 10 computer-assisted systems in fiscal year 1985 and fiscal year 1986. The following posts have been identified to receive these systems: London, Paris, Bonn, Moscow, Rome, Tel Aviv, Jerusalem, Jidda, Tokyo, and Beijing. The estimated cost for each system is $150,000 (includes procurement, shipping and installation). A five year program is anticipated to install the systems at 50 large and medium size posts. Total cost of the five-year program, therefore, will be $7,500,000.

Overseas Engineering Offices, 15 positions (American) and $3,280,000.

Overseas security engineering operations must be reinforced. Most of these security engineering officers will work out of our regional centers in Frankfurt, Athens, Panama, Nairobi, Manila and Casablanca as well as specific posts such as Moscow. They will evaluate and develop security engineering needs; plan and participate in programs to install equipment; as well as manage maintenance of equipment such as closed circuit television systems and electronic alarm devices. The requested funds also provide for tools and equipment for the additional positions.

Additional Seabees: Pay, Allowances and Travel, $4,280,000:

The Office of Security provides Seabee personnel for building construction, maintenance and repair, and for construction surveillance of secure and sensitive areas in U.S. Diplomatic Missions overseas. The present complement of 94 Seabees is inadequate. The base for the 94 Seabees is $3,726,000. Our projected workload requires 50 additional TDY Seabees. The salary and support costs for these additional Seabees, $4,280,000, are broken down as follows:

50 Seabee Enlisted Personnel (Grades E5-E7	$1,568,000
23 percent Surcharge (enlisted personnel)	361,000
33 percent Retirement Accrual Rate Cost	518,000
Travel	1,833,000
Total	4,280,000

Since these 50 additional Seabees will be assigned to the TDY pool, they will be in travel status the entire fiscal year. The travel costs for these additional Seabees are calculated on the basis that each will make three round trips during the year. The estimated costs of airfare for each of these trips is $2,000.00. An average of $80.00 is used to compute per diem costs for the year. A 10 percent factor is also applied to account for emergency travel and airfare/per diem increases. The total estimated travel cost for the additional complement of 50 Seabees is $1,833,000.

Armored Vehicle Programs, $20,224,000:

The base for armored vehicles is $1,500,000. Spending plans are as follows: $500,000 for fully armored leased vehicle contract (30 vehicles in Europe); $400,000 for the light armoring contract (40 new vehicles assigned to Europe); $200,000 for replacement of purchased fully armored vehicles; $200,000 for light armoring kits (field installed by Seabees in Europe); $100,000 for spare parts; and $100,000 for travel and shipping. There are no funds to meet worldwide requirements. A breakdown of these additional requirements follows.

Fully Armored Vehicle Procurement and Support, $16,500,000. The Department currently owns 61 fully armored vehicles (FAVs) which are deployed at high threat posts around the world for Chiefs of Mission. All of these vehicles were procured under the Security Supplemental and Security Enhancement programs. The requested funds will enable us to provide fully armored vehicles for 1) every Ambassador and Consul General at all Category I threat level posts; 2) emergency use purposes, placement of 5 FAVs in each geographic area; and 3) program recurring replacement requirements. A total of 120 FAVs are needed at a procurement cost of $15,000,000, plus $1,500,000 for parts and contract maintenance.

Light Armored Vehicles, Ballistic Material Procurement and Installation, $3,124,000. In order to light armor all of the approximately 403 motor pool vehicles at all Category I and Category II (high) threat level posts, $3,124,000 is required for polycarbonate and aluminum armor procurement and installation costs.

Research and Development: Modified Fully Armored Vehicle Prototype and Locator System, $600,000. In order to identify and provide specifications for a vehicle with the appropriate design and load bearing capability to successfully be modified as an FAV for service under rigorous field conditions a two-year R&D allotment of $250,000 is requested. In addition, in an effort to develop an advanced vehicular alarm and satellite-assisted locator system for the protection of COM vehicles in kidnap/attack scenarios, a two-year R&D allotment of $350,000 is requested.

Marine Security Guard Program, $13,314,000:

Additional Marine Security Guard Personnel, $12,534,000. As a result of the upsurge in terrorist acts directed against our missions abroad and the need to provide greater security against surreptitious entry of our embassies and consulates, an increase of 307 enlisted Marine Security Guards and three officers is requested. These additional Marines would be used to establish 45 detachments. The requested funds will provide start-up and second-year support costs for each new Marine. These costs include housing, utilities, furniture, maintenance, allowances, rotational travel, vehicles and foreign service orientation and security awareness training for NCOIC spouses.

Marine Guard Vehicles for Existing Detachments, $780,000. The Department procured 72 emergency reaction vehicles on a one-time authorization by Congress in 1974. Because of insufficient funds, 52 posts did not receive Marine reaction vehicles. There is no base to equip these 52 detachments with emergency vehicles. MSG-dedicated reaction vehicles provide emergency response capability and serve the administrative needs of the detachment. The total estimated cost for purchasing and shipping for 52 vehicles is $780,000.

Special Protective Equipment Program, $1,488,000:

This $650,000 base program provides for the procurement and shipping of ammunition, protective apparel, tear gas, weapons and other accessories in support of our overseas program.

Ammunition, $630,000. The Department provides ammunition for the semi-annual training of 400 American security officers, 1,560 Marine Security Guards and approximately 4,000 armed contract guards. These security personnel qualify with their SY-

issued revolvers and support weapons (shotguns, submachineguns and modified automatic rifles).

The annual base for the procurement of ammunition is $250,000. The total requirement for ammunition in FY 1985 and FY 1986 is $1,130,000—$630,000 over the base funds available during these two fiscal years. The increase based on (1) 5,650 personnel firing a qualification round with each weapon (total of 200 rounds at $.25) twice a year and (2) $100,000 to provide for rapid deployment of ammunition in emergency situations.

Special Protective Equipment, $300,000. The base for the purchase of special protective equipment, such as weapons, holsters, cleaning kits, speed loaders, bullet proof vests, handcuffs and other support equipment, is $250,000. The Department's current worldwide inventory of this equipment is 5,000 weapons. The estimated replacement life is five years. At an average cost of $300.00 per weapon, the Department uses the entire base to replace weapons each year. As MSG and foreign national guard forces expand and the use of SY officers on protective details increases, additional protective equipment will be required. The requested funds will permit us to support these additional requirements.

Shipment of Ammunition and Special Protective Equipment, $558,000. Due to the extreme weight of the ammunition and special protective equipment shipments, the requirement that the equipment be shipped via secure channels (DOD storage and shipment) and the fact that most cases these items cannot be shipped via most direct route, the costs are higher than shipping general equipment. In fact, the shipping costs approach 30% of the purchase costs. Available base budget funds of $150,000 will allow for shipment of only those items purchased with the currently available $500,000 base for ammunition and special protective equipment. In order to ship the $930,000 of additional ammunition and weapons in FY 1985 and 1986, an increase of $558,000 is requested.

Research and Development Program in Support of Overseas Operations, 20 positions (American) and $22,852,000:

Physical Security Barriers, Materials Research and Development, 5 positions, $5,627,000. The Office of Security has very limited in-house testing and evaluating capabilities to investigate or design new physical security products. To correct this deficiency, funds are requested to contract outside testing and development firms to fabricate new physical security products. The major thrust will be to identify and develop new, reliable vehicular arrest barriers, active and static barriers, ballistic resistant walls, anti-ram fencing, systems to defeat rocket propelled grenades, missiles and other ballistic/explosive attacks. The requested funds would also provide for training of personnel assigned to the Physical Security Division and the testing and evaluation of products to be used in our security systems.

This program also calls for four direct-hire program managers and one EOD specialist (salary and support—$227,000). The research and development to be conducted by private contract firms but supervised by our personnel. They will search for solutions to the vehicular arrest problem, active and static barriers, walls and fencing; develop systems to defeat rocket propelled grenades, other missiles and ballistic attacks; and develop methods to reduce the injury due to flying glass or shrapnel, masonry and metallic. they will oversee a testing program to qualify the developed methods and products. They will also examine possible access denial and public access control systems for the department and its annexes.

The Department's physical security program needs an explosives specialist to develop and assist in the implementation of policy, guidance and explosives security standards for the design of new office buildings and upgraded security systems. These functions coordinating security input into planning and designing bomb-attenuation systems for our buildings, working closely with manufacturers of new bomb countermeasures equipment and ensuring that the Department receives the highest quality equipment. This individual would also be a member of the standing bomb investigation team, which consists of senior experts of the Department and other agencies who investigate bombing incidents against the Department's facilities abroad.

Classified Research and Development Program, 15 positions (American), $17,225,000. In order to counter the expanding threat of technical penetrations, a research and development program must be established. The intent of this program would be stay abreast with current engineering and research developments in the areas of acoustics, electronic and optical transmissions and receptions as they apply to the Embassy's unique situation.

Eleven security engineers are needed to start up a research and development division. In order to meet programmed requirements levied on the Office of Security we must have a research and development effort. We find that domestic vendors are not keeping pace with the rapid pace of technological developments available. In addition, we find unique situations in the more than 150 countries where we have posts. The application of new concepts and materials to strengthen the security of diplomatic mission is imperative. Their development, procurement, application analysis, and transportation to overseas posts is a major endeavor. Four technical and clerical support personnel are needed to satisfy this R&D program.

Overseas Security Coordination, 3 positions (American), $110,000:

The funds requested will provide for two security officer and one clerical positions to coordinate with the foreign affairs and other agencies (CIA, DIA, NSA, USIA, AID, AGR, COM, Justice) regarding overseas security policies and programs. We must also satisfy the taskings from a growing number of interagency committees. The Department is responsible for the security of all USG operations and personnel represented overseas. The Department chairs the Overseas Security Policy Group. These positions will be dedicated to work with each of the agencies on major policy issues affecting every foreign service employee overseas. Examples are residential security, fully and lightly armored vehicles, security awareness training, as well as standard operating procedures for the destruction of classified material.

Threat Analysis Operations, 7 positions (American) and $420,000:

Threat Alert Program, 6 Positions (American), $286,000:

The Office of Security's Threat Analysis Group (TAG) provides tactical analysis for the protection of the Secretary and foreign dignataries, as well as our personnel and facilities overseas. It is not adequately staffed to respond to the real time demands for analysis and recommendations relative to terrorist threats, mob violence and crime. TAG needs six additional positions—two analyst/writers, two research assistants and two support personnel. The additional positions will enable TAG (1) to conduct threat analyses and to prepare threat alerts in a timely manner; (2) to prepare after action reports lessons learned and annual trend projections; and (3) maintain a terrorism/threat profile information base. The requested funds also provide for modification of the office to acommodate the new TAG positions and support equipment.

DESIST Computer Li-brary, 1 position and $134,000:

DESIST is an inter-agency computer library which contains worldwide terrorism information. There is an urgent need for the Office of Counter Terrorism and Emergency Planning (M/CTP) to become part of this system as soon as possible. M/CPT will contribute information on host governments' terrorism policies and responses. At the same time, M/CPT will gain valuable terrorism information provided by other agencies. This is an important means of ensuring that the data used by M/CTP and the U.S. Intelligence Community to prevent or respond to terrorist attacks are complete and current. This request consists of $108,000 for equipment and construction costs, $21,000 in salaries and benefits for a computer analyst, and $5,000 for staff support.

Specialized Security Training, 25 positions (American), $3,170,000:

Mobile Training Team (MTT), 17 positions (American), $1,987,000:

In order to provide security and counterterrorism training for USG employees and their families and specialized security training for contract and host government personnel assigned to protect U.S. government personnel and property, a mobile security training team program should be established. It is envisioned that five three-person MTT teams should be established to provide for annual visits to all high threat posts in order to provide training in the following areas: protective operations; recognition of improvised explosive devices; firearms; offensive and defensive driving; defensive tactics; personal security briefings; surveillance detection; etc. The positions include 16 instructors and one 1 secretary. Operational costs includes furniture, word processing, travel, per diem, equipment, contract audio visual production, and team training.

Specialized Security Training Support, 4 positions (American), $695,000:

The Education and Training Staff is fully encumbered with ongoing training programs. The projected increase of RSO, Seabee and Marine Security Guard positions, and the increased thrust of specialized security and counterterrorist training will require 4 additional positions (salary and support—$168,000). In an effort to increase the professionalism of our overseas security officers, these positions will enable us to improve the security training. These officers would be responsible for the development and coordination of the Office of Security's existing training programs for new agents, RSOs, MSGs, and all Foreign Service personnel security orientation. The training funds will also provide travel, per diem and weapons range equipment for approximately 50 additional RSO officers.

Security Engineering Training, 4 positions (American), $488,000:

The four security engineer positions (salary and support—$488,000) will enable the Department to provide orientation and in-depth training in audio countermeasures and technical equipment repair and maintenance to security officers, security engineers and foreign service personnel. These additional positions will augment the one engineer who is currently attempting to provide this training.

FISCAL YEAR 1985 SECURITY SUPPLEMENTAL SUMMARY OF INCREASES

[Dollars in thousands]

	Positions	Amount
Overseas communications support:		
TACSAT systems	10	$13,163
Radio Support Program	5	9,220
Communications costs related to the FBO initiatives		9,040
Total communications	15	31,423

Office of Communications Requirements—15 positions and $31,423,000:

Overseas Communications Support, 15 positions (Americans) and $31,423,000:

TACSAT Systems, 10 positions (Americans) and $13,163,000:

Although the bombing of our Embassy in Beirut caused serious damage and temporary loss of our regular communications facility, reliable secure communications with the post were never interrupted. We credit this accomplishment to the TACSAT system, which we have had deployed on-site at Beirut for the past year. The lesson we have learned from this tragedy is the value to emergency communications support of pre-positioned tactical satellite systems. In order to improve our security related communications posture worldwide, the Department proposes to procure and position an additional 25 such systems; one to be placed at each of the 20 most highly threatened posts, and 1 system at each of the five Regional Offices of Communications. The current inventory of 4 systems (8 units—2 units per system) includes the one system dedicated to Beirut. The other three systems have been in constant use throughout the past year. The 1985 budget includes funds for procurement of an additional 4 systems (8 units). Therefore, without this supplemental, the Department's total TACSAT resource for 1985 will be 8 systems, which is far fewer than required to provide adequate worldwide emergency communications support. Including those systems required at the receiving end in the Department, the total number of systems required is 33.

In addition to equipment procurement, a key element in ensuring the availability of TACSAT support for our personnel is the dedicated lease of the "space segment," or satellite channels over which the TACSAT operates. Currently such channels are provided to the Department on an ad-hoc basis through the Department of Defense. The negotiations required to establish such borrowed channels can delay the establishment of the communications link a delay which may ultimately have tragic repercussions. Four channels are required to cover the world, at a per channel cost of $1.75 million. The Department's main Communications Center will act as the network control base for this worldwide TACSAT system.

The costs of providing this level of TACSAT support total $13,162,750 and 10 positions: $11,520,750 for the program (including satellite channel lease); $840,000 for contract support, $587,000 for position support and $215,000 for salaries. Program costs include: 25 fully redundant systems, 1 system to be placed at each of the five ROCs (Regional Office of Communications) and 1 system to be placed at each of the 20 highest threat posts, $4,275,000; a satellite lease of 4 segments, one for each region, $7,000,000 each year; travel $158,000, OPR/ST warehousing $87,750.

The additional 10 positions requested to support this effort are as follows: 1 Crisis Operations Officer, FP-4; 3 TACSAT Network Controllers, FP-5; 1 Logistician, GS-10 and 5 Communications Electronics Officers—Radio, FP-4. In addition, this request includes $840,000 for contract support—which reflects the services of contract personnel for the first 6 months of the program while personnel are being hired. This approach will enable the Department to begin work on the program immediately upon receipt of funds, rather than delaying program implementation until personnel actions are completed.

Radio Support Program, 5 positions (Americans) and $9,220,000:

The Department must augment the inventory level and support base for the standard UHF/VHF radios used by the Department's security agents and guards, and provide voice privacy radio systems for the 50 most threatened posts worldwide.

The Department currently has an inventory of 10,000 UHF/VHF radios overseas, plus repeaters and other system elements. This inventory is supported by a FY 1984 base budget of $2,000,000, or 5% of inventory value. A base of $6,000,000 or 15% of inventory value is required to provide timely radio replacement and adequate support. The FY 1985 budget includes an additional $1,000,000 increase to the UHF/VHF radio support base, for a FY 1985 base of $3,000,000 (8% of inventory value), as part of a four year effort to bring he support base to the required level of $6,000,000. The first element of this request is to accelerate that increase form four years to two, by increasing the $3,000,000 FY 1985 base by an additional $1,500,000 for a total FY 1985 UHF/VHF radio support base of $4,500,000 and an FY 1986 base of $6,000,000.

The second element of this request is directly related to the proposed increase in security positions. Of that request, 105 positions will require dedicated use of a UHF/VHF radio. However, the Department has no funds to augment its radio inventory. We must, therefore, request an increase in funds in order to provide these new radios. At $2,000 per radio, plus 15% for spares, support, shipping, etc., the security personnel related radio increase total $241,500.

The third element of this request is an acceleration of the voice privacy radio program included in the FY 1986 budget request. This program will supplement the regular radio program with a protected channel on a separate radio system for use by the Ambassador, Deputy Chief of Mission, Marine Service Guards and Security Officers. Protection is provided by scrambling the message being sent: only those persons with the proper decoder can receive the information being transmitted. There is no base fund for the procurement of such systems. This request will enable the Department to procure and deploy 50 voice privacy radio systems in FY 1985, at a total cost of $6,025,000.

In addition to the procurement of radios, this program includes a request for $625,000 to provide regional depot maintenance for overseas radios. This represents a new initiative for the Department. Until now, all maintenance and logistics has been centralized in Washington, with limited field support from the Regional Offices of Communications. This increase will enable us to decentralize the support function, which will result in more timely and cost-effective radio support service. There will be 5 regional centers, one at each Regional Office of Communication. Each regional depot will cost $125,000, which will include locally hired contract personnel, depot and stock supplies, and limited facilites renovations required to provide secure storage and work areas.

A total of 5 positions, and six months' service of contract personnel are requested within this item, at a total cost of $828,000 ($490,000 for position support, $118,000 for salaries, and $220,000 for contractor support). The personnel requested within this item will support both the regular and the voice privacy radio systems. The positions include 5 Communications Electronics Officers—Radio (FP-4) to be located at each of the 5 Regional Offices of Communications. Current workload analyses indicate the Department is already suffering from personnel deficits in the radio maintenance and logistics areas, and cannot absorb the additional workload which will be required to support this supplemental increase.

Communications Costs Related to the FBO Initiatives, $9,040,000:

The Department is requesting funds for construction of embassies at 10 locations, each of which will require additional funding for communications equipment and enclosures. Per post communications operating equipment averages $904,000—which includes automated terminal equipment, classified information handling system, enclosure, secure phone installation, and telephone key systems. It will not be possible for the Department to absorb the communications equipment portion of the FBO initiatives within its base programs.

FISCAL YEAR SUPPLEMENTAL SUMMARY OF INCREASES

[Dollars in thousands]

	Positions	Amount
Emergency, planning, management and exercises:		
Emergency management exercises	9	$1,283
Office of Counter Terrorism and Emergency Planning Terrorism Incident Management	3	106
Total, emergency planning, management and exercises	12	1,389

M/CTP Requirements—12 positions and $1,389,000:

Emergency Planning, Management and Exercises, 12 positions (American) and $1,389,000:

Emergency Management Exercises, 9 positions (American) and $1,283,000:

In cooperation with all foreign affairs agencies and military commands, the Department of State has initiated a program of overseas training exercises to assure that Emergency Action Plans for dealing with terrorist incidents and other types of emergencies are workable and up-to-date. These exercises intensively test the ability of a post to implement its Emergency Action Plan while undergoing a series of simulated crises. Participants have found the program to be highly effective in training personnel and in refining posts' emergency action plans and procedures. Until now, funding for these exercises came from the 1982 Security Supplemental and expired in FY 1984. This request provides for the creation

of an expanded, cost-effective global program that will reach every Foreign Service post within a two to three year cycle. The exercise program will now be a regular, ongoing part of the Department's comprehensive security program. This request consists of $900,000 for exercise travel and evaluation costs, $253,000 for salaries and benefits, and $130,000 for support costs (primarily space renovation and acquisition of secure word processors). The resources will be distributed between the following offices:

Office for Counter Terrorism and Emergency Planning (M/CTP), 8 positions and $1,243,000. The pilot project to develop the exercise program relied primarily on outside contractor involvement and one officer position within M/CTP. In order to carry out the program expansion, as well as to take responsibility for primary exercise development, maintenance and implementation, M/CTP will have to be augmented by one FO-02 and six FO-03 plans officers and one FS-05 secretary.

Office of Security, 1 position and $40,000. The Office of Security is responsible for reviewing and critiquing post emergency action plans, and participates in the emergency management exercises. In order to carry out these responsibilities effectively, one FP-02 security officer position is required. The additional position will enable the Office of Security to consolidate these critical functions within the responsibilities of a single officer.

Office of Counter Terrorism and Emergency Planning (M/CTP) Terrorism Incident Management, 3 positions and $106,000:

Four area officers and one secretary currently attempt to cover the entire world within the incident management section of M/CTP. The area officers are increasingly unable to keep abreast of terrorist activity, both because of the large geographic areas that they cover, and because they also each carry three or four functional responsibilities such as public affairs, intelligence liaison, consular liaison, and export controls. One additional geographic area officer, a congressional/public affairs officer and a secretary would permit more effective operations and provide better backstopping when regional officers are travelling or working on special projects. This request consists of $83,000 in salaries and benefits and $23,000 in support costs.

FISCAL YEAR 1985 SECURITY SUPPLEMENTAL SUMMARY OF INCREASES

[Dollars in thousands]

	Positions	Amount
Overseas security support:		
Office and warehouse space		$2,138
Building services personnel	4	157
Warehouse personnel	7	142
Dispatch Agency personnel	2	55
Procurement staffing	8	258
Automation of supply, transportation, and procurement	3	545
Motor vehicle program	2	2,163
Other administrative support:		
Financial management	10	330
Personnel management	4	127
Subtotal, administrative support	14	457
Total, overseas support	40	5,915
Physical security for main state:		
Shatter resistant film for windows for main state		280
Main state perimeter security upgrade		1,400
Main state lobby security upgrade		265
Access control systems		508
Security/emergency alarm system		150
Total, security for main state		2,603
Total, administration	40	8,518

Administration Requirements—40 positions and $8,518,000:

Overseas Security Support, 40 positions (Americans) and $5,915,000:

Office and warehouse space, $2,138,000:

This increase is to rent the additional office and warehouse space required to house the people and equipment requested to enhance the security or our overseas missions. The amount of office space has been calculated at 135 square feet per person. This increase includes $1,000,000 for 100,000 square feet of warehouse space, $638,000 for 25,500 square feet of office space, $200,000 for 24 hour guard service for two additional buildings, and $300,000 to set up the space (shelves, forklifts, files, etc) at the new warehouse space.

Building services personnel, four positions (Americans) and $157,000:

The General Services Division will require the following additional personnel to acquire, remodel and service the additional space requested above:

One Space Manager (GS-12);

Two Building Services Specialists (GS-11); and

One Clerk/Typist (GS-04).

The cost of these new positions will be $107,000 ($78,000 salaries and $29,000 for position support costs). New security measures to control access to the building will also require additional contractual receptionists at the entrances ($50,000).

Warehouse personnel, seven positions (Americans) and $142,000:

Current warehouse space to support Security and Communications is already taxed to capacity, handling the current level of programs. The delivery of another $50,000,000 to $75,000,000 of security and communications equipment for storage, staging and packing will dramatically increase the current workload. This workload will require the following additional 7 warehouse personnel staff for clerical and routine warehouse duties:

Five Warehousemen (WG-5);

One Supply Specialist (GS-09); and

One Supply Specialist (GS-12).

The cost of these new positions will be $142,000 ($101,000 salaries and $41,000 for position support costs).

Dispatch Agency personnel, two positions (Americans) and $55,000:

The workload on the Dispatch Agencies in Baltimore and Miami will increase substantially in handling the increased number of vehicles, security and communications equipment. One Traffic Management Specialist is required at each of the Baltimore and Miami Dispatch Agencies to handle increased shipping negotiations and special shipments arrangements. This estimate includes $35,000 for salaries and $20,000 for position support costs.

Procurement staffing, eight positions (Americans) and $258,000:

As requests in the FY 1985 and 1986 budgets reflect, the Office of Procurement is already understaffed to handle the current procurement workload properly. The procurement of equipment and supplies requested will nearly double the annual workload of the procurement office. To handle this increased workload the office of procurement will require the following 8 positions:

One Contract Administrator (GS-12);

One Price Analyst (GS-11);

Two Contract Officers (GS-11);

Two Procurement Officers (GS-11); and

Two Clerk/Typists (GS-4).

The cost of these new positions will be $258,000 ($153,000 salaries and $105,000 for position support costs).

Automation of Supply, Transportation and Procurement, three positions (Americans) and $545,000:

The current timetable for the development of the individual systems in the Supply, Transportation and Procurement (STP) Offices did not anticipate this proposed level of procurement, storage and shipment. With the increased workload and the addition of new personnel in all three divisions, additional hardware ($350,000) and software development ($120,000) will be required. In addition, a systems manager and 2 input clerks are required at the supply center ($50,000 salaries and $25,000 position support cost).

Motor vehicle program, two positions (Americans) and $2,163,000:

With this new security initiative, it is expected that a considerable number of additional fleet vehicles will receive partial armor treatment. Experience the Department has gained over the past few years indicates that the small vehicles that we buy (Citations, K cars, etc.) under the GSA price limitation are inadequate for armoring. We anticipate that OPR will be required to purchase larger fleet vehicles, with each larger vehicle costing an additional $7,000; it is projected that 300 vehicles will be upgraded.

The procurement of additional Marine security guard vehicles, fully armored vehicles and other types of security vehicles, will require 2 additional inventory management specialists ($63,000 for salaries and support) in the Motor Vehicle Program. These positions will be responsible for the procurement, shipping, inventory, reporting, and other related activities.

Overseas security administrative support, 14 positions (American) and $457,000:

This increase provides for the augmentation of the current financial and personnel framework required to support this effort.

Financial management, 10 positions and $330,000. These positions are required to provide a wide range of financial services in support of this supplemental. Two of these positions will be located in the Bureau of Administration's Financial Management Division and eight in the Office of the Comptroller.

Personnel management, four positions and $127,000. Personnel will require three personnel management specialists and one personnel technician to support the proposed position increases. This will provide for one Personnel Management Specialist and one Personnel Technician in the Bureau of Administration's Personnel Division, and two Personnel Management Specialists in the Bureau of Personnel.

Physical Security for Main State, $2,603,000:

Shatter resistant film for windows of Main State, $280,000:

The threat of a vehicle bomb and its potential for causing extensive damage will exist indefinitely. Detonation of a bomb in the vicinity of the Department would result in a large number of windows being blown from their frames, causing damage and injuries to personnel within the building. To reduce some of the danger from such an occurrence, we propose to cover 4,000 windows at a cost of $70 per window in Main State with a protective covering, similar to that already installed at a number of our overseas posts. There is no base program for this improvement.

Main State perimeter security upgrade, $1,400,000:

Funds have already been committed to upgrade external perimeter security at Main State in direct response to a very real domestic vehicular bombing threat. The upgrade consists of permanent vehicle ramp barriers and temporary perimeter barricades at our pedestrian entrances and vulnerable perimeter locations. These security measures will only protect the pedestrian and vehicular entrances to the building and not the perimeter. An additional $1,000,000 is required to replace the temporary perimeter barriers with a permanent security barrier system. The planned barriers would be aesthetically pleasing, fully functional regarding the diplomatic and public requirements of the Department, and would meet all security specifications. In addition, $400,000 is also required to install perimeter lighting ($100,000) and establish a new control center for building security ($300,000).

Main State lobby security upgrade, $265,000:

The lobbies of the Department will have to be redesigned to accommodate new security procedures. This will include construction of a new desk for the receptionists and an upgrade of power to handle new security access equipment. Estimated costs for this are:

Desks for receptionists	$100,000
New barriers for lobbies	140,000
New power panels for security devices	25,000
Total	265,000

Access control systems $508,000:

These funds are required to replace the present ID Card program with a new computerized system which (1) will provide greater protection against duplication/forgery, (2) will feature a more durable card, (3) will consolidate our ID card process and (4) will permit integration of our leased ADT alarm systems. The new access control system will be used within Main State at our entrance/exits, vehicle ramps, restricted and other sensitive areas. The estimated cost for this new ID card system is $428,000.

In addition, $80,000 is required to construct a controlled area within Main State for after-hours use by the press in order to provide maximum protection to the Department and its classified material. Currently, several thousand foreign and American press personnel have access to the unrestricted areas of Main State on a twenty-four hour basis, seven days a week. The renovation would greatly improve the security of Main State while imposing no unreasonable restrictions upon the press.

Security/emergency alarm system for Main State, $150,000:

During fiscal year 1984, there were two incidents of fire at the Department which demonstrated some very serious inadequate of the capability of the alarm system at Main State to notify building occupants to evacuate. During recent tests of the existing system, a large number of units were inoperative. To provide the Department with an effective internal security/emergency notification system, we propose the replacement of the existing system with a new signaling system.

DEPARTMENT OF STATE—FISCAL YEAR 1985 SUPPLEMENTAL ESTIMATES OMB SUBMISSION

Rewards for information concerning terrorist acts

Appropriation: Rewards for Information Concerning Terrorist Act, PL: 98-411.

Appropriation Requested to Date: 0, request: $10,000,000.

Amended Appropriation Requested: $10,000,000.

Purpose and Need for Supplemental Funds

Rewards for Information Concerning Terrorist Act

Justification

Rewards for Information Concerning Terrorist Acts, $10,000,000:

This new program, which is proposed to be authorized under Chapter 204 of Title 18 of the US code, will establish a fund without fiscal year limitation to reward individuals who furnish information concerning terrorists acts in foreign countries against United States persons or property. The program, viewed in its entirety, authorizes the payment of rewards for information concerning terrorist acts both within the United States and abroad, and thus falls under the respective jurisdictions of the Secretary of State and the Attorney General. This supplemental request reflects only the portion of the program which will be administered by the Secretary of State.

Terrorism against USG civilian personnel, members of our armed forces, and American citizens abroad has become a growing danger in the past fifteen years. In the past decade alone, Americans have been the victims of more than 2,500 terrorist incidents. The rewards program is one of several new Administration initiatives aimed at combatting terrorism against United States persons and property abroad. This authority can be invaluable in obtaining information necessary to resolve successfully incidents such as kidnappings or hostage takings, and in bringing perpetrators of terrorist attack to justice. In a kidnapping, for example, weeks can pass without communication being established with the kidnappers. Early information is imperative to bring about the swift release of the victim. The offer of a substantial reward can encourage in informant to provide early accurate information to bring about successful resolution of an incident. The rewards program will also encourage informants to provide information invaluable to capturing and prosecuting terrorists. Importantly, rewards may also induce members of terrorist groups of other close to them to desert and provide information necessary for the capture and successful prosecution of group members, thus weakening the organization and negating its ability to commit further terrorist acts.

This request for $10,000,000 would establish a fund large enough to demonstrate that the United States will aggressively use the rewards program to impede terrorists. It is also important that enough funds remain available for the USG to act quickly if critical information can be obtained. For these reasons, and because it is impossible to predict the frequency and the size of rewards to the granted annually, it is necessary that the funds be established without fiscal year limitation.

It is anticipated that subsequent appropriation requests will be made as required to replenish the account as payments are granted.

Acquisition, Operation, and Maintenance of Buildings Abroad

Appropriation: Acquisition, Operation, and Maintenance of Buildings Abroad, PL: 98-411.

Appropriation Requested to Date: $211,000,000; request: $175,542,000. Amended Appropriation Requested: $386,542,000.

Purpose and Need for Supplemental Funds

Emergency Security Protection for U.S. Personnel and Missions

The suicide vehicle bombing attempt against our embassy annex in Beirut on September 20, 1984, the fourth such attack against U.S. facilities in the Middle East within the last eighteen months, underscores once again the vulnerability of U.S. personnel and facilities overseas to determined terrorist attack. This incident confirms the serious recent escalation in the security threat to our operations in the world in general and in the Middle East in particular.

In the face of this situation, the Department has taken several actions to protect against future instances of terrorists attack. In the short term, all posts have surveyed their physical vulnerability to vehicle penetration, and have taken actions to increase their security. In addition, a number of other programs are being requested to enhance our short-term security, anti-terrorism and communications capabilities. In addition to these short-term improvements, the Department has carefully reviewed the status of our world-wide facilities with regard to location, access, vehicle protection, physical security, and other security-related limitations.

From this review we have identified thirteen of our more threatened posts where new buildings or renovations of existing facilities are required due to the inability of the current structures to meet minimum levels of anti-terrorist and anti-vehicle standards, and where the planning for a new construction project is already well advanced. Thus, these represent projects which can start relatively quickly, and which only need sufficient funds and, in a few cases, some additional design/development work. Among the major impediments to additional security improvement of our existing buildings at these posts are such specific factors as the location of the building directly on a major urban street, the unsuitability of the materials used in constructing the building to renovation activities, and the fact that many of these properties are under short-term lease instead of being owned by (and thus completely under the control of) the U.S. Government.

To provide adequate and secure space at these thirteen posts, our existing facilities must be replaced by new office building (NOB) or renovation projects, in which additional security features can be included as an integral part of the design and construction process.

[Classified.]

In order to support these projects, a total of 42 positions are requested. These include 27 domestic support positions and 15 overseas project managers to provide on-site supervision over these projects. Finally, $1 million is requested for an innovative research and development project involving the application of the latest technical and physical technology to the design and development of future overseas construction projects. In this way, it is hoped that the numerous individual lessons the Department has learned over the past decade in the areas of security and construction can be analyzed and incorporated along with state-of-the-art technology into a uniform approach towards future activities.

APPROPRIATION LANGUAGE

Acquisition, operation, and maintenance of buildings abroad

For an additional amount for the Department of State's "Acquisition, Operation, and Maintenance of Buildings, Abroad," $175,542,000 to remain available until expended.

Grand total	42	175,542

FISCAL YEAR 1985 SECURITY SUPPLEMENTAL ESTIMATES

Acquistion, operation and maintenance of buildings abroad, state—justification

Capital Program Projects, $172,511,000: (Classified.)

Project Support, 42 positions (Americans) and $3,031,000:

These new construction projects will be undertaken at a time when a number of other high priority programs, such as fire safety, communications and energy retrofits, and public access controls/safehavens construction, are already adding considerably to the Office of Foreign Buildings workload. In recognition of this fact, an additional 42 positions will be required (27 domestic and 15 overseas). Justification for these additional positions follows.

Domestic Project Support, 27 positions and $957,000:

Two Assistant Area Branch Chiefs (FP-02) are required to coordinate the needs of the project and the daily flow of change orders, submittals and claims, as well as monitoring Government Furnished Equipment (GFE) materials.

One Construction Scheduler (FP-04) is required to provide a management overview of the major milestones of each of these new construction projects.

Fifteen Architects and Engineers (GS-13/14—9 Architects, 2 Electrical Engineers, 2 Mechanical Engineers and 2 Civil Engineers) are also required. The proposed supplemental adds over $174,000,000 to the Capital Program budget and approximately 13 new major design projects to the already existing workload. In order to expedite the design to meet the programmed construction schedule, it is recommended that an additional 9 architects be added to the staff.

This will result in a ratio of approximately one architect for two active projects, which will allow for a close working relationship and control over the daily progress of the contract architects. With the additional manpower, the time required to complete a project (and quality of work) will be reduced by approximately one third, since each architect will be able to review and complete action in a timely manner.

The additional workload and necessity to expedite this program on schedule will also require the additional service of 6 engineers (2 mechanical, 2 electrical and 2 structural/civil) to complement the current engineering staff. Each engineer will be assigned approximately 6 projects, based on their speciality.

This request for additional positions is based on many years of experience which clearly indicates that the present staff of technical officers could not handle the additional workload. It is simply not possible for one project architect or engineer to manage and adequately direct the completion of numerous overseas projects simultaneously. Given the world-wide travel required and the special design requirements and features of each structure, it is strongly recommended that these additional positions be approved.

Two Contract Specialists (GS-9/12) are required due to the increase over the current workload level created by this request. The Contract Branch is currently understaffed and hard pressed to provide the necessary support required to develop contract documents, negotiate contracts and review contract proposals to determine which bidder submits the lowest responsive bid. This responsibility also requires travel to posts for qualifying bidders and additional travel for prebid conferences to review contract documents with qualified bidders.

One Procurement Specialist (GS-12) is needed due to the considerable requirement for the procurement of GFE created by this number of additional projects.

One Administrative Assistant (GS-11/12) for the Building Design Division will assure that schedules are met, office procedures are followed, telegrams are answered, and travel requests are properly submitted.

Two Budget Analysts (GS-11/12) are needed to augment the currently understaffed Budget Office, in light of the proposed additional supplemental funds.

Three Secretaries (GS-06) are needed to handle the additional work load caused by this request in the Building Design and Construction Management Divisions.

Overseas Project Support, 15 positions and $1,074,000:

Fifteen Project Manager positions are also required for the proposed Construction project. Past experience demonstrates conclusively that it is virtually impossible to assure close supervision and quality control over these major, multimillion dollar construction efforts without dedicated Project Managers available for on site supervision and backup in Washington. For each of the eleven largest projects, we are requesting that two Project Managers be made available to assure maximum supervision and backup. This will require a total of 24 Project Managers. Nine of these positions will be reassigned from current staff, leaving a requirement for 15 additional positions.

Advanced Physical and Technical Research Project, $1,000,000:

The goal of this program is to design the model Embassy that will meet security, operational and program requirements and will serve as the prototype for worldwide application. The empahsis will be on research and development that will establish a

benchmark of minimum requirements which all future Embassy designs will follow as well as setting forth criteris for site identification.

This program will be an anticipatory project that will build into our future designs lessons we have learned from our ongoing security efforts. It will implement knowledge gained about electronic countermeasures and information gained from our Security Enhancement Program. Research and development emphasis will also be placed on new ballistic and forced entry materials.

Imaginative use of technology that can be applied directly to the construction process will be explored. This project is a cost effective approach. Cost savings will be realized by eliminating retrofit costs as designs will include new security technology from the inception of the project.

DEPARTMENT OF STATE, ACQUISITION, OPERATION, AND MAINTENANCE OF BUILDINGS ABROAD, FISCAL YEAR 1985 SUPPLEMENTAL ESTIMATES, OMB SUBMISSION—REQUIREMENTS BY OBJECT CLASS

Total obligations	42	32	175,542

U.S. INFORMATION AGENCY—FISCAL YEAR 1985 SUPPLEMENTAL ESTIMATES, OMB SUBMISSION

Salaries and expenses

Appropriation: salaries and Expenses, PL: 98-411.

Appropriation Requested to Date: $545,856,000; request: $5,315,000.

Amended Appropriation Requested: $551,171,000.

Purpose and Need for Supplemental Funds

Emergency Security Protection for U.S. Personnel and Missions

USIA requires $5,315,000 in Security Supplemental funds to increase protective measures at its 190 cultural centers, libraries, regional services centers offices and Voice of America radio relay stations worldwide which are located independent of State Department buildings. Because of the public nature of these facilities, and our mission to foster an open and free exchange of opinion representative of our democratic government, in most cases a complete securing of Agency building cannot be accomplished. However, all of our overseas facilities require perimeter and public access controls to include vehicle countermeasures designed to slow down and deter suicidal or remote control bombers from penetrating perimeters, such as occurred in Beirut and Kuwait. The establishment of physical security controls at buildings requires manpower to operate these controls, screen visitors, and provide an early warning capability; therefore additional contract guards are needed at these faciities. Providing light armoring on official passenger carrying vehicles at the most threatened posts worldwide, will improve protection for employees enroute to the office.

Staff and funding increases are essential to support heightened security programs at overseas posts. Technical security equipment procurement as well as stocks of protective security equipment in support of post needs will also be necessary. The enhancement of the security profile of overseas sites should be accelerated in view of the VOA expansion program which is significantly raising its visibility worldwide, particularly in Latin America.

APPROPRIATION LANGUAGE

Salaries and expenses

For an additional amount for the United States Information Agency's "Salaries and Expenses." $5,315,000 of which, $3,680,000 is to remain available until September 30, 1986.

FISCAL YEAR 1985 SECURITY SUPPLEMENTAL SUMMARY OF INCREASES

[Dollars in thousands]

	Positions	Amount
Vehicle armoring:		
Overseas light armoring		$490
Domestic light armoring		150
Total, vehicle armoring		640
Perimeter and public access controls		2,500
Contract Guards		1,600
Program support positions	2	35
Emergency radios:		
VHF hand-held, mobile and base radios		150
HF long-range radios		120
Total, Emergency Radios		270
Domestic security equipment		270
Total, USIA	2	5,315

FISCAL YEAR 1985 SECURITY SUPPLEMENTAL ESTIMATES

Salaries and expenses—Justification

USIA Requirements—2 positions and $5,315,000:

Vehicle Armoring, $640,000:

Overseas light armoring, $490,000:

Immediate on-site light armoring of USIA official vehicles at the most threatened posts worldwide—35 posts, 2 vehicles per post, at $7,000 each.

Domestic light armoring, $150,000:

Domestic light armoring of replacement official vehicles at the most threatened posts—25 vehicles at $6,000 each.

Perimeter and Public Access Controls, $2,500,000:

Enhances physical security barriers at USIA's 190 overseas cultural centers, libraries, regional services centers. Voice of America radio relay stations, and offices worldwide located independent of State Department buildings. Includes vehicle countermeasures such a hydraulic vehicle arrest systems at entrances and driveways, fences, gates, and bollards to deter and/or slow potential vehicle bombers from attacking our facilities. Also includes use of plastic film or ballistic transparencies on window areas, grills, hardened walls and doors, segregation of public areas from staff offices, and creation of secured areas where the staff can seek refuge, regroup and escape to safety in an emergency.

Contract Guards, $1,600,000:

USIA requires additional contract guards during working hours at a number of its overseas posts to perform public access control functions to include vehicle inspection and operation of vehicle arrest systems at driveways/entrances.

Additional Personnel, $35,000:

Two additional program support positions are requested to augment existing USIA staff. This will provide for one procurement clerk and one warehouseman to support procurement of additional security hardware and to maintain security stock inventory as well as to arrange for immediate shipment to posts in response to changing threats.

Emergency Radios, $270,000:

VHF hand-held, mobile and base radios, $150,000:

VHF hand-held, mobile and base radios on U.S. Mission emergency network are required to incorporate USIA employees into Mission plan.

HF long-range radios, $120,000:

HF long-range radios are required to connect isolated branch posts with Embassies and main USIA office.

Domestic Security Equipment, $270,000:

Access control systems at the main USIA building in Washington. Automated access for employees in restricted areas, package control and screening at public access points, and perimeter detection devices.

Automated access computer systems	$250,000
ID cards	20,000
Total	270,000

Mr. PERCY. Madam President, in conclusion, we must assume that terrorism is a new form of warfare which will be with us for the foreseeable future. It is incumbent upon us to do all that we can to protect American lives abroad. Therefore, I urge my colleagues to vote for the passage of H.R. 6311.●

● Mr. DENTON. Mr. President, I rise in support of H.R. 6311. The bill, as you know, incorporates most of the provisions of S. 2625, the act for rewards for information concerning terrorist acts, which my distinguished colleague, Senator THURMOND, and I, introduced on May 2, 1984, and which was unanimously approved by the Senate Judiciary Committee.

H.R. 6311, as passed by the House, deletes two important provisions that S. 2625 contained: First, a provision that would have permitted the Attorney General, in consultation with the Secretary of State, to admit into the United States, without regard to the Immigration and Nationality Act, aliens who provide information about terrorism; and second, a provision that unquestionably would have made the

Freedom of Information Act, the Privacy Act, and the Administrative Procedures Act inapplicable to S. 2625.

Notwithstanding the fact that the House deleted these two important provisions, the House bill is one we can live with. The House version does grant the power to the Secretary of State and the Attorney General, when it is determined that the identity of the recipient of a reward or of the members of the recipient's immediate family must be protected, to "take such measures in connection with the payment of the reward as deemed necessary to effect such protection." The way I read that language, the Attorney General or the Secretary of State could, if they deemed it necessary, withhold the identity of a reward recipient or his immediate family notwithstanding the provisions of the Freedom of Information Act and the Privacy Act to the contrary.

H.R. 6311, to its credit, also contains the approximately $360 million authorization sought by the administration for security enhancements at U.S. missions abroad.

I learned early on in my Senate career that compromise is necessary at times, and that half a loaf is better than none. In this instance, we seem to have in H.R. 6311, about seven-eighths of a loaf. For that reason, I urge its passage.●

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 6311) was read the third time and passed.

Mr. BAKER. Madam President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Madam President, I ask unanimous consent that S. 3036, which is Calendar No. 1266, the Senate companion measure, be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXCHANGE OF CERTAIN LAND

Mr. BAKER. Madam President, I now ask the Chair lay before the Senate Calendar Order No. 1316, H.R. 3331.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 3331) to authorize the exchange of certain lands between the Bureau of Land Management and the city of Los Angeles for purposes of the Santa Monica Mountains National Recreation Area.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 7075

Mr. BAKER. Madam President, on behalf of Senator Wallop, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Tennessee [Mr. BAKER], on behalf of Mr. WALLOP, proposes an amendment numbered 7075.

Mr. BAKER. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 1, strike "paragraph" and insert "paragraphs".

On page 2, lines 3 and 4, strike "(acting through the Bureau of Land Management)".

On page 3, line 2, strike the quotation marks and insert the following new subparagraph:

"(C) The city shall assume full responsibility for the protection of cultural resources and shall develop a cultural resource management program for the public lands to be transferred to the city in the vicinity of the Haiwee Reservoir. The program shall be developed in consultation with the Secretary of the Interior, the California State Historic Preservation Officer, and the Advisory Council on Historic Preservation.".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 7075) was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill (H.R. 3331) was read the third time, and passed.

Mr. BAKER. Madam President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

COAST GUARD AUTHORIZATION ACT OF 1984

Mr. BAKER. Madam President, I ask unanimous consent that the Senate proceed to the consideration of S. 2526.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2526) to authorize appropriations for the Coast Guard for fiscal years 1985 and 1986, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Commerce, Science, and Transportation with an amendment to strike all after the enacting clause and insert:

That this Act may be cited as the "Coast Guard Authorization Act of 1984".

AUTHORIZATION OF APPROPRIATIONS

SEC. 2. Funds are authorized to be appropriated for necessary expenses of the Coast Guard for fiscal years 1985 and 1986 as follows:

(1) For the operation and maintenance of the Coast Guard, including expenses related to the Capehart housing debt reduction and expenses related to the full amount of fixed costs associated with icebreaking operations by five Coast Guard icebreaking vessels in polar regions, $1,800,000,000 for fiscal year 1985 and $1,950,000,000 for fiscal year 1986; and such additional sums for each fiscal year as may be necessary for increases in salary, pay, and other employee benefits as authorized by law.

(2) For the acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto, $580,000,000 for fiscal year 1985 (of which $30,000,000 shall be for design, survey, acquisition and construction of a search and rescue facility at Dutch Harbor in the Aleutian Islands) and $680,000,000 for fiscal year 1986 (of which $30,000,000 shall be for construction of such facility).

(3) For research, development, test, and evaluation, $35,000,000 for fiscal year 1985 and $38,000,000 for fiscal year 1986.

(4) For the alteration or removal of bridges over navigable waters of the United States, constituting obstructions to navigation, $5,200,000 for fiscal year 1985 and such sums as may be necessary for expenses of the Coast Guard for such purposes for fiscal year 1986.

(5) For retired pay including the payment of obligations thereof otherwise chargeable to lapsed appropriations for this purpose, and payments under the Retired Serviceman's Family Protection and Survivor Benefit Plans, and for payments for medical care of retired personnel and their dependents under the Dependents' Medical Care Act, such sums as may be necessary for fiscal years 1985 and 1986.

PERSONNEL LEVELS

SEC. 3. Notwithstanding any other provision of law, the Coast Guard's personnel levels for fiscal years 1985 and 1986 shall be maintained as follows:

(1) For active duty military personnel, not less than 39,392 for fiscal years 1985 and 1986, which shall not include members of the Ready Reserve called to active duty under the authority of section 712 of title 14, United States Code, or Public Health Service officers on active duty with the Coast Guard.

(2) For full-time civilian employees of the Coast Guard, not less than 5,484 for fiscal years 1985 and 1986.

MILITARY TRAINING

SEC. 4. For fiscal years 1985 and 1986, the Coast Guard is authorized average military training student loads as follows:

31-059 O-87-13 (Pt. 22)

(1) For recruit and special training, 3,500 student-years.

(2) For flight training, 118 student-years.

(3) For professional training in military and civilian institutions, 556 student-years.

(4) For officer acquisition, 1,038 student-years.

POLAR ICEBREAKING

SEC. 5. (a) It is the sense of Congress that the United States has important security, economic, and environmental interests in developing and maintaining a fleet of icebreaking vessels capable of operating effectively and independently in the heavy ice regions of the Arctic and Antarctic.

(b) The Secretary of the department in which the Coast Guard is operating shall prepare design and construction plans for the purchase of at least two new polar icebreaking vessels to be operational by the conclusion of fiscal year 1990, and shall provide detailed reports to the Congress describing the status of those plans in January 1985 and January 1986. In preparing such plans, the Secretary shall consult with the Director of the National Science Foundation and the Secretary of the Navy to ensure that all new polar icebreaking vessels have adequate facilities for scientific research.

RECREATIONAL BOATING SAFETY AMENDMENTS

SEC. 6. (a) Section 4307(a)(1)(A) of title 46, United States Code, is amended—

(1) by inserting "(i)" immediately after "(A)";

(2) by striking "or" at the end of clause (i), as so redesignated by paragraph (1) of this subsection, and inserting in lieu thereof "and"; and

(3) by adding at the end thereof the following:

"(ii) it does not contain a defect which has been identified, in any communication to such person by the Secretary or the manufacturer of that vessel, equipment or component, as creating a substantial risk of personal injury to the public; or".

(b) Section 4311(b)(1) of title 46, United States Code, is amended by inserting "defect or the" immediately before "nonconformity".

(c) Section 4311(f)(1) of title 46, United States Code, is amended by inserting "or that the person was not advised by the Secretary or the manufacturer of that vessel, equipment or component that the vessel, equipment or component contains a defect which creates a substantial risk of personal injury to the public" immediately before the semicolon.

LIFESAVING EQUIPMENT ON PASSENGER FERRIES

SEC. 7. The Secretary of the department in which the Coast Guard is operating shall proceed vigorously with efforts to develop improved lifesaving equipment for use on passenger ferries.

VESSEL TRAFFIC SYSTEM STUDY

SEC. 8. (a) Of the funds authorized to be appropriated by paragraph (1) of section 2 of this Act, such sums as may be necessary shall be used to maintain in full operation the Vessel Traffic Servcie system in San Francisco, Calif., throughout fiscal years 1985 and 1986.

(b) None of the funds authorized to be appropriated by this Act may be used to hire, train, or otherwise utilize civilian personnel to replace Coast Guard military personnel involved in operating the Vessel Traffic Service systm in San Francisco, Calif., until the Coast Guard has conducted a study in accordance with this subsection and has submitted the results of such study to the Congress. Such study shall identify the costs, efficiencies, and benefits, if any, that would accure to the Federal Government, the Coast Guard, the ports, the Navy, and other users of the Vessel Traffic Service system in San Francisco, Calif., from the use of civilian personnel in that system.

CONTRACTING OUT FOR SERVICES PERFORMED BY THE COAST GUARD

SEC. 9. (a) The Secretary of the department in which the Coast Guard is operating is encouraged to indentify those functions and services presently performed by Coast Guard personnel which are not inherently governmental in nature, and which may be performed with equal effectiveness and at lower cost under contract with the private sector, without any deterioration or loss to the overall ability of the Coast Guard to carry out its mission in behalf of the security, safety, and economic and environmental well-being of the United States.

(b) Not later than 60 days before the beginning of each fiscal year, the Secretary shall submit in writing to the President of the Senate, the Speaker of the House of Representatives, the Chairman of the Committee on Commerce, Science, and Transportation of the Senate, and the Chairman of the Committee on Merchant Marine and Fisheries of the House of Representatives a full and complete list of all those activities, performed by members of the Coast Guard, which the Secretary expects to evaluate during that fiscal year on the basis of whether they may be performed with equal effectiveness and at lower cost under contract with the private sector. Such list shall contain a short description of each activity to be evaluated, including the number of personnel involved in and the location of each such activity. None of the funds authorized to be appropriated by this Act may be used to develop or issue a request for proposals to contract with the private sector for the performance of any function not included on such list for that fiscal year which is, on the date of enactment of this Act, performed by members of the Coast Guard.

PROTECTION OF SEAMEN

SEC. 10. (a) Chapter 21 of title 46, United States Code, is amended by adding at the end thereof the following new section:

"§ 2114. Protection of seamen against discrimination

"(a) An owner, charterer, managing operator, agent, master, or individual in charge of a vessel may not discharge or in any manner discriminate against any seaman because the seaman in good faith has reported or is about to report to the Coast Guard that the seaman believes that a violation of this subtitle, or regulations issued under this subtitle, has occurred.

"(b) A seaman discharged or otherwise discriminated against in violation of this section may bring an action in an appropriate district court of the United States. In that action, the court may order any appropriate relief, including—

"(1) restraining violations of this section; and

"(2) reinstatement to the seamen's former position with back pay.".

(b) The section analysis for chapter 21 of title 46, United States Code, is amended by adding at the end thereof the following:

"2114. Protection of seamen against discrimination.".

REPEAL OF DUPLICATE TANKERMAN MANNING REQUIREMENT

SEC. 11. Section 8703(b) of title 46, United States Code, relating to tankerman manning requirements, is repealed.

APPROVAL OF BRIDGE LOCATION AND HEIGHT

SEC. 12 (a) The first section of the Act of March 23, 1906 (33 U.S.C. 491) is amended—

(1) by striking "and Chief of Engineers", "by the Chief of Engineers and", and "of the Chief of Engineers and";

(2) by striking "their" and inserting in lieu thereof "the Secretary's";

(3) by striking "they" and inserting in lieu thereof "the Secretary"; and

(4) by striking "of Transportation" the second and third time it appears.

(b) Section 502(b) of the General Bridge Act of 1946 (33 U.S.C. 525(b)) is amended—

(1) by striking "the Chief of Engineers and"; and

(2) by striking "they" wherever it appears and inserting in lieu thereof "the Secretary".

RULES OF THE ROAD ADVISORY COUNCIL EXTENSTION

SEC. 13. (a) Section 5(c) of the Inland Navigational Rules Act of 1980 (33 U.S.C. 2073(c)) is amended—

(1) by inserting a comma immediately after "Members of the Council";

(2) by striking "who are not officers or employees of the United States shall, while attending meetings of the Council, be entitled to receive compensation at a rate fixed by the Secretary, not exceeding the daily equivalent of the current rate of basic pay in effect for GS-18 of the General Schedule under section 5332 of title 5, United States Code; and"; and

(3) by striking "they".

(b) Section 5(d) of the Inland Navigational Rules Act of 1980 (33 U.S.C. 2073(d)) is amended by striking "5 years from the date of enactment of this Act" and inserting in lieu thereof "on December 24, 1990".

AMENDMENTS TO THE MILITARY CONSTRUCTION AUTHORIZATION ACT, 1982

SEC. 4. Section 911 of the Military Construction Authorization Act, 1982 (42 U.S.C. 248c) is amended—

(1) by striking "and the Secretary of Health and Human Services" wherever it appears and inserting in lieu thereof ", the Secretary of Health and Human Services, and the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy"; and

(2) in subsection (c), by inserting "the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy," immediately before "and appropriate officials".

INCLUSION OF SECRETARY OF TRANSPORTATION IN CERTAIN MEDICAL MATTERS

SEC. 15. (a) Section 1252 of the Department of Defense Authorization Act, 1984 (42 U.S.C. 248d) is amended—

(1) by striking "and the Secretary of Health and Human Services" wherever it appears and inserting in lieu thereof ", the Secretary of Health and Human Services, and the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy"; and

(2) by inserting "and the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy" immediately after "with the Secretary of Health and Human Services" wherever it appears.

(b) Chapter 55 of title 10, United States Code, is amended—

(1) in section 1072—

(A) by striking all after "by" through "may be," in paragraph (2)(D)(iii) and inserting in lieu thereof "the administering Secretary"; and

(B) by adding at the end thereof the following new paragraph:

"(3) 'Administering Secretaries' means the Secretaries of executive departments specified in section 1073 of this title as having responsibility for administering this chapter.";

(2) in section 1073, by striking all after "jurisdiction," through "Navy, and" and inserting in lieu thereof "the Secretary of Transportation shall administer this chapter for the Coast Guard when the Coast Guard is not operating as a service in the Navy, and the Secretary of Health and Human Services shall administer this chapter";

(3) in section 1074, by striking "Secretary of Defense and the Secretary of Health and Human Services" each place it appears and inserting in lieu thereof "administering Secretaries";

(4) in section 1076 (b) and (d), by striking "the Secretary of Defense and the Secretary of Health and Human Services" and inserting in lieu thereof "the administering Secretaries";

(5) in section 1078(a) and (b), by striking "the Secretary of Health and Human Services" and inserting in lieu therof "the other administering Secretaries";

(6) in section 1079—

(A) by striking "the Secretary of Defense and the Secretary of Health and Human Services" each place it appears and inserting in lieu thereof "the administering Secretaries"; and

(B) by striking "with the Secretary of Health and Human Services" in subsections (a) and (h)(2) and inserting in lieu thereof "with the other administering Secretaries";

(7) in section 1080, by striking "the Secretary of Health and Human Services" and inserting in lieu thereof "the other administering Secretaries";

(8) in section 1081, by striking "the Secretary of Defense or the Secretary of Health and Human Services" and inserting in lieu thereof "one of the administering Secretaries";

(9) in section 1083, by striking "the Secretary of Health and Human Services" and inserting in lieu thereof "the other administering Secretaries";

(10) in section 1084—

(A) by striking "the Secretary of Defense or the Secretary of Health and Human Services" and inserting in lieu thereof "an administering Secretary"; and

(B) by striking "he" and inserting in lieu thereof "the administering Secretary";

(11) by amending the text of section 1085 to read as follows:

"If a member or former member of a uniformed service under the jurisdiction of one executive department (or a dependent of such a member or former member) receives inpatient medical or dental care in a facility under the jurisdiction of another executive department, the appropriation for maintaining and operating the facility furnishing the care shall be reimbursed at rates established by the President to reflect the average cost of providing the care.";

(12) in section 1086—

(A) by striking "the Secretary of Health and Human Services" in subsection (a) and inserting in lieu thereof "the other administering Secretaries"; and

(B) by striking "the Secretary of Defense and the Secretary of Health and Human Services" in subsection (e) and inserting in lieu thereof "the administering Secretaries"; and

(13) in section 1092(a)(1), by striking "Secretary of Health and Human Services" and inserting in lieu thereof "other administering Secretaries".

LIGHTING OF TOWING VESSELS ON LOWER MISSISSIPPI RIVER

SEC. 16. Rule 24(i) of section 2 of the Inland Navigational Rules Act of 1980 (33 U.S.C. 2024(i)) is amended by inserting "(except below the Huey P. Long Bridge on the Mississippi River)" immediately after "Western Rivers".

TOWING SAFETY ADVISORY COMMITTEE EXTENSION

SEC. 17. Subsection (e) of the first section of the Act of October 6, 1980 (33 U.S.C. 1231a(e)) is amended by striking "five years from the date of enactment of this Act" and inserting in lieu thereof "on October 6, 1990".

VESSEL FIRE RESPONSE CAPABILITY

SEC. 18. (a) The Secretary of the department in which the Coast Guard is operating shall make a grant to the Maritime Fire and Safety Association, a nonprofit organization incorporated in the State of Oregon. Such grant shall be used to develop a fire response capability for vessels through the acquisition of equipment and supplies and through training of fire response personnel. The Secretary shall ensure that funds made available by such grant are used for such purposes.

(b) There are authorized to be appropriated not to exceed $349,000 for fiscal year 1985, not to exceed $160,000 for fiscal year 1986, and not to exceed $103,000 for fiscal year 1987.

ASSOCIATE DEPUTY SECRETARY OF TRANSPORTATION

SEC. 19. (a) There shall be in the Department of Transportation an Associate Deputy Secretary of Transportation, who shall be compensated at the rate provided for Level IV of the Executive Schedule under chapter 11 of title 2, United States Code, as adjusted by section 5318 of title 5, United States Code.

(b) The Associate Deputy Secretary shall be appointed by the President, by and with the advice and consent of the Senate. The Associate Deputy Secretary—

(1) shall carry out duties and powers prescribed by the Secretary of Transportation; and

(2) shall act for the Secretary when the Secretary and the Deputy Secretary of Transportation are absent or unable to serve or when the offices of Secretary and Deputy Secretary are vacant.

(c) Notwithstanding any other provision of law, any Assistant Secretary of Transportation or the General Counsel of the Department of Transportation appointed pursuant to section 102 of title 49, United States Code, shall act for the Secretary under subsection (d) of such section when the Secretary, the Deputy Secretary and the Associate Deputy Secretary are absent or unable to serve or when the offices of the Secretary, Deputy Secretary and Associate Deputy Secretary are vacant.

(d) The provisions of this section are repealed on the date which is 4 years after the date of enactment of this Act.

CUTTER AVAILABILITY

SEC. 20. There shall be available for service at all times on the Atlantic and Gulf Coasts of the United States not less than, in the aggregate, 30 high and medium endurance Coast Guard cutters.

COAST GUARD REPRESENTATION ON RESERVE FORCES POLICY BOARD

SEC. 21. Section 175(b) of title 10, United States Code, is amended to read as follows:

"(b) Whenever the Coast Guard is not operating as a service in the Navy, the Secretary of Transportation may designate two officers of the Coast Guard, Regular or Reserve, to serve as voting members of the Board.".

EXPOSURE SUITS

SEC. 22. (a)(1) Chapter 31 of title 46, United States Code, is amended by adding at the end the following new section:

"§ 3102. Exposure suits

"(a) The Secretary shall by regulation require exposure suits on vessels designated by the Secretary that operate in waters having a minimum average annual monthly temperature of less than 60 degrees Fahrenheit. The Secretary may not exclude a vessel from designation under this section only because that vessel carries other lifesaving equipment.

"(b) The regulations prescribed under this section shall identify those geographic areas in which, and times of the year when, exposure suits are required.

"(c) The Secretary shall establish standards for an exposure suit required by this section, including standards to guarantee adequate thermal protection, buoyance and flotation stability.

"(d)(1) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel violating this section or a regulation prescribed under this section is liable to the United States Government for a civil penalty of not more than $5,000. The vessel also is liable in rem for the penalty.

"(2) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel violating this section or a regulation prescribed under this section may be fined not more than $25,000, imprisoned for not more than 5 years, or both.".

(2) The section analysis of chapter 31 of title 46, United States Code, is amended by inserting immediately after the item relating to section 3101 the following:

"3102. Exposure suits.".

(b) Section 3102 of title 46, United States Code (as added by subsection (a) of this section), does not limit the authority of the Secretary of the department in which the Coast Guard is operating to prescribe regulations requiring exposure suits on vessels not required by section 3102 to have exposure suits.

(c) The regulations prescribed under section 3102 of title 46, United States Code (as added by subsection (a) of this section), shall be effective before August 31, 1984.

AMENDMENT NO. 7076

(Purpose: Make amendment in the nature of a substitute)

Mr. BAKER. Madam President, I send an amendment to the desk on behalf of the junior Senator from Oregon [Mr. PACKWOOD] and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee [Mr. BAKER], for Mr. PACKWOOD, proposes an amendment numbered 7076.

Mr. BAKER. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Coast Guard Authorization Act of 1984".

AUTHORIZATION OF FUNDS

SEC. 2. Funds are authorized to be appropriated for necessary expenses of the Coast Guard for fiscal years 1985 and 1986 as follows:

(1) For the operation and maintenance of the Coast Guard, including expenses related to the Capehart housing debt reduction, $1,800,000,000 for fiscal year 1985 and $1,950,000,000 for fiscal year 1986; and for increases in salary, pay, and other employee benefits authorized by law, and for the full amount of fixed costs associated with operation of five Coast Guard polar icebreaking vessels manned by Coast Guard military personnel, such sums as may be necessary for each such fiscal year.

(2) For the acquisition, construciton, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto, $580,000,000 for fiscal year 1985 (of which $30,000,000 shall be for design, survey, acquisition and construction of a search and rescue facility in Western Alaska to serve the Aleutian Islands) and $680,000,000 for fiscal year 1986 (of which $30,000,000 shall be for construction of such facility).

(3) For research, development, test, and evaluation, $35,000,000 for fiscal year 1985 and $38,000,000 for fiscal year 1986.

(4) For the alteration or removal of bridges over navigable waters of the United States, constituting obstructions to navigation, $8,700,000 for fiscal year 1985, and such sums as may be necessary for expenses of the Coast Guard for such purposes for fiscal year 1986.

(5) For retired pay including the payment of obligations therefor otherwise chargeable to lapsed appropriations for this purpose, and payments under the Retired Serviceman's Family Protection and Survivor Benefit Plans, and for payments for medical care of retired personnel and their dependents under the Dependents' Medical Care Act, such sums as may be necessary for fiscal years 1985 and 1986.

PERSONNEL LEVELS

SEC. 3. Notwithstanding any other provision of law, the Coast Guard's full-time equivalent strength levels for fiscal years 1985 and 1986 shall be maintained as follows:

(1) For active duty military personnel, not less than 39,150 for fiscal years 1985 and 1986, which shall not include members of the Ready Reserve called to active duty under the authority of section 712 of title 14, United States Code, or Public Health Service officers on active duty with the Coast Guard.

(2) For civilian employees of the Coast Guard, not less than 5,484 for fiscal years 1985 and 1986.

MILITARY TRAINING

SEC. 4. For fiscal years 1985 and 1986, the Coast Guard is authorized average military training student loads as follows:

(1) For recruit and special training, 3,500 student-years.

(2) For flight training, 118 student-years.

(3) For professional training in military and civilian institutions, 556 student-years.

(4) For officer acquisition, 1,038 student-years.

TRANSFER OF FUNDS

SEC. 5. (a) Whenever the Secretary of the department in which the Coast Guard is operating determines it to be in the national interest, the Secretary may transfer not to exceed 5 percent of the funds appropriated for the purposes described in paragraph (1) or (2) of section 2 of this Act for use for any purpose described in any paragraph of section 2, except that the total available for the purposes for which the funds are transferred shall not be increased by more than 10 percent as a result of the transfer.

(b) No transfer of funds may occur under subsection (a) of this section until 15 days after the Secretary has provided written notification to the Chairman of the Committee on Commerce, Science, and Transportation of the Senate and the Chairman of the Committee on Merchant Marine and Fisheries of the House of Representatives stating the reasons for the determination and a description of the purposes for which the funds proposed to be transferred will be used.

POLAR ICEBREAKING

SEC. 6. (a) It is the sense of the Congress that the United States has important security, economic, and environmental interests in developing and maintaining a fleet of icebreaking vessels capable of operating effectively and independently in the heavy ice regions of the Arctic and Antarctic.

(b) The Secretary of the department in which the Coast Guard is operating shall prepare design and construction plans for the purchase of at least 2 new polar icebreaking vessels to be operational by the conclusion of fiscal year 1990, and shall provide detailed reports to the Congress describing the status of those plans in January 1985 and January 1986. In preparing such plans, the Secretary shall consult with other interested Federal agencies for the purpose of ensuring that all appropriate military, scientific, economic and environmental interests are taken into account.

ALCOHOL USE BY BOATERS

SEC. 7. (a) Section 2302 of title 46, United States Code, is amended by redesignating subsection (c) as subsection (d) and inserting immediately after subsection (b) the following:

"(c) An individual who is intoxicated when operating a vessel, as determined under standards prescribed by the Secretary by regulation, shall be—

"(1) liable to the United States Government for a civil penalty of not more than $1,000; or

"(2) fined not more than $5,000, imprisoned for not more than one year, or both.".

(b)(1) Section 6101(b) of title 46, United States Code, is amended by adding at the end thereof the folowing: "Each report filed under this section shall include information as to whether the use of alcohol contributed to the casualty.".

(2) Section 6102(a) of title 46, United States Code, is amended by inserting immediately before the period at the end thereof the following: ", including information and statistics concerning the number of casualties in which the use of alcohol contributed to the casualty".

(3) Section 13102(c)(4) of title 46, United States Code, is amended by inserting immediately after "program" the following: ", that includes the dissemination of information concerning the hazards of operating a vessel when under the influence of alcohol".

RECREATIONAL BOATING SAFETY AMENDMENTS

SEC. 8. (a) Section 4307(a)(1)(A) of title 46, United States Code, is amended—

(1) by inserting "(i)" immediately after "(A)";

(2) by striking "or" at the end of clause (i), as so redesignated by paragraph (1) of this subsection, and inserting in lieu thereof "and"; and

(3) by adding at the end thereof the following:

"(ii) it does not contain a defect which has been identified, in any communication to such person by the Secretary or the manufacturer of that vessel, equipment or component, as creating a substantial risk of personal injury to the public; or".

(b) Section 4311(b)(1) of title 46, United States Code, is amended by inserting "defect or the" immediately before "nonconformity".

(c) Section 4311(f)(1) of title 46, United States Code, is amended by inserting "or that the person was not advised by the Secretary or the manufacturer of that vessel, equipment or component that the vessel, equipment or component contains a defect which creates a substantial risk of personal injury to the public" immediately before the semi-colon.

RESCUE SWIMMING PROGRAM

SEC. 9 The Secretary of the department in which the Coast Guard is operating shall use such sums as are necessary, from amounts appropriated for the operation and maintenance of the Coast Guard, to establish a helicopter rescue swimming program for the purpose of training selected Coast Guard personnel in rescue swimming skills.

LIFESAVING EQUIPMENT ON PASSENGER FERRIES

SEC. 10. The Secretary of the department in which the Coast Guard is operating shall proceed vigorously with efforts to develop improved lifesaving equipment for use on passenger ferries.

SAN FRANCISCO VTS

SEC. 11. (a) Of the funds authorized to be appropriated by paragraph (1) of section 2 of this Act, such sums as are necessary shall be used to maintain in full operation the vessel traffic service (VTS) system in San Francisco, California, throughout fiscal years 1985 and 1986.

(b) None of the funds authorized to be appropriated by this Act may be used to develop or issue a request for proposals to contract any function or activity involved in operating the vessel traffic service (VTS) system in San Francisco, California, which is, on the date of enactment of this Act, performed by Coast Guard personnel.

(c) None of the funds authorized to be appropriated by this Act may be used to hire, train, or otherwise utilize civilian personnel to replace Coast Guard military personnel involved in operating the vessel traffic service (VTS) system in San Francisco, California, until the Coast Guard has conducted a study in accordance with this subsection and has submitted the results of such study to the Congress. Such study shall identify the costs, efficiencies, and benefits, if any, that would accrue to the Federal Govern-

ment, the Coast Guard, the ports, the Navy, and other users of the vessel traffic service (VTS) system in San Francisco, California, from the use of civilian personnel in that system.

LONG-RANGE SEARCH AND SURVEILLANCE AIRCRAFT

SEC. 12. (a) Of the amounts authorized to be appropriated by paragraph (1) and (2) of section 2 of this Act, such sums as are necessary shall be used to procure, maintain, and operate a fleet of not less than twenty-seven long range search and surveillance aircraft for use by the Coast Guard.

(b) The Secretary of the department in which the Coast Guard is operating is encouraged to conduct the research, development, test and evaluation necessary for an electronic surveillance system, capable of producing and documenting images for search and rescue or law enforcement purposes, for the long range search and surveillance aircraft of the Coast Guard.

PROTECTION OF SEAMEN

SEC. 13. (a) Chapter 21 of title 46, United States Code, is amended by adding at the end thereof the following:

"§ 2114. Protection of seamen against discrimination

"(a) An owner, charterer, managing operator, agent, master, or individual in charge of a vessel may not discharge or in any manner discriminate against a seaman because the seaman in good faith has reported or is about to report to the Coast Guard that the seaman believes that a violation of this subtitle, or a regulation issued under this subtitle, has occurred.

"(b) A seaman discharged or otherwise discriminated against in violation of this section may bring an action in an appropriate district court of the United States. In that action, the court may order any appropriate relief, including—

"(1) restraining violations of this section; and

"(2) reinstatement to the seaman's former position with back pay.".

(b) The analysis of chapter 21 of title 46, United States Code, is amended by adding at the end thereof the following:

"2114. Protection of seamen against discrimination.".

CONTRACTING FOR SERVICES PERFORMED BY THE COAST GUARD

SEC. 14. (a) The Secretary of the department in which the Coast Guard is operating is encouraged to identify those functions and services presently performed by Coast Guard personnel which are not inherently governmental in nature, and which may be performed with equal effectiveness and at lower cost under contract to the private sector.

(b) None of the funds authorized to be appropriated by this Act may be used—

(1) to issue any contract that would have the effect, either by itself or in combination with other contracting proposals, of causing a deterioration in the overall ability of the Coast Guard to carry out its missions in behalf of the security, safety, and economic and environmental well-being of the United States; or

(2) to develop or issue a request for proposals to contract out any function or activity which is, on the date of enactment of this Act, performed by civilian employees or members of the Coast Guard, unless a period of 30 days in which either the Senate or House of Representatives is in session has expired after the Secretary has submitted in writing to the President of the Senate, the Speaker of the House of Representatives, the Chairman of the Committee on Commerce, Science, and Transportation of the Senate, and the Chairman of the Committee on Merchant Marine and Fisheries of the House of Representaties a full and complete statement (including relevant supporting studies) concerning the proposed contracting and the reasons therefor.

(c) Prior to the beginning of fiscal years 1985 and 1986, the Secretary shall submit to the Congress a list of functions or activities for which the Secretary expects to submit notifications required by subsection (b)(2) of this section during that fiscal year.

(d) The requirements of subsection (b)(2) of this section do not apply to contracts for functions or activities which are performed by three or fewer Coast Guard personnel.

LEGAL EQUITY FOR WOMEN

SEC. 15. (a)(1) Section 371 of title 14, United States Code, is amended—

(A) by striking "male" both places it appears in the second sentence of subsection (a);

(B) in subsection (c)(1)—

(i) by striking "he agrees in writing that, upon his" and inserting in lieu thereof "the person agrees in writing that, upon"; and

(ii) by striking "he will" and inserting in lieu thereof "the person will"; and

(C) by striking "he has the consent of his parent or guardian to his agreement" in subsection (c)(2) and inserting in lieu thereof "the person has the consent of the person's parent or guardian to the agreement".

(2) The first sentence of section 487 of such title is amended by striking "widows" and inserting in lieu thereof "surviving spouses".

(3)(A) The following sections of such title are amended by striking "enlisted man" each place it appears and inserting in lieu thereof "enlisted member": 353, 354, 355, 357, 359, 360, 361, 362, 365, 366, 367, 370, 421, 423 and 424.

(B) The following sections of such title are amended by striking "enlisted men" each place it appears and inserting in lieu thereof "enlisted members": 41, 211(a)(2), 212(a)(2), 213(a)(1), 214, 357, 432(c), 478(d) and 480.

(C) The following sections of such title are amended by striking "Enlisted men" each place it appears and inserting in lieu thereof "Enlisted members": 41, 352, 367, 478(a), 481 and 482.

(D) The following sections of such title are amended by striking "officers and enlisted men" each place it appears and inserting in lieu thereof "members": 92(b), 144(a), 145(a)(2), 148, 149, 487 and 832.

(E) Section 149 of such title is amended by striking "Officers and enlisted men" and inserting in lieu thereof "Members".

(F) Section 351(a) of such title is amended by striking "men" and inserting in lieu thereof "persons".

(G) Section 361 of such title is amended by striking "the man" and inserting in lieu thereof "the member".

(H) Sections 192 and 483 of such title are amended by striking "commissioned officer, warrant officer, or enlisted man" each place it appears and inserting in lieu thereof "member".

(I) Section 488 of such title is amended by striking "officers and men" and inserting in lieu thereof "members".

(4)(A)(i) The heading of section 149 of such title is amended to read as follows:

"§ 149. Detail of members to assist foreign governments".

(ii) The item relating to such section in the analysis of chapter 7 of such title is amended to read as follows:

"149. Detail of members to assist foreign governments.".

(B)(i) The heading of section 360 of such title is amended to read as follows:

"§ 360. Recall to active duty with consent of member".

(ii) The item relating to such section in the analysis of chapter 11 of such title is amended to read as follows:

"360. Recall to active duty with consent of member.".

(C)(i) The heading of section 361 of such title is amended to read as follows:

"§ 361. Relief of retired enlisted member promoted while on active duty".

(ii) The item relating to such section in the analysis of chapter 11 of such title is amended to read as follows:

"361. Relief of retired enlisted member promoted while on active duty.".

(D)(i) The heading of section 487 of such title is amended to read as follows:

"§ 487. Procurement and sale of stores to members and civilian employees".

(ii) The item relating to such section in the analysis of chapter 13 of such title is amended to read as follows:

"487. Procurement and sale of stores to members and civilian employees.".

(E)(i) The heading preceding section 350 in such title is amended to read as follows:

"ENLISTED MEMBERS"

(ii) The heading preceding the item relating to section 350 in the analysis of chapter 11 of such title is amended to read as follows:

"ENLISTED MEMBERS"

(b)(1) The first section of the Act of August 19, 1950 (33 U.S.C. 771) is amended—

(A) by striking "he" in clause (1) and inserting in lieu thereof "that employee";

(B) by amending clause (2) to read as follows:

"(2) the surviving spouse of the former employee was married to the former employee prior to the retirement of the former employee from the Lighthouse Service and has not remarried—"; and

(C) by striking "such widow, so long as she" in the material after clause (2) and inserting in lieu thereof "the surviving spouse, so long as the surviving spouse".

(2) Section 2 of such Act (33 U.S.C. 772) is amended—

(A) by amending clause (2) to read as follows:

"(2) the surviving spouse of the employee has not since remarried,"; and

(B) by striking "such widow, so long as she" in the material after clause (2) and inserting in lieu thereof "the surviving spouse, so long as the surviving spouse".

COASTAL AND INLAND NAVIGATION SAFETY

SEC. 16. (a) Subsection (e) of Public Law 96-380 (33 U.S.C. 1231a(e)) is amended by striking "five years from the date of enactment of this Act" and inserting in lieu thereof "on September 30, 1990".

(b)(1) Rule 24(i) of the Inland Navigational Rules, enacted by section 2 of the Inland Navigational Rules Act of 1980 (33 U.S.C. 2024(i)), is amended by inserting "(except below the Huey P. Long Bridge on the Mis-

sissippi River)" immediately after "Western Rivers".

(2) Section 5 of the Inland Navigational Rules Act of 1980 (33 U.S.C. 2073) is amended—

(A) by amending the second sentence in subsection (c) to read as follows: "Members of the Council, while away from their home or regular place of business, may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code,"; and

(B) by striking "5 years from the date of enactment of this Act" in subsection (d) and inserting in lieu thereof "on September 30, 1990".

(c) Rule 14 of the Inland Navigational Rules, enacted by section 2 of the Inland Navigational Rules Act of 1980 (33 U.S.C. 2014), is amended—

(1) in subsection (a), by striking "When" and inserting in lieu thereof "Unless otherwise agreed, when"; and

(2) by adding at the end thereof the following:

"(d) Notwithstanding paragraph (a) of this Rule, a power-driven vessel operating on the Great Lakes, Western Rivers, or waters specified by the Secretary, and proceeding downbound with a following current shall have the right of way over an upbound vessel, shall propose the manner of passage, and shall initiate the maneuvering signals prescribed by Rule 34(a)(i), as appropriate.".

COAST GUARD MANAGEMENT AND EFFICIENCY

SEC. 17. (a) Section 971(b) of title 10, United States Code, is amended—

(1) by striking "and" at the end of clause (1);

(2) by striking the period at the end of clause (2) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following:

"(3) no officer of the Coast Guard may be credited with service as a midshipman at the United States Naval Academy or as a cadet at the United States Military Academy, United States Air Force Academy, or United States Coast Guard Academy.".

(b)(1) Section 257 of title 14, United States Code, is amended by adding at the end thereof the following:

"(e) An officer whose involuntary retirement or separation is deferred under section 295 of this title is not eligible for consideration for promotion to the next higher grade during the period of that deferment.".

(2)(A) Chapter 11 of such title is amended by inserting immediately after section 294 the following:

"§ 295. Deferment of retirement or separation for medical reasons"

"(a) Subject to subsection (b), the Secretary may defer the retirement or separation of a commissioned officer, other than a commissioned warrant officer, if the evaluation of the physical condition of the officer and determination of the officer's entitlement to retirement or separation for physical disability require hospitalization, medical observation, or other physical disability processing that cannot be completed before the date on which the officer would otherwise be retired or separated.

"(b) A deferment under subsection (a)—

"(1) may only be made with the consent of the officer involved; and

"(2) if the Secretary receives written notice from the officer withdrawing that consent, shall end not later than the end of the 60-day period beginning on the date the Secretary receives that notice.".

(B) The analysis of such chapter is amended by inserting immediately after the item relating to section 294 the following:

"295. Deferment of retirement or separation for medical reasons.".

(3)(A) Section 647 of such title is amended by striking "$25,000" and inserting in lieu thereof "$100,000".

(B) The amendment made by subparagraph (A) of this paragraph shall apply to all claims considered, ascertained, adjusted, determined, compromised or settled on or after the date of enactment of this Act.

(4) Section 367 of such title is amended—

(A) by striking "(a)" before "Under regulations";

(B) by striking "person detained" and inserting in lieu thereof "member detained"; and

(C) by striking "(1) of this subsection" and inserting in lieu thereof "clause (1)".

(c) Section 1114 of title 18, United States Code, is amended by striking "any officer or enlisted man of the Coast Guard," and inserting in lieu thereof "any member of the Coast Guard, any employee of the Coast Guard assigned to perform investigative, inspection or law enforcement functions,".

(d) Section 402(d) of title 37, United States Code, to amended by inserting "and the Secretary of Transportation with respect to the Coast Guard when it is not operating as a service in the Navy" immediately after "Secretary of Defense".

(e)(1) Subsection (a) of section 3732 of the Revised Statutes of the United States (4 U.S.C. 11) is amended—

(A) by striking "except in the War and Navy Departments" and inserting in lieu thereof "except in the Department of Defense and in the Department of Transportation with respect to the Coast Guard when it is not operating as a service in the Navy"; and

(B) by striking "or transportation" and inserting in lieu thereof ", transportation, or medical and hospital supplies".

(2) Subsection (b) of such section is amended by inserting "and the Secretary of Transportation with respect to the Coast Guard when it is not operating as a service in the Navy" immediately after "The Secretary of Defense".

(3) The first proviso under the heading "MEDICAL DEPARTMENT" in the Act entitled "An Act making appropriations for the support of the Army for the fiscal year ending June thirteenth, nineteen hundred and seven", approved June 12, 1906 (34 Stat. 255), is repealed.

(f)(1) Section 911 of the Military Construction Authorization Act, 1982 (42 U.S.C. 248c) is amended—

(A) by striking "and the Secretary of Health and Human Services" each place it appears and inserting in lieu thereof ", the Secretary of Health and Human Services, and the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy"; and

(B) by inserting "the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy," immediately before "and the appropriate officials".

(2) Section 1252 of the Department of Defense Authorization Act, 1984 (42 U.S.C. 248d) is amended—

(A) by striking "and the Secretary of Health and Human Services" each place it appears and inserting in lieu thereof ", the Secretary of Health and Human Services, and the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy"; and

(B) by inserting "and the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy" immediately after "with the Secretary of Health and Human Services" each place it appears.

(g)(1) The first section of the Act of March 23, 1906 (33 U.S.C. 491), popularly known as the "Bridge Act of 1906", is amended—

(A) by striking "and Chief of Engineers for their approval, nor until they" and inserting in lieu thereof "for the Secretary's approval, nor until the Secretary";

(B) by striking "by the Chief of Engineers and";

(C) by striking "of the Chief of Engineers and"; and

(D) by striking "of Transportation" the second and third place it appears.

(2) Section 502(b) of the General Bridge Act of 1946 (33 U.S.C. 525(b)) is amended—

(A) by striking "the Chief of Engineers and"; and

(B) by striking "they" both places it appears and inserting in lieu thereof "the Secretary".

REPEAL OF DUPLICATE TANKERMAN MANNING REQUIREMENT

SEC. 18. Section 8703(b) of title 46, United States Code, relating to tankerman manning requirements, is repealed.

INCLUSION OF SECRETARY OF TRANSPORTATION IN CERTAIN MEDICAL MATTERS

SEC. 19. Chapter 55 of title 10, United States Code, is amended—

(1) in section 1072—

(A) by striking all after "by" through "may be," in paragraph (2)(D)(iii) and inserting in lieu thereof "the administering Secretary"; and

(B) by adding at the end thereof the following:

"(3) 'Administering Secretaries' means the Secretaries of executive departments specified inspection 1073 of this title as having responsibility for administering this chapter.";

(2) in section 1073, by striking all after "jurisdiction," through "Navy, and" and inserting in lieu thereof "the Secretary of Transportation shall administer this chapter for the Coast Guard when the Coast Guard is not operating as a service in the Navy, and the Secretary of Health and Human Services shall administer this chapter";

(3) in section 1074, by striking "Secretary of Defense and the Secretary of Health and Human Services" each place it appears and inserting in lieu thereof "administering Secretaries";

(4) in section 1074a(a), by striking "Secretary of Defense and the Secretary of Health and Human Services" and inserting in lieu thereof "administering Secretaries";

(5) in section 1076(b) and (d), by striking "the Secretary of Defense and the Secretary of Health and Human Services" and inserting in lieu thereof "the administering Secretaries";

(6) in section 1078(a) and (b), by striking "the Secretary of Health and Human Services" and inserting in lieu thereof "the other administering Secretaries";

(7) in section 1079—

(A) by striking "the Secretary of Defense and the Secretary of Health and Human Services" each place it appears and inserting in lieu thereof "the administering Secretaries"; and

(B) by striking "with the Secretary of Health and Human Services" in subsections

(a), (b)(12) and (k) and inserting in lieu thereof "with the other administering Secretaries";

(8) in section 1080, by strking "the Secretary of Health and Human Services" and inserting in lieu thereof "the other administering Secretaries";

(9) in section 1081, by striking "the Secretary of Defense or the Secretary of Health and Human Services" and inserting in lieu thereof "the appropriate administering Secretary";

(10) in section 1083, by striking "the Secretary of Health and Human Services" and inserting in lieu thereof "the other administering Secretaries";

(11) inspection 1084—

(A) by striking "the Secretary of Defense or the Secretary of Health and Human Services" and inserting in lieu thereof "an administering Secretary"; and

(B) by striking "he" and inserting in lieu thereof "the administering Secretary";

(12) by amending the text of section 1085 to read as follows:

"If a member or former member of a uniformed service under the jurisdiction of one executive department (or a dependent of such a member or former member) receives inpatient medical or dental care in a facility under the jurisdiction of another executive department, the appropriation for maintaining and operating the facility furnishing the care shall be reimbursed at rates established by the President to reflect the average cost of providing the care.";

(13) in section 1086—

(A) by striking "the Secretary of Health and Human Services" in subsection (a) and inserting in lieu thereof "the other administering Secretaries"; and

(B) by striking "the Secretary of Defense and the Secretary of Health and Human Services" in subsection (e) and inserting in lieu thereof "the administering Secretaries"; and

(14) in section 1092(a)(1), by striking "Secretary of Health and Human Services" and inserting in lieu thereof "other administering Secretaries".

CUTTER AVAILABILITY

SEC. 20. Throughout fiscal years 1985 and 1986, there shall be available for service at all times on the Atlantic and Gulf Coasts of the United States not less than, in the aggregate, thirty high and medium endurance Coast Guard cutters.

COAST GUARD REPRESENTATION ON RESERVE FORCES POLICY BOARD

SEC. 21. Section 175(b) of title 10, United States Code, is amended to read as follows:

"(b) Whenever the Coast Guard is not operating as a service in the Navy, the Secretary of Transportation may designate two officers of the Coast Guard, Regular or Reserve, to serve as voting members of the Board.".

EXPOSURE SUITS

SEC. 22. (a)(1) Chapter 31 of title 46, United States Code, is amended by adding at the end thereof the following:

"§ 3102. Exposure suits

"(a) The Secretary shall by regulation require exposure suits on vessels designated by the Secretary that operate in the Atlantic Ocean north of 32 degrees North latitude or south of 32 degrees South latitude and in all other waters north of 35 degrees North latitude or south of 35 degrees South latitude. The Secretary may not exclude a vessel from designation under this section only because that vessel carries other lifesaving equipment.

"(b) The Secretary shall establish standards for an exposure suit required by this section, including standards to guarantee adequate thermal protection, buoyance, and flotation stability.

"(c)(1) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel violating this section or a regulation prescribed under this section is liable to the United States Government for a civil penalty of not more than $5,000. The vessel also is liable in rem for the penalty.

"(2) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel violating this section or a regulation prescribed under this section may be fined not more than $25,000, imprisoned for not more than 5 years, or both.".

(2) The analysis of chapter 31 of title 46, United States Code, is amended by inserting immediately after the item relating to section 3101 the following:

"3102. Exposure suits.".

(b) Section 3102 of title 46, United States Code (as added by subsection (a) of this section), does not limit the authority of the Secretary of the department in which the Coast Guard is operating to prescribe regulations requiring exposure suits on vessels not required by section 3102 to have exposure suits.

(c) The regulations prescribed under section 3102 of title 46, United States Code (as added by subsection (a) of this section), shall be effective not later than 60 days after the date of enactment of this Act.

(d) Not later than 6 months after the date of enactment of this Act, the Secretary of the department in which the Coast Guard is operating shall submit a report to the Congress evaluating the benefits and disadvantages of extending the regulations prescribed under section 3102 of title 46, United States Code (as added by subsection (a) of this section) to require exposure suits on designated vessels operating in all waters north of 31 degrees North latitude or south of 31 degrees South latitude.

VESSEL FIRE RESPONSE CAPABILITY

SEC. 23. (a) The Secretary of the department in which the Coast Guard is operating shall make a grant to the Maritime Fire and Safety Association, a non-profit organization incorporated in the State of Oregon. Such grant shall be used for a demonstration project to develop a fire response capability for vessels through the acquisition of equipment and supplies and through training of fire response personnel. The Secretary shall ensure that funds made available by such grant are used for such purposes.

(b) For purposes of subsection (a) of this section, there are authorized to be appropriated not to exceed $349,000 for fiscal year 1985, not to exceed $160,000 for fiscal year 1986, and not to exceed $103,000 for fiscal year 1987.

CADET PREAPPOINTMENT TRAVEL EXPENSES

SEC. 24. (a) Chapter 9 of title 14, United States Code, is amended by inserting immediately after section 181 the following:

"§ 181a. Cadet applicants; preappointment travel to Academy

"The Secretary is authorized to expend appropriated funds for selective preappointment travel to the Academy for orientation visits of cadet applicants.".

(b) The table of sections at the beginning of such chapter is amended by inserting immediately after the item relating to section 181 the following:

"181a. Cadet applicants' preappointment travel to Academy.".

COMMODORE AND REAR ADMIRAL RESERVE POSITIONS

SEC. 25. (a)(1) Section 42(b) of title 14, United States Code, is amended by striking ".375" both places it appears and inserting in lieu thereof "0.375".

(2) Section 290 of such title is amended by striking "Board" in the fourth sentence and inserting in lieu thereof "Boards".

(3) The table of sections at the beginning of chapter 13 of such title is amended by striking the item relating to section 462a.

(4) Section 724 of such title is amended—

(A) by inserting "(1)" immediately after "(b)";

(B) by striking the last sentence; and

(C) by adding at the end thereof the following;

"(2) The authorized number of Reserve officers in an active status not on active duty in the grades of commodore and rear admiral is a total of two. However, the Secretary of the department in which the Coast Guard is operating may authorize an additional number of Reserve officers not on active duty in the grades of commodore and rear admiral as necessary in order to meet planned mobilization requirements.".

(b)(1) The matter in the table in section 201(a) of title 37, United States Code, under the heading "Navy, Coast Guard, and National Oceanic and Atmospheric Administration" and in the columns for O-8 and O-7 is amended to read as follows:

"Rear admiral

"Commodore".

(2)(A) The heading of section 202 of such title is amended to read as follows:

"§ 202. Pay grade: retired Coast Guard commodores".

(B) The item relating to section 202 in the table of sections at the beginning of chapter 3 of such title is amended to read as follows:

"202. Pay grade: retired Coast Guard commodores.".

(c) The matter in the table in section 741(a) of title 10, United States Code, under the heading "Navy and Coast Guard" is amended—

(1) by striking "Rear admiral (Navy) and Rear admiral (upper half) (Coast Guard)" and inserting in lieu thereof "Rear admiral"; and

(2) by striking "Commodore (Navy) and Rear admiral (lower half) (Coast Guard)" and inserting in lieu thereof "Commodore".

ASSOCIATE DEPUTY SECRETARY OF TRANSPORTATION

SEC. 26. (a) Section 102 of title 49, United States Code, is amended by redesignating subsection (d) as subsection (e) and inserting immediately after subsection (c) the following:

"(d) The Department has an Associate Deputy Secretary appointed by the President, by and with the advice and consent of the Senate. The Associate Deputy Secretary shall carry out powers and duties prescribed by the Secretary.".

(b) Section 5316 of title 5, United States Code, is amended by adding at the end thereof the following: "Associate Deputy Secretary, Department of Transportation.".

(c) Notwithstanding any other provision of law, until April 15, 1985, the position created by subsection (a) of this section may be held by a person named by the President alone from among qualified individuals.

FLAT RATE PER DIEM TEST

SEC. 28. (a) Before October 1, 1986, the Secretary of the department in which the

Coast Guard is operating may test a flat rate per diem allowances system for military travel allowances.

(b) Such flat rate per diem allowances shall be an amount determined by the Secretary to be sufficient to meet normal and necessary expenses in the area in which travel is performed, but such allowances may not be more than $75 for each in the continental United States.

(c) The test authorized by this section may not begin before the Committees on Commerce, Science, and Transportation and Armed Services of the Senate and the Committees on Merchant Marine and Fisheries ans Armed Services of the House of Representatives are notified of the test.

IMPROVEMENTS IN SHIPPING LAWS ADMINISTERED BY THE COAST GUARD

SEC. 29. (a) Section 7101(e)(3) of title 46, United States Code, is amended to read as follows:

"(3) has a thorough physical examination each year while holding the license, except that this requirement does not apply to an individual who will serve as a pilot only on a vessel of less than 1600 gross tons;".

(b) Section 8101(g) of title 46, United States Code, is amended by striking "or part B of this subtitle applies" and inserting in lieu thereof "applies or which is subject to inspection under chapter 33 of this title".

(c) Section 8301(a) of title 46, United States Code, is amended—

(1) by inserting "(except the Great Lakes)" immediately after "lakes"; and

(2) by striking "to which part B of this subtitle applies" and inserting in lieu thereof "subject to inspection under chapter 33 of this title".

(d) Section 8301(a)(1) of title 46, United States Code, is amended by inserting "propelled by machinery or carrying passengers" immediately after "vessels".

(e) Section 8501(a) of title 46, United States Code, is amended by striking "part" and inserting in lieu thereof "subtitle".

(f)(1) Section 8502(a) of title 46, United States Code, is amended to read as follows:

"(a) Except as provided in subsection (g) of this section, a coastwise seagoing vessel shall be under than direction and control of a pilot licensed under section 7101 of this title if the vessel is—

"(1) not sailing on register;

"(2) underway;

"(3) not on the high seas; and

"(4)(A) propelled by machinery and subject to inspection under part B of this subtitle; or

"(B) subject to inspection under chapter 37 of this title.".

(2) Section 8502 of title 46, United States Code, is amended by adding at the end thereof the following:

"(g) The Secretary shall designate by regulation the areas of the approaches to and waters of Prince William Sound, Alaska, on which a vessel subject to this section is not required to be under the direction and control of a pilot licensed under section 7101 of this title.".

(3)(A) Chapter 85 of title 46, United States Code, is amended by adding at the end thereof the following:

"§ 8503. Federal pilots authorized

"(a) The Secretary may require a pilot licensed under section 7101 of this title on a self-propelled vessel when a pilot is not requred by State law and the vessel is—

"(1) engaged in foreign commerce; and

"(2) operating on the navigable waters of the United States.

"(b) A requirement prescribed under subsection (a) of this section is terminated when the State having jurisdiction over the area involved—

SEC. 30. Section 11301(a) of title 46, United States Code, is amended to read as follows:

"(a) Except a vessel on a voyage from a port in the United States to a port in Canada a vessel of the United States shall have an official logbook if the vessel is—

"(1) on a voyage from a port in the United States to a foreign port; or

"(2) of at least 100 gross tons and is on a voyage between a port of the United States on the Atlantic Ocean and on the Pacific Ocean.".

TRENT RIVER RAILROAD BRIDGE

SEC. 31. Nothwithstanding any other provision of law, the Trent River Railroad Bridge, mile 0.0, in New Bern, North Carolina, is deemed and unreasonable obstruction to navigation.

AMENDMENTS TO THE COASTWISE LOAD LINE ACT

SEC. 32. (a) Section (b) of the Act of August 27, 1935 (46 App. U.S.C. 88(b)), popularly known as the "Coastwise Load Line Act, 1935", is amended to read as follows:

"(b) This Act does not apply to—

"(1) a fish tender vessel of not more than 500 gross tons—

"(1) establishes a requirement for a State licensed pilot; and

"(2) notifies the Secretary of that fact.

"(c) For the Saint Lawrence Seaway, the Secretary may not delegate the authority under this section to an agency except the Saint Lawrence Seaway Development Corporation.

"(d) A person violating this section or a regulation prescribed under this section is liable to the United States Government for a civil penalty of not more than $25,000. Each day of a continuing violation is a separate violation. The vessel also is liable in rem for the penalty.

"(e) A person that knowingly violates this section or a regulation prescribed under this section shall be fined not more than $50,000, imprisoned for not more than five years, or both.".

(B) The analysis of chapter 85 of title 46, United States Code, is amended by inserting immediately after the item relating to section 8502 the following:

"8503. Federal pilots authorized.".

(g) section 7 of the Ports and Waterways Safety Act (33 U.S.C. 1226) is repealed.

(h) Section 10 of the Ports and Waterways Safety Act (33 U.S.C. 1229) is amended by striking "6, and 7" and inserting in lieu thereof "and 6".

LOGBOOK REQUIREMENT

SEC. 30. Section 11301(a) of title 46, United States Code, is amended to read as follows:

"(a) Except a vessel on a voyage from a port in the United States to a port in Canada, a vessel of the United States shall have an official logbook if the vessel is—

"(1) on a voyage from a port in the United Staters to a foreign port; or

"(2) of at least 100 gross tons and is on a voyage between a port of the United States on the Atlantic Ocean and on the Pacific Ocean.".

TRENT RIVER RAILROAD BRIDGE

SEC. 31. Nothwithstanding any other provision of law, the Trent River Railroad Bridge, mile 0.0, in New Bern, North Carolina, is deemed an unreasonable obstruction to navigation.

AMENDMENTS TO THE COSTWISE LOAD LINE ACT

SEC. 32. (a) section 1(b) of the Act of August 27, 1935 (46 App. U.S.C. 88(b)), popularly known as the "Coastwise Load Line Act, 1935", is amended to read as follows:

"(b) This Act does not apply to—

"(1) a fish tender vessel of not more than 500 gross tons—

"(A) constructed, under construction, or contracted to be constructed as a vessel of this type before January 1, 1980; or

"(B) converted for use as a vessel of this type before January 1, 1983; and

"(2) a fish processing vessel of not more than 5,000 gross tons, except a vessel constructed after August 15, 1974, or converted for use as a vessel of this type after January 1, 1983.".

(b) Section 2 of such Act (46 App. U.S.C. 88a) is amended to read as follows:

"SEC. 2. (a) For vessels to which this Act applies, the Secretary of the department in which the Coast Guard is operating shall establish by regulation load lines and marks indicating the maximum depth to which these vessels may be loaded safely.

"(b) In prescribing regulations under the Act, the Secretary shall consider the age, condition, character, design, and construction of a vessel to which this Act applies, including subdivision and stability characteristics.

"(c) This Act applies to the Great Lakes, except that the Secretary may establish special operating regulations for barges operating close to shore between Calumet Harbor, Illinois, and Burns Harbor, Indiana, that exempt these barges from the load line and marking requirements of this section.

"(d) The Secretary may not establish on any vessel a load line that is above the actual line of safety.".

TECHNICAL AMENDMENTS REGARDING COMMERCIAL FISHING INDUSTRY VESSELS

SEC. 33. (a) Section 4502(b)(3) of title 46, United States Code, is amended by striking "the exemption" and inserting in lieu thereof "this chapter".

(b) Section 4503 of title 46, United States Code, is amended by striking "shall be deemed" and inserting in lieu thereof "is deemed".

(c) Section 8104(k) and (l) of title 46, United States Code, is amended by striking "may" and inserting in lieu thereof "shall".

(d) Section 402(13) of the Act of July 17, 1984 (Public Law 98-364) is amended by striking "Section 10101(a)" and inserting in lieu thereof "Section 10101".

SAILING SCHOOL VESSELS

SEC. 34. (a) Section 2101 of title 46, United States Code, is amended:

(1) in clause (21)(B), by inserting "or a sailing school vessel" immediately after "vessel" the first time it appears; and

(2) in clause (27), by striking all after "by sail" and inserting in lieu thereof "and may include—

"(A) any subject related to that operation and to the sea, including seamanship, navigation, oceanography, other nautical and marine sciences, and maritime history and literature; and

"(B) only when in conjunction with a subject referred to in subclause (A) of this clause, instruction in mathematics and language arts skills to sailing school students having learning disabilities.".

(b) Section 206 of the Sailing School Vessels Act of 1982 (46 U.S.C. 446(b) is amended by inserting "section 11101 (a)—(c) of title 46, United States Code," immediately before "and".

COMPENSATION OF COMMANDANT OF THE COAST GUARD

SEC. 35. (a) Footnote 2 of the table entitled "COMMISSIONED OFFICERS" in section 101(b)(1) of the Uniformed Services Pay Act of 1981 (Public Law 97-60; 95 Stat. 990) is amended—

(1) by striking "or"; and

(2) by inserting "or Commandant of the Coast Guard," immediately after "Corps,".

(b) The first sentence of footnote 4 of the table in section 1401 of title 10, United States Code, is amended—

(1) by striking "or"; and

(2) by inserting "or commandant of the Coast Guard," immediately after "Corps,".

(c) The amendment made by this section shall become effective on October 1, 1984.

Mr. PACKWOOD. Madam President, it gives me great pleasure to rise in support of the Coast Guard authorization bill, as amended.

The Coast Guard is truly a multimission force. As the principal U.S. maritime safety and law enforcement agency, Coast Guard activities include search and rescue, fisheries enforcement, antismuggling activities, vessel inspection, environmental protection, and operation of navigational aids.

The Coast Guard also plays a significant role in national defense. Coast Guard cutters have replaced the Navy in Grenada, its ships regularly participate in U.S. naval exercises, it provides port security in the United States and overseas, and it operates the only polar icebreakers possessed by any U.S. military service.

As new maritime problems have developed and old ones have expanded, Congress has been quick to look to the Coast Guard for solutions, and the Coast Guard has always been there. Unfortunately, while the Coast Guard has always been ready to take on new and expanded missions, it has not always received the resources it needs. Coast Guard equipment and manpower shortages are well known to my colleagues. The number of Coast Guard cutters has declined by a third in the last decade and the average age of a cutter is over 27 years. Coast Guard personnel levels have, at best, remained constant, while duties expanded dramatically.

Congress has taken steps to reverse these trends. In 1982 and again in 1984, largely due to the efforts of my colleague, Senator STEVENS, we included funds in the Department of Defense appropriations bill for acquisition of Coast Guard equipment. The authorization bill before the Senate today continues the trend toward a newer, stronger Coast Guard.

The bill as amended by my substitute version authorizes appropriations of approximately $2.42 billion for fiscal year 1985 and $2.67 billion for fiscal year 1986. Over half of this funding goes toward salaries and employee benefits, maintenance of aircraft and vessels, and other fixed costs incurred by the Coast Guard. The remainder is for acquisition of equipment and construction of facilities, research and development, and alteration of bridges which pose navigational hazards.

The bill also prohibits the sale of defective recreational boats, calls for a study of lifesaving equipment on passenger ferries, prohibits discrimination against seamen who report vessel safety violations, calls for continued operation of the Coast Guard's polar icebreakers, and revises the Coast Guard provisions in the United States Code to remove any sexual bias.

Also included in the bill is a section concerning the contracting out of services now performed by the Coast Guard. The bill encourages the Secretary of Transportation to identify functions now performed by the Coast Guard, which could be performed with equal effectiveness and at a lower cost by the private sector. At the same time, the bill provides for congressional oversight so we can be confident the contracting is in the best interests of the Coast Guard and the many people who depend on it.

When I introduced this bill last April, I said we owe our full support to the men and women who serve in the U.S. Coast Guard, the Coast Guard Reserve, and the Coast Guard Auxiliary. This bill is a giant step toward giving the Coast Guard the help it desperately needs to continue its tradition of outstanding service to our Nation.

Before concluding, I want to remind my colleagues that, recently, Coast Guard personnel demonstrated they are true to the motto "always ready." In the Bering Strait off Alaska the Coast Guard Cutter *Sherman* rendezvoused with a Soviet vessel to accept the release of five American seamen and their vessel.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Oregon [Mr. PACKWOOD].

The amendment (No. 7076) was agreed to.

Mr. DECONCINI. Madam President, I would like to address a question to my distinguished colleagues, the chairman and ranking member of the Commerce Committee. In my State there is an organization called Vision-Quest National, which has made an excellent and worthwhile contribution to our society by offering emotionally troubled young people the kinds of physically challenging experiences that open their minds to the values of self-discipline and teamwork. For over a decade the courts, public agencies, and concerned parents have placed these troubled youths with VisionQuest with considerable success.

My interest is in a new sailing program launched by VisionQuest about 6 months ago. Under this program youths are trained in seamanship and navigation and then participate in an ocean voyage on a tall-masted ship under the supervision of sailing and counseling professionals. Unfortunately, the VisionQuest Program has to be run in compliance with the Coast Guard's marine safety regulations applicable to passenger vessels, which are written with self-propelled vessels in mind. It would seem that Coast Guard regulation under the Sailing School Vessels Act of 1982 is more appropriate for sail-powered ships, but that law does not now apply to a for-profit company like VisionQuest. This 1982 act created a special category of marine safety regulation tailored to meet the characteristics of sailing vessels.

I would like to amend the 1982 act so that a socially beneficial program like VisionQuest's that is not run by a tax-exempt organization is regulated under sailing school vessel rules and not under passenger vessel requirements. Do my distinguished colleagues believe this matter can be considered in hearings by the Commerce Committee early in 1985?

Mr. PACKWOOD. I say to the distinguished Senator from Arizona that I am certainly willing to take the matter up in Commerce Committee hearings in the early part of next year.

Mr. HOLLINGS. I also support my distinguished colleague's request.

Mr. DECONCINI. I thank my colleagues from Oregon and South Carolina, and appreciate the willingness to give the proposal a good hearing in the very near future.

The PRESIDING OFFICER. The question is on agreeing to the substitute amendment, as amended.

The substitute amendment, as amended, was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

HENRY R.E. HAMPTON VISITOR CENTER

Mr. BAKER. Madam President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1889.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1889) entitled "An Act to amend the Act authorizing the establishment of the Congaree Swamp National Monument to provide that at such time as the principal visitor center is established, such center shall be designated as the 'Henry R. E. Hampton Visitor Center' ", do pass with the following amendments:

Strike out all after enacting clause and insert:

SECTION 1. Section 3 of the Act approved October 18, 1976 (90 Stat. 2517), is amended by adding at the end the following new subsection:

"(c) At such time as the principal visitor center at such monument is established, such center shall be designated as the 'Harry R. E. Hampton Visitor Center'.".

SEC. 2 Section 5 of the Act of July 15, 1968 (82 Stat. 354), is amended by redesignating subsection (c) as subsection (d) and by inserting the following new subsection (c) after subsection (b):

"(c) In order to protect the air, land, water, and natural and cultural values of the National Park System and the property of the United States therein, no solid waste disposal site (including any site for the disposal of domestic or industrial solid wastes) may be operated within the boundary of any unit of the National Park System, other than—

"(1) a site which was operating as of September 1, 1984, or

"(2) a site used only for disposal of wastes generated within that unit of the park system so long as such site will not degrade any of the natural or cultural resources of such park unit.

The Secretary of the Interior shall promulgate regulations to carry out the provisions of this subsection, including reasonable regulation to mitigate the adverse effects of solid waste disposal sites in operation as of September 1, 1984, upon property of the United States.".

Amend the title so as to read: "An Act to amend the Act authorizing the establishment of the Congaree Swamp National Monument to provide that at such time as the principal visitor center is established, such center shall be designated as the 'Harry R. E. Hampton Visitor Center' and for other purposes.".

HARRY R.E. HAMPTON VISITOR CENTER

Mr. THURMOND. Madam President, I am pleased that the Senate is today taking final action on S. 1889, a bill to amend the act authorizing the establishment of the Congaree Swamp National Monument to provide that, at such time as the principal visitor center is established, such center shall be designated as the "Harry R.E. Hampton Visitor Center."

Madam President, Harry Rutledge Elliott Hampton is unquestionably one of South Carolina's greatest naturalists. Born near Columbia, SC, on July 8, 1897, Harry Hampton devoted much of his life to the cause of conservation. Although his life came to an end in 1980, his tireless efforts to promote wise management of our natural resources will not soon be forgotten.

After earning a bachelor of arts degree in English from the University of South Carolina, Harry Hampton worked as a reporter, columnist, and coeditor for the State newspaper, writing his "Woods and Water" column for more than 30 years. In 1931, he helped create the South Carolina Game and Fish Association and was later active in the formation of the State's Wildlife and Marine Resources Department.

His efforts on behalf of the Congaree Swamp began in 1954. For more than 20 years, Harry Hampton attended meetings, made speeches, wrote articles, and personally escorted people into the swamp to observe and document trees, birds, and other wildlife.

Due in part to his efforts, public awareness and support for protecting and preserving the Congaree Swamp rapidly grew. These diligent educational efforts culminated in congressional passage of legislation in 1976 establishing the Congaree Swamp National Monument. I was pleased to author that bill in the Senate and recall that we worked hard to achieve its enactment in the waning days of the 94th Congress.

Madam President, it is entirely fitting, that, when completed, the principal visitor center in Congaree Swamp National Monument be named after this man who devoted so much of his life to seeing that this natural area was preserved for the enjoyment of the American people. S. 1889 was favorably reported by the Energy and Natural Resources Committee on a vote of 20 yeas to 0 nays, and passed the Senate August 9, 1984, on a unanimous voice vote.

The House saw fit to attach amendments to S. 1889 that are unrelated to the naming of the visitor center after this respected South Carolinian, necessitating this further action by the Senate. I want to thank the distinguished chairman of the Senate Energy and Natural Resources Committee, Senator MCCLURE, and the distinguished chairman of the Senate Public Lands and Reserved Water Subcommittee, Senator WALLOP, for their efforts and accommodations in making final action on this measure possible here today.

Mr. BAKER. Madam President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

AWARDS OF EXPENSES OF CERTAIN AGENCY AND COURT PROCEEDINGS

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 5479.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the text of the bill (H.R. 5479) entitled "An Act to amend section 504 of title 5, United States Code, and section 2412 of title 28, United States Code, with respect to awards of expenses of certain agency and court proceedings, and for other purposes", with the following amendment:

In lieu of the matter inserted by said amendment, insert:

That (a) section 504(a)(1) of title 5, United States Code, is amended—

(1) by striking out "as a party to the proceeding", and

(2) by adding at the end thereof the following: "The decision of the adjudicative officer on the application for fees and other expenses shall be the final administrative decision under this section.".

(b) Section 504(a)(2) of title 5, United States Code, is amended by adding at the end thereof the following: "When the United States appeals the underlying merits of an adversary adjudication, no decision on an application for fees and other expenses in connection with that adversary adjudication shall be made under this section until a final and unreviewable decision is rendered by the court on the appeal or until the underlying merits of the case have been finally determined pursuant to the appeal.".

(c) Section 504(b) of title 5, United States Code, is amended—

(1) by amending paragraph (1)(B) to read as follows:

"(B) 'party' means a party, as defined in section 551(3) of this title, who is (i) an individual whose net worth did not exceed $2,000,000 at the time the adversary adjudication was initiated, or (ii) any owner of an unincorporated business, or any partnership, corporation, association, unit of local government, or organization, the net worth of which did not exceed $7,000,000 at the time the adversary adjudication was initiated, and which had not more than 500 employees at the time the adversary adjudication was initiated; except that an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)(3)) exempt from taxation under section 501(a) of such Code, or a cooperative assocation as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1141j(a)), may be a party regardless of the net worth of such organization or cooperative association;";

(2) in paragraph (1)(C)—

(A) by inserting "(i)" before "an adjudication under";

(B) by inserting before the semicolon at the end thereof the following: ", and (ii) any appeal of a decision made pursuant to section 6 of the contract Disputes Act of 1978 (41 U.S.C. 605) before an agency board of contract appeals as provided in section 8 of that Act (41 U.S.C. 607)"; and

(C) by striking out "and" at the end thereof;

(3) by striking out the period at the end of subparagraph (D) and inserting in lieu thereof "; and "; and

(4) by adding at the end thereof the following:

"(E) 'position of the agency' includes the underlying action which led to the adversary adjudication; except that fees and expenses may not be awarded to a party for any portion of the adversary adjudication in which the party has unreasonably protracted the proceedings.".

(d) Section 504(c)(2) of title 5, United States Code, is amended to read as follows:

"(2) If a party or the United States is dissatisfied with a determination of fees and other expenses made under subsection (a), that party or the United States (as the case may be) may, within 30 days after the determination is made, appeal the determination to the court of the United States having jurisdiction to review the merits of the under-

lying decision of the agency adversary adjudication. The court's determination on all appeals heard under this paragraph shall be based solely on the factual record made before the agency. The court may modify the determination of fees and other expenses only if the court finds that the failure to make an award of fees and other expenses, or the calculation of the amount of the award, was unsupported by substantial evidence.".

(e) Section 504(d) of title 5, United States Code, is amended to read as follows:

"(d) Fees and other expenses awarded under this subsection shall be paid by any agency over which the party prevails from any funds made available to the agency by appropriation or otherwise.".

(f) Section 504 of title 5, United States Code, is amended by adding at the end thereof the following:

"(f) If complete payment of the fees and other expenses awarded under this section is not made within 60 days after the final agency action making an award of such fees and other expenses, interest shall be paid on the amount remaining due. Such interest shall be computed at the rate the Secretary of the Treasury establishes for interest payments under section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611), and shall run from the date which is 61 days after the date of such award up to and including the date such payment is posted by certified or registered mail.".

SEC. 2. (a) Section 2412 of title 28, United States Code, is amended—

(1) in subsections (a) and (b) by striking out "or any agency and any official of the United States" each place it appears and inserting in lieu thereof "or any agency or any official of the United States";

(2) in subsection (d)(1)(A) by inserting ", including proceedings for judicial review of agency action," after "in tort)"; and

(3) in subsection (d)(1)(B) by inserting immediately after "action" the following: "or order of remand for further hearing made pursuant to section 205(g) or 1631(c)(3) of the Social Security Act (42 U.S.C. 405(g) or 1383(c)(3))".

(b) Section 2412(d)(2) of title 28, United States Code, is amended—

(1) in subparagraph (B)—

(A) in clause (i) by striking out "$1,000,000" and inserting in lieu thereof "$2,000,000"; and

(B) by striking out "(ii)" and all that follows through the end of the subparagraph and inserting in lieu thereof the following: "or (ii) any owner of an unincorporated business, or any partnership, corporation, association, unit of local government, or organization, the net worth of which did not exceed $7,000,000 at the time the civil action was filed, and which had not more than 500 employees at the time the civil action was filed; except that an organization described in section 510(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)(3)) exempt from taxation under section 501(a) of such Code, or a cooperative association as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1141j(a)), may be a party regardless of the net worth of such organization or cooperative association;";

(2) by striking out the period at the end of subparagraph (C) and inserting in lieu thereof a semicolon; and

(3) by adding at the end thereof the following:

"(D) 'position of the United States' includes the underlying agency action which led to the litigation; except that fees and expenses may not be awarded to a party for any portion of the litigation in which the party has unreasonably protracted the proceedings;

"(E) 'civil action brought by or against the United States' includes an appeal by a party, other than the United States, from a decision of a contracting officer rendered pursuant to a disputes clause in a contract with the Government or pursuant to the Contract Disputes Act of 1978;

"(F) 'court' includes the United States claims Court;

"(G) 'final judgment' means a judgment that is final and not appealable;

"(H) 'prevailing party in a civil action' includes a party who, pursuant to section 205(g) or 1631(c)(3) of the Social Security Act (42 U.S.C. 405(g) or 1383(c)(3)), has won an order remanding the cause for further hearing except that this provision shall not apply to cases to the extent that the remand was based on section 2(d) of the Social Security Disability Benefits Reform Act of 1984; and

"(I) 'prevailing party' in the case of eminent domain proceedings, means a party who obtains a final judgment (other then by settlement), exclusive of interest, the amount of which is at least as close to the highest valuation of the property involved that is attested to at trial on behalf of the property owner as it is to the highest valuation of the property involved that is attested to at trial on behalf of the Government.".

(c) Section 2412(d)(4) of title 28, United States Code, is amended to read as follows:

"(4) Fees and other expenses awarded under this subsection to a party shall be paid by any agency over which the party prevails from any funds made available to the agency, by appropriation or otherwise.".

(d) Section 2412 of title 28, United States Code, is amended by adding at the end thereof the following:

"(f) If complete payment of the costs or fees and other expenses awarded under this section is not made within 60 days after the award of such costs or fees and other expenses, interest shall be paid thereafter on the amount remaining due. Such interest shall be computed at the rate the Secretary of the Treasury establishes for interest payments under section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611), and shall run from the date which is 61 days after the date of such award up to and including the date such payment is posted by certified or registered mail.".

SEC. 3. Section 206 of the Equal Access to Justice Act is amended—

(1) by striking out "Nothing" and inserting in lieu thereof "(a) Except as provided in subsection (b), nothing"; and

(2) by adding at the end thereof the following:

"(b) Section 206(b) of the Social Security Act (42 U.S.C. 406(b)(1)) shall not prevent an award of fees and other expenses under section 2412(d) of title 28, United States Code. Section 206(b)(2) of the Social Security Act shall not apply with respect to any such award but only if any fees collected by the claimant's attorney or withheld for such attorney pursuant to such section 206(b) are refunded to the claimant insofar as the fees relate to the same work for which the claimant's attorney is awarded fees under section 2412(d) of title 28, United States Code.".

SEC. 4. Section 203(c) of the Equal Access to Justice Act (Public Law 96-481) is repealed.

SEC. 5. Section 204(c) of the Equal Access to Justice Act is repealed.

SEC. 6. Section 207 of the Equal Access to Justice Act, is repealed.

SEC. 7. Section 208 of the Equal Access to Justice Act is amended by adding at the end thereof the following: "Awards may be made for fees incurred before October 1, 1981, in any such adversary adjudication or civil actions.".

SEC. 8. The amendments made by this Act shall be effective as of October 1, 1984, and shall apply to cases pending on such date.

Resolved, That the House agree to the amendment of the Senate to the title of the aforesaid bill.

AMENDMENT NO. 7077

(Purpose: To amend the Equal Access to Justice Act, and for other purposes)

Mr. BAKER. Madam President, I move the Senate concur in the House amendment, with a further amendment, on behalf of Senator GRASSLEY, which I send to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee [Mr. BAKER], for Mr. GRASSLEY, proposes an amendment numbered 7077.

Mr. BAKER. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That (a) section 504(a)(1) of title 5, United States Code, is amended—

(1) by striking out "as a party to the proceeding", and

(2) by adding at the end thereof the following: "The decision of the adjudicative officer on the application for fees and other expenses shall be the final administrative decision under this section.".

(b) Section 504(a)(2) of title 5, United States Code, is amended by adding at the end thereof the following: "When the United States appeals the underlying merits of an adversary adjudication, no decision on an application for fees and other expenses in connection with that adversary adjudication shall be made under this section until a final and unreviewable decision is rendered by the court on the appeal or until the underlying merits of the case have been finally determined pursuant to the appeal.".

(c) Section 504(b) of title 5, United States Code, is amended—

(1) by amending paragraph (1)(B) to read as follows:

"(B) 'party' means a party, as defined in section 551(3) of this title, who is (i) an individual whose net worth did not exceed $2,000,000 at the time the adversary adjudication was initiated, or (ii) any owner of an unincorporated business, or any partnership, corporation, association, unit of local government, or organization, the net worth of which did not exceed $7,000,000 at the time the adversary adjudication was initiated, and which had not more than 500 employees at the time the adversary adjudication was initiated; except that an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)(3)) exempt from taxation under section 501(a) of such Code, or a cooperative

association as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1141j(a)), may be a party regardless of the net worth of such organization or cooperative association;";

(2) in paragraph (1)(C)—

(A) by inserting "(i)" before "an adjudication under";

(B) by inserting before the semicolon at the end thereof the following: ", and (ii) any appeal of a decision made pursuant to section 6 of the Contract Disputes Act of 1978 (41 U.S.C. 605) before an agency board of contract appeals as provided in section 8 of that Act (41 U.S.C. 607)"; and

(C) by striking out "and" at the end thereof;

(3) by striking out the period at the end of subparagraph (D) and inserting in lieu thereof "; and"; and

(4) by adding at the end thereof the following:

"(E) 'position of the agency' includes the underlying action which led to the adversary adjudication; except that fees and expenses may not be awarded to a party for any portion of the adversary adjudication in which the party has unreasonably protracted the proceedings.".

(d) Section 504(c)(2) of title 5, United States Code, is amended to read as follows:

"(2) If a party or the United States is dissatisfied with a determination of fees and other expenses made under subsection (a), that party or the United States (as the case may be) may, within 30 days after the determination is made, appeal the determination to the court of the United States having jurisdiction to review the merits of the underlying decision of the agency adversary adjudication. The court's determination on all appeals heard under this paragraph shall be based solely on the factual record made before the agency. The court may modify the determination of fees and other expenses only if the court finds that the failure to make an award of fees and other expenses, or the calculation of the amount of the award, was unsupported by substantial evidence.".

(e) Section 504(d) of title 5, United States Code, is amended to read as follows:

"(d) Fees and other expenses awarded under this subsection shall be paid by any agency over which the party prevails from any funds made available to the agency by appropriation or otherwise.".

(f) Section 504 of title 5, United States Code, is amended by adding at the end thereof the following:

"(f) If complete payment of the fees and other expenses awarded under this section is not made within 60 days after the final agency action making an award of such fees and other expenses, interest shall be paid on the amount remaining due. Such interest shall be computed at the rate the Secretary of the Treasury establishes for interest payments under section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611), and shall run from the date which is 61 days after the date of such award up to and including the date such payment is posted by certified or registered mail.".

SEC. 2. (a) Section 2412 of title 28, United States Code, is amended—

(1) in subsections (a) and (b) by striking out "or any agency and any official of the United States" each place it appears and inserting in lieu thereof "or any agency or any official of the United States";

(2) subsection (d)(1)(A) by inserting ", including proceedings for judicial review of agency action," after "in tort)"; and

(b) Section 2412(d)(2) of title 28, United States Code, is amended—

(1) in subparagraph (B)—

(A) in clause (i) by striking out "$1,000,000" and inserting in lieu thereof "$2,000,000"; and

(B) by striking out "(ii)" and all that follows through the end of the subparagraph and inserting in lieu thereof the following: "or (ii) any owner of an unincorporated business, or any partnership, corporation, association, unit of local government, or organization, the net worth of which did not exceed $7,000,000 at the time the civil action was filed, and which had not more than 500 employees at the time the civil action was filed; except that an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)(3)) exempt from taxation under section 501(a) of such Code, or a cooperative association as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1141j(a)), may be a party regardless of the net worth of such organization or cooperative association;";

(2) by striking out the period at the end of subparagraph (C) and inserting in lieu thereof a semicolon; and

(3) by adding at the end thereof the following:

"(D) 'position of the United States' includes the underlying agency action which led to the litigation; except that fees and expenses may not be awarded to a party for any portion of the litigation in which the party has unreasonably protracted the proceedings;

"(E) 'civil action brought by or against the United States' includes an appeal by a party, other than the United States, from a decision of contracting officer rendered pursuant to a disputes clause in a contract with the Government or pursuant to the Contract Disputes Act of 1978;

"(F) 'court' includes the United States Claims Court;

"(G) 'final judgment' means a judgment that is final and not appealable; and

"(H) 'prevaling party', in the case of eminent domain proceedings, means a party who obtains a final judgment (other than by settlement), exclusive of interest, the amount of which is at least as close to the highest valuation of the property involved that is attested to at trial on behalf of the property owner as it is to the highest valuation of the property involved that is attested to at trial on behalf of the Government.".

(c) Section 2412(d)(4) of title 28, United States Code, is amended to read as follows:

"(4) Fees and other expenses awarded under this subsection to a party shall be paid by any agency over which the party prevails from any funds made available to the agency, by appropriation or otherwise.".

(d) Section 2412 of title 28, United States Code, is amended by adding at the end thereof the following:

"(f) If complete payment of the costs or fees and other expenses awarded under this section is not made within 60 days after the award of such costs or fees and other expenses, interest shall be paid thereafter on the amount remaining due. Such interest shall be computed at the rate the Secretary of the Treasury establishes for interest payments under section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611), and shall run from the date which is 61 days after the date of such award up to and including the date such payment is posted by certified or registered mail.".

SEC. 3. Section 206 of the Equal Access to Justice Act is amended—

(1) by striking out "Nothing" and inserting in lieu thereof "(a) Except as provided in subsection (b), nothing"; and

(2) by adding at the end thereof the following:

"(b) Section 206(b) of the Social Security Act (42 U.S.C. 406(b)(1)) shall not prevent an award of fees and other expenses under section 2412(d) of title 28, United States Code. Section 206(b)(2) of the Social Security Act shall not apply with respect to any such award but only if any fees collected by the claimant's attorney or withheld for such attorney pursuant to such section 206(b) are refunded to the claimant insofar as the fees relate to the same work for which the claimant's attorney is awarded fees under section 2412(d) of title 28, United States Code.".

SEC. 4. Section 203(c) of the Equal Access to Justice Act (Public Law 96-481) is repealed.

SEC. 5. Section 204(c) of the Equal Access to Justice Act is repealed.

SEC. 6. Section 207 of the Equal Access to Justice Act, is repealed.

SEC. 7. Section 208 of the Equal Access to Justice Act is amended by adding at the end thereof the following: "Awards may be made for fees incurred before October 1, 1981, in any such adversary adjudication or civil action.".

SEC. 8. (a) Section 7430(b)(1) of the Internal Revenue Code of 1954 (relating to maximum dollar amount) is amended by striking out "$25,000" and inserting in lieu therof "$50,000".

(b) Subparagraph (A) of section 7430(c)(2) of such Code (defining prevailing party) is amended to read as follows:

"(A) In general.—The term 'prevailing party' means any party to any proceeding described in subsection (a) (other than the United States or any creditor of the Taxpayer involved)—

"(i) which has substantially prevailed with respect to—

"(I) the amount in controversy, or

"(II) the most significant issue or set of issues presented, and

"(ii) with respect to which the United States has not established that its position in the civil proceeding was substantially justified.

In determining whether the position of the United States in any civil proceeding was substantially justified, the court may take into account the administrative actions of the Internal Revenue Service in the matter giving rise to the issues in such proceeding. Notwithstanding this subparagraph, a party shall not be treated as a prevailing party if special circumstances would make an award unjust.".

(c) Section 7430(f) of such Code (relating to termination date) is amended by striking out "1985" and inserting in lieu thereof "1989".

SEC. 9. (a) Except as otherwise provided in this section, the amendments made by this Act shall be effective as of October 1, 1984, and shall apply to cases pending on such date.

(b) The amendments made to section 504(b)(1)(C)(ii) of title 5, United States Code, by subsection (c)(2) of the first section of this Act, and the amendments to section 2412(d)(2)(E) of title 28, United States Code, made by section 2(b)(3) of this Act shall apply to any adversary adjudication which was pending on or commenced on or after October 1, 1981 in which applications for fees and expenses were timely filed and were dismissed for lack of jurisdiction.

(c)(1) Except as provided in paragraph (2), the amendments made by section 8 of this Act shall apply to civil actions or proceedings pending on, or commenced after, the 45th day after the date of the enactment of this Act.

(2) The amendments made by section 8 shall not apply to any action or proceeding pending on such 45th day if there has been a determination by any court of the United States (including the Tax Court and the United States Claims Court) with respect to—

(A) the awarding of reasonable litigation costs in such proceeding, or

(B) the most significant issue or set of issues presented in such proceeding.

The PRESIDING OFFICER. Without objection, the motion is agreed to.

CONSERVATION SERVICE REFORM ACT

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 5946.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the bill (H.R. 5946) entitled "An Act to reform the Residential Conservation Service and to repeal the Commercial and Apartment Conservation Service", with the following amendment:

In lieu of the matter proposed to be inserted by said amendment, insert:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Conservation Service Reform Act of 1984".

TITLE I—LIMITATION OF PROVISIONS REGARDING COMMERCIAL BUILDINGS AND MULTIFAMILY DWELLINGS

SEC. 101. NO APPROVAL, AFTER ENACTMENT DATE, OF ENERGY CONSERVATION PLANS FOR COMMERCIAL BUILDINGS AND MULTIFAMILY DWELLINGS.

Notwithstanding title VII of the National Energy Conservation Policy Act (relating to energy conservation for commercial buildings and multifamily dwellings), after the date of the enactment of this Act, the Secretary of Energy may not approve any energy conservation plan for commercial buildings and multifamily dwellings (within the meaning of such title VII).

SEC. 102. LIMITATION ON ENFORCEMENT OF TITLE VII.

The provisions of title VII shall not apply to any public utility except pursuant to an energy conservation plan for commercial buildings and multifamily dwellings (within the meaning of such title VII) approved by the Secretary of Energy before the date of the enactment of this Act.

SEC. 103. REPEAL OF PROVISIONS REGARDING COMMERCIAL BUILDINGS AND MULTIFAMILY DWELLINGS, EFFECTIVE JANUARY 1, 1986.

(a) IN GENERAL.—Effective January 1, 1986, title VII of the National Energy Conservation Policy Act (relating to energy conservation for commercial buildings and multifamily dwellings) is repealed.

(b) CLERICAL AMENDMENT.—The table of contents for such Act is amended by striking out the items relating to title VII.

TITLE II—RESIDENTIAL CONSERVATION SERVICE

SEC. 201. CHANGES IN CERTAIN PLAN REQUIREMENTS.

(a) INFORMATION REQUIREMENTS MADE APPLICABLE UNTIL JANUARY 1, 1990.—Sections 215 (a) and (d) and 217(a)(1) of the National Energy Conservation Policy Act (relating to utility programs and home heating supplier programs) are amended by striking out "January 1, 1985" each place it appears and inserting in lieu thereof "January 1, 1990".

(b) Elimination of Requirements That Public Utilities Arrange for Installation of Suggested Measures and for Related Loans; Elimination of Listing Requirements.—

(1) UTILITY PROGRAMS.—Section 215(b) of such Act (relating to project manager requirements) is amended—

(A) by striking out "Each utility program shall include" through "procedures" and inserting in lieu thereof "Each utility program shall include procedures";

(B) by striking out "to" through "inspect" and inserting in lieu thereof "to inspect"; and

(C) by striking out "inspection;" and all that follows and inserting in lieu thereof "inspection.".

(2) HOME HEATING SUPPLIER PROGRAMS.—Section 217(a)(2) of such Act (relating to home heating supplier programs) is amended—

(A) by striking out "will—" through "inspect" and inserting in lieu thereof "will inspect"; and

(B) by striking out "installing, suggested measures;" and all that follows and inserting in lieu thereof "installing, suggested measures.".

(3) STATE PLANS.—Section 213(a) of such Act (relating to general plan requirements) is amended—

(A) by striking out paragraphs (2) and (3); and

(B) by redesignating paragraphs (4) through (9) as paragraphs (2) through (7), respectively.

(c) RULES.—Section 212(b)(2) of such Act (relating to rules of the Secretary) is amended by striking out subparagraphs (E) and (F) and inserting "and" at the end of subparagraph (C).

(d) EFFECT OF 1984 AMENDMENTS ON APPROVED PLANS.—Section 219 of such Act (relating to Federal standby authority) is amended by adding at the end thereof the following new subsection:

"(e) PLANS APPROVED BEFORE 1984 AMENDMENTS.—For purposes of this section, any residential energy conservation plan which was approved by the Secretary before the effective date of the Conservation Service Reform Act of 1984 shall be treated as an approved plan which is adequately implemented if such plan is adequately implemented in accordance with the requirements of this Act as amended by the Conservation Service Reform Act of 1984.".

(e) CONFORMING AMENDMENTS.—

(1) Paragraph (16) of section 210 of such Act is amended by striking out "215(b)(1)(A)" and inserting in lieu thereof "215(b)".

(2) Subparagraph (C) of section 212(b)(2) of such Act is amended by striking out "213(a)(4)" and inserting in lieu thereof "213(a)(2)".

(3) Subparagraph (A) of section 213(b)(2) of such Act is amended by striking out "215(b)(1)" and inserting in lieu thereof "215(b)".

(4) Subsection (b) of section 214 of such Act is amended by striking out "8" and inserting in lieu thereof "6".

(5) Section 215(a)(3) of such Act is amended by striking out "and the lists referred to in section 213(a)(2) and (3)".

(6) Subsection (d) of section 215 of such Act is amended by striking out ", the offer required under subsection (b)(1)(A)" and all that follows and by inserting in lieu thereof "and the offer required under subsection (b).".

(7) Section 215 of such Act is amended by striking out subsection (f) and by redesignating subsection (g) as subsection (f).

(8) Paragraph (1) of section 216(c) of such Act is amended by striking out subparagraph (A) and by redesignating subparagraphs (B) and (C) as subparagraphs (A) and (B), respectively.

(9) Subparagraph (C) of section 216(c)(2) of such Act is amended by striking out "on the lists referred to in section 213(a)(2)".

(f) STATUTORY CONSTRUCTION.—Nothing in the amendments made by subsections (b) through (e) shall prevent implementation of a plan or program pursuant to the National Energy Conservation Policy Act as in effect before the date of the enactment of this Act.

(g) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendments made by this section shall take effect 90 days after the date of the enactment of this Act.

(2) RULES.—The Secretary of Energy shall, within the 90-day period referred to in paragraph (1), amend the rules promulgated under section 212 of the National Energy Conservation Policy Act to carry out the amendments made by this Act.

(3) SPECIAL REQUIREMENT FOR PLANS APPROVED BEFORE 1984 AMENDMENTS.—The Secretary of Energy shall, with respect to any residential energy conservation plan approved by the Secretary of Energy before the effective date (as described in paragraph (1)) of the amendments made by this section, require the appropriate official in charge of such plan to notify the Secretary of Energy, within 120 days of the date of enactment of this Act, that the amendments made by subsection (a) of this section shall be implemented for the duration of such plan.

SEC. 202. TIME LIMIT FOR ACTION ON APPLICATIONS FOR TEMPORARY PROGRAMS.

Any application for an exemption under section 218(a) of the National Energy Conservation Policy Act which is pending before the Secretary of Energy on the date of the enactment of this act shall be deemed approved unless it is disapproved by the Secretary of Energy within 30 days after such date of enactment.

SEC. 203. TEMPORARY RELIEF FROM RCS REQUIREMENTS; PILOT ALTERNATIVE PLANS AND ALTERNATIVE PLANS FOR RESIDENTIAL BUILDINGS.

(a) IN GENERAL.—The National Energy Conservation Policy Act is amended by inserting the following new sections after section 225:

"SEC. 225A. TEMPORARY RELIEF FROM RCS REQUIREMENTS.

"(a) TIME FOR PILOT ALTERNATIVE PLANS.—

"(1) For the 90-day period beginning on the date of the enactment of this Act, the provisions of this title shall not apply to any utility.

"(2) In the case of a State which submits a plan under section 226A, the provisions of this title shall not apply, with respect to utilities included in such State plan, before the date that such plan is approved or disapproved.

"(3) In the case of a utility which submits a plan under section 226B, the provisions of this title shall not apply to such utility before the date that such plan is approved or disapproved.

"(b) TIME FOR ALTERNATIVE PLANS.—The provisions of this title shall not apply to any utility for the period beginning January 1, 1986, and ending June 30, 1986.

"SEC. 226A. PILOT ALTERNATIVE STATE PLANS.

"(a) IN GENERAL.—A Governor of any State or any State agency authorized to do so under State law may, within 90 days after the date of the enactment of this Act, submit a pilot alternative State plan to the Secretary.

"(b) APPROVAL BY THE SECRETARY.—

"(1) The Secretary shall approve or disapprove a plan under this section within 30 days after receipt.

"(2) If the Secretary does not approve or disapprove a plan submitted under subsection (a) within 30 days after receipt, the plan shall be deemed approved.

"(c) CONSEQUENCES OF APPROVAL.—(1) Beginning with the date on which a pilot alternative State plan is approved under subsection (b) with respect to a State, and ending on December 31, 1985—

"(A) sections 212(a) through (c)(3), 213 through 215, and sections 217, 218, and 219 shall not apply with respect to—

"(i) regulated utilities in such State, and

"(ii) nonregulated utilities which are included in the plan; and

"(B) sections 212 through 219 shall apply to nonregulated utilities which are not included in the plan and which do not have an approved pilot alternative utility plan under section 226B.

"(2) Any State which has a plan approved under subsection (b) shall continue to have such plan in effect until December 31, 1985.

"(d) CONTENT OF PLAN.—A plan submitted under subsection (a) shall not be disapproved by the Secretary if it meets the requirements of section 227A(d)(1) through (8), (10), and (11) and is consistent with the rules under section 215(c).

"(e) REPORT.—(1) A State which has a plan approved under subsection (b) shall submit a report to the Secretary, within the period beginning on January 1, 1986, and ending on March 1, 1986, describing the implementation of the plan and the results thereof.

"(2) Such report shall include the statements, description, and names set forth in section 227A(f).

"(f) ALTERNATIVE STANDARDS.—If a plan submitted under this section includes a statement (supported by evidence) that—

"(1) residential customers will not be adequately informed of the availability of benefits under such plan,

"(2) the number of residential buildings which have received benefits described in section 227A(d)(2) (regardless of whether included in a plan) prior to the effective date of the pilot alternative plan is so large that the results described in section 227A(d)(3) are unlikely to be reached in the absence of a finding under this subsection, or

"(3) the plan (or substantial portions thereof) will primarily benefit individuals with low or moderate incomes,

such plan may be implemented by substituting for '5 percent' (as such term is used in section 227A(d)(3)(A)) a percentage (determined by the Governor or State agency) which is less than 5 percent and greater than or equal to 3 percent.

"(g) MISCELLANEOUS PROVISIONS.—Rules similar to the rules under section 227A (h), (i), (j), and (l) shall apply to a plan approved under this section.

"SEC. 226B. PILOT ALTERNATIVE UTILITY PLANS.

"(a) IN GENERAL.—A regulated utility which is supported by the Governor and which is in a State in which a pilot alternative State plan has not been approved under section 226A and a nonregulated utility which is not included in a plan submitted by a Governor or State agency as described in section 212(c) (if such inclusion is authorized under State law) or in a plan approved under section 226A may, within 90 days after the date of the enactment of this Act, submit a pilot alternative utility plan to the Secretary.

"(b) APPROVAL BY THE SECRETARY.—(1) Except as provided in paragraph (2)—

"(A) the Secretary shall approve or disapprove a plan under this section within 30 days after receipt; and

"(B) if the Secretary does not approve or disapprove a plan submitted under subsection (a) within 30 days after receipt, the plan shall be deemed approved.

"(2) A plan shall not be approved or deemed approved under paragraph (1) if it is for a regulated utility which is in a State in which a pilot alternative State plan has been approved under section 226A, or a nonregulated utility included in a plan submitted by a Governor or State agency as described in section 212(c) (if such inclusion is authorized under State law) or in a plan approved under section 226A.

"(c) CONSEQUENCES OF APPROVAL.—

"(1) Beginning with the date on which a pilot alternative utility plan is approved under subsection (b) with respect to a utility, and ending on December 31, 1985, sections 212 (a) through (c)(3), 213 through 215, and sections 217, 218, and 219 shall not apply with respect to such utility.

"(2) Any utility which has a plan approved under subsection (b) shall continue to have such plan in effect until December 31, 1985.

"(d) CONTENT OF PLAN.—A plan submitted under subsection (a) shall not be disapproved by the Secretary if it meets the requirements of section 227B(d) (1) through (7), (9), and (10), and is consistent with the rules under section 215(c).

"(e) Report.—(1) A utility which has a plan approved under subsection (b) shall submit a report to the Secretary, within the period beginning on January 1, 1986, and ending on March 1, 1986, describing the implementation of the plan and the results thereof.

"(2) Such report shall include the statements, description, and names set forth in section 227B(f).

"(f) ALTERNATIVE STANDARDS.—If a plan submitted under this section includes a statement (supported by evidence) that—

"(1) residential customers will not be adequately informed of the availability of benefits under such plan,

"(2) the number of residential buildings which have received benefits described in section 227B(d)(2) (regardless of whether included in a plan) prior to the effective date of the pilot alternative plan is so large that the results described in section 227B(d)(3) are unlikely to be reached in the absence of a finding under this subsection, or

"(3) the plan (or substantial portions thereof) will primarily benefit individuals with low or moderate incomes,

such plan may be implemented by substituting for '5 percent' (as such term in used in section 227B(c)(3)(A)) a percentage (determined by the Governor) which is less than 5 percent and greater than or equal to 3 percent.

"(g) MISCELLANEOUS PROVISIONS.—Rules similar to the rules under section 227B(h), (1), and (k) shall apply to a plan approved under this section.

"SEC. 227A. ALTERNATIVE STATE PLANS.

"(a) IN GENERAL.—A Governer of any State or any State agency authorized to do so under State law may elect to formulate and certify an alternative State plan under this section.

"(b) CONSEQUENCES OF CERTIFICATION.—(1) Beginning with July 1, 1986, or the date on which the certification of a plan is made with respect to a State under subsection (e), whichever occurs later, and ending with the date on which a plan is no longer in effect under this section with respect to such State—

"(A) sections 212 (a) through (c)(3), 213 through 215, and sections 217 and 218 shall not apply with respect to—

"(i) regulated utilities in such State, and

"(ii) nonregulated utilities which are included in the plan;

"(B) section 219 shall apply to utilities described in subparagraph (A) only to the extent provided for in subsection (g); and

"(C) sections 212 through 219 shall apply to nonregulated utilities which are not included in the plan and which have not certified an alternative utility plan under section 227B.

"(2) Except as provided in subsection (g), any State which certifies a plan under subsection (e) shall continue to have such plan in effect until the expiration of the 4-year period beginning on the date of such certification or until January 1, 1990, whichever occurs first.

"(c) FORMULATION OF PLAN.—In formulating any plan under this section, the Governor or State agency shall—

"(1) provide for advance notice to the public of proposed rulemaking for the purpose of formulating such plan;

"(2) publish a proposed rule on the content and implementation of the plan;

"(3) afford interested persons an opportunity to present oral and written comments on matters relating to such proposed rule; and

"(4) after taking such public comment into consideration, prescribe and make public a final rule setting forth the content and implementation of such plan.

"(d) CONTENT OF PLAN.—A plan certified pursuant to this section shall—

"(1) be designated to result in the dissemination of general energy conservation suggestions to all residential customers of utilities in the State;

"(2) be designed to result in—

"(A) specific energy conservation suggestions to each residential customer requesting such suggestions regarding the customer's residential building,

"(B) energy conservation improvements (which are included in such plan) to the customer's residential building, or

"(C) load management improvements (which are included in such plan) in the customer's residential building;

"(3) except as provided in subsection (k), for each year in which such plan is in effect, be designed to result in—

"(A)(i) in the case of a plan carried out solely by a State, benefits under paragraph (2) for a number of buildings equal to 5 percent or more of the residential buildings using natural gas or electric energy from utilites covered under section 211(a) in such

State which did not, before such year, receive benefits under this Act, similar State law, or similar energy conservation program mandated or approved by a State agency (other than benefits under paragraph (1) or seciton 227B(d)(1) or a similar provision of the State law or energy conservation program); and

"(ii) in the case of any other plan, benefits under paragraph (2) for a number of buildings equal to 5 percent or more of the residential buildings served by the utilities included in the plan which did not, before such year, receive benefits under this Act, similar State law, or similar energy conservation program mandated or approved by a State agency (other than benefits under paragraph (1) or section 227B(d)(1) or a similar provision of the State law or energy conservation program);

"(B) energy consumption reductions (as determined by the Governor by rule) of an average of 10 percent or more (as compared to the preceding year) in the residential buildings in such State which receive specific energy conservation suggestions or energy conservation improvements under paragraph (2) during the year for which the determination is made; and

"(C) maximum kilowatt demand reductions (as determined by the Governor by rule) of an average of 10 percent or more (as compared to the preceding year) in the residential buildings in such State which receive load management improvements under paragraph (2) during the year for which the determination is made;

"(4) be designed to benefit individuals, including but not limited to individuals with low or moderate incomes;

"(5) contain adequate procedures to assure that, if a public utility supplies or installs residential enrgy conservation measures, such actions shall be consistent with section 216 and prices and rates of interest charged shall be fair and reasonable;

"(6) contain adequate procedures for preventing unfair, deceptive, or anticompetitive acts or practices affecting commerce which relate to the implementation of such plan;

"(7) be carried out by the State, by utilities within the State, or a combination of both;

"(8) be consistent with the rules under section 212(b)(2)(D);

"(9) contain rules consistent with the rules under section 215(c);

"(10) contain provisions to assure that any person who alleges any injury resulting from a violation of any plan provision shall be entitled to redress pursuant to State law or under such procedures as may be established by the Governor or State agency prior to the date on which the plan is certified under subsection (e); and

"(11) contain provisions described in section 213(b)(2)(B).

"(e) CERTIFICATION.—(1) A Governor or State agency which elects to certify a plan under this section shall certify, pursuant to a form to be prescribed by the Secretary (except as provided by paragraph (2)) to the Secretary that the plan—

"(A) has been formulated in accordance with subsection (c); and

"(B) will be adequately implemented.

"(2) If a form is not made available by the Secretary within 90 days after the date of the enactment of this section, the Governor or State agency may make such certification on a form prescribed by such Governor or State agency.

"(3) Any certification under this subsection shall include a detailed explanation of the manner in which the contents of the plan will be implemented.

"(f) ANNUAL REPORT.—(1) The State shall submit an annual report to the Secretary, within 60 days after the end of the 1-year period to which the report relates, describing the implementation of the plan and the results thereof.

"(2) Such report shall include—

"(A) a statement of the number of buildings receiving benefits under subsection (d)(2),

"(B) a statement of the energy savings resulting from the plan, including a statement of average energy consumption reductions in the case of residential buildings which receive energy conservation suggestions or energy conservation improvements under subsection (d)(2), and a statement of average maximum kilowatt demand reductions in the case of residential buildings which receive load management improvements under subsection (d)(2),

"(C) a statement of the proportion of individuals with low and moderate incomes who receive benefits under subsection (d)(2),

"(D) a detailed description of the benefits provided under the plan, and

"(E) the names of the entities carrying out the plan.

"(g) ADMINISTRATIVE AND JUDICIAL ENFORCEMENT PROCEEDINGS.—(1) At any time more than 1 year after an alternative State plan has been certified under subsection (e) with respect to a State, any resident of such State may petition the Secretary to conduct a public hearing to determine if the alternative State plan has been adequately implemented. A copy of such petition shall be transmitted to the Governor or the appropriate State agency on the same date it is transmitted to the Secretary. The Secretary shall have 90 days after the date on which such petition is received to make a determination on the matter.

"(2) Except as provided in paragraph (3), if the Secretary determines that the alternative State plan has not been adequately implemented, the Secretary shall, within the 90-day period described in paragraph (1), initiate standby authority under section 219 with respect to such State. If the Secretary does not initiate the standby authority within the 90-day period, the resident may bring a de novo action in the appropriate United States district court—

"(A) adjust the Secretary (with the State having the right to intervene) to require the Secretary to implement standby authority under section 219, or

"(B) against the State to require the State to adequately implement the alternative State plan certified under subsection (e).

If the court finds that the State has failed to adequately implement such plan, it shall order the remedy requested by the plaintiff under subparagraph (A) or (B). If an individual prevails in an action under subparagraph (A), the court shall award such individual reasonable fees and expenses of attorneys and costs.

"(3) If a State which had an approved plan in effect under section 212 on the day before the date on which certification was made under this section informs the Secretary in writing, within 30 days after receiving a copy of the petition described in paragraph (1), that it will not longer implement a plan certified under this section and that it will implement the approved plan which was in effect in the State on the day before certification of the alternative plan under this section—

"(A) the determinations and actions described in paragraph (2) may not be carried out; and

"(B) sections 212 through 219 shall apply in such State except to the extent an alternative utility plan under section 227B is implemented in such State.

"(4)(A) A resident may not petition the Secretary under paragraph (1) and may not bring an action under paragraph (2) if such petition or action is based solely on a failure to reach the results described in paragraph (3) of subsection (d) or subsection (k).

"(B) A court may not make a finding that a State has failed to adequately implement a plan under paragraph (2) if such finding is based solely on a failure to reach the results described in paragraph (3) of subsection (d) or subsection (k).

"(h) COVERAGE.—A plan certified under this section shall not apply to utilities other than utilities covered under section 211(a).

"(i) INCLUSION OF NONREGULATED UTILITIES.—No nonregulated utility may be included in a plan by a Governor or State agency under this section unless such inclusion is authorized under State law or the nonregulated utility agrees to such inclusion.

"(j) UTILITIES WITH RETAIL SERVICE TERRITORIES IN MORE THAN 1 STATE.—For purposes of this section, any utility with a retail service territory (as defined in section 227B(d)) in more than one State shall be considered to be a separate utility with respect to each State in which its retail service territory is located.

"(k) ALTERNATIVE STANDARDS.—(1) If—

"(A) the Governor or State agency which certifies a plan under this section finds—

"(i) with respect to the first year in which the alternative State plan is to be in effect, that residential customers will not be adequately informed of the availability of benefits under such plans, or

"(ii) with respect to any year in which the alternative State plan is to be in effect, that—

"(I) the number of rsidential buildings which have received benefits described in subsection (d)(2) (regardless of whether included in a plan) prior to such year is so large that the results described in subsection (d)(3) are unlikely to be reached in the absence of a finding under this subsection, or

"(II) such alternative State plan (or substantial portions thereof) will primarily benefit individuals with low or moderate incomes, and

"(B) such finding is made after interested persons are afforded an opportunity to present oral and written comments thereon (which, with respect, to the first year in which an alternative State plan is to be in effect, may be in combination with the opportunity afforded under subsection (c)(3)),

the results described in subsection (d)(3)(A) shall be applied to such year by substituting for '5 percent' a percentage (determined by such Governor or State agency) which is less than 5 percent and greater than or equal to 3 percent.

"(2) A finding under this subsection may not be made more frequently than once a year and each such finding shall be applicable to the implementation of an alternative State plan for a period, beginning on the date specified in such finding, not to exceed 12 months. Such period shall not begin before the date of such finding.

"(l) CLASSIFICATION AS LOAD MANAGEMENT IMPROVEMENT OF ENERGY CONSERVATION IM-

PROVEMENT.—For purposes of this section, in the case of a technique or installation which may be classified as either a load management improvement or an energy conservation improvement, the Governor, by rule, shall determine whether to treat such technique or installation as a load management improvement, an energy coservation improvement, or both.

"SEC. 227B. ALTERNATIVE UTILITY PLANS.

"(a) IN GENERAL.—A regulated utility which is in a State in which an alternative State plan is not in effect under section 227A and a nonregulated utility which is not included in a plan submitted by a Governor or State agency as described in section 212(c) (if such inclusion is authorized under State law) or in a plan certified under section 227A may elect to certify an alternative utility plan under this section.

"(b) CONSEQUENCES OF CERTIFICATION.—(1) Beginning with July 1, 1986, or the date on which the certification of a plan is made with respect to a utility under subsection (e), whichever occurs later, and ending with the date on which a plan is no longer in effect under this section with respect to such utility—

"(A) sections 212(a) through (c)(3), 213 through 215, and sections 217, 218, and 227A shall not apply with respect to such utility; and

"(B) section 219 shall apply to such utility only to the extent provided for in subsection (g).

"(2) Except as provided in subsection (g), any utility which certifies a plan under subsection (e), shall continue to have such plan in effect until the expiration of the 4-year period beginning on the day of such certification or until January 1, 1990, whichever occurs first.

"(c) FORMULATION OF PLAN.—The Governor or State agency authorized to do so under State law shall formulate a plan under this section on behalf of any regulated utility which has elected to certify under this section, the nonregulated utility or the Governor or State agency in the case of a regulated utility shall—

"(1) provide for advance notice to the public of such plan;

"(2) publish a description of the proposed content and implementation of the plan;

"(3) afford interested persons an opportunity to present oral and written comments on matters relating to such proposed plan; and

"(4) after taking such public comment into consideration, prescribe and make public the content and implementation of such plan.

"(d) CONTENT OF PLAN.—Any plan certified pursuant to this section shall—

"(1) be designed to result in the dissemination of general energy conservation suggestions to all residential customers of such utility;

"(2) be designed to result in—

"(A) specific energy conservation suggestions to each residential customer requesting such suggestions regarding the customer's residential building,

"(B) energy conservation improvments (which are included in such plan) to the customer's residential building, or

"(C) load management improvements (which are included in such plan) in the customer's residential building;

"(3) except as provided in subsection (j), for each year in which such plan is in effect and with respect to the retail service territory of the utility, be designed to result in—

"(A) benefits under paragraph (2) for a number of buildings equal to 5 percent or more of the residential buildings using natural gas or electric energy from such utility which did not, before such year, receive benefits under this Act, similar State law, or similar energy conservation program mandated or approved by a State agency (other than benefits under paragraph (1) or section 227A(d)(1) or a similar provision of the State law or energy conservation program);

"(B) energy consumption reductions (as determined by the Governor by rule) of an average of 10 percent or more (as compared to the preceding year) in the residential buildings in such territory which receive specific energy conservation suggestions or energy conservation improvments under paragraph (2) during the year for which the determination is made; and

"(C) maximum kilowatt demand reductions (as determined by the Governor by rule) of an average of 10 percent or more (as compared to the preceding year) in the residential buildings in such territory which receive load management improvements under paragraph (2) during the year for which the determination is made;

"(4) be designed to benefit individuals including but not limited to individuals with low or moderate incomes;

"(5) contain adequate procedures to assure that, if a public utility supplies or installs residential energy conservation measures, such actions shall be consistent with section 216 and prices and rates of interest charged shall be fair and reasonable;

"(6) contain adequate procedures for preventing unfair, deceptive, or anticompetitive acts or practices affecting commerce which relate to the implementation of such plan;

"(7) be consistent with the rules under section 212(b)(2)(D);

"(8) contain rules consistent with the rules under section 215(c);

"(9) contain provisions to assure that any person who alleges any injury resulting from a violation of any plan provision shall be entitled to redress—

"(A) in the case of an alleged violation by a regulated utility, pursuant to State law or under such procedures as may be established by the Governor or State agency proir to the date on which the plan is certified under subsection (e), or

"(B) in the case of an alleged violation by a nonregulated utility, under such procedures as are established by the nonregulated utility prior to the date on which the plan is certified under subsection (e); and

"(10) contain provisions described in section 213(b)(2)(B).

For purposes of this subsection, the term 'retail service territory' means the territory in a State in which a utility makes retail sales to residential customers.

"(e) CERTIFICATION.—(1) A utility which elects to certify a plan under this section shall certify, pursuant to a form to be prescribed by the Secretary (except as provided by paragraph (2)), to the Secretary that the plan—

"(A) has been formulated in accordance with subsection (c); and

"(B) will be adequately implemented.

"(2) If a form is not made available to a utility by the Secretary within 90 days after the date of the enactment of this section, the utility may make such certification on a form prescribed by such utility.

"(3) Any certification under this subsection shall include a detailed explanation of the manner in which the contents of the plan will be implemented, and, in the case of a regulated utility, shall include a statement of support from the Governor or the State agency of the State concerned.

"(f) ANNUAL REPORT.—(1) The utility shall submit an annual report to the Secretary, within 60 days after the end of the 1-year period to which the report relates, describing the implementation of the plan and the results thereof.

"(2) Such report shall include—

"(A) a statement of the number of buildings receiving benefits under subsection (d)(2),

"(B) a statement of the energy savings resulting from the plan, including a statement of average energy consumption reductions in the case of residential buildings which receive energy conservation suggestions of energy conservaton improvements under subsection (d)(2), and a statement of average maximum kilowatt demand reductions in the case of presidential buildings which receive load management improvements under subsection (d)(2),

"(C) a statement of the proportion of individuals with low and moderate incomes who receive benefits under subsection (d)(2),

"(D) a detailed description of the benefits provided under the plan, and

"(E) the names of the entities carrying out the plan.

"(g) ADMINISTRATIVE AND JUDICIAL ENFORCEMENT PROCEEDINGS.—(1) any time more than 1 year after an alternative utility plan has been certified under subsection (e) with respect to a utility, any residential customer of such utility may petition the Secretary to conduct a public hearing to determine if the alternative utility plan has been adequately implemented. A copy of such petition shall be transmitted to the utility on the same date it is transmitted to the Secretary. The Secretary shall have 90 days after the date on which such petition is received to make a determination on the matter.

"(2) Except as provided in paragraph (3), if the Secretary determines that the alternative utility plan has not been adequately implemented, the Secretary shall, within the 90-day period described in paragraph (1), initiate standby authority under section 219 with respect to the utility concerned. If the Secretary does not initiate such standby authority within such 90-day period, such customer may bring a de novo action in the appropriate United States district court—

"(A) against the Secretary (with the utility having the right to intervene) to require the Secretary to implement standby authority under section 219 with respect to such utility, or

"(B) against the utility to require the utility to adequately implement the alternative utility plan certified under subsection (e).

If the court finds that the utility has failed to adequately implement such plan, it shall order the remedy requested by the plaintiff under subparagraph (A) or (B). If an individual prevails in an action under subparagraph (A), the court shall award such individual reasonable fees and expenses of attorneys and costs.

"(3) If a utility which was within an approved State plan under section 212 on the day before the date on which certification was made under this section informs the Secretary in writing, within 30 days after receiving a copy of a petition described in paragraph (1), that it will no longer implement a plan certified under this section and that it will carry out a program in accordance with the State plan in effect under this part in the State—

"(A) the determinations and actions described in paragraph (2) may not be carried out; and

"(B) sections 212 through 219 shall apply to such utility unless it voluntarily or pursuant to State law becomes part of a State alternative plan implemented in the State under section 227A.

"(4) For purposes of implementing section 219(a)(2) to a regulated utility as a result of this subsection, the term 'each regulated utility in the State' in such section shall be deemed to mean only the utility with respect to which action is taken under this subsection.

"(5)(A) A residential customer may not petition the Secretary under paragraph (1) and may not bring an action under paragraph (2) if such petition or action is based solely on a failure to reach the results described in paragraph (3) of subsection (d) or subsection (j).

"(B) A court may not make a finding that a utility has failed to adequately implement a plan under paragraph (2) if such finding is based solely on a failure to reach the results described in paragraph (3) of subsection (d) or subsection (j).

"(h) COVERAGE.—A plan certified under this section shall not apply to utilities other than utilities covered under section 211(a).

"(i) UTILITIES WITH RETAIL SERVICE TERRITORIES IN MORE THAN ONE STATE.—For purposes of this section, any utility with a retail service territory (as defied in subsection (d)) in more than one State shall be considered to be a separate utility with respect to each State in which its retail service territory is located.

"(j) ALTERNATIVE STANDARDS.—(1) If—

"(A) the Governor of a State which includes a retail service territory (as defined in subsection (d)) of a utility which certifies a plan under this section finds, for such retail service territory—

"(i) with respect to the first year in which the alternative utility plan is to be in effect, that residential customers will not be adequately informed of the availability of benefits under such plan, or

"(ii) with respect to any year in which the alternative utility plan is to be in effect, that—

"(I) the number of residential buildings which have received benefits described in subsection (d)(2) (regardless of whether included in a plan) prior to such year is so large that the requirements of subsection (d)(3) are unlikely to be met in the absence of a finding under this subsection, or

"(II) such alternative utility plan (or substantial portions thereof) will primarily benefit individuals with low or moderate incomes, and

"(B) such finding is made after interested persons are afforded an opportunity to present oral and written comments thereon (which, with respect to the first year in which an alternative utility plan is to be in effect, may be in combination with the opportunity afforded under subsection (c)(3)).

the requirements of subsection (d)(3)(A) shall be applied to such retail service territory for such year by substituting for '5 percent' a percentage (determined by such Governor) which is less than 5 percent and greater than or equal to 3 percent.

"(2) A finding under this subsection may not be made more frequently than once a year and each such finding shall be applicable to the implementation of an alternative utility plan for a period, beginning on the date specified in such finding, not to exceed 12 months. Such period shall not begin before the date of such finding.

"(k) CLASSIFICATION AS LOAD MANAGEMENT IMPROVEMENT OR ENERGY CONSERVATION IMPROVEMENT.—For purposes of this section, in the case of a technique or installation which may be classified as either a load management improvement or an energy conservation improvement, the Governor, by rule, shall determine whether to treat such technique or installation as a load management improvement, and energy conservation improvement, or both.".

(b) TVA AUTHORITY.—Paragraph (4) of section 212(c) is amended by inserting ", section 210(21), section 226A, section 226B, Section 227A, or section 227B" after "this section,".

(c) CONFORMING AMENDMENTS.—

(1) Subsection (e) of section 218 of such Act is amended by striking out the period at the end of the second sentence and inserting in lieu thereof "or a plan in effect under section 226A, section 226B, section 227A, or section 227B which is applicable to such utility.".

(2) Subsection (a) of section 219 of such Act is amended by striking out "If" and inserting in lieu thereof "Except as provided in section 226A, section 226B, section 227A, or section 227B, if".

(3) Subsection (b) of section 219 of such Act is amended by striking out "If" and inserting in lieu thereof "Except as provided in section 226A, section 226B, section 227A, or section 227B, if".

(d) CLERICAL AMENDMENT.—The table of contents for such Act is amended by inserting after the item relating to section 225 the following new items:

"Sec. 225A. Temporary relief from RCS requirements.
"Sec. 226A. Pilot alternative State plans.
"Sec. 226B. Pilot alternative utility plans.
"Sec. 227A. Alternative State plans.
"Sec. 227B. Alternative utility plans.".

SEC. 204. REPORTS AND DISSEMINATION OF INFORMATION.

(a) IN GENERAL.—Section 225 of the National Energy Conservation Policy Act (relating to FTC study and report submitted before January 1, 1982) is amended to read as follows:

"SEC. 225. REPORTS AND DISSEMINATION OF INFORMATION.

"(a) GENERAL REPORT.—(1)(A) No later than January 1, 1986, the Secretary shall submit a report to the chairman of the Committee on Energy and Commerce of the House of Representatives and the chairman of the Committee on Energy and Natural Resources of the Senate relating to the operation of this part.

"(B) Not later than January 1 of every other year after 1986, the Secretary shall submit a report to the Chairman of the Committee on Energy and Commerce of the House of Representatives and the Chairman of the Committee on Energy and Natural Resources of the Senate relating to the operation of this part during the preceding 2-year period.

"(2) Each such report shall include—

"(A) a comparison of actual and predicted energy savings resulting from plans under this part,

"(B) identification of the most effective plans (or portions thereof),

"(C) an analysis, based on completed audits and other relevant data, of the energy saving potential of the installation of additional residential conservation measures, and

"(D) an analysis of economic, technical, behavioral, and other factors considered relevant to energy consumption by the Secretary.

Nothing in this paragraph shall require a survey of each residential building in which a residential energy conservation measure has been installed under this part.

"(b) SUMMARY OF ALTERNATIVE PLAN REPORTS.—No later than January 1, 1988, and no later than January 1 of each year thereafter, the Secretary shall submit a report to the Chairman of the Committee on Energy and Commerce of the House of Representatives and the Chairman of the Committee on Energy and Natural Resources of the Senate summarizing the annual reports the Secretary received under section 227A(f) and section 227B(f) during the 12-month period ending on the preceding September 15.

"DISSEMINATION OF INFORMATION.—(1)(A) The Secretary shall at least annually, in fiscal years beginning after September 30, 1984, disseminate to the States and public utilities information providing technical assistance (including assistance in making calculations under sections 227A(d)(3)(B) and 227B(d)(3)(B)) and relating to the most cost-effective energy conservation procedures and devices (including residential energy conservation measures) and the most successful plans (or portions thereof) under this part.

"(B) The Secretary shall make the information described in subparagraph (A) available to the public.

"(2) The Secretary shall conduct seminars in various regions of the United States to disseminate information described in paragraph (1).".

(b) CLERICAL AMENDMENT.—The table of contents of such Act is amended by striking out the item relating to section 225 and inserting in lieu thereof the following:

"Sec. 225. Reports and dissemination of information.".

SEC. 205. LOAD MANAGEMENT IMPROVEMENT DEFINED.

Section 210 of the National Energy Conservation Policy Act (relating to definitions) is amended by inserting after paragraph (20) the following new paragraph:

"(21) The term 'load management improvements' means—

"(A) as determined by the Secretary—

"(i) load management techniques (other than time-of-day or seasonal rates), and

"(ii) the installation of energy-efficient electric appliances or any other devices which reduce kilowatt demand, and

"(B) as determined by the Governor of a State, any other improvements in such State which are described in clause (i) or (ii) of subparagraph (A).".

SEC. 206. LIMITATION ON SUPPLY AND INSTALLATION BY PUBLIC UTILITIES.

(a) ADDITIONAL REQUIREMENTS FOR WAIVER.—Section 216(e) of the National Energy Conservation Policy Act (relating to waiver of prohibition against supply and installation of residential energy conservation measures by public utilities) is amended—

(1) by striking out "The" and inserting in lieu thereof "(1) The",

(2) by striking out "charged and" and inserting in lieu thereof "changed, there will be no unfair competitive advantages to the utility (with respect to competitors such as small businesses) in carrying out such activities, and", and

(3) by adding at the end thereof the following new paragraph:

"(2) The Governor may not support the petition of a regulated utility under paragraph (1) before—

"(A) the Governor—

"(i) provides advance notice to the public of such waiver petition,

"(ii) affords interested persons an opportunity to present oral and written comments on the waiver petition, and

"(iii) makes the determinations and findings which the Secretary is required to make in order to grant a waiver under paragraph (1), and sets forth, in writing, such findings and the reasons for such determinations and findings; and

"(B) the utility makes all relevant documents and records requested by the Governor available to the Governor.".

(b) CONTRACTING EXEMPTION.—Subsection (c) of such section is amended by adding at the end thereof the following new paragraph:

"(3) This subsection shall not apply to the supply or installation of residential energy conservation measures other than specific measures which the Secretary determines—

"(A) were being installed or supplied by a public utility on the date of the enactment of the Conservation Service Reform Act of 1984, or

"(B) were broadly advertised on or before such date of enactment.".

(c) GENERAL EXEMPTION.—Subsection (d) of such section is amended—

(1) by striking out "The" and inserting in lieu thereof: "(1) Except as provided in paragraph (2), the",

(2) by redesignating paragraphs (1) through (3) as subparagraphs (A) through (C), respectively, and

(3) by adding at the end thereof the following new paragraph:

"(2) Effective July 1, 1986, subparagraphs (A) and (B) of paragraph (1) shall not apply to the supply or installation of residential energy conservation measures other than measures which the Secretary determines were being installed or supplied by a public utility during the 12-month period ending June 1, 1984.

"(3)(A) If any person requestes review of an exemption under paragraph (1)(A) or (B) by the Governor of the State in which the exemption applies, and such request includes adequate documentation, the Governor shall review such exemption under subparagraph (B).

"(B) If, after notice and opportunity for a public hearing, the Governor determines that with respect to an activity which is the subject of a request under subparagraph (A)—

"(i) the utility is not charging fair and reasonable prices and rates of interest,

"(ii) there are unfair competitive advantages to the utility (with respect to competitors such as small businesses),

"(iii) such activity is inconsistent with the prevention of unfair methods of competition or the prevention of unfair or deceptive acts or practices, or

"(iv) the utility has not provided the Governor with all documents and records he determines necessary to make the determination under clauses (i) through (iii),

and sets forth, in writing, such determination and the reasons for such determination, such exemption shall not apply to the activity which is the subject of such request.

"(C) Notwithstanding any findings of the Governor under subparagraph (B), the Governor may allow an exemption under paragraph (1)(A) or (B) if the utility establishes to the satisfaction of the Governor that it will provide appropriate competitive safeguards.".

(d) EFFECTIVE DATE.—The amendments made by this section shall take effect—

(1) on the date of the enactment of this Act with respect to pilot alternative plans under section 226A and 226B of the National Energy Conservation Policy Act, and

(2) on July 1, 1986, with respect to all public utilities within the meaning of section 216 of such Act.

Mr. JOHNSTON. Madam President, late Wednesday night the House passed and sent to us a new version of H.R. 5946, the energy conservation service reform bill. The original House bill on this subject was a long and complex one that proposes many changes in substantive law. The House bill arrived in the Senate on August 1, 1984. This new version is still longer and more complex, and it only arrived today.

The Committee on Energy and Natural Resources has not had the opportunity to examine the original House bill. We clearly have had no chance to review these new changes. There have been no hearings in the committee on any of these matters.

Because of this and because of the very short period left to the 98th Congress, the committee reported a substitute to the House bill that would freeze the status of the two programs in question—the Residential Conservation Service and the Commercial and Apartment Conservation Service—for a year, so that the Senate will have time to review these programs before deciding how to amend them. Wednesday morning the Senate adopted the committee substitute.

This substitute is really the only responsible course open to us. The RCS and CACS Programs are important programs. They deserve the careful attention of the Senate. We do not have anywhere near enough time to give them that attention now, but we will be able to do so next year. For this reason I urge the House to give the Senate this chance by adopting the substitute we are offering again today.

Mr. LEVIN. Madam President, the State of Michigan is the first and only State to submit and receive approval by the Department of Energy [DOE] for a Commercial and Apartment Conservation Service plan [CACS].

The 1980 Energy Security Act required large gas and electric utilities to offer energy audits to small commercial customers and centrally heated or cooled apartment buildings for a fee not to exceed $15. The law required the CACS program to be fully implemented by January 1, 1985.

For over 2 years, the State of Michigan has been preparing for the implementation of the CACS requirements. The State conducted a pilot study which found that businesses in Michigan needed and wanted an energy audit program and would be willing to pay for the costs of the program. The program will go into effect in January 1985 and the utilities in the State are prepared to comply.

The House, however, approved a bill which called for the repeal of the CACS program. The result would have been the State of Michigan would have had to enact legislation to require a State CACS program and there was inadequate time to do so.

The Senate passes a bill to delay the implementation of the CACS program but contained a very important provision which does not make the delay applicable to States which already have approved CACS plans. This enables Michigan to start up their program as planned. We are now considering a proposed House compromise which keeps the Michigan CACS program for 1 year but, in absence of Senate action next year, repeals the CACS program.

Total repeal of the CASC program is poor public policy. We are going to punish a State for complying with the law in a timely fashion and rewarding States for delaying compliance. In addition, we have lost sight of the need to conserve energy and becoming an energy independent nation.

I fully intend to explore what actions we can take to protect Michigan's program next year when the Senate debates the CACS program and the Residential Conservation Service Program.

Mr. BAKER. Madam President, I move that the Senate concur in the House amendment to the Senate amendment, with a further amendment on behalf of Senator MCCLURE, which I send to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee [Mr. BAKER], for Mr. MCCLURE, proposes an amendment numbered 7078.

Mr. BAKER. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the enacting clause and insert the following:

SECTION 1. (a) During the period beginning on the date of the enactment of this Act and ending on January 1, 1986, the Secretary of Energy may not approve any plan under section 721(a) of the National Energy Conservation Policy Act (relating to energy conservation for commercial buildings and multifamily dwellings), and no public utility may be required to offer an energy audit to an eligible customer of such utility under section 731(a)(1) of such Act, except pursuant to a plan approved by the Secretary prior to the date of the enactment of this Act.

(b) Sections 215(d) and 217(e)(1) of the National Energy Conservation Policy Act (relating to utility programs and home heat-

ing supplier programs) are amended by striking out "January 1, 1985," each place it appears and inserting in lieu thereof "January 1, 1986,".

The PRESIDING OFFICER. Without objection, the motion is agreed to.

HAZARDOUS AND SOLID WASTE AMENDMENTS

Mr. BAKER. Madam President, I submit a report of the committee of conference on H.R. 2867 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The Assistant Legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2867) to amend the Solid Waste Disposal Act to authorize appropriations for the fiscal years 1985 through 1988, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the House proceedings.)

Mr. SYMMS. Madam President, I rise in somewhat reluctant support of the conference report on the "Hazardous and Solid Waste Amendments of 1984."

About the most that I can say in favor of this bill is that it is not as bad as it could have been in several key respects, and that a few provisions may make a positive contribution to the proper management of hazardous waste.

The fundamental problem with this bill is that it attempts to write detailed regulations into the law. It is instructive to compare the original 28 page version of S. 757 as introduced with the voluminous, extraordinarily complex bill that we have before us today. Can any Member of this body explain why it is necessary to require EPA to list halogenated dibenzofurans as hazardous wastes within the next 15 months? Or why the lower liner of a hazardous waste disposal facility should have a permeability of 1×10^{-7} centimeter per second? Or why secondary waste-water treatment ponds employing biological treatment should be retrofitted if they have a retention time in excess of 5 days? Or why steel underground tanks can no longer be used in soils with a resistivity of 12,000 Ohms? I submit that making these kinds of technical judgements is the function of EPA, not the Congress. These particular regulations may be workable, even appropriate, but writing regulations is not our job.

Nevertheless, I am pleased that some necessary modifications in the House and Senate bills were made with regard to small quantity generators, EPA deadlines, and surface impoundments. In particular, I endorse the compromise on mining wastes worked out by the conferees. The statutory language and the statement of managers make it very clear that the conferees do not intend for this amendment to in any way diminish the scope of the so-called "Bevill Amendment" that was adopted in 1980. This language clearly reflects the intention of the House and Senate conferees with regard to this provision, and leaves no room for ambiguity.

The Senate conferees, and this Senator in particular, have made considerable concessions to get a bill. Although I am dissatisfied with many provisions of this bill, I believe that it is the best we are going to get and so I will support its passage.

Mr. DENTON. Madam President, the disposal of hazardous waste is a serious national issue. I feel that we as legislators have a responsibility to provide all Americans the maximum environmental protection allowed by insisting that environmental laws are enforced. Clarification of our laws will help companies, who deal with hazardous waste, comply with the letter of the law.

I wish to commend the distinguished chairman of the Subcommittee on Environmental Pollution for his efforts to fashion a reasonable compromise in the RCRA Conference Committee report. I was particularly pleased to see that, in section 215(j) dealing with existing surface impoundments, the conferees kept the Senate exemption for impoundments that are part of a secondary or tertiary wastewater treatment system. This measure strengthens existing laws to ensure increased protection for both public health and the environment.

Further, I wish to make a point of clarification for the record. In my discussions with the subcommittee chairman and the staff of the Committee on Environment and Public Works, I have been assured that the exemption in section 215(j)(4) to the requirement in section 215(j)(1) has a foundation in existing regulations. The exemption in paragraph (4) allows the EPA Administrator to modify the requirements of paragraph (1) if the owner demonstrates that a:

Surface impoundment is located, designed, and operated so as to assure that there will be no migration of any hazardous constituent into ground or surface water at any future time.

The phrase "any future time" is not intended to present a legal bar to the consideration of petitions for exemption from the requirements of paragraph (1). For example, an equalization basin that collects wastewater prior to biological treatment could reasonably be considered for an exemption under paragraph (4) if it were built in natural clay with a compacted clay liner that would prevent migration of hazardous constituents for 150 years. A period of 150 years clearly falls within the definition of "any future time" in a legal interpretation. However, given the engineering and technological considerations in the design and construction of any surface impoundment, 150 years may not necessarily be considered within "any future time." Indeed, 150 years is longer than the design life of synthetic liners used for.

No engineer will certify that a surface impoundment, regardless of how it is constructed and with what material it is constructed, will not leak for any future time if "any future time" is given a strict legal definition.

Mr. DURENBERGER. Madam President, I wonder if I might direct the attention of the distinguished manager of the conference report to a particular portion of the manager's language on underground storage tanks. I refer specifically to the following sentence which describes the second modification to the Senate bill made by the conferees:

In this regard, the conferees believe that while sophisticated methods of inventory control may be adequate to determine whether a tank is leaking, exclusive reliance on a "dipstick" method of inventory control (even with periodic tank testing) will not be sufficient to detect slow leaks.

Does the Senator from Rhode Island find that reference.

Mr. CHAFEE. Yes; the Senator from Minnesota correctly states the language of the conference report.

Mr. DURENBERGER. Would the Senator from Rhode Island assure this senator that the specific sentence which I have read does not imply that an automatic gauging system or other electronic detection system is a minimum requirement under the statutory language reported by the conference.

Mr. CHAFEE. The Senator from Minnesota states the intent of the conference correctly. We do not intend this sentence to be interpreted as a requirement for automatic gauging. The discussion of the conferees focused on the way that data collected by mechanical devices is analyzed and not solely on the characteristics of the mechanical devices.

Mr. SIMPSON. Madam President, I do support the conference report on the "Hazardous and Solid Waste Amendments of 1984," and I richly commend the conference chairman, my fine friend Senator JOHN CHAFEE, who served with patience and real skill.

By that act I do not pretend to be wholly satisfied with the work of the conference committee. Yet, in order to forge a compromise—the essential act of legislating—with the House it was

necessary to drop certain provisions from the Senate bill that I feel very strongly about and that I indeed still hope and expect to see enacted in the future. We also accepted certain provisions of the House bill about which I have reservations. In general the bill lurches ponderously in the direction of writing regulations into law and that is a manifestation of the tendency of this body to often act as elected bureaucrats rather than as lawmakers. In the main, however, this bill represents a series of fair and workable compromises.

Let me briefly elaborate on the resolution of a few issues in which I have taken particular interest.

The House agreed to the decision of the Senate that those facilities subject to the minimum technological requirements, that is, the double-liner requirement, will have the option of using alternative technology if they can show that a different containment system is equally effective for their particular facility. I think that it is vital, given the detailed technical requirements we are imposing, that some flexibility and ability to accommodate unusual circumstances and new technology be retained, as this amendment surely would do.

The conference substitute amendment on mining wastes is based upon an amendment to the Senate bill which I sponsored. The statement of managers makes it clear that this provision, which has been expanded to include other special study wastes, covers all of the mining wastes under the so-called Bevill amendment and does not in any way narrow the universe of wastes covered by the Bevill amendment.

The Senate mining waste amendment I authored covered only landfills and surface impoundments, and the conference substitute includes the same limitation. Consequently it does not directly apply to the provision of the House bill regarding salt domes, salt beds, mines, and caves that is included, in modified form, in the compromise bill. However, mine wastes which are solids or which assume a solidified form after they are placed in a mine or cave would only be subject to the permitting requirement and not to the requirements that apply to bulk liquids.

Finally, the conferees agreed to an amendment which I offered to clarify the relationship between the RCRA regulations and the uranium mill tailings regulatory program in order to avoid any possible confusion or delay that might otherwise result. The Environmental Protection Agency and the Nuclear Regulatory Commission now have an extensive regulatory program underway, and this amendment will ensure that this program will be able to proceed on its current course—under existing law—without any unnecessary disruption.

Finally, I note with satisfaction the decision of the conference committee to reject the House amendment entitled "Preservation of Other Rights." This innocuous sounding amendment was intended to convey the message to the Federal judiciary that there is a "Federal common law" applicable to hazardous waste.

As a result of the decisions in the City of Milwaukee and National Sea-clammers cases it is clear beyond dispute that there cannot be any "Federal common law" in an area covered by a comprehensive Federal statute such as the Solid Waste Disposal Act.

Adoption of the House amendment would at the very least have created enormous confusion in the Federal courts and could easily have disrupted EPA's regulatory program. It could have resulted in the imposition of an additional overlay of requirements heaped on top of the comprehensive Federal and State laws that currently exist, depending heavily upon the individual predilections of each Federal district court judge. Given this open-ended mandate, it could well take years for the courts to determine the scope of "Federal common law", or even whether it is constitutional.

The ironic thing is that there is hardly any area in which the ad hoc creation of remedies by individual judges is less necessary. Under current law any person can bring suit against anyone violating the Solid Waste Disposal Act in Federal court or bring suit in State court on the basis of State statutory or common law. This bill will further allow citizens to bring "imminent and substantial endangerment" suits, which are very similar to common law nuisance actions, in the Federal courts.

For these and other reasons the House amendment was dropped from the conference substitute. The statement of managers does provide that rejection of the House amendment is not intended to preclude the use of common law principles by the courts in interpreting the provisions of RCRA. This, of course, is simply a restatement of existing law. Obviously it is common practice for the Federal courts to call upon established common law principles in construing statutory language, and yet that practice is in a completely different category from any "Federal Common Law."

Madam President, I should like to clarify just a couple of matters about section 703 of this bill.

Both the House and Senate bills included a number of provisions which, if adopted in their present form, will have significant impact on the regulatory program established by the Congress for uranium mill tailings. That program is now underway pursuant to the Uranium Mill Tailings Radiation Control Act [UMTRCA]—the statute that establishes the basic framework and the underlying legal authority for uranium mill tailings regulation.

Although the bill agreed to by the conferees does not directly amend UMTRCA, it does change in a number of respects, the Solid Waste Disposal Act. And because UMTRCA requires that certain standards promulgated pursuant to UMTRCA:

> Shall provide for the protection of human health and the environment consistent with the standards required under subtitle C of the Solid Waste Disposal Act, as amended, which are applicable to such hazards.

It does, in fact, appear that the potential exists for construing this bill as somehow requiring changes in the uranium mill tailings regulatory program, in order to ensure continuing consistency with the standards of the Solid Waste Disposal Act, as amended, when in fact that is not the case.

Indeed, representatives of the Environmental Protection Agency advised the conferees that, in the absence of further clarification, the uranium mill tailings regulatory program would, in fact, have to be modified in a number of significant respects.

This is not the conferees' intent, and this provision is intended to clarify that nothing in this bill is intended to affect, modify, or amend UMTRCA. Similarly, the conferees do not intend to alter, amend, repeal, ratify, or suspend any of the regulations or standards of the Nuclear Regulatory Commission or the Environmental Protection Agency, if they were lawfully promulgated in accordance with the requirements of UMTRCA.

This bill is not intended, and should not be construed, to require changes in the regulatory program for mill tailings that is now underway. To the extent that this bill adds to, or modifies the provisions of, the Solid Waste Disposal Act, as amended, this provision is intended to clarify that the uranium mill tailings regulatory program need not now be changed to meet these new or modified requirements for the purpose of satisfying the statutory requirements of UMTRCA that certain standards promulgated pursuant to UMTRCA shall be consistent with the standards of the Solid Waste Disposal Act, as amended.

This provision would not limit or otherwise affect in any way the Administrator's authority or flexibility to treat uranium mill tailings wastes in a fashion similar to the approach taken or all other mining wastes that are subject to regulation under RCRA. Indeed, if the Administrator should decide to exercise his authority to tailor the requirements of RCRA to address the special characteristics of mining wastes, in general—an authority which, in a separate provision, we have confirmed that the current law

provides—then the Administrator shall, if he deems it appropriate, pursue a similar approach for uranium mill tailings wastes.

Finally, Madam President, I should like to point out that it was after extensive discussion of these issues among the conferees and with representatives of the Environmental Protection Agency—see transcript of September 28, 1984 meeting of the conferees—that the conferees agreed to recede to the Senate position to address these concerns. I am grateful, Mr. President, that the conferees have agreed to the Senate position, and have confirmed this in the joint explanatory statement of the committee of conference. ("The Conference substitute is the same as the Senate amendment.")

Before I yield the floor, Madam President, I should like to ask my distinguished colleagues, Senators CHAFEE and RANDOLPH, whether this explanation of the conference agreement on section 703 of this bill, dealing with uranium mill tailings, is consistent with their understanding of this provision, and the agreement of the conferees?

Senator CHAFEE. Yes, Madam President; the explanation of the Senator from Wyoming accurately explains the agreement of the conferees.

Senator RANDOLPH. I, too, agree with that explanation, and concur that it represents the agreement reached by the conferees.

Senator SIMPSON. I thank my distinguished colleagues for those assurances. Thank you Madam President.

Mr. RANDOLPH. Madam President, the conference report on H.R. 2867, the Hazardous and Solid Waste Amendments of 1984, represents a 3-year effort to address the serious problems of hazardous and municipal waste disposal in this country. This measure makes major improvements in existing law. When enacted, greater protection to public health and the environment will be provided.

I have said in the past that the 1976 amendment, the Resource Conservation and Recovery Act, was misnamed, because it did little to move the Nation toward materials and energy recovery. The hazardous waste regulatory program under subtitle C, which is the heart of the 1976 act, was disappointingly slow in implementation. This bill, however, by adding real teeth to the regulatory program and firmly moving away from land disposal for hazardous wastes, could legitimately be called the Recycling, Incineration, and Treatment Act of 1984. In making these changes in the law, the Congress shows that it is serious about encouraging the use of alternative technologies.

On July 25 of this year, the Senate unanimously adopted amendments to the Solid Waste Disposal Act. The House approved similar legislation nearly a year ago. Over the past 2 weeks, the 26 House and Senate conferees met on four occasions to resolve differences between the two measures.

The conference report contains changes from the previously adopted bill, S. 757, that merit clarification and discussion. Accurate interpretation and implementation of several provisions requires that the intent be carefully understood. The statement of managers describes many of these provisions, but I wish to make additional observations about several of particular concern to me.

Among those of greatest interest for me are amendments revising subtitle D of the Solid Waste Disposal Act. Implementation of the existing program has faltered, primarily because of budget decisions. The subtitle D program has not been funded or implemented for several years, prompting me to introduce the amendment that was adopted during earlier Senate consideration of this measure.

That amendment seeks to improve the management of municipal landfills and eliminate open dumps. It authorizes funding to enable States to operate programs upgrading sanitary landfills and closing out existing open dumps. The lack of Federal assistance in recent years has brought this effort to a standstill. Under my amendment $15 million of the budget provided the Environmental Protection Agency in fiscal year 1985 could be allocated for this purpose. Our expectation is that a portion of the congressional increase in the EPA budget will be used for this work. The amendment authorizes $20 million for each year through fiscal year 1988.

The Administrator of the Environmental Protection Agency will be required to revise existing landfill criteria in recognition of the fact that virtually all landfills serve as repositories for some hazardous waste. Household waste, small generators, and illegal dumpers contribute to landfills. It is necessary to apply controls and monitoring requirements to assure that these facilities are adequate. The amendment requires that these standards be promulgated by March 31, 1988. This will allow consideration of the information gathered in the small quantity generator study.

States will be required to establish regulatory programs to assure that solid waste management facilities comply with subtitle D criteria. This may include a permitting program or comparable system subject to the approval of the Administrator. The amendment requires that States bring solid waste facilities into compliance with existing requirements in 3 years. They will have an additional 18 months to meet the revised criteria after they are promulgated. In the event that a State should fail to implement a solid waste management program, the Administrator is authorized to prohibit open dumps. States implementing approved solid waste programs are completely responsible for enforcement.

The underlying standard for facilities subject to this amendment to subtitle D remains protection of human health and the environment. Requirements imposed on facilities may vary from those for subtitle C facilities, however, and still meet this standard. They may be phased in over time, as the Administrator deems appropriate, to take account of the practicable capability of the facilities covered.

New statutory requirements for subtitle D facilities may hasten the closure of many solid waste facilities that have only a few years of remaining capacity. The requirements could also precipitate the closure of facilities with substantial capacity, but that are either unable or unwilling to accept new regulatory costs.

By allowing the administrator to consider the practicable capability of solid waste disposal facilities, the Congress has expressed its desire to avert serious disruptions of the solid waste disposal industry. The Administrator could phase in new requirements other than ground water monitoring and corrective action over time. Phasing may be tailored to the characteristics of broad categories of facilities. Such phasing might include, for example imposing requirements first on large facilities which have the greatest potential for affecting human health and the environment in the absence of added regulatory controls. Phasing also might include imposing some requirements immediately on existing units but giving time to meet other requirements so that facilities are not faced with all major new requirements at once.

The public is alarmed by the profusion of chemical contamination incidents that threaten homes, neighborhoods and whole communities. Recently, this concern has been centered almost exclusively on massive industrial chemical dumps and has let to neglect of a foremost threat to health and the environment.

We assume that our trash will be picked up at home, but seldom question where it goes, how it is disposed of, or whether it is an environmental problem. In fact, a substantial amount of hazardous material finds its way to sanitary landfills and open dumps through household waste, small generator waste, and illegal dumping. Neglect of open dumps and sanitary landfills will continue to produce Superfund sites. Fully half of the original national priority list encompassed landfills. In most cases ground water contamination has occurred.

Implementation of the existing subtitle D program has faltered largely through misguided budget decisions. The current administration has failed to recognize that municipal landfills and dumps are very much a part of the hazardous waste disposal problem. The subtitle D amendments in this bill will do much to help correct this situation.

Another area of my concern is the exemption for petroleum coke under the provisions for the control of burning or blending hazardous waste. The Agency is authorized to determine administratively which entities must give notification, and the administrator has asked that the notification deadline be postponed until the regulatory pattern is determined. In this way, notification can generally be required from those the agency proposes to regulate. Since petroleum coke is exempted from regulation under these provisions, the Agency would not be requiring notification from purchasers, distributors, marketers, or users of petroleum coke.

I am a strong supporter of the "direct action" provisions of the bill, dealing with financial responsibility. It is the intent of the committee that this approach to financial responsibility be applied to each environmental statute as the opportunity to amend those statutes becomes available. Thus, while the conferees deleted this provision as applied to the Comprehensive Environmental Response, Compensation and Liability Act [CERCLA], it was deleted only because all CERCLA amendments to this bill were deleted. It is our intention that a similar amendment will be added to CERCLA and title III of the Outer Continental Shelf Lands Act at the earliest appropriate time.

Another CERCLA-related matter is the Senate-proposed technical amendment clarifying that taxes for the post-closure liability fund will not expire at the end of this fiscal year. While we saw this as only a technical and clarifying amendment, in the eyes of the House Committee on Ways and Means it constituted an extension of a tax. Since H.R. 2867 is not a revenue measure, there was some question whether section 28(c) of the Senate bill could constitutionally be included in the bill. To avoid this problem, the Senate receded. This, however, does not indicate any lessening of our support for the post-closure liability fund or of our desire to correct this technical problem.

In implementing the hazardous waste regulatory program and the amendments made by this bill, it is important that there be equity of regulation and enforcement between on-site and off-site disposal. Both can cause serious problems, and evenhanded treatment will avoid singling out off-site disposal for unnecessarily harsh controls.

The conference report contains the Senate provision excluding facilities within the State of Alabama from the alternative technology provisions contained in the minimum technological requirements. By adoption of this Senate provision, the conferees do not imply that any facility within the State of Alabama could, or could not, comply with any minimum technological variance requirements envisioned by this provision. This Alabama exclusion does not prejudice or affect consideration of pending or future permit applications by facilities in Alabama to the extent that such applications may comply with this or other Federal and State statutes and regulations.

This provision solely affecting facilities within Alabama extends only to the alternative technology demonstration otherwise available regarding minimum technology requirements and does not affect other alternative operating or design options available to owners or operators of Alabama land disposal facilities under this or other Federal or State statutes or regulations. For example, if pretreated wastes under other provisions were expressly permitted to utilize land disposal facilities of differing technological design or operating requirements, this Alabama exclusion would not apply to that alternative authority.

Under new section 3004(o), the provision which bans the placement or maintenance of a "prohibited" waste in a treatment impoundment unless treatment residues removed within 1 year of placement does not apply to those wastes which have been subject to the pretreatment of detoxification requirements established by the administrator under section 3004(m). Removal of hazardous treatment residues does not necessarily require complete drainage of the impoundment, and in appropriate cases can be carried out by vacuum or mechanical devices which remove concentrated bottom sludges.

Madam President, many statistics and studies have been cited during consideration of amendments to the Solid Waste Disposal Act. Several facts gleaned from these studies emphasize present and future challenges to managing waste disposal.

EPA estimates that in 1981, 71 billion gallons (264 million metric tons) of wastes were generated that are considered hazardous under the Solid Waste Disposal Act. This amount exceeded previous EPA estimates by 60 percent.

Of this total, 14.70 billion gallons of wastes were disposed of. The dominant method of disposal was through underground injection wells, accounting for 8.60 billion gallons. Surface impoundment disposal accounted for another 5.10 billion gallons. Nearly another billion gallons were disposed of in landfills.

In 1981, 4,818 facilities treated, stored or disposed of hazardous wastes. Of these, only 326 were commercial facilities. The majority of facilities were managing wastes associated with industrial manufacturing operations.

Over 14,000 generators reported being subject to hazardous waste regulations in 1981. This figure does not include the small quantity generators that will not be regulated by amendments to the Solid Waste Disposal Act.

These figures served to illustrate the dimensions of the hazardous waste issue. They also portray the immediacy of developing environmentally sound methods to address the vast quantities of waste generated annually. It is disturbing that EPA had underestimated the amount of wastes generated by over half, for the first year for which reliable statistics are available.

Madam President, the original Solid Waste Disposal Act was enacted nearly 20 years ago as a short addition to Clean Air Act amendments. it addressed concerns about the proliferation of refuse throughout the country. These statistics demonstrate that solid and hazardous waste issues necessitate a comprehensive national management program.

Solid waste management has been the environmental program in which I have taken the keenest personal interest. In 1970 I authored the Resource Recovery Act, which established the first large-scale Federal effort to support demonstrations of recycling and energy recovery technology. That act also called for a study of hazardous waste disposal. I was again a principal author of the 1976 amendments to the Solid Waste Disposal Act, or the Resource Conservation and Recovery Act, as it is often called. The foundation of our hazardous waste regulatory program is subtitle C of that act, and the comprehensive solid waste management provisions I discussed earlier are in subtitle D.

In 1980, at the same time the committee was developing the Comprehensive Environmental Response, Compensation, and Liability Act, the Congress passed amendments I sponsored further strengthening the hazardous waste regulatory program. During this Congress as ranking minority member of the committee I have worked with Senator CHAFEE and Senator STAFFORD to bring to fruition the bill we consider today.

Consideration of this conference report will culminate my 20 years of involvement with this legislation. I know from this experience that the amendments we propose today will require further improvements in the future.

"Superfund" will continue to be a household word until the provisions

and objectives of the Solid Waste Disposal Act are met to the letter.

I believe that there continue to be two significant gaps in existing environmental legislation that require the attention of Congress.

Through experience with the Solid Waste Disposal Act and the remedial provisions of Superfund, we have come to realize the fragile nature of ground water supplies. Existing regulations and statutes do not adequately protect this vital resource. Underground quifers do not follow State and local jurisdictions. It is unrealistic to assume that uniform protection standards will be applied in the absence of national requirements. This matter should be of utmost priority in the coming year.

The second issue that Congress cannot continue to ignore is a Federal system for providing redress to persons injured by involuntary exposure to hazardous contaminants. I strongly support the demonstration proposal contained in S. 2892, the pending Superfund amendments, to provide victim assistance on a limited basis. This program, however, will not substitute for broader legal and financial mechanisms I proposed during committee consideration of this measure. The importance of victims' compensation is not yet well enough understood by Members of Congress for the concept to receive broad-based acceptance. The far simpler mechanism providing for cleanups of hazardous substance releases already in place is not sufficient. Congress has an outstanding obligation to the unwilling victims who are harmed through exposure to mismanaged hazardous substances.

I consider participation in developing the four main environmental statutes to be among the most worthy efforts of my legislative career. They have a direct effect on every citizen of this Nation. Air and water have substantially improved as a direct result of reforms enacted during the past decade. Responsible waste management is coming about as the result of the Solid Waste Disposal Act and Superfund. Congress will need to maintain vigorous oversight of these laws to assure that progress continues to be made.

Madam President, members of the committee were diligent in their commitment of time and energy to the successful completion of this legislation. In the conference with the House of Representatives, I was privileged to be associated in representing the Senate with Senators CHAFEE, STAFFORD, MITCHELL, LAUTENBERG, SIMPSON, and SYMMS. Each of them made major committments to the final version of this important measure.

It has long been my practice to call attention to the involvement of staff members in the legislative process. Without their knowledge and experience, our task would be considerably more difficult. In this instance, I am particularly appreciative of the skills brought to this task by minority counsel Philip Cummings, and of the contributions of John Yago, Stephanie Clough, Lee Fuller and Helen Kalbaugh.

We also received excellent cooperation and technical assistance from the Environmental Protection Agency through the help of assistant administrators Lee Thomas and Josephine Cooper.

Mr. MITCHELL. Madam President, I rise in support of the conference report on the Resource Conservation and Recovery Act.

This bill is a major achievement of the 98th Congress.

Its enactment will mark yet another milestone in our efforts to protect ourselves from one of the unfortunate and too common by-products of our highly industrialized society hazardous waste.

In 1976, the Congress enacted the Resource Conservation and Recovery Act. It was an ambitious, far-reaching statute. It conferred on the Environmental Protection Agency broad general authorities to regulate the generation, transportation, storage and disposal of hazardous waste.

Standards for the transportation, storage and disposal of hazardous waste were mandated.

Enforcement authorities were mandated.

Citizen participation in regulatory and enforcement proceedings was mandated.

The underlying goal of all of these activities was protection of public health and the environment. Indeed, the statutory standard by which the mandated regulations were and continue to be measured is protection of public health and the environment.

The statute established a framework for the prevention of harm to human beings and natural resources.

Today, we propose a series of amendments to the basic statute.

The preventive framework of the Resource Conservation and Recovery Act is sound. Today we propose modifications based on the knowledge acquired since 1976. All of the changes we are recommending to the Senate will strengthen the ability of the Federal Government to protect public health and the environment from hazardous wastes. They are designed to give EPA more specific guidance, based on our experience with implementation of the law's general authorities since 1976.

What have we learned in 8 years?

We have learned that the magnitude of the problem is far greater than believed. We now know that over 264 million metric tons of hazardous waste are generated in this country each year; this estimate is more than four times greater than previously thought.

We have learned that there are thousands of waste sites across this country which present potential or actual threats to human health or well-being. EPA now estimates that there may be 22,000 sites in need of some type of cleanup; 546 of these sites have been designated as priorities for cleanup. The Superfund law enacted in 1980 was necessary response to our past inattention to the careful disposal of hazardous wastes.

Simply put, past practices have left us a legacy of chemical contamination which has poisoned our air, our water and our land. The price of our ignorance has been high, in human terms and in dollar value. Present practices, unless modified, can only multiply those costs.

The average cost of cleaning up a hazardous waste site is estimated to be $6.5 million, according to EPA. If just the priority sites, known to present a health hazard, were cleaned up, the cost would be billions of dollars. No matter who pays the bill, whether it be the responsible party or the Federal Government, that figure is too high. We cannot afford the status quo.

We also know now that the generation of hazardous waste continues to grow and that most of that waste is currently disposed of on or in the land.

It has become evident that a strong congressional expression of disapproval of EPA's slow and timid implementation of the existing law is necessary, as well as a clear congressional direction mandating certain bold, preventive actions by EPA which will not be taken otherwise, despite the existing, broad authorities contained in RCRA.

EPA has not implemented the Resource Conservation and Recovery Act aggressively. The Agency has missed deadlines, proposed inadequate regulations, and even exacerbated the hazardous waste problem by suspending certain regulations.

It has become evident that this slow, plodding course will be continued in the absence of a clear congressional directive. This is not acceptable. Accordingly, this bill provides more specific guidance to EPA as to how the broad grants of authority of the existing RCRA law should be used.

The bill declares as congressional policy that "to avoid substantial risk to human health and the environment, reliance on land disposal should be minimized and land disposal, particularly landfill and surface impoundment, should be the least favored method for managing hazardous wastes." It specifically reaffirms the Administrator's authority to prohibit land disposal methods that cannot be shown to be protective of human health and the environment, and directs the Administrator to use that au-

thority. Deadlines are established by which EPA must evaluate all wastes listed as hazardous and subject to RCRA regulation, as to the appropriateness of their disposal on land. If the Administrator does not act within the specified deadlines, land disposal of wastes for which the deadline is missed is prohibited.

The bill establishes minimum technological standards for land disposal facilities and incinerators to insure that EPA requires the use of the best technology available at hazardous waste disposal facilities.

The bill expands the coverage of the law to those who generate between 100 and 1,000 kilograms of waste a month. In 1980, EPA exempted all generators of less than 1,000 kilograms, solely on the basis of its workload, and stated that it intended to initiate rulemaking to expand the law's coverage within 2 to 5 years.

This has not occurred. Accordingly, the conference report implements EPA's 1980 commitment. This will bring into the regulatory system an additional 15 million tons of hazardous waste.

The bill strengthens significantly the role of citizens in enforcing the law. As the sponsor of this provision, I believe that it will provide an important and necessary supplement to EPA's efforts.

The bill expands the law to prevent the export of hazardous waste to foreign countries without the receiving country's consent.

Madam President, we have worked long and hard on this package of amendments. I believe that we have achieved a workable balance between two conflicting considerations:

First, the recognition that unless the status quo with respect to the handling of hazardous wastes is altered radically, we will be condoning the eventual chemical contamination of all elements of our natural life-support system—air, water, and land; and

Second, the reality that because the pervasive nature of the hazardous waste problem is largely a result of a successful industrialized society, the ultimate solution is a basic change in the operation of large segments of our industries—a course that should be charted carefully and brought about at a deliberate but measured pace.

H.R. 2867 represents a mandate for change in the status quo. It also represents a mandate for informed regulation which does not threaten precipitous disruptions which could ultimately doom our legislative strategy to failure.

The bill before us is a compromise in the best sense of that term. It attempts to accommodate the many varied concerns expressed by hundreds of persons over the past years. It is also a compromise in the sense that probably no one person or interest supports every single element of the legislation.

We have had to make difficult judgments as to how the results we desire can be best achieved. This bill represents that judgment. I urge my colleagues to support the legislation before the Senate. If approved, it will be another significant achievement by this body in assuring a safe environment for all persons of this country.

● Mr. CHAFEE. Madam President, I am pleased to present to the Senate the conference report on H.R. 2867, the solid and hazardous waste amendments of 1984. When we last addressed this matter on July 25, 1984, the Senate unanimously approved S. 757, the Solid Waste Disposal Act Amendment of 1984.

The bill before us today is a conference substitute for S. 757 and for the original version of H.R. 2867. To my mind, Madam President, we have taken the best of both bills and produced a piece of legislation that we can all be proud of. It is a tough bill designed to deal with a tough problem: the control of hazardous waste.

In 1976, the Resource Conservation and Recovery Act [RCRA] was enacted as an amendment to the Solid Waste Disposal Act. Subtitle C of RCRA established this Nation's basic hazardous waste management system. That law, and the amendments we are considering today, are designed to assure the people of this Nation that the generation, handling, storage, treatment, transportation and disposal of hazardous waste in this country is regulated and controlled in a manner that protects both human health and the environment.

The importance of this law and the need for such assurances can only be fully appreciated after we examine just how much hazardous waste is being generated each year in the United States. The numbers are staggering.

When the Environmental Protection Agency [EPA] developed its regulatory program and when we first began working on this legislation, it was estimated that approximately 11 billion gallons—40 million metric tons—of hazardous waste are produced in the United States each year. In August of 1983, EPA upped this estimate to roughly 40 billion gallons—150 million metric tons, almost four times the previous estimate. On April 20, 1984, the EPA released the results of the National Survey of Hazardous Waste Generators and Treatment, Storage and Disposal Facilities Regulated Under RCRA in 1981 (National Survey). It is now estimated that more than 71 billion gallons—264 million metric tons—of hazardous wastes are generated in the United States every year. According to news reports, that is enough to flood the District of Columbia to a depth of 5 feet; enought to supply every man, woman and child in the Nation with six 55-gallon drums of hazardous waste.

Sadly, the actual number far exceeds the 71-billion-gallon estimate. EPA's National Survey did not include mining waste, some of which is clearly hazardous; it did not include household hazardous waste such as discarded pesticides, paint thinners and cleaning solvents; it did not include hazardous wastes generated by individual businesses that produce less than 1,000 kilograms—2,200 pounds—of such waste each month; it did not include hazardous waste that is discharged through sewers into publicly owned wastewater treatment works; it did not include hazardous wastes destined for recycling; and, of course, it did not include hazardous waste that is illegally generated or managed. The survey and the estimate only included those wastes and activities that are regulated under the existing RCRA program.

There is no question, Madam President, that we have given the EPA an enormous responsibility. In 1981, EPA received nearly 60,000 notices from generators of hazardous waste. The Agency has roughly 8,500 applications on file for permits for treatment, storage, and disposal facilities. The permit applications and sources of hazardous waste come from a wide variety of industries, each one posing unique problems. Add to that the problem of household waste and waste from the truly small quantity generator. EPA's task under RCRA is a tough one. It is also absolutely essential that it be done right and that it be done soon.

This program is closely related to the much talked about Superfund program. What this program is meant to do is to assure the public that, although we may be discovering new Superfund sites on a daily basis, at the very least we are taking steps to prevent the creation of new Superfund sites. Hazardous waste can and must be handled in a manner that is safer than it was in the past. That is what RCRA is supposed to be about.

We often hear the refrain from those who are responsible for disasters like Love Canal, Stringfellow Acid Pits and, in my home State, the Western Sand and Gravel and Picillo dumps, that we should not hold them responsible because what they did was legal at the time. Well, using legal to mean not specifically prohibited by RCRA or by regulation under RCRA, let's look at what is legal under our current RCRA program: It is legal to produce 2,000 pounds of hazardous waste each month and to dispose of it in the town dump as if it were normal trash. It is legal to use waste oil containing dioxin as a dust suppressant on roads as was done in Times Beach, MO. It is legal to avoid regulation by blending hazardous waste with other fuels and to

burn it for energy or to sell it to unsuspecting customers.

Madam President, our current RCRA program is riddled with loopholes. That is why this bill is so important. We have identified a number of gaps in the regulatory program and have attempted to fill them statutorily. Even with this bill there will be gaps. The scope of the problem is such that we cannot reasonably expect to address it comprehensively with legislation. We must continue to rely to a large extent on Federal and State common law and State statutory law to fill the gaps. Nevertheless, we must do as much as we can to assure the public that hazardous waste are being handled in a safe manner. This bill is an important part of the solution to the problem.

I would now like to briefly explain some of the bill's key provisions and the specific problems they are designed to address.

SMALL QUANTITY GENERATORS

First, let us review the problem. As a result of an EPA regulatory decision in 1980, small quantity generators—currently defined by EPA as those who produce 1,000 kilograms per month (kg/mo) or less of hazardous waste—are now exempt from most RCRA requirements and may dispose of their waste into sanitary landfills and into sewers that are connected to publicly owned treatment works. Neither of these types of facilities is suited to the disposal or treatment of toxic organics or metals. In addition, such generators are not required to package the wastes in a safe manner nor to notify the transporters that the waste being transported is hazardous. In addition to being toxic, many of the wastes are ignitable, reactive or corrosive and, therefore, create an occupational safety hazard for the unwitting transporter.

To address this problem, H.R. 2867 will require that, within 270 days, generators which generate greater than 100 but less than 1,000 kilograms of hazardous wastes per month must provide for proper identification of such wastes which are transported off-site. Such generators would have to notify transporters that such wastes are hazardous but would not have to comply with full hazardous waste testing, manifesting, record keeping or reporting requirements during the period between enactment and promulgation of regulations. Methods of identification are specified.

Until completion of a study of small quantity generators and promulgation of final regulations for such generators, hazardous wastes generated by a generator in quantities less than 1,000 kilograms per month must be delivered to a permitted treatment, storage or disposal facility or a sanitary landfill which meets current criteria.

Regulations for storage of hazardous waste generated in quantities of between 100 and 1,000 kilograms per month shall provide for onsite storage for up to 180 days without a permit—twice the 90-days storage period allowed for large quantity generators. For small quantity generators who must ship or haul their waste over 200 road miles, the regulations shall provide for onsite storage without a permit for up to 270 days of up to 6,000 kilograms of such waste.

By March 31, 1985, EPA must complete and submit to Congress a study of small quantity generators. Using the results of the study and other available data, EPA must promulgate by March 31, 1986, additional regulations as may be necessary for small quantity generators who generate between 100 and 1,000 kilograms per month of hazardous waste. The threshold of 100 kilograms per month, however, is not the end of this issue. It represents a logical next step in the regulatory process but it does not mean that EPA is relieved of their responsibility to regulate in a timely manner all generators of hazardous waste as may be necessary to protect human health and the environment.

If no regulations have been promulgated for small quantity generators by March 31, 1986, after that date any hazardous waste from small quantity generators generating such waste in quantities of greater than 100 kg/mo must go to a treatment, storage or disposal facility permitted under RCRA.

The Administrator is instructed to undertake activities to educate small quantity generators as to their responsibilities under this section.

Regulations for management of hazardous waste from small quantity generators may vary from regulation for larger generators; such regulations must provide, however, that wastes generated in quantities of greater than 100 kg/mo go to a treatment, storage or disposal facility permitted under RCRA.

LAND DISPOSAL LIMITATIONS

The continued use of some methods of land disposal of some hazardous wastes presents an unwarranted and unnecessary risk to human health and the environment. Particularly troublesome are landfills and surface impoundments of highly toxic, mobile, or persistent wastes and wastes that have the potential to bioaccumulate.

The problem presented by land disposal of hazardous wastes is a classic example of the inability of the free marketplace to provide for the public good. Land disposal is extremely cheap when compared with the available alternatives such as incinceration or chemical-physical treatment. Therefore, we should not be surprised to find that land disposal and treatment in land disposal facilities such as surface impoundments are being utilized much more frequently than the newer, high-tech options.

According to EPA's National Survey, of the listed treatment processes in 1981, incinerators treated the least amount of hazardous waste. Only about 450 million gallons—1.7 million metric tons—of hazardous waste was incinerated during that year. About 40 times more hazardous waste was treated in surface impoundments—16.6 billion gallons, 62 million metric tons. Nearly 20 times more hazardous waste was disposed of in injection wells—8.6 billion gallons, 32 million metric tons. Over 10 times as much hazardous waste was disposed of in surface impoundments—5.1 billion gallons, 19 billion metric tons—and nearly twice as much hazardous waste was disposed of in landfills—810 million gallons, 3 million metric tons. In 1981, only 23 percent of our Nation's treatment capacity was being used.

Unfortunately, land disposal presents far greater risks to society than are necessary. We have the technology to reduce the quantity of hazardous wastes disposed of in the land and to render the waste less harmful. What we do not have, and will not have as long as cheap land disposal options are available, is a viable market to support the development and expansion of new, safer treatment and disposal technologies. This bill recognizes that many of the risks associated with land disposal are being unnessarily imposed upon the public and it is designed to eliminate those risks. The result should be the creation of a new market and increased demand for new, safer treatment and disposal technologies.

By enacting H.R. 2867 Congress will state it's findings that reliance on land disposal should be minimized and land disposal, particularly landfill and surface impoundments, should be the least favored method for managing hazardous wastes. As reported by the conference committee, EPA must, within 24 months after enactment, promulgate regulations to prohibit land disposal of dioxins and solvents unless the Administrator determines that such a prohibition is not required to protect human health and the environment. The Administrator may distinguish between various methods of land disposal. Similar regulations and findings must be made by EPA first, within 32 months after enactment for a specified list of hazardous wastes that are specified in the bill on the basis of their toxicity, mobility, persistence or potential to bioaccumulate, second, for all other listed hazardous wastes on a staggered timetable—one-third of list within 45 months of enactment, one-third within 55 months, and one-third of all listed and identified wastes within 66 months.

If EPA fails to meet the statutory deadlines for dioxins, solvents, or the specified list, and if the agency fails to meet the 66-month deadline, land disposal of the affected wastes is statutorily prohibited.

Land disposal prohibitions are effective immediately or, on basis of availability of adequate alternative treatment, storage, or disposal capacity, up to 2 years after promulgation. The 2-year period may be extended on a case-by-case basis for 1 year and renewed once for an additional year if, after good faith efforts to develop adequate capacity, it can be shown that more time is needed.

If the Administrator finds a lack of alternative capacity, he may set the different effective date based on the earliest date on which sufficient capacity will become available. In setting longer effective dates, the Administrator can consider the fact that different physical or chemical forms of a particular waste are treatable by different methods. Thus, different effective dates may be set for a single waste code—for example, F001 P016, differentiating between physical or chemical forms of the waste. For example, the Administrator may find that there is sufficient alternative capacity for liquid F001 waste—and thus restrict it immediately—but not for F001 waste that is a solid or sludge—and thus set a longer effective date for these forms of the waste. This will insure that restrictions become effective as soon as possible based on the availability of alternative capacity.

Use of waste oil containing dioxin or other hazardous wastes for dust suppression is banned. The disposal of hazardous waste by underground injection into or above any formation which contains a potential underground source of drinking water—within one-quarter mile of injection well—is banned.

Expansions of existing waste piles, landfills or surface impoundments under interim status are subject to the same requirements for liners, leachate collection systems groundwater monitoring and locational criteria as new facilities.

Land disposal facilities which stopped accepting wastes between July 26, 1982 and January 26, 1983, are required to take corrective action and undertake groundwater monitoring consistent with requirements for permitted facilities.

MINIMUM TECHNOLOGICAL REQUIREMENTS AND PERMIT LIFE

Delayed promulgation of final regulations to implement RCRA and prolonged use of interim status permits by EPA has allowed some facilities to operate without assurances that design and performance standards will utilize adequate and available control technology. The application of available technology, at a minimum, is necessary to minimize releases of hazardous wastes into the environment.

Minimum standards of double liners, groundwater monitoring and leachate collection are required for landfills and surface impoundments permitted after date of enactment. Modifications of this requirement are allowed upon a showing that an alternative design is at least as effective as the liners and leachate collection systems.

The conference report contains the Senate provision excluding facilities within the State of Alabama from the alternative technology provisions contained in the minimum technological requirements. By adoption of this Senate provision, the conferees do not imply that any facility within the State of Alabama could, or could not, comply with any minimum technological variance requirements envisioned by this provision. This Alabama exclusion does not prejudice or affect consideration of pending or future permit applications by facilities in Alabama to the extent that such applications may comply with this and other Federal and State statutes and regulations.

This provision solely affecting facilities within Alabama extends only to the alternative technology demonstration otherwise available regarding minimum technology requirements and does not affect other alternative operating or design options available to owners or operators of Alabama land disposal facilities under this or other Federal or State statutes or regulations. For example, if pretreated wastes under other provisions were expressly permitted to utilize land disposal facilities of differing technological design or operating requirements, this Alabama exclusion would not apply to that alternative authority.

Minimum standards for incinerators are to require destruction and removal efficiency consistent with regulations in effect on the date of enactment.

Equally important is the requirement that EPA modify its regulations to specify criteria for the acceptable location of new, as well as existing, facilities. Recent studies show that proper location is at least as important as application of improved technologies. Too many existing facilities are located in areas that aren't well suited to management of hazardous wastes. It is important that these sites be shut down as quickly as is possible.

Fixed term permits not to exceed 10 years are established for land disposal facilities, storage facilities, incinerators, and other treatment facilities. Permits for land disposal facilities shall be reviewed at least every 5 years.

An amendment is included to make clear that the Administrator—or the State in the case of a State with an authorized program—is not to consider the incremental cost attributable to sections 3004(o) and 3005(j) in first, issuing effluent limitations guidelines, new source performance standards and pretreatment standards under the Clean Water Act in the next 12 months; second, issuing NPDES permits based on the previously promulgated guidelines and standards and any guidelines and standards promulgated under the Clean Water Act with in the next 12 months; or third, establishing effluent limitations based on best professional judgment [BPJ] on or before October 1, 1986.

In the past several years, EPA has promulgated the majority of the effluent limitations guidelines, pretreatment standards, and new source performance standards required by the Clean Water Act and the Clean Water Act Toxics Consent Decree, *NRDC* v. *Ruckelshaus*, 8 ERC 2120 (D.D.C. 1976), as modified 12 ERC 1833 (D.C.C. 1979), as modified by orders dated October 26, 1982, August 2, 1983, January 6, 1984, and July 5, 1984. The Agency has done substantial work on the other effluent limitations guidelines and standards covered by this decree. The agency has also made substantial commitments to issue NPDES permits implementing these effluent limitations guidelines and standards and NPDES permit establishing effluent limitations based on best professional judgment [BPJ] in cases where there are no applicable effluent limitations guidelines.

Some of these effluent limitations guidelines and standards and BPJ permit limitations rely on surface impoundments as part of the model treatment technology; in other cases, industry has chosen to use surface impoundments to achieve compliance with nationally applicable effluent limitations guidelines and standards despite the fact that such impoundments are not part of EPA's model treatment technology. Since EPA could not have foreseen the requirements imposed by sections 3004(o) and 3005(j) of the Hazardous and Solid Waste Amendments of 1984, EPA did not always include as part of the baseline or incremental cost of those regulations or BPJ limitations, the cost of facilities to meet the requirements of sections 3004(o) or 3005(j). The purpose of this amendment is to assure that there is no delay in promulgation of the remaining effluent limitations guidelines and standards, implementation of the categorical pretreatment standards, or EPA's ability to issue NPDES permits either through implementation of the effluent limitations guidelines and standards or development of BPJ limitations, pending consideration of the cost or nonwater quality environmental impacts associated with surface impoundments in light of the newly enacted sections 3004(o) and 3005(j).

CONTINUING RELEASES AT PERMITTED FACILITIES

Current regulations do not require facilities receiving permits under RCRA to address all releases of hazardous wastes from solid waste management units at the facility. A facility which is causing, for example, groundwater contamination from inactive units could, therefore, seek a permit under RCRA for active units and receive the permit without having to clean up the contamination.

H.R. 2867 will require that all treatment, storage, and disposal facilities which apply for a permit under subtitle C and which release hazardous waste or constituents from any solid waste management unit at the facility must remedy such releases as a condition of permit issuance. Where corrective action cannot be completed prior to issuance of the permit, schedules of compliance for such corrective action and financial assurances may be required.

Rather than delay the issuance of RCRA permits until sufficient information is acquired to specify in compliance schedules the corrective action required and the financial assurances needed to assure its completion, permits may be issued where owners/operators commit in a compliance schedule to obtain the information necessary to determine the extent and cost of corrective action. To do otherwise would prolong the period during which facilities are not subject to the more stringent part 264 standards.

LISTING/DELISTING MODIFICATION

The listing process is a general screening to determine whether a kind of waste typically can cause harm to human health and the environment if mismanaged. The delisting process allows petitioners—usually individual hazardous waste generators or treatment facilities—the opportunity of showing that their wastes are significantly different—because of treatment, or because they are generated in a different process—from listed wastes of the same type. Consequently, their wastes should be excluded—that is delisted—from the hazardous wastes lists. Under the Agency's regulations, EPA will delist those wastes which do not, or no longer, meet the criteria for which the waste was listed.

EPA's delisting regulations do not fully address the fact that wastes are frequently composed of numerous hazardous constituents. In some instances, because listing is a general screening process, EPA may not have taken all of the hazardous constituents in a waste into consideration when the waste was originally listed. Although EPA has authority under RCRA to reject a delisting petition based on the presence of these additional constituents, EPA's regulations did not allow the Agency to do so. This has resulted in some wastes which are still hazardous being exempted from the hazardous wastes lists and, consequently, from all RCRA regulation.

Under the Agency's present regulations, to be a hazardous waste, a waste must exhibit a characteristic of hazardous wastes or be listed by name. None of the characteristics of hazardous wastes promulgated so far—ignitability, corrosivity, reactivity, or extraction procedure—identifies wastes on the basis of organic toxicity. Furthermore, EPA's listing process has been virtually stalled for several years.

This bill will direct EPA to consider criteria, constituents, or other factors, in addition to those for which a waste was listed, when evaluating petitions to delist or exclude from regulation a hazardous waste generated at a particular facility.

EPA is to consider additonal hazardous constituents and criteria when deciding whether to delist a waste. The threshold test is that EPA have information reasonably indicating that presence of additional constituents could cause the waste to still be hazardous. EPA is specifically empowered to obtain information from the petitioner relevant to this reasonable basis determination. The bill thus provides that the initial petition must be accompanied by information adequate to evaluate the petiton. This includes information necessary in determining whether there is a reasonable basis to believe the waste could still be hazardous. Examples of information that can appropriately be requested in an initial application are data on constituents used as raw materials, catalysts, solvents, or ingredients in the process generating the waste.

Once EPA obtains this data, the Agency must determine—based on the information in the petition and on other relevant information available to the Agency—such as industry studies data or data from similar petitions—whether the waste reasonably could be hazardous. If EPA makes this finding, the Agency may then proceed to request that the petitioner submit more comprehensive information on the waste, such as chemical analyses. After receiving this data, EPA then will determine whether the waste is hazardous under the criteria for listing in section 3001 of RCRA, as implemented by EPA's regulations.

The Administrator is directed to identify or list those hazardous wastes which shall be subject to subtitle C provisions solely because of the presence of constituents such as carcinogens or teratogens at levels that will endanger human health.

BURNING AND BLENDING

Currently, EPA exempts facilities that burn hazardous wastes for the primary purpose of energy recovery. EPA has estimated that 10 or 15 million metric tons of hazardous wastes are burned each year in boilers; over one-half of all hazardous wastes generated are burned in facilities not now regulated under RCRA. EPA has acknowledged that burning hazardous wastes for energy recovery is similar to incinerating them and "could pose a parallel or greater risk of environmental dispersal of hazardous waste constituents and products of incomplete combustion."

Fuel blending is one of several areas where EPA's failure to promulgate regulations has led to direct threats to human health and the environment. Hazardous wastes have been blended with heating oil and sold to unsuspecting customers who burn them under conditions which may not protect human health or the environment.

The potential impact of this loophole is even more significant as more and more wastes may be burned in boilers, cement kilns, or other heat recovery units to avoid RCRA regulation and treatment costs.

Therefore, we require that within a year, EPA must be notified by facilities which blend hazardous wastes to produce fuel or which distribute, market or burn hazardous wastes or blended fuel for energy recovery. Within 2 years EPA must set standards for transporters of such fuel and for facilities which burn such fuel adequate to protect human health and the environment. Labeling of such fuel which contains hazardous wastes is required. A limited statutory exemption is allowed for petroleum coke and, with respect to the labeling requirement, for onsite petroleum refinery operations. A regulatory exemption is authorized for facilities which burn de minimis quantities of hazardous wastes in fuel.

MANDATORY INSPECTIONS AND FEDERAL FACILITIES

Current law does not mandate that facilities that treat, store, or dispose of hazardous wastes be regularly inspected. Although officers, employees, and representatives of the States and EPA are authorized by section 3007(a) of RCRA to enter and inspect any facilities where hazardous wastes are handled, too few inspections are being conducted to effectively monitor compliance with RCRA and applicable regulations. Inspections that do occur are conducted under widely varying State-formulated criteria regarding the qualifications of inspectors and the scope of the inspection.

The bill will establish a program requiring inspection at least once every 2 years for treatment, storage, and disposal facilities. EPA will complete a study to evaluate feasibility of using private inspectors to supplement Federal or State inspectors. EPA must also begin a program to perform thorough inspections of Federal treatment, storage, and disposal facilities on an annual basis. Authorized States may

also inspect Federal facilities. EPA must initiate inspections at each State or local treatment, storage, or disposal facility.

All Federal agencies must conduct and update a detailed inventory of hazardous waste facilities for submittal to EPA. If agencies do not respond, EPA will complete the inventory.

FEDERAL ENFORCEMENT

RCRA provides criminal penalties for transporting waste to an unpermitted facility and for submitting false information in documents required to be filed under the act. However, the statute presently does not specifically address the criminal liability of generators of hazardous waste who knowingly cause the waste to be transported to an unpermitted facility. It also does not address material omissions or the failure to file required reports. Similarly, where hazardous waste is knowingly transported without a manifest, there would be no criminal liability unless the waste is subsequently delivered to an unpermitted facility. Although most facilities are operating under interim status permits, there is currently no criminal liability for knowing violations of such requirements. Portions of the knowing endangerment provisions are redundant and unnecessarily restrictive.

Criminal penalties are provided in H.R. 2867 for knowingly causing waste to be transported to an unpermitted facility; for knowingly transporting or causing waste to be transported without a manifest; where knowing omissions or false statements are made; and where interim status requirements are violated. Maximum criminal penalties are increased and redundant provisions in the knowing endangerment section are removed. By specifically adding criminal liability for causing wastes to be transported to an unpermitted facility or without a manifest, there is no intent to affect the application of title 18, United States Code, section 2 to all provisions of RCRA.

EXPORT OF HAZARDOUS WASTE

Current regulations allow hazardous wastes to be exported from the United States with minimal notice to receiving countries. There is currently no requirement that receiving countries be fully apprised of the nature of the shipment nor a requirement that they consent to receipt of the shipment.

Within 12 months after enactment of H.R. 2867 no person shall export hazardous wastes unless notice of intent to export and details of the shipment are provided to EPA, the receiving country has been notified by the State Department and has consented to receive such hazardous wastes, and a copy of the receiving country's written consent is attached to the manifest accompanying each shipment.

Where there exists an international agreement between the United States and the receiving country establishing notice and export procedures for the handling of hazardous wastes, notice, and consent for each shipment shall not be required.

IMMINENT HAZARD AND CITIZEN SUITS

Section 7003 of RCRA currently authorizes suit to immediately restrain any person contributing to handling, storage, treatment, transportation, or disposal of any solid waste or hazardous waste that may present an imminent and substantial endangerment to health or the environment. Though the issue of inactive waste sites is not addressed explicity in section 7003, the Congress, most courts and every administration which has administered the act has contrued the section to apply to such sites. Notwithstanding an opinion for the U.S. Court of Appeals for the Third Circuit and several district court decisions upholding the Government's position, some courts have ruled to the contrary. The administration testified that clarifying language amending section 7003 would be helpful.

This bill will amend section 7003 to affirm that which is already provided for under existing law. It will clarify that section 7003 authorizes suits concerned with inactive sites which may present an imminent and substantial endangerment.

Although section 7003 of RCRA authorizes the Administrator to sue to abate an endangerment whenever the past or present handling, storage, treatment, transportation, or disposal of any solid or hazardous waste may present on imminent and substantial endangerment to health or the environment, we now know from the Superfund experience that the number of potential problem sites exceeds the Government's ability to take action each time such action is warranted. The problem is primarily one of inadequate resources.

Therefore, H.R. 2867 will authorize citizens to bring suit against those who have contributed or are contributing to a situation which may present an imminent and substantial endangerment to health or the environment. To prevent such suits from intefering with Government enforcement actions, a number of conditions are placed on the authority to bring such suits.

SUBTITLE D IMPROVEMENTS

Even with the phaseout of the small quantity generator exemption, sizable amounts of hazardous materials from such generators, household wastes, and illegal dumping are disposed of in municipal landfills. Current criteria for sanitary landfills are inadequate to deal with these facts. In addition, there is a need to provide for better implementation of the open dumping ban and upgraded criteria for sanitary landfills.

As a result of this bill, EPA must revise criteria for sanitary landfills and for determining which practices constitute open dumping, taking into account potential for such facilities receiving hazardous waste in household wastes or from illegal dumping. Within 42 months, States must establish and enforce a permit program or other system to assure that sanitary landfills which may receive hazardous wastes comply with upgraded criteria. If States do not adopt such a program, EPA shall use the enforcement authority in sections 3007 and 3008 to enforce the ban on open dumps.

AIR EMISSIONS FROM LAND DISPOSAL FACILITIES

Studies of hazardous waste surface impoundments and landfills report that significant quantities of hazardous constituents in the wastes may be emitted into the air. Proposals to regulate emissions from hazardous waste facilities have been published on several occasions since passage of RCRA in 1976. Final regulations have never been issued. The Agency also has authority to regulate emissions of hazardous air pollutants under the Clean Air Act, but its performance under that Act has been appallingly slow.

A provision of H.R. 2867 requires EPA to promulgate regulations for the monitoring and control of air emissions from hazardous waste facilities as may be necessary to protect human health and the environment.

GROUND WATER MONITORING

Current EPA regulations allow waste piles, landfills, and surface impoundments that satisfy certain conditions to claim an exemption from the ground water monitoring requirements that are designed to detect any releases of hazardous constituents from the facilities. The conditions for exemptions, on their face, do not meet subtitle C's basic requirement of protecting human health and the environment. There is evidence, for example, that a leak could occur even from a double-lined disposal facility, and that hazardous constituents can migrate into ground water even if the facility is located entirely above the seasonal high water table. Similarly, if an inspection shows a liner is cracked, the owner or operator is required only to repair the crack, not to detect and clean up any releases that may have occurred before the crack was discovered.

The bill will require that the act's ground water monitoring requirements be completed with whether or not a facility is located entirely above the seasonal high water table, the facility has two liners and a leachate collection system, or the facility's liner—or liners—are periodically inspected. This section has the effect of nullifying several portions of EPA's regulations. It does not make any changes to the Agency's regulations concerning

ground water monitoring standards other than deleting the indicated exemptions.

WASTE MINIMIZATION

Current laws emphasize the need to properly treat, store, and dispose of hazardous wastes. While this continues to be a primary element of RCRA and other pollution control laws, additional emphasis must be directed toward first, minimizing the generation of hazardous wastes and second, utilizing the best treatment, storage, and disposal techniques for each waste.

A statement of national policy will be added to the act as well as a requirement that hazardous waste generators certify that they have programs to reduce the amount and toxicity of their waste and that they are using methods to minimize the threat that their wastes pose to human health and the environment.

DEFINITION OF HEATING OIL IN UNDERGROUND STORAGE TANK PROVISION

The underground storage tanks that are covered by this bill do not include underground storage tanks used for storing heating oil for consumptive use on the premises where stored. There are many different grades of heating oil used, including No. 2, No. 4, and No. 6. The particular type of heating oil used generally depends upon the type and size of the furnace in which it is burned. The reference to heating oil cited above includes all of these grades of heating oil, so long as the tank is used for storing such heating oil for consumptive use on the premises where stored.

OTHER ISSUES

Several other issues have been considered in the course of developing H.R. 2867 and merit comment. These include the issues of permitting of mobile treatment units; the distinction between onsite and offsite facilities; direct action provisions of Superfund; and health assessments.

PERMITTING OF MOBILE TREATMENT UNITS

The EPA, in order to fulfill its legislative mandate, should continually be looking at innovative, advanced technological methods to effectively and safely treat and handle hazardous wastes. Legislative and regulatory initiatives are necessary to discourage the use of landfills and land disposal generally as a disposal option of first resort.

For many waste generators, the availability of mobil treatment units would make proper waste handling and treatment economically feasible and remove the growing financial incentive for cutting corners or for midnight dumping. Clearly, the long-term tightening of EPA's current small generators exemption will mean a significant increase in the number of regulated facilities which could handle their wastes more safely and effectively through use of mobile treatment technology—either through a circuit rider approach where the unit periodically visited a facility—or where a unit periodically visited a satellite treatment area where waste from several firms was aggregated and stored pending treatment.

EPA currently has legislative authority to develop a permit procedure for mobile treatment units, however, current permit regulations, as promulgated, have stymied the development of MTU technology. I have reviewed the work completed in September 1983 by EPA's RCRA Permit Advisory Committee and believe the MTU permit procedure outlined therein, merits further consideration by the Agency.

DISTINCTION BETWEEN ONSITE AND OFFSITE FACILITIES

According to the National Survey, 84 percent of those who generate hazardous wastes ship their wastes offsite for treatment, storage, or disposal. That fact seems to support the notion that our regulatory effort should be focused on these offsite facilities. Some people allege that the offsite treatment and disposal industry has, in fact, been subject to much greater scrutiny, regulatory control, and enforcement than those who generate hazardous wastes and manage them inhouse or onsite. If this is true, it is without justification. Onsite facilities should be regulated at least as vigorously as offsite facilities.

Although offsite facilities manage a significant amount of hazardous wastes, they represent a small portion of the total volume. Using EPA's numbers, which are conservative, 96 percent of the hazardous waste disposed of is disposed of onsite. That is 96 percent by volume.

Offsite facilities are providing a service to small businesses and to households generating hazardous wastes. Why should we devote a disproportionate amount of our enforcement effort to offsite facilities? The issue is not just one of fairness but it is also one of safety. Let's focus on the problem. We should continue to scrutinize, regulate, and enforce against offsite operators but we should also be focusing on the high volume private sites that are behind the company fense. There is no reason to assume that inhouse operations are run any better than the offsite commercial facilities. With history as our guide, we must not let any facility that is managing hazardous waste escape our regulatory and enforcement efforts.

DIRECT ACTION IN CERCLA

I am a strong supporter of the direct action provisions of the bill, dealing with financial responsibility. This approach to financial responsibility should be applied to each environmental statute as the opportunity to amend those statutes becomes available. Thus, while the conferees deleted this provision as applied to the Comprehensive Environmental Response, Compensation and Liability Act [CERCLA], it was deleted only because all CERCLA amendments to this bvill were deleted. A similar amendment shold be added to CERCLA and title III of the Outer Continental Shelf Lands Act at the earliest appropriate time.

HEALTH ASSESSMENTS

The bill requires that owners and operators of landfills and surface impoundments submit exposure information with their permit applications. Submission of exposure information should not be considered then determining the completeness or adequacy of a part B permit application. It is an independent requirement of this act, enforceable as any other violation of a reporting requirement.

CONCLUSION

Madam President, the need for action is rarely as clear as it is today. We have a law that was designed to assure the people of this Nation that the generation, handling, storage, treatment, transportation, and disposal of hazardous wastes in this country is regulated and controlled in a manner that protects both human health and the environment. Unfortunately, the regulatory program is riddled with loopholes and, as such, the assurances we sought when we first passed RCRA in 1976 are still empty promises.

We cannot afford to delay any longer. Even if out of sight is out of mind for some, we must not be so foolish as to believe that the status quo is good enough. We must do as much as we can to assure the public that hazardous wastes are being handled in a safe manner and that steps will be taken to reduce the amount and danger of those hazardous wastes that are generated in the future.

The amendments that we are considering today are designed to do that. They will translate the promises of 1976 into action. They recognize new areas of promise and pursue them. For these reasons, H.R. 2867 deserves your support and your vote of approval.

Madam President, I want to take this opportunity to thank all of the dedicated, hard-working people at EPA and on our staff who have worked with us and helped us to craft this major environmental bill. Without the assistance of EPA Assistant Administrator Lee Thomas and his staff, Environment and Public Works Committee counsel Steve Shimberg, Phil Cummings, Kathy Cudlipp, Jon Jewett, staff members Charlene Sturbitts, Bill Fay, Jimmie Powell, and Liz Barrett-Brown, we could not have achieved today's accomplishment. Enactment of the first major pollution control law since 1980 is an event that

should not go unnoticed and the importance of today's action should not be minimized.●

Mr. LAUTENBERG. Madam President, I rise in strong support of H.R. 2867, the Hazardous and Solid Waste Amendments of 1984, and urge its immediate adoption by the Senate. This conference report is of utmost importance to my State and the Nation as a whole. The cradle-to-grave management of hazardous wastes is a formidable task and one that demands careful coordination between the public, Congress, Environmental Protection Agency and States.

Over 240 million tons of hazardous wastes are generated every year—1 ton for every man, woman, and child in our country. Much of this waste is now land disposed of in ways that contaminate the water we drink and the air we breathe. The best solution to the hazardous waste crisis facing our country is the reduction and recycling of these wastes. But, for the foreseeable future, there will be a substantial amount of waste that must be disposed of through other means that can harm the public and the environment.

The bill that we will approve today is the first major environmental regulatory bill to be enacted since the Superfund bill passed in 1980. It will greatly improve the management of our wastes. It will close dangerous loopholes in the current program and start the country in a new direction by encouraging the treatment of dangerous wastes and discouraging land disposal.

The main elements of H.R. 2867 are the limitations on land disposal, retrofit requirements for surface impoundments, regulation of small quantity generators, and a new program for locating and monitoring underground storage tanks, many of which are leaking and threatening water supplies.

Madam President, I was honored to serve as a conferee on this bill. The bill is the culmination of two sessions of debate over needed improvements to this program. Senate approval of S. 757, on July 26, by a unanimous vote of 93 to 0, is testament to the concern of all Senators that the storage, transport, and disposal of hazardous wastes be carefully regulated.

This bill closes dangerous loopholes in the current law. It narrows the exemption for most small quantity waste generators who today dispose of 4 million tons annually of benzene, toluene, and other dangerous chemicals in our neighborhood landfills every year. The bill also regulates the burning and blending of hazardous wastes for resource recovery and bars the disposal of wastes such as dioxins, in road oils. While the closing of these loopholes has received considerable attention, the real nexus of the bill is the ban on land disposal of hazardous wastes that threaten the public health and environment.

No longer will the indiscriminate disposal of dioxins, PCB's, and other highly toxic chemicals be allowed in landfills. Instead, this bill encourages the reduction, recycling, and treatment of hazardous wastes. It is my hope that the disincentives to dispose of waste in landfills included in H.R. 2867 will stimulate the development of new technologies to safely treat waste.

The limitations on land disposal center around statutory bans on certain wastes. These bans will automatically go into effect unless the EPA determines that land disposal of these wastes is safe. The bans are reasonable. They will prevent deadlines from slipping into the future without action. They establish an important presumpiton that land disposal should not be used for wastes that pose real risks.

This presumption should provide a stimulus for the commercialization of technology to treat these wastes. However, if no adequate alternative to land disposal are available, the bill does provide limited extensions from disposal bans by the EPA. It is important to note that these extensions will not be granted on economic grounds.

Madam President, the deadlines in this bill for banning land disposal of certain wastes are realistic and should provide more than adequate time for EPA to analyze and develop regulations to implement these provisions. They are consistent with EPA Assistant Administrator Lee Thomas' assessment of EPA's capabilities. I hope that EPA will move as quickly as possible to implement these provisions and ban dangerous wastes from our landfills. It would be unfortunate if EPA waited until the 11th hour to take action. Many of these deadlines are several years off and I am concerned about environmental hazards that will continue during the interim.

It is important to note that the bill also bans land disposal of liquid hazardous wastes into shallow aquifers and the underground injection of certain wastes as well. I strongly support the ban on liquid waste disposal. Such disposal practices are among the most egregious examples of our past mismanagement of hazardous wastes.

Over 60 percent of our wastes are disposed of by injection into underground aquifers. We must be especially careful, as we move away from disposal in landfills and surface impoundments, that we do not simply shift to a form of disposal that will perpetuate the contamination of our precious drinking water supplies. The deadlines in the underground injection provisions are 4 years off. Because we do not know as much about the impacts of underground injection as we know about landfilling, it is essential that EPA expeditiously investigate the potential environmental and health hazards related to disposal of wastes through underground injection.

Madam President, during our conference, we engaged in extensive discussion about the retrofit requirements for surface impoundments. The bills approved by both Houses required that existing impoundments—pits, ponds, and lagoons—be retrofitted with double liners leak-detection systems within 4 years of enactment. Our discussion focused primarily on the treatment of wastewater surface impoundments, which were provided with an explicit exemption in the Senate bill. The criteria for exemption of these impoundments, which are estimated to represent between 200 and 300 of the 1,500 existing impoundments, has been tightened so that the universe of these impoundments is limited to those engaged in "aggressive biological treatment" of wastewater. An important condition of this exemption is that groundwater be monitored. Mr. President, the strict monitoring of groundwater around these impoundments will be critical in assessing the impact of the exemptions included in the bill.

This bill sets up, for the first time, a Federal program for the regulation of underground storage tanks containing petroleum. The growing problem of leaking underground storage tanks is one that will require our attention for many years to come. The regulatory program included in this bill will help us identify these tanks. It will also require that new tanks meet strict antileak standards. These provisions will start us on our way toward preventing and cleaning up tanks that threaten the quality of our drinking water.

The emerging statistics on leaking underground storage tanks are ominous. It is estimated that a 1 gallon a day leak of gasoline from a tank can poison the water supply of 50,000 persons. Experts in the petroleum industry estimate that between 75,000 and 100,000 tanks are currently leaking, and that this number may increase to over 350,000 in the next 5 years. In my State alone, it is estimated that 20,000 tanks may be leaking.

It is clear that leaks from these tanks pose a very serious threat to our groundwater. That is why I joined Senator DURENBERGER in introducing legislation in the Senate to regulate underground storage tanks earlier this year. I am very pleased that provisions to address this emerging environmental problem are included in the bill.

Finally, I want to make mention of the clarifications H.R. 2867 makes to the criminal liability provisions of the act. In September 1983, a New Jersey district court decision threatened to undermine effective Federal enforcement actions against midnight dumpers. The court refused to prosecute

two plant supervisors who were routinely ordering the disposal of acetate and other dangerous chemicals into a trench behind their factory in Laurel, NJ. In a bizarre reading of the law, the judge found that only owners and operators, who are required to obtain permits for disposing of wastes, could be prosecuted for illegal waste disposal under the criminal provisions of RCRA.

In fact, the law clearly states that anybody who knowingly and illegally disposes of hazardous waste can be held liable for a violation of RCRA requirements. During Senate consideration of S. 757, I offered an amendment to the bill to overturn this court decision and clarify the intent of the act. Congressman JIM FLORIO had introduced similar legislation in the House after the House had approved its version of the RCRA bill.

By the time we went to conference, the Third Circuit Court of Appeals had overturned the district court decision. Nonetheless, the conference retained this provision to clarify that any midnight dumpers who violated the law will be prosecuted and cannot dump wastes with impunity.

Madam President, I want to commend the managers of the Senate and House conferees, Senator CHAFEE and Congressman DINGELL, for their strong leadership and diligence in the conference. Without their commitment to seeing this bill through, and their commitment to a safe and clean environment, we would not be approving this bill today. As a new member of the Environment and Public Works Committee, I was privileged to serve as one of the Senate conferees on a piece of legislation of such importance.

My only regret is that the House conferees so strongly resisted including the Superfund amendments the Senate adopted to S. 757, a number of which I sponsored with my colleague from New Jersey, Senator BRADLEY. I strongly supported the Senate provisions to S. 757 to provide cost credits to States which use their own funds to cleanup sites eligible for Superfund assistance and to extend the statute of limitations for natural resources claims. Both of these provisions were important to my State of New Jersey. The stripping of these Superfund amendments from the RCRA conference report is even more disappointing given the failure of the Senate to consider S. 2892, the Superfund reauthorization bill reported to the Senate by the Environment and Public Works Committee, which also contained them.

Madam President, as many people have noted, the Resource Conservation and Recovery Act and the Superfund represent two sides of the same coin. Both statutes serve to protect the public from exposure to hazardous wastes, the first by regulating hazardous waste disposal; the second by providing Federal assistance to cleanup abandoned waste sites. Enactment of an improved RCRA program this year is important for avoiding the creation of additional Superfund sites. It is my hope that with RCRA behind us, we will be able to take up the reauthorization of Superfund at the earliest possible date in the 99th Congress.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. BAKER. Madam President, I move to reconsider the vote by which the conference report was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

GRANTS TO ENCOURAGE PUBLIC CAPITAL INVESTMENT—CONFERENCE REPORT PROJECTS

Mr. BAKER. Madam President, I submit a report of the committee of conference on S. 1330 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1330) to authorize the United States Army Corps of Engineers to provide grants to the several States to encourage and foster the construction of necessary public capital investment projects, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 4, 1984.)

Mr. STAFFORD. Madam President, I am pleased that the Senate is considering today House Report 98-1134, the conference report on S. 1330, the Public Works Improvement Act of 1984. I believe the legislation represents an important initial response to the Nation's infrastructure problem.

First, it establishes a National Council on Public Works Improvement to report on the state of the Nation's infrastructure, and address such issues as its current capacity to support a sustained and expanding economy. This council will also provide uniform guidelines and criteria for inventorying and assessing public works.

Second, it requires the President to include in his annual budget submission detailed analyses of major public capital investments.

I assure my colleagues that this bill does not change the basic budgeting procedures of the Federal Government or the congressional budget process. Rather it will significantly expand the information available to the Congress on the condition of the Nation's infrastructure and planned governmental expenditures for this purpose. The work of the council and the information in the President's budget should help the Congress make informed decisions on a long-term capital program that will best meet the Nation's needs.

I believe this legislation is a good first step toward improving the Federal Government's ability to finance and manage its substantial investment in public capital facilities, and hope that it moves us close to a solution to this complex problem.

I must thank the members who have worked so diligently to make this conference agreement possible.

First, I would like to commend the former chairman and now ranking member of our committee, the distinguished Senator from West Virginia [Mr. RANDOLPH] for his work on this bill. It has been a great pleasure to work with him over the years, and I am pleased to add this legislation to our list of joint accomplishments.

I must also praise my good friend from New Mexico, Senator DOMENICI, who brought his substantial expertise in finance and budgeting to bear on this problem. Mr. DURENBERGER, my colleague from Minnesota also proved invaluable. The provisions in this bill mandating improved identification and analysis of capital spending in the President's budget are very similar to those contained in a bill he introduced last year, S. 1435, the Federal Capital Investment Program Information Act. In addition, my colleague from New York [Mr. MOYNIHAN] deserves substantial praise for working so diligently to ensure that the National Council on Public Works Improvement included in the bill would become a viable organization that will provide the Congress with valuable information and assistance in determining the real magnitude and scope of the infrastructure problem.

Of course, the willingness of our colleagues on the other side of the Hill to develop this compromise, in particular Mr. CLINGER and Chairmen HOWARD and BROOKS, was essential. Mr. HOWARD's detailed familiarity with the many infrastructure programs that fall within the jurisdiction of the House Committee on Public Works and Mr. BROOKS' expertise in oversight and governmental matters were used to good advantage. Mr. OBERSTAR and Mr. CLINGER, both of whom have worked on this issue for many years, were key actors in developing this particular conference agreement. I en-

joyed working with them on this legislation and look forward to developing these working relationships further.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. BAKER. Madam President, I move to reconsider the vote by which the conference report was agreed to.

Mr. BYRD. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

COMPREHENSIVE MENTAL HEALTH CARE SYSTEM IN THE DISTRICT OF COLUMBIA

Mr. BAKER. Madam President, there is a bill at the desk, H.R. 6224. I ask unanimous consent that it now be presented to the Senate.

The PRESIDING OFFICER. Without objection, the clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 6224) to provide for the assumption of selected functions, programs, and resources of St. Elizabeth's Hospital by the District of Columbia, to provide for the establishment of a comprehensive mental health care system in the District of Columbia, and for other purposes.

The PRESIDING OFFICER. Without objection, the bill will be considered as having been read the first and second times by title, and the Senate will proceed to its immediate consideration.

Mr. HATCH. Madam President, I ask the Senate to turn to consideration of the House bill, H.R. 6224, to provide for the assumption of selected functions, programs, and resources of St. Elizabeth's Hospital by the District of Columbia and to provide for the establishment of a comprehensive mental health care system in the District of Columbia. For reasons which I will make clear in a moment I urge my colleagues to pass this measure today in its present form.

H.R. 6224 represents a successful resolution of an issue which emerged over two decades ago and which has received attention ever since; namely, the appropriate way to integrate St. Elizabeths Hospital in the District of Columbia's mental health delivery system. I am happy to report to my colleagues that H.R. 6224, as passed by the House, has the full support of both the District government and the administration.

Madam President, the timing on this bill is critical. H.R. 6224 contains an agreement that has been hammered out between the District of Columbia, the hospital employees, and the Federal Government. Such an agreement has been sought for the past 20 years. As witness to this, I will ask unanimous consent to have printed at the end of my remarks a "Chronology of Previous Efforts To Make St. Elizabeths Hospital an Integral Part of the District of Columbia's Mental Health System." I, for one, think the time to get started implementing this agreement is right now and the way to get started is for the Senate to pass this bill.

In February 1984 the Department of Health and Human Services submitted a legislative proposal to create a nonprofit, private corporation to administer mental health service delivery in the District of Columbia. Subsequently, other bills were introduced. A corporation proposal was endorsed by the American Federation of State, County and Municipal Employees. The District government and the General Accounting Office each recommended separate proposals to transfer the hospital to the District of Columbia.

Hearings were held on June 6, 1984 and on September 6, 1984 by the Subcommittee on Fiscal Affairs and Health, chaired by Mr. FAUNTROY. Between these hearings all interested parties, including local and national organizations which had also participated in the hearings, met informally to try to reach a consensus. At the conclusion of those meetings the subcommittee drafted a bill which, with a number of changes, resulted in the legislation before us today.

I must tell my colleagues that in recognition of this issue and realizing the time constraints involved, Senator KENNEDY, the distinguished ranking member of my Labor and Human Resources Committee, Senator MATHIAS and Senator EAGLETON of the Governmental Affairs Subcommittee on Governmental Efficiency and the District of Columbia and I have paid close attention to these proceedings in the House District of Columbia Committee. Thanks to the excellent cooperation we have received, especially from Chairman DELLUMS, Chairman FAUNTROY, Mr. PARRIS, and Mr. MCKINNEY, we feel very well informed on all aspects of the proposal.

Today we are prepared to put an end to the problem of dual administration of the mental health services system of the District and to pave the way for assurance of continuity of care. Under this proposal patients will be followed by the system at all times, without any gaps when they are admitted to or discharged from the hospital. Under the bifurcated system which has been in effect these many years, it has been difficult to set responsibilities, to assure comprehensive services especially to chronic patients who need an array of psychiatric, medical, social, rehabilitative, vocational and other support services over extended time periods.

Madam President, H.R. 6224, as amended by the House, provides that no later than October 1, 1991, the District of Columbia will have in operation a comprehensive mental health care system, including high quality cost-effective community based programs and facilities; inpatient and outpatient care programs; residential treatment programs; and support services, guaranteeing the protection of patient rights and medical needs. The bill provides for a service coordination period between October 1, 1985, the effective date of the act, and October 1, 1987, the date of transfer of St. Elizabeths to the District. During this period, Federal and District activities will be coordinated to assure a smooth transfer. During the first 3 months of this period the Mayor will prepare a preliminary system implementation plan for review by the city council. After comment by the council, the preliminary plan will be subject to review by the District of Columbia Committee in the House and jointly in the Senate by the Labor and Human Resources Committee and the Committee on Governmental Affairs. I might add this is the first of several opportunities the bill provides for formal congressional review. The final system implementation plan is due October 1, 1986 and is again subject to council and congressional review.

The final plan will describe the new mental health system in detail, identify the types of treatment to be offered, staffing patterns and proposed delivery sites and will fully comply with all District statutes and court decrees, especially Dixon against Heckler, which requires that all patients of the hospital be placed in the least restrictive environment.

The Federal Government shall also arrange to have complete by January 1, 1986, a financial audit of the hospital and a physical plant audit. The Secretary of Health and Human Services shall be responsible for making any repairs identified by the physical plant audit as being necessary to bringing the Federal facilities up to applicable code requirements or standards. The financing provisions include a payment formula for the gradual decline of the Federal subsidy by 1991 as well as authorization for a direct line item amount as a Federal payment to the District totaling $135 million over a period of 6 years. Federal agencies will pay for care provided to individuals whom they refer to the hospital.

There are several provisions in the bill to benefit employees of the hospital. During the 30-day period prior to transfer, a special early retirement opportunity will be available. The District government will also specify the number and types of positions needed by the new system. Qualified hospital employees will have a right-of-first-refusal to District employment in positions created by the plan or in the District's Department of Human Services or at DC General Hospital. Employees shall also have a right-of-first-refusal

for vacancies within the Department of Health and Human Services within the Washington metropolitan area.

Madam President, I will ask for unanimous consent that, in addition to the "Chronology" mentioned previously, a history of St. Elizabeths Hospital produced by the National Institute of Mental Health be inserted in the RECORD at the conclusion of my remarks.

Madam President, this bill represents a reasonable compromise between the District of Columbia, the Federal Government, and the hospital employees union. It is the result of many long hours of study and negotiation over the last 20 years. Although we are all very busy in the days just prior to recess of the Congress, it is important that we take the time to consider this issue. The problem has been around for many years; the solution is near. My colleagues in the House have done a good job on this bill. I ask that we give their efforts every consideration.

Madam President, I ask that H.R. 6224 be approved by unanimous consent.

Madam President, I ask unanimous consent that the material to which I referred earlier be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CHRONOLOGY OF PREVIOUS EFFORTS TO MAKE ST. ELIZABETHS HOSPITAL AN INTEGRAL PART OF THE DISTRICT OF COLUMBIA'S MENTAL HEALTH SYSTEM

1964: Advisory Group on the Future of St. Elizabeths Hospital.—This Advisory Group, established by Secretary Anthony J. Celebrezze, issued its final report recommending that the Hospital be integrated into the then evolving comprehensive community mental health center program of the District of Columbia, and at the same time be utilized as a national mental health research, training, and demonstration center. This Advisory Group's recommendation was not acted upon.

1967: National Institute of Mental Health.—Secretary John W. Gardner announced the transfer of the Hospital, which had been a separate agency of the Department, to the National Institute of Mental Health where it would "serve as a national demonstration for the conversion of a large, old-style mental institution into a modern, communty-based mental health facility." This action also represented "an initial step toward future transfer of St. Elizabeths to the District of Columbia."

1970: Advisory Committee on the Transfer of St. Elizabeths Hospital to the District of Columbia Government (Rome Committee).—The Rome Committee, established by Secretary Robert Finch and Mayor Walter Washington, issued its final report recommending transfer as soon as possible to a single mental health authority which would be established for the District and later become an independent authority. This Advisory Committee's recommendation was not acted upon.

1973: Presidential Reorganization Authority.—Transfer remained under discussion, and in January 1973 a provision for transfer was made in the fiscal year 1974 budget using Presidential reorganization authority. That authority, however, expired before the transfer was accomplished and the decision was made to pursue the transfer by legislative means.

1975-6: Administration negotiations with the District.—NIMH appointed a special assistant to improve coordination between the District and St. Elizabeths. Key discussion areas were resolution of the then *Dixon* v. *Weinberger* class action suit and direct transfer of the Hospital to the District. No agreement was reached.

1976: House District Committee proposal to Establish a Government Corporation to operate St. Elizabeths Hospital.—This bill (H.R. 3335) proposed to transfer the Hospital to an independent Federal Corporation with a board of directors comprised of representatives appointed by the District and Federal governments and from each of the District's community mental health centers. District and Department officials opposed this concept, DHEW expressing the view that the bill, if enacted, would likely result in further fragmentation and delay in meeting the District's mental health needs.

1977: St. Elizabeths Hospital Initiative.—Secretary Joseph A. Califano, Jr., established the St. Elizabeths Hospital Initiative for the specific purpose of facilitating the revitalization of the Hospital. The objectives included, but were not limited to: regaining accreditation of the Hospital by early 1979; improving patient care and treatment programs with a view to upgrading the quality of care; effectively maximizing Federal capacity building resources for the purpose of assisting the District to develop a model mental health delivery system; and to integrate the Hospital into a unified and comprehensive mental health delivery system to be managed by the District Government. Mayor Marion Barry appointed a mental health project manager to represent his office in discussions and negotiations regarding the Hospital.

1980: HHS/DC Task Force.—HHS Secretary Harris and District of Columbia Mayor Barry appointed a Task Force to determine the viability and the appropriate characteristics of a public corporation to administer St. Elizabeths. On November 10, 1980, the Joint Task Force submitted a final set of recommendations. The Secretary and the Mayor approved the recommendations but did not agree on the specific provisions of a legislative proposal.

ST. ELIZABETHS HOSPITAL

The old and new are combined at Saint Elizabeths Hospital, where for more than one hundred years a Federal hospital devoted entirely to the care of the mentally ill has been growing in size, in curative skills, and in training and research activities. Ground was broken for the first building in 1852, and the first patients were admitted in 1855. In the century since then, more than 125 buildings have been built among the forest trees that cover the 320 rolling acres on a promontory where the Potomac and Anacostia Rivers meet, and in these buildings many new methods of treatment have been initiated and adopted.

The Hospital has not always been known as Saint Elizabeths. In the 1840's and 1850's, when Dorothea Lynde Dix was crusading on behalf of the mentally ill and establishing hospitals in various localities both here and abroad she literally badgered the United States Congress into making an appropriation for a "Government Hospital for the Insane," the object of which was to give ". . . the most humane care and enlightened curative treatment of the insane . . ." Land known as "the Saint Elizabeths tract" was selected for the Government hospital. The first building, now called Center Building, was designed over a modified "Kirkbride Plan," a plan widely used for hospitals at that time, and was done in what the architects called "Collegiate Gothic," a castled style complete with battlements and buttresses, popular in Victorian times. The red bricks with which the first building was built were made from the soil of the tract, and woodwork came from the trees of the surrounding forest. Center Building housed the entire Hospital in 1855—wards, kitchen, chapel, and an apartment for the Superintendent. Transportation was such at that time that guests who came to the Hospital often had to stay overnight, so seven bedrooms were provided. One room known as Miss Dix's room, contained the immense bed she used. The "Director's Room" which was a part of the apartment, now called the Staff Lounge, contains the desk on which Miss Dix penned the basic law adopted by the Congress for the organization of the Hospital.

Five Superintendents, beginning with Dr. Charles H. Nichols (1855) and ending with Dr. Winfred Overholser (1962), all lived in this apartment. Now, besides the Staff Lounge, several rooms of the apartment have been made into offices. A new Chapel, built on the grounds, replaced the old 1855 Chapel, and that space is now a gymnasium for the patients.

Little scientific knowledge was available regarding mental illness a century ago, but kindness and compassion were present. The so-called "moral treatment," advocated first by Pinel, the great French reformer, in the care of the mentally ill, was being adopted in the United States when the Hospital was founded. The essence of "moral treatment" was to provide congenial surroundings in which mentally ill patients might learn from the example of normal attendants. This meant that special attention was given to a homelike atmosphere in the Hospital buildings, and that a real effort was made to have the grounds beautiful. One thousand trees were planted at Saint Elizabeths during the early years. They were brought from countries all over the world and also from many of our own States. In the years that have followed, these trees have become giants, and some of them are surrounded now by their offspring.

CIVIL WAR YEARS

The changing of the Hospital's name was actually begun during the Civil War. Every available hospital in this vicinity was pressed into service to receive soldiers wounded on the nearby battlefields. The Minie ball, used in the guns of that period, shattered the bones so completely that they could not be set, so limbs were often amputated on the battlefield. Many of these patients who survived were sent to "The Government Hospital for the Insane," so a small factory for making artificial limbs was set up on the grounds, and when the amputees were ready for them, the artificial limbs were fitted. These men, who were here for some time, refused to write home saying they were in a hospital for the insane; they simply wrote they were at "The Saint Elizabeths Hospital." The name was used so frequently that in 1916 Congress officially changed it to Saint Elizabeths Hospital, and

for some unknown reason the apostrophe was left out.

RAILROAD, LAUNDRY, BAKERY, ETC.

The Hospital, until 1967, operated a small railroad that was probably the last steam, coal-fed switch engine in the country in regular use. Every fall and winter it ran along its mile of track to the main railroad, bringing the many tons of coal necessary to heat the hundred and twenty-five buildings on the Hospital grounds. A bakery, that supplies bread and doughnuts, and the icehouse are still in operation, as are the mammoth laundry, machine, electric, and other shops.

Patients who would benefit by working in these various installations are assigned by their doctors to the different activities. Some patients thus learn skills that can be helpful to them when they leave the Hospital.

NOT WEDDED TO ANY SYSTEM

Saint Elizabeths is known throughout the world for its humane and expert services to more than 5,000 patients, and for its adoption of new methods of treatment as they become known. When the Hospital opened under the leadership of Dr. Charles H. Nichols, the first Superintendent, very little was understood of psychotherapy or psychodynamics. Great emphasis was being placed on the earlier-mentioned "moral treatment," and Saint Elizabeths was built with this idea in mind. Dr. W. W. Godding, Superintendent (1877-1899), began to consider brain surgery, and thought it possible that hypnotism would help the mentally ill. He said, "We undertake to be old fashioned or any fashioned if by any measures we can save some (patients). We are not wedded to any system. . . ." In 1884, he appointed a pathologist to the Hospital staff, Dr. I. W. Blackburn, who was one of the pioneers in neuropathology in this country. This was hailed as a new departure in this field. Another innovation at Saint Elizabeths was hydrotherapy in 1897. But before that, in 1894, one of the early schools of nursing was begun. Dr. Godding was succeeded, on his death in 1899, by Dr. A. B. Richardson, who died in 1903. Dr. Richardson's regime is best remembered by the large number of buildings whose construction was begun at that time, a practice he initiated of giving lectures to medical students, and for establishing one of the early photographic departments and pathological museums.

When Dr. White succeeded Dr. Richardson in 1903, he established one of the first psychology laboratories in the country. His interest in psychotherapy, and the individual attention to the patient is illustrated by the fact that in 1917 he named one psychiatrist as clinical psychotherapist, freeing him entirely from administrative duties. Another important innovation made by Dr. White was the establishment in 1920 of the Department of Internal Medicine, now known as the Medicine and Surgery Branch. He also developed the School of Nursing, initiating the three-year course, and set up occupational therapy and social work. In 1909, he began publication of The Bulletin, a medical paper which appeared at intervals until 1932. These are only a few of the many advances made in treatment at Saint Elizabeths during Dr. White's administration.

Dr. White died in 1937, and Dr. Winfred Overholser was appointed Superintendent. Having been Commissioner of Mental Diseases for the Commonwealth of Massachusetts, supervising 16 State hospitals and numerous private hospitals. Dr. Overholser was already widely experienced in the field of mental health. According to Dr. Zigmond M. Lebensohn, the cause of forensic psychiatry could not have been better served than by President Roosevelt's appointment of Winfred Overholser, who became known as the "Dean" of forensic psychiatry. To the present day, every type of psychotherapy, from the original milieu therapy to psychoanalysis, has been used at Saint Elizabeths—group therapy, occupational therapy, recreational therapy, dance therapy, etc., as well as new medication as it become available.

When Dr. Overholser retired in October 1962, Dr. Dale C. Cameron, who had been Director of Medical Services for the State of Minnesota, was appointed Superintendent. His tenure was notable for administrative progress including decentralization, delegation of patient treatment authority and outplacement. The patient population began to decline despite increased rate of admissions. He also was responsible for significant enlargement in the Hospital research and training programs.

In August 1967, Secretary John W. Gardner announced the transfer of Saint Elizabeths Hospital to the National Institute of Mental Health (NIMH), effective August 13. In the following month, Dr. Cameron retired as Superintendent to become Chief, Drug Abuse Unit, World Health Organization in Switzerland, and Dr. David W. Harris was appointed Acting Superintendent.

On November 8, 1968, Secretary Wilbur J. Cohen and Dr. Stanley F. Yolles, Director of the National Institute of Mental Health, announced plans for the National Center for Mental Health Services, Training, and Research, with three divisions, one of which is the Saint Elizabeths Hospital—Division of Clinical and Community Services, with Dr. Louis Jacobs as Superintendent of the Hospital and Director of the Division of Clinical and Community Services. Dr. Harris was at that same time appointed Assistant Superintendent. Dr. Harris, on January 31, 1969, resigned to become Chief of Staff at the Veterans Hospital in Montrose, New York. During the period of the National Center for Mental Health Services, Training, and Research, with Dr. Sherman N. Kieffer as its Director and Dr. Jacobs as the Hospital Superintendent, a new era of community-based psychiatry began at Saint Elizabeths. The Hospital established its first comprehensive Community Mental Health Center in April 1969. Between late 1969 and early 1970, all 19th Century patients' buildings were evacuated by relocation—approximately 1,200 patients were moved to newer buildings or outplacement in the community. Dr. Jacobs retired on November 3, 1969, to become Chief, Division of Mental Health, Montgomery County Health Department, Maryland, and Dr. Luther D. Robinson was designated Acting Superintendent.

On May 26, 1971, Elliot L. Richardson, Secretary of Health, Education, and Welfare, approved an organizational change within the National Institute of Mental Health, the effect of which was to deactivate the National Center for Mental Health Services, Training, and Research, and to transfer to the Hospital those training and research activities of the National Center which are integrally related to its clinical operation. Emphasis on community service continued. By the time of the close of the National Center, the Hospital's inpatient population had decreased from 5,474 to 3,583, and the outpatient rolls had expanded from 1,675 to 2,437. By 1978, the number of inpatients had been reduced to approximately 2,200 and the number of outpatients expanded to approximately 3,300.

On June 29, 1972, Dr. Robinson, the Acting Superintendent, was appointed Superintendent of Saint Elizabeths Hospital. Dr. Robinson had been on the staff since 1955 and in 1963 had founded the Hospital's Mental Health Program for the Deaf. During his superintendency, progress continued in Saint Elizabeths' programs. Dr. Robinson was a frequent visitor in the wards and earned the confidence of patients, many of whom he knew by name. He continued his research on mental health in deafness, and expanded the Hospital's program for deaf people. When in July 1975 he moved to another position in the Hospital after 5½ years in the Superintendent's office, the Director of NIMH, Dr. Bertram S. Brown, expressed thanks for the stability and leadership Dr. Robinson had provided during very difficult years it the mental health field.

Dr. Roger Peele, Assistant Superintendent, served as Acting Superintendent until October 1977, when Dr. Charles Meredith become the Hospital's ninth Superintendent. He served from October 1977 to December 10, 1979 as Superintendent. William H. Dobbs, M.D., was appointed as Acting Superintendent. He served as Acting Superintendent until he was appointed as the Hospital's tenth Superintendent on January 14, 1981.

Dr. William G. Prescott was appointed as the Hospital's eleventh Superintendent on January 1, 1984, replacing Dr. Dobbs who asked to be relieved of the Superintendency.

NEW METHODS ADOPTED

Saint Elizabeths was the first public hospital to have psychodrama; and in 1944, what is now the largest clinical pastoral training program in the Nation was begun. In 1957, the Saint Elizabeths-National Institute of Mental Health Collaborative Program was initiated—the Neuropharmacology Research Center in that year, followed by the Behavioral and Clinical Studies Center in 1961.

Many prominent professional people have trained at Saint Elizabeths Hospital; and visitors from all over the world come to the Hospital. Overlooking the Capital City of the Nation, the Hospital is close to one of the great cultural centers in the world as well as one of the most beautiful cities.

Mr. MATHIAS. Madam President, I rise to join my colleague from Missouri to reluctantly support this legislation. The future of St. Elizabeths Hospital is something that has been studied, negotiated, and debated for years. It is a tough issue involving the interrelationship of the Federal Government and the home rule government of the District of Columbia. It touches thousands of patients and thousands of employees. The site consists of over 330 acres and includes 104 buildings. Today it is a Federal mental health facility with a yearly operating budget of over $140 million.

This legislation will put the congressional stamp of approval on a transfer of the hospital to the local government. In so doing, the Congress is insisting on the development of a comprehensive plan for integrating this entity into that system. I am con-

cerned because the plan does not exist yet and I have misgivings about the action we are taking today because it is not pursuant to such a plan. But I understand the concerns of the Mayor that his hands are tied—that he cannot plan without knowing what he has to plan with, including Federal involvement, the status of employees and professional staff, and the transfer of the hospital site and facilities.

Madam President, it is an extraordinary feat that this legislation is before the Senate today. Many, many hours of work have gone into this compromise bill. Everyone involved deserves a great deal of credit. And let me assure my colleagues, everyone involved—from the city to the American Federation of State, County and Municipal Employees representing the hospital's employees, to the Office of Management and Budget, to HHS and the National Institute of Mental Health, to the professional organizations like the American Psychiatric Association and the American Association for the Advancement of Psychology—has given up something during the negotiations. No one walks away very happy. But of primary concern to all of us has been and is the fate of the people this hospital serves. I am confident that everyone is making their best efforts to protect them.

Madam President, I am very concerned that the Senate has not had much opportunity to review this compromise bill. We have been presented with what is, in effect, a fait accompli. I question whether the Federal monetary commitment included in this bill is really sufficient. But I think it is time to take the final steps to turn the hospital over to the city. The good faith efforts of all who have worked on this project should not be thrown away.

I therefore support the action the Senate takes today in adopting H.R. 6224, with the amendment Senator EAGLETON is offering. And I want to assure my colleagues and the staff, the patients and all of those interested in the well-being of St. Elizabeth's that I am determined to see that the high standards for mental health care that have characterized the hospital will continue to be upheld in its new status.

Mr. EAGLETON. Madam President, for nearly two decades the Federal Government and the District of Columbia have grappled with the "St. Elizabeths' problem." Should St. Elizabeths Hospital, a national mental health facility located in far southeast Washington, be retained and operated by the Federal Government, or should the hospital be transferred to the District of Columbia, since the bulk of the patient population comes from DC?

In keeping with practices of other States and communities, one would conclude that the jurisdiction which uses the mental health facility should be the jurisdiction which operates the facility. This philosophy seemed particularly apropos to the District after 1973 when Congress granted the city home rule pursuant to Public Law 93-198, the District of Columbia Self-Government and Governmental Reorganization Act.

Unfortunately, St. Elizabeths has not been that simple. Since its founding in the mid-1800's by Dorothea Dix to care for Civil War veterans suffering from mental and emotional problems, St. Elizabeths has been a preeminent national mental health facility. The hospital has been in the forefront of mental health research and has served the Nation as a major teaching center. While the hospital has served DC residents, District residents have also provided the cases for St. Elizabeths' unique programs, programs which have never been cheap. Over the years, St. Elizabeths has grown into a facility occupying 336 acres and 104 buildings. It has an annual operating budget of about $143 million, more per capital than any mental health system in the Nation. The District, quite simply, cannot afford to run St. Elizabeths. Nor should any city with 640,000 residents be expected to operate a mental health facility of the magnitude of St. Elizabeths.

Since the hospital primarily serves the District, however, the Federal Government doesn't feel it should be operating St. Elizabeths any longer either.

If I had my druthers, I would continue the operation of the hospital as a Federal, national facility—just as the Federal Government operates Dulles and National Airports, Beltsville Agricultural Station, and the National Arboretum. But I am not to have my druthers. OMB and the powers that be in this administration have decreed that Federal funding for St. Elizabeths will end by 1991 and that the District will have to establish its own comprehensive mental health care system. H.R. 6224, which is now before the Senate for consideration, does just that.

H.R. 6224 is complicated, and frankly, there has been no formal review of the measure on the Senate side. However, as a member of both the DC Subcommittee and the Labor Committee, which has jurisdiction over the bill because it falls under Health and Human Services, I have taken a serious look at the bill and reached the following conclusions:

If there is no solution to the St. Elizabeths problem other than OMB budget cuts, a fine mental health facility will be destroyed;

If H.R. 6224 is approved, mental health care in the District faces years of uncertainty;

If H.R. 6224 is not approved, Congress and the administration may reach a better solution than H.R. 6224, but then again, they may not. If no perfect solution has been found in nearly 20 years, why would 1985 be a magic year?

Thus, I will support H.R. 6224 and hope for the best. There is one provision in H.R. 6224, however, which has given me and Senator MATHIAS such pause that we feel it necessary to offer an amendment to change it. DC Mayor Marion Barry has agreed to accept the amendment, and we expect the amendment will have the support of our colleagues.

Under section 8(a)(1) of H.R. 6224, all the real property at St. Elizabeths—the land, and buildings—is given to the District. When Mayor Barry testified in June before the House DC Committee, he indicated that the city didn't want all the property. Specifically he stated:

> The DC Government's position is we don't want the physical structures and the 360 acres turned over to the District of Columbia, we want to be able to, as in other local systems, use those facilities out there that are available to us. Those we don't want, the Federal Government ought to keep them, sell them or do what they want to do with them."

Now, I understand, the city does want the property. Apparently when OMB cut the Federal phaseout payments to the hospital from $210 to $135 million, the city accepted the property in exchange. The city is hopeful, I understand, that it can develop the land and generate an income stream from those portions of St. Elizabeths not used for mental health purposes. There is nothing in the bill, however, which requires any such funds to be used for mental health purposes. That is a serious concern.

Also, I would hate to see the St. Elizabeths site developed without any forethought or planning. Its 336 acres represent the last great nonmilitary open space in the District of Columbia. I personally would like to see a major park established on St. Elizabeths land not used for mental health purposes. However, there are other development needs in the city and the region, and perhaps a park would not be the best use.

To determine the best use, I believe the city must first determine which part of the St. Elizabeths site is necessary for the city's mental health programs, and then all interested agencies should agree on what to do with the remaining acreage—be it parks, Federal use, schools, housing, or commercial development. Before any major changes are made to the present site, in-depth studies must be made of transportation facilities, historic preservation concerns, and environmental impacts.

The amendment Senator MATHIAS and I offer basically provides for such a planning process for the St. Elizabeths acreage. When a plan has been developed by the District in consultation with appropriate Federal, regional, and local agencies, Congress shall approve the plan prior to its implementation. If Congress does not approve the plan, the acreage not used for mental health will remain Federal property.

Mr. President, I regret that the St. Elizabeths land became a part of the financial package for mental health care. I do not feel we should be expecting the city to fund its mental health needs through unknown income sources. If the city needs 210 million dollars' worth of Federal help to take over St. Elizabeths, then we should commit up-front to the $210 million. Since that is not done in this bill, I feel Congess should authorize the additional funds at a later date.

As stated earlier, I have other reservations about H.R. 6224 and which direction it will take health care in the District. But the time has come to turn over to the city the responsibility for its own mental health system—and I urge a generous helping hand as we do so.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 6224) was read the third time and passed.

Mr. BAKER. Madam President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXTENSION OF CERTAIN DRUG PATENTS

Mr. BAKER. Madam President, I ask the Chair to lay before the Senate H.R. 6228.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 6228) providing for an extension until April 21, 1992, of five patents relating to all hypoglycemic drugs of the sulfonylurea class.

The PRESIDING OFFICER. Without objection, the bill will be considered as having been read the first and second time by title, and the Senate will proceed to its immediate consideration.

AMENDMENT NO. 7079

(Purpose: To require a master plan for use of certain property)

Mr. BYRD. Madam President, I send an amendment to the desk on behalf of Mr. EAGLETON and Mr. MATHIAS, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD], for Mr. EAGLETON and Mr. MATHIAS, proposes an amendment numbered 7079.

Mr. BYRD. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 10, line 14, strike out "and".

On page 10, line 19, strike out the period and insert in lieu thereof a semicolon and the word "and".

On page 10, between lines 19 and 20, insert the following:

(7) identify the specific real property, buildings, improvements, and personal property to be transferred pursuant to section 8(a)(1) of this Act needed to provide mental health and other services provided by the Department of Human Services under the final system implementation plan.

On page 21, line 11, immediately before the period, insert the following: "needed to provide mental health and other services provided by the Department of Human Services identified pursuant to section 4(c)(7) of this Act".

On page 21, between lines 15 and 16, insert the following:

(b) On or before October 1, 1991, the Mayor shall prepare, and submit to the Committee on the District of Columbia of the House of Represenatives and the Committees on Governmental Affairs and Labor and Human Resources of the Senate, a master plan, not inconsistent with the comprehensive plan for the National Capital, for the use of all real property, buildings, improvements, and personal property comprising Saint Elizabeths Hospital in the District of Columbia not transferred or excluded pursuant to subsection (a) of this section. In developing such plan, the Mayor shall consult with, and provide an opportunity for review by, appropriate Federal, regional, and local agencies. Such master plan submitted by the Mayor shall be approved by a law enacted by the Congress within the twelve-month period following the date such plan is submitted to the Committee on the District of Columbia of the House of Representatives and the Committees on Governmental Affairs and Labor and Human Resources of the Senate. Immediately upon the approval of any such law, the Secretary shall transfer to the District, without compensation, all right, title, and interest of the United States in and to such property in accordance with such approved plan. The real property, together with the buildings and other improvements thereon, including personal property used in connection therewith, known as the Oxon Cove Park and operated by the National Park Service, Department of the Interior, shall not be transferred under this Act.

On page 21, line 16, strike out "(b)" and insert in lieu thereof "(c)".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 7079) was agreed to.

The bill (H.R. 6228) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Madam President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RECOGNIZING THE ORGANIZATION KNOWN AS THE NAVY WIVES CLUBS OF AMERICA

Mr. BAKER. Madam President, I ask the Chair to lay before the Senate H.R. 2372, which is also at the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 2372) to recognize the organization known as the Navy Wives Clubs of America.

The PRESIDING OFFICER. The bill will be considered as having been read the first and second time by title, and the Senate will proceed to its immediate considered.

Mr. WARNER. Mr. President, on August 10, 1984, I introduced a bill to provide a Federal charter to a selfless, dedicated and vital organization, the Navy Wives Clubs of America. Already, 44 of my colleagues have joined as cosponsors of this bill.

This outstanding, nonprofit organization has been making countless important contributions to our sailors and their families for many years.

Founded in 1936, members of the Navy Wives Club of America are spouses of enlisted personnel in the U.S. Navy, Marine Corps and Coast Guard as well as their retired and active reserve components.

They participate in community projects and various charitable programs.

Most notably, they provide a crucial support mechanism to families often separated for long periods from service members serving shipboard tours.

Mr. President, the dedicated women of the Navy Wives Clubs of America have compiled an exceptional record of contribution which deserves our recognition.

I invite my colleagues to join me in providing that recognition through the granting of a Federal charter.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 2372) was ordered to a third reading, was read the third time, and passed.

DIRECTING THE CLERK OF THE HOUSE OF REPRESENTATIVES TO MAKE TECHNICAL CORRECTIONS IN THE ENROLLMENT OF H.R. 5167

Mr. BAKER. Madam President, I ask the Chair to lay before the Senate House Concurrent Resolution 369, which is at the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 369) to direct the clerk of the House of Representatives to make technical corrections in the enrollment of the bill H.R. 5167.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the concurrent resolution?

There being no objection, the concurrent resolution (H. Con. Res. 369) was considered and agreed to.

Mr. BAKER. Madam President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DESIGNATING LITHUANIAN INDEPENDENCE DAY

Mr. BAKER. Next, Madam President, I ask the Chair to lay before the Senate House Joint Resolution 655.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 655) designating February 16, 1985, as "Lithuanian Independence Day."

The PRESIDING OFFICER. Without objection, the joint resolution will be considered as having been read the first and second times by title.

There being no objection, the joint resolution (H.J. Res. 655) was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Madam President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT OF PANAMA CANAL ACT OF 1979

Mr. BAKER. Madam President, another item at the desk. I ask unanimous consent that the Senate turn to the consideration of H.R. 6101.

The PRESIDING OFFICER. Without objection, it is so ordered.

The assistant legislative clerk read as follows:

A bill (H.R. 6101) To amend the Panama Canal Act of 1979 to authorize quarters allowances for certain employees of the Department of Defense serving in the area formerly known as the Canal Zone.

The bill (H.R. 6101) was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. I move to reconsider the vote by which the bill was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BILL PLACED ON CALENDAR—H.R. 5252

Mr. BAKER. Madam President, I ask unanimous consent that the Committee on Veterans' Affairs be discharged from further consideration of H.R. 5252, to redesignate the Regional Veterans Administration Medical Center located in Poplar Bluff, MO, as the "General Black Jack Pershing Regional Veterans Administration Medical Center", and that it be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

BILL PLACED ON CALENDAR—H.R. 723

Mr. BAKER. Madam President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of H.R. 723, a bill for the relief of Marsha D. Christopher, and that it be placed on the calendar.

The PRESIDING OFFICER. Without objection it is so ordered.

BILL PLACED ON CALENDAR—S. 3017

Mr. BAKER. Madam President, there is a bill, S. 3017, which has been read for the third time and appears on page 57 of today's calendar under the appropriate heading in connection with rule XIV. I have consulted with the minority leader on this measure and while it could now reach the calendar with another adjournment and the appropriate action taken on it, the minority leader, as I understand it, does not object to the matter going to calendar without going through the adjournment process.

Therefore, I ask unanimous consent that S. 3017 be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the minority leader and I thank the Chair.

AUTHORITY TO TAKE CERTAIN ACTION

Mr. BAKER. Madam President, I have been requested to and I do now ask unanimous consent that, during the recess of the Senate over until Tuesday next, authority be given for the Secretary of the Senate to receive and the President pro tempore or the acting President pro tempore to sign duly enrolled bills, resolutions, and joint resolutions.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF RECESS UNTIL 11 A.M. TUESDAY, OCTOBER 9, 1984

Mr. BAKER. Madam President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 11 a.m. on Tuesday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 11 A.M. TUESDAY

Mr. BAKER. Madam President, I know of no other business to be transacted this evening. It had been hoped we might be able to clear one or two matters, but that is not practical at this point. It is now after 7 o'clock and well into the religious holiday, which began at sundown today. If the minority leader has nothing further—and I gather that he does not—I move, in accordance with the order previously entered, that the Senate stand in recess until Tuesday next at 11 a.m.

The motion was agreed to, and the Senate, at 7:09 p.m., recessed until 11 a.m. Tuesday, October 9, 1984.

NOMINATIONS

Executive nominations received by the Senate October 5, 1984:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Alfred Clinton Moran, of Illinois, to be an Assistant Secretary of Housing and Urban Development, vice Stephen J. Bollinger, deceased.

FEDERAL COUNCIL ON THE AGING

Eugene B. Burroughs, of Virginia, to be a member of the Federal Council on the Aging for a term expiring June 5, 1987, vice Syd Captain, term expired.

NATIONAL COMMISSION ON LIBRARIES AND INFORMATION SCIENCE

The following-named persons to be members of the National Commission on Librar-

ies and Information Science for terms expiring July 19, 1989:

Patricia Barbour, of Michigan, vice Carlos A. Cuadra, term expired.

Daniel W. Casey, of New York, vice Helmut A. Alpers, term expired.

NATIONAL CORPORATION FOR HOUSING PARTNERSHIPS

Barbara W. Schlicher, of New Jersey, to be a member of the Board of Directors of the National Corporation for Housing Partnerships for the remainder of the term expiring October 27, 1984, vice Frank J. Donatelli, resigned.

Barbara W. Schlicher, of New Jersey, to be a member of the Board of Directors of the National Corporation for Housing Partnerships for the term expiring October 27, 1987, reappointment.

U.S. INFORMATION AGENCY

Charles E. Courtney, of California, to be an Associate Director of the U.S. Information Agency, vice W. Scott Thompson.

Ernest Eugene Pell, of Maryland, to be an Associate Director of the U.S. Information Agency, vice Kenneth Y. Tomlinson.

THE JUDICIARY

Melvin T. Brunetti, of Nevada, to be U.S. circuit judge for the ninth circuit vice Herbert Y.C. Choy, retired.

Ann C. Williams, of Illinois, to be U.S. district judge for the northern district of Illinois vice a new position created by Public Law 98-353, approved July 10, 1984.

Donald E. Walter, of Louisiana, to be U.S. district Judge for the western district of Louisiana vice a new position created by Public Law 98-353, approved July 10, 1984.

Mark L. Wolf, of Massachusetts, to be U.S. district judge for the district of Massachusetts vice a new position created by Public Law 98-353, approved July 10, 1984.

Alice M. Batchelder, of Ohio, to be U.S. district judge for the northern district of Ohio vice a new position created by Public Law 98-353, approved July 10, 1984.

DEPARTMENT OF DEFENSE

John W. Shannon, of Maryland, to be an Assistant Secretary of the Army, new position—Public Law 98-94 of September 24, 1983.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

James A. Lastowska, of Virginia, to be a member of the Federal Mine Safety and Health Review Commission for a term of 6 years expiring August 30, 1990, vice A. E. Lawson, term expired.

CONFIRMATIONS

Executive nominations confirmed by the Senate October 5, 1984:

NATIONAL SCIENCE FOUNDATION

Nam Pyo Suh, of Massachusetts, to be an Assistant Director of the National Science Foundation.

Rita R. Colwell, of Maryland, to be a member of the National Science Board, National Science Foundation, for a term expiring May 10, 1990.

DEPARTMENT OF THE TREASURY

Vilma Rosso Taracido, of New York, to be Assayer of the U.S. Assay Office at New York, NY.

DEPARTMENT OF EDUCATION

Linda M. Comb, of North Carolina, to be Deputy Under Secretary for Management, Department of Education.

ASIAN DEVELOPMENT BANK

Joe O'Neal Rogers, of Virginia, to be U.S. Director of the Asian Development Bank, with the rank of Ambassador.

U.S. ADVISORY COMMISSION ON PUBLIC DIPLOMACY

Tom C. Korologos, of Virginia, to be a member of the U.S. Advisory Commission on Public Diplomacy for a term expiring July 1, 1987.

The above nominations were approved subject to the nominess' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

IN THE AIR FORCE

Air Force nominations beginning Clark B. Dorsey, and ending Harvey Greenberg, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 3, 1984.

Air Force nominations beginning Gerald N. Bart, and ending Gillis L. Payne, Jr., which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 3, 1984.

IN THE ARMY

Army nomination of Lee E. Reeves, Jr., which was received by the Senate and appeared in the CONGRESSIONAL RECORD of October 3, 1984

Army nominations beginning Milton M. Despain, and ending Robert D. Voss, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 3, 1984.

Army nominations beginning Patrick B. McAndrew, and ending Lones W. Wigger, Jr., which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 3, 1984.

Army nominations beginning Nestor G. Pinomarina, and ending Deborah E. Jordan, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 3, 1984.

Army nominations beginning Robert M. Bragg, and ending Julian C. Bomar, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 3, 1984.

Army nominations beginning Pinkie L. Bolden, and ending James A. Wolfe, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 3, 1984.

Army nominations beginning David B. Aaronson, and ending Peter P. Yancich, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 3, 1984.

IN THE MARINE CORPS

Marine Corps nominations beginning David W. Bady, and ending Richard T. Young, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 3, 1984.

EXTENSIONS OF REMARKS

CHANGES IN HEALTH CARE THROUGH THE 1990'S

HON. PAT WILLIAMS
OF MONTANA
IN THE HOUSE OF REPRESENTATIVES

Thursday, October 4, 1984

● Mr. WILLIAMS of Montana. Mr. Speaker, the American College of Hospital Administrators [ACHA] recently completed an interesting and perceptive study which I would like to bring to the attention of my colleagues.

The ACHA, which is a professional society of 19,000 health care executives, surveyed 1,000 experts throughout the health care field including hospital leaders, physicians, other providers, legislators and regulators, suppliers, and payors. The objective of the study, entitled "Health Care in the 1990's," was to determine what consensus there was about changes which could take place in health care over the next 20 years.

This survey presents a unique perspective on the trends and strategies which will be reshaping our health care system. It revealed surprising consensus among the experts on such issues as a continued increase in spending for health care services, growth of investor-owned hospitals, greater utilization of less expensive alternatives to acute inpatient hospital care, and increased patient financial participation in health care. The overall conclusions of the study are summarized in the attached overview section of the report.

The report contains several interesting conclusions regarding the future social philosophy of health care in the United States. Health care recently crossed an important threshold. The prospective payment system, enacted by Congress in 1983, was intended to encourage cost control and foster price competition. This new system will impact everyone concerned with health care, including providers, payor, and patients.

The experts agree, according to the report, that the pendulum will swing toward policies based on economics. Those surveyed believe greater access will be available only to those able to pay for it; many will be afforded only limited levels of service. This may be true in particular for amenities, or those services above a minimum level.

The report also makes several important observations concerning changes in public policy. It predicts, for example, that Congress will have to address the question of defining life and death for patients on life support systems. The experts surveyed felt Medicare will further limit the coverage of inpatient hospital care by 1990. The report also shows consensus among the experts surveyed that Medicare premiums and deductibles will rise.

Mr. Speaker, I don't agree with all the observations made in this report. However, the American College of Hospital Administrators' study, prepared in cooperation with Arthur Andersen & Co., provides important insights on changes which could take place in our health care system. I would like to commend the ACHA study to my colleagues and ask that selected portions of the report be included in the RECORD.

OVERVIEW

The health care delivery system has crossed the threshold of change once again, but, this time, the new course is more dramatic and the effects more consequential than any recently experienced. The evolving methods of payment for health care services are based on financial incentives intended to encourage cost control and to foster price competition. The potential impact of this redirection for all concerned—providers, payors and, in particular, patients—is enormous.

Previous payment systems were designed to encourage expansion of the delivery system and of patients' access to it. The resulting costs became intolerable. The federal government instituted a prospective payment system for Medicare in 1983 in an attempt to provide financial incentives to hospitals to control costs and thus to begin to gain control over the government's health care expenditures. Other third party payors are moving to implement similar payment programs and the providers of care are responding with new strategies in order to maintain their ability to service their communities.

Arthur Andersen & Co., the international accounting and consulting firm, and the American College of Hospital Administrators ("the College"), the professional society of more than 19,000 health care executives, have cooperated in a study designed to determine the consensus of health care experts concerning the future direction of the health care system. Six panels of experts were surveyed—one each from hospital leaders, physicians, other providers, legislators/regulators, suppliers and payors. References are made to these six panels throughout the report. Differing panel responses are noted in the report whenever they vary significantly.

Survey results are reported in seven broad categories. Implications and Strategies follow the survey results in each category, providing an analysis of the survey results by the sponsors together with an identification of key success factors for the next decade.

The study sponsors believe that the results presented here will contribute greatly to the current debates surrounding the future of this vital industry. The impressive rate of response to the survey substantiates the interest and concern that the nation's health care experts hold for the future of the system.

By surveying 1,000 experts throughout the health care field, the results of this study present, for the first time, a comprehensive assessment of trends and strategies reshaping health care in America today.

What additional changes will the payors make in the payment system?

How will these changes affect the public's ability to receive care and what will be the effect on the quality of care?

How will new technologies affect the cost and quality of care?

How will providers respond and what will be the priorities for managing health care organizations in the next decade?

A high level of consensus exists today among experts from all sectors of the health care field concerning where the trends are headed and what the operational strategies will be.

For hospitals, the experts agree that:

Multihospital systems will continue to grow and will be positioned best to implement and take advantage of the strategies of choice in the new competitive market.

Investor-owned hospitals will substantially increase in numbers and will be more profitable.

The amount of money spent nationally on health care services will continue to grow.

New types of providers will erode the acute care inpatient hospitals' share of health care expenditures.

Emphasis in health care will shift to ambulatory services and new alternative delivery systems.

Hospitals may be at a disadvantage in attracting capital financing and many will have to create new corporate structures and business ventures to compete in the capital market.

For physicians, the experts predict that:

Prospective payment systems will be extended to include physician payments and this will result in a drop in their relative income levels.

The anticipated oversupply of physicians and the continued trend toward practicing in hospital-based positions and alternative delivery systems will mean a decline in influence. These factors also mean a decline in the fee-for-service payment method.

Increased fiscal restraints and greater use of prescribed patient care protocols portend less autonomy for tomorrow's physicians, more frequent conflict with their hospitals and an anticipated decline in the professional satisfaction they will derive from their practice.

Hospitals and their medical staffs will collaborate and advocate together on behalf of the patients they serve. This collaboration will lead to the development of new relationships and new organizational designs for working together.

For other providers, such as nursing homes, extended care facilities, specialty care institutions and ambulatory care facilities, the experts foresee that:

Greater utilization and growth of less expensive alternatives to acute inpatient hospital care will occur.

More providers, both institutional and individual, will compete in the markets represented by these alternative levels of care.

For the patient, the experts forecast that:

The level of patient financial participation will increase and the patient's expectations of the health care system will have to be adjusted.

Persons covered under governmental programs can anticipate the greatest changes as the benefits and eligibility standards of these programs undergo the most significant changes.

Patients with private coverage will experience restrictions as well, but additional levels of service will be available to those willing to pay for them.

A common thread runs throughout the study—an accelerating rate of change. The paramount change will be the surging competitive health care market. During the next decade, the success of health care providers will be dependent on multiple factors:

Strategic and financial planning

Refined management skills

Risk identification and analysis

Integrated clinical and financial cost accounting

Prudent application of new technology

Predictive market analysis

Computerized decision support systems

Many of the survey experts see the coming decade as one of great challenge as well as one requiring a change in perspective. For successful providers, the competitive market will mean a strengthening of their position and greater rewards for their sound business judgment. The panelists also exhibited a strong desire to move ahead and tackle the challenges before them.

Social Philosophy

The social philosophy of health care in America has been difficult to define. Our collective conscience has wrestled with how this societal need should be balanced against other needs in light of the available financial resources. The result has been like the swing of a pendulum. Goals of "highest possible quality" and "unlimited access" have been expressed in good times. Today, the pendulum is swinging back as a strained economy brings home the reality of budget deficits and accentuates other needs in the nation's infrastructure.

The dilemma leverages our belief in the rights of the individual and our desire to maintain the availability of the world's best health care system against the reality that we have limited financial resources. The nation's conscience, therefore, must provide direction. Is health care a basic human right? If so, how much can we afford to spend on this need as opposed to other needs, such as education and food assistance? How much of the financial burden of health care should each person bear? Should a different level of services be offered to those who cannot pay? At what point should new technology be made available where and for whom? Or, as one panelist put it, "Is this society ready to ration health care and, if so, is it willing to do so explicitly and openly?"

The opinions of health care professionals will have an impact on how these and other issues are answered in the next decade. The extent to which they are in agreement will affect the views of others.

EQUAL ACCESS TO A MINIMUM LEVEL OF HEALTH CARE IS A RIGHT

A minimum level of health care is the right of all Americans, according to the overwhelming majority (98%) of respondents. However, only 12% of the participants think everyone is entitled to the same level of services.

More of the legislator/regulator and other providers panelists tend to agree with this view, while the hospital, supplier and payor panels clearly disagree with this statement.

Accessibility of services will change over the next ten years for patient groups under different payment plans. Even though eight out of ten respondents believe in the right of equal access to health services, nine out of ten panelists also predict a marked decline in access for uninsured persons without the personal ability to pay. Access to services will also become more of a problem for Medicare and Medicaid beneficiaries, most respondents agree. The majority of the panelists see no change in access for those covered by Blue Cross/Blue Shield and the commercial insurers, nor for those uninsured who have the ability to pay for services. For health maintenance organization (HMO) enrollees, three out of four respondents perceive a marked improvement in access by 1995.

QUALITY OF CARE WILL BE A CONCERN

Respondents forecast changes in the quality of care received by different categories of patients. There is 87% agreement that uninsured persons without the ability to pay will experience the most significant decline in the quality of their health care services by 1995. Many of the panelists also expressed concern about a decline in quality of care for Medicare and Medicaid beneficiaries. Little change is expected for those with private insurance. Concerning HMO subscribers and those uninsured who have the ability to pay for services, about half of all panelists predict an improvement in quality but fewer of the physician panelists foresee such improvements for these groups (11% and 15%, respectively).

NOT-FOR-PROFIT HOSPITALS PROVIDE HIGHEST QUALITY CARE

More than eight out of ten participants perceive that not-for-profit hospitals currently provide the highest quality of patient care. Investor-owned hospitals are ranked next, being placed in the mid to high score range by all panels. Hospitals sponsored by federal, state and local governments are perceived by over 60% of all panelists as providing the lowest quality patient care.

ADVANCES IN TECHNOLOGY WILL IMPROVE QUALITY OF CARE

Despite the predicted decline in the quality of care for certain patient groups, panelists also believe that certain advances in medical technology will improve the overall quality of health care and will increase life expectancy. Over 90% of the combined panelists believe this to be true for laser technology, magnetic resonance imaging, and drug therapy and immunization. The combined panels rank the potential of laser technology the highest of the three. To a slightly lesser degree, the panelists believe that five other technologies—angioplasty, CT scanning, ultrasound, organ transplantation and artificial organ implantation—are likely to improve the quality of health care.

HEALTH CARE'S SHARE OF THE GNP WILL CONTINUE TO RISE

The upward spiral of health care costs, as measured by the percent of the Gross National Product (GNP) devoted to health care, will continue and then level off. In 1982, the figure was 10.5 percent. By 1990, the panelists predict that it will rise to 12 percent and remain there through 1995.

There is relative agreement concerning what should be done in key areas to help moderate this trend. Seven out of ten respondents agree that Medicare should limit the amount of money spent for extending the life of the chronically ill aged. Over 98 percent of the panelists concur that a terminally ill patient, or the family when the patient is incapable of doing so independently, should have the right to refuse extraordinary treatment that would prolong life.

Medical malpractice awards should be limited, according to 90 percent of the panelists. Within the responses of individual panels over twice as many people in the supplier panel (which includes lawyers) disagree with this idea, as compared to the hospital and physician panels.

Funding for medical research should not be reduced, according to 90 percent of the respondents. Research and teaching costs, however, should be funded out of sources other than patient care revenue. The number of physicians (13 percent) who disagree with this last statement is three times greater than the proportion of the panelists as a whole (4 percent).

ALTERNATIVE DELIVERY SYSTEMS AND INCREASED PATIENT PAYMENTS WILL REDUCE COSTS

The panelists were asked to list their own ideas for reducing the overall cost of health care. According to most panels, emphasizing alternative delivery systems and ambulatory care is the number one way to reduce the cost of health care in the U.S. The physician panelists ranked this idea second; they first recommend increasing patient deductibles and coinsurance payments. The payor panel sees shrinking the delivery system and emphasizing ambulatory care as holding the greatest potential.

The second choice of the hospital, other providers and supplier panels for reducing health care costs is to make patients more responsible financially for their care. The legislator/regulator panel ranks public education which emphasizes wellness and preventive medicine as their second choice.

A variety of other ideas also are recommended, including different payment systems, increased competition, improved provider productivity and limiting access to services. Few respondents envision the reduction of government regulations as a viable solution for reducing costs because the government will remain the largest purchaser of care.

PHYSICIANS BELIEVE COMPETITION WILL HURT QUALITY

Increased competition among health care providers appears to be a generally accepted trend of the future, but the study participants are divided over whether this will have a positive or negative impact on access to and quality of care. Physicians, in particular, envision an unfavorable impact on quality, with 83% predicting a decline in the quality of health services due to increased competition. With regard to access, almost 90% of the other providers panel predict a positive impact from competition, compared to 60% of the balance of respondents.

CHARITY CARE WILL INCREASE IN GOVERNMENT HOSPITALS

Eighty-six percent of the respondents anticipate that state and local government hospitals will experience an increase in their levels of charity care patients, and three-quarters also predict an increase for federal hospitals. Little change is forecast for not-for-profit hospitals, but panelists expect in-

vestor-owned facilities to decrease the level of charity care they currently provide.

A slight decrease is expected in the percentage of uninsured people during the next decade. In 1980, 13% were uninsured and most panelists expect that figure to decline to 12% by 1990 and to 11% by 1995. Physicians, suppliers and payors predict a slightly greater decline by 1995, to perhaps 10% of the population.

REGULATIONS

The Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) and the Social Security Amendments of 1983 legislated the most significant changes in the Medicare program since its inception. In less than one year, Medicare reimbursement for hospital inpatient care changed from a cost-based retrospective payment system, to cost-per-case limits under TEFRA to a prospective payment system based on diagnosis related groups (DRGs).

The Federal government's rapidly accelerating health care expenditures prompted these changes. As one of the respondents wrote, "It is important to understand that we are dealing with an entitlement program that has gotten out of hand." Health care inflation will continue to exceed that of the rest of the economy and, combined with concern over federal deficit levels, could trigger further legislative action to hold the line on government health care expenditures.

Future regulatory changes in health care are anticipated. The need to refine the emerging competitive market in health care undoubtedly will lead to new laws and regulations. There also is little question that trends such as America's aging population, the increasing capacity of technology to extend life and the need to control the federal deficit will result in legislative initiatives to limit government health care outlays and, ultimately, to curb demand for health care services.

In the future, a primary issue for health care providers will be the degree to which the regulatory framework provides the right incentives for an appropriate degree of market competition. One panelist assesses the situation this way: "In 1990, the over 65 group will still be increasing in size and political power. This (power) will not offset, but it will moderate, the moves to cut Medicare because of rising costs and the trend away from social programs that is underway."

CONGRESS WILL DEFINE LIFE AND DEATH

By 1990, life and death will be defined legislatively to allow the withdrawal or nonuse of life support systems in cases of terminal illness, according to 95 percent of the panelists.

Eight out of ten participants predict that by 1990 the Medicare program will limit the dollar expeditures for the extension of life for the chronically ill aged. In the opinion of one panelist, "We must define life in terms of function, *not* just heart beat."

MALPRACTICE AWARDS WILL BE LIMITED

Eighty percent of the panelists believe that Congress will act by 1990 to limit malpractice claim awards, which should result in more affordable malpractice insurance premiums and less defensive medicine. Only 8% do not predict such limitations by 1990 and 12% are undecided.

Will the U.S. adopt some form of national health insurance by 1990? Most respondents do not expect it to happen but 37% do. The expectation that it will occur is particularly strong among the other provide panelists (68%) and it is weakest among the payor panelists (15%).

The favorable tax treatment of employer-paid health insurance benefits will be reduced or eliminated, say 87% of the panelists, which could result in a general contraction of employee health benefits and in employees becoming responsible for a greater portion of their health care expenditures.

According to three-fourths of the respondents, including 84% of the legislator/regulator panel, tax exempt bonds will continue as an available source of capital for not-for-profit hospitals. Without this source of capital, the cost of money would increase and the greater debt service load would rule out expansion, renovation and modernization projects for many not-for-profit hospitals.

Nine out of ten panelists expect the expansion and replacement of existing facilities and the introduction of new services to be subject to tighter restrictions in 1990, evidencing their perception of the government's wish to constrict the size of the health care delivery system. In the view of 72% of the panelists, antitrust laws are expected to become more stringent relative to multihospital system mergers and acquisitions; however, they predict this will do little to alter the trend of hospitals joining these systems.

MEDICARE WILL FURTHER LIMIT COVERAGE OF INPATIENT CARE

Virtually all participants forecast that Medicare will further limit the coverage of inpatient hospital care by 1990.

Coverage for services provided by physicians also will be more limited by 1990, according to 79% of all respondents; only 42% of the legislator/regulator panel, however, envision this limitation.

On the other hand, panelists predict that Medicare will expand coverage, for home care, hospice care, hospital outpatient services, rehabilitative services and skilled nursing care. Medicare's emphasis on ambulatory care will be mirrored by other third party payors as America looks for less costly alternatives to expensive inpatient hospital care.

MEDICARE BENEFICIARIES WILL PAY MORE

In addition to changing its menu of covered services, Medicare will take additional steps by 1990 to pare its outlays. Ninety-nine percent of the panelists project a significant increase in Medicare premiums, deductibles and coinsurance. Ninety-three percent of the respondents also believe that the qualifying age for receiving Medicare benefits will be raised.

Perhaps the projected change with the greatest potential impact is a fundamental change from Medicare coverage of all elderly citizens to coverage based on financial need. Almost 90% of the study participants expect Medicare to implement a "means test" by 1990.

ASSIGNMENT OF MEDICARE BENEFITS WILL BE MANDATED FOR PHYSICIANS

Anticipated legislative actions which would benefit Medicare patients include adoption of catastrophic illness coverage for older citizens and a requirement for physicians to accept assignment of benefits for Medicare beneficiaries, each of which is projected by nine out of ten panelists.

HOSPITAL EXECUTIVES SAY REGULATORY BURDENS EXCEED BENEFITS

Hospital executives believe overwhelmingly that regulatory burdens significantly exceed their related benefits to society in the areas of certificate-of-need and planning regulations, and state rate regulations. To a lesser extent, they feel the same way about Medicare payment regulations, antitrust laws, Hill-Burton regulations and IRS unrelated business income regulations. Panelists believe a balance of benefits and burdens exists in state licensing requirements for personnel and facilities.

On the other hand, these executives believe that benefits far exceed the related burdens of regulatory compliance in the areas of IRS tax exempt regulations and tax exempt bond regulations and, to a lesser degree, that the benefits exceed the related burdens in the Joint Commission on Accreditation of Hospitals' survey process.

Members of the legislator/regulator panel generally rated the benefits of regulations higher and the related burdens of regulatory compliance lower than did the hospital panel.●

JOHN HOPE FRANKLIN, RECIPIENT OF JEFFERSON MEDAL

HON. TIM VALENTINE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 4, 1984

● Mr. VALENTINE. Mr. Speaker, I would like to bring the attention of the House to a North Carolinian about to be honored with the Jefferson Medal. The Council for Advancement and Support of Education has chosen Dr. John Hope Franklin of Duke University for this prestigious award.

Dr. Franklin has compiled a list of accomplishments that defies quick and easy summary. Suffice it to say that he has graced the world of learning and public service with exceptional achievements in academics and civic affairs.

Dr. Franklin, as James B. Duke Professor of History, blends the story of America's blacks, their honorable struggle for civil rights, and the growth of the American South. He has written nine books on Southern and Afro-American history. One of these, "From Slavery to Freedom: A History of Negro Americans," has appeared in no less than five editions and nearly 1 million copies.

Not content with the contemplative life alone, Dr. Franklin has made his mark in public service as well. When the Supreme Court decided in 1954, in Brown against the Board of Education, that America must put an end to the segregation of her schools, it based its decision on research conducted by Dr. Franklin and his colleagues. At the height of the struggle for civil rights, he marched with Dr. Martin Luther King, Jr., from Selma to Montgomery.

Dr. Franklin has been showered with honorary degrees from colleges and universities whose names span the alphabet from Arizona to Yale. He has been granted fellowships for post-doctoral research, for advanced study in the behavioral sciences, and for a long line of other pursuits. When Who's Who in America chose eight Ameri-

cans for significant contributions to society in 1978, Dr. Franklin was on the list.

The mind of Dr. Franklin has earned impressive praise for creating a revolution in the study of the American South. In his works, no artificial distinctions divide his subjects into blacks and whites: He prefers instead to tell the story of black Americans as an integral part of the region that formed so much of their first experiences in a revolutionary land.

To Dr. Franklin, the hundreds of years spent by blacks in America have affected far more than the lives of blacks alone. He says with conviction that black history forms so much a part of America's past that the teaching of white history without black history belies the essential interaction between the two races.

Many people have termed Dr. Franklin the dean of black history. He considers it proper to be regarded as something else—a historian of the American people.

On October 16, 1984, in our Nation's Capital, Dr. Franklin will receive further affirmation of the impact made by his work. When he receives the Jefferson Medal, we will all take pride as his peers honor his work. The day will serve as an occasion for pride not only in this city but throughout North Carolina, throughout the South, and throughout the whole of our Nation.●

NEWARK NAACP MARKS 70 YEARS

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 4, 1984

● Mr. RODINO. Mr. Speaker, next month will mark the 70th anniversary of the Newark Chapter of the National Association for the Advancement of Colored People. It is with great pleasure that I take these moments today to salute this outstanding organization.

The NAACP has set an example for oppressed people the world over in their struggle for human rights. In addition to the long list of achievements that we all know well—laws enacted and court cases won—the NAACP has made all Americans sensitive to our most basic constitutional rights. It has made men and women everywhere more aware of what it means to be deprived of a livelihood, deprived of the right to vote, deprived of one's identity and self-worth. The NAACP has stirred the conscience of America and given real meaning to our Constitution. On the national level, the NAACP has been the prime moving force of social change in this country. On the local level, the Newark branch of this organization has made a difference in the lives of countless individuals—and I proudly count myself as a lifetime member.

The Newark chapter of the NAACP will celebrate 70 years of achievement with a dinner on October 26 at the Gateway Hilton in Newark. The guest speaker will be the Reverend Leon H. Sullivan of the Zion Baptist Church in Philadelphia, who has been a strong civil rights leader both in his home city and around the Nation. Bobie Cottle, president of the Newark NAACP is especially to be commended for providing such excellent leadership to the organization. In addition, I would like to salute the following officers of the Newark chapter: John D. Woods, first vice president; Dorothea Lee, second vice president; Daisy Stokes, secretary; Dolores Carter, assistant secretary; Mamie (Gus) Hale, treasurer; and the following members of the executive committee: Carrie Alston, Mary Avery, Cleo Blount, Daniel Blue, George Branch, Lovie S. Brown, Rev. Oliver Brown, William H. Brown, Marquerite Bush, Sally Carroll, Billie M. Cook, Antoinette Davis, Clara Dean, Helen J. Gardner, Rev. Ralph T. Grant, William Hadley, Ethel Moore Johnson, Harold Jones, Jr., Margaret Kee, Eddie Mae Livingston, John Love, Eleanor Lyle, Susan McGee, Clyde D. Mitchell, Willa Moye, Sue Nelson, Henry Robinson, Arlena Salley, James W. Shue, Joyce Simmons, William Simpson, Steven Talks, Rev. John R. Stanford, Andrew Washington, J. Barry Washington, Louise Washington, Willie Watson, and Kathleen Williams. In addition the following people will receive awards from the organization: Keith Jones, Louise Epperson, councilwoman Bobby Reilly, and Keith Bodden.●

CENTENNIAL CELEBRATION OF SPRINGFIELD COLLEGE

HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 4, 1984

● Mr. BOLAND. Mr. Speaker, New England has the good fortune of having an abundance of colleges and universities within its small region. Many of the institutions enjoy national and worldwide recognition. Few, however, are as special as Springfield College.

Next year, Springfield College will mark its 100th anniversary. Those 100 years have been characterized by determined and steady growth. Founded by the Reverend David Allen Reed, a young minister who recognized the need to educate young persons for community service, the college was originally known as "A School for Christian Workers." The name changed several times through the years, and in 1953 the institution officially became known as Springfield College. Located on the shore of Lake Massasoit, in the center of my home city, Springfield, MA, the college enjoys the social and cultural advantages of an urban setting.

Springfield College is one of the few colleges that has adopted the humanics philosophy. Stressing the importance of the well-rounded individual—one of sound mind, body and spirit—the college encourages and motivates its students to serve humanity in fields that are international, intercultural, interracial and interreligious.

Mr. Speaker, the leadership of President Bill Locklin, and the dedication of the administration, faculty, students and graduates of Springfield College have made it the outstanding institution it is today. I join with the college's many loyal supporters in congratulating it on its accomplishments and in anticipating the events of the centennial celebration.●

A TRIBUTE TO PAUL SIMON

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 4, 1984

● Mr. DOWNEY of New York. Mr. Speaker, at the end of the 98th Congress we will lose a truly remarkable Member of this House, PAUL SIMON, of Illinois. PAUL and I came to Congress together in 1975 and I can honestly say that the time I have spent with him in this House has been rewarding and educational.

PAUL brought a wealth of experience as a newspaper publisher, Illinois State legislator, and finally Lieutenant Governor, when he came to the House. In his 10 years here he has been a stalwart friend of labor and an ardent defender of the great liberal tradition of Franklin Roosevelt, he served on the House Budget Committee where he argued forcefully that fiscal responsibility did not mean cutting social programs. He was prepared to look to other areas, such as the Pentagon, for budget savings. He proposed that Congress commission an independent audit of the defense budget in order to determine the magnitude of savings that would result from a fiscally prudent defense policy.

Educators and students have benefited greatly from his chairmanship of the Subcommittee on Postsecondary Education of the Committee on Education and Labor. In that capacity he worked tirelessly to protect higher education from the budget cutting ax of the Reagan administration.

PAUL's concern for the poor and hungry of the world led him to write a book with his brother on hunger and politics and to play a leading role in

hunger legislation in this House. More recently, he has turned his scholarly eye to the problem of public morality and public policy. His reflections are a useful antidote to the pious platitudes that surround this issue today.

My regret at seeing PAUL leave this House is tempered by my hope that shortly we will be seeing the results of his clear thinking and strong liberalism in the other body.●

TRIBUTE TO THE PRIVATE INDUSTRY COUNCIL, VENTURA COUNTY, CALIFORNIA

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 4, 1984

● Mr. LAGOMARSINO. Mr. Speaker, we who serve in this Chamber all too often hear of the failures and abuses suffered by Federal job training programs, the sad tale of unfulfilled promises. But today, I wish to bring to the attention of my colleagues the story of promises fulfilled and of goals accomplished.

The Job Training Partnership Act establishes a partnership between business and local government to administer use of the Federal funds and provide management direction. In my congressional district in California, the Private Industry Council of Ventura County and the Ventura County Board of Supervisors this year initiated a job training program that, I am pleased to note, has exceeded the most optimistic expectations.

This job training partnership program served 974 people, exceeding its original goal of 130 people. Most importantly, this program successfully placed 606 people in meaningful jobs in the first 9 months of operation. Not only were jobs found and capable people placed in them, but the average hourly wage paid was $5.02, exceeding the organization's goal of $4.37 per hour.

This job training program effectively worked toward the legislative mandate of reducing public assistance by placing 154 welfare clients into unsubsidized employment. Furthermore, the Ventura Private Industry Council proved spectacularly successful in providing job training for the youth of Ventura County with a placement rate in unsubsidized jobs 50 percent higher than established in the State plan while maintaining unit costs 20 percent less than originally anticipated.

At a time when such programs typically incur high administrative costs, this Ventura County program actually spent 84 percent of its budget on training, not administration.

I am pleased to conclude this positive story by advising my colleagues that such rare achievement indeed is rewarded. Sponsors of this successful effort will now receive a performance incentive award of additional program funds totaling $208,265 to continue its important work and expand its service to the people of Ventura County in the new year.●

1984—NATIONAL 4-H WEEK

HON. WILLIAM H. NATCHER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 4, 1984

● Mr. NATCHER. Mr. Speaker, once again I am pleased to join with the members of 4-H as they celebrate National 4-H Week October 7 to 13.

4-H is administered by the Cooperative Extension Service of the Department of Agriculture and assists young people in acquiring knowledge, developing skills and forming attitudes that will enable them to become self-directing, productive members of society.

Participation in 4-H is open to all interested youngsters between the ages of 9 and 19. Nearly 5 million youths were enrolled in 4-H programs last year. Membership has expanded steadily for the past 25 years and 4-H alumni now total about 45 million.

Volunteers are essential to the 4-H program and last year nearly 600,000 volunteers worked directly and indirectly with 4-H members. The average volunteer donates 220 hours each year in preparing for and teaching youth.

During the past 10 years, 4-H enrollment in my home State of Kentucky has nearly doubled. Over 235,000 youth were enrolled as 4-H members in 1983 and in the Second Congressional District of Kentucky, which I have the privilege to represent, nearly 34,000 youngsters and 4,000 volunteers participated in 4-H activities.

4-H members complete one or more projects each year. The most popular projects by Kentucky youth last year included: individual and family resources; machines, equipment and engineering; communication arts and sciences; plant science and crops; energy; health; cultural and leisure education; animal sciences; ecology and natural resources; community development services and government; and economics, jobs and careers.

More than 27 counties in Kentucky participated in 3-day food and nutrition camps sponsored by 4-H in 1983 and an expanded food and nutrition education program reached more than 65,900 economically disadvantaged youth in 1982 and 1983.

The Kentucky Extension 4-H staff, volunteers and members are continuing efforts to maintain a strong, dynamic program and I would like to take this opportunity to commend them for their past accomplishments and to wish them continued success in all their future endeavors.●

PLAN TERMINATION AND REVERSION CONTROL ACT OF 1984

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 4, 1984

● Mr. ROYBAL. Mr. Speaker, it is becoming increasingly apparent that the retirement security of the American worker is being fundamentally challenged by an ever-rising tide of overfunded pension-plan terminations. These terminations are occurring because employers are able to recover so-called excess assets after the termination of their pension plan. It was thought that the Federal law regulating private-pension plans, ERISA, would preclude employers from using their plans for their own self-interest. However, under this administration's interpretation of that law, overfunded terminations have been sanctioned, overfunded terminations have soared and the retirement security of workers and retirees have been sacrificed.

As chairman of the House Select Committee on Aging, I feel constrained today to introduce comprehensive legislation which will place reasonable controls on the ability of employers to terminate their overfunded pension plans. I invite and encourage my colleagues, and the participation of the pension community, and of workers, and retirees in an examination of this bill in a cooperative effort to arrive at a system of controls which will better assure the financial security of workers and retirees from such terminations.

I insert the statement on the Plan Termination and Reversion Control Act of 1984 into the RECORD as follows:

STATEMENT ON THE PLAN TERMINATION AND REVERSION CONTROL ACT OF 1984

INTRODUCTION

This bill is being proposed in response to a continuing pattern of overfunded defined benefit pension plan terminations which result in the loss of benefits to retirees and to workers. In essence, corporate raids are being carried out against the retirement income security of the American worker. Unless Congress acts swiftly to curb such practices many of America's pension funds will quickly and silently be bled dry, robbing workers of their future retirement security.

In 1974, the Congress enacted the Employee Retirement Income Security Act (ERISA), the federal pension law which seeks to protect workers and their families who are covered by employer sponsored pension and welfare benefit plans. It was presumed that the law would prevent the litany of abuses against workers and their families who are covered by employer sponsored pension and welfare benefit plans. Unfortunately, this presumption has proven to be ill-founded in several substantial ways.

As we observe the tenth anniversary of ERISA the Congress can be proud that significant strides have been made to protect workers pension and welfare benefits. How-

ever, today a growing number of corporate plans sponsors are doing an "end run" around the qualification requirements of the Internal Revenue Code and the fiduciary provisions of ERISA, requirements in the law which are designed to protect workers, by simply terminating their "overfunded" defined benefit pension plan to get at pension assets. A defined benefit plan proves a specific future benefit that a worker can count on based on years of service and pay with an employer. Workers lose potential benefits they would have earned in the future, often at an accelerating rate, if the plan had not been terminated.

For example, a 15-year employee of XYZ Corp. who plans to retire in 10 years may reasonably expect to receive a pension benefits of $550 a month on retirement, as defined in the pension plan. However, as a result of the termination of the corporation's "overfunded" pension, the employee might receive a benefit of only $300 a month, since his work credits would no longer be accumulating for the purposes of that pension plan. Even if a new plan were initiated, it would treat this worker as a "new" employee, so benefits would not accrue fast enough to provide anything like the pension anticipated under the old plan.

Employers are terminating their pension funds to recover so-called "excess" assets. These are amounts which remain after all liabilities (benefits to workers) have been satisfied after the termination of the pension plan by the employer. These excess assets however, are not really excess at all but rather represent benefits which would otherwise be paid to workers but for the premature termination of the plan by the employer.

A Labor Department study of termination cases concluded that for each $100 of anticipated real pension benefits, workers can expect to lose $45, since they will be credited only with service to date as the result to these terminations. Thus, the termination of an "overfunded" plan can wreak financial havoc with workers' retirement security. Retirees' cost-of-living adjustments probably would be eliminated because such adjustments typically are provided through the plan's excess assets, money that will now go to the employer on termination of the plan.

PURPOSE AND BILL SUMMARY

It is the purpose of this bill to establish a federal policy which will insure that workers and retirees are effectively protected from the loss of their pension benefits due to overfunded plan terminations which are initiated so that employers will recover excess assets. Such a federal policy will make clear that the principle intent and purpose in establishing to pension plan and providing a tax qualified basis for the contribution and accumulation of pension assets is to provide a secure and defineable retirement income for workers and their families. The continuing trend of overfunded plan terminations represents a clear and present danger to the retirement income security of workers and retirees. To better ensure the retirement security of workers and retirees from such danger, the proposed legislation establishes a number of safeguards. The bill would:

Establish a "business necessity" test for overfunded plan terminations. If the termination does not meet the business necessity test (i.e. was not the result of bankruptcy, insolvency or other business hardship), then the bill provides that any excess assets would be ratably distributed to workers and retirees.

An excise tax of 10% would be imposed on any remaining amounts which are not distributed to workers and retirees.

If the termination meets the business necessity test, then the employer will be able to recover excess assets under certain conditions specified in the bill.

An application for an overfunded termination will be subject to a public hearing on the record to enable both the employer and plan participants to articulate their views regarding the pending termination application.

Certain restrictions will be placed on contributions of employer stock and other employer investment media contributed to a plan. Specifically, a plan will be able to invest no more than 5% in qualifying employer securities and employer stock which is contributed may not contain features of debt when contributed to the plan.

A study will be commissioned to determine whether standards for appropriate actuarial assumptions and methods should be imposed for the funding of plans.

In a conversion from a defined benefit plan to an Employee Stock Ownership Plan (ESOP), a vote must be taken among participants to determine whether a conversion will occur.

Plans which commit an overfunded termination will be prohibited from instituting a "comparable" plan for a five year period after the termination. Certain restrictions on funding and funding deficiency waivers are also imposed on successor plans.

The bill establishes a limited Plan Termination and Reversion Control Commission to administer provisions of the bill.

REVIEW OF ADMINISTRATION ACTIONS

The Reagan Administration has done little to impede or resist this rising tide of plan terminations which deprive workers of needed pension benefits. In less than five years employer pension raids have netted more than $2.7 billion for corporations. Applications to terminate overfunded pension plans worth an additional $1 billion are pending. Hundreds of thousands of workers are affected. Issuance of new "guidelines" by the Administration on asset reversion are not targeted to stop or resist pension raids. Rather, the guidelines offer new opportunities for corporate sponsors to accomplish plan terminations and will allow new and questionable techniques to be used to accomplish those raids.

Pension asset raids are not the only form of proliferating pension abuse that is growing. Increasingly, employers are contributing various forms of employer stock and other investments in lieu of cash to their pension funds. This has been particularly true in instances of corporate mergers and takeovers where stock held by the pension fund of the employer may prove to be crucial in resisting a takeover attempt. The abuse which may occur in such instances involves a loss to the plan of what the true market value of such a contribution should be and the manipulation of the pension fund to benefit the employer at the expense of the employees. The use of Employee Stock Ownership Plan's (ESOP) by employers as a device to either resist or accomplish a takeover attempt raises substantial questions under ERISA as to whether the interests of employees are well served by such actions. Moreover, restrictions on the ability of employees to vote their stock shares in ESOP's or other pension plans raise questions as to whether their interests are being adequately and appropriately represented by plan trustees.

It is now incumbent that the Congress examine these growing manifestations of employer directed assaults on the security of pension benefits to workers. As the Congress has striven to provide security for workers under Social Security, it is no less important that the Congress assure workers that their pension benefits are equally secure to provide an adequate retirement income.

The House Select Committee on Aging has conducted two hearings regarding instances where workers have lost potential retirement benefits through such overfunded terminations. The first hearing, on June 7, 1982 reviewed the situation of the terminations of the Harper and Row Publishers Pension Plan and its subsequent replacement by an Employee Stock Ownership Plan that was instituted by the management of that publisher. Present and former employees of Harper and Row testified at that time that the termination of the Harper and Row plan resulted in a loss of their retirement security and resulted in significant losses of benefits due to the inordinately high 15% interest rate which was applied to lump sum distributions to many of the workers.

A second hearing held on September 28, 1983 indicated the continuing problems associated with overfunded terminations generally and examined the status of federal law as viewed by the Department of Labor and the Internal Revenue Service on overfunded terminations. The Department of Labor testified that the decision of a plan sponsor to terminate a plan is a business decision and not a fiduciary decision covered by ERISA. The Internal Revenue Service testified that, generally, the various requirements of the Internal Revenue Code permitted the return of surplus assets after the satisfaction of all accrued benefits to participants and beneficiaries at the termination of the plan. Moreover, the Service indicated that those amounts which arose as a result of "erroneous actuarial error" were recoverable by employers under the Service's regulations. Finally, the Service testified that it was concerned about the then new possible arrangements for terminations involving so-called "spinoff terminations" and terminations reestablishment cases.

Since that testimony by the Department of Labor and Internal Revenue Service to this Committee, Robert A. G. Monks, Pension Administrator for the Department of Labor on April 4, 1984 before the Senate Labor Subcommittee, announced a new Administration position regarding overfunded terminations. This new position provides that employers may engage in spinoff and termination reestablishment terminations. A spinoff termination involves the termination of an overfunded pension plan in which the surplus and retired participants are retained in the former plan while a new and substantially comparable successor plan is created for active participants. The former plan is then terminated so that the employer may recover any excess assets. In a termination reestablishment case, the plan, which is overfunded, is terminated by the employer to recover the excess assets and a new and substantially comparable defined benefit plan is instituted to replace the former plan. Both of these methods of terminating and subsequently substituting a substantially comparable successor plan have been permitted under the Administration's implementation guidelines.

The Administration guidelines require that upon the termination of the plan, all participants and beneficiaries must be fully vested in their accrued benefits and that annuity contracts must be purchased for these individuals. Noticeably absent from these guidelines however, is any requirement to mandate that past service credits from the previous plan be credited to the successor plan for participants. While there is some argument that annuitization of vested credits provides some inflation protection for those vested benefits, clearly with respect to those plans in which the salary factor plays a principle role in determining benefits (final pay plans), the absence of any requirement to pick up past service credit in a successor plan will result, in some degree, in a diminuition in benefits that would have otherwise been realized under the previous defined benefit plan. To this degree, and more starkly, the absence of mandated past service credits in a successor plan may well invite a reduction in absolute terms of projected benefits that could have been earned under the previous plan. Moreover, for a less altruistic employer, the absence of mandated past service credit may represent an open invitation to diminish benefits in any successor plan that might be instituted by the employer.

A group of tax attorneys who had petitioned the Internal Revenue Service and the Pension Benefit Guaranty Corporation to utilize the spinoff method of termination, had provided in their submission that a "cushion" of excess assets be carried into the successor plan, ostensibly to protect against a shortfall in funding in early years and to provide some modicum of protection to the Corporation in its responsibility to the successor plan. However, the Administration did not see fit to include a requirement for a cushion within its guidelines. Rather, after some review, it was apparently felt that the annuitization of accrued benefits and the minimum funding standards would be sufficient to protect future benefit accruals and provide sufficient insulation to the Corporation with respect to the successor plan. It is problematic however, that the annuitization and minimum funding standards will provide sufficient protection particularly for the Corporation in the event that a termination of a successor plan occurs in years shortly after the creation of the successor plan. Moreover, it is also reasonable to assume that any point at which interest rates and other markets decline and affect the actuarial liabilities of the plan, that the Administration's guidelines will not provide a sufficient buffer to insure an adequate and solvent funding of the plan under those circumstances, particularly within the early years of the successor plan's creation.

An abuse noted in previous Committee hearings and recognized as an issue within the Administration guidelines has been the use of inordinately high interest rates applied to lump-sum distributions made to participants upon termination. Testimony by one witness before the Committee indicated that based upon his twelve years of service with Harper and Row Publishers he had received a lump-sum distribution of approximately $700 for his accrued benefit. Upon seeking a life annuity from an insurance carrier however, he received a quota of approximately $7,000 to secure such an annuity. The Administration has responded to this abuse by promulgating a regulation that requires an interest rate be used which approximates a market or annuity rate. While the new rate set by the Corporation will more closely align with prevailing market interest rates, such a formulation however, still falls short of the most accurate barometer of accrued benefits, the use of an annuity interest rate to determine lump-sum amounts.

The use of the spinoff and termination reestablishment techniques and certain other requirements which are embodied in the Administration guidelines raise significant questions regarding the authority under ERISA and the Code to permit such arrangements. One threshold problem involves an apparent lack of authority under the Code and Title IV of ERISA to prescribe certain conditions attending a spinoff and termination reestablishment. The use of the spinoff and termination reestablishment techniques directly undermine the minimum funding standards prescribed under Titles I and II of ERISA. No exception or limitation is provided within those provisions to permit a redefinition or reorientation of the specific requirements of funding in the manner constrained through spinoff and reestablishment terminations. Moreover, there would appear to be little or no authority within the fabric of Title IV upon which the Corporation could authorize the use of these techniques. The requirement that a plan sponsor could not engage in another termination and subsequent reestablishment of a defined benefit plan within a fifteen year period is not specifically prescribed in either the Code or Title IV of ERISA, but rather it appears to be based on the fifteen year requirement to amortize experience gains. Basically, the Administration guidelines in this area simply undercut the policy and requirements of minimum funding under ERISA making null and void the need to preserve reserves of funding to protect participants, plan sponsors and the Corporation. The policy of the guidelines in this area simply cede to the employer any surplus through plan termination with little or no recognition of the policy objectives and requirements respecting minimum funding.

A significant area without guidance in the guidelines involves tax policy and the opportunity for tax abuse through overfunded terminations. The Committee on Aging has written extensively to the Service inquiring whether, in their opinion, opportunities for tax abuse exist within the present structure of overfunded terminations which have occurred to date. The responses of the Service have largely been unedifying on this topic and the stance of the Service in this area remains unclear within the guidelines. What is clear is that an employer through the recapture of excess assets has received a tax deduction for contributions and an exemption for interest and dividends realized on plan assets. This preferred tax treatment is accorded to encourage the establishment and presumed maintenance of permanent programs of pension benefits to provide retirement income security to workers covered under these programs. An employer who is recapturing excess assets is reaping a significant tax benefit even assuming the reversion is included as income to the employer. An employer in a position to offset any tax liability with respect to the reversion through tax loss carryforwards may significantly defray or entirely eliminate any tax liability that would otherwise result from the reversion. Such a result can be analogized to other abusive tax treatments of investments which have been the concern of both the Administration and the Service in other areas. Simply, some employers may have treated their tax qualified pension plan as merely a "tax free corporate savings device". The continued failure of the Service and this Administration to recognize the implications of this abuse raise serious questions with respect to both revenue and tax policy considerations which are of long standing concern under the Code. This continued failure may well have other serious consequences if guidance is not issued to preclude further abuse.

Perhaps the single greatest failure of the Administration guidelines is that they fail to address the basic concern implicit in overfunded terminations. That is, that as a matter of public policy the failure to in any way inhibit or control overfunded terminations serves to erode the basic federal policy supporting the establishment and maintenance of pension plans, which is to provide a secure reservoir of monies to provide retirement income to workers.

Statistics released by the Administration regarding overfunded terminations indicate that since 1980 to the present over some 261 overfunded plan terminations involving reversions in excess of $1 million to employers have occurred. These overfunded terminations total approximately $2.7 billion which have been returned to corporate sponsors through overfunded terminations. The majority of these terminations have been taken not because of a financial necessity of that employer but, rather, because the employer desired to obtain a reversion to accomplish some business purpose which might include preventing or sponsoring a takeover, improving the financial statements of that employer, or using the reversion to finance the acquisition of employer stock. While some commentators may believe that the use of a reversion in this manner is not an appropriate subject for review in the context of setting policy on employee pension plans, it would seem imperative that such a review is incumbent, at this point, to ensure that appropriate safeguards are provided to assure employee benefit security. Presently, there are pending applications for overfunded terminations (involving reversions of $1 million or more) which are rapidly approaching $1 billion. The issuance of Administration guidelines, which sanction the use of spinoff and termination reestablishment techniques, would seem to provide a fertile environment to encourage further overfunded terminations. Moreover, the convenience of the termination vehicles available within the Administration guidelines provide an easier mechanism to accomplish a plan asset reversion, than those methods previously sanctioned by the agencies.

DISCUSSION OF BILL

One provision of the bill would have the effect of prohibiting the use of so-called "spinoff" and "termination reestablishment" overfunded plan terminations. As indicated earlier, a spinoff termination involves the creation of a second and comparable defined benefit plan in which the active participants of the former plan are placed. The former defined benefit plan retains only retired participants (i.e. participants who are already in pay status under the plan) and any surplus plan assets which exist in the plan. The employer typically purchases annuity contracts for retired participants and obtains a reversion of excess assets upon the termination of that former plan. Thereupon, only the active employees are retained in the subsequent successor plan which is substantially comparable to

the terminated plan. With respect to a termination reestablishment arrangement, a defined benefit plan covering employees is wholly terminated and a reversion is taken by the employer upon the termination of that plan. Subsequently, a new and substantially comparable defined benefit plan is created to cover the same group of employees.

In both instances, these arrangements present significant difficulties with compliance with the minimum funding standards of ERISA. This is with respect to both Title I and Title II which covers those requirements pertaining to the tax qualification of defined benefit programs under the Code.

Provisions of the bill will prohibit the use of spinoff and termination reestablishment arrangements. This is done with respect to the concern that these devices essentially emasculate the minimum funding standards of ERISA. Moreover, the use of such an arrangement provides a more convenient mechanism for employers to levy against their plans much like a corporate investment vehicle rather than a retirement savings trust designed to benefit employees. An examination of pre-ERISA law, and particularly regulations promulgated under the Code indicate that such devices were previously considered illegal under the Code. The concern expressed in those pre-ERISA regulations are no less cogent today than they were at the time that they were drafted. Regulations which will be drafted pursuant to section 2 will more clearly delineate the parameters of this specific prohibition.

The bill describes the various tests which must be applied concerning the distribution of excess assets upon the termination of an overfunded defined benefit pension plan. In the first instance, any residual assets which are attributable to employee contributions shall be equitably redistributed to those employees.

A rule has been provided requiring that 50% of the remaining residual assets will be distributed to retirees in pay status and 50% will be distributed to those participants who are within five years of the normal retirement age under the plan. This rule is added to provide some modicum of financial protection for those individuals who are approaching retirement and retirees who would otherwise be deprived of benefit security through an overfunded termination due to the loss of ad hoc cost-of-living adjustments. Specifically, these individuals will now, through operation of the rule, receive additional benefits which will more closely approximate promised benefits under the plan and for retirees provide needed cost-of-living protection that could have been afforded through the existence of overfunded amounts.

With respect to amounts distributed to participants and beneficiaries who are already in pay status with respect to the plan, such a distribution shall be equal to that participant's or beneficiary's unpaid constructive cost of living increase. The term "unpaid constructive cost of living increase" is defined as the amount of such participant's benefits which would be remaining unpaid, after satisfaction of the liabilities of the plan to such participant or beneficiary as if general cost-of-living increases had taken effect under the plan. This section requires that in order to have such a distribution no cost-of-living increase would have been granted to retirees within the last five years preceding the termination of the plan. The cost-of-living adjustment shall be measured based upon an annual rate equal to a measure of the Consumer Price Index as prepared by the U.S. Dept. of Labor for the appropriate period.

With respect to any participants who have not received benefits, but who are within five years of the normal retirement age under the plan as of the termination date, such participants will receive ratable distributions. Such benefits will be measured based upon the present value of benefits prior to the termination of the plan and in a manner as if the plan had not been terminated and the participant had continued to accrue additional benefits under the plan and attain the normal retirement age. In this manner, the participant will receive some additional benefits toward what he would have otherwise earned under the plan but for the premature termination of that plan. However, amounts distributable under this section are premised on the amount of available assets remaining to satisfy these benefits and, to the extent that assets are less than those needed to provide full benefits under this section, such remaining amounts will be distributed on a prorated basis.

In each instance where there is a required distribution of excess assets to a specific class, if assets prove to be insufficient to meet a full distribution to all members of that class, then an equal and prorated distribution shall be made to all members of that class so as to absorb all remaining assets for that class.

A special rule is provided such that if benefits between any class, those who are within five years of the normal retirement age under the plan and retirees who are in pay status, would fall below 75% of the benefit provided to the other class, the Commission will be granted discretion to redistribute such amounts from the other class so as to assure that benefits do not fall below the threshold of 75% between the two classes.

A plan which is in effect on the date of enactment of this law shall be considered to meet the requirements of the law if within 60 days after enactment, provisions of that plan contain provisions which have been previously described. Generally, the provisions of this subsection will constrain that all excess assets which are the result of an overfunded termination that does not meet the requirements of a business necessity termination shall be used for the satisfaction of benefit payments to retirees and participants who are within five years of retirement under the plan. It shall be the responsibility of the Commission which is created under the law to promulgate appropriate regulations to interpret and enact the provisions of this law.

An excise tax is imposed in those situations where an overfunded termination which is not the result of business necessity occurs. Specifically, a tax of 10% of the fair market value of the residual assets is imposed against the plan sponsor in such a termination. However, in those instances where the overfunded termination is a result of business necessity no assessment of tax will be made on such a termination.

With respect to an application for termination of an overfunded plan, the bill provides that a hearing on the record be held by the Commission to determine whether or not the termination should be granted. The hearing will afford plan participants, retirees, plan officials and other interested parties an opportunity to express their views and concerns regarding the application for termination of the overfunded plan. In addition, such a hearing will better enable members of the Commission to define and understand those issues pertinent to the application for termination.

Provisions of the bill make several significant changes to the manner in which employer securities are treated under ERISA. In recent years there has been a growing trend of contributions in kind (contributions of employer stock, leaseholds, limited partnerships, etc.) by employers into their pension funds. Pension and Investment Age Magazine has estimated that over one 18 month period employers contributed in excess of $1.8 billion in the form of stock or other contributions in kind. There is every reason to believe that such contributions will continue and, in fact, have escalated over the last several years.

Contributions in kind raise a number of significant questions regarding their propriety and acceptability with respect to certain goals which are sought under ERISA. One of the immediate concerns raised by a contribution in kind is the appropriate valuation of such a contribution into the pension fund. While a number of large employers have striven to assure that an appropriate value was placed on a contribution into the plan, other small and close corporations may not attempt to assure the appropriate valuation of such contributions. If the value of the contribution does not reflect the value of the required contribution to the plan, then there is a potential that the plan will become overfunded. Moreover, with respect to the deduction taken by the employer for such a contribution, if the true value is not reflected by the actual contribution then a form of tax abuse has occurred with respect to such a contribution.

Additional problems are presented in instances where the employer reserves or otherwise restricts the voting rights of stock which have been contributed to the pension fund. In such instances, management may seek to consolidate it's position through exercise of voting rights held by the plan. Such an exercise by management may be antithetical to the interests of participants covered under the plan. The Department of Labor's interpretation of relevant provisions of the prohibited transaction provisions would not appear to clearly delineate and prohibit the exercise of voting rights in such instances.

Finally, the growing use of contributions in kind as a funding medium, generally, present an opportunity for a loss of security in the manners described above. For this reason, the threshold of qualifying or real property is lowered from 10% to 5% under the bill. This will better ensure that additional protection is afforded through this lowered limitation for contributions and appropriate rules are provided to achieve the lowered threshold.

Provisions of the bill in this section provide that any qualifying employer stock contributed to a plan not be encumbered by a bond, debenture, note, certificate or any other evidence of indebtedness. Moreover, such a contribution may not be subject to any restriction on its marketability or on any voting power attached to the contribution. These restrictions will better assure that the interests of plan participants remain clear and unfettered by ancillary concerns which could be raised by management. In addition, the Secretary of Labor shall promulgate regulations which will define a method of determining the fair market value of stock or other contributions which are contributed to a pension plan.

There are provisions in the bill concerning a study which will be conducted by the Joint Board for the Enrollment of Actuaries. The bill would require that the Joint Board conduct a study to determine reasonable actuarial assumptions and methods that could be prescribed for various types of pension plans. Upon completion of this study, after a two year period, a report would be prepared and submitted to the appropriate committees of the Congress to determine whether any legislative reforms will be needed based upon the report.

This study would be undertaken in response to concerns that certain actuarial assumptions and methods that are presently applied to some pension plans are inappropriate and or produce actuarial assumptions which cannot be sufficiently justified under prevailing market conditions and reasonable actuarial projections. Moreover, there is a concern that Code provisions which grant the Internal Revenue Service authority to review the actuarial assumptions adopted by plans may not be sufficiently stringent to assure the adequate funding of plans and the appropriate use of reasonable actuarial assumptions with respect to any given plan. It would appear to be reasonable, given the absence of appropriate standards or guidelines associated with the use of actuarial assumptions and methods within the profession, to examine and make determinations with respect to whether appropriate guidance should be applied in this area. Moreover, it would appear to be appropriate to invest the Joint Board with responsibility to conduct this study, make recommendations, and if determined necessary, provide authority for the Joint Board to supervise the imposition of such appropriate standards.

With respect to Employee Stock Ownership Plans (ESOPs), provisions of the bill would require that in any transfer of assets from a terminated plan to an ESOP, such a transfer must be approved in advance in writing by the participants in the terminated plan; that the proportion of voting rights remain equal to or no less than those rights existing prior to the termination of the pension plan.

This provision is included to better assure that the interest of participants, with respect to their voting of shares in an ESOP, is adequately protected through their ability to vote those shares. Moreover, the ability of participants to vote their shares will afford some protection against the ability of management to attempt to entrench itself or otherwise act in a manner which might be adverse to the interest's of participants covered under the plan.

Certain restrictions are placed on the reestablishment or recreation of a "comparable" plan after the termination of an overfunded plan which is not based on business necessity as formulated in the bill. Specifically, a plan which is terminated without business necessity is disqualified for a period of five years from establishing a comparable plan within that period. In addition, no funding deficiency waiver may be granted to a successor plan within 10 years after the termination of a plan which was not based on business necessity. With respect to the creation of a comparable successor plan after a termination for business necessity, no funding waiver may be available within five years of the termination of the former plan. Moreover, comparable restrictions are provided with respect to any extension of the amortization period in a manner similar to the restrictions discussed above. In addition, if a comparable plan is established within five years of the termination, a faster funding period is required for such a comparable plan to better assure adequate funding for future benefits.

The bill provides for the creation of a Plan Termination and Reversion Control Commission which will have authority to regulate the various provisions of this bill. In this regard, the Commission will have the authority to exercise the respective authority of the Internal Revenue Service, Pension Benefit Guaranty Corporation and the Department of Labor for those cases which fall within the jurisdiction of the Commission. The Commission will be an independent agency within the executive branch and will consist of five members, one liaison officer to be delegated from the Department of Labor, Pension Benefit Guaranty Corporation, and the Department of Treasury. In addition, two public members will be appointed by the President from recommendations submitted from the Secretary of Labor. The essential staff of the Commission will be derived from existing staff positions from those federal agencies who are contributing liaison officers to the Commission.

CONCLUSION

This bill is introduced with the intent not only to provide substantive standards to control and inhibit overfunded terminations, but, is also offered as a basis for discussion to attempt to arrange a framework which will better assure the retirement security of workers under such terminations. I solicit comments and views on this proposed legislation.●

NATIONWIDE RECOGNITION IN VOLUNTARISM

HON. ALAN B. MOLLOHAN

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 4, 1984

● Mr. MOLLOHAN. Mr. Speaker, I would like to take this opportunity to offer congratulations to a young women who has brought additional pride to my hometown and home State of West Virginia by attaining nationwide recognition for her dedication to her community and her tireless efforts in voluntarism.

Miss Bonnie Spencer of Fairmont, WV, was named this week as the national winner of the Future Farmers of America's Achievement in Voluntarism Award. Bonnie was one of 50 finalists vying for the national honor and her success is further evidence of the loyalty of West Virginians to the ideals of hard work, compassion, and unselfish volunteerism.

The Achievement in Volunteerism award recognizes outstanding personal contributions to the FFA's Building of our American Communities (BOAC) Program. Each year, FFA chapters across the country meet with local leaders to determine community needs and develop projects and volunteer the labor to meet one or more of them.

Bonnie, a senior in high school in my hometown of Fairmont, cochaired her chapter's BOAC project to restore and develop a historic round barn into an agricultural museum—a project that reflects the realization that the lessons of the past play a key role in the progress of the future.

Bonnie's chapter also sponsored a promote progress in tourism award for community organizations. She has been very active in other FAA activities along with regular school functions.

Mr. Speaker, Bonnie Spencer epitomizes a change in young people today; they have changed from the days of hanging out at the local hamburger stand to actively volunteering to improve their local communities and improve the lives of their fellow citizens. Again, I congratulate Bonnie and wish her the best of luck in the future.●

A TRIBUTE TO THE HONORABLE BARBER CONABLE

HON. RON de LUGO

OF THE VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 3, 1984

● Mr. DE LUGO. Mr. Speaker, I would like to join with my colleagues in extending my highest regards to the distinguished gentleman from New York—The Honorable BARBER CONABLE.

BARBER CONABLE has demonstrated in his two decades of service in Congress a level of professionalism, a degree of tenacity, and a strength of convictions that has earned the respect of all who have known him and those who have had the opportunity to work with him over these many years.

BARBER has done much for my constituents in the Virgin Islands, often displaying a level of concern and caring that Members usually reserve for their own constituents. His expertise as the ranking minority member on the Ways and Means Committee will be sorely missed by myself and all others who have come to appreciate this giant of the House.

Mr. Speaker, I wish to convey to my colleague, BARBER CONABLE, my very best wishes for all of his future endeavors, knowing that his 20 years of service in the House of Representatives will always be remembered and appreciated.●

SOVIET JEWRY

HON. BARBARA B. KENNELLY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 4, 1984

● Mrs. KENNELLY. Mr. Speaker, today I am pleased to join my colleagues in the House in the 1984 congressional call to conscience vigil for

Soviet Jews. I would also like to express my thanks to this year's chairman, the Honorable LAWRENCE COUGHLIN, and to the National Conference on Soviet Jewry and the Union of Councils for Soviet Jews. Recognition is due for their continuing efforts to focus world attention on Soviet Jews who have been denied the right to emigrate from the Soviet Union or who have suffered religious or cultural persecution at the hands of the Soviet Government.

The situation for Jews in the Soviet Union has deteriorated to its worst level in over 10 years. Despite the Helsinki accords and other international human rights agreements, the number of Jews allowed to leave the Soviet Union has steadily declined. In 1983, only 1,315 Soviet Jews were granted permission to emigrate, 50 percent fewer than in 1982, and 97 percent fewer than in 1979 when 51,000 were permitted to leave. Only 652 Jews have received exit visas to date in 1984, as compared with 1,066 for the corresponding period in 1983, the year noted as having the worst emigration record in 15 years. For those Jews who must remain in the Soviet Union, religious persecution is a way of life. We must continue to challenge the Soviet Union in their assaults on human rights of these people. We must bring the attention of the world to the Kremlin who has harassed, persecuted, and oppressed thousands of Soviet citizens of Jewish faith. We have not, and will not tolerate these conditions; 400,000 Jews still remain in the Soviet Union against their will. It is impossible to even begin to describe the lack of respect for human rights and freedom they are experiencing in the Soviet Union. In recent months, officially sanctioned anti-Semitism has become a permanent characteristic of the media. The open anti-Semitism by the press, the increasing number of arrests, and the emigration figures, reveal the tragic plight and injustice suffered by Soviet Jews.

This is not the end of the story. The Soviet anti-Zionist Committee, established last year, has also launched a vigorous attack on Soviet Jews. Their propaganda has included equating Zionism with Nazism and a desire to emigrate with treason. The Soviet Government has intensified forced cultural assimilation and attempted to sever the Soviet Jewish community from any contact from abroad. Clearly the decline in emigration and the worsening human rights situation are issues deserving congressional attention.

It is our responsibility, as citizens of a free world, to employ political and social pressure to stop the tyrannical behavior of Soviet authorities. The harassment, arrests, and imprisonment of innocent Soviet Jews must cease. The gates of freedom must be unlocked and opened. We must do all we can to help the thousands of men and women trapped in the Soviet Union realize their dream of emigrating to a country where they can freely practice their religion.

I am pleased to be a part of this continued effort to focus attention on the abuses practiced by the Soviet Union. These courageous men, women, and children must hear our words of encouragement so that they will continue in their efforts to fight for freedom.●

TRIBUTE TO HON. JACK EDWARDS

HON. JOHN J. DUNCAN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 3, 1984

● Mr. DUNCAN. Mr. Speaker, the House of Representatives is losing a valuable judge of this Nation's military needs and policies because of the retirement of the Honorable JACK EDWARDS. JACK and I came to the House as freshmen in 1965. I have appreciated his counsel and goodwill over the last 20 years, and will miss his leadership in the House.

Through his work on the Defense Appropriation Subcommittee, he has been able to ensure the military readiness of our Armed Forces. He has also played a role in preventing abuse of military spending by questioning the need for some of the sophisticated high-tech weapons which prove to be too complex for actual field use. JACK presents a balanced view of our need to maintain a strong defense, but not sacrifice the basic needs of the soldiers in the trenches.

This open-minded, and intelligent assessment of our military programs is the basis of JACK's character. He represents the commonsense view that we must have a strong defense, but need not overspend to get it.

I am sure the people of the First District in Alabama will also miss JACK's good sense and character. He has served them well for 20 years, and it will be difficult to find as capable a representative. I wish JACK well as he leaves us, and thank him for his insight over the last two decades.●

TRIBUTE TO JACK EDWARDS

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 3, 1984

● Mr. BIAGGI. Mr. Speaker, it is both a personal privilege and a pleasure to take this occasion to pay tribute to a fine man and a great Member of Congress, JACK EDWARDS, who after 20 years has decided to retire.

The "gentleman from Alabama" was more than a formal term used to describe JACK EDWARDS during debate on the House floor. It was perhaps more of a literal description for JACK EDWARDS is a true gentleman from Alabama. JACK is a native son of Alabama and has represented its First Congressional District with special effectiveness during these past 2 decades.

JACK will be remembered for many accomplishments during his career but will best be remembered for his service on the House Appropriations Committee. JACK was especially effective as the ranking minority member on the Subcommittee on Defense. JACK was a staunch supporter of a strong national defense—but was always aware of the need to exercise fiscal restraint. While he and the subcommittee chairman, Mr. ADDABBO might have been on different sides of the philosophical fence—they were always able to come forth and report legislation on a bipartisan basis.

No one would quarrel for a minute the fact that being a senior member of the Appropriations Committee, no matter whether you are a Republican or Democrat, is hard work. All one has to do is review these past couple of weeks to realize that. One can and does tire from this grind and must do the right thing for themselves when they feel the need. JACK is doing right by himself with his decision to retire.

It has been a genuine pleasure to have served with and known JACK these past 15 years. We have a special bond which eminated from the fact that I was able to recruit one of my finest administrative assistants, Peter Ilchuk from JACK's staff. I have always enjoyed the opportunities I have had to be with JACK although I could not say there were ever enough of them.

As JACK prepares for his life after Congress, I hope he is able to leave knowing that he has left a lasting impression on the institution. He has shown great competence and commitment to his work. He has been a dedicated public servant and has worked especially hard for his constituents. I wish him nothing but the very best in the future and hope he will continue to visit the many friends and admirers he has in the 98th and will have in the 99th Congress. I wish JACK and his wife, Jolane much happiness in the years ahead.●

TRIBUTE TO CHRISTOPHER COLUMBUS

HON. GUY V. MOLINARI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 4, 1984

● Mr. MOLINARI. Mr. Speaker, next week we honor the Italian explorer,

Christopher Columbus, who changed the course of world history with his arrival in the West Indies on October 12, 1492. This man, born in Genoa, Italy, in 1451, possessed the imagination, spirit, and courage needed to make his dream become a reality.

Raised by humble parents, Columbus first worked with his father, who was a weaver by trade. But the young Columbus was drawn to the sea and his sailing experiences grew in length and distance. After the death of his young wife, Columbus turned his thoughts toward a discovery voyage, hoping for a route to the west by traveling east.

Obtaining the necessary financing for the voyage was not an easy task. After having been rejected by Portugal, Columbus persevered for 7 years in his request for aid before Queen Isabella of Spain finally granted his wish. Finally, on August 3, 1492, the now famous trio of ships, the *Nina, Pinta,* and *Santa Maria,* left Palos, Spain, on their voyage of discovery.

Columbus made four journeys across the Atlantic to the new land before his death in 1506. Because of his vision and faith in his dream, Columbus opened up a new territory and laid the foundation for the birth of our Nation.

All Americans, and particularly Italian Americans, should be proud of the accomplishments of this courageous man. Christopher Columbus was the first of many of Italian heritage to have a profound influence on this country. The fine culture and heritage which Italian Americans bring to this country have made a rich contribution to the success and beauty of the American way of life.

Recently, Americans of Italian descent with prominent roles in politics and other areas have received much attention. However, the tradition of Italian-elected officials is not new and has been growing over the past 20 years. Italian-Americans can be proud of the leadership roles we are playing.

Columbus Day reinforces the adventuresome qualities inherent in our country's foundation. Those qualities are still alive in the wide diversity of people who have come to this land in the years since Columbus' landing, and I trust we will continue to cherish the spirit of Christopher Columbus in the years ahead.●

TRIBUTE TO JOHN N. ERLENBORN

HON. THOMAS N. KINDNESS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, October 1, 1984

● Mr. KINDNESS. Mr. Speaker, many of our colleagues have correctly focused on our colleague JOHN ERLENBORN's work on the Education and Labor Committee, particularly the Employees Retirement Income Security Act [ERISA].

Because of the increasing involvement of the Federal Government in people's lives and the booming growth in communications technology, public access to Government information and the protection of individual privacy have become of vital interest to the Congress and the American people.

I would like to emphasize JOHN's pioneering and continuing activity with respect to the Freedom of Information Act and the Privacy Act. JOHN was present at the creation as a freshman member of the Committee on Government Operations when the Congress enacted the Freedom of Information Act in 1966. In 1972, he became ranking minority member of the Government Information Subcommittee and, from that position, helped to guide the subcommittee through a thorough review of the implementation of the Freedom of Information Act. That review led to the enactment of the 1974 amendments to the Freedom of Information Act. Since there are over 300 of us who were not then Members of the House, it is worthy of noting that those amendments were passed by large majorities in both Houses and, by similarly large majorities, passed over a Presidential veto.

At the same time, JOHN was one of the principal authors of the Privacy Act of 1974. The expertise that he gained in the course of developing and shepherding that legislation to enactment has been invaluable to his colleagues in the decade since passage of the FOIA amendments and the Privacy Act. We called upon that expertise once again in the Congress when the Department of Justice and the Office of Management and Budget proposed new rules for the handling of Freedom of Information and Privacy Act requests based upon court decisions which wrongly interpreted congressional intent. JOHN expressed his opposition to this interpretation in several ways, including cosponsorship of H.R. 4696, a bill to clarify the relationship between the Freedom of Information Act and the Privacy Act. JOHN's support for that bill was a major force behind its passage this year as an amendment to H.R. 5164, the Central Intelligence Agency Information Act.

JOHN leaves a legacy of strong, bipartisan support for the Freedom of Information Act and the Privacy Act. Those of us who remain in the Congress are challenged by that legacy to oversee the operation of these acts. JOHN's service will be tremendously missed.●

TRIBUTE TO JON McBRIDE, "CHALLENGER" PILOT

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 4, 1984

● Mr. RAHALL. Mr. Speaker, I would like to take this opportunity to share with my colleagues and the rest of the country two articles which have appeared in the newspapers in West Virginia about the pilot of the space shuttle, *Challenger.* He is Beckley, WV, native Jon McBride.

We in West Virginia are very proud of Jon, particularly those of us from my hometown of Beckley. It is very gratifying to us to see one of our own chosen to lead this historic mission. Jon McBride is the first West Virginian to travel into space and these articles from the Raleigh Register and the Charleston Gazette reflect the pride and excitement all West Virginians feel on the eve of *Challenger's* journey.

The accomplishments of Jon McBride have added to the joy and pride of West Virginians coming on the heels of the gold medals won by West Virginia's two Olympians, Ed Etzel and Mary Lou Retton.

I feel that these two articles accurately summarize these feelings of pride in West Virginia and I would like to insert them into the RECORD at this point.

FANTASY BECOMES REALITY—BECKLEY NATIVE TAKES TO SKIES IN SHUTTLE

It's certainly not uncommon for growing boys to look at a night sky and allow their fantasies to catapult them into space. It is seldom, however, that those fantasies become reality.

For Beckley native Jon McBride, however, that dream comes true Friday—unless NASA has other ideas about the launch schedule—when he pilots the space shuttle Challenger out of the atmosphere and into the longest shuttle orbit to date, 10 or 11 days.

McBride is not, however, new to the program.

During the first space shuttle flight, he was the lead chase pilot, flying up to meet the Columbia on its return and accompanying it to the ground.

During the next three flights, McBride was involved in check-out and evaluation of computer software used aboard the orbitors. The three flights following that saw him as capsule communicator, the "Voice of Houston."

Since then, he has been training for his own mission.

But how does a West Virginia boy go from the mountains of Appalachia to the weightlessness of space?

McBride recalls as a teen-ager his love of building rockets with a friend and how they would "fire those suckers out of sight."

"I always wanted to fly," he says, "but that seemed so out of reach" in these West Virginia hills.

While attending West Virginia University, a Navy recruiter stopped by one day, search-

ing for people interested in aviation. "I had a couple of hours to kill, so I took the written exam," McBride recalls. "I did so well he said I qualified for a ride in a two-seat trainer parked at the local airport."

McBride admits that was the first time he had ever been in an airplane, adding, "and I never wanted to get out of one again."

Less than a year later, McBride qualified for the Naval Aviation Cadet program. At this point he had two years of college behind him, but his education was just beginning.

He earned a degree in aeronautical engineering at the Naval Postgraduate School, and after 18 months of flight and officer training, he was commissioned an ensign and received his wings. His flight career had begun.

But prior to his arrival at Edwards, McBride had served on two aircraft carriers in the western Pacific, and flown 65 missions over Vietnam.

At Edwards, it was a different sort of "combat."

"While there (at Edwards), I flew about 30 different kinds of aircraft, from gliders and helicopters to cargo transports and commercial jets," McBride explains.

"To go out and fly a plane nobody's ever flown before, you have to be intimately familiar with all aspects of aviation, aerodynamics, flight control characteristics—you have to know what to expect and how to react."

It was a year of very intensive training, a year McBride describes as one of the stepping stones to becoming a pilot astronaut.

He next went to a Navy test and evaluation squadron, serving as maintenance officer and testing various missile weapons systems.

"The challenge for a test pilot is going up against the unknown," McBride reflects. "Maybe I gravitated towards the space program because of my mountaineer heritage—I have to look over the next mountain, and space seemed like the next horizon, the new frontier."

In 1977, McBride submitted his application to NASA and was invited to Houston for an interview.

He comments on NASA's rigorous selection process: "NASA screened 10,000 applicants, invited 200 for interviews and picked 15. I felt very honored to be among that group."

"It's great to be training for an actual flight," says McBride, who credits Navy training for so many Navy pilots being in the space program, from the first man in orbit, Alan Shephard, to the first man on the moon, Neil Armstrong.

"To land on a pitching aircraft carrier deck at night requires precise skills and a lot of concentration, he notes. "Experience like that is a real plus." McBride's experience includes 4,500 flight hours and 400 carrier landings.

His son, Rich, will graduate from the U.S. Naval Academy soon, which is an obvious source of pride. "I set goals," he says. "I try to wake up each morning with something specifically outlined to do that day, something to bring me closer to those goals."

Reflecting a bit, McBride says, "If that Navy recruiter hadn't come by that day, my dreams of flying might have remained dreams. Ahead of me is this mission, and I hope more."

As to the ultimate future of the space program, he comments, "Space stations probably won't happen on my watch"—meaning during his active flight duty—but I'd like to be in on the foundation."

Part of that foundation begins Friday at 7 a.m. for McBride when he pilots the Challenger into the longest orbit yet for a space shuttle.

On the mission, McBride will be in a group consisting of mission commander Robert Crippen and mission specialist Sally Ride. Also in the crew will be another specialist, David Leestma, and Kathryn Sullivan, who will become the first woman to walk in space.

[From the Charleston (WV) Gazette, Sept. 28, 1984]

ADVENTURESOME MCBRIDE TO GET BIGGEST THRILL YET

(By James W. Fisher)

"I knew him. I knew he had adventure on his mind," says his mother.

Next Friday, Jon McBride, the bright little boy from Beckley, W.Va., who got his start climbing trees and disappearing into the woods to "investigate," will be in for the biggest adventure of his life.

He will pilot the $1.2 billion space shuttle Challenger as it ascends from the oceanside launch pad in Cape Canaveral, Fla., for an eight-day, five-hour mission of science and exploration in space.

"It's got to be the ultimate happening, to get up there and be able to see . . . in every direction. You can see whole countries," says McBride, 41, who now lives in Houston. "That's the best part of the job, to get up there and experience that, looking down on all that."

McBride, who was born in Charleston and moved to Beckley while in grade school, will sit in the shuttle's technology-crammed flight deck next to mission commander, Bob Crippen, a three-flight veteran who oversees the entire crew.

McBride and Crippen will work with automatic systems to launch and land the massive shuttle, and keep it running smoothly in space while others among the seven-member crew release a satellite, walk in space and perform valuable Earth-study science work.

The Challenger crew is the largest yet and includes two women, veteran Sally Ride—the first American women in space—and Kathryn Sullivan, a geologist who will be the first American woman to walk in space.

With the exception of Crippen and Ride, all the crew-members are rookies. The other include Naval officer David Leestma, the second spacewalker on this mission; U.S. Navy civilian oceanographer Paul Scully-Power; and Marc Garneau, a Canadian who is that country's celebrated first astronaut.

McBride and the other rookies are in for an exhilarating experience they'll never forget, says the trim, chipper Ride.

"Just being in space is so much fun, I can't describe it," she says. "You're so excited the first couple of days you tend to look out the window instead of sleep."

Jon McBride always has been excited.

His adventuresome spirit was sparked early and he says he knew "all my life" he wanted to be an astronaut.

"He was a very adventuresome little boy, but nothing outlandish," says McBride's mother, Catherine. She and her husband, William, a retired hardware saleman, now live "out in the hills" in east Charleston.

McBride's own tales indicate something a little different.

As a child, he built rockets out of copper tubing and mixed propellant in his basement chemistry lab, he says, grinning. One day, when he was 13 or 14 years old, he burnt his hair and eyebrows with gunpowder that went off too early during a backyard experiment.

And during those years, he dropped another bombshell, his mother remembers.

"He said, 'Mom, I'm going to try for the astronaut program.' I said 'Oh Yeah' and laughed. I never thought of such a thing," she says, "That's the last thing I heard of it until he was accepted (in 1978). He tried and he made it."

His interest in piloting, however, was apparent from the very beginning, she says.

"He just liked planes. When he got old enough, he hung around at the airport. He always knew what was going on in that part of the world, airlines and airplanes," she says.

"I didn't encourage it or discourage it. That was what he wanted. I had no fear about it, although I've had fear since then."

After graduating from Beckley's Woodrow Wilson High School in 1960, McBride attended West Virginia University off and on through 1964 while working alternate semesters, doing strip mining and construction jobs.

He began Navy flight training school in 1965 at Pensacola, Fla., and eventually served as an officer and fighter pilot. He flew 64 combat missions in southeast Asia, and has made more than 400 aircraft carrier landings, the most treacherous type of flying activity.

Along the way, McBride met and married his wife Brenda and became the father of three: Richard, 22 and following his father's footsteps to Pensacola flight school; Melissa, 17; and John, 13.

His Naval career brought him three air medals, including the National Defense Medal.

But his Navy training was just the start of more years of equally rigorous NASA flight preparation that would ready him for his October flight beyond the sky and into space.

In 1984, after six years with the space agency, McBride is now as indoctrinated in the shuttle program as any of the more highly visible shuttle veterans.

His 6-foot-2, 205-pound frame has earned him the nickname "Big Jon," and he towers over the tanned and toothy Cmdr. Crippen, who is 4 inches shorter and 45 pounds lighter.

The reddish-blond McBride—who enjoys basketball, softball, racquetball and golf as well as gourmet cooking—has the All-American good looks of an athlete-turned-chamber-of-commerce-executive.

"Big Jon is very laid back, very personable. He's an excellent pilot, good stick," says Crippen. "He's a very smart man, even though he tries to hide it sometimes" behind his easygoing style.

Frank Hughes, chief of flight training at Houston's Johnson Space Center, also has seen McBride's skills firsthand.

"Let me say this: Jon is here (in the shuttle program). That takes a lot. He is very bright, very perceptive and very dedicated to what he does. He is an extremely good pilot and a very hard worker," says Hughes.

"And he's very sociable. He's been tremendously accepted. That's not true of everyone here. He fits in with the crowd very well."

McBride and the other astronauts in his 1978 class spent a year in general training about NASA and the shuttle before he became eligible in 1979 for assignment as a shuttle pilot. Since then he has worked with shuttle computer software and helped out as a ground technician during other flights.

"The toughest part of the training was the wait to be assigned to a crew," he says. That came last year, and McBride since has undergone extensive training in flight simulators and preparations for living and working in a cramped, high technology space shuttle without the benefit of gravity.

Some of the busiest weeks have been this September, when the crew members have had few days off from meetings and practice drills, which included a simulated countdown inside the shuttle on the launch pad at Kennedy Space Center.

He was at Cape Canaveral for the Aug. 30 launch of the shuttle Discovery that crackled and shook the gound as it roared into a cloudless sky.

"It was awesome. My heart was pounding," he says.

Now it is his turn.

Hours before the early morning launch, the crew will have ridden an elevator through the maze of metal and wires on the launch tower and entered the shuttle's cabin.

They will run though a complex-looking checklist of activities, communicating back and forth with the launch control center as the countdown clock ticks.

Resting on their backs looking up, Crippen and McBride will have the best seats in the house and can peer down to the ocean below. However, there'll be little time for that as the two prepare to oversee the shuttle during launch—the most critical and dangerous minutes of the entire mission.

The shuttle is so complex, in fact, they don't even fly it. Computers do.

"They are prepared to take over," says flight trainer Hughes. "If all works well, they are just watching the computer and making sure it does the right thing."

Throughout the mission, pilot McBride could take over from the commander on any aspect of the shuttle flight if the need arises. "He is a total backup for Crippen. He is a total clone," Hughes says.

Once in orbit, there are less critical operations, and Crippen and McBride will share the duties of monitoring the shuttle's complex systems and firing its maneuvering thrusters at the appropriate times.

McBride will shoot photographs, will pilot the shuttle safely away after the satellite is released from the payload bay, and will help Leestma and Sullivan prepare for their spacewalk.

During the spacewalk, the two will install a piece of equipment on a payload bay box that is part of an experiment on in-space refueling. The fuel transfer techniques learned on this mission are expected to help NASA prepare for repairing and refueling a Landsat satellite in 1986.

The crew also will launch a satellite that will study radiation and the Earth, and astronauts will run through several other Earth-study experiments. Garneau, the Canadian astronaut, will conduct experiments for that country. Scully-Power will study the oceans visually and with cameras for the Navy.

As in launch, the return to Earth is also computer-controlled. Crippen will take over the controls manually just as the shuttle approaches the 3-mile landing strip at Kennedy Space Center. This will be the second Florida landing, the rest have been at Edwards Air Force Base in California.

McBride, wearing a West Virginia tie and a homestyle grin, says he's not nervous about this mission.

In his flying career, he says, "I really feel the dangers are behind me."

The risk will bring some of the nicest rewards soon after his shuttle mission is over. McBride is scheduled to appear during WVU's homecoming in October and greet some of the West Virginians who "are behind me all the time."

For his parents, watching his space success on television will be their own personal, priceless reward.

"I want to say this: Jon McBride has worked very hard at any project he has had, at his school work, everything," his mother says. "I may have had some influence as a mother, but I give all the credit to him. He has worked hard for this."●

A GREAT LOSS TO JOURNALISM

HON. PETE WILSON

OF CALIFORNIA

IN THE SENATE OF THE UNITED STATES

Friday, October 5, 1984

● Mr. WILSON. Mr. President, I wish to take a few moments to bring to your attention a great loss to the journalism profession in my home State, California, and a great loss to all of us who appreciate a good, honest newspaperman whose overriding concern was always the good of his community, State, and country.

Norm Cherniss was one of the journalism giants in California. He died late Wednesday and is mourned by all of us who knew him and who respected him and enjoyed knowing him.

Mr. President, I wish to put into the RECORD an editorial which magnificently summarizes all that Norman Cherniss brought to this world and I think it is something we want to share with all Americans. My condolences are extended to Norm's family and his newspaper, the Riverside Press-Enterprise, which has lost a member of its family.

Mr. President I ask that the text of the editorial be printed on the RECORD.

The editorial follows:

[From the Riverside (CA) Press-Enterprise, Oct. 5, 1984]

NORMAN CHERNISS, JOURNALIST

Ordinarily, when a significant event happened at this newspaper, it was assumed that Norman Cherniss would write this editorial. He was that kind of editor, a writing editor, and when it came to editorial writing, he was better at it than anyone else hereabouts.

That is not possible now, of course. Norman A. Cherniss, executive editor of the Press-Enterprise, died Wednesday night, at age 58. It was sudden—and it wasn't. He had had heart trouble for some years, and his friends and associates were regularly telling him and each other that he ought to take care of himself.

Norman Cherniss left much to this newspaper, more than we can completely summarize or perhaps fully understand at this time. He didn't leave his own editorial obituary, though.

It can be said that he could not abide triteness, one of the most damning words in his vocabulary. And he could not stand overstatement: With him, something was never "the best"; he'd say that it "wasn't the worst."

So he might have said that he was not the worst executive the paper has ever had—he, and those around his wryly knowing he was the only executive editor the paper ever had. And he might not have objected to it being said this newspaper is diminished today. He could have said that because it's true.

The news columns today will report perhaps the first major story this newspaper has published in years in which he has not had a direct hand in reviewing. Those columns will tell of his 31 years with the Press-Enterprise, coming here as an editorial writer in 1953, serving as editor of the editorial page (a title, and a job he retained to the end) and, since 1971 as executive editor, having overall responsibility for daily news operations.

News and newspapers were the professional centers of his life—newspapers in all shapes, sizes and degrees of quality. But it was this newspaper which was his newspaper. It was his newspaper in the sense that he thought that all those who worked for the newspaper should think of it as their newspaper.

He had numerous opportunities to go elsewhere. He chose to stay in Riverside because of the newspaper to which he gave his loyalty, and because of the community and its people. He liked Riverside. Something of his Iowa background was always with him, and he traveled extensively around the country, but, without a trace of boosterism in him, he held Riverside in deep affection.

In large measure because of his associations and associates nationally, his reputation in journalism and other circles, this newspaper in Riverside has enjoyed a prominance beyond its circulation, size or area. Often, Riversiders who traveled in these circles would come home and comment on how well regarded Norman Cherniss was where they went. And each sounded as if he and she were reporting back something new. He could have held another career in academia or the law, and probably distinguished himself equally. He taught journalism at USC, UCLA and Columbia; earlier, he was a Nieman Fellow at Harvard, where he studied constitutional law. The law, and particularly the Supreme court, remained important to him. He was proud of the part he played in the court's landmark decision this year opening jury selection to the public.

A number of people will remember him in a number of ways. No doubt the most common reference will be to his wit and his professionalism—and his intelligence. There were, too, his high standards and his kindness. He was the sort of person that many people would try to be around.

For his interests were as extensive as his personal library. Sports and movies, music and quotes, history and television, food and politics. He was an interesting man.

Let him write conclusion to this editorial: It is taken from a commencement speech he gave four years ago to the School of Journalism, UC, Berkeley. "Whatever Happened to Journalism."

In that conversationalist style which was his even when writing, he tries to tell the graduates that it's not all journalism out there in the world of journalism—he cites the time he spends on a department coffee fund increasingly in arrears—and ends talking about his contemporaries and—we think—about himself.

"This is your day, of course, your commencement, but cheered as I ordinarily am by the bright-eyed, the young and coming, I think I'll break with tradition here and pay

special respect to the practitioners. I'm talking about the genuinely seasoned journalists who—normal skepticism and old and new burdens and 'distractions' notwithstanding, keep their zest, their enthusiasm for what they're doing—their profession, their craft, their calling. And though—whatever it is—they have 'been there before,' continue to perform and produce, unawed by the new challenge. 'Whatever their commitment to the tried and true, they're willing to explore the bold and the new.'

"I can explain it, I think, by borrowing again, this time from some anonymous person's description of life in the French court under one of the Louis: It may not be the best life, but it spoils you for anything else. For those who belong in it, I think that's true of journalism."●

FOUR MORE YEARS

HON. BOB TRAXLER

OF MICHICAN

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. TRAXLER. Mr. Speaker, in these early days of October 1984, in the final hours of the 98th Congress, as we all prepare to go back to our districts and face the voters, I would like to take a minute or two to reflect on what we can expect next year, when the 99th Congress of the United States convenes. I do so with all of the trepidations of anyone who tries to predict the future. The course of history can change in a single moment, and none of us knows for sure what will happen next week, let alone next year. But for a moment, I would like to make some best guesses about the next 4 years, should Ronald Reagan be re-elected, and what that will mean for America.

What can the American people expect from a second Reagan administration? Since the President's campaign is telling us very little about the future, I want to make some predictions, to outline some snapshots of the future. We all will be able to see how accurate they are a year from now.

The first event that I think we will see after the election is a continued slowdown in the economic recovery, probably to the point of a virtual halt to growth and expansion and increasing unemployment. There are already signs that this is beginning to happen. Combined with an expected rise in interest rates after the election, the administration will all of a sudden discover that their economic plan needs some adjustments.

The administration will discover, I predict, the magnitude and the threat of our huge Federal deficits. They may receive a little help from their friends in New York who set the prime interest rate, and we can all expect a national television address from the President calling for emergency action to solve this new crisis, one that no one on their side of the aisle knew about before the election.

With an expected Federal deficit of over $180 billion next year based on favorable economic assumptions, the President will call for sweeping new cuts in domestic social programs, cuts in Social Security and medicare, and probably some last resort increases in taxes.

Based on the size of the necessary cuts, and their past requests to Congress, we can expect the administration to ask for:

Dramatic cuts in funding for education programs, perhaps even elimination of guaranteed student loans for college students;

An assault upon veterans medical care programs, the closing of VA hospitals, and cutbacks in veterans disability and education benefits;

Continued attack upon Federal civilian employees, probably including a wage freeze, a hiring freeze, cutbacks in health benefits, and a dramatic assault upon their retirement programs. New Federal employees will probably face a very limited retirement program consisting of Social Security and very little else;

Sweeping cuts in farm programs, including both direct support programs and such USDA programs as cooperative extension and research activities;

Dramatic cutbacks in military retirement programs;

Elimination of many grants-in-aid to the 50 States, including Federal revenue sharing payments to local governments;

Elimination of the Small Business Administration's loan program, and plans to end the economic development activities of EPA and the Department of Housing and Urban Development;

A halt to all Federal housing programs, most of which have been almost eliminated already;

Across-the-board cutbacks in virtually every Federal domestic program, including those for environmental protection, law enforcement, scientific research and development, and aid to the poor;

Additional holes will be put in the social safety net by cuts in the food stamp program, school lunch program, and elderly feeding programs.

Will all of this be enough? There is no way. If we wholesale eliminated many of the programs I just mentioned, and cutback others by 50 percent or more, we would still be left with the largest deficits in the history of this country. So, what else will they do?

They will probably not propose additional cuts in their massive Defense buildup. The Star Wars program alone could cost this country more than all of the wars we have ever fought, and more than all of our domestic discretionary programs will cost by 1989.

So, what will they do? They will undoubtedly have to raise taxes. Oh, they will do it very cleverly. The President will go on television and actually talk about lowering tax rates. But amidst all of the rhetoric, he will actually be proposing one of the largest, but disguised, tax increases in history.

He may propose lowering tax rates through a so-called flat tax. But, beware, Mr. average working man-taxpayer. Lower rates may sound nice, but what the President won't tell you is that he will apply those rates to certain income not now taxed, such as Social Security and pension income, unemployment benefits, and the value of your employer-paid health insurance. More importantly, he will not give you deductions for many of your expenses, including State and local taxes paid, medical bills, interest on your credit cards and car loans, and the like. The bottom line will be a major tax increase of some kind for the middle class, no matter how cleverly disguised. You just watch.

But that still won't be enough to eliminate the deficit and balance the budget. What else will we see?

I predict that the administration will begin another major assault upon Social Security and medicare. Before elections, they always talk about cutting entitlement programs or transfer payments. What they are really talking about is Social Security and medicare.

Despite the fact that Social Security is solvent and will be for the next 50 years, despite the fact that the trust funds are in surplus, the administration, I predict, will ask for a freeze or cutback in the annual cost-of-living increases for retirees. You just wait and see.

In Medicare, the President will once again ask senior citizens to pay more out of their pockets for health care, reducing the Federal Government's contribution, and cutting benefits. They have done it every year up to now, and you just wait and see what they propose next year.

What I have just described is the Reagan administration's predicted response to the horrible deficit problem they will discover right after the election: dramatic cutbacks in social programs, including Social Security and medicare, and a disguised tax increase for working people. If they succeed, they will also have reduced the Federal Government to little more than a Department of Defense and a Department of the Treasury.

After dealing with the economic crisis, what else can we expect from the next 4 years of a Reagan administration?

In the area of foreign policy, I predict we will see more adventurism in Latin America, no progress in arms control or the Middle East, and dangerous continuation of the saber-rattling that has virtually killed Richard

Nixon's détente with the Soviet Union. In the next 4 years, we will be dangerously closer to a nuclear war.

On the home front, we can expect that the social agenda of the right wing will be brought to the front burner, and that the President's appointments to his Cabinet and to the Supreme Court will reflect his extremely conservative ideology. Civil rights for all Americans, including minority groups and women, will erode and, if they continue past policies, actually come under attack from the administration officials.

Finally, we will continue to see a Government that promotes the meanspirited selfishness that seems to have taken over America in the past few years. Rather than extending a helping hand to all members of the American family, rather than heading to new frontiers on a wagon train with all members of the family aboard—including the old, the weak, the infirm, minorities, women, and children—we are going to accept values where only the strongest survive. We are going to teach American young people that they will do well only by stepping on their neighbors, by casting aside anyone who gets in their way.

After 4 more years of another Reagan administration, one which will continue to appeal to the darkest side of our nature, my dear colleagues, our America will be very different than the one we know now. These changes do not require a crystal ball to predict. They are real, probable, and imminent. Do any of us have the courage to tell that to the American people in the next few weeks?●

JOINT CHIEFS OF STAFF REORGANIZATION

HON. MELVIN PRICE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. PRICE. Mr. Speaker, the structure of the Joint Chiefs of Staff was improved in several ways in provisions adopted in this year's Defense authorization bill. The significance of this action by the Congress is twofold: first, for the first time in over a quarter of a century, Congress has taken steps to modernize our Nation's highest military body; and second, the conferees agreed that the Committees on Armed Services of both the House and Senate will examine the need for further organizational changes throughout the Department of Defense in the coming year.

As Members of this body are aware, the House version of the Defense authorization bill contained many more reforms than the Senate conferees were willing to accept. Consequently, the House Armed Services Committee looks forward to cooperating with the Senate Armed Services Committee in 1985 to achieve a more far-reaching result than was possible this year.

The following editorial outlines many of the changes that are needed with respect to the structure of the Joint Chiefs of Staff. It was written by a distinguished officer, former Strategic Air Command commander, retired Gen. Russell E. Dougherty. Writing as the editor in chief and publisher of Air Force magazine, General Dougherty makes his case for reform as clearly and forcefully as possible. I commend his views to the Members of this body.

IT AIN'T BROKE—BUT IT NEEDS SOME FIXING

For a variety of reasons—including such emotional scare allegations as a Prussian-style general staff, an armed forces czar, or an irresponsible generalissimo bent on leading us to Armageddon—the operational military forces of the United States have been saddled for four decades with a clumsy command structure in the Pentagon. The fact that it has worked is a tribute to the skill and maturity of the individuals who have occupied our top military positions over the years. The fact that it has not worked well under all circumstances is evidence of our failure to recognize and correct the organizational anomalies that tend to force a separation of military authority from military responsibility.

The House of Representatives has conducted hearings and passed legislation (H.R. 3718, "Joint Chiefs of Staff Reorganization Act of 1983") putting the Chairman of the JCS in the chain of command to the combatant commanders (the CINCs of the unified and specified commands) and making him a member of the National Security Council and advisor to the President and Secretary of Defense in his own right—and on the full range of military matters affecting the posture, readiness, and employment of combatant forces. The Chairman would be given control of the Joint Staff and the opportunity to comment on three- and four-star nominees of the services. And, importantly, the House action would place the combatant CINCs under the supervision of the Chairman (who would speak for them in Washington) and would permit them to express their views on any matter the JCS had under consideration. As Congressman BILL NICHOLS of Alabama said when proposing the legislation, the unified and specified commanders "are in a position to provide insight not elsewhere available concerning the proper structuring of U.S. forces to meet national objectives."

The House has made a commendable start in proposing these corrective measures. The ball is now in the Senate's court, and its Armed Services Committee has the matter under consideration.

Though a relatively obscure issue for the American public, the legislation that results ultimately from this congressional action will be of extreme importance to the future efficiency and effectiveness of our armed forces. The full effect of the sorely needed military modernization and provisioning initiatives now underway will be diluted unless we make comparable improvements in the nation's archaic, Pentagon-level military command structure for our operational forces.

These legislative initiatives could founder on public and congressional apathy, notwithstanding their critical importance. The subject is esoteric and uninteresting to the body politic; some will charge it off as just another Potomac parlor game. Or it could be derailed by simplistic slogans, such as "If it ain't broke, don't fix it!" I submit that our current arrangements ain't broke, but they do need some legislative fixing—and the House deserves kudos for tackling the problem.

Battle lines formed soon after the House initiated its hearings on this matter in 1982. Positions hardened as to what action, if any, was needed. Motives were maligned. Counterattacks were mounted to the public pleas for change from then-retiring Chairman of the Joint Chiefs of Staff Gen. David C. Jones (with more JCS experience than any other officer), and from the then Chief of Staff of the US Army, Gen. Edward C. Meyer. We can expect repeat performances during the forthcoming Senate hearings; however, the House action may have defuzed the most explosive issues.

We must recognize that it is difficult for a uniquely democratic society such as ours, fundamentally based on a division of powers, to come to grips with the essential command requirement for a clear-cut, cohesive military command structure—one in which operational decisions, authorities, and responsibilities are not divided, attenuated, or diluted. Also, it is difficult for our complacent body politic to recognize the presence of inimical threats and the essentiality of a relevant, responsive military establishment that can fight. Yet, forces that would deter must be designed and equipped with multiple capabilities to fight effectively, in varied circumstances of combat. Their command structure at Pentagon level must be equally capable and responsive—and it must merge military authority and responsibility at this level.

In a political or moral sense, it is commendable that we, as a nation, have difficulty with these conflicting requirements; but in a military context, this difficulty has caused us to postpone needed changes in our operational planning, posturing, and command lines. The legislative changes proposed by the House would improve our situation, could save much while costing practically nothing—and would immediately enhance our worldwide military capabilities and responsiveness.

But there is at least one more key change that Congress should enact, one that will make clear the legislative intent to streamline command lines and to provide unfiltered military advice to the President and Secretary of Defense: Make the Chairman of our Joint Chiefs of Staff a five-star position!

These changes will go far toward establishing a responsible, responsive Pentagon command structure for advising the Secretary of Defense and the President—and for carrying out their orders in a manner worthy of the fine military forces of the United States.●

WHAT RECOVERY?

HON. JIM WRIGHT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. WRIGHT. Mr. Speaker, I would like to insert in the RECORD an article written by our colleague, JOHN CON-

YERS, which appeared in the Washington Post on October 3, 1984. Mr. CONYERS explores some of the economic myths and misconceptions which some are attempting to promote, and I recommend his article to my colleagues.

The article follows:

[From the Washington Post, Oct. 3, 1984]

WHAT RECOVERY?

(By John Conyers, Jr.)

Pointing to recent and largely temporary gains in the nation's leading economic indicators, the supporters of the supply-side economics, which underlie the Reagan administration economic policies, have begun to proclaim the accuracy of their prophecies. These proclamations are at best misguided and at worst, dangerous. In fact, public perceptions of an improved economy rest largely on myths, including these:

Federal spending has been reduced. Wrong. Under President Reagan, federal spending has increased 30 percent, from $657 billion to $854 billion annually, and now consumes 24 percent of the nation's GNP—a peacetime record.

There has been considerably more economic growth under the Reagan Administration. Wrong again. In the past four years, real GNP has grown at an average annual rate of 3.01 percent, hardly more than the corresponding 2.95 percent figure for the Carter years.

The tax burden has been reduced. Not really. After adjusting for inflation and increased payroll taxes, the real after-tax income for middle-income families ($15,000–$50,000) has remained essentially the same as it was four years ago. And while the tax burden has been vastly reduced for the wealthy and large corporations, it has actually increased for families making less than $10,000.

Reducing taxation of wealthy individuals and corporations was necessary to increase business investment and productivity as well as personal savings. If that was the strategy of Reagan's 1981 tax reform, it simply hasn't worked. Under the Reagan Administration, real business investment has remained relatively constant. Under the Carter administration, by contrast, investment increased approximately 18 percent. Industrial productivity has increased less than two-tenths of 1 percent since 1981, and in the critical industries such as steel and iron, productivity has dropped a whopping 23 percent. Personal savings have also plumeted to historical lows.

The unemployment picture has improved under Reagan. Still wrong. Unemployment, which has started rising again, is at 7.5 percent, the same as when Reagan took office in 1981. Five million fewer jobs have been created under Reagan than under Carter, and 500,000 more people are out of work today than when Reagan took office.

Inflation has certainly been licked. Only momentarily. Tight monetary policy (reducing monetary growth from 7.8 percent to 6.2 percent annually) reduced inflation from 9.4 percent to 4.1 percent annually but mired the country in the worst unemployment and most severe recession since the Great Depression. To pull the economy out of this mess in time for the election, the tight monetary policy was reversed and monetary growth was increased in 1983 to 9.5 percent—higher than any other time at least since World War II.

The advantage of such a strategy is that increasing monetary growth will always create temporary economic gains and give voters the impression that the economy is improving. Historically and inevitably, however, the gains are elusive and soon disappear, being replaced by higher prices. According to economist Milton Friedman, "we shall be fortunate indeed if prices are not rising in the 7 to 10 percent range by the fourth quarter of this year and in double digits by 1985."

At that time, however, there will be an added dimension to the economic picture: a staggering $200 billion federal deficit guaranteeing an overvalued dollar and chronically high interest rates. The 33 percent overvalued dollar has already produced a projected record-breaking $110 billion annual trade deficit that translates into some 3 million lost jobs—jobs that may never be recovered.

The deficit has also kept interest rates at persistently unaffordable levels for most Americans and has precipitated an almost 300 percent increase in business failures as well as unprecedented increases in mortgage delinquencies. Housing starts and industrial capacity are substantially lower today than they were in 1981, and both promise to worsen because of the deficit.

The federal deficit, coupled with loose monetary policies, necessarily means that there must be a day of reckoning. Just ask the nation's leading economists and Wall Street speculators, 70 to 80 percent of whom, according to recent polls, expect a recession soon, questioning only whether it will come now or after the election. This is the real Reagan economic record and what it promises for the future.●

LEGISLATIVE ATTEMPT TO BAN FIREARMS

HON. RON MARLENEE

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. MARLENEE. Mr. Speaker, sportsmen across America are outraged at the Democrat nominee for Vice President's history of legislative intent to ban firearms.

Three times Ms. FERRARO—a Congresswoman from the midst of New York City—has supported antisportsmen and antifirearms legislation. She has cosponsored a bill requiring a $5,000 fine or 5 year prision term for simply possessing a handgun. She opposed a cut in funding for the Bureau of Alcohol, Tobacco and Firearms, that predatory agency long a thorn in the side of firearm owners. And this session Ms. FERRARO has cosponsored legislation requiring a 21-day waiting period between purchase and delivery of a handgun. This bill would also prohibit the private sales of handguns.

Montana's firearms owners, and sportsmen throughout America, will not tolerate this oppression of their precious constitutional rights.

Confiscating sportsmen rights may play well in Queens, but in the breadbasket of taxpaying, hardworking, lawabiding America, we feel differently. We respect the rights of others and value our outdoor recreational activities.

I am grateful to the publication Pointblank for the article in their September issue on Ms. FERRARO's record on gun issues. I urge my colleagues and America's 80 million gunowners to closely examine this article and others that reveal Ms. FERRARO's record on this vital issue.

GUN BAN SPONSOR NOMINATED FOR VICE PRESIDENT

Rep. Geraldine A. Ferraro of New York, who was nominated in July for Vice-President of the United States by the Democractic National Convention in San Francisco, in 1981 co-sponsored H.R. 40 by Rep. Jonathan Bingham of New York, which would have provided for a fine of $5,000 or five years' imprisonment, or both, for the mere possession of a single handgun.

This means that, under the Ferraro-sponsored proposal, an otherwise law-abiding private citizen who owned 10 handguns could have been sentenced to 50 years in jail or fined $50,000 or both.

The bill, a comprehensive anti-handgun measure, would have prohibited the importation, manufacture, sale, purchase, transfer, receipt, possession or transportation of handguns, except by or for members of the Armed Services, law enforcement officials and, as authorized by the Treasury Department, licensed importers, manufacturers, dealers, antique collectors and pistol clubs.

Under H.R. 40, the "pistol clubs" could not have been "authorized" unless they maintained possession and control of the handguns used by their members and "effected arrangements" for the storage of the members' handguns in a facility of the local police department or other law enforcement agency.

"The public policy encompassed by this bill," said John M. Snyder, Public Affairs Director, Citizens Committtee for the Right to Keep and Bear Arms, "is similar to the public policy toward private handgun ownership followed currently in the Union of Soviet Socialist Republics and other totalitarian dictatorships where, as a matter of practical legal fact, such private handgun ownership is not tolerated. It is a cause for sorrow that so draconian an approach to public policy should have been made in the national legislature of the greatest republic in history. Shame!"

In the current Congress, Rep. Ferraro is a co-sponsor of H.R. 1543, by Rep. Peter W. Rodino, Jr. of New Jersey. The bill would ban so-called "Saturday Night Special" handguns, mandate a 21-day waiting period between the purchase and delivery of a handgun, prohibit multiple handgun sales, prohibit private handgun sales and prohibit pawnshops from selling handguns.

"H.R. 1543," said Snyder, "ignores the right to self-protection and, therefore, the right to life itself of an untold number of Americans needing handguns in a timely way and of an individually affordabe variety for the defense of life, family and property."

The Democratic Vice-Presidential nominee also co-sponsored:

H.R. 953, to prohibit the ownership of any bullet that "when fired from a handgun

with a barrel five inches or less in length, is capable of penetrating body armor."

H.R. 5835 and H.R. 5845, to ban the sale of armor-piercing bullets to private citizens.

House Concurrent Resolution 25, calling upon the government of the United Kingdom to ban the use of plastic and rubber bullets against civilian rioters.

In July 1981, Rep. Ferraro voted against a successful motion by Rep. Delbert Latta of Ohio, a CCRKBA Congressional Advisor, to cut $5 million from the budget of the Bureau of Alcohol, Tobacco and Firearms.

In 1982, Rep. Ferraro received $250 from the Handgun Control, Incorporated Political Action Committee for her successful campaign for reelection to the U.S. House of Representatives.

The Democratic Presidential nominee himself, former Vice President (under President Jimmy Carter) Walter F. Mondale, answering questions before students at Urbandale High School, Des Moines, Iowa on January 19, 1984, and talking later to reporters, stated he favors a ban on the sale, manufacture, production and importation of short-barreled handguns which, he says, "are built solely for concealment. They're not good for hunting, not good for target practice." He did not comment on their possible legitimate use for protection of life, family or property.

In 1968, as a U.S. Senator from Minnesota, Mondale voted for the Gun Control Act of 1968 as well as for other gun controls.

Mondale voted for a proposal by Sen. Joseph Tydings of Maryland to require national firearms registration and gun owner licensing in all States failing to enact such measures on their own.

Mondale also voted for a proposal by the late Sen. Henry M. Jackson of Washington which would have prohibited the interstate shipment of firearms into any State failing to enact gun registration by 1971.

He voted for a proposal by Sen. Ed Brooke of Massachusetts to establish a national registry of firearms.

In addition to nominating the Mondale-Ferraro ticket this summer, the Democratic National Convention adopted a platform which states that "we support tougher restraints on the manufacture, transportation and sale of snub-nose handguns, which have no legitimate sporting use and are used in a high percentage of violent crimes."●

REPEAL FEDERAL SUBSIDIES FOR HIDDEN POLITICAL AGENDAS

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. PHILIP M. CRANE. Mr. Speaker, a recent article in the Wall Street Journal reviews the Reagan administration's attempts to curtail Government funding of public interest activist groups. This material provides further evidence that advocacy lobbying organizations such as the Legal Services Corporation and the Natural Resources Defense Council are not only thwarting administration policies, but contravening their charters which were established by Congress.

The hidden political agendas of these groups are clearly ones which any responsible Member of Congress would term inappropriate for the expenditure of public funds. I commend this article to the attention of my colleagues.

The article follows:

[From the Wall Street Journal, Sept. 6, 1984]

SUBSIDIZING POLITICAL HIDDEN AGENDAS

(By Rael Jean Isaac and Erich Isaac)

We call them the coercive utopians. They sign up supporters by espousing such heartwarming causes as peace, clean air, safe products and social justice. But just below the surface they conceal far more controversial agendas: a slowdown of economic growth, an end to U.S.-type capitalism, a halt to much of our modern technology and unilateral U.S. disarmament.

The Carter administration was riddled with these activists, who worked in influential offices to substitute their own agenda for congressional mandates through propaganda, lawsuits and the funding of their friends in "the movement." Has the Reagan administration been successful in getting these activists under control? Not nearly successful enough.

It's difficult to overstate the role of movement activists during the Carter years. Mr. Carter came into power vowing to become the country's No. 1 consumer advocate, and as if to prove the point he hired carloads of "public-interest group" leaders and placed them in key administrative positions. Sixty consumer, environmental and public-interest activists moved immediately into subcabinet posts and key White House positions. By the end of Mr. Carter's term several hundred were installed in key slots all over Washington.

ONLY PART OF THE STORY

To take one example, Action, the federal volunteer agency, was turned over to former anti-Vietnam War activist Sam Brown. Action quickly became a political organizing and funding operation. As James Burnley, former director of the Action subsidiary called Vista under President Reagan, described Mr. Brown's tenure: "If you were a member in good stead of the New Left you were guaranteed help if you had an organization."

The money—in the hundreds of millions of dollars—that government agencies poured into political advocacy organizations was only part of the story. Government agencies themselves became political activist groups, often working to oppose the rules and principles of Congress and their own administration. The Legal Services Corporation, which was established to provide poor people with lawyers in routine civil cases, instead devoted itself to transforming "the system" through court action on its own initiative. During the Carter years the LSC's budget nearly tripled, to more than $300 million a year, and much of it was spent on political activities—including direct involvement in state initiative ballot measures—that were specifically forbidden by its congressional charter.

The Reagan administration has placed a priority on halting the flood of taxpayer funds that was flowing to political action groups and on returning federal agencies to their original mandates. The record has been mixed.

The administration's major success—though it varies sharply from agency to agency—has been in halting the government's generous funding of activist groups. Action underwent the most thorough housecleaning. Under Mr. Brown, massive amounts intended by Congress to be used to help poor people went instead to such middle-class radical programs as Tom Hayden's Laurel Springs Institute, which is a training school for political organizers, and the Youth Project, which basically funneled government funds and tax-exempt donations to nonexempt activist groups opposing nuclear power or U.S. intelligence programs and supporting Marxist guerrillas in the Third World.

After the election, applications of groups such as these were marked "Disapproved." A notation read, "Community organizing is not a priority of this administration."

Similarly the Environmental Protection Agency, which had represented a major source of funds for environmental activist organizations under Mr. Carter, stemmed the flow of grants to political activist groups. For example, the Natural Resources Defense Council—which primarily lobbies against energy and defense programs, many of which are government projects—saw its EPA grants diminish from $816,382 in January 1981 to next to nothing. The Sierra Club chapter in Seattle was actually asked in January 1981 to return $646 to EPA. These abrupt cutoffs of largesse no doubt contributed to the stridency of the attacks on the Reagan administration by environmental activists.

Other agencies were not so forceful. The Environmental Action Foundation received $179,644 from Mr. Reagan's Department of Energy in June 1981. The EAF's parent organization originated the "Dirty Dozen" and "Filthy Five" publicity campaigns against corporations and congressmen, and published Ecotage, which spot-lighted such tactics as mailing dead fish to oil company stockholders and making auto maker's products inoperable by filling gas tank with sugar.

Many of the grants from Carter administration agencies had been awarded for a two- or three-year period, by only the Agriculture Department and a few other offices terminated them. Thus the Education Department's Women's Education Equity Act Program in July 1981 awarded the second installment of a $244,000 grant for the publication of a third-grade reader. The reader was needed, the application said, because "implicit in all of the test-books surveyed is the assumption that the U.S. society is a true democracy" and this "distortion" was "serious," given the "realities of capitalism." The Education Department still has not performed a badly needed housecleaning.

Left-wing propagandists in the Carter years had a field day at the National Endowment for the Humanities and the National Endowment for the Arts. Taxpayers paid for such films as "From the Ashes . . . Nicaragua Today," written by Saul Landau of the Institute for Policy Studies, a radical-left think tank. While William Bennett, Mr. Reagan's appointee to head the NEH, has stopped the funding of such "education" enterprises, the program directors that approved and helped to develop such films are still in place at the NEH, marking time, one presumes, for a friendlier administration.

Rather than simply rely on individual agencies to halt their funding of political activities, the Reagan administration tries to impose government-wide regulations. After two versions were withdrawn, a watered-down set was put into effect this April. The regulations' effectiveness is questionable at best. As long as organizations that receive

money from the government can lobby or be involved in political activities with funds from other sources, it it impossible to determine which funds are being used for what purposes. Moreover, the penalties are so weak that they do not represent a deterrent.

There is also a major loophole that has not been blocked: It is likely that federal funds may be reaching advocacy groups via block grants, which are administered by the states with no federal monitoring. The Conservative Caucus Educational Foundation, long the watchdog of federal grants, is developing a monitoring system at the state level.

The Reagan administration has tried to rein in the Legal Services Corporation but has totally failed so far. The LSC is in effect an enormous "public interest" law firm that attracts thousands of activist lawyers, many of whom are dedicated to "changing the system" more than aiding the poor. In a recent case funded with taxpayer money, the LSC sued to prevent the Florida Department of Education from requiring high-school graduates to pass a functional literacy test. It also sued the University of California to block it from developing new agricultural technology, which it argued would replace human labor.

Mr. Reagan has repeatedly appointed new boards that would try to control the virtually independent local LSC offices. But Congress has refused to confirm the nominations. And when President Reagan tried to fold legal services into block grants, the LSC once again violated its charter and established a countrywide grass-roots lobbying compaign to preserve what one of its own leaders described as an "aggressive and political staff." The LSC won, and survived, thanks in large measure to continuing support by the American Bar Association.

EQUALLY INEFFECTIVE EFFORTS

Members of Congress have been equally ineffective in efforts to force the LSC to obey its charter. In 1981 five Senators brought suit against the LSC for violating statutory restrictions on political activity. The court ruled that the laws provided for no enforcement. In other words, if the LSC does not police itself, no one else can, short of a funding cutoff by Congress.

So, for a variety of reasons, the Reagan administration has had only a very partial success in dealing with the abuses that became rampant during the Carter years. Inhouse activists have continued to work openly against administration policies. The reason is that the "radical establishment" has continued to be able to frame the debate in its own terms, to wrap hidden agendas in a cloak of "peace" and "social justice." To halt the taxpayer support of political activists, any administration will need the strong support of the American public. This clearly is a job for "the great communicator."●

IMPORTED TOBACCO

HON. ALBERT GORE, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. GORE. Mr. Speaker, today I am introducing legislation to accomplish the modest objective of prohibiting the importation of tobacco into this country which has been grown using pesticides and other chemicals whose use has been prohibited for health reasons in the United States. I am introducing it so that this issue will be on the agenda for discussion early next year. The legislation is similar to a proposal offered by Congressman CHARLIE ROSE in the past, and he deserves a great deal of credit for initiating the proposal. The bill is designed to protect both the American farmer and the health of the American people. It will give American farmers an opportunity to compete more fairly with their foreign competitors.

In recent years, the amount of foreign tobacco imported into this country has increased dramatically. Currently, close to one-third of the tobacco in American cigarettes is imported. In 1969 the United States imported only 9 million pounds of foreign-grown tobacco. By 1983 we were importing 240,000 metric tons of tobacco annually, an increase of 1,900 percent over 1969 and 30 percent over 1982 alone. By 1983, imports of unmanufactured tobacco let into this country exceeded $743 million.

In the United States, tobacco farmers are required to abide by strict regulations which prohibit the use of a number of pesticides and other chemicals, such as Paraquat, DDT, Dieldrin, Endrin, Toxophone, and others, all of which have been banned for health reasons. Yet, we have imposed absolutely no such restrictions on tobacco being imported into the United States. In fact, no agency of the Federal Government knows or keeps track of what pesticides or other chemicals are used on tobacco being imported into the United States despite the potential health hazard posed by this problem and despite the extraordinary disadvantage this puts American farmers at in competing with their foreign counterparts.

Our failure to act harms America's tobacco farmers seriously and jeopardizes the 50 to 54 million Americans who smoke. Six hundred billion cigarettes a year are smoked by Americans, one-third of the tobacco in those cigarettes comes from foreign producers, yet we have no information about what hazardous substances contaminate that tobacco. We do not even have records of the countries from which we import and have never attempted to determine what their policies are with regard to substances banned for use in the United States. How can the American farmer compete, how can the American consumer protect him or herself, if we do not even collect this vital information?

There is serious reason for concern. Turkey, Bulgaria, Lebanon, and Zimbabwe are all large suppliers of imported tobacco leaf, yet, the only surveyever done about the use of pesticides and other chemicals used abroad, a survey conducted last year by the State Department at the request of Congressman CHARLIE ROSE, produced no information about the chemicals used in those countries. What the survey did reveal is that many countries do permit the use of pesticides banned from use in the United States. For example, tobacco from Thailand is imported into the United States, but we know that Thailand permits the use of DDT, Dieldrin, Endrin, and Paraquat, each of which has been banned in this country for health reasons. In the Phillipines, the only chemical banned is DDT. In New Zealand and Australia, DDT is used to treat the soil. Unfortunately, what we know about this issue is less than what we do not know.

This bill seeks to place foreign producers of tobacco on the same ground as our American farmers. The United States not only has a right to impose these health and safety restrictions on imported products, it has an obligation to its citizens to do so. There is no reason for imported tobacco to be exempt from these requirements. What this bill does with regard to tobacco, we already do for most products imported into the United States. For example, we require importers of foreign automobiles to meet our pollution and safety standards. Importers of all machinery and consumer products are required to comply with health and safety standards applicable to all products sold in the United States. We already also require cigarette packages imported into the United States to comply with the labeling provisions of the Federal Cigarette Labeling and Advertisting Act, 15 U.S.C. 1333, et seq. The United States is not the first country to impose the requirements I am proposing today. West Germany has gone even further by prohibiting the importation of tobacco containing any chemical or additive not on an approved list.

In conclusion, the bill represents a cautious, reasonable approach to a potentially serious problem. It is legslation that directly benefits both the American farmer and the American consumer.

H.R. 6418

Be it enacted by the Senate and House of Representatives of the United States of America assembled, that the Agricultural Adjustment Act of 1938 is amended by adding the following new section:

REGULATION OF IMPORTED TOBACCO

Section (a)(1) Notwithstanding any other provisions of law, all tobacco offered for importation into the United States shall be accompanied by a written certification by the importer, in such form as the Secretary of Agriculture may prescribe, that none of the pesticides the registration of which has been cancelled or suspended for use on tobacco in the United States under the Federal Insecticide, Fungicide, and Rodenticide Act, has been used in the production of the tobacco offered for importation into the United States.

(2) Any tobacco that is not accompanied by the certification required by paragraph (1) shall not be permitted entry into the United States. The provisions of section 1001 of Title 18, United States Code, shall be applicable with respect to any such certification made by an importer under such paragraph.

(b) The Secretary shall enforce the provisions of subsection (a) at the point of entry of tobacco offered for importation into the United States. The Secretary shall by regulation fix and collect from the importer fees and charges which shall, as nearly as practicable, cover the costs of the Secretary's services in insuring compliance with Section (a), including the administrative and supervisory costs customarily included by the Secretary in user fee calculations. The fees and charges, when collected, shall be credited to the current appropriation account that incurs the cost and shall be available without fiscal year limitation to pay the expenses of the Secretary incident to providing services under subsection (a)(1).●

STRATEGIC DEFENSE INITIATIVE: A TECHNOLOGICAL PERSPECTIVE

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mrs. LLOYD. Mr. Speaker, the first publication of issues in Science and Technology includes an excellent article on "Ballistic Missile Defense: The Technologies" by Dr. James C. Fletcher. Dr. Fletcher is a most distinguished public servant who has served as Administrator of NASA, the president of the University of Utah, and has managed his own technology company. Dr. Fletcher offers the broad perspective of roughly three decades of experience at the highest levels of Government and academe. I urge my colleagues to carefully review the following excerpts from this excellent summary article on the technological aspects of the President's strategic defense initiative [SDI] and, if at all possible, read the article in its entirety.

In March of 1983, President Reagan appealed to the scientific community to devise new methods for countering the threat of nuclear ballistic missiles. Shortly after his speech, Reagan directed that two studies be conducted, one to assess the technologies necessary for ballistic missile defense, the other to examine the policy implications of such a system.

I was asked to lead the Defensive Technologies Study. Over a period of four-and-a-half months, our team of 50 scientists and engineers reviewed the emerging technologies relevant to ballistic missile defense. We looked at infrared, laser, and radar sensors for tracking missiles high in space; at high-speed projectiles and powerful laser and particle beams for intercepting missiles minutes after they are launched. Furthermore, we examined concepts for fashioning these technologies into a robust, reliable system.

At the end of our study, we concluded that although enormous hurdles remain, the technological advances of the past two decades show great promise for ballistic missile defense. We recommended that a vigorous research and development program be pursued. The goal of that program is to demonstrate the key technologies by the early 1990s, allowing a decision to be made at that time on whether to proceed with a ballistic missile defense for the twenty-first century. Since that time, the Strategic Defense Initiative Organization has been established within the Defense Department to pursue a technology development program very similar to the one we recommended.

This article described the technologies for ballistic missile defense. It identifies the most promising approaches and system components, as well as the critical technologies—those emerging systems and capabilities that must be demonstrated before we will know whether an effective defense is feasible.

The various system concepts described in this article, as in the study on which it is based, are designed to counter a massive, full-scale Soviet attack, which, at current force levels, would involve thousands of intercontinental and submarine-launched ballistic missiles and the tens of thousands of warheads that they carry. Smaller portions of a comprehensive defense system could be deployed in different combinations to protect against limited nuclear ballistic missile attacks, as described later.

The emphasis in this defensive effort is on ballistic missiles, rather than on other offensive forces, because they are the most threatening of the strategic nuclear weapons. Given their extremely short flight time (ballistic missiles launched from the Soviet Union can reach the United States in approximately 30 minutes), these missiles provide the capability for a preemptive attack that could potentially overwhelm our strategic forces, eliminating the chance of an effective retaliatory response. By contrast, bombers and cruise missiles offer sufficient warning time for the United States to disperse, and thereby protect, its retaliatory assets. However, ballistic missiles launched from submarines a short distance off the U.S. coast could have even shorter flight times than intercontinental ballistic missiles; therefore they would have to be handled differently.

To understand the various defensive concepts under investigation, it is necessary to know something more about the typical trajectory of a ballistic missile, which consists of four phases. The estimates of flight time below are for an intercontinental ballistic missile and would vary for intermediate-range and submarine-launched ballistic missiles.

The boost phase spans the first several hundred seconds after launch, when the missile is lifted from its silo and thrust through and out of the atmosphere by its first, second, and third-stage booster rockets. Each rocket burns for about one minute, propelling the missile at increasing speeds to an altitude of about 200 kilometers, the altitude of the lowest earth-orbiting satellites. By the end of the boost phase, the missile is traveling at seven kilometers per second.

Once the third-stage booster burns out, the missile enters the post-boost phase, which lasts another several hundred seconds. The third-stage booster falls away, leaving the post-boost vehicle and its cargo, up to ten multiple independently targeted reentry vehicles, or MIRVs, each carrying a nuclear warhead directed at a separate target. Powered by a low-thrust rocket, the post-boost vehicle, or "bus," maneuvers through space, dropping off its reentry vehicles in programmed sequence and directing them on their distinct trajectories. The post-boost vehicle can also carry decoys and other penetration aids to confuse or overwhelm the defense; hundreds of these may be deployed by each booster along with each reentry vehicle.

Once released from the bus, the reentry vehicles and decoys begin their ballistic or freefall, flight, arcing up to their apogee at 1,000 kilometers or so then falling back to Earth. This 20-minute unguided ascent and descent of the reentry vehicle is known as the midcourse phase. In addition to its nuclear warhead, each reentry vehicle contains sufficient heat shielding to allow it to survive reentry through the atmosphere and a fusing system to detonate the warhead at the right time.

The terminal phase begins when the reentry vehicles, decoys, penetration aids, and debris begin to reenter Earth's upper atmosphere at an altitude of about 100 kilometers. Lightweight objects, including some decoys and debris, are slowed by atmospheric drag and then broken apart by the force of deceleration. The heavier reentry vehicles, which are "hardened" to survive the heat and deceleration, continue on their trajectories. The terminal phase ends some two minutes after it begins when the reentry vehicles, by this time a glowing red, detonate over their targets.

An effective defense against a massive Soviet ballistic missile attack will require a multilayered system capable of attacking missiles in all phases of their trajectory. Each of these multiple layers, corresponding to one of the four phases of a missile's flight, would use its own combination of sensors and weapons to track and intercept missiles as they streak through space. Each layer serves as a back-up to the previous layer: those missiles that penetrate or "leak" through the first line of defense, the boost-phase defense, will be intercepted by post-boost, midcourse, and then terminal-phase defenses. By contrast, the earlier antiballistic missile (ABM) concepts attacked oncoming missiles primarily in their reentry phase.

The fundamental premise of today's "defense-in-depth" concept is that a series of moderately effective layers can produce extremely high system effectiveness. For example, four layers that are each 70 percent effective produce an overall intercept effectiveness of greater than 99 percent. In addition, a single layer of 70 or 90 percent effectiveness is far less costly to construct than a single layer of 90 to 99.9 percent effectiveness.

Another assumption is that a multilayered defense, with its combination of different weapons and sensors, will vastly complicate the task of the attacker. Any tactic, usually called a countermeasure, that the offense might use to degrade or circumvent one defensive weapon or sensor would have little or no effect on the other elements of the defense. Indeed, certain countermeasures may actually limit the attacker's ability to penetrate other defenses. For instance a coat of heat-shielding material applied to the skin of a missile can reduce the effects of a laser attack. This shield also increases the missile's weight, however, which means it can carry fewer warheads and decoys. . . .

This section concludes with a discussion of advantages and disadvantages for the defense planner to deal with the various phases of missile flight.

II

A ballistic missile defense system must perform certain essential functions in each phase. These are surveillance, acquisition, and discrimination; pointing and tracking; target intercept and distruction; and battle management.

Surveillance and acquisition involves search and detection of any potentially threatening objects. Sensors are used to detect and attack and define its intensity, destination, and probable targets. discrimination involves processing signals and data to identify an object, and the later stages, to determine whether it is a warhead that should be intercepted or a nonthreatening decoy or booster fragment. The same sensors can also be used to determine whether a missle or reentry vehicle has been successfully destroyed or damaged.

Pointing and tracking, which is usually performed by sensors built into the defense weapons, involves taking a series of measurements of the position and velocity of the target—the booster or reentry vehicle, for instance—to determine its future trajectory. These measurements are then used to guide the interceptor to its target.

Target intercept and destruction is the use of any one of a number of weapons to intercept and destroy the booster or reentry vehicle.

Battle management encompasses all the data management, communication, and decisionmaking functions necessary to coordinate the defensive efforts.

To illustrate how ballistic missile defense might work, a hypothetical system is described below. This description is intended to convey the scope of such a system—to show, for example, how the individual components might function and how the sensors and weapons in the various layers might interact. It should not be seen as a precise blueprint. A number of diverse technologies show promise for ballistic missile defense, and others will undoubtedly be brought to light by the current research effort. At this point, it is too early to know which components will prove the most effective or how a system might be configured from them.

This is especially true for the boost and post-boost phase weapons, which pose some of the most technically challenging design questions. The candidates for boost and post-boost intercept include space-based hypervelocity guns and chemical rockets, both of which are kinetic-energy weapons that accelerate a projectile toward the target at very high speeds, and the more publicized directed-energy weapons, lasers or particle beams, that direct energy toward their targets. The hypervelocity gun is described in the following conceptual design; the chemical rocket and directed-energy weapons will be discussed in a later section. . . .

Of the technologies described in this hypothetical ballistic missile defense system, those for midcourse and terminal defense are the best understood. The generic approaches identified here—that is, space-based sensors and ground-based rockets for midcourse defense, and airborne surveillance and ground-based rockets for terminal-phase defense—would likely be sufficiently advanced by the 1990s so that a decision could be made on whether to build a defensive system, should strategic policy warrant it.

Greater uncertainty surrounds the concepts for boost/phase defense. In addition to the hypervelocity guns and smart bullets, the candidates for boost-phase intercept include space-based chemical rockets; space-based lasers; ground-based lasers relayed off of mirrors in space; "pop-up" lasers; and space-based particle beams. . . .

This section concludes with a discussion of boost-phase intercept technologies such as hypervelocity gun, space-based chemical rockets, chemical laser weapons, X-ray lasers and particle beam weapons.

III

An effective multilayered system for ballistic missile defense, such as the conceptual design described here, could not be built today. It depends upon certain technological systems and capabilities that have yet to be developed or demonstrated in these particular applications. These critical technologies, the weak links in the chain, are: weapons for boost-phase intercept; low-cost midcourse and terminal interceptors; sensors and software for tracking and discrimination; survivability techniques; and computer capability for battle management.

The Defensive Technologies Study Team proposed a long-term research and development plan to evaluate and demonstrate the technical feasibility of these key technologies. The outcome of this research will determine whether an effective ballistic missile defense is possible. The critical technologies are described below.

Boost-phase intercept. Without the ability to intercept missiles in their boost phase, a highly reliable, low-leakage defense would be exceedingly difficult to achieve. Consequently, a high priority of the new initiative is to demonstrate the directed-energy and kinetic-energy weapons for boost-phase intercept.

For directed-energy weapons, the current goal is to demonstrate the feasibility of these beam generators on a laboratory scale by the late 1980s or early 1990s, and their ability to be scaled to a weapon-level performance by the early 1990s. The generation of the beam itself is not the most critical task; indeed, technologies for beam control, optics, and pointing and tracking represent the greatest challenges. Research is under way in all of these areas.

It is also crucial to determine the lethality of these lasers and particle-beam weapons against "responsive" threats. The offense can use a number of countermeasures to withstand or evade defensive weapons. For instance, a booster can be "hardened" against laser attack: a reflective coat can deflect laser light and a heat-shielding material can provide some protection against damaging laser energy. Research is under way to determine the minimum energy needed to penetrate these shields or to overcome other offensive countermeasures.

"Fast-burn" booster rockets might also be used to evade booster-phase weapons. These are rockets that burn out in 100 seconds or less. Equipped with fast-burn rockets, a missile can complete most of the boost phase within the atmosphere. This complicates the task for both directed-energy and kinetic-energy weapons: given the short engagement time, additional interceptors might be necessary to destroy the same number of warheads. In addition, it would make the missiles largely invulnerable to certain types of boost-phase weapons, such as neutral particle beams, that cannot penetrate the atmosphere. Several beam weapons that have the potential for penetrating the atmosphere to intercept even fast-burn rockets are being investigated.

For the kinetic-energy weapons, research is focusing on the development of space-based hypervelocity guns, interceptor rockets, and homing projectiles. Key issues include systems for fire control, guidance, and space-based energy supply.

Midcourse and terminal intercept. The issue is not whether these interceptors—ground-based chemical rockets carrying homing projectiles—can be designed, but whether the cost can be kept relatively low. The goal is to design midcourse and terminal interceptors inexpensive enough to permit an attack on all threatening objects that cannot be discriminated—in other words, on decoys as well as warheads. Cost depends on the size of the rocket: the smaller it is, the less expensive to build and power.

Discrimination and tracking. Unless thousands of objects can be tracked simultaneously and active warheads can be discriminated from destroyed warheads, decoys, and debris, the attacker can saturate the defensive system by increasing the number of warheads and decoys. Discrimination and tracking in boost phase is relatively straightforward, as the booster flame is easy to detect and the number of targets is relatively small. Discrimination in the midcourse and terminal phases will depend on advances in both sensing technologies and computer software. The technology for sensing is quite complex. The research and development program calls for work on infrared sensors, laser sensors, space-based radar, and imaging tecniques, as well as the requisites software capabilities.

This section concludes with a discussion of Survivability, Battle Management, and the challenges facing the critical technology development for BMD systems.

IV

The technological challenges of strategic defense are great but not insurmountable. In the Defensive Technologies Study, we took an optimistic view of the emerging technologies and concluded that "a robust, multitered ballistic missile [defense] system can eventually be made to work." We also realized that "the ultimate utility, effectiveness, cost, complexity, and degree of technical risk in this system will depend not only on the technology itself, but also on the extent to which the Soviet Union either agrees to mutual defense arrangements or offense limitations." For instance, if the Soviet Union agreed to reduce its force of intercontinental ballistic missiles, then an effective missile defense would be less expensive and would pose fewer technical challenges.

Although the complete, four-phase defense probably will not be feasible until after the year 2000, it may be possible to begin deploying portions of the system in the late 1990s, should Congress and the president decide to do so. The technologies for terminal and midcourse defense are already relatively well understood. Indeed, it should be possible by the end of the decade to demonstrate some of the components for these defenses, including a space-based system for acquisition, pointing, and tracking; a megawatt-class, ground-base laser weapon operating at the visible light wavelength; an airborne sensing system; and a high-speed, non-nuclear interceptor to function within the atmosphere. . . .

There has been much confusion and public debate over the goals of the current Strategic Defense Initiative—whether it is a more limited defense of our strategic forces or a near-perfect population defense. The Defensive Technologies Study Team concluded that, in fact, the two goals are not contradictory. The new program has as its

near-term goal the development of technologies for defense of our strategic forces, which would include, among other things, silos, submarine bases, air defenses, intelligence facilities, military bases, factories, and communication and power systems. However, the same area defense technologies for protecting large military installations can also be used to protect cities, and the ultimate goal of the new program is to develop the technical option to deploy a thoroughly reliable population defense for both the United States and its allies.

V

Since this new ballistic missile defense effort was first announced, it has been the subject of much public debate. I would like to address some of the misconceptions about this program and the technologies under development.

The public discussion of defensive technologies has tended to focus on the more exotic weapons, such as lasers and particle beams. In fact, only about 25 percent of the current research budget is devoted to directed-energy weapons. Less than half of the program is concerned with weapons at all; the largest single area is surveillance and tracking research. Although the precise architecture of a future ballistic missile defense system cannot be predicted at this time, it is entirely possible that such a system will not include any directed-energy weapons, relying instead on kinetic-energy weapons. Moreover, if the two superpowers agree to limitations of their offensive forces, then an effective defense might be constructed without any weapons in space.

Another misconception is that offensive countermeasures are so easy, cheap, and effective that no defensive system can be effective. This argument seems to rest on three principal assumptions: first, that simple proliferation of weapons and decoys is a cost-effective method of overwhelming any defense; second, that the Soviets can build a new generation of offensive missiles capable of evading boost-phase defenses; and third, that the space-based assets of the system are inherently vulnerable.

All of these assumptions were addressed early in the Defensive Technologies Study. In evaluating the feasibility of ballistic missile defense—and in defining performance goals for various components of the system—we assumed that the Soviet Union would expand its offensive force at the maximum pace possible. That would mean that within our lifetimes, the Soviet offensive force could grow to two or three times its present size. . . .

This section includes a discussion of possible offensive counter-measures which might be adopted by the Soviets in response to SDI deployment.

Clearly, the potential threat of fast-burn boosters and all other countermeasures must be fully assessed. That assessment is one of the primary objectives of the current research and development program.

Another issue of concern is whether command and control for ballistic missile defense can be structured to allow national command authorities (the president and designated chain of command) to activate the system—especially the boost-phase system, which must respond minutes after a launch is detected. Extensive research will be required in this area. Nonetheless, it is by no means clear that a multilayered defense cannot be structured to allow human control.

An offensive strike would most likely be preceded by a crisis of some kind. The system can be structured so that it can be activated in stages during a crisis, much as our military forces are now activated. When the crisis reached a certain level, the president might choose to activate the terminal defenses. This would provide full presidential control of any weapons deployment. As the crisis intensified, the president might choose to activate the midcourse and ultimately the boost-phase defenses. These steps would be taken with the full knowledge of the opponent. The boost-phase defenses could be set to hold fire until a massive attack was unambiguously confirmed. Any lower intensity attacks could be handled by the midcourse and terminal defenses alone. Furthermore, even an "automatic" response of a boost-phase defense could be structured to allow the president to halt its activation at any point.

Clearly, there are many uncertainties as the United States embarks on its strategic defense effort. We could not now with confidence construct effective ballistic missile defenses. Conversely, we have not been presented with any compelling technical reasons that show that such defenses are not possible. The technical issues surrounding the development of effective defenses have many possible solutions and should not at this stage be the primary focus of the debate.

Rather, the debate should center on the implications of ballistic missile defense for our strategic policy. For the past two decades, the United States has relied exclusively on offensive weapons and the threat of nuclear retaliation as a deterrent to nuclear war. The underlying rationale of this doctrine is that neither superpower is likely to initiate a nuclear war if vulnerable to attack by the surviving strategic forces of the other.

Defensive technologies offer new opportunities for strengthening deterrence and new possibilities for arms limitations. Intermediate defense capabilities, such as a one- or two-phase defense, would reduce the Soviets' confidence in their ability to destroy key military targets, thereby increasing deterrence against a nuclear attack. Fully effective defenses would significantly reduce the utility of a major Soviet preemptive strike—and of ballistic missiles themselves. And by reducing the intrinsic value of ballistic missiles, defensive technologies could provide a strong inducement for reaching agreements to reduce these nuclear weapons.

Work during the past few years has shown that the technological promise is rich, and that effective defenses may indeed be possible. Moreover, the increased Soviet offensive and defensive threat offers a powerful motive for reassessing the role of ballistic missile defense in U.S. deterrent policy. The Soviets now are upgrading the world's only operational ballistic missile defense system, currently in place around Moscow. And they have been pursuing with undeniable vigor research on directed-energy weapons for a more advanced system. Unilateral deployment of such a system would have grave consequences for the security of the United States and its allies. At a minimum, we must pursue a comprehensive technology program to ensure that we are not caught unprepared by a Soviet deployment of advanced ballistic missile defenses.

Moreover, I believe that we have a strong moral imperative to base our strategic relationships on effective defenses, rather than on the threat of inflicting horrendous damage on the attacker. I believe that effective defenses, when deployed by both the United States and the Soviet Union, could lead to a safer world, a world with the possibility for nuclear disarmament. The current technology program can provide the option for this transition to strategic defense. The final decision, however, will be made by the American people.●

GOVERNMENT RESEARCH AND DEVELOPMENT PATENT POLICY

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. FUQUA. Mr. Speaker, I rise in support of title V, "Government Research and Development Patent Policy," much of which originated in H.R. 5003 as reported from the Committee on Science and Technology to the House, on August 8 with bipartisan support. I would like to assure my colleagues that almost every provision contained in this title was considered and favorably approved by the committee I chair. I would refer my colleagues to House Report 98-983, part I for an explanation of these provisions. Those provisions, added by the Senate, tend to be minor in comparision and clarifying in nature.

I am certain the gentleman from Wisconsin, [Mr. KASTENMEIER], recalls our colloquy of November 21, 1980, upon the passage of Public Law 96-517 where we agreed to try to achieve a more uniform Government patent policy. I consider this bill to be another major step forward toward that objective.

Title V is a series of amendments to Public Law 96-517 which established a uniform Government patent policy for inventions arising under contracts between the Government and small business and nonprofit organizations including universities. Public Law 96-517 which was passed because of the leadership of BOB KASTENMEIER was a landmark bill replacing a wide variety of agency practices with a uniform Governmentwide policy of giving those rights to the contractor except in specified situations. This approach has worked well and has contributed to the explosion of new products and companies at and around university communities. We now have the benefit of over 3 years of experience using these provisions and the desirability of certain improvements has become obvious. I would like to point out to my colleagues that with the exception of Government-owned, contractor-operated [GOCO] facilities this legislation does not extend beyond the limits of Public Law 96-517. Cleary, there is much remaining work to be done on the broader public policy considerations of Governmentwide patent policy, but such deliberations will have

to wait until the 99th Congress. Since there is a qualitative difference between major Government contracts with larger businesses and smaller grants and cooperative agreements with universities and nonprofit organizations, it should not be assumed that the specific provisions of Public Law 96-517 will be those that are applied to larger businesses in next Congress' legislation. The section-by-section analysis which follows compares the pertinent provisions of H.R. 5003 with the Senate-passed language.

I would like to thank the gentleman from Wisconsin, [Mr. KASTENMEIER], for his critical leadership in working with me to assure that the House provisions which assist the university research community were added to the Senate bill. These provisions involving disposition of intellectual property rights in educational awards and of royalties from inventions under university and nonprofit GOCO contracts solve a number of longstanding problems in the university community.

In closing, I would like to commend the gentleman from Pennsylvania [Mr. WALGREN] and the gentleman from New Hampshire [Mr. GREGG] for their hard work in developing this legislation at the subcommittee level. Without their bipartisan efforts, it is unlikely that we would be able to vote on this legislation today.

H.R. 5003 as reported	Senate-passed title V	Comments
(1) Sec. 402(15) (B) and (C)	Sec. 501(1) amd (2)	These two provisions are identical in both bills except for a reference in the House version to sexually propagated variety of plants. These words were added as a clarifying amendment; therefore, the omission of the reference in the Senate version does not change the scope of this definition.
(2) Sec. 402(15) (D)	Sec. 501(3)	This section originated in H.R. 5003 as reported. A contractor which is subject to the control of a foreign government is one in which at least 50 percent of the voting stock is controlled by that government. The new code Section 202(a)(iv) is identical to the wording of Sec. 301(a)(5) of H.R. 5003 which is described on pages 18 and 19 of House Report 98-983 Part I. While those laboratories such as Oak Ridge National Laboratory which are run for the government by large companies are not formally covered by this section, it is hoped that the Department of Energy, using its Federal Non-nuclear Act authority will develop a standard patent policy consistent with this Title for all its GOCO facilities.
(3) Sec. 402(15) (E)	Sec. 501(4)	There is no provision in H.R. 5003 comparable to code Sec. 202(b)(1) in the Senate version. Code Sec. 202(b)(2) of the Senate version is identical to H.R. 5003's code sec. 202(b)(5) except that the authority to act under this section rested with the Director of OMB rather than with his subordinate, the Administrator of OFPP; since the Director of OMB presumably would have delegated this authority to OFPP, the change is not viewed as signficant. The new code sec. 202(b)(4) originated in H.R. 5003 as reported. Its intent is to give an aggrieved contractor the right to an immediate appeal of a contractual decision not to grant him patent rights rather than forcing the contractor to wait to appeal such a decision until an invention arises under the contract. The work "provisions" was substituted for "policies and objectives" in the Senate version to avoid any possibility of tying this section to a set of findings and purposes.
(4) Sec. 402(15) (F)	Sec. 501(5)	Paragraphs 202(c)(1) through (3) are virtually identical in both versions. Their intent is to codify existing regulations. Paragraph (4) of the Senate version has no comparable House provision, although its intent is clearly consistent with the House's intent.
(5) Sec. 402(15) (G)	Sec. 501(6)	This provision is identical in both bills and strengthens Freedom of Information Act protections for a contractor subjected to code Sec. 203's march-in procedures.
(6) Sec. 402(15) (H) and (I)	Sec. 501(7) and (8)	The House struck code sec. 202(c)(7)(A) while the Senate struck the second half of this provision; the result of the Senate's action is to retain a requirement that a nonprofit organization get agency approval before assigning title to an invention to a commercial invention management firm while at the same time to allow all such firms to be treated on an equal basis. Both bills strike code paragraph (B) which places limits on the ability of contractors to grant exclusive licenses. The Senate moved what was code sec. 202(c)(9) in the House version to code sec. 202(c)(7)(D) and changed slightly the formula for distribution of royalty revenues found in that code section. This important section, originated in the House version and is explained in the first paragraph of House Report 98-983, part I, page 21. The formula for distribution of royalty revenues, should not be applied to contracts for third party sponsored research at GOCOs between operators of GOCO facilities and private sector persons where the private sector is paying for the research through collaborative arrangements or work for others agreements. Such arrangements should be treated as an agreement between two private entities and patent rights should be assigned as provided in that agreement. GOCO subcontracts, funded by the Government are covered by the section.
(7) Sec. 402(15) (J)	Sec. 501(9)	The Senate-passed version's new code sec. 203(2) is taken almost in its entirety from H.R. 5003 as reported. It includes the administrative appeals procedure added by the House Science and Technology Committee as an alternative to judicial review. It also contains the provision from H.R. 5003 which requires an agency determination to be held in abeyance pending the exhaustion of appeals; this will prevent the agency from granting third parties licenses or disseminating the technical information to the public in a manner that could make a victory on appeal by the contractor meaningless. The one substantive Senate change was to require judicial review to be on the administrative record.
(8) Sec. 402(15) (L) (code sec. 206)	Sec. 501(10)	The Senate-passed version authorizes the Secretary of Commerce, subject to public comment, to issue implementating regulations for this title. H.R. 5003, as reported, had the Secretary of Commerce initiating these regulations with the Director of the Office of Management and Budget promulgating after full consideration of agency and public comment. The Commerce Department is expected to consult with affected agencies in the regulation-drafting process.
(9) Sec. 202	Sec. 501(11)	The Senate moved three discretionary functions granted to the Secretary of Commerce by section 202 of H.R. 5003 as reported, to a new code section 207(B). These functions are described on page 17 of House Report 98-983, part I. Commerce's role in each case is advisory, not managerial, and it is anticipated that most activities will be performed at the request of the client agency.
(10) No House provision	Sec. 501(12)	The Senate has substituted the Secretary of Commerce for the Administrator of General Services as the promulgator of the terms and conditions under which any federally owned invention may be licensed on a nonexclusive, partially exclusive, or exclusive basis. The Secretary is expected to consult with affected agencies in the drafting of such regulations and to promulgate only after opportunity for full consideration of public comments.
(11) No House provision	Sec. 501(13)	The Senate extended the applicability of code section 202(c)(4) (retention of nonexclusive license by the Government) and code section 203 (march-in rights and related appeals) to all contractors.
(12) Sec. 402(15) (L) (code sec. 213)	Sec. 501(14) and (15)	The Senate redesignated as code sec. 212, the new code sec. 213 from H.R. 5003 as reported. This section is described on pages 24 and 25 of House Report 98-983, part I. This provision prohibits the practice of Government retention of patent rights arising under financial aid agreements; these clauses have made it difficult for students receiving Federal financial aid also to work on privately funded university research projects.

NEWS REPORTING IN CENTRAL AMERICA

HON. RON MARLENEE

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. MARLENEE. Mr. Speaker, I would like to have printed in the CONGRESSIONAL RECORD a copy of an article in Monday's Washington Times. I believe this article strikes at the heart of a very important point concerning the situation in Central America and Nicaragua. The point—there is bias and parochialism in news reporting on what is happening in Central America. What happens in this region of the world is very important and must not be subject to the personal bias of those who report to the American public. When we lose fairness and accuracy in journalism, the American public is cheated and I hope our citizens will be sensitive to the existence of such reporting. Only by doing so can they find the truth, which is so important in the Central American case.

[From the Washington Times, Oct. 1, 1984]

THE POST'S ROSE-COLORED GLASSES AND ITS VIEW OF THE SANDINISTAS

(By Roger Fontaine and Ted Agres)

Adriana Guillen is a Nicaraguan journalist who eagerly joined the Sandinista revolution. Her growing disillusionment with the revolution became anger and then rage over the repression of trade unions and restrictions on the press.

She quit the revolution because, she said, the Sandinistas broke their promises that they would bring social justice and democracy to Nicaragua. She became a reporter for La Prensa, the only opposition newspaper in Nicaragua.

In 1981, as she recalls it, she talked to Karen De Young, who was The Washington

Post correspondent in Central America, about the government's restrictions on traditional liberties. She was astonished by Miss De Young's reaction.

Miss De Young replied, she says, that such problems as trade-union repression and assaults on the press "are natural products of a revolutionary process."

"I consider the Sandinista revolution a very important one, and I don't want to harm this revolution with anything," Miss Guillen quoted Miss De Young as saying.

Miss De Young, who is now The Post's foreign editor, says she did not say that. "I neither said that nor does it reflect my views as, I believe, any objective reading of our extensive coverage of Nicaragua demonstrates."

Miss Guillen, told of the denial, insists her quotations of Karen De Young are accurate.

Confusion, contradiction and occasional mischief are the givens of The Post's coverage of foreign affairs, from Central America to the Middle East. Critics, for example, cite elements of The Post's reporting of the U.S. operation in Grenada as indicative of the kind of approach the paper often takes.

On Oct. 29, 1983, Post reporter Loren Jenkins wrote a front-page story reviewing the weapons warehouses uncovered by U.S. forces after the rescue operation on the island. President Reagan had described the warehouses as being "stacked almost to the ceiling" with weapons and ammunition.

But Mr. Jenkins devoted most of his article to refuting those assertions. He claimed that the warehouses were not filled with weapons. And of those weapons that were found, many "were antiquated, of little value to a modern army or guerrilla force," he wrote.

Less than two months later the administration released, a preliminary report on Grenada which detailed large inventory lists of weapons delivered by the Soviet Union and other communist countries. These included about 130 anti-aircraft and field guns some 10,000 assault rifles, numerous rocket launchers, land mines, machine guns and other gear.

The Post did print a story about the preliminary report when it was released though without reference to the earlier Jenkins story. But the initial impression—and perhaps the lasting impression—was conveyed at the height of interest and politicial passion.

But the Post's reporting—"misreporting," in the view of the critics—in Central America arouses much of the passion, and this article focuses on Post reporting on Nicaragua. For Nicaragua, in a sense, is both the genesis and representative of the turmoil engulfing Central America.

The "objective reading" of The Post's Nicaragua coverage that Miss De Young invites has, in fact, already been done.

In March 1982, Shirley Christian, a Pulitzer Prize-winning reporter for the Miami Herald, who is on leave to write a book, was commissioned by the Washington Journalism Review to analyze this coverage. She found the Post's coverage to be seriously flawed.

In a report entitled, "Covering the Sandinistas: The Foregone Conclusions of the Fourth Estate," Miss Christian examined 244 stories published in The Post during 19 months of Sandinista uprisings from January 1978 to July 1979.

She found a number of examples of the Post's reporting that was inaccurate. She concluded that:

The Post demonstrated a tendency to "stress the reassuring impression that the Sandinista movement had been taken over in recent years by non-Marxists . . ."

Miss Christian notes that Tomas Borge Martinez, a Sandinista leader and an unquestioned Marxist who would become the powerful minister of the interior was barely mentioned in the soft reporting on Sandinista ideology.

Indeed, in one of those rare mentions, Miss De Young cited political analysts who described Mr. Borge as a "pragmatist" who as interior minister "will be in a better position to keep mavericks from his faction in line."

Regarding human rights abuses, Miss Christian notes that The Washington Post and Miss De Young repeatedly cited examples of National Guard atrocities in vivid detail, but "there were almost no reports . . . of unjustified or noncombat brutality by Sandinista forces against government supporters."

Only a few brief mentions of "government informers" being shot were recorded without any followup investigation. Similar reports of Sandinista reprisals after the capture of the city of Leon were given similar treatment, according to Miss Christian.

In articles printed in October 1978, Karen De Young reported from a Sandinista training camp that "Sandinista political leaders interviewed here recently denied they are Marxists. They denied that they want Cuban-style communism in Nicaragua. Instead, they said, they are fighting for a 'new Nicaragua' that will be a 'pluralistic democracy' built on the ashes of the destroyed Somoza dictatorship."

Miss Christian also faulted the New York Times and CBS News for similar excesses and biases during the same time period.

She concluded that the reporters were "obsessed" with the "guilt-trip" of Vietnam and thus delighted to "jump on the Sandinistas' bandwagon" and refused to see the telltale signs of impending betrayal and disaster.

Miss De Young, responding to the charges in a letter to the Washington Journalism Review in May 1982, said she had not held the "romantic view" of the Sandinistas ascribed to her. She said she had not, as charged, glossed over the "Cuban-inspired origins of the Sandinistas."

With 17 full-time correspondents assigned to capitals and cities around the world, backed up by scores of part-time correspondents or "stringers," The Washington Post has one of the largest overseas reporting staffs of any U.S. newspaper.

A Post story, even if inaccurate, is often enough to encourage a congressman to schedule hearings or start a debate. Administration officials complain that impressionable staffers can spend the first two or three hours each day discussing articles they read in The Post that morning.

The complaint is rarely with the quantity of news The Post publishes—its long, repetitious articles are cited in the industry as textbook examples of undisciplined, blowsy prose. Complaints usually bear on quality. Critics, both friendly and hostile, note that "news" stories often convey a particular point of view or political expression, sometimes bluntly but often with an attempt at subtlety.

Officials and congressional staff members often have difficulty citing specific examples of such bias. They say, instead, that they have a "general feeling" that the Post is skewing the news one way or the other.

Moreover, The Post suffers from schizophrenia as well; its news stories can, on occasion, be more opinionated than its editorials. Says the editor of a newspaper in the Midwest: "The Post may be the only newspaper in America with an editorial policy for the editorial page and an editorial policy for Page One, and often the two editorial policies are in opposition."

In an interview with The Washington Times, Shirley Christian noted that The Post, more so than other newspapers, was "swept up in whatever the prevailing ideas or concerns were on Capitol Hill."

"The Post is much more vulnerable to those influences than other newspapers, and that gets translated in what they cover in Nicaragua or elsewhere," she says.

"The Post's reporting in the field . . . reflected or was in response to concerns raised on Capitol Hill and by the Washington Office on Latin America," Miss Christian says. WOLA is a human rights organization that frequently attacks governments supported by the United States.

In a second conversation with Karen De Young a year ago, Adriana Guillen, the Nicaraguan journalist, told her that she was the press representative in Washington for the embattled Misura Indians and offered herself as a contact for that issue.

Miss De Young replied according to Miss Guillen that the matter was a difficult one for The Post. "There is a propaganda war going on. So we don't know where the truth is" Miss De Young said. Asked over the weekend about this remark, Miss De Young said she did not remember the specific conversation, but that such a statement is "not inconsistent" with her views.

Her reluctance to write about the question did not prevent The Post from reporting in December 1983 about the flight of 2,000 Miskito men, women and children from a Sandinista concentration camp to the relative safety of neighboring Honduras. They were accompanied by Bishop Salvator Schlaefer.

The Post ran its initial frontpage story, written in Washington on December 22. It was an account that emphasized the Sandinista version of events, which claimed the bishop had been kidnapped and killed by "Miskito Indian counterrevolutionaires." The bishop turned up, very much alive.

Recently, Stephen Rosenfeld, a Post columnist and deputy editorial page editor, wrote an article titled "Moment of Truth in Nicaragua." In it, he cited a critique of Sandinista election practices by analyst Robert Leiken which had appeared in the New Republic. The Leiken article included a recounting of mob attacks on democractic opposition rallies in the Nicaraguan city of Chinandega in July.

Mr. Rosenfeld could not cite his own paper's coverage of those government-inspired riots. The Post never reported them.

In an article that appeared in The Post nine days after the riots, staff correspondent Robert J. McCartney omitted any mention of them.

Mr. McCartney's dispatch also did not mention that five days before that speech that attracted "only 900" participants, Sandinista mobs had violently broken up similar rallies in Matagalpa and Chinandega. He gave no hint of Sandinista intimidation as the cause of the opposition's lack of public support. Instead, "political observers," whom he did not identify, were quoted as saying the Sandinistas "would win easily, even without the boycott."

Only last month, when Sandinista-directed mobs attacked Arturo Cruz, leader of the democratic opposition, and his supporters

on four different occasions in four different cities. The Post carried an account of only one of them.

What others described as a particularly vicious mob of 2,000 Sandinista "youths," armed with steel clubs and machetes, surrounded the meeting place of Mr. Cruz and his supporters in the city of Leon. The Post ran only a brief Reuters dispatch buried deeply on page 39, even though a more detailed and more accurate Associated Press dispatch was available.

The story ran under a misleading headline, "Nicaraguan Police Aid Opposition Leader". The article did not say that the police "protection" arrived three hours after Mr. Cruz was beaten by the thugs.

Miss De Young, in a written response to questions raised by this newspaper, asserted that the Post "has given more coverage to Mr. Cruz . . . than any other American newspaper."

"To my knowledge, he has not complained about our coverage, which I believe to be fair and comprehensive," she said.

But he had complained—if not to Miss De Young, or her boss, Executive Editor Benjamin C. Bradlee to the editor of the editorial page.

On Sept. 28, The Post's opinion page carried a lenthy article by Mr. Cruz. In it, he took The Post to task for misrepresenting his views. The Post, he said, was guilty of repeating Sandinista charges that he is "'acting under orders from Washington . . . [or] working for the CIA' (Post, July 30)."

Nor was this the first time Mr. Cruz had complained about the Post. In a front-page story in La Prensa published July 31, Mr. Cruz "catehorically challenged" The Washington Post's assertions that his party had attempted to "embarrass the Sandinistas" and to sabotage the elections.

"The Washington Post had not sufficiently investigated the political events in Nicaragua," Mr. Cruz charged in that same story.

The Reuters dispatch on the Nicaragua incident also did not mention that the demonstrators, who were simply identified as members of "a Sandinista youth organization," were driven into the city of Leon in government-owned vehicles. Moreover, according to a U.S. Embassy report from Managua, Sandinista defense committee members and workers later joined the mob.

The embassy report obtained by the Times, is based on eyewitness accounts. It noted that while the Leon opposition meeting was hurriedly organized and the location never publicly announced the mob gathered on time.

Shortly afterwards in the city of Masaya, Sandinista youth again attacked a private meeting Mr. Cruz was attending with other members of the democratic opposition.●

HEALTHY DEBATE OVER CONRAIL SALE

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. LENT. Mr. Speaker, in the New York Times business section of Sunday, September 23, there was a pro and con piece entitled "Should the United States Sell Conrail Now?"

The Secretary of Transportation, Elizabeth Hanford Dole, authored the affirmative piece, contending that Conrail should be sold at this juncture, rather than risk losing the opportunity altogether by imposing an artificial delay. Yet, the Secretary realizes that the sale process must follow a careful and deliberative course, and should not be brought to a hurried and thoughtless conclusion. Clearly, as the Secretary has articulated, there has been no attempt to rush the sale.

Our colleague from Pennsylvania, Representative BOB EDGAR, took the alternative position that a moratorium should be placed on the sale, to ensure additional time to study the offers.

On the surface, these positions seem to be at opposite ends of the spectrum. As a practical matter, however, both Secretary Dole and Congressman EDGAR appear to be very close in their views.

Both believe Conrail should be sold.

Both seek to insure that the purchaser of Conrail will preserve essential rail service in the Northeast.

Both stress the goal of leaving Conrail in a strong financial condition after the sale, which will preserve jobs in this region.

Mr. Speaker, I have inserted these pieces in full in the RECORD immediately following my remarks.

It is indisputable that Conrail should be returned to the private sector. This determination was made back in 1981, when Congress enacted the Northeast Rail Service Act [NERSA]. To impose a delay on a sale at this point in time is ill advised. Not only will a moratorium jeopardize a successful sale but it will also work an injustice to those who are not benefiting by continued Federal ownership.

States in the Conrail territory are losing over $2 million each month a sale is delayed. All total, this amounts to $25 million per year in lost taxes to the States.

The 40,000 employees of Conrail who have sacrificed, in terms of wage concessions, on behalf of the Corporation are in a seemingly endless suspense as to their future. The shipping industry, connecting rail carriers, and the local communities which depend on Conrail service continue to wonder what is in the cards for this major rail carrier. Assurances need to be given. An extended sale process does not bring any certainty to these players who have been pivotal in Conrail's recent financial success.

Any unnecessary delay imposed by a moratorium may also greatly diminish any chances of successfully returning Conrail as a single entity to the private sector. An artificial time requirement would likely cause bidders to drop out of the process entirely, given the uncertainty of the Government's interest in a sale that a moratorium would demonstrate.

Congress will be assured a complete review and examination of all the economic and public interest factors involved in the sale. During that legislative process, the opportunity will arise to address any concerns that need to be resolved. I look forward to working with my colleagues in this all-important task and finding a definitive resolution to the future of the rail freight industry in the Northeast.

[From the New York Times, Sept. 23, 1984]

SHOULD THE UNITED STATES SELL CONRAIL NOW? UNTOWARD DELAY WILL BE SELF-DEFEATING

(By Elizabeth Hanford Dole)

When the right opportunity arrives for the Federal Government to sell Conrail, we should take advantage of it. A combination of favorable conditions for a sale has been developing in recent months. To impose an artificial delay, as some in Congress have suggested, would risk losing the opportunity when it arrives.

In 1981, Congress passed legislation directing the Secretary of Transportation to begin the process necessary to return the Consolidatd Rail Corporation to the private sector. As Congress also directed, an outside investment adviser was hired. A year and a half ago, our investment adviser—Goldman, Sachs & Company—began soliciting proposals; and 15 months ago we received the first offer, from the Railway Labor Executives' Association.

Last April, the department received the first formal offer that its investment adviser believed to be worthy of serious consideration. Thereafter, I set a deadline of June 18 for additional offers. Fifteen bids were received, including a substantially revised offer from R.L.E.A. Since June 18, Goldman, Sachs and the department have reviewed the bids and negotiated with those bidders who came closest to meeting my criteria for a sale. On Sept. 11, I announced that three companies remain in discussions with the department.

This schedule shows that the department has followed a careful and deliberate process. By necessity, it has taken its own pace. A hurried sale would make it difficult for the Government to protect the public interest. An unwarranted delay of sale could be just as damaging. I intend to do neither.

I have said on many occasions that I will recommend a sale of Conrail only if I have received a best and final offer that leaves the railroad in a strong financial condition after the sale; that protects the basic service pattern now in place, and that, consistent with the preceding criteria, offers the maximum return to the Federal Government.

Thus, there is no rush to sell Conrail. Any decision I make as to its ultimate disposition must be ratified by Congress through passage of enabling legislation. However, to arbitrarily abort the process by imposing a delay of one year or more would be a grave disservice to all concerned.

Conrail's employees are entitled to an early end to the suspense about the future of the railroad. Shippers deserve the assurance that Conrail will have long-term professional leadership, rather than the risk that it will be turned into a political football. Prospective buyers of Conrail who have expended large sums in preparing bids and engaging in complex negotiations should not be left dangling interminably.

Worse yet, if after all the efforts of the past years the sale process were suddenly canceled, can we expect bidders to take the Government as seriously if it begins another effort to sell Conrail a year from now?

Delay would also be costly to the states. As long as Conrail remains in Government ownership, the Northeastern states lose over $20 million a year in foregone tax revenue. That's almost $2 million a month, a high price for the states to pay. When Conrail becomes a privately owned company, it will pay not only state taxes but eventually Federal taxes as well.

I am committed to continuing the progress we've made in an orderly fashion, so that we can accomplish the privatization of Conrail in a way that benefits the public.

If we delay unwisely, the greatest risk is that we may lose the chance to achieve our fundamental goals—to make a sale that leaves Conrail in the strongest financial condition and maintains continuity of service to the Northeast region.

MORE TIME IS NEEDED TO STUDY THE BIDS

(By Bob Edgar)

The debate over the proposed sale of Conrail is not about whether the railroad should be sold. Congress, in fact, is not against the sale of Conrail. But it is our responsibility to insure that the sale be the best deal the Government can get—for the taxpayers who have financed the system, and for the Northeast region that is dependent on the system for jobs, services and economic development.

That concern must be met before Congress will agree to a sale, and there must be sufficient time to establish that it has indeed been met. Congress' responsibility to the taxpayers' $7 billion investment requires no less. That is why a moratorium on the sale of Conrail is necessary.

Let us look at where we are. Before deciding on a buyer, the Administration must assess what Conrail is really worth and insure that the taxpayers get a fair return on their investment; determine what will be done with the proceeds of the sale; consider the intentions of the prospective buyer carefully, and gauge how the economy of the region served by Conrail will be affected by the sale.

A one-year moratorium on the sale would allow us to do just that. But under present conditions, there is not adequate time for careful review, since Congress is scheduled to adjourn in early October and it has a full agenda that will not permit it to consider the many ramifications of the sale.

How much is Conrail really worth? Most offers are for about $1.2 billion in cash and other considerations. Some studies, however, conclude that the railroad is worth a good deal more—given its projected cash on hand of $800 million by the end of this year. Why don't we try to find out before we accept an offer?

What do we do with the proceeds from the Conrail sale? Speculation is heavy that the Administration wants to use it to reduce the deficit. That is certainly one possible option. On the other hand, Senator Moynihan and Representative Florio suggest that the states that had to forego revenues in the wake of the Northeast Rail Services Act of 1981 be given special consideration in any distribution of the gains from the sale. Whatever option is finally chosen, all options should be given a fair review—beyond election-year politicking.

Much consideration needs to be given by Congress to the intent of the prospective buyer of the railroad. The implications are enormous and the covenants that the Department of Transportation is reportedly negotiating with prospective buyers need to be analyzed carefully. Just a few of these considerations are: That the Government be given assurances that, when sold, Conrail would not be stripped of its assets; that a strong annual maintenance program would continue, and that Conrail would be held for a period of years before it could be resold. We cannot afford to repeat the sorry tale of delayed maintenance and declining service that got us to Conrail in the first place.

Finally, and this demands the most consideration, since it has so many ramifications, what will be the impact on the economy of the region after the sale? There are many items here, ranging from service patterns that will exist after the sale, to the fate of the "orphan bridges," whose jurisdiction and ownership is in question, and other deferred and neglected infrastructure maintenance along the Conrail system. Governor Richard Thornburgh of Pennsylvania expressed this last concern best when he said in a recent letter to Secretary Dole: "If Conrail is to be placed in the private sector, it must result in a strong railroad which will continue to enhance economic development and preserve jobs in the Northeast. This can be accomplished only if any buyer preserves service to the states and shippers as now provided by Conrail and continues to promote vigorously industrial development within the region as Conrail is now doing."

Why the rush to sell? After all, Conrail has become a tremendous success story since its sale was first proposed by the Reagan Administration three years ago. Rising phoenix-like out of the ashes of the Penn Central and five other railroads, the system will earn an estimated $500 million this fiscal year alone. So it is no longer costing the taxpayers any money. In fact, after the initial Federal subsidy of over $7 billion, Conrail has operated without assistance for more than three years. Moreover, a private buyer is almost assured of continued profitability with Conrail because of favorable state tax treatment and large potential tax benefits that a non-government purchaser would receive.

Other factors in Conrail's turnaround have been the leadership of L. Stanley Crane who, as chairman and chief executive officer, has guided the railroad to profitability over the last three and one half years. Conrail employees made significant concessions to help the company, accepting 12 percent less than prevailing industry wages. Finally, Conrail's success owes much to its effort at cutting out underused and unprofitable branches and adopting new technologies, such as "piggy-back" containers and dualwheeled cars that can also be towed by highway tractors.

In all of the above points, the key item is the need for a careful and thoughtful review of the proposed sale by Congress. Why the rush to sell? The system is not costing the Government any money. The goal of the privatization of Conrail should be a good sale, not just a quick one.●

THE MUCH-NEEDED STRATEGIC TRANSITION: FROM MUTUALLY ASSURED DESTRUCTION [MAD] TO CAREFULLY ASSURED DEFENSE [CAD]

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mrs. LLOYD. Mr. Speaker, Dr. George Keyworth, the President's Science Adviser, recently wrote a sensitive and thoughtful article entitled "The Case for Strategic Defense: An Option for a World Disarmed," which appeared in the first publication of Issues in Science and Technology. Dr. Keyworth places the nuclear strategic aspects of the recent defense initiative in an historical perspective, superimposes the framework of Soviet thinking and behavior, and makes a solid argument for a transition from mutually assured destruction [MAD] to an evolving defensive strategy. As Dr. Keyworth notes, "only when stockpiles can be measured in the dozens rather than the tens of thousands will arms control have any real meaning to ordinary people." I have provided major excerpts for my colleagues and I strongly recommend that they read the entire article.

The article follows:

THE CASE FOR STRATEGIC DEFENSE: AN OPTION FOR A WORLD DISARMED

(By George A. Keyworth II)

(Success/four flights Thursday morning/all against twenty-one mile wind/started from level with engine power alone/average speed through air thirty-one miles/longest fifty-nine seconds/inform press/home Christmas—Kittyhawk, December 17, 1903.)

The First World War started in 1914, lasted four years, and engaged approximately 14,000 combat aircraft on the western front. Not one was of American design or manufacture. My subject is nor airplanes. Rather, it is the lessons that four generations of Americans since Kittyhawk should have learned. It is about opportunity, in some cases lost opportunity, and time. It is about fear. And it is about hope, which the opportunities we now possess could leave as a legacy for the next generation.

Early this year, Freeman Dyson wrote a book entitled "Weapons and Hope". In it he identified two philosophies of war: that of the warrior and that of the victim. He went on to explore his sense of the root human causes of modern war and some of the reasons the superpowers find themselves at odds. He found these are the same reasons that warriors and victims have difficulty communicating—they simply do not speak the same language. He also found that ". . . the world seems now to be approaching a fork in the road with two ways out marked by conspicuous signposts: 'Ban the Bomb!' and 'Don't Rock the Boat!'" Ban the Bomb, a slogan of the victims, says that our existing weapons and strategy are unacceptably dangerous. The warrior slogan, Don't Rock the Boat, says that it would be unacceptably dangerous to upset the delicate political balance established by our existing

weapons and strategy. As Dyson observed, both parties are right. It is this dilemma—and an opportunity to escape it—that I propose as my subject.

II

In 1984 the superpowers confront each other with a combined arsenal of approximately 17,000 ballistic missile warheads, based in both silos and submarines, and about 700 more bombers, which can carry an assortment of cruise missiles, short-range attack missiles, and bombs. All in all there are more than nine gigatons of combined arsenal—an explosive force equivalent to 9 billion tons of TNT—spread over a combined population of a little more than a half billion people. To date we have deliberately left ourselves exposed and hostage to these weapons.

In the warrior's world these are the tools of deterrence. The concept of deterrence is not new, though it has come to have an almost exclusive connotation associated with the nuclear age. Since time immemorial, rational men have used the two aspects of deterrence—deny the enemy his objectives and retaliate against him if he tries—to preserve peace. To date it has worked well; the warrior will correctly point to 35 years of nuclear peace.

The victim is not swayed by the complex arguments and analyses of deterrence strategists. Instead, he sees roughly 50,000 pounds of high explosive equivalent destined for every man, women, and child in America, and about 20,000 pounds destined for every Soviet. The victim hears the warrior's argument of adverse exchange ratio but does not understand it. On the one hand, he knows very well the destructive power of thermonuclear weapons—and that they exist by the thousands, if not tens of thousands. He knows the delivery systems that carry them are currently unstoppable—deliberately so—to ensure that rational men will never consider their use. And he knows that the physical controls and safeguards on those systems make the probability of error extremely small.

On the other hand, the victim has an intuitive sense that there is no such thing as perfection, that man's history is more one of a series of irrational wars than it is one of reasoned peace. And that while one can always hope, leopards do not easily change their spots.

An even more deeply rooted barrier exists between the world of the victim and the world of the warrior: the difference in currency. The victims' currency is not weapons—it is the lives and suffering of their children.

It truly is the children that seem to be at the heart of the issue. Throughout man's history both individuals and nations have faced innumerable threats to their present existence. Rarely, however, have they faced a situation that foreshadows the end of their future. It is that vision of catrastrophe that fuels the nuclear freeze movement, as well as calls for unilateral disarmament. In this respect, both the warriors and the victims share a common ground. As Meg Greenfield said in her April 30, 1984 Newsweek editorial "The Keepers of the Bomb": "I do not for a moment believe all those elaborate they-do-this-so-we-do-that scenarios the double-dome strategists expect these military men to put into effect could happen: a nuclear war wouldn't be so considerately tidy and tame. But that is not the fault of the men and women who preside over these [nuclear] installations. They are as much victims as we, and—my final observation—they truly embody the American nuclear dilemma."

This dilemma is exacerbated because we continue to judge Soviet perceptions and objectives by our own standards. We automatically assign to them our Western logic, cultural values, historical perspective, and demand for absolute guarantees reflected in a "number." As a result, we have been unable to steer Soviet actions and are thus frustrated by their reactions.

We have built a strategic system that tends to work at cross purposes to that of the Soviets. We compound the problem by further assuming a perpetually rational relationship between a perpetually limited club of superpowers—with no provision for mistakes, miscalculation, or madmen.

The American people seem to instinctively grasp these inconsistencies, probably because they are not mesmerized by the numbers or mathematical elegance of the proposed theories. And they are demanding change.

III

I do not argue with the past. Some have snidely remarked that we seem to have gone from "Assured Ascendancy" in the 1950s to "Assured Destruction" in the 1960s and 1970s, ending with "Assured Anxiety" in the 1980s. But this does not recognize the challenge met by the men at the dawn of the nuclear age. Without real technical or political alternatives these men walked a razor's edge with delicate balance. Global peace attests to that balance, and that balance must be maintained; our nuclear deterrent posture must be kept healthy—for the immediate future.

I feel uncomfortable, however, with reasoning that says that mutual offensive deterrence—wherein the promise of complete national destruction is presumed—must remain as policy ad infinitum. I believe we must consider a transition.

I say this for several reasons. First, there is great concern among military analysts about the imbalance between the projected scale of loss in the United States versus that of the Soviet Union as a result of nuclear war. Make no mistake, the results on either side would be catastrophic. But differences in socioeconomic assets; the locations, density, structure, discipline, and civil defense of the populations; and weapon types, numbers, and targeting strategies all combine to produce reasonable estimates that the Soviets might expect 30 to 35 million casualties, while the United States could experience numbers four to five times that. These are staggering figures. After all, the United States has had only a little more than 1.2 million battle and battle-related deaths in all its wars combined—a period covering more than 200 years and ten generations. (Confederate deaths during the Civil War are estimated at two-thirds that of Union forces.) . . .

Some specifics are included on American, European and Soviet casualties in past wars.

The message here is that both the Americans and Soviets firmly believe the other will fight—and that is the essence of deterrence. Left to themselves, the peoples of the two nations would undoubtedly prosecute any conflict to its bloody conclusion.

But times change, as do weapons and leadership. Beginning in the late 1950s, ordinary citizens began to realize the futility of global thermonuclear war. More recently, the American Roman Catholic Bishops consolidated a large body of thought in their discussion of the ethics of defending ourselves with weapons we cannot morally use, in a way we cannot possible win.

Nevil Shute was probably the first to anticipate the demise of the policy of massive retaliatory deterrence in his book "On the Beach." His message was simple: it does not matter who starts the conflict, for in his scenario neither the United States nor the Soviet Union is the initiator. Nor does it matter whose fault it is—his thesis is that the superpowers mistakenly retaliate against each other through unavoidable error. And no matter how much either side wants to stop the conflict after it starts, the war rapidly assumes its own momentum. Finally, it does not really matter who the combatants are: in Shute's vision, everybody dies.

It has been almost two decades—about one generation—since "On the Beach" was written. Shute's view can now be said to reflect the mood of the people. As Elie Wiesel put it, so simply and poignantly—they are scared.

They're scared because they watch a tremendous amount of money being spent on defense, yet they feel no more secure for it. They're scared by predictions that Armageddon, or something very like it, might result from nuclear explosions totaling only a few hundred megatons—and the gross stockpiles on both sides are at least two orders of magnitude larger than that already, and growing. They're scared because they can see no logical end to the arms race, because no balance of power has ever lasted forever, and because they want to leave more hope to their children.

IV

In A.D. 14 Tiberius became emperor of Rome. He succeeded Julius Caesar, who brutally reorganized and expanded Greco-Roman civilization, and Augustus, who had continued Caesar's expansion with unparalled administrative genius. Although Tiberius inherited one of the greatest societal upheavals in history, he passed on 200 years of peace. In this context, Tiberius was often heard to comment: "As they say, I have got a wolf by the ears."

We, too, have our wolf by the ears. It is a world in which the superpowers have established a tense nuclear standoff. Each has an arsenal sufficient to destroy the other. Each has an abiding distrust of the other's intentions. Each views the other as preparing to strike first. For both nations, the future is growing less stable and predictable. And their leaders' technological options for maintaining stability are becoming increasingly marginal.

We chose this route two generations ago when we acquired a power we dared not turn away. Once we had nuclear weapons, deterrence as we know it evolved for several reasons. Some were political—to consolidate and maintain our world leadership after World War II. Some were military, such as the need to offset Soviet nuclear development. And some were monetary—conventional forces were too expensive. Our ride on the nuclear wolf, however, has become a balance of terror. To paraphrase Winston Churchill, we are riding to and fro on an animal that we dare not dismount, and the animal is getting hungry. . . .

The questionable merits of relying heavily on offensive nuclear weapons and the difference in U.S. and Soviet views of such weapons, as well as the comprehensive nature of the Administration's SDI proposal are discussed.

V

Seemingly, we have led ourselves back to Freeman Dyson's paradox. The victim says we cannot live with our present nuclear weapons and strategy; the warrior says we cannot live without them. The public sees itself trapped by weapons of mass destruction, a de facto policy of guaranteed delivery, and de facto policy of massive retaliation. They perceive that both sides maintain a preemptive capability to curtail the damage of a retaliatory strike, that we proliferate our offensive weapons as a counter to preemption, and that proliferation and preemptive capabilities lead to increasing instability.

Can we get a handle on the first of these issues? Can we reject the weapons of destruction themselves? Regardless of the calls to disarm, I believe we are long past that stage. Nuclear weapons are too firmly established as the centerpiece of the world's balance of power. More important, many Third-World nations see nuclear weapons as an indisputable trump card in their scramble for ascending status and power. Although perhaps only six countries have built and tested nuclear weapons to date, it is estimated that there are at least ten more who could build them within six years, and eleven more who might within ten years. No matter how much one may want to return to the prenuclear era, we have eaten from that tree of knowledge.

Do we want to abandon deterrence? Even though many critics may state that those of us who advocate strategic defense are calling for such a policy, there is no question that we must retain a specific retaliatory capability. Nuclear weapons, because of their small size-to-destruction ratio, are a most precious commodity. The destruction resulting from just one weapon is so high that countries might consider any means to acquire one. Ultimately, the issue for countries considering initiating nuclear war is: Is it worth it?

Are the gains worth the risk of retaliation? I propose that if there were no risk of retaliation, then the chances that nuclear weapons might be used would be even greater than they are today. Even if one were to have perfect defenses, an overt no-retaliation posture would be precisely the fatal-fascination-of-the-fortress that has proved disastrous throughout history.

But do we have to maintain nuclear weapons as part of this posture? To retain its credibility, retaliation must balance itself against the potential damage that an enemy can inflict. Unless and until the world can completely rid itself of nuclear weapons, an admittedly unlikely prospect, the nuclear weapon will remain one aspect of any deterrent policy. But I submit that the massive retaliatory arsenals that threaten our future today can be made effectively obsolete if the defense technologies we can now foresee are followed to emerge and evolve.

I propose here a central thesis: It is not deterrence, per se, that has caused the general public to lose faith in our policy and that has caused the buildup of our offensive weapons to turn cancerous. Rather, it is our deliberate and continued inability to protect the socioeconomic structure of our society—coupled with our growing inability to protect the retaliatory deterrent. . . .

The changing nature of deterrence is described from the U.S. and Soviet points of view.

That brings us to the crux of the most immediate argument in favor of developing active defenses: they remove the preemptive option, both for the Soviet Union and the United States. Growing preemptive capability has been and continues to be the prime factor in the spiraling arms race. In Soviet eyes, U.S. technical know-how in the 1960s and 1970s provided a unique qualitative edge for preemption that could be overcome only by sheer mass and a strategic force that could get at the enemy fast—the ICBM.

In U.S. eyes, this Soviet ICMB force, coupled with its dramatically improving technological performance and survivability, gave the Soviets an overwhelming preemptive potential, unparalleled flexibility, and an unacceptable strategic reserve in times of conflict; hence, the concerted U.S. attempts to modernize its strategic forces starting in the late 1970s.

At that time, however, the United States was just beginning to emerge mentally from the Vietnam War. The defense budget as a portion of the gross national product was dropping precipitously from a peacetime expenditure of close to 10 percent a decade-and-a-half after World War II to 5 percent at the close of the 1970s, and SALT II was on everybody's lips. . . .

The Soviet achievement of parity and the impact on our arms control bargaining position is discussed.

VI

How, then, do we agree on any arms control measures that matter? As Admiral Noel Gayler recently commented on Braden and Buchanan's Cross-Fire program, today's arsenals are such that one side's strategic advantage of a thousand weapons or so is really lost in the noise. Going further, Carl Sagan postulates that the detonation of just a few hundred weapons would, in his opinion, trigger nuclear winter. Admittedly, Sagan's thesis is undergoing heavy scrutiny and criticism. Both his phenomenology and threshold levels, as well as the winter, or perhaps summer, effect have come under question. But in the end the precise numbers really are not the issue. It is clear that a large portion of the earth's population—perhaps a quarter billion people or considerably more—could die as the result of a global thermonuclear war involving even a fraction of present-day arsenals.

Sagan is probably close to being correct when he says the only real answer is to disarm. But he forgets that retaliatory deterrence is not a phenomenon of the nuclear age. In one form or another, it has been man's primary international stabilizer for all of recorded history.

And as I have described, in deterrent theory the punishment must fit the crime. In our nuclear age, both crime and punishment have accelerated to the point of suicide. The reason for this escalatory spiral—the reason why real arms control has been unable to take hold—is the continually improving ability, real or perceived, of each country to disarm the other. . . .

The alarming ability for a first strike is discussed from several different aspects.

It is time to pursue the technological options for active defense. Significant technological advances have occurred since the last serious debate on ballistic missile defense in the late 1960s. We have before us the prospect of advanced defenses that can provide crisis stability and slam the lid on the MIRV. James Fletcher's Defensive Technology Study team spent over 100,000 man-hours in the summer of 1983 reviewing the state of the relevant technology. They called in several hundred technical and industrial experts, which probably brings the total man-hours up to a half million. I really could not improve upon their summary of the differences two decades have brought:

"In the 1960s, there were no credible concepts for boost-phase intercept. Today there are multiple approaches based upon directed energy concepts and kinetic kill mechanisms. Midcourse intercept was hampered in the 1960s by the lack of credible approaches for decoy discrimination, unmanageable signal and data processing loads, the cost per intercept, and the undesirable collateral effects of nuclear weapons used on the interceptor warheads. Today, multispectral sensing of discriminants, birth-to-death tracking in midcourse, and small hit-to-kill vehicles that have promise as inexpensive interceptors appear to offer capabilities that overcome the limitations in midcourse.

"In the 1960s, the inability to discriminate against penetration aids at high altitudes and limited interceptor performance resulted in very small defended areas for each terminal defense site and gave the offense unacceptable leverage over the number of interceptors needed. Today, technology provides the potential to discriminate at high altitudes, and improved interceptor technologies should allow intercepts at these higher altitudes. When these improvements are coupled with the potential for boost-phase and midcourse intercepts to disrupt pattern attacks, robust terminal defenses seem attainable. Finally, 1960s technology in computer hardware and software and signal processing was incapable of supporting battle management for a multilayered defense. Today, the rapid advancement of these technologies is believed to permit realization of the complex command and control systems needed."

We are already in an era when warning and decision times are becoming extremely short. As technology advances during the next decade, those intervals may be reduced to the point at which in times of crisis—or mechanical or human error—a policy of shoot-first-and-ask-questions-later may become an option, a terribly dangerous option, for both sides. At the very least, active defenses can conceivably give us precious time to make those decisions. At best, they can reduce the consequences of an accidental or erroneous launch, nuclear adventures by Third-World countries or madmen, and massive retaliation and the loss of hundreds of thousands of lives. Of possibly greater import, once having made a mistake, the offending country would not automatically have to deal with what I'll call the "failsafe" dilemma—that is, a decision on whether to immediately follow the mistake with a complete nuclear attack rather than face retaliation. Experts, of course, dismiss this possibility, The ordinary citizen has a deep-rooted fear of it. . . .

The Soviet situation as a result of SDI and the variety of Soviet responses to it, as well as the various benefits which the initiative can provide in the case of real arms control are discussed.

Strategic defense therefore provides an option for a world effectively disarmed of nuclear weapons, yet still retaining national sovereignty and security. In fact, deployment of strategic defense is the only way in which the superpowers will be able to achieve these very deep arms reductions. It now becomes extremely important to recognize that the ballistic missile and air defenses that might look less than 100 percent perfect in the context of an offensive exchange involving tens of thousands of warheads could be expected to perform magnifi-

cently against an attack by only tens, or at the most hundreds, of weapons.

I do not offer this scenario lightly. Moving out from under the nuclear umbrella under any circumstance is a serious, sobering, and expensive proposition. Neither our military structure, organization, nor technology is prepared for it now—not strategically or tactically.

Moreover, I must issue one caution. Strategic defense must never be perceived as a technological panacea. It is a tool, a catalyst, nothing more. The roots of our security problems are political, However, pending a benign transformation in the ways of the world, it behooves us to invest in a military capability that increases the prospects for meaningful arms control and gives hope to those that follow us.

Admittedly, there are many "if's" in the prospects for strategic defense. But the president proposed that we use our ingenuity to pursue these defensive technologies, and outstanding scientists substantiate his faith. It is our obligation—our responsibility—to provide new options for our political leaders.

We cannot look down each other's gun barrels indefinitely, regardless of the rational balance we think we can maintain. Rational men have rarely started history's wars. Nor can we play into the Soviets' strong suit—men and materiel. Instead, we must start to play our trump—technological leverage. We must move rapidly to develop the means to both reduce our own reliance on tactical and strategic nuclear weapons and the Soviets' perception that either side could use them to advantage. And we must couple these technical moves with negotiations for deep reductions in nuclear weapons. We must begin our transition from the 1950s to the year 2000. And we must offer hope that we can achieve a world free of the fear of nuclear war.●

CONGRESSMAN FEIGHAN HAILS MAYOR PAUL CASSIDY OF PARMA HEIGHTS

HON EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. FEIGHAN. Mr. Speaker, the Plain Dealer featured a profile of the distinguished mayor of Parma Heights entitled "What Makes Paul Cassidy Run?" I have known Mayor Cassidy for a number of years and one thing is certain: As Mayor of Parma Heights for 27 years, the interests of his community have been his prime concern. The residents of Parma Heights are proud of their community because of Mayor Cassidy's dedication to make the city an enjoyable place to live, work, and raise a family. The litany of his accomplishments includes the Greenbrier Community Center, a city theater, a library, an ice skating rink, and a lovely community park. City streets are safe and municipal services excellent.

Mr. Speaker, I want my colleagues and the people of Parma Heights to know I appreciate Paul's drive because his outstanding leadership makes my job much easier. Thank you, Paul, for a job well done.

WHAT MAKES PAUL CASSIDY RUN?

(By David Beard)

Paul W. Cassidy started peddling the Saturday Evening Post, Country Gentleman and Ladies' Home Journal around his old Glenville neighborhood at age 5, graduating to paper routes for both the Cleveland News and the Press a few years later.

"He's been moving ever since," said his son, Steve, after watching his father in action at a Parma Heights restaurant. The jovial Cassidy greeted the hostess, dominated table conversation, gulped down a meal, then apologized for having to rush to his law firm.

Cassidy, 64, had started the day at Parma Heights City Hall. He has been the city's part-time mayor for nearly 27 years—longer than any Cuyahoga County mayor except Brooklyn's John M. Coyne.

During the morning, Cassidy had outlined strategy for his latest challenge: convincing voters in the suburb of 23,112 that the city income tax should be doubled from 1% to 2%.

Then had come lunch and an afternoon at the firm, where he handles work for private clients and, ocassionally, other suburbs. He is legal counsel to Parma Community General Hospital and Cox Cable Inc., which numbers Parma Heights among its west suburban clients.

"He certainly wears a lot of hats," said Parma Heights Councilman Jim Pastor, who opposed Cassidy in the last two mayoral campaigns. "Being around as long as he has been, he is almost considered an institution . . . One reason I decided to take him on was because he never seemed to have any opposition."

The abundance of Cassidy's public and private interests has raised eyebrows, and it has extended his influence far beyond city limits. Many politicians regard the fast-talking, hand-shaking Cassidy as one of the shrewdest, most powerful politicians in southwest Cuyahoga County.

"He's got to be No. 1 or 2," said Democratic Ohio Senate candidate Ronald M. Mottl, the other half of the Cassidy & Mottl law firm. "I say he's tops in his party and (Parma Mayor John M.) Petruska is tops in his party."

In 1974, Mottl won the spot that friends say Cassidy always wanted: congressman. It was the first of four two-year terms in the old 23d District for Mottl who admitted it was lucky that Cassidy had declined to run.

"There's the person that could have probably beaten me," Mottl said. "I would have hated to run against him. He's more articulate than I am and is a tireless campaigner."

Cassidy had run unsuccessfully for Congress in 1950 against then-Rep. Michael Feighan. When he chose not to try again more than 20 years later, he explained he would be in his 70s before he could get anything done in Washington.

Cassidy is a Republican, yet last year, his re-election committee gave more money to the Democrat Petruska than did any other contributor. It also gave to Brook Park Mayor Thomas J. Coyne and Broadview Heights Mayor William M. Bittle, both Democrats. Bittle had hired Cassidy's son, Michael, an accountant and lawyer, as finance director.

"I'm a good Republic, a lifelong Republican, but when it comes to political races, I always back the person," Cassidy said.

In 1957, about a year after being appointed Parma hospital counsel, Cassidy was elected to his first term as mayor. Several residents of Brooklyn, which the hospital serves, accused the hospital board of playing politics and urged his ouster as counsel. Because the mayor has the power to appoint board members, they argued, he should not also be working for the board.

The board disagreed. Cassidy remained.

In 1972, when he received the Cox spot, residents accused him of possible conflict of interest, a charge renewed last February when City Council rushed through on first reading an ordinance approving a basic rate increase of more than 50% for cable television.

"People in the audience asked why we were in such a hurry, but council agreed with a report from our financial officer, who said she felt the city should not spend money to hire a consultant for what is a luxury that less than half the residents have," said Donna Marchese, one of two councilmen who opposed the measure.

Cassidy missed that meeting to ask Rocky River City Council for a Cox rate increase. He said his cable position does not conflict with his mayoralty because council must approve such items.

"I leave the building whenever it is up for discussion," he said. Of his absence from a few recent council meetings, Cassidy said, "Who cares? I'm not required to go to council meetings under the charter. In my 27 years in Parma Heights, I'd say I made my fair share."

Cassidy, a former Air Force navigator, stated as a Parma Heights, councilman in 1953, then became law director a year later.

Councilman Nick Radlick was one of those charmed by the Cathedral Latin High School graduate. In 1955, Radlick circulated petitions to get city councilmen elected by wards rather than at large, the system Cassidy favored.

"One night, he and his friends came over and talked to me," said Radlick, who for 22 years was president of United Steelworkers Local 188, representing Jones & Laughlin Steel Corp, workers. "He had a point. You know, once you got to know him, you couldn't help but like him."

Radlick is now a member of the Cassidy Team, a non-partisan group that campaigns with the mayor and controls the suburb's council.

Radlick said many of Cassidy's dreams for the city—setting up Greenbrier Community Center, a city theater, library, ice-skating rink and park—came out in those long-ago talks.

"I've never voted for a Republican for president," Radlick said." "I even voted for McGovern, so I'm a staunch Democrat."

But Radlick *did* vote for Cassidy. He even rallied several hundred labor leaders to support the mayor at a fund-raiser for his 1981 race.

"I don't know of any city leader that can get that kind of labor support," Radlick said. "And he's a Republican."

Cassidy spent more than $29,000 on that race—more than any 1981 mayoral candidate in the county, with the exception of Cleveland's George V. Voinovich. Pastor, who relentlessly criticized the administration, spent only $1,591 and lost 3-1. The job pays $27,100 a year, the term is four years.

"I felt my whole career was at stake," said Cassidy, explaining his campaign costs. "More than two decades were on the line, as far as I'm concerned."

During that time, he viewed the construction of Greenbrier Commons—and voter approval in 1972 of a $1.3 million bond issue to

finance it—as both the high and low points of his career. He said the indoor theater and ice rink attract residents of nearby suburbs and give a civic identity well worth the expense. But a cost overrun on the project gave opponents ammunition.

"That almost drove me to the nuthouse," Cassidy admitted. "Those kinds of problems are the worst thing that could happen."

In the late 1960s and early 1970s, when next-door neighbor Parma was passing zoning ordinances that excluded minorities, Cassidy pushed a fair-housing ordinance through Parma Heights.

"I was never that way (prejudiced)," Cassidy said. "In World War II we (the U.S. 447th Bomber Group) would bomb factories in southern Germany and northern Austria. There was this black aviation unit commanded by Col. Benjamin Davis, who was Cleveland's safety director for a short time. They would fly cover for us. I can't tell how happy I was to hear those guys on the radio."

Yet, several times in the last 15 years, Cassidy has urged publicly that Parma and Parma Heights unite, even at the expense of his job.

"I think both communities would benefit from the move," he said. Parma has Parmatown Mall and some industry to bolster its tax rate; Parma Heights has upper-middle-class homes, a few stores and no industry. The two cities send their children to the same school district.

"We're tragically caught between Parmatown and Southland, with all the traffic and minor crimes from both places and none of the benefits," Cassidy complained.

The mayor jabbered about municipal finance, regional government and snowclearing, but stammered when asked about other interests.

"I'm a, I'm a . . ."

"Workaholic," interjected Finance Director Alice Felice.

Cassidy leaned back in his plush chair. "Well, I'm not a hobbyist."

Like any father, he brags about his four children, now grown. Three are married; two live in Parma Heights. He has five grandchildren.

He then spoke warmly of his wife, Elise, for being able to live with him and his continuing career.

"I promised her I'd be in for only one term," he said. "She's been very patient."●

TAX REFORM: PROCEED WITH CAUTION

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. PHILIP M. CRANE. Mr. Speaker, the debate on tax reform will accelerate this autumn after the elections. I wish to draw your eyes to the following article, which offers a few words of caution as Congress prepares to deliberate upon this issue. The author, Kenneth M. Brown, is a visiting fellow at the American Enterprise Institute for Public Policy Research in Washington.

While I would be the first one to urge simplification of the Tax Code, I hasten to remind my colleagues that the business sector needs incentives to augment productivity and capital expansion. Individuals require fair and equitable tax treatment. Provisions of tax law which promote such principles must be carefully reviewed before being terminated so abruptly.

Although President Reagan's major tax cut program of 1981 did much to help both individuals and the business sector, Congress passed measures to increase taxes in 1982 and 1984. Their effect was to reduce the benefit of the 1981 tax cut and increase the power of the public sector. Tax increases are not the answer to the deficit. Only tax cuts combined with reduced Federal spending will lower the deficit and expand the economy.

I commend this article to my colleagues' attention.

WILL TAX REFORM DEFORM HIGH-TECH?

(By Kenneth M. Brown)

Fundamental tax reform could endanger high-technology industries. When the tax-reform debate begins in earnest after the elections, value-added taxes, flat-rates, consumption-based taxes, and all sorts of hybrids will be touted as fair, simple deficit fighters. Simplicity, however, can be carried too far.

Clearly our tax system is a mess. Cleaning it up will inflame multitudes of special interest groups whose economic well being rides on the continuance of that huge, arcane tome of special provisions called the Internal Revenue Code. But some of the wrinkles that reformers would iron out were put there for very good reasons.

Moreover, some special interests are also special for the nation. The high-technology sector—computers, electronics, instruments, plastics, aircraft, et al.—has plenty of its own self-interested boosters, but its worth to the nation is so great as to justify some degree of special treatment. Technological change and industrial innovation are vital to economic growth, international competitiveness, and job creation. Industrial research and development provide spillover benefits to society such that governmental support is given in every industrial country.

When R&D and productivity slowed down in the 1970's, Congress was alarmed. Now that the economy is booming along, it is easy to overlook a long-term issue like innovation as we follow the titillating melodrama of who will gain and who will lose from this round of tax reform.

Instead of going into our own spreadsheet analysis of who gets what, let's first remember something vital about the tax breaks that tax reformers would like to eliminate. Many so-called loopholes were enacted not out of pork-barrel favoritism, but because the basic tax code was faulty. One of the worst of its faults was its lack of indexation for inflation. (The 1981 Economic Recovery Tax Act fixed only part of the problem.) Inflation caused bracket creep and, more importantly for industry, it cause erosion of capital, as depreciation allowances were inadequate to replace worn-out equipment. Furthermore, taxes were levied on capital gains that were really only inflated prices, not real growth.

Second, corporate earnings are taxed twice—once by the corporate profits tax and a second time when dividends become a shareholder's taxable income. Not only is that double-whammy inequitable, if left unchecked it would have paralyzed the growth of productive capital.

These two inefficiencies were the main reason why we needed an investment tax credit, accelerated depreciation, and favored treatment of capital gains.

So loopholes are less a problem than the basic tax structure. Getting rid of the supposed "loopholes" could put us back in the same situation, with a tax code that harms capital formation and technical advance.

For the high-tech sector, the most important question is how tax policy will affect capital formation. High-technology industries sell high-tech equipment to all other industries; the adoption of new technologies depends on investment, since this is how the new technology gets put into place. As net investment goes, so goes high tech. During the 1982 slump in plant and equipment spending, some of our most innovative high-technology companies watched their profits collapse. Unless the accelerated cost recovery system provisions of the 1981 ERTA package either remain intact or are replaced by something at least as favorable to capital formation, the high-tech sector will be in for a shock.

Indexing the tax code matters only during inflationary times. During the current slowdown of price increases, tax reformers have put aside indexation of depreciation allowances, since this would conflict with their goal of simplicity. But if inflation returns, we could have a replay of the 1970s, when inadequate depreciation allowances let the capital stock of basic industries simply melt away under the searing heat of inflation.

The treatment of capital gains is vital to the high-tech sector. For some years, capital gains have been treated more favorably than ordinary income. The most recent changes in 1978 were responsible for a veritable flood of funds into venture capital markets. The venture-capital pool grew from $2.5 billion in 1977 to over $11 billion this year, helping to finance the burst of innovative entrepreneurship that has kept United States out front in the high-tech race.

But one of the front-running tax bills, the Bradley-Gephardt proposal, would eliminate this favorable treatment. Capital gains would be taxed at the same 30 percent which is the top bracket for taxation of ordinary income. The argument is that this simplification would eliminate a sheaf of pages from the tax code. But what price simplicity?

This measure is attracting support on Wall Street, because it would lower the tax liability of those who augment their seven-figure incomes with capital gains from short-term trading. But from the point of view of the high-tech venture capital sector, Bradley-Gephardt would be calamitous, because by eliminating the differential between capital gains and ordinary income, it would dam the flow of funds into new ventures.

In addition to these fundamentals, some lesser high-tech provisions may be jettisoned in the name of simplification. For example, the existing 25 percent tax credit for increases in spending on research and experimentation is just the sort of "tax expenditure" that tax reform would kill. Other tax benefits help corporate donations to university research, and still other complexities act to help research and development and innovation.

Complex and arcane though they are, these provisions reflect a consensus that research, development, and innovation hold a special place in our economy and deserve special treatment. Technological change is

the major source of productivity growth, but firms tend to underinvest in research because they don't consider all of the benefits that innovation confers on society at large. Will tax reformers do away with this careful balance just to save a few pages in the Internal Revenue Code?

Were someone to write a history of economic policy, its theme might be the depressing frequency with which our "solutions" merely replace old problems with new problems. Our high-tech industries seem uniquely vulnerable to unintended harm as the tax reformers prepare for the coming battle of solutions.●

NEW JERSEY COURTS UPHOLD STATE TAXING AUTHORITY FOR TOXIC WASTE CLEANUP

HON. JAMES FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. FLORIO. Mr. Speaker, the New Jersey Supreme Court recently ruled 5 to 0 that the State has full authority to impose taxes to fund its efforts to meet its legal obligations under the Superfund Program. This landmark decision removes a major impediment to my State's efforts to form a full and equal partnership with the Federal Government in conducting cleanup at the Nation's worst sites.

As many of my colleagues are aware, the States are required to contribute 10 percent of the costs of Superfund cleanup at sites within their borders. Many rely on special taxes to fund this obligation. But the Superfund law contains ambiguous language which appears to partially preempt State taxing authority. The New Jersey court ruling narrows the reading of this preemption provision substantially and the court must be applauded for its insightful interpretation of congressional intent. But there remains a need to eliminate any lingering controversy over State taxing authority.

The legislation I have introduced to extend and expand the Superfund Program—H.R. 5640—which was adopted by the House this past August by a vote of 323 to 33, would repeal the preemption provision contained in current law and would finish the job of preserving State taxing authority begun by the New Jersey Supreme Court.

I would draw my colleagues' attention to a recent article describing that landmark ruling which appeared in the New York Times.

TOP JERSEY COURT UPHOLDS STATE'S FUND FOR CLEANING UP TOXIC WASTE

TRENTON, September 19.—The New Jersey Supreme Court ruled, 5 to 0, today that the state's Spill Compensation Fund law, which taxes chemical companies to pay for cleaning up toxic wastes, is constitutional and not pre-empted by Federal law.

The court, the state's highest, said the Federal Superfund, which taxes chemical makers to help finance the national cleanup of toxic-waste sites, did not pre-empt the state tax if the money was used for cleanup costs not covered by or paid for by the Superfund.

A group of oil and chemical companies—the Exxon Corporation, the Monsanto Company, Tenneco Chemicals Inc., the Union Carbide Corporation and the B. F. Goodrich Company—had argued in a suit that the state was taxing them for the same reason that the Federal Government was, thus violating a provision of the Constitution that requires state laws to yield to Federal laws when they are in competition.

LEGISLATIVE HISTORY

"Surely Congress did not intend for the states to sit back and wait for hazardous-waste compensation that might never be awarded," Justice Robert L. Clifford wrote for the court.

"The more logical conclusion, based particularly on the legislative history surrounding the enactment of Superfund," he said, "is that Congress contemplated that the Federal Government would seriously attempt to deal with the problems of the most seriously affected sites and to allow the states to maintain a compensation fund, or to use general revenues to conduct their own cleanup efforts."

The court also rejected the companies' demand that an estimated $30 million in taxes already collected be returned.

"I disagree with the court," said Hal Bozarth, the director of the Chemical Industry Council, an industry group. "It's still my feeling that New Jersey companies are left with a competitive disadvantage. We're the only state that has this dual taxation system. It seems unfair."

"It removes the cloud that has been over the Spill Fund since the Superfund was adopted in December of 1980," said the state's lawyer, Mary Jacobson.

The State Environmental Protection Commissioner, Robert E. Hughey, said he was pleased by the ruling, although he was not sure that the legal battle was over. Environmentalists also praised the decision.●

SOLAR ENERGY TAX CREDITS

HON. WYCHE FOWLER, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. FOWLER. Mr. Speaker, I am pleased to introduce legislation today which would extend the business and residential tax credits for solar energy installations through 1990, along with my colleagues Mr. GIBBONS, Mr. PICKLE, Mr. MATSUI, Mr. THOMAS of California, Mr. DORGAN, Mr. FLIPPO, and Mrs. KENNELLY.

As members of the House Ways and Means Committee, we believe that the Congress must act to extend these tax incentives for the solar industry which are due to expire on December 31, 1985. The introduction of this legislative initiative is not a cosmetic action at the close of the congressional session. Rather, the legislation provides us with an opportunity to show that the extension of the solar energy tax credits rates high on the agenda of the members of the Ways and Means Committee, and I expect favorable action by the committee after hearings in 1985.

It must be remembered that the solar industry is still very young, with most of the businesses created after the 1973 oil embargo. By 1978 the Congress had passed a broad range of tax incentives for alternative energy resources, and in 1980 the incentives for solar energy were enhanced to a 40-percent credit for residential applications and a 15-percent credit for commercial installations. However, these past 4 years have not been an easy time for our domestic solar energy industry, particularly in regard to the utility of the solar credits. In 1981 and 1982, the credits were under threat to be repealed and investment money for solar commercial applications was put on hold until the issue was resolved favorably by the Congress.

This new legislative package represents a collaborative effort by supporters of the extension of solar credits and the Solar Energy Industries association in providing a realistic set of tax incentives for solar energy while keeping in mind fiscal concerns. The legislation extends the residential solar credits till 1990 with an incremental reduction of the credit by 5 percent per year for all solar residential applications other than photovoltaics which will remain at the current 40 percent level. Since over 95 percent of the solar residential applications are for heating and cooling, the lowering of the credit yearly will have a more favorable impact on the U.S. Treasury than earlier proposals and shows that the solar industry does not need tax incentives indefinitely, yet this still provides a dependable set of incentives for the industry to plan its continued growth. In addition, I have placed a $6,000 limitation on residential domestic hot water systems which limits tax loss to the Treasury and exemplifies that prices for solar systems are far more affordable now.

In addition, solar investment tax credits for commercial applications are maintained at the current 15-percent level through 1990. Photovoltaics—solar electricity—and high-temperature solar thermal—industrial process heat and electricity—have enhanced credits at the 25-percent level due to their relative newness in the energy marketplace.

Although many of my colleagues have valid concerns about the fiscal impacts of any tax credit bills in terms of revenue loss to the U.S. Treasury, we must balance these concerns with the needs of our country for long term supplies of domestic energy. The oil embargo seems a long time ago, but tensions still remain precariously high in the Middle East, and the potential still exists for energy cutoffs. At a

time when U.S. oil imports are rising steadily, the U.S. Congress would be sending the wrong signals by a failure not to extend the solar energy tax credits.

My other concern stems from the rising home and business utility costs throughout the United States. The higher energy costs become, the less disposable income the average American has to spend on other goods and services. Solar energy provides a sure and stable source of energy which hedges against energy inflation. The problem that the solar industry faces in the marketplace, is that the costs for this stable supply of energy occur at the time of purchase of a solar system rather than incrementally over decades as with conventional energy sources such as fuel oil, electricity, or natural gas. Therefore, certain incentives need to be applied in the marketplace to help the consumer or commercial purchaser make this investment which will be in their personal interest and that of our country's over the long term.

The Congress has taken action in tax incentives and innovative financing for other technologies and products. According to the Joint Tax Committee, conventional energy receives $3.85 billion per year in Federal tax incentives. Mortgage interest deductions for the purchasing of homes is another incentive that assists the average American in owning and affording his own home, and maintaining a steady growth in the homebuilding industry. Solar energy is no different, and those of us in the Congress must make a stand to encourage the use of solar energy, which will expand the U.S. domestic solar industry, thus creating more jobs while producing more energy.

I hope my other colleagues will join with me and the members of the Ways and Means Committee who have sponsored this legislation, to actively endorse the extension of these solar credits. Over half of the members of the U.S. House of Representatives signed onto a resolution introduced by my colleague VIC FAZIO this year calling for the extension of the solar and renewable energy tax credits. I plan to reintroduce this legislation in the next session of the Congress in January 1985, so that we can set the legislative process in action to enact the solar credit extension into law. Thank you.

The bill follows:

H.R. 6416

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled,

SECTION 1. AMENDMENTS RELATING TO SOLAR RENEWABLE ENERGY SOURCE EXPENDITURES.

(a) IN GENERAL.—Paragraph (2) of section 23(b) of the Internal Revenue Code of 1954 (relating to qualified renewable energy source expenditures) is amended to read as follows:

"(2) RENEWABLE ENERGY SOURCE.—

"(A) IN GENERAL.—Except as otherwise provided in this paragraph, in the case of any dwelling unit, the qualified renewable energy source expenditures are 40 percent of so much of the renewable energy source expenditures made by the taxpayer during the taxable year with respect to such unit as does not exceed $10,000.

"(B) PHASEOUT OF CREDIT FOR SOLAR PROPERTY.—

"(i) IN GENERAL.—In the case of expenditures for solar property, there shall be substituted for '40 percent' in subparagraph (A) the percentage determined in accordance with the following table:

"For taxable years beginning in:	The percentage is:
1986	35
1987	30
1988	25
1989	20
1990	15
1991 or thereafter	0.

"(ii) SOLAR PROPERTY.—For purposes of this paragraph, the term 'solar property' means property described in paragraph (5) of subsection (c) by reason of the reference to 'solar energy'.

"(iii) CERTAIN PHOTOVOLTAIC CELLS REMAIN AT 40 PERCENT CREDIT.—The percentage determined under this subparagraph shall be 40 percent for taxable years beginning before January 1, 1991, with respect to photovoltaic cells used solely for the purpose of provding electricity.

"(C) MAXIMUM CREDIT FOR SOLAR HOT WATER SYSTEMS.—The taxpayer may not take into account under this paragraph with respect to any dwelling unit more than $6,000 of renewable energy source expeditures for solar property used to provide hot water for use within such dwelling."

(b) SOLAR HOT WATER SYSTEMS MUST MEET CERTAIN ADDITIONAL STANDARDS.—Paragraph (5) of section 23(c) of such Code (defining renewable energy source property) is amended by striking out "and" at the end of subparagraph (C), by striking out the period at the end of subparagraph (D) and inserting in lieu thereof", and", and by adding at the end thereof the following new subparagraph:

"(E) in the case of property which transmits or uses solar energy for the purpose of providing hot water for use within a dwelling, which meets such performance and quality standards (if any) which—

"(i) have been prescribed by the Solar Rating and Certification Corporation (or such other entity as is approved for purposes of this section by the State in which the property is to be installed), and

"(ii) are in effect at the time of the acquisition of the property."

(c) CONFORMING AMENDMENTS.—

(1) Subsection (f) of section 23 of such Code (relating to termination) is amended by striking out "This section" and inserting in lieu thereof "Except with respect to solar property (as defined in subsection (b)(2)(B)), this section".

(2) Subparagraph (B) of section 23(b)(5) of such Code (relating to carryforward of unused credit) is amended to read as follows:

"(B) LIMITATION ON CARRYFORWARDS.—

"(i) IN GENERAL.—Except as provided in clause (ii), no amount may be carried under subparagraph (A) to any taxable year beginning after December 31, 1987.

"(ii) CERTAIN SOLAR CREDITS.—In the case of a carryforward allocable to solar property (as defined in subsection (b)(2)(B)), '1992' shall be substituted for '1987' in clause (i). For purposes of applying the preceding sentence, a carryforward shall be treated as allocable to solar property to the extent of the credit under this section allocable to such property for the taxable year in which such carryforward arose."

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1985.

SEC. 2. AMENDMENTS RELATING TO ENERGY INVESTMENT CREDIT FOR SOLAR PROPERTY.

(a) INCREASE AND EXTENSION OF CREDIT FOR CERTAIN SOLAR PROPERTY.—

(1) IN GENERAL.—The table contained in subparagraph (A) of section 46(b)(2) of the Internal Revenue Code of 1954 (relating to determination of energy percentage) is amended by adding at the end thereof the following new clauses:

"(viii)	Low temperature solar property.—Property described in subparagraph (F)(ii).	15 percent	Jan. 1, 1986	Dec. 31, 1990.
"(ix)	Other solar property.—Solar property other than low temperature property.	25 percent	Jan. 1, 1986	Dec. 31, 1990."

(2) DEFINITIONS.—Paragraph (2) of section 46(b) of such Code is amended by adding at the end thereof the following new subparagraph:

"(F) DEFINITIONS RELATING TO SOLAR PROPERTY.—For purposes of subparagraph (A)—

"(i) SOLAR PROPERTY.—The term 'solar property' means property described in section 48(1)(2)(A)(ii) by reason of using solar energy.

"(ii) LOW TEMPERATURE SOLAR PROPERTY.—

"(I) IN GENERAL.—Except as provided in subclause (II), the term 'low temperature solar property' means property which is solar property solely by reason of subparagraph (B) of section 48(1)(4).

"(II) EQUIPMENT PROVIDING HOT WATER.—Property used to provide hot water shall be treated as low temperature solar property only if such property is designed to provide hot water at not more than 300 degrees Fahrenheit."

(b) AFFIRMATIVE COMMITMENT RULE.—Paragraph (2) of section 46(b) of such Code is amended by adding after subparagraph (F) the following new paragraph:

"(G) AFFIRMATIVE COMMITMENT RULE FOR CERTAIN SOLAR PROPERTY.—For purposes of applying the energy percentage contained in clause (ix) of subparagraph (A) with respect to property which is part of a project with a normal construction period of 2 years or more (within the meaning of subsection (d)(2)(A)(i)), 'December 31, 1993' shall be substituted for 'December 31, 1990' if the requirements of clauses (i) and (ii) of subparagraph (C) are met with respect to such project. For purposes of the preceding sentence, subparagraph (C) shall be applied by substituting—

"(i) 'January 1, 1991' for 'January 1, 1983', and

"(ii) 'July 1, 1992' for 'January 1, 1986'."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to periods after December 31, 1985, under rules similar to the rules of section 48(m) of the Internal Revenues Code of 1954.●

TRIBUTE TO ROBERT CUSHMAN MURPHY JUNIOR HIGH SCHOOL

HON. WILLIAM CARNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. CARNEY. Mr. Speaker, it is always a pleasure for me to stop and take note of the achievements of outstanding individuals and institutions in New York's First Congressional District, on the eastern part of Long Island.

It is especially pleasing to note the achievements of a school, because of the importance of education to our community.

Mr. Speaker, on September 24, the Robert Cushman Murhpy Junior High School was honored by the U.S. Department of Education. On that date, a representative of the Education Department awarded the school the National Award for Excellence. The award is given by the Department to schools under the National Secondary School Recognition Program.

Among the reasons cited for the award, Madeleine Will, Assistant Secretary of Education, listed the quality of Murphy Junior High's honors program, its programs for the learning disabled as well as for physically and emotionally handicapped youngsters. The school was also recognized for its active community support organizations to meet the problems of vandalism, alcohol, and drug abuse. These activities, in my view, represent a total commitment to education and to providing a good environment for our children in which to grow and learn.

Mr. Speaker, I am proud of the Murphy Junior High School. I very much wanted to take part in the awards ceremony on September 24. It is unfortunate that the delays I experienced earlier that day prevented me from participating in the ceremonies. Nevertheless, I did want this body and the American people to take note of this school's achievements.

Murphy Junior High School is an example and inspiration to all of us. For their outstanding work, the administrators, teachers, parents, and students of Murphy Junior High deserve our hearty congratulations.

Mr. Speaker, it is with great pleasure that I note another event of historic interest to Long Islanders and the Nation. A recent New York State Senate resolution pays tribute to one of America's heroes, Nathan Hale, who, when passing through the Barren Pines of Suffolk County to report on troop movements, was captured by the British and hanged.

Nathan Hale's words on the gallows before his execution—"I only regret that I have but one life to lose for my country"—galvanized the revolutionary movement, and stand today as the ultimate expression of the American spirit of freedom and dedication.

Mr. Speaker, I would like to have this resolution, introduced by my good friend and colleague, State Senator Kenneth LaValle, read into the RECORD. I believe that remembering the role of Nathan Hale is appropriate. To a nation whose younger generation sometimes forgets the importance of our rich history, it is necessary to provide reminders of our heroic past.

The resolution follows:

RESOLUTION

Whereas, Attendant to the heroic sacrifice of Nathan Hale in giving his young life for the cause of America's freedom, it is the sense of this Legislative Body to memoralize The Honorable Mario M. Cuomo, Governor, to proclaim Saturday, September twenty-second, nineteen hundred eighty-four, as "Nathan Hale Day" in the State of New York; and

Whereas, Nathan Hale was born in Coventry, Connecticut, in 1755; and

Whereas, While advancing through the Barren Pines of Suffolk County to give General George Washington information concerning troop movement of the British Troops in Suffolk County; Nathan Hale was recognized by his cousin, Samuel Hale, who turned him in to the British; and

Whereas, On September twenty-second, seventeen hundred seventy-six, Nathan Hale was hanged without being given a trial; he was executed by order of Sir William Howe who was in command of the British Troops during the American Revolution; and

Whereas, While on the gallows, Nathan Hale was to utter these immortal words, words that will live forever in the annals of American history: "I only regret that I have but one life to lose for my country"; and

Whereas, Through his consummate heroism Nathan Hale did so bravely and so singularly contribute to the preservation, enhancement and effectuation of that Patrimony of Freedom which is our American Heritage: Now, therefore, be it

Resolved, That this Legislative Body pause in its deliberations and memorialize The Honorable Mario M. Cuomo to proclaim Saturday, September twenty-second, nineteen hundred eighty-four, as "Nathan Hale Day" in the State of New York, recalling, in turn, the unique role which Suffolk County played in ultimately effecting the freedom of This Beloved Nation; and be it further

Resolved, That a copy of this Resolution, suitably engrossed, be transmitted to The Honorable Mario M. Cuomo, Governor of the State of New York.●

ERISA

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. CLAY. Mr. Speaker, both in the Employee Retirement Income Security Act of 1974 [ERISA] and in its subsequent amendments, the Congress manifested its concern over the operation of pension plans. Congress acted to provide independent oversight of pension fund management and to insure adequate funding for employee pensions.

ERISA requires fund managers to act prudently, with diligence, care, and skill in their management of pension funds. Following our guidance, the Department of Labor required fund managers to develop systematic methods of insuring that employers who are obligated to contribute to the plan in fact fulfill their obligations (41 F.R. 12740 (1976)).

Recently I have been shown evidence which clearly demonstrates that this approach is working. Numerous Federal courts have issued recorded decisions in cases in which audits of employer records have led to recovery of thousands of dollars in unpaid contributions for the pension funds.

Furthermore, the audit approach appears to be cost-effective. For example, a recently completed study by the independent certified public accounting firm of Arthur Young & Co. of the Central States Pension and Health and Welfare Funds indicates that for every dollar spent on auditing in 1983, over $7 in deliquent contributions has been identified. Indepcndently, Central States estimated that over one-third of the underpayments they found during the first half of 1980 were due to persons covered by the Central States pension and health and welfare plans who were not reported by the employer.

I am placing in the RECORD the results of the Central States' study and a summary of the court decisions. The permissible scope of field audits is currently under judicial review. I intend to monitor this judicial review process and, if necessary, will suggest congressional action to protect the right of employee plans to assure their financial integrity through employer audits.

TABLE 1.—CENTRAL STATES, SOUTHEAST AND SOUTHWEST AREAS HEALTH AND WELFARE AND PENSION FUNDS—SUMMARY OF AUDIT FINDINGS DUE TO NONREPORTING JAN. 1, 1980 THROUGH JUNE 30, 1980

Month/year	Total audit findings [1]	Total audit findings due to nonreporting	Number of nonreported participants
January	$251,788.50	$47,155.00	54
February	29,906.00	110,463.50	79
March	343,634.00	91,622.00	79
April	163,317.00	80,411.50	191
May	231,578.50	38,093.00	53
June	96,311.00	29,189.00	39
Total [2]	1,116,555.00	396,934.00	495

[1] Audit findings represent the auditor's judgment as to the obligations due and reflect a net figure after all credits during period in question.
[2] 78 employers were audited during this time period; 32 of those account for all of the findings due to nonreporting of participants.

TABLE 2.—SELECTED LISTING OF RECENT FEDERAL COURT DECISIONS

Case	Circumstance	Approximate amount owed
Laborers Health & Welfare Trust Fund v. Kaufmann & Broad of Northern California, Inc., 707 F.2d 412 (9th Cir. 1983).	Audit indicated a discrepancy to controversy regarding covered or uncovered status of particular nonunion labor	$130,000
Burgher v. Consolidated X-Ray Service Corp., 705 F.2d 1426 (5th Cir. 1983), reh'g. denied, 711 F.2d 713 (1983), cert. denied, 52 U.S.L.W. 3844 (U.S. May 21, 1984).	Audit uncovered contributions due on behalf of covered employees who employer erroneously believed were not covered.	100,000
Audit Services, Inc. v. Rolfson, 641 F.2d 757 (9th Cir. 1981)	Deficiency revealed due to failure to contribute on behalf of nonunion covered employees	25,000
I.A.M. National Pension Fund v. Industrial Gear Manufacturing Company, 723 F.2d 944 (D.C. Cir. 1983)	Audit revealed that employer had failed to make all required payments	90,000
Jim McNeff, Inc. v. Todd, 103 S. Ct. 1753 (1983)	Audit revealed that employer owed contributions on behalf of five employees that employer had never reported as covered.	5,000
Brick Masons Pension Trust v. F.K. Pullen, 113 L.R.R.W. 3040 (C.D. Cal. 1983)	An audit of employer records revealed unpaid contributions	44,000

HUMAN RIGHTS VIOLATIONS IN MAINLAND CHINA

HON. GERALD B.H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. SOLOMON. Mr. Speaker, during recent months many enlightened opinion makers in political and academic circles have been falling over one another in their effusions of praise for the liberalization and reforms that are supposedly taking place in the People's Republic of China. Cheered on by the news media, public opinion has been led to believe that the inner circles of the mainland Chinese political leadership are filled with moderates and reformers who are determined to undo the mistakes and excesses of the past.

The truth is not quite so pleasant. And Amnesty International has performed an important service by throwing a bucket of cold water on the parade. A new report just released by Anmesty International paints a sharply different picture of life in the People's Republic of China than that which is applauded by fashionable circles in the West, a safe distance away.

The report centers around five concerns in the People's Republic of China:

First, the arrest and imprisonment of prisoners of conscience and the existence of legislation providing for their detention.

Second, the prolonged detention without trial of people arrested on political grounds. A notable case in this regard concerns the Roman Catholic Bishop of Shanghai. Now 84 years old, Bishop Ignatius Gong Pinmei was arrested in 1955. Five years later he was brought to trial and convicted on the trumped up charges of leading a "counter-revolutionary clique under the cloak of religion." He is still in prison today, 29 years after he was arrested.

Third, inadequate trial procedures and the absence of legal safeguards to assure fair and open trials for people arrested on political grounds. One particularly shocking practice in this regard concerns so-called mass sentencing rallies, in which condemned prisoners are paraded into stadiums, their crimes are denounced, and the death sentence is pronounced in front of cheering crowds.

Fourth, the reported ill-treatment of prisoners, usually in detention centers administered by Public Security Bureaus, and conditions of detention.

Fifth, the extensive use of the death penalty. A wave of executions carried out late last year marked the bloodiest period in contemporary Chinese history since the early 1970's.

It must be noted that Amnesty International submitted a memorandum to the Government of the Peoples' Republic of China in February 1983. The memorandum described in detail Amnesty International's concerns and invited a response from the Government. Despite two subsequent attempts to establish contact with the Government, no response had been received as of June 1984, when this new report was in its final stages of preparation.

Mr. Speaker, I understand that a copy of the report has been sent to each congressional office. I urge all of my colleagues to read it and to give it serious thought. Amnesty International is to be commended for its report, and I ask unanimous consent that a news release describing the contents of the report be printed in the RECORD.

AMNESTY INTERNATIONAL CALLS FOR REFORMS TO PROTECT HUMAN RIGHTS IN CHINA

Amnesty International today, (Wednesday, September 26, 1984), urged wideranging reforms to protect human rights in China.

In a major new report, the worldwide human rights movement called on the Chinese Government to free all citizens imprisoned for their beliefs, to guarantee fair trials for all political prisoners, and to abolish the death penalty.

The report cites evidence of mass executions of political prisoners held for years without trial or convicted after summary proceedings, and of ill-treatment of prisoners.

The 132-page report includes detailed case studies of prisoners of conscience and a memorandum submitted to the government. Amnesty International offered tc publish comments from the Chinese authorities, but it said today that none had been received.

The report says non-violent dissent has been suppressed in China by convicting political activists of "counter-revolutionary offences" which carry sentences of 10 to 15 years in prison.

Prisoners include workers and students active in the "democracy movement" that emerged in China in 1978, Roman Catholic priests loyal to the Vatican and Tibetans accused of supporting nationalist groups.

Some of the political trials have been held behind closed doors, with only selected audiences allowed to attend. In some cases, prisoners' families were not even told trials were taking place.

In other cases, political prisoners have been held for years without charge or trial, assigned to labour camps for "re-education through labour". Some prisoners are reported to have been held in solitary confinement, manacled day and night for days or weeks, beaten or made to stand without moving for 24 hours without food.

Wei Jingsheng, editor of an unofficial magazine which has now been banned, is reported to have been held in solitary confinement since his trial in 1979, allowed out for exercise only once a month. Reports reaching Amnesty International said he became mentally disturbed as a result and was twice moved to hospital in Beijing (Peking) for treatment.

Amnesty International said it did not have enough information to estimate the number of political prisoners now held in Chinese prisons and labour camps. It noted that former inmates say there are political prisoners in more of the country's penal institutions.

Expressing concern about mass executions that began with the launching of a nationwide anti-crime campaign in August 1983, the report points out that 44 crimes are now punishable by death in the People's Republic of China. These include "counter-revolutionary offenses", theft, embezzlement, molesting women and pimping.

Summary proceedings have been used during the campaign in trials resulting in the death penalty.

Defendants can be brought to trial without being given a copy of the indictment first. Appeal procedures have been cut short; the report cites cases in which the accused were executed within six days of the alleged offence.

The report notes that "there is no recognition—either in law or in practice—of the right to be presumed innocent before being proved guilty in a court of law".

Public executions were supposed to have stopped under the law of criminal procedure in January 1980. But the report cites evidence that some executions are still carried out in public and the prisoners' bodies left on display.

Executions are carried out by the traditional method of shooting the victim in the back of the head while he or she kneels.●

A TRIBUTE TO BLANCHE NARBY, "THE PEDDLER OF ZIONISM"

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. LENT. Mr. Speaker, we seldom take the time to recognize the average American citizens who are the real life heroes of our everyday world. I'm talking about the men and women whose brave actions in the face of danger or hardship speak volumes about their concern for their fellow man. They have a deep commitment to higher values, such as freedom and human rights.

I would like to share with my colleagues today a story of one of these everyday heroes: Mrs. Blanche Narby of Bellmore, Long Island. Blanche is a constituent of mine in the Fourth Congressional District. I am very proud to know this fine lady who has done an outstanding job as president of the Conference of the Jewish Organizations of Nassau County. I have worked with Blanche, along with the Long Island Committee for Soviet Jewry, on many occasions in efforts to aid Soviet Jews and I am continually impressed with the energy and commitment this woman devotes to this effort in the cause to preserve human rights.

In early August 1984, Blanche Narby, along with Dr. Phyllis Pacheco of the Suffolk Jewish Communal Planning Council, and a group of 25 people set off on a tour of the Soviet Union. During the tour, Mrs. Narby and Dr. Pacheco would slip away from the tour to visit Soviet refuseniks, Soviet Jewish citizens who have been refused permission to emigrate from the Soviet Union. The women would bring the refuseniks books, newspapers, and other items difficult to obtain in the Soviet Union. They brought the refuseniks something else equally important. They brought them hope in knowing that people in the outside world had not forgotten them in their struggle for religious freedom.

On one trip, the two women set out to visit a Soviet Jewish family. When they got out of their cab, the area was dark and deserted. Suddenly, three plainclothes Soviet KGB agents appeared. They arrested the two women, hauled them into the police station, and charged them with "anti-Soviet activities." As you can imagine, that have been a very frightening experience.

The two women were separated and interrogated for over five hours by local KGB goons who tried their hands at searching them and then trying to extort confessions of wrongdoing from them. During this time, they were forbidden from contacting the American Consulate or their American tour guide.

Their photos appeared on Russian television, and a story appeared in the Soviet official newspaper, Pravda. The announcement read: "Peddlers of Zionism" Blanche Narby and Phyllis Pacheco had been captured, criminals who were part of a zionist plot to stir up the "Jewish problem." A second similar story appeared in the August 3, 1984, edition of the Leningrad Evening News entitled "Zionism Peddlers."

After this exhausting and terrifying experience, the women were released by the Soviet police for "humanitarian reasons," and were allowed to continue their tour with the rest of the group. However, it is doubtful they will ever be permitted to enter the Soviet Union again.

The Kremlin's way to handle its Soviet Jewish citizens is through inhuman repression of their basic rights and freedoms. However, these latest incidents of harassment and violence against American citizens who help Jews in the Soviet Union is extremely disturbing. It is intolerable. These violations against American citizens must be loudly protested by the U.S. Government. Such incidents prove the Kremlin is so paranoid about our protests over their persecution of Soviet Jews that it will go to almost any length to discourage outside contact with Soviet Jews to keep the world from learning the truth about their tragic situation.

These brave women, Blanche Narby and Phyllis Pacheco, deserve our highest commendation. They risked their personal safety to reach their fellow Jews who struggle under the tyranny and oppression of communism.

Now, more than ever we must persist in our strong and vigilant efforts to help Soviet Jews. And I think Mrs. Narby said it very well when she remarked of Soviet Jews and her experience: "We are their lifeline. We are their only contact with the outside world. And if they are not afraid of the repercussions, we should not be."

A translated copy of the story which appeared in the Leningrad newspaper follows.

ZIONISM "PEDDLERS"

The episode that took place on night of August 2 in Leningrad could in honest be a part of a cheap detective movie.

At 8:00 PM a group of American tourists arrived here on a ship from Simferopol. They arrived to hotel "Pribaltiiskaya" and in a couple of hours two dames out of the group: Phillis Pacheco and Blansh Narbi, both residents of the N.Y. City, wandered to the taxi stand, both bending under the weight of two backpacks of rather impressive size. Anxiously glancing around, they ordered the driver to take them to one of remote neighborhoods on outskirts of the city, refused help offered by the driver and disappeared in the dark.

Following the taxi driver's report, militia soon found the suspicious ladies-foreigners and took a curious look at their "cargo". In the bags they found a lot of goods from underwear to the lastest examples of photografic equipment made in Western countries. Even quick approximate appraisal of the "merchandise" gave an amount in four figures.

When asked to explain the reason for the night journey in a strange city, discontented "peddlers" tried to mumble something about a wish to "exchange souvenirs with Soviet citizens". But their notebooks, when checked, did not leave any doubts in the true nature of the incident.

Once again, under the mask of tourists we have found a representative of international zionists organizations, the same that are trying all the time to artificially arise "Jewish problem" in the USSR, nationalistic mood among the Soviet citizens of Jewish descent, using cheap "uncharitable" gifts as a means of encouragement and support of the fictitious "oppressed", who let themselves to be fooled by them.

This time we were dealing with well known for its brazen anti-Sovietism organization "Joint Council for protection of Soviet Jews" which has a headquarters in Washington, D.C. As a president there acts certain Linn Singer, who became known thru the press reports about her hostile anti-Soviet escapades and who is forbidden entry in the USSR. It was she who recruited Phillis Pacheco and Blansh Narbi for the purpose of bringing to Leningrad a portion of "feeding" for somebody who is well known in the zionist circles as a zionist instigator. This is certain A.Ya.Taratuta, a former astronomer who chose not to be a stoker in public bath in order to be able to act as one of the "oppressed and persecuted". The last words are within quotation marks not by a chance: judging from the contents of the undelivered cargo, Taratuta's profit from his activities mounts to much more then simply a doubtful fame of a "fighter for the rights of the oppressed".

Moved by a humanism, competent organs decided this time not to be harsh and only gave a strict warning to Phillis Pacheco and Blansh Narbi to strictly comply with regular rules and regulations for foreigners. They were permitted to complete the rest of their tour to Leningrad after which they will be allowed to collect their "schmates" (my tanslation of the Russian word 'triapieo', Ed.) in order to return it to the zionist trappers of dirty souls.

As recently became known, foreign zionist centers undertook lately a real "mass attach" of anti-Soviet activity. In Leningrad only within last three month were retained while passing the customs in Pulkavo Airport citizens of France Mark Medenberg and Marie Clod Khalifa, who tried to smuggle zionist literature in their baggage and hidden packets. Their compatriots Simon Moille and Alen Saada who were sent to our country as tourists by so called "Committee 15" tried to collect slanderous and tendencious information in exchange for foreign-made cloth. Despite of an education in law which as one would expect gives a person an elementary understanding of lawful limits of behavior, American lawyers Bernard Shavits and Harold Volsky endeavored to meet a bunch of former conmen in search of "facts and documents" which of course would be of the anti-Soviet trend. Citizens of the USA Ben. Hollender and Stanley Epstein tried to organize here "lectures" for the prozionist inclined elements. All this and similar attempts were suppressed.

Our country advocates a wide international contacts in all spheres—political, busi-

ness, cultural. But we always will keep an unwreckable bariers against ideological saboteurs.●

AN END TO SEX DISCRIMINATION IN PENNSYLVANIA'S INSURANCE RATES

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. WALGREN. Mr. Speaker, last week the Pennsylvania Supreme Court held that gender-based auto insurance rates are discriminatory. Last year, among bitter controversy, the Energy and Commerce Committee defeated H.R. 100, the Non-Discrimination in Insurance Act, which would have eliminated sex discrimination in all types of insurance.

I have excerpted portions of the Pennsylvania decision which may be of interest.

[In the Supreme Court of Pennsylvania, Eastern District]

HARTFORD ACCIDENT AND INDEMNITY COMPANY *v.* INSURANCE COMMISSIONER OF THE COMMONWEALTH OF PENNSYLVANIA

PHILIP V. MATTES AND STATE FARM MUTUAL AUTOMOBILE INSURANCE COMPANY, INTERVENORS

Appeal of Hartford Accident and Indemnity Company and State Farm Mutual Automobile Insurance Company

OPINION

(Filed: September 27, 1984)

In this appeal we have agreed to review the Commonwealth Court's affirmance of an order of the Insurance Commissioner of Pennsylvania ("Commissioner") rescinding his prior approval of Hartford Accident and Indemnity Company's ("Hartford") gender-based automobile insurances rates on the ground they were "unfairly discriminatory" under section 3(d) of the Casualty and Surety Rate Regulation Act ("Rate Act"). . . . We have concluded that the Commissioner's action was both within his statutory authority and mandated by the Rate Act, and, therefore, affirm.

The action was initiated by Philip V. Mattes, a Hartford automobile policyholder, who filed a complaint with the Commissioner challenging the legality of the Commissioner's earlier approval of Hartford's gender-based rates. Mattes established at an evidentiary hearing that, as a twenty-six year old unmarried male with an unblemished driving record, he was obligated to pay $148 more in annual premiums than would a similarly situated female insured for identical coverage. Hartford sought to justify its rating plan on the ground that actuarial data indicated that male policyholders in Mattes' age group are more likely to incur accident losses than female policyholders in the same age group.

[NOTE.—The statistics relied upon by Hartford did not reflect whether the policyholder was the actual operator of the vehicle involved in a given accident. While Hartford also offered accident statistics complied by the Pennsylvania Department of Transportation in support of the rate plan, that data had not been employed in the ratemaking process.]

The Commissioner, interpreting the Rate Act's prohibition of "unfairly discriminatory" rates in light of this Commonwealth's public policy against sex discrimination as embodied in the Equal Rights Amendment, concluded that Hartford's gender-based rates were "unfairly discriminatory" and therefore invalid.

The legislature's purpose in enacting the Rate Act is clearly set forth in section one:

"The purpose of this Act is *to promote the public welfare by regulating insurance rates to the end that they shall not be excessive, inadequate or unfairly discriminatory . . .*"

The central provision of the Rate Act is section three. . . . The overriding consideration is section three's mandate that rates may not be "excessive, inadequate or unfairly discriminatory."

Thus the Rate Act, *independent of any federal or state constitutional provision*, proscribes "unfairly discriminatory" ratemaking by insurers in this Commonwealth and provides administrative and judicial remedies therefor.

The basic issue in this appeal is the proper interpretation of the phrase "unfairly discriminatory". That phrase is not defined in the Rate Act itself. The Commissioner concluded that he was compelled to interpret the statutory prohibition against "unfairly discriminatory" rates in a manner consistent with the strong public policy against gender-based discrimination under law as expressed in Pennsylvania's Equal Rights Amendment. Appellants Hartford and State Farm attack that conclusion arguing in favor of a narrow interpretation of the phrase which would limit the prohibition of section 3(d) to rates which are not "actuarially sound."

In the proceedings before the Commissioner, Mattes established conclusively that Hartford required him to pay a significantly higher premium than a similarly situated woman would be charged for identical Hartford coverage solely on the basis of his gender.

The question to be resolved is whether such discrimination falls within the parameters of the Rate Act's prohibition against "unfairly discriminatory" rates.

We conclude that section 3(d) manifests separate legislative objectives which represent the recognition that a rate may be justified by the actuarial data offered in its support, yet unfair in its underlying assumptions and its application to the individual. Accordingly, appellants' narrow, technical view of the Rate Act's mandate of "fairness" must be rejected.

We must next consider whether the Commissioner was justified in looking to the Pennsylvania Equal Rights Amendment in his determination of whether Hartford's gender-based rate plan was "unfair." Appellants seek to characterize the Commissioner's disapproval of Hartford's rate plan as an unauthorized attempt to impose his personal theories and perceptions of social policy upon the insurance industry. We disagree. As we have already concluded, it was appropriate for the Commissioner to look beyond actuarial statistics in evaluating the fairness of Hartford's discriminatory rates. Since those rates were based on the gender of the insured, the Equal Rights Amendment was necessarily relevant.

The Equal Rights Amendment was adopted by the voters of this Commonwealth on May 18, 1971. The Amendment provides:

"Prohibition against denial or abridgement of equality of rights because of sex.

"Equality of rights under the law shall not be denied or abridged in the Commonwealth of Pennsylvania because of the sex of the individual."

We have not hesitated to effectuate the Equal Rights Amendment's prohibition of sex discrimination by striking down statutes and common law doctrines "predicated upon traditional or stereotypic roles of men and women. . . ."

The text of Article I, section 28 makes clear that its prohibition reaches sex discrimination "under the law." As such it circumscribes the conduct of state and local government entities and officials of all levels in their formulation, interpretation and enforcement of statutes, regulations, ordinances and other legislation as well as decisional law. The decision of the Commissioner in a matter brought pursuant to the Rate Act is not only "under the law" but also, to the extent his adjudication is precedent on the question decided, "the law."

Thus, in light of the Pennsylvania Constitution's clear and unqualified prohibition of discrimination "under the law" based upon gender, we conclude that the Commissioner's disapproval of Hartford's discriminatory sex-based rates on the ground they were "unfair" and contrary to established public policy was in conformity with section 3(d) of the Rate Act and an appropriate exercise of his statutory authority.

Accordingly, the Order of the Commonwealth Court affirming the adjudication of the Insurance Commissioner is affirmed.●

DOUBLE STANDARDS IN THE MEDIA

HON. DUNCAN HUNTER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. HUNTER. Mr. Speaker, the following editorial which appeared in the Wall Street Journal accurately describes the double standard which the U.S. media has established in scrutinizing the financial affairs of national political figures. I commend it to my colleagues.

ABOUT PRESS VENDETTAS

The ethicists of the press have been clucking about two things these past two weeks, and the comparison tells a lot about their standards, moral and professional. Despite the release of a 385-page independent counsel's report, they have decided questions remain to be asked about the financial affairs of Ed Meese and his wife. But all questions about the finances of Geraldine Ferraro and her husband have been answered, and anyone insisting on asking more will get booed by the defenders of the public's right to know.

To take the Ferraro matter first, tongues have been clicking in pressdom about our Sept. 13 story by Jonathan Kwitny and Anthony De Stefano. It revealed that Rep. Ferraro's father-in-law, Philip Zaccaro, had a pistol license revoked for signing a character reference for a notorious gangster, owned a building that served as a front address for another top gang figure, and made large loans to an individual who later was convicted of labor racketeering and also contributed to Rep. Ferraro's election campaigns. Rep. Ferraro served as attorney to the four buyers of the front-address building, and the story reported that three of

them could not be found and detailed the curious background of the fourth, a "body broker" on Mulberry Street. (For later details, see "Update" nearby.)

The press ethicists came down on the same side as many of our letter writers today; they spied a press vendetta. Columnist William Safire wrote about "the fury of the assault on Mr. Mondale's running mate by The Wall Street Journal, which regularly poohpoohs ethical lapses by higher government officials but finds shocking the revelation that Representative Ferraro's dead father-in-law may have signed a pistol permit for a Mafioso." Columnist Mike Royko chatted about being "an 11th cousin of Gambino." The New York Times and the Washington Post carried press stories, making much of the placement of the story on the editorial page." Is there a subliminal message here? innuendoed Sam Zagoria, "ombudsman" for the Post. The question was framed directly by Newsweek: "Has Ferraro been the victim of a hit job?"

The ethicists seen inexplicably to have forgotten the ongoing controversy over the adequacy of Rep. Ferraro's financial disclosures. For years she has claimed a disclosure exemption to which she is patently not entitled. The tax returns released at her Kennedy Airport news conference are missing the schedules that would disclose the sources of her husband's income. While the press applauded at the end of her press conference, the House Ethics Committee felt it had to charter a formal investigation. Our interest in the Zaccaro finances starts not with vowels at the end of names, but with these disclosure problems.

Nor was Phillip Zaccaro some 11th cousin. He was the founder of the business at issue in the refusal to disclose the sources of John Zaccaro's income. Rep. Ferraro is herself an owner and officer of the central corporation, P. Zaccaro Co. Inc. What we know about John Zaccaro's own activities—his renting to pornography distributors and clubs drawing gambling raids, his being removed as conservator of an estate after lending himself $175,000 of its funds—is a natural matter of curiosity.

So our own reporters pored over the public records, doing their own investigation. They uncovered a rather interesting story, and it seemed to us appropriate to share it with the public. Our story was not sensationalized, but written in a restrained and responsible way. The voters can make their own judgments about the relevancy of the Philip Zaccaro legacy to Rep. Ferraro's fitness as a potential president. Some will find that her refusal of more complete disclosure raises large questions of character; obviously others will support her as the underdog attacked while down. But however the electoral balance cuts, we are utterly mystified by the ethicists' suggestion that it is somehow the responsibility of journalists to stand in the way of telling the story.

As we read the ethicists on our Ferraro article, the question that kept running through our minds was, what if it were Ed Meese? What if he refused to disclose the sources of his wife's income? What if he were an officer of a corporation started by a man who gave a character reference for a top gangster? What if he dealt with such questions by complaining about prejudice against names ending in silent vowels, and having his press secretary declare, "These are not valid questions"? Would Newsweek be asking, "Has Meese been the victim of a hit job?"

In the Meese case there is by now no question of full disclosure. The facts have been detailed by an independent counsel, appointed by the D.C. Court of Appeals, armed with five deputy independent counsel and a grand jury. As an example of the kind of things raised by the press and studied by the counsel, see the matter of the cuff links nearby. The counsel found no reason to charge Mr. Meese with any wrongdoing by the standards of the criminal law, which at least provides a codified standard that can be applied with some evenhandedness. The report duly noted that the law does not cover all morality.

Despite the caveat, the counsel's report was no merely technical or equivocal dismissal of the charges. A friend who made loans to Mrs. Meese received a government job, but he obtained the job "without the knowledge of (or any intervention by) Mr. Meese." A savings and loan decision to extend his mortgages rather than foreclosing was "sound from a business point of view." While early and later-corrected disclosure statements were incomplete, there was "no substantial evidence of any motive on Mr. Meese's part to conceal," and "no indication of any underlying improper or illegal conduct."

How do the ethicists react to this language by a court-appointed independent counsel? "It means only that their actions were not indictable as crimes. They did nothing criminal, but they did plenty to provoke suspicion, which in a public official is wrong," pooh-poohed William Safire. "The law does not make an independent counsel an ethical ombudsman or an arbiter of good tast, judgment or competence," Stuart Taylor Jr. wrote in a New York Times News Analysis. Everyone now talks of "qualifications for the office," though clearly the nomination would have been confirmed months ago except for the allegations the independent counsel has now dismissed.

A decade ago we made ourselves unpopular with our colleagues of the press by insisting that the Watergate charges be subjected to some standard of procedure and proof. While this role is not the sort of thing for which one expects laurels, it has been a source of pride to us. For by the time President Nixon resigned, the nation had reached a true consensus that he should do so. Perhaps the most amazing part of the episode is that today no substantial minority of citizens feels Mr. Nixon was merely houndred from office by an adversarial press. Relatively little rancor remains now because he had some "defenders" then.

We had hoped, too, that this would set some standard concerning press scandals, that substantial proof and some degree of consensus would be necessary to force out public officials. This so far has not turned out to be the case, at least when the officials have been conservative Democrats or Reaganite Republicans. Mr. Safire forced Bert Lance out of government, and did not turn in his Pulitzer Prize when the jury failed to convict. More recently, he has been giving sermons about such weighty ethical concerns as the Wick tapes and the Deaver diet book (the game here is the parochial power politics of an inbred company town; "Mr. Deaver, who may one day finish writing his diet cookbook, returned my calls"). Anne Gorsuch Burford was permanently hounded from public life, though Justice Department investigators couldn't find anything she did wrong and even her critics can't seem to agree on what it might have been. No one booed reporters for rudeness when they camped on Richard Allen's laws; he was forced out over a watch and $1,000 in a safe.

If these are the prevailing community standard, the history of P. Zaccaro Co. has to be newsworthy; surely it is not the duty of journalists to conceal it. Indeed, we suspect some voters may be more interested in a legacy of crime connections than a conflict of interest in a diet book or the value of Ed Meese's cuff links.

But no, the ethicists who established these standards have suddenly decided this kind of scrutiny is unfair—when it happens to be applied to a liberal, Democratic, feminist candidate. The ethicists have the further gall to suggest that it is we who are following a double standard. We did not invent the standards, but if they exist they should be impartially applied.

No one would be happier than we if solicitude over fairness to Rep. Ferraro were leading the ethicists to rethink the standards they apply to stories of scandal or personal controversy, but sadly their reaction to the Meese report suggests that so far this is not the case. What they express in their Ferraro attitudes is instead a double standard, pure, simple and outrageous.●

LEGISLATION TO IMPROVE THE 1985 FEED GRAINS PROGRAM

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. BEDELL. Mr. Speaker, I am today introducing legislation which would require the Secretary of Agriculture to include a paid diversion component as a part of the previously announced 1985 acreage reduction program for feed grains.

Mr. Speaker, corn producers in Iowa, and I, were greatly disappointed when we learned the details of the 1985 feed grains program as announced by Secretary of Agriculture John Block on September 14. Although we were pleased with the early date on which the program was made public, we were particularly distressed to find that, despite the continuing crisis in agriculture, the program advanced by the Secretary actually assumes still lower prices for farmers, an increase in production and surplus stocks, stagnant exports, and generally no relief for the terrible problems currently plaguing our farm economy. Indeed, the details of the 1985 feed grains program appear to give the clearest evidence yet that this administration does not recognize the magnitude of the crisis facing our farmers today.

Please let me explain the details of the announced program. According to the USDA announcement, corn farmers must idle 10 percent of their corn base in 1985 in order to qualify for commodity loans and price protection. The loan rate offered will be $2.55 per bushel and the target price $3.03—the minimum levels required by law (the Secretary has the authority to increase these amounts) and the same

levels provided under the 1984 program announced 1 year ago.

Most alarming, however, are the price and income projections which USDA itself assumes will result as a consequence of its program. First, USDA assumes that just 53 percent of our farmers will participate in the 1985 program, compared to 55 percent this year and 72 percent last year. This means a program less effective in reducing production, and more farmers without some form of price protection.

Second, USDA assumes that under normal weather conditions, U.S. corn farmers will produce a 7.8-billion bushel corn corp which, if it materializes, would be the fourth largest crop on record. In the meantime, because USDA expects corn exports to remain stagnant next year, and domestic consumption is expected to increase only slightly, surplus corn stocks are expected to increase from just over 1 billion bushels after the 1984 marketing year to almost 1.3 billion after 1985.

The final blow, however, is delivered in the price projections offered by the Department of Agriculture. According to USDA analysts, the season average price for the 1985 crop of corn is expected to be just $2.70 per bushel, which translates to a cash price for famers in my part of Iowa below $2.50 per bushel. That's well below the farmer's cost of producing corn, which Iowa State University calculates to be near $3 per bushel this year.

Moreover, USDA's $2.70 season-average price projection for the 1985 crop is 19 cents lower than the current year's price and a full 54 cents per bushel less than the price received by farmers in 1983. I must point out that even when corn prices were much higher in 1983, total net farm income was just $16.1 billion and farm bankruptcies and foreclosures were escalating. In light of this, how can we possibly hope that the lower prices expected in the future will pull agriculture out of its current nose dive?

Mr. Speaker, this is the final week of the legislative session and I know that time will not allow us to move my legislation yet this year. However, signup for the 1985 feed grains program does not end until March 1 of next year, thus providing us the opportunity to enact an improved feed grains program early in 1985.

Fortunately, there are indications that Secretary Block is beginning to recognize the shortcomings of the feed grains program he announced. Just one day after the Committee on Agriculture called him before the committee, at my request, to explain his position on the various farm programs for 1985, he stated that he may augment the announced program with a paid diversion if corn carryover projections increase over the course of the next several weeks.

The purpose of my legislation today, Mr. Speaker, is to alert the Secretary of Agriculture to my intention of making this bill the first order of business at the start of next year if he does not improve the announced program in the face of increasing carryover projections.

Farmers must have some hope that relief is on the way or I believe that we can anticipate the broad failure of many farmers, small businesses and some rural banks next year. Our rural economy cannot wait longer for economic recovery to take hold.

The text of the bill follows:

To direct the Secretary of Agriculture to carry out an acreage limitation program and a land diversion program for the 1985 crop of feed grains

H.R. 6413

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 105B(e)(1)(C) of the Agricultural Act of 1949 (7 U.S.C. 1444d(e)(1)(C)) is amended by adding at the end thereof the following new sentence:

"Notwithstanding the foregoing provisions of this subparagraph or any previous announcement to the contrary, (1) the Secretary shall, for the 1985 crop of feed grains, provide for a combination of an acreage limitation program as described in paragraph (2) and a land diversion program as described in paragraph (5) under which the acreage planted to feed grains for harvest on the farm would be limited to the acreage base for the farm reduced by a total of 15 percentum, consisting of a reduction of 5 percentum under the acreage limitation program and a reduction of 10 percentum under the diversion program, and the diversion payment rate for corn shall be established by the Secretary at $1.50 per bushel; and (2) as a condition of eligibility for loans, purchases, and payments on the 1985 crop of feed grains, the producers on a farm must comply with the terms and conditions of the combined acreage limitation and land diversion program.".●

UPDATE ON THE SALE OF CONRAIL

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. BROYHILL. Mr. Speaker, I want to take a few minutes to bring my colleagues up to date on the proposed sale of Conrail. At the outset, let me congratulate the Secretary of Transportation, Elizabeth Hanford Dole, on the excellent progress she has made in carrying out the congressional mandate to sell Conrail under the procedures prescribed by Congress in the Northeast Rail Services Act of 1981. Her efforts to date can best be appreciated by putting the Conrail sale process in perspective.

Conrail was established in 1976 by Congress in order to preserve vital rail service in the Northeast. At that time, a series on bankruptcies of rail carriers threatened to discontinue service to the communities and shippers of this region.

Since Conrail began its operations, the Federal Government has dedicated over $7 billion to continue service, ensure labor protection, transfer commuter service, and purchase the properties from the bankrupt carriers. From the outset, it was clear that Conrail required these subsidies in order to operate successfully. Saddled with a costly labor protection program, a swollen work force, commuter service and a lagging traffic base, Conrail required substantial Federal subsidies until 1981.

At that point, Congress enacted the Northeast Rail Services Act of 1981 [NERSA]. NERSA gave Conrail the "tools" it so badly needed to bring its head above water. Guided by very competent management, Conrail has been able to reduce its labor protection costs, rid itself of commuter service, reduce its work force and obtain wage concessions under NERSA. Deregulation under the Staggers Rail Act of 1980 has also played an important role in Conrail's recovery. Legislated flexibility in the setting of rates and establishment of routes, have enabled Conrail to respond to the needs of the marketplace and become a competitive entity with other transportation modes.

The rebound of Conrail has culminated in a finding of "profitability" by the U.S. Railway Association [USRA]. Profitability is important because NERSA instructed the Secretary of Transportation to sell Conrail as an ongoing entity if USRA found that Conrail was profitable, according to criteria set forth in the statute. In June 1983, USRA found Conrail to be profitable. The Secretary of Transportation then hired the investment banking firm of Goldman, Sachs in accordance with the requirements of the statute, and began the search for a buyer of Conrail.

To date, 15 bids to purchase Conrail have been received by the Secretary. These include offers from the Railway Labor Executives Association [RLEA], rail carriers, investment groups, and private individuals. Negotiations proceeded through the summer months, and on September 11, the Secretary announced she had narrowed the field of prospective purchasers to three: The Norfolk Southern Corp., the Marriott/Bass Group, and the Alleghany Corp. At the same time, the Secretary submitted these offers to the Department of Justice and the Department of the Treasury for review. The Justice Department will carefully examine the competitive impact of a sale to each prospective purchaser. The Department of the Treasury will analyze

each bid in terms of its tax or financial impact.

I commend the Secretary for following a prudent and deliberative course of examining all ramifications of the sale. Some have charged that the process for completing the sale is somehow on a "political track" and that the Secretary intends to announce a final purchaser prior to the November elections. Frankly, I have no idea when the Secretary will make her final decision, but I am satisfied that she is carefully following the law and is conducting a careful, deliberative process in consummating the sale.

Once a selection is made, perhaps sometime this fall, the Secretary will transmit her recommendation to Congress. Appropriate legislation will have to be enacted to facilitate a sale, ensuring congressional review of the transaction.

It is important, Mr. Speaker, that the Northeast region of the United States be assured, for the long term, essential rail service. It is also critiical that Conrail be sold into the private sector once a recommendation is made by the Secretary, so as to make certain that the Northeast is not treated as a "stepchild" with respect to rail service.

I am hopeful that in the 99th Congress the necessary legislation will be enacted to permit the purchaser selected by the Secretary to take over the reins of Conrail. The Conrail experience has taught us all that Government ownership is no longer necessary or desirable. Any congressionally imposed delay in the sale, at this point in time, is not in the interest of Conrail's employees or shippers, nor is it conducive to a successful sale process.●

DUNBAR DAVIS

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. PURSELL. Mr. Speaker, I rise to honor an individual whose years of civic service in Michigan's Second District are an inspiration and example to us all. Dunbar Davis, judge of the 35th District Court in Plymouth, MI, is retiring this year. I would like to take a few moments to relate some of the accomplishments of this remarkable man I am proud to count among my very closest friends.

Dunbar Davis was born in Southport, NC, in 1913. He graduated from high school there in 1930, then moved to Richmond, IN, to attend Earlham College. Before earning his A.B. in 1934, Mr. Davis had played on the baseball and tennis teams—earning his varsity letter—and won the college public speaking contest. He also managed to meet a charming and attractive coed named Martha Beck.

Dunbar earned his juris doctorate degree from the University of Michigan in 1937, the same year he married Martha Beck. After working as a steelworker for 2 years in Baltimore, Mr. Davis saved enough money to buy the necessary law books and hang out his shingle in Plymouth. He went into partnership with Nandino Perlongo, a blind classmate to whom Dunbar had to read aloud during law studies.

Dunbar took 2 years out of building his successful practice to serve his country in World War II, in the Military Police Division of the U.S. Army. In 1946, he returned to private practice, continuing his long record of public service by being elected to the Plymouth City Council.

In 1967, he was appointed a municipal judge by the Plymouth City Commission, serving in that capacity for a year. The State of Michigan then reorganized the local court system from municipal courts to district courts. In 1968, Mr. Davis was elected as the inaugural judge in the newly formed 35th District Court. State law required him to give up his highly successful 30-year law practice at that time. He has since won two successive bids for reelection, and is now retiring from the post which he has filled so capably and honorably.

Mr. Speaker, I am not the only person to recognize the value of Mr. Davis' service to his community. In 1981, the District Court Administration Board voted to name the newly constructed district court building the "Dunbar Davis Hall of Justice," making him one of only three judges in Michigan to ever be so honored.

Dunbar Davis has also played a vital role in countless young peoples' lives. Because of his concern for young people, he established an effective, workable probation department for the 35th district court, which currently utilizes 75 volunteers and 5 employees.

Dunbar also encourages young people to become acquainted with the law by inviting school classes to visit his court, where he speaks to them, answers questions, and allows them to witness actual court proceedings. Along the same lines, he initiated observance of "Law Day" on May 1. With the help of local attorneys and high school teachers, he assists high school students simulate trials and court procedures.

He donated a house and lot in Plymouth to the Plymouth YMCA. He has served as a judge for Boy Scout contests, high school oratorical contests, and other youth programs. As youth leader of the First Baptist Church of Plymouth, he helped build a log cabin on some of his own wooded acreage, which was used as a weekend retreat for boys in the church.

He has performed more than 4,000 wedding ceremonies, receiving letters from many of the newlyweds commending him on his beautiful and unusual services. I know that Dunbar has a deep commitment to the institution of marriage, and has directed that commitment to performing a private, intimate ceremony that is appropriate to the sanctity of the institution.

His leadership shows up in other areas of the community also. He is active in the Plymouth Community Chamber of Commerce, the Plymouth Kiwanis Club, the Plymouth Historical Society, the Masons, Eastern Star, Odd Fellows, Senior Citizens Club of Plymouth and Plymouth Township, and is a former member of the Plymouth Symphony Board, Family Services Board, and the Northville Rotary Club.

Dunbar is also committed to serving his church. As a member of the First Baptist Church of Plymouth, he has served as Sunday school superintendent, Sunday school teacher, chairman of the board of deacons and board of trustees, member of the men's fellowship, and a member of the State Executive Board of the American Baptist Churches of Michigan.

In recognition of Dunbar Davis' untiring community service, in 1976, the American Legion named him Citizen of the Year. In 1980, the Gideons International awarded him the title "Man of the Year."

Mr. Speaker, this man's admirable record of leadership and service is an example that any of us would do well to follow. After 71 years of vigorous trailblazing, he is going to concentrate on spending time with his grandchildren, counseling other young people, jogging, enjoying his hobby of photography, and, as he puts it, "reciting poetry to anyone who will listen." I might add that he will also spend part of his time trying to beat his Congressman in tennis.

Dunbar has been a part of my life for over 37 years. Our friendship has meant much to me and my family. We love and respect this great man. He is an inspiration to this great community and the United States of America.

Reviewing Dunbar's accomplishments reminds me of the fundamentally great nature of this Nation's citizenry. With spirit and energy like Mr. Davis', I feel confident that our country's future is brighter and better than ever.●

TOO MUCH GLOOM AND DOOM ON FUTURE

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. PHILIP M. CRANE. Mr. Speaker, I find it extremely disheartening to hear politicians pessimistically pro-

jecting the rapid destruction of our environment, the decline of our economy, the likelihood of a nuclear confrontation with the Soviet Union, et cetera. At a time when America seems to be back on the right track again, it is beyond my comprehension why some people appear to be bent on discounting our prosperity and forecasting more gloom and doom ahead. I realize that election year politics has something to do with this, but to hear these predictions from political leaders of this country is both frightening and repulsive. One can only hope that these doomsayers are really just attempting to exploit a political angle and do not actually believe that the end is near. America does not need pessimists for leaders.

As a father of eight, I am especially alarmed that this pessimism now plagues the academic environment. Without hope for the future and a belief in this country, how well prepared is the next generation of America's leaders going to be for the tasks that confront them?

The following article by Albert Shanker, president of the American Federation of Teachers, describes a study by the Hudson Institute that revealed that a cloud of pessimism hangs over our high school students and the Nation in general. Optimism and the hard work ethic is what built this great country, and these philosophies still hold the key to its continued prosperity and future.

The article follows:

[From the New York Times, July 22, 1984]

STUDENTS NEED A BALANCED VIEW—TOO MUCH GLOOM AND DOOM ON FUTURE

(By Albert Shanker)

What people think makes a difference in how they act. The philosopher William James used the example of someone hanging onto the edge of a cliff. If the person is an optimist or has at least some faith, he may well hang on long enough for rescuers to come. If, on the other hand, he feels all is hopeless, that he is doomed no matter what, he may well let go too soon—just before someone comes to save him.

Our schools play a role in creating optimism or pessimism. In addition to teaching math, English and other basics, schools—in social studies, science and other classes—give children a vision of the future. If that vision is unrealistic in either direction—overly optimistic or overly pessimistic—students may well grow into adults who sit on their hands and do nothing.

If it's overly optimistic, they may think there's nothing they have to do; if it's too pessimistic, they may think there's nothing they *can* do—and, like the hopeless cliff-hanger, they may just give up. What have our schools been teaching children about the future?

Well, mostly they've been reflecting the larger society. During the last few decades the American public has been given a very pessimistic view of what the future holds. There have been best sellers devoted to the rapid destruction of our environment. There have been books, magazine articles and television shows devoted to the depletion of vital energy and mineral resources and predictions of massive starvation resulting from world population growth.

For the most part, only one side of the argument has been made, that side. Sure, there's usually someone who disagrees, but that someone is portrayed as representing a special interest whose goal is to exploit nature to make a fast buck now. All of this has had an enormous impact on the curricula of the schools. Nothing is more "relevant," interesting or exciting than for teachers to gather these exposés and make this generally accepted wisdom the basis for teaching the daily lesson in science or social studies.

Of course, there's no doubt that we did neglect to take care of our environment, and much of the emphasis on the effects of pollution, of chemicals in food, of problems with waste disposal has resulted in necessary corrective steps. But, one of the results of this recent teaching has been to create a pessimistic bias in many textbooks and courses. The late Herman Kahn, founder of the Hudson Institute, one of America's most important think tanks, was shocked by what he called the "cloud of pessimism" hanging over our high school students and the nation.

The institute examined 63 basic high school textbooks published since 1962 to see how they dealt with questions of population growth, environment, natural resources and economic development. (The study formed the basis of *Why Are They Lying to Our Children?* by Herbert I. London, director of the Hudson Institute's Visions of the Future program, which seeks to present students and teachers with a more balanced view of the world's problems and America's role. It's just been published by Stein & Day, Briarcliff Manor, N.Y.)

The study found "an astonishing amount of misinformation and sloppy writing," contradictions, a "lack of objectivity" in textbooks—and that they were clearly aimed at changing student attitudes and behavior in one direction. One text, published in 1981, presented this apocalyptic vision: "You may have heard about the 'four giant horsemen' galloping across the face of the earth. One stands for Famine, the second for Disease, the third for War, and the fourth for Death. Today, these four gaint horsemen are galloping more swiftly than even before. But many, many others still do not see the danger."

According to Jane Newitt, director of demographic studies at the Hudson Institute, writing in the January 1984 issue of *Social Education*, "A reasonable desire—to impress students with the magnitude of the world's problems—has been pushed to the point of substituting indoctrination for substantive instruction." Newitt says the doom and gloom books are so intent upon making their points that they fail to mention the vast increases in per capita income since 1960 in the countries with 94% of the world's population, or the huge increases in life expectancy.

The population is said to be growing faster and faster, but few books mention the fact that the population growth rate peaked nearly 20 years ago and has been declining ever since. The books predict massive famines—but fail to report that world food production has outpaced population growth for three decades. Of course, there are people starving, but not because there's not enough food. The reason is the political problem of how to get the food to those who need it. If we don't tell that to students, their efforts are going to be focused in the wrong direction.

Newitt demonstrates that there's a clear political and moral message in these books. "We" are responsible because we are eating, wasting and consuming too much. That's why "they," the have-nots, are deprived. "Thirty-one textbooks allude to looming ecological castastrophes of global proportions.

Invariably, it is 'especially affluent human beings like the Americans' whose profligate and irresponsible consumption threatens 'to make the earth unlivable' and accounts for the plight of the Third World's starving masses. What is relatively new," she writes, "is the intrusion of this moral mission into the traditionally dry matter of textbooks." It is "ideology," she says, "and rigid. By placing students on the morally reprehensible side of the 'gap,' it denies legitimacy to their competitive spirit and their desire for the life-enriching experiences money can buy."

More important, the global pessimism of these textbooks sends students the wrong message about their own country. Newitt says there is no reason to believe American students would become complacent about the world's problems "if they were encouraged to view themselves as part of the spectrum of nations—and as a part that makes many contributions to the betterment of the whole." ●

RUSSELL E. CLARK COMMENDED

HON. HAL DAUB

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. DAUB. Mr. Speaker, Russell E. Clark of Omaha, NE, has recently been named as the grand worthy president and leader of the largest fraternal organization in the world, the Fraternal Order of Eagles.

This is a well-earned honor and a deserved recognition of Russ's outstanding accomplishments. As a friend of Russ and a fellow member of South Omaha Aerie No. 154, I am proud of his achievement and take this opportunity to share his success story with my colleagues in the Congress.

THE 1984-85 GRAND WORTHY PRESIDENT

All success stories have a beginning, and an ultimate attainment, of the rise to the top! Russ's story began as all other with his birth to his parents, Ross & Nina Clark, on the family farm in Polk County, Nebraska. After moving to Shelby, Nebraska, he attended schools in Shelby and graduated from Shelby High School. After graduation, Russ held many different jobs in his career, but concluded his last 30-years as a linotype operator for newspapers: The Wahoo Wasp, Omaha World-Herald and at the Livestock Press. During this time, he served for a period of time as Secretary-Treasurer of the State Typographical Union in Nebraska. Russ and Darlene were married in Wahoo in 1943 and have three children, Russ, Jr., of Seattle, Washington; John from Pasadena, California; and Debbie of Culver City, California. They are also blessed with two grandchildren, Emily and Cody.

Russ became a member of South Omaha Aerie No. 154 in 1957 and immediately became involved in this great fraternity. His

first assignment was Entertainment Chairman for the Saturday night dances. After serving on this committee, Russ was appointed Aerie Conductor and became Aerie President during the 1962-63 Eagle term. At the conclusion of his presidency, Russ began an uninterrupted 15 years as a member of the Board of Trustees and then attained Chairman of the Board. These 15 years were filled with many great Eagle activities for Russ, as he became an officer in the Nebraska State Aerie, and in 1972 became State President of our State Fraternal Order. During these years, Russ was also Worthy Conductor of his Aerie Ritual Team and earned the honor of All-State Conductor for eleven consecutive years. Russ assumed the Chair of President of Aerie Ritual Team—which, as a unit, has since won four Class B National Championships.

In 1974, Russ became 154 Aerie Secretary and Editor of the 154 Hi-Flyer—a post he still holds today.

Russ began his rise in the Grand Aerie when he was appointed to the position of West Central Regional President in 1973-1974. He also found time during these years to serve as West Central Regional President of both the Max Baer Heart Fund and the Jimmy Durante Childrens' Fund. Both of these National Funds have raised millions of dollars for research and aid.

Russ's election as Worthy Chaplain in 1977 of the Grand Aerie was followed by four years on the Grand Board of Trustees. His continued rise in the Grand Aerie to Vice-President and then to Grand Worthy President-Elect has culminated in the achievement of his position as Grand Worthy President for the year 1984-1985—the very first man from Nebraska to reach this goal.●

FUTURE FARMERS OF AMERICA AWARDS

HON. E de la GARZA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. DE LA GARZA. Mr. Speaker, a significant event occurred in the Capital recently when awards were presented to 37 State winners, and to the top five national winners, in a Future Farmers of America competition in designing imaginative applications of computer technology for agriculture.

The Future Farmers organization, which includes many young people in our rural high schools around the country, is one of the best training grounds we have for future leaders in agriculture and rural affairs.

The program demonstrates that the FFA is moving forward to help the coming generation understand and make full use of the benefits of modern computer and communications technology. Today's farmers, with all the problems they face in production and marketing, are finding more and more that they can make effective use of tools like computers to get timely information and to produce faster, more efficient decisions in their complex businesses.

I want to bring this latest FFA program to the attention of the House because I think it is a hopeful sign that our oncoming generation of new young people in agriculture will be well equipped for the fast-moving and difficult fields they are entering.

When the FFA computer program awards were presented in Washington in August, the national FFA executive secretary, Coleman Harris, commented that the computer has been identified by FFA as "one of the most important tools necessary for success in the tough agricultural climate." The awards were sponsored by the National FFA Foundation in cooperation with a private agricultural information and communications service, AGRIDATA Resources, Inc., of Milwaukee.

The first place national winner in the contest was Kevin E. Gingerich of Kokomo, IN. National runner-ups were: Debra Dee Haack of Fond du Lac, WI; Dotty Behne of Sherburn, MN; Barry A. Hines of Philpot, KY; and Lonnie Webb of Lincoln, AZ.

Other State winners in the contest were: Robert Powalski of Fairbanks, AK; David Martin, Jr. of Brierfield, AL; Kim Gray of Gilbert, AZ; Scott Eric Johnson of Platteville, CO; Wilson Korth of Cornwall, CT; Steve Kaufman of Sarasota, FL; Timothy Harrell of Whigham, GA; Brian Gosch of Webster City, IA; Vern Steiner of Bruneau, ID; Craig Perkinson of Thawville, IL; Max Schmidt of Canton, KS; Tammie Michelle Miller of Iota, LA; Dean Tobey of Corunna, MS; Randall Lee Horine of Norborne, MO; Thomas Lechner of Winifred, MT; Donna Keidel of Mandan, ND; Ronald Glinsmann of Ravenna, NE; Eric Lavoie of Barrington, NH; Bill Perez of Elwood, NJ; Steve Stearns of Nogal, NM; John Robert Mudd of Websterville, OH; Scott Carlson of Boardman, OR; Wynn Richardson of Pocasset, OK; Lynwood Nester of Mechanicsburg, PA; Charles Hill of Abbeville, SC; Arlin Hobbie of Flandreau, SD; Paul Tannos of League City, TX; Ladell C. Swallow of Fillmore, UT; Randy Landes of Weyers Cave, VA; Fred Peet of Middlebury, VT; Amanda Ann Bryom of Glenoma, WA; and Oscar Garnant of Greybull, WY.

In addition to this competition, Mr. Speaker, I should point to another evidence of FFA leadership in making use of new technology in agriculture. The organization has prepared and made available on the AGRIDATA network a package of information for vocational agriculture teachers and lesson plans, for use in classrooms, on the use of computer technology in agriculture. The development of this system grew out of a decision by FFA leaders that farmers need more training in business planning, management, and economic skills.●

"ODE TO THE IRS"

HON. ED BETHUNE

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. BETHUNE. Mr. Speaker, the inimitable Sunday Observer for the New York Times Magazine, Russell Baker, has eloquently penned an "Ode to the IRS." Below are excerpts I commend to my colleagues:

I've got this form here.
It's called Ten Forty.
It's the long form, not the shorty.
The long form's for the sporty
and it comes with Schedule E.

I love a schedule. I'm so precise.
That's why I think the I.R.S. is nice.
To offer Schedule E
—how much sweeter could they be?
But not just Schedule E
—Schedules A, B, C and D!
It makes me wish that I could pay them twice.

And, yes, yes, here's 1040 ES. It requires you to guess,
1040 ES, and guessing I hate.
"Come press your fate,"
says 1040 ES. "come, estimate."

I guess what I'll owe next year.
It can be amended later if you've got the proper form.
They seldom jail you if the guess is warm,
I guess. And the proper form
must be somewhere here.

Let's see: I've got depreciation and sworn declaration.
I've got wage estimation and amortization.
What I'd like to have and haven't got
is Alternative Minimum Tax Computation
unless you are very, very rich.

Why does a man with Form Ten Forty long;
a man entitled to Schedules A, B, C, D and E;
a man who has W-2 and 1040 ES,
a man with access to depreciation,
sworn declaration,
wage estimation,
wage amendment estimation
and amortization
—why does such a man want Alternative Mini-minimum Tax Computation?

Because then they'd give me Form 6251 to attach.
I love attaching. It's such a gas.
And attaching Form 6251 has so much class.
I'll tell you why: It can be attached to Form 990T.

Alas for you and me, chances are we'll die and never know the pleasure of attaching to Nine-nine-zero T.

Mr. Speaker, we can all enjoy a chuckle from Mr. Baker, but it's also sad that our tax structure has to be this complex and cumbersome on the American people. Hopefully, a year or so from now this Congress will have enacted tax reform legislation and he will be able to pen something fast and simple like:

It used to be at tax time,
We would wrench and fret and blast.
Now that tax reform has passed,
We can all sit back and FAST.●

THE TORTILLA CURTAIN

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. PHILIP M. CRANE. Mr. Speaker, it seems that the congressional conferees are trying to reconcile the House and Senate versions of the Simpson-Mazzoli immigration bills to no avail.

This certainly is not the first time that these bills have met resistance. There have been stumbling blocks all along because of proposals such as employer sanctions and amnesty for illegal aliens. These provisions encourage incentives to discriminate against Hispanics and would create a new underground industry for forged, stolen, and fraudulent documents. In addition it penalizes those who have waited patiently to follow current U.S. laws to enter the country legally.

To further explain a few of these problems, I would like to share with my colleagues the following article entitled "Defending the Tortilla Curtain" that appeared in the Wall Street Journal on September 24, 1984.

DEFENDING THE TORTILLA CURTAIN

Congressional conferees are tying themselves into knots trying to reconcile the House and Senate versions of the Simpson-Mazzoli immigration bill, and we have a proposal to break the deadlock. To wit, the next meeting of the conference committee should be convened in the El Paso Blood Plasma Center.

Lacking that, the conferees could glance at the attached rendering of a photograph recently taken on the border there, at high tide on the Rio Grande. To get your back wet, you have to lie down in the river. The scene is typical of 1,990 miles of border. For the other 10 miles, in downtown El Paso, the Rio Grande runs through a concrete culvert fortified with chain-line fence. This is called the tortilla curtain.

This is where you get the reality of the border. El Paso, a city of 425,000 (60% Hispanic), shares the border with Ciudad Juarez, a metropolis of perhaps a million Mexicans. Some people live in El Paso and work in Juarez, and vice versa; legal border crossings come to 100,000 a day. Immigration officers, some of whom are naturalized Hispanics, look in the cars and ask your nationality. If you look Hispanic, you may actually have to show some identification.

Since Mexico allows U.S. citizens to visit for 72 hours without papers, the U.S. has to reciprocate. For more than 20 years, the immigration service has been issuing border-crossing cards to Mexicans who have permanent roots, such as a residence and a job, in Mexico. The cards allow 72-hour crossings, and are permanent for repeated use. The U.S. government has no record of how many are outstanding, and officials say the counterfeits are excellent.

The Border Patrol is proud of its new low-light TV monitors, aimed at the frequent gaps in the tortilla curtain. When the officers manning the central monitors see, say, a group of immigrants dash into a waiting car, they phone a road patrol with descriptions of who to stop. Some 200,000 illegal aliens were apprehended in El Paso last year, and more than a million nationally. Attorney General William French Smith said this was "a tribute to the great job the men and women of the Border Patrol are doing."

When the Border Patrol apprehends an alien, he or she will routinely "accept voluntary departure," and the Patrol provides a ride to the bridge. By some estimates there are 70,000 live-in maids in El Paso; local folklore holds that if they are picked up in a shopping center they are back at work before the Border Patrol gets back to its office.

If a suspect alien picked up within the U.S. chooses to resist deportation, legally the burden of proof rests on the immigration service to show he or she is deportable. A good immigration lawyer can buy you four years of due process, during which time you can probably get free on bail and maybe have a child, which changes your status because the child is an American citizen. The Border Patrol's detention center holds a few hundred souls, the largest number of whom have recently been Salvadoran.

Oh yes, the blood plasma center, which is located maybe 100 yards inside the freeway inside the Rio Grande. If you wade the river, go through the gap in the fence, brave the freeway and get into the blood plasma center, you can get $25 for a pint of blood. Then the patrol arrives and gives you a free ride to the bridge. In Juarez, $25 is a week's wages.

Simpson-Mazzoli will give us "control of our borders," both houses of Congress have in their wisdom decided. The immigrants will stop coming through the tortilla curtain if employers can get fined or jailed for hiring an illegal alien. Provided the employer employs at least four people—no one wants to send the poor maids back.

There's room to doubt that this will more than marginally change the incentives for illegal immigration. But beyond doubt it will provide some employers an incentive to hire immigration lawyers to contest the deportations that would trigger sanctions against themselves. The great nightmare of the Border Patrol is that some part of a million aliens a year will suddenly stop agreeing to "accept voluntary departure."

If they visit the blood plasma center, congressmen may begin to understand that the U.S. has no realistic alternative to a liberal immigration policy, and that any system will inevitably be messy. It is a tribute to the men and women of the immigration service, and to the illegal immigrants, that the border works as well as it does. Congress should stop kidding itself and leave well enough alone.●

BUILDING OUR AMERICAN COMMUNITIES PROGRAM

HON. E de la GARZA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. DE LA GARZA. Mr. Speaker, the Future Farmers of America has long been recognized as one of the Nation's most valuable training grounds for young men and women. Participation in FFA programs has long been a foundation for future success and leadership in agriculture and allied fields, and in community leadership as well.

Earlier this week, on October 2, I was privileged to take part in a ceremony honoring the State and national winners in one of the FFA's nationwide programs, the Building Our American Communities [BOAC] Program. This valuable activity is a special project of the National FFA Foundation and is sponsored by R.J. Reynolds Industries, Inc., of Winston-Salem, NC.

The BOAC Program, begun in 1971, has developed over the years into an important contribution to our efforts to promote community development.

Young people who take part in this program learn the fundamentals of what needs to be done to improve our rural communities. They take part in planning and operating a BOAC Program in their local FFA chapter. They learn how to promote the development of agriculture, agribusiness and natural resources at the local level. And they learn how to work for local, State, and Federal resources which can contribute to community development.

Since 1983, FFA has presented Achievement in Volunteerism Awards to honor individuals who take part in BOAC programs. I was happy to address the State and national winners about the importance of their efforts and the importance of agriculture to the Nation when the 1984 awards were presented a few days ago by Gerald Long, president of the R.J. Reynolds, Co. The ceremony was conducted by Ron Wineinger, the National FFA president.

Now, Mr. Speaker, I want to spread on the RECORD for the attention of our colleagues the names of the individual State BOAC winners for 1984, the 10 national finalists, and the 3 young people who won the top awards. In all cases, these winners were selected from FFA chapters which won State competitions. Of course, as a Texan, I am especially proud of the accomplishments of the State winner in my home State. But I think we can be equally proud of all of these winners.

The top national winner announced October 2 was the West Virginia State winner, Bonnie Kay Spencer of Farmington, WV, a member of the Marion County chapter.

The second place national winner was the Kansas State winner, Darren Nicholas Esslinger of Mankato, KS, a member of the Mankato chapter.

The third place national winner was the Missouri State winner, Carrie Teresa Louk of Osceola, MO, a member of Osceola chapter.

The remaining seven national finalists, all of whom of course were State winners, were:

Scotty Shirley of Daleville, AL, a member of Daleville chapter; Mike

Hoke of Craig, CO, a member of Moffat County chapter; Gina Badger of Bunnell, FL, a member of Bunnell chapter; Don Yocum of Franklin Grove, IL, a member of Franklin Center chapter; Vince Mendive of Gold Creek, NV, a member of Duck Valley chapter; Orville Mowry of Elma, WA, a member of Elma Chapter; and Lori Korell of Lingle, WY, a member of Rawhide chapter.

The remaining 40 State winners were:

Kim Rohr of Delta Junction, AL, Delta Junction chapter; Darryl Walker of Young, AR, Young chapter; Chris Kirksey of Amity, AK, Amity chapter; Miguel A. Rocha of Arleta, CA, Francis Polytechnic chapter; Amy Brayman of Glastonbury, CT, Glastonbury chapter; Keith Shane of Smyrna, DE, Smyrna chapter; Mel Johnson of Covington, GA, Newton chapter; Karen Nakayama of Kapaau, HI, Kohala chapter; Joseph Schumaker of Culdesac, ID, Culdesac chapter; John Bleill of Fountain City, IN, Northeastern Wayne chapter.

Kelly Fehr of Whittmore, IA, Algona chapter; Troy Shouse of Taylorsville, KY, Spencer County chapter; Rodney Manning of Oak Grove, LA, Oak Grove chapter; Raymond Gagnon of Caribou, MI, Caribou chapter; Paul Strong of Lexington, MA, Minuteman Regional Vo-Tech High School chapter; Matt Sowers of Burkettsville, MD, Brunswick chapter; Junior Stealy of Battle Creek, MI, Marshall chapter; Heath Petersen of Sherburn, MN, Sherburn chapter; Jeff McKinney of Caledonia, MS, Caledonia chapter; Wes Wadsworth of Fairfield, MT, Fairfield chapter.

Marc Ahrens of Ravenna, NE, Ravenna chapter; Neil Mooers of Strafford, NH, Much To Do chapter; Wayne Beal of Bridgeton, NJ, Cumberland chapter; Robert Kasuboski of Roswell, NM, Goddard chapter; Benjamin English of Greenwich, NY, Greenwich chapter; Angela Diane Lewis of Newport, NC, West Carteret chapter; Neil Buchholtz of Jamestown, ND, Jamestown chapter; Rudiger Baumgaertel of Albany, OH, Alexander chapter; Greg Westermier of Arcadia, OK, Guthrie chapter; Tom Freels of Elgin, OR, Elgin chapter.

Gary Krall of Lebanon, PA, Cedar Crest chapter; Heidi Burnham of North Kingstown, RI, Kingstown chapter; Melody Cooper of Spartanburg, SC, Dorman chapter; Darin de Vries of Harrisburg, SD, Harrisburg chapter; Jim Kite of Rogersville, TN, Cherokee chapter; Mark Rothwell of Spring, TX, Klein chapter; Stacy Evans of Goshen, UT, Payson chapter; John Martin of Dunnsville, VA, Essex chapter; Chris Nonemacher of Randolph, VT, Central Vermont chapter; Robbie Mikkelson of Oregon, WS, Oregon chapter.●

ANTITRUST IMMUNITY TO LOCAL GOVERNMENTS

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. PHILIP M. CRANE. Mr. Speaker, the Senate is currently completing action on House Joint Resolution 648, the continuing resolution for fiscal year 1985.

One section of the continuing resolution addresses antitrust immunity to local governments, and within it is a provision stating that jury verdicts should be treated as evidence. Therefore, treble damages should be awarded. It is precisely this provision that must be stricken.

Juries must not be allowed to second-guess local officials who are elected to make decisions based upon what they believe to be in the best interest of their constituents. To allow this to happen is to ignore the social values the elected officials were duly sworn to protect. The "jury verdict sanctity" is, in reality, legislating the law of the land to protect the private interests of a few individuals.

Proper remedy approaches have been introduced in both Houses of Congress to limit antitrust action against local government units to suits for injunctive relief rather than money suits. They do not provide immunity from antitrust violations, but do relieve local taxpayers and local decisionmakers from the threat of treble damages. Without this type of legislation, local taxpayers will be forced to foot the bill in antitrust cases.

To further explain the harmful effects of treble damages in antitrust violations, I would like to share with my colleagues the following editorial that appeared in the Chicago Tribune on September 28, 1984.

THE SHERMAN ACT AND CITIES

A bill approved by the House of Representatives to grant local governments relief from provisions of the Sherman Antitrust Act has run into unexpected opposition in the Senate. Although there does not appear to be any substantial opposition to the concept that local governments should be treated differently from private corporations in antitrust cases, some senators are concerned about provisions in the House bill that give cities and counties retroactive protection.

That amendment was inserted by Representative Henry Hyde, a suburban Republican, to nullify a $28 million treble-damage award in federal court against Lake County and Grayslake for refusing to grant a sewer connection to a developer. The same developer has a similar suit pending against Du Page County, which Representative Hyde represents.

The Senate should approve the House version. The taxpayers of those jurisdictions should not be punished with a jury award that surpasses the county's annual tax levy even if their elected officials exceeded their statutory authority in refusing a sewer hook-up.

Entrepreneurs who feel they have been wronged by local governments would still have the recourse of seeking injunctive relief through the federal courts.

Failure to act on the antitrust exemption will leave municipalities and counties across the nation vulnerable to pressure from people who happen to disagree with their decisions. It may severely inhibit the ability of such agencies to act in the best interest of their residents in regulatory matters ranging from taxi franchises to zoning cases.

The Sherman Act was passed in 1890 to prohibit anticompetitive collusion in private industry, and in 1943 the Supreme Court ruled that states were exempt from the law because of their sovereign powers to protect the health, safety and welfare of their citizens. That exemption was for decades presumed to extend to municipalities and counties, and in some states they are still protected.

Local governments' legal problem with the Sherman Act began in 1978 when the U.S. Supreme Court, in a case involving municipal utilities in Louisiana, struck down their assumed exemption. The situation became murkier earlier this year when a Federal District Court jury found Lake County and Grayslake guilty of antitrust violations. But the U.S. Appeals Court in Chicago, in a sewer case involving Eau Claire, ruled that Wisconsin municipalities were exempt because state law there extended the state exemption to local governments.

Complicating the situation was a campaign by various federal agencies to encourage regional cooperation among local government on such public works projects as sewer systems. As a result of the 1972 Federal Water Pollution Control Act, Lake County had set up a countywide sewage treatment system and signed a set of agreements with municipalities to regulate the new system. The agreement between Lake County and Grayslake that gave the municipality veto power over sewer connections to nearby subdivisions was the genesis of the antitrust case it lost in federal court.

It is surely not the purpose of the Sherman Act to make a federal case out of every local decision that affects someone's financial interests. Congress needs to rectify that situation.

Federal law should continue to protect the public against gross abuses of power that result from attempts by local governments to transfer their antitrust exemption to private industry, or from operating municipal utilities in such a way that precludes fair competition.

On the other hand, municipalities and counties should be granted the same general exemptions available to the states to regulate the health, welfare and safety without the fear of being assessed treble damages every time somebody feels wronged.●

CALL TO CONSCIENCE FOR SOVIET JEWRY

HON. JIM LEACH

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. LEACH of Iowa. Mr. Speaker, as the 98th Congress draws to a close we look back over a bleak 2-year period for the Jewish community in the Soviet Union. During this period, Members of this body have taken the floor many times to appeal to Soviet authorities to relax their restrictive human rights policies. Yet, as we know all too well, emigration rates have tumbled to nearly negligible levels and anti-Semitism has increased alarmingly. Religious and cultural freedom have been curtailed and members of the Jewish community have been arrested, imprisoned, and harassed or otherwise intimidated, becoming in effect a captive people within Soviet borders. Some individuals, like Ida Nudel and Anatoly Shcharansky, have become world-renowned for their personal sacrifice and courage of conviction. However, multitudes more, whose names are not so familiar to us, share deeply in that plight.

During the past 2 years, as the chairman of the Arms Control and Foreign Policy Caucus, I have been a strong advocate of arms control and the need for improved bilateral security relations between the United States and the Soviet Union. It is deeply unfortunate that the deteriorating human rights situation in the Soviet Union has added further difficulty to the desire for peace among the peoples of both our Nations. As such, I applaud the initiative of President Reagan in meeting with Soviet Foreign Minister Gromyko last week to begin a new level of dialog on arms control and other bilateral issues. The United States needs to do more in this regard but we cannot do it alone. There must be a good faith effort by both sides to start afresh in our common effort to secure a nuclear arms accord and greater stability in superpower relations.

It is in that context that I join so many colleagues in the House to once again appeal to Soviet authorities to reconsider their human rights policies and open emigration gates to the Jewish community. Few signals could so quickly or so strongly convey to the American people the genuine desire of the Soviet Union to bridge the gulf that divides us.

Mr. Speaker, Soviet authorities must understand that the Members of this body reflect the concerns of the American people. We did so faithfully last year in adopting the nuclear freeze resolution. We do so faithfully when we rise to speak out on issues of human rights for Soviet Jewry. As a participant in the 1984 Congressional Call to Conscience Vigil for Soviet Jews, it is my hope that in the coming weeks, before the 99th Congress convenes, Soviet authorities will weigh our message more carefully than ever before. We would welcome the opportunity as the next Congress convenes to begin in a new climate of expectation and hope.●

"DOC" FREDA: A LIVING LEGEND RETIRES

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. GILMAN. Mr. Chairman, Rockland County, NY received a rude awakening one morning last week. For the first time in 20 years, Dr. Carmine Freda was no longer a political party chairman.

As news of Doc Freda's retirement as the Rockland County Republican chairman spread throughout the county and the entire Mid-Hudson Valley, Republicans, Democrats, Conservatives, Liberals, Independents—in fact, Americans of every shade of political opinion—began to reflect on how much respect and honor Doc Freda has earned. For Doc Freda, during his many years of public service in New York State had become a living legend.

The reason Doc declined to seek an 11th term as Republican chairman of Rockland County was not quite apparent to many of his friends. It is true that he said, "this is the time I should pursue other things," but we know that Doc Freda's energy cannot be contained. Doc is now 83 years young—and he has been devoting himself to the public for so long, and with such vitality and enthusiasm—that many of us cannot believe he is going to truly retire now.

Doc Freda was elected mayor of the Village of Grandview, NY, and served for 10 years, before many of our colleagues were even born. He also served as a trustee in that village for an additional 10 years, and was a member of the South Orangetown School Board for 10 years. Doc, who has been a volunteer fireman in the Piermont and Grandview Fire Cos. for many years, is an active member of the New York State Alcoholic Beverage Control Board.

Doc did not confine his service to the Rockland County region or even to New York State. He distinguished himself in the U.S. Navy, from whence he retired as a commander. He received the Presidential Commendation for Meritorious Service from the President of the United States and the U.S. Marine Corps. Doc initiated the navigation bombadier program in the U.S. Marine Corps, and to this day is a licensed pilot and instructor, a licensed navigator, and a licensed meteorologist.

When his retirement was announced last week, a close friend of Doc's remarked that, if you add up all of the years of public service that Doc has devoted, it adds up to over 100 years.

Doc is happily married and devoted to his charming wife, Hazel. He and Hazel are proud of their two sons and five grandchildren. Doc is a graduate of Stuyvesant High School in New York City and of the Long Island College of Podiatry, and like so many of us, is pleased that he was able to pass on a better life to his sons and to his grandchildren.

When Doc was elected to his first term as Rockland County Republican chairman in 1964, his many admirers were pleased because, at the age of 63, he was preparing to retire from his highly respected medical practice and devote full time to the party.

Today, after 20 years as a county chairman, after serving as a delegate to five Republican National Conventions, and after serving as a member of the electoral college twice, we reluctantly concede that Doc has certainly earned his retirement.

He has become such an integral part of all of our lives, however, that it will not be the same in Rockland County without Doc in the battlefield.

Last week, the Rockland County Republican Committee unanimously elected Doc Freda their first "Chairman Emeritus," signalling another new role for this public spirited citizen.

Mr. Speaker, I invite all of our colleagues on both sides of the aisle to join with me in saluting an outstanding fellow public servant, Dr. Carmine Freda, a living legend in his own time.●

EDWINNA M. MARSHALL HONORED AT LOMA LINDA

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. LEWIS of California. Mr. Speaker, it is with great pride that I join with family, friends, and colleagues in honoring a truly remarkable woman. Edwinna M. Marshall will be honored at a luncheon on October 21, 1984, in San Bernardino, CA, by the Loma Linda University Occupational Therapy Alumni Association. On this 25th anniversary of Miss Marshall's career at Loma Linda, the alumni association is recognizing her dedication to her profession and her devotion to the enrichment of the many lives she has touched.

In 1959, Edwinna worked to develop an occupational therapy program at the university. She has served faithfully as the chairman of that department since then. However, Miss Marshall's service to occupational therapy education did not stop with her duties at Loma Linda. Her more than 30 years in the field include her work as a consultant, which has aided in the design and organization of occupational therapy training programs across the land.

Edwinna's heartfelt commitment to her profession is evident. She is a hard-working perfectionist, loyal and dedicated, and always willing to extend a helping hand to those in need. Miss Marshall has served on numerous advisory committees on both the State and National levels and has been active in collaborative studies and research. Many OT professionals have benefited from her published work and lectures.

Mr. Speaker, I take great pride in commending to my colleagues, Miss Edwinna M. Marshall, a dedicated professional who has, through her selfless years of hard work, contributed to her community in a most beneficial way.●

MARIO MARTINEZ—SOLEDAD'S OLYMPIC MEDAL WINNER

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. PANETTA. Mr. Speaker, it is with great pride that I call on my colleagues to join me in congratulating Mario Martinez of Soledad, CA, the silver medal winner at the Los Angeles Summer Olympics in the superheavyweight division of the weightlifting competition. The people of Soledad recently held a day for Mario, who hails from Bryant Canyon, just outside of Soledad, and I am pleased to be able to share in the pride we feel throughout Monterey County for our local Olympian.

In winning the silver medal and narrowly missing the gold, Mario broke the American record for weightlifters in his weight class, becoming the first American to lift a combined total of 900 pounds in the event.

Mario, who attended Soledad Grammar School and Gonzales Union High School, first began lifting weights seriously as a teenager at the ranch of his parents, Ray and Abby Martinez, outside Soledad. He got better and better over the years, and in 1981 he began to run off a series of first-place finishes, including the 1981 Sports Festival and Pan American Games, the 1982, 1983, and 1984 U.S. National Championships, and the 1984 U.S. Olympic trials in Las Vegas.

In Los Angeles, when he finished his lifts, it appeared that Mario would be the winner, but the Australian competitor edged him out with a spectacular lift, and Mario won the silver instead. But as his coach, Jim Schmitz, has pointed out, Mario performed his personal best and broke the American record in the most important competition and under more pressure than in any other competition. He proved himself to be a truly great athlete and competitor.

September 11, 1984, was proclaimed by Soledad Mayor Graig Stephens as Mario Martinez Day in that city. I know my colleagues join me and the people of Soledad in congratulating Mario on his Olympic success. The medal he won is both a symbol and a well-deserved reward for his hard work, dedication, perseverance, and excellence. Those qualities will serve him well throughout his life, and I want to wish him the very best for the future.●

SOCIAL SECURITY COLA'S

HON. DONALD JOSEPH ALBOSTA

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. ALBOSTA. Mr. Speaker, earlier this week the House considered legislation that reaffirms this Government's commitment to Social Security. I am referring to H.R. 6299, as passed by the House, which guarantees a Social Security cost-of-living [COLA] benefit increase of 3 percent even if the Consumer Price Index [CPI] falls below 3 percent.

I believe that it is the duty of Congress to protect those citizens whose livelihood depends on the money they receive from the Social Security System. Should those people's real income be reduced just because the CPI is not above 3 percent for the third quarter of this year? I say no! If the previous COLA formula which used the first quarter statistics were still in effect, Social Security recipients would be receiving a 3.6 percent COLA this year.

If this bill had failed to pass and the CPI for the third quarter falls below 3 percent, real income for Social Security recipients would decline. This legislation will increase benefits to Social Security recipients at a rate equal to that of inflation in order to maintain a beneficiary's standard of living.

Each Member of Congress can cite, I am certain, numerous instances from within his or her own congressional district where elderly citizens have been reduced to choosing between buying food and attempting to heat a cold dwelling because they simply lack the money to do both. While a 3 percent COLA will not eradicate the problem, it is certainly a step in the right direction.

A little over 16 percent of my constituents are senior citizens and a majority of them depend solely on their monthly Social Security checks in order to live. To target this group of people for cuts so that the Federal Government can hold the line on the national debt, is totally unfair. Seniors are hard-working individuals who have been paying into the Social Security System since its inception. These are proud people who have not shirked their responsibility to this country. It is up to the Congress of the United States to ensure that their loyality is not repaid with could indifference during their time of need. I commend this body for taking the action that was necessary at the appropriate time.●

FIGHTING FOR JUSTICE: KEEPING THE FAITH

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. PATTERSON. Mr. Speaker, I would like to draw to the attention of my colleagues in the House the courageous efforts of Dr. Quynh Kieu to fight discrimination and injustice. Dr. Kieu is to be commended for her faith in the democratic system of equal justice for all and for her tenacity in her pursuit of that justice.

Dr. Kieu is a Vietnamese pediatrician practicing in Orange County, CA. She was one of the 54 predominantly Indochinese physicians singled out for investigation and suspension by the State of California in the women, infants and children's investigation that came about in February of this year. Dr. Kieu knew she had done no wrong and rather suspected that many of her colleagues were innocent as well. As a result of the tremendous publicity given to this case Dr. Kieu's professional reputation was at stake. Even more important to Dr. Kieu, however, was the reputation of the newly established Vietnamese community in southern California.

With this in mind, Dr. Kieu began her quest for justice. Dr. Kieu and the Vietnamese community immediately responded to the charges waged against them by throwing their full support for the punishment of the guilty, and the swift clearing of the innocent. They stood united in their support for upholding the law. Dr. Kieu and the Vietnamese community were not asking for special treatment, just equal treatment before and under the law. She questioned the propriety of releasing the names of the accused physicians prior to their being informed of the charges against them, and before they had an opportunity to respond to these charges. She also

questioned what seemed to be a singling out of Indochinese doctors for investigation by the State.

Dr. Kieu and the Vietnamese community fought their battle within the traditional confines of the American democratic process. In her initial letter to me requesting assistance, Dr. Kieu expressed eloquently her love and respect for her adopted country—even under these difficult circumstances. She said, "Despite the tremendous wrong caused by a public official, I still hold an unshakable faith in our democracy with justice for all." Dr. Kieu was subsequently cleared of the charges against her by the State of California, as were most of her colleagues. However, her struggle continued. For being cleared by the State, was not the same as being cleared in the public's eye.

To this end, I would like to commend the Los Angeles Times for its May 6, 1984, editorial that recognized the efforts of Dr. Kieu to seek justice in this matter. She clearly demonstrated not only to the Vietnamese community, but to all of us that "keeping the faith" in justice can—and does—pay off.

Mr. Speaker, I take pride in sharing with my colleagues the text of the Los Angeles Times editorial: "Refugee's Victory Is a Win for All."

[From the Los Angeles Times, May 6, 1984]

REFUGEE'S VICTORY IS A WIN FOR ALL

Last February state health officials suspended 54 physicians (most of whom were Indochinese) in Orange and Los Angeles counties from a federally funded nutrition program because they allegedly submitted inaccurate health data that allowed patients to obtain food coupons.

Nearly one-third of those doctors, including 13 of the 22 in Orange County, recently were reinstated because the suspensions were a mistake—the result of what the state termed a "clerical error." One reason for the corrections was the courage of Dr. Quynh Kieu, a Vietnamese pediatrician at UC Irvine who fought the suspensions because she knew she hadn't done anything wrong—and because of the confidence she had in the democratic system of her adopted country.

Her faith, and spunk, should serve as an inspiration to other refugees—and all Americans.

When the suspensions were first disclosed, many refugee leaders reported an increase in anti-Vietnamese sentiment. Kieu, too, worried about the damage to the Vietnamese community, and that "most Southeast Asians do not fight back." She wanted her people to understand that the system here was different, and they could fight back and "rectify any unfair treatment." She contacted the state, which prompted health officials to reexamine the suspensions.

She also wrote to The Times to say to the community: "It is contrary to all the principles of democracy to condemn people without irrefutable proof of wrongdoing. The most beautiful thing about our system is its protection of individuals of all races against unfunded allegations. . . . I have come to these shores to bring a meaningful contribution to the most democratic country in the world. Please help me to maintain this faith."

Dr. Kieu "maintained the faith." She proved her point to other Vietnamese refugees and to all Americans. She won. So did we all.●

TRIBUTE TO LARRY WINN

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 2, 1984

● Mr. BIAGGI. Mr. Speaker, as we approach the final days of the 98th Congress, I wish to pay tribute to a most distinguished colleague who has served in this body since the 90th Congress—the gentleman from Kansas, LARRY WINN.

LARRY WINN has served the people of the Third District in Kansas with special effectiveness for the past 18 years. He has been a dedicated protector of their interests in the House and has had a longstanding reputation for his constituent service.

Larry has served with distinction as a ranking minority member of the House Foreign Relations Committee and is the ranking minority member on the all important Subcommittee on Europe and the Middle East. Larry has also served most ably as the ranking minority member of the Science and Technology Committee. Both committees will miss LARRY's services as he has made numerous important contributions to their deliberations and legislative accomplishments over the past 18 years.

LARRY and I were located in nearby suites on the fourth floor of the Rayburn Building for a number of years. I used to enjoy our walks over to the House floor and discussions we would have. He is a most genial man with warmth and a special sense of humor. He leaves the House to go onto other endeavors. I wish him all the best in his future and know he must take comfort in the fact that he has made a difference in the House during his years of service.

As LARRY prepares to move on, I wish he and his wife Joan and their children many happy years together and I hope we continue to see LARRY as a private citizen in the years ahead.●

WORLD DEBT: A POLITICAL REALITY

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. PHILIP M. CRANE. Mr. Speaker, sooner or later U.S. banks and moneylenders will be forced to face the fact that their rescue efforts in foreign lands are nothing more than short-term solutions designed to save foreign debtors from economic ruin. Those who support increasing IMF funds refuse to believe that they are aggravating the problem with these Band-Aid type solutions, not alleviating it.

However, soon reality will have to be confronted. The IMF and bankers continue to pour money into Third World nations. No longer, though, are banker's motives that of gain; but rather, today loans are made out of sheer desperation and with little hope of receiving repayment. The situation takes on a still more grave twist as currently, not only are debtors financially unable to pay interest rates on debts, but rather, with money in hand, they are refusing to do so.

It angers me to stand by while the U.S. Treasury saves U.S. banks from their own lack of good investment sense. It angers me still further to see money being poured into the IMF when it cannot enforce its conditions. Argentina, the biggest rebel in this Latin American debt crisis, defiantly rejects conditions set down by the IMF and instead calls on Latin America to stand united against the very same "bloodsucker banks" who are averting their countries' ruin.

Gentlemen, it is time we question these IMF austerity programs and the serious effects that are resulting. More importantly, we need to aim for long-term solutions, rather than short-term solutions. In short, we need to re-evaluate the entire lending scheme. I urge you, gentlemen, to read Prof. Paul Craig Robert's article "World Debt: the IMF Solution Has Been the Problem," in which he expresses his concern over the IMF solution and the present plight of world economy.

WORLD DEBT: THE IMF SOLUTION HAS BECOME THE PROBLEM

As critics predicted, increased U.S. funding for the International Monetary Fund has failed to solve the world debt crisis, but the involvement of the IMF in the contractual arrangements between debtor countries and credit or banks has opened a Pandora's box. The dynamics of the debt problem have broken out of the solution designed to contain the crisis, forcing a rethinking of the problem along the lines suggested by critics of the IMF approach.

To refresh memories: The Reagan Administration's opposition to a 50% increase in U.S. funding for the IMF collapsed in the summer of 1982, when it became clear that, thanks to the Volcker recession, Mexico would not be able to service its $80 billion foreign debt. Much of the debt is held by the large money-center banks in New York, and the specter of default, banking panic, and financial crisis quickly arose. Proponents of increased IMF funding won support for an $8.5 billion increase in the U.S.'s contribution by presenting it as a necessary step to avoid the collapse of the international financial system.

The IMF was anxious to seize the opportunity to enlarge its scope and acquire at-

tributes of a world central bank charged with maintaining the stability of the international financial system. It used its increased funding to lend money to the debtor countries so they could service their debt, and it encouraged the creditor banks, which had already overexposed their capital abroad, to do likewise. The immediate result of lending money to pay interest was to pile debt upon debt, worsening the exposure of the creditors.

POLITICAL REALITY

The debt buildup was supposed to be a stopgap measure to allow the IMF time to step in and impose conditions that would straighten out the economies of debtor nations and allow them to pay their debts. The conditions consist of higher taxes, currency devaluation, and reductions in government spending. By reducing domestic demand, these measures are supposed to reduce imports and increase exports, thereby producing the foreign-exchange earnings with which to service the debts.

The IMF's solution to the world debt crisis quickly ran afoul of political reality. The IMF conditions impose austerity on the debtor countries—people widely perceived to be poor—in order to pay many billions of dollars in interest to New York banks—widely perceived to be rich. The IMF soon found itself portrayed as a tool of the Yankee banks, and domestic politics in debtor countries elevated those who resisted the IMF conditions and pulled down those who cooperated with the fund's recommendations.

Last year the head of the Argentine central bank was detained by court order, charged with compromising his country's sovereignty in debt negotiations. This year the situation was worsened. The new president of Argentina, Raúl Alfonsín, has accused his country's creditors of "a new form of colonialism" and has refused to pay the debts "with the hunger of our people." Similar rhetoric is taking hold in Brazil, and even Mexico has let it be known that the IMF austerity program is not sustainable.

NO SECOND OFFER

Critics predicted all this. The involvement of the IMF, the U.S. Treasury, the Federal Reserve Board, and other government institutions in the contractual relationship between debtors and creditors has politicized the loans, making it inevitable that they would not be repaid on the terms envisioned by the banks and the IMF. As a Latin American official recently declared, "The debt issue is now firmly placed on a political level."

The consequences for the IMF were also predicted. It waded in and imposed conditions that it can't make stick. Argentina has swept aside the conditions and, bypassing IMF negotiating officials, sent a letter directly to the IMF board setting out Argentina's conditions. "This is the offer," said Argentine Economics Minister Bernardo Grinspun, adding: "There will be no second offer." Faced with such hardball tactics, the IMF may have to back off and weaken the conditions it imposes for continued lending to Argentina, thereby undermining its authority over the economies of other debtor countries.

As the IMF-led bailout unravels, banks are beginning to reclassify their Argentine loans to reflect their nonperforming status. Previously, the IMF and the Fed resisted this move on the grounds that banks would not continue lending if loans were realistically valued. Since continued lending is a central feature of the IMF approach, U.S. bank examiners looked the other way. But the mounting failure of the IMF approach has given the Comptroller of the Currency cold feet, and he has finally moved to enforce proper accounting.

Eventually the banks are going to have to write down some part of the loans, one way or another, and stretch out the remainder. If this process had begun two years ago, the market would not be showing its lack of confidence in bank stocks and certificates of deposit today. Unfortunately, the responsible approach was delayed by the hubris of policy managers who tried to substitute a bailout for sound banking principles.●

DEELY A. HUNT

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. IRELAND. Mr. Speaker, I would like to take a few moments of our time to honor the late Deely A. Hunt, former president of Citrus World, Lake Wales, FL. Deely died September 27, 1984 at the age of 87 after many years of service as a civic leader and businessman in the Lake Wales area.

Deely was the driving force behind Citrus World, one of Florida's largest citrus processors. His involvement in all aspects of the citrus business over the last 60 years made him not only our institutional memory, but also our consultant and friend.

A native of Ohio, Hunt joined the Army in 1917 and served in France and Belgium where he received a Purple Heart after being wounded. After the war, he came to Florida to study citrus and veterinary science at the University of Florida.

Deely and his brother Charles started in the citrus business with a grove caretaking business which was later expanded into the Hunt Bros. Packing House. In 1930, he organized Citrus World and after 16 years as general manager, became its president.

The recent outbreak of citrus canker in Florida demonstrates to us the breadth of Deely's career. In 1921 he served on the State canker eradication program, the last time our industry was beset by this virulent disease. He shared his knowledge and experience, gained over the decades, with others in the business and those wishing to become a part of the Florida citrus industry. His contribution to making our citrus industry the sucess it is today cannot be emphasized enough.

Deely Hunt served his company and his community with enthusiasm and distinction. His absence will be felt both inside and out of the citrus community.●

CITIZENSHIP FOR WILLIAM AND HANNAH PENN

HON. ROBERT A. BORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. BORSKI. Mr. Speaker, I rise in support of Senate Joint Resolution 80, and welcome the opportunity to convey the importance of posthumously granting honorary citizenship to William Penn and his wife, Hannah Callowhill Penn.

As you well know, Mr. Speaker, honorary citizenship through joint resolutions are rare indeed. In fact, so far only the great statesman Winston Churchill and Raoul Wallenberg, the Swedish diplomat who helped thousands of Jews during the Holocaust, have been bestowed this honor. And yet, such worthy precedents demonstrate the wisdom of Congress in selectively granting such an honor in extraordinary circumstances. It is my view that the reasons for conferring honorary citizenship in this instance are numerous and compelling.

Actually, William and Hannah Penn were not able to become citizens, because they died before our Nation was born. For a couple who contributed so much, it is indeed ironic that the Penns are not recognized as citizens. Penn's extensive contributions include the famous "concessions and agreements" of colonial New Jersey. This document is generally considered to be the precursor of our bill of rights. It promised settlers the right of petition, trial by jury, religious freedom, and prohibited arbitrary imprisonment for debt. In fact, Thomas Jefferson considered Penn to be one of the great lawmakers of all times.

William Penn continued this enlightened spirit when he established Pennsylvania. Penn's "holy experiment" with its emphasis on religious toleration and civil liberties became a central theme of the American experience. It was also in Pennsylvania that Penn's wife, Hannah, became the first female administrator of a colony in the new world. Like her husband, this first First Lady of Pennsylvania devoted her life to the pursuit of justice and peace.

Now we have the historic opportunity to recognize their outstanding contributions by granting honorary citizenship to William and Hannah Penn.

Mr. Speaker, I also want to take a moment to recognize Elaine Peden, a valiant lady from my own district in Philadelphia, without whose tireless efforts, this resolution would never have been considered. For over 12 years, Mrs. Peden has almost singlehandedly been the driving force behind this movement to grant honorary citizenship to the Penns.

For having this dream and pursuing it against all odds, for gathering enormous support in the Congress, and, perhaps most of all, for bringing the worthiness of her project to the attention of the country, I salute Mrs. Penden.

Mr. Speaker, I also want to acknowledge the hard work done by my colleague from Pennsylvania, BILL GOODLING. BILL GOODLING sponsored the House resolution, and has been the prime mover in Congress for its enactment. I salute him for his leadership in bringing this issue to the attention of Congress and the American people.

Thanks to his work, and the work of Mrs. Peden, this resolution has widespread support, and now has a chance to become a reality. It has the full backing of no less than the entire Pennsylvania delegation, the Governors of Pennsylvania and Delaware, the senate of New Jersey, and the National Society of Daughters of American Colonists. This resolution now needs only the support of this House to grant the Penns the honor they so richly deserve.

Finally, Mr. Speaker, this resolution is a symbolic act which stands for the principles of liberty and freedom embodied in the lifelong contributions of William and Hannah Penn to this Nation. In truth, this resolution is not merely a gesture, but rather the fulfillment of William and Hannah Penn's rightful claim to citizenship; its purpose is not just to honor their memories, but to cherish the ideals for which they stood; it is intended not so much for the benefit of these two great heroes gone nearly for three centuries, but for the benefit of all living Americans who share their beliefs.

May I suggest, Mr. Speaker, that most of us take our American citizenship for granted because we receive this privilege by virtue of birth. William and Hannah Penn, on the other hand, were not born here. However, by their contribution to our Nation they have clearly earned the right to be called American citizens. I urge the House to act favorably on this resolution.●

DAVID PHILIPSON NAMED FULBRIGHT SCHOLAR

HON. NORMAN LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. LENT. Mr. Speaker, I would like to take this opportunity to recognize the accomplishments of one of my constituents, David Philipson, son of Thelma and James Plesser and also the late Leon Philipson of Syosset, NY. A local newspaper, the Syosset Advance, has written a very complimentary article in tribute to David's outstanding achievement. A copy of the article follows.

[From the Syosset Advance, Sept. 7, 1984]

PHILIPSON NAMED FULBRIGHT SCHOLAR

David M. Philipson, B.F.A., '82, California Institute of the arts, has been awarded a Fulbright grant to study North Indian Classical Music for the Bansuir (bamboo flute) in Bombay, India, it was announced recently by the Board of Foreign Scholarships and the United States Information Agency.

Philipson was born and brought up in Syosset and is the son of Thelma and J. James Plesser and also the late Leon Philipson.

Philipson's music education began while a student at the Walt Whitman Elementary School and continued at the Harry B. Thompson Jr. High School. He attended The Choate School in Wallingford, Connecticut, where he was a Merit Commendation winner. He started his intensive training on the flute while at The Cambridge School of Weston, Massachusetts, and graduated in June, 1978.

Philipson has completed his first two years in the Master's degree program at Cal Arts where he was a Teaching Assistant for North Indian Music. Since 1978 he has studied the music of North and South India, Bali and Java with eminent teachers at Cal Arts and also North Indian Music at the Ali Adbar College of Music in San Rafael, California. In November 1983, he won first prize and was a featured soloist in the first all North America Music Competition and Conference held in Berkeley, California.

Philipson has performed widely in the Los Angeles area and in March, 1984 performed at the Los Angeles County Museum's Light of Asia Buddhist Art Exhibition, He also performed on Bansuri for a Bengali Dance Drama by Rabindranath Tagore sponsored by the L.A. County Museum with music direction by Shubo Shankar son of Ravi Shankar.

This past summer Philipson, as a member of the Cal Arts Contemporary Music Ensemble, performed in Karlheinz Stockhausen's Sternklang (Park Music for 21 players) under the direction of Stephen Mosko. This performance was part of the Olympic Arts Festival in Los Angeles and was also broadcast on National Public Radio.

He can be heard as a guest artist with the Eternal Wind Orchestra on Flying Fish records (scheduled for release in September 1984).●

U.S. POLICY ON THE ARMENIAN GENOCIDE

HON. CHARLES PASHAYAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. PASHAYAN. Mr. Speaker, once again I am compelled to note for the record yet another attempt by Turkish apologists to deny the Armenian genocide and to intimidate the House of Representatives from any recognition or remembrance of the first genocide of the 20th century. Once again a Member of Congress has been accused that simple recognition of historical fact shall aid and abet terrorism.

In response to passage of House Joint Resolution 247, which commemorates April 24, 1985, as a day of remembrance of man's inhumanity to man, and in anticipation of passage of H.R. 171, which affirms U.S. policy on the Armenian genocide, I received the following extraordinary letter:

DEAR CONGRESSMAN PASHAYAN: We strongly protest House Joint Resolution 247 and House Resolution 171, which seek to validate Armenian claims. Passage of these resolutions will not only effectively destroy Turkish-American relations, but may cause Turkey to re-evaluate her relationship with the United States.

We deeply believe these resolutions abet radical Armenian terrorism against Turks here and abroad by giving credence to grossly distorted historical facts. Are you aware of the insidious discriminations against the Turkish-American community particularly in California?

We would hope that your political interests be in promoting the best possible relationship between the United States and her longtime ally and NATO partner, Turkey. We are also aware that this is an election year.

Respectfully,

BONNIE JOY KASLAN, *President,*
Turkish-American Association
of California.

Mr. Speaker, the charges contained within Ms. Kaslan's letter mirror precisely those hurled by the Republic of Turkey, opposition political parties in Turkey, and the state-controlled Turkish press. Despite precise and public explanations in both Chambers regarding the genesis, the content, and the intent of our deliberations on this matter, the Republic of Turkey continues to cajole, to demand, and to threaten. The thrust of the Turkish request is straightforward—the United States is expected to expunge the Armenian Genocide of 1915–23 and by so doing to expunge Armenian history and again by so doing to retreat from the high principle of the inviolability of history.

If the United States does not respond to the request, Members of Congress have been advised via every conceivable channel of communication that the Republic of Turkey may, among other things, re-evaluate her relationship with the United States and boycott U.S. firms presently conducting business with that nation. More ominously, my office has also learned that as a direct result of growing hostile Turkish public sentiment obviously created and orchestrated by the government-controlled press, concerns are now being expressed for the safety of the American diplomatic community, as well as the remnants of the Armenian community, in Turkey.

Mr. Speaker, I am outraged by the irresponsible and immature conduct of the Republic of Turkey, and I am chagrined that the State Department continues to transmit, rather than to rebuff, Turkey's attempts at intimidation. I should like to recall for my colleagues that the State Department itself created the problem, which a bi-

partisan majority of the House is attempting to resolve.

The record of American and Armenian history has been put into doubt by the State Department, presumably at the behest of the Republic of Turkey. Since the original Department blunder of August 1982, the Republic of Turkey has attempted to seize the moment to reverse seven decades of U.S. policy.

I urge the House of Representatives to maintain the cause, to pass the resolutions, and thereby to maintain the integrity of this great body.●

ASSISTANT ENGINEERS NEEDED FOR NORTHEAST CORRIDOR TRAINS

HON. BRUCE A. MORRISON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. MORRISON of Connecticut. Mr. Speaker, today I am placing in the CONGRESSIONAL RECORD a summary of the study done on behalf of the Brotherhood of Locomotive Engineers on the causes and extent of stress on engineers in the Northeast corridor.

This is a matter that has been of concern to many Members of this House, especially those representing the States along the Northeast corridor. We have found in this study that the engineers encounter a number of sources of stress in their work, some of which undoubtedly contribute to the high rate of accidents that have occurred on Amtrak. I hope that Amtrak will look at this study and will implement its recommendations including reinstituting the use of assistant engineers in the cabs. This, the study reports, will help passengers on trains in the Northeast corridor. A summary of the study, which reveals that working conditions facing Amtrak engineers in the Northeast corridor are stress inducing, follows. The adverse effects of these working conditions on the welfare of engineers, and the consequent possible risk for passengers, demand immediate improvement of these conditions.

SUMMARY

Sponsored by the Brotherhood of Locomotive Engineers, two studies were conducted this past winter and spring by Decision Dynamics, a branch of Tactical Decisions Group. Principal investigators were Drs. Brian F. Blake and Erika Wick. The former is also director of the consumer-industrial research program and professor of psychology at Cleveland State University; the latter is a licensed psychologist and professor of psychology at St. John's University, New York.

In the first study, 161 Amtrak engineers participated in a mail survey assessing the degrees of stress they experience due to various working conditions. In the second study, 22 engineers took part in intensive clinical interviews, completed a series of written psychological measures, and provided physiological indices of their reactions on a physiograph. These interviews were conducted in the laboratories of St. John's University. Numerous steps were taken to ensure that the data were reliable and accurately reflected engineer experiences, for example, checking that verbal reports were substantiated by physiological recordings and including hidden lie scales in the written tests.

Results clearly indicated that the job stress felt by engineers was real and that their verbal statements were not exaggerations or lies. In fact, the studies found that many engineers may encounter even more job related stress than their direct statements reflected.

The work-related conditions found to be most stressful can be classified into two broad areas: safety issues and worker-manager relations. Within the safety area, the engineers cited inoperable safety devices, faulty speedometers, operation of defective engines, vandalism along the right of way, foreign objects on the track, and risk of accidents as particularly stress producing. Within the area of worker-management relations they cited pressure to operate in violation of the rules and being treated in a disrespectful, demeaning manner by supervisors and other Amtrak officials as factors which create a stressful work environment. Working without a backup assistant engineer was also an important source of stress.

The study makes a number of recommendations which the authors believe will reduce stress. These include that (1) complaints about stressful working conditions should be given close attention; (2) consideration should be given to job redesign and policy change in order to reduce stress in the two broad areas cited above; (3) efforts to ensure that engineers are placed on predictable work schedules should be undertaken; (4) a task force composed of both union and management be constituted to identify means of reducing job stress; (5) stress awareness be raised in both management and the union so that its role in the workplace will be recognized more fully; (6) programs should be made available to union members so that they can more effectively cope with those unavoidable stresses in the job; (7) faulty equipment, especially speedometers and radios should be improved; (8) certain management procedures which produce stress by forcing union workers to break safety rules should be curbed; (9) the manner in which investigation of accidents is carried out should be reconsidered with an eye toward reducing those portions of the procedure which produce the greatest stress for the engineer; and (10) the reinstatement of assistant engineers. This last point is elaborated in the report as follows:

For quite a few engineers (especially older ones) the lack of an assistant engineer is stress in inducing in its own right. For the majority of the other engineers interviewed the assistant engineer is a method of stress reduction. Without the assistant, these engineers are buffeted by stress induced by numerous job aspects.

Given the pivotal role of the assistant engineer as a stress reducer or avoider, and given that numerous facets of the work environment currently function in a manner productive of stress, it would follow that the assistant engineer be reinstated.

Should he be reinstated on all runs? After all, the value of the assistant engineer would be greatly diminished if the stress inducing job aspects were all corrected. Yes. He should be returned to all runs. Gradually the position could be eliminated—but only after solid empirical evidence is presented to document the correction of the stress inducing conditions.

These and other steps, the report indicates, are clearly in order. The continued existence of intense, and often unnecessary stress is a time bomb, whose explosion can potentially have serious personal, social, and economic consequences.●

TRIBUTE TO LARRY WINN

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 2, 1984

● Mr. SKELTON. Mr. Speaker, I would like to join with my colleagues in paying tribute to a man I have known long and well, Representative LARRY WINN of Kansas, who will be retiring at the end of this Congress.

For 18 years, LARRY WINN has served with distinction, representing the people of the Third District of Kansas. He has in those 18 years, made important contributions in the fields of science and technology and foreign affairs through his service as ranking minority member and second ranking minority member, respectively of those committees in the House. He has also given much of his time to further the causes of groups that he believes in, ranging from the Boy Scouts to the United Way.

I have known LARRY WINN since the days before either of us were elected to Congress, and it saddens me to see LARRY retire. Congress and the residents of the Third District are losing a fine, able legislator in the person of LARRY WINN.

LARRY, I wish you and your family all the best of luck in whatever your retirement may bring.●

TRIBUTE TO HON. JOHN N. ERLENBORN

HON. E. THOMAS COLEMAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, October 1, 1984

● Mr. COLEMAN of Missouri. Mr. Speaker, I am happy to be able to participate today in this special order to honor our good friend, JOHN ERLENBORN.

I have had the honor of serving with JOHN on the Education and Labor Committee for the past 6 years and have come to view him both as an outstanding leader and as a valued friend. As the House concludes its business this week, and we pause to review JOHN'S accomplishments over the last 20 years, one is struck by the tremendous contribution he has made in a wide variety of legislative areas.

In honoring JOHN today, I will limit my comments to that area of JOHN'S work I know best, higher education. As the ranking Republican on the Subcommittee on Postsecondary Education the last 4 years, I have found JOHN'S knowledge and appreciation of the issues and challenges facing our Nation's colleges and universities to be remarkable. JOHN is rightly considered an expert in the area of guaranteed student loans. I personally have looked to him during the last 4 years as a person who understands both the history and the intricate details of this complex program.

In talking to educators across the country, I have repeatedly found that JOHN is credited with having played a central role in achieving stability in the GSL Program at a time when its entire structure was being called into question. JOHN was an early and enthusiastic proponent of establishing a national secondary market for guaranteed student loans. At the time, 1972, there was no secondary market for these loans and lenders were beginning to severely curtail or cease making new commitments to students. GSL lenders needed to be able to sell their student loans shortly after making them or at least before they entered repayment after the in-school deferment. With the proceeds of the sale of these loans, lenders could then make new commitments and thus increase the total credit available to students.

The response to this liquidity crisis was the creation of the Student Loan Marketing Association. JOHN devised the name of the corporation so that it could be called Sallie Mae. Today Sallie Mae is an essential part of the GSL Program. It is a profitmaking entity which is succeeding without any direct Federal subsidy.

The work of the gentleman in higher education has not been limited to Sallie Mae. Throughout his career he has stood as a watchdog against waste or excesses in all Federal student aid programs. He had the courage to oppose liberalization of eligibility tests for student loans and grants, for example, at a time when the popularity of such liberalizations was nearly overwhelming. Similarly, he has consistently sought to perfect these programs against fraud and abuse.

In the last 2½ years as the ranking Republican of the Committee on Education and Labor, JOHN ERLENBORN has proven to be a leader which Members on both sides of an issue can work with. I view him as a pragmatic, hard-working Member who is willing to master the details of legislative problem and then forge a workable compromise. His skill in this regard is exceptional. More than once this skill has enabled legislation about to fail for want of a bipartisan agreement to proceed to passage.

As a Member of Congress, JOHN ERLENBORN represents the qualities which serve to enhance the image and reputation of the House of Representatives across the country. As this Congress closes, he is completing 20 years of service in which he has maintained a well-deserved reputation for honesty and hard work. His positions on legislation have been remarkably consistent, reflecting his well-thought out and sincere conservatism.

In honoring JOHN today, it is easy to become sad. His good humor on the floor and in committee will be missed. I wish him and Dodie well as JOHN pursues new opportunities and challenges in the practice of law. I am grateful to have had the opportunity to serve in this body with him.●

MARINE WORLD WINS A REPRIEVE

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. LANTOS. Mr. Speaker, recently I raised the problem of Marine World/Africa U.S.A., a special institution located in Redwood City in my district. Campeau Corp., which owns the land on which the park is located, plans to develop a hotel and office complex on the site and asked that Marine World vacate the land by October 15 of this year. A new location has been found, but the new facilities cannot be completed until 1986.

The problem for Marine World is that the trained animals would suffer serious and possibly irreparable problems if they were moved to a temporary location before being permanently relocated. To avoid that difficulty, many of us have fought to see that Marine World is given a 1 year delay before being forced to relocate.

Mr. Speaker, I am delighted to report to this House that our effort has been successful. This morning Campeau Corp. agreed to allow Marine World to remain in its present site for an additional year.

A number of individuals contributed to the successful outcome of these negotiations, most important the Friends of Marine World, an organization of local citizens concerned about the fate of Marine World, and Don C. Reed, author of "Notes From an Underwater Zoo" and chief diver at Marine World.

I place in the RECORD a statement from the Friends of Marine World on this latest and most welcome development.

The statement follows:

FRIENDS OF MARINE WORLD

Friends of Marine World is delighted that agreements have been reached with Marine World, Inc., and Campeau Corporation California to allow the Marine World/Africa USA wildlife and entertainment park to remain open in Redwood City for another season. The agreements provide that Marine World's animals will not be moved for purposes of developing the hotel and office complex on the site before September 15, 1985. We believe that this one year extension will allow all of Marine World's animals to be moved directly to the new site in Vallejo, which is scheduled to open to the public in the Spring of 1986. In return for the extension, Friends of Marine World has agreed not to oppose Campeau's development or the relocation of the animals following the 1985 season.

Since July 17, when Campeau and Marine World, Inc. announced that Marine World would close on October 14, 1984—one year sooner than expected—Friends of Marine World, an association of park employees, scientists and concerned citizens, has voiced concerns about the impact of the early closing on Marine World's animals. At the very least, the October closing meant a double move for the animals—first to temporary storage sites then to the new park—at worst it meant the end of this one-of-a-kind educational, recreational and scientific resource in the Bay Area.

We would like to commend Campeau and Marine World, Inc. for responding to all of these concerns and for their good faith in reaching this agreement.

We owe thanks to a large list of people. We are grateful to Congressman Tom Lantos for his non-stop efforts, William Schumacher, Jacqueline Speier and the entire San Mateo County Board of Supervisors for all of their support. Assemblyman Bob Naylor and numerous other local governments and political figures for their special efforts. We owe an enormous debt of gratitude to our legal counsel, Pillsbury, Madison and Sutro for all their work.

We would also like to thank members of the local news media for their professional integrity, and for their tireless efforts to find and report the basic issues that could easily have been lost amid the barrage of confusing and conflicting information. And lastly, we are grateful and deeply indebted

to the thousands of people in the Bay Area who supported our efforts through petitions, letters and telephone calls. Their overwhelming response was the key to the preservation of Marine World/Africa USA.●

THE RETIREMENT OF CONGRESSMAN LARRY WINN

HON. BILL EMERSON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 2, 1984

● Mr. EMERSON. Mr. Speaker, I am pleased, but a little saddened today, as I join my colleagues in paying tribute to LARRY WINN, who will be leaving this House after 18 years of service.

Last Wednesday evening I attended a farewell gathering for LARRY given by many of his friends from Washington and Kansas. It was interesting to me that as one person after another spoke on LARRY'S behalf making the usual comments about dedicated service to his district and years of hard work, one theme seemed to be repeated again and again—that here was a man who had brought with him to the Congress something perhaps a bit unique—a businesslike, no-nonsense, "let's get down to brass tacks" type of approach to issues.

In his work on committee and on this floor, LARRY had the ability to cut through the rhetoric—the bureaucratese—of an issue and get to its core. That is a quality too few of us possess, or if we do possess it when we get here, we soon lose it in the maze that is the legislative process. Not so with LARRY WINN, and we are going to miss that, as we are going to miss him as a Member of this body.

I have known LARRY for 22 years. We first met when he served as campaign chairman for Congressman Bob Ellsworth who represented this same Kansas district and for whom I once served as a staff assistant. LARRY was a businessman then and a leader in his community. His background was in the building and construction field. Perhaps that background provided him with the solid, sensible approach to problems and issues I am speaking of—a background that has been invaluable to his work—first on the Subcommittee on Space Science and then as ranking member of the Science and Technology Committee.

The National Aeronautics and Space Administration has presented Congressman LARRY WINN with the Distinguished Public Service Award for his work on behalf of NASA programs from the Moon landing to the space shuttle to the proposed space station. It is a well deserved award for service rendered to the Nation's Space Program.

And, as LARRY certainly deserves this recognition from NASA, he also deserves the recognition of this House and of the people of the Third District of Kansas. He has served us well and he has served them well. He will be missed here in the Congress, but I know he is looking forward to going home to Kansas and I wish him the very best in his retirement.●

FREEDOM OF POSTAL CLERKS NOT TO SERVICE DRAFT REGISTRANTS IF CONTRARY TO RELIGIOUS BELIEFS OF CLERKS

HON. WILLIAM L. CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. CLAY. Mr. Speaker, I have consistently opposed the requirement of the Postal Service that postal clerks must service draft registrants although such actions may be contrary to the religious beliefs of those clerks. The Postal Service has contended that it would be administratively burdensome to excuse postal clerks from those duties. As an alternative, they proposed that such clerks could request reassignment to less desirable duties or less convenient tours of duty. Oversight hearings which I conducted as then-chairman of the Subcommittee on Postal Personnel and Modernization were unsuccessful in encouraging the Postal Service to modify its position.

Now, I am pleased to learn through a recent edition of the Daily Labor Reporter that on June 28, 1984, the U.S. District Court for the northern district of California held that postal clerks cannot be compelled to register youth for the draft if such registrations are contrary to the religious beliefs of such clerks on the grounds that this was an improper employment practice under title VII of the Civil Rights Act of 1964.

I understand that the Postal Service has filed a notice of appeal with the U.S. Court of Appeals for the Ninth Circuit. Hopefully this welcomed decision by the district court will be sustained.

The Summary of the Daily Labor Reporter story follows:

The California case was filed by Robert Davis and Alice Lindstrom, who worked as window clerks at two San Francisco post offices. Since mid-1980, window clerks have supplied, reviewed, and accepted draft registration forms under an agreement between the Postal Service and the Selective Service System. Despite his religious objections, Davis agreed to serve draft registrants and kept his job but Lindstrom refused to handle draft registration forms and was transferred to a distribution clerk job. Davis and Lindstrom sued for religious discrimination under Title VII, claiming that the Postal Service failed to "reasonably accommodate" their religious beliefs.

Judge Henderson held that granting window clerks the option of transferring to less desirable distribution clerk positions was not a "reasonable accommodation," and that allowing window clerks with religious objections to refer draft registrants to other clerks would not result in "undue hardship" to the Postal Service.

"[T]he Postal Service's speculative and hypothetical claims of administrative inconvenience are wholly undermined by the nature of the accommodations—postal clerks currently refer customers to other windows for a variety of reasons—and the very small number of draft registrants processed by postal clerks monthly," the court said.●

MEMORIAL TO VICTIMS OF JASENOVAC DEATH CAMP

HON. GERALD D. KLECZKA

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. KLECZKA. Mr. Speaker, the memory of the Jasenovac Death Camp from World War II stands as a recurring nightmare of man's inhumanity to man. More than 800,000 people died at the camp, including more than 750,000 Serbian people. These victims were murdered by the fascist Ustashi of Hitler's puppet Independent State of Croatia, a declared enemy of the United States.

The Serbian Orthodox Church long ago set aside September 12 of every year to commemorate the 750,000 innocent victims, and on September 2, 1984, a Serbian Orthodox Church was consecrated in Jasenovac, Yugosolvia, in memory of those killed.

The Reverend Milan Markovina of the St. Sava Serbian Orthodox Cathedral in Milwaukee, WI, is leading the efforts to keep the memory of these victims alive, and he should be commended for his efforts. A huge percentage of Yugoslavia's population died at the vicious hands of the Nazis. A higher proportion of Yugoslavia's population was killed than that of any other country during the war. These deaths must not be forgotten.

Mr. Speaker, it is said that those who cannot remember the past are condemned to repeat it. If we are to prevent slaughters like that which occurred in Yugoslavia and other countries during World War II, we must follow the lead of concerned people such as Reverend Markovina. To remember past tragedies does not require bitterness or vindictiveness.

What is needed is the love and compassion to maintain an eternal vigilance in our own world. We cannot change the past, but we can honor it. We cannot predict the future, but we can act to protect it. I pay tribute to Reverend Markovina and his efforts at keeping our memories of past atrocities alive, while leading the path to a better tomorrow.●

IN HONOR OF JOSEPH JUSTINIAN CHRISTIAN

HON. RON de LUGO

OF VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. DE LUGO. Mr. Speaker, true dedication is a quality that is found in very few people. Virgin Islanders, however, have not had to look very far to find a man who exemplifies this quality. Joseph Justinian Christian has dedicated 42 years of his life to the people of the U.S. Virgin Islands, and for that we express our gratitude.

In Resolution 1181 to honor Mr. Christian, the 15th Legislature of the Virgin Islands commended him for his 21 years of service to the Department of Health. He began there in July 1942, maintaining stock records of medicines and food supplies as clerk-general at Knud-Hansen Hospital. Through continued study, Mr. Christian was able to use his knowledge of accounting and management to improve the standard of operation in the VI Department of Health.

Mr. Christian spent another 21 years working with other numerous departments in the Virgin Islands government. His clerical skills in the legislative offices from 1952-59 proved to be invaluable to the maintenance of important legislative documentation. His experience in accounting, bill drafting, budget writing, and commercial law afforded him the unique privilege of preparing the first line-item budget for the Virgin Islands. That is a format that is still in use today. Mr. Speaker, I ask that the Members of the U.S. House of Representatives join with me in honoring Joseph Christian of St. Croix, U.S. Virgin Islands.●

THE GREAT ACCOMPLISHMENT OF OHIO FIRE DIVISION TEAM

HON. CHALMERS P. WYLIE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. WYLIE. Mr. Speaker, I am very proud that this year's winner of the International Rescue and Emergency Care Association's 34th annual first aid contest was a five-man Columbus, OH, fire division team. The contest was held in Cherry Hill, NJ, and included 24 teams representing the United States, Canada, and Aruba. This is the Columbus team's fourth world title in 17 years and is the result of much hard work. The team anchor is Chuck Werner, who is 50 years old, the other members of the winning team include team captain Gary Patrick, 35 years old; Barry Cheney, 39 years old; Marco Miller, 35 years old; and Robert Moore, 35 years old. They credit their ability to their every day encounter with emergencies in Columbus. The teams were judged on speed, team skills, and the priority of treatment of injuries. Each team was given three test problems to solve and 20 minutes allotted for each problem. This is a very honorable distinction to be bestowed on our city and our team. I commend them for their hard work, showmanship, and excellence in performing their duties. It gives our city a great deal of pride to be represented by such a team and a great deal of confidence that they serve our city in times of emergency. Congratulations on this great accomplishment.●

NATIONAL SCIENCE WEEK—1985

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. FUQUA. Mr. Speaker, I would like to begin by making several observations. First, the already critical importance of science and technology innovation to society will steadily increase in the future.

Second, I have observed that the American public is genuinely interested in science and technology. A survey done for the National Science Board's report Science Indicators 1982 found that 70 percent of Americans held favorable attitudes toward science and technology, and that 20 percent of them could be called attentive and informed to some degree. Thus, we need public education programs which will take advantage of the interest of both the attentive 20 percent and reach out to the remaining 80 percent of our citizens.

Recognizing the need to increase the American public's knowledge and their awareness of the importance of science, technology, and engineering in our daily lives, the National Science Foundation last year began a project to attract interest in science by designating 1 week in May as Science Week. The first Science Week was aimed primarily at the Washington area audience.

It was made possible with funding by several private corporations who enthusiastically shared the National Science Foundation's goals of improving the quality of science programs which presently exist, as well as encouraging the development of new approaches. Science Week 1984 was comprised of a week's worth of diverse activities including: A hearing by the House Science and Technology Committee on the research infrastructure at colleges and universities; a Congressional Reception and Science Demonstration for families at the Air and Space Museum; the creation of a lecture series honoring the achevement of our first American scientist, Benjamin Franklin, and delivered by 1983 Nobel Laureate, Dr. William Fowler; and the creation of a unique, cooperative workshop involving scientists and the students of Benjamin Banneker High School.

Science Week 1984 was successful as an initial attempt to convey the importance and excitement of science and technology to its Washington audience. Encouraged by the enthusiasm and interest generated by last year's program, the National Science Foundation perceives the need to broaden the scope of succeeding Science Weeks to include activities around the United States, in order to develop a truly national program. To that end, Science Week 1985, planned for the week of May 12-18, 1985, will encourage grassroots organizations—schools, universities, museums, professional societies, industry, and individuals—to work cooperatively with the National Science Foundation and each other to develop programs, events, and materials that will further increase public attention and commitment to science and technology.

The major goals of Science Week 1985 are to broaden the audience that now considers itself informed about or sympathetic to science issues and to attract the interest of more young people, decisionmakers, and other nonscientists who come into contact with science and technology daily, but who are not aware of the impact that science has, and will continue to have, on their lives.

With a high level of grassroots involvement, public visibility, enthusiasm, and cooperative efforts—encouraged and assisted by the National Science Foundation—Science Week could become an important annual event. It seems to me that Science Week should stand as a celebration of science: A popular activity that draws attention, creates interest and a personal identification between science and the American public on a national level, while stimulating other educational activities that are more specific in content and local in scale.

I plan to introduce a resolution when the 99th Congress convenes in January, designating May 12-18, 1985, as National Science Week 1985. Science Week 1985 represents to me, a valuable opportunity to define that nebulous term "Science" in more meaningful language that will be embraced by a broader audience. It is also an ideal way to capitalize on the inherent interest that most of us, young and old alike, share about natural wonders and phenomenon, and on our human desire to improve the present environment or to seek challenging new ones. I urge my colleagues to support that resolution when introduced next year.●

ST. JAMES TOWERS CELEBRATES ITS 21ST ANNIVERSARY

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. TOWNS. Mr. Speaker, adequate housing remains a major concern for constituents in the 11th Congressional District. One of the most successful housing efforts in New York City has been the Mitchell-Lama cooperative program. One of the oldest cooperatives in Brooklyn is the 326-unit St. James Towers complex which is in its 21st year. St. James Towers' presence in the Ft. Greene/Clinton Hill area, of my district, has contributed to a stabilized community and the economic development of the surrounding neighborhood.

I want to congratulate the board of directors and the residents of St. James Towers, Inc., on their 21st anniversary. I believe that this cooperative provides an outstanding example of moderate income housing for urban communities. The city and country would greatly benefit from additional cooperatives such as St. James Towers.●

RECOGNITION OF SISTER MARIE MICHELLE PEARTREE

HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. CONABLE. Mr. Speaker, I'd like to pay special tribute today to Sister Marie Michelle Peartree, member of the Sisters of St. Joseph of Rochester, NY and president of the American Association of Homes for the Aging.

This October, Sister Marie Michelle will be ending her 2-year tenure as president of the American Association of Homes for the Aging, the first woman ever to hold that office. Her energetic and dedicated leadership has brought dramatic change to this association of nearly 2,400 nonprofit health-related and housing facilities for the elderly. Under her guidance and inspiration, and that of Sheldon L. Goldberg, executive vice president, AAHA has sustained an all-time high in membership growth by providing the services and promoting the philosophy that enable these nonprofit facilities to provide quality care to their residents. Among her initiatives at AAHA must be mentioned the implementation of a national group purchasing program, the first of its kind in the country; the organization of a capital formation program which will help finance new care facilities for the elderly; and the establishment of a national accreditation program for nonprofit continuing care retirement communities.

Prior to being elected President in late 1982, Sister Marie Michelle served as AAHA's president-elect, vice president, and chairman of the public policy and resident life committees. She has been a member of the AAHA executive board and house delegates since 1979. Nationally, Sister Marie Michelle served on the White House Conference on Aging Task Force in 1980 and 1981 and was a delegate to that conference in 1981. Within Rochester, she has served on the boards of Catholic Charities, the Rochester Regional Hospital Association, the Monroe County Long Term Care Program, Inc., the YWCA, and the United Way.

Sister holds a master's degree in hospital administration from Saint Louis University, as well as a master's in science in education degree and a bachelor of science degree from Nazareth College. In addition to her long time concern with health issues and the elderly, Sister Marie Michelle spent 23 years as a teacher and school principal.

Sister Marie Michelle brought an unequaled degree of energy and enthusiasm to the American Association of Homes for the Aging. This October she will be honored at AAHA's annual meeting in San Antonio. Those of us in Congress who have been working to assure a secure future for the elderly of this country join with AAHA in celebrating Sister's achievements and her untiring service to the elderly.●

MART NIKLUS, AN ESTONIAN FREEDOM FIGHTER

HON. NANCY L. JOHNSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mrs. JOHNSON. Mr. Speaker, I would like to share with my colleagues the concerns that I and my Estonian constituents have regarding the deterioration of human rights in Soviet occupied Estonia, and specifically the situation of Mart Niklus, an imprisoned Estonian freedom fighter.

Mrs. Vaike Lugus, president of the Connecticut Estonian Society, spoke clearly on behalf of Mart Niklus and the struggle the Estonian people face:

September 1984 marks 40 years of Russian occupation in Estonia.

Estonian people have lost their freedom. Estonian human rights activists are arrested and sent to prison and labor camps.

Estonian Americans are especially concerned about Mart Niklus, an Estonian freedom fighter, who at the present time is a prisoner in the infamous Chistopol prison. He is held in solitary confinement, and his health is deteriorating rapidly.

Mart Niklus has been an outspoken defender of human rights. Adopted by Amnesty International, he must now rely upon our courage and determination to not let his suffering be in vain, as we speak out in protest of the human rights abuses in the Soviet Union. I hope that increased contact between our two nations will lead to a halt to the repressive actions of the current leaders.●

MICHAEL D. TOMSEY: VA'S OUTSTANDING HANDICAPPED EMPLOYEE FOR 1984

HON. G.V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. MONTGOMERY. Mr. Speaker, Vietnam veterans are often misrepresented to the public. The vast majority of the 8.2 million living today, however, are well-adjusted men and women contributing to the standards of life they so ably represented while members of the Armed Forces more than a decade ago.

I am pleased today to pay tribute to one such representative of that era. Michael D. Tomsey, a 34-year-old disabled combat veteran of Vietnam, has been named 1 of the 10 Outstanding Handicapped Federal Employees of 1984.

Of particular pride to me is the fact that Mr. Tomsey is the vocational rehabilitation and counseling officer at the Veterans Administration Regional Office of Baltimore. Maryland veterans are assured of the best in VA services through Mr. Tomsey.

As an 18-year-old marine in Vietnam, Mr. Tomsey lost the use of his right hand and suffered severe wounds to both legs. While recovering in the hospital, he taught himself to write with his left hand and completed his high school education.
